National Grid Transco close period trading update
for the six months ended 30 September 2004

Continued strong performance

National Grid Transco plc (the "Group") is today issuing its trading update prior to entering its interim results on Thursday 18 November 2004.

In line with our expectations, Group operating performance has been strong. However, as anticipated by the planned year-on-year increase in expenditure on the replacement of UK gas mains, most of which is in the second half, and period-on-period weakness in the US dollar. Hence overall Group operating profit (excluding goodwill amortisation) will be marginally lower than the same period last year.

Group profit before tax (excluding exceptional items and goodwill amortisation) is expected to be higher than last year, reflecting the beneficial impact on the Group's interest charge of continued debt management.

The effective tax rate on profit before tax (excluding exceptional items and goodwill amortisation) is expected to be lower than last year's rate.

Edgar Filing: NATIONAL GRID TRANSCO PLC - Form 6-K

On 31 August, the Group completed the 1.1bn pounds acquisition of the UK operations of Crown Ca higher than at the year-end, mainly reflecting the cost of this acquisition, the normal first strengthening of the US dollar since 31 March 2004.

Also on 31 August, the Group announced the sale of four UK gas distribution networks. The sale April 2005.

Note

In our full year results, we indicated that we would implement FRS20 (accounting for share bas on the expected financial impact. We have now implemented FRS20. To align with our presen 2003/04, we have also reclassified losses on disposal of fixed assets in the prior half year fr within the depreciation charge. The net effect of these changes is shown in the table below. against the restated figures for the prior period.
