### PART I

#### Item 1. Business

We were organized as a Texas corporation on April 19, 1961. Until September 1969, we operated as a licensee under the Small Business Investment Act of 1958. At that time, we transferred to our wholly-owned subsidiary, Capital Southwest Venture Corporation ("CSVC"), certain assets and our license as a small business investment company ("SBIC"). CSVC is a closed-end, non-diversified investment company of the management type registered under the Investment Company Act of 1940 (the "1940 Act"). Prior to March 30, 1988, we were registered as a closed-end, non-diversified investment company under the 1940 Act. On that date, we elected to become a business development company subject to the provisions of the 1940 Act, as amended by the Small Business Incentive Act of 1980. Because we wholly own CSVC, the portfolios of both entities are referred to collectively as "our", "we" and "us".

We are a venture capital investment company whose objective is to achieve capital appreciation through long-term investments in businesses believed to have favorable growth potential. Our investment interests are focused on expansion financings, management buyouts, recapitalizations, industry consolidations and early-stage financings in a broad range of industry segments. The portfolio is a composite of companies in which we have major interests as well as a number of developing companies and marketable securities of established publicly-owned companies. We make available significant managerial assistance to the companies in which we invest and believe that providing material assistance to such investee companies is critical to their business development activities.

The twelve largest investments we own had a combined cost of \$36,296,096 and a value of \$494,505,176, representing 89.8% of the value of our consolidated investment portfolio at March 31, 2006. For a narrative description of the twelve largest investments, see "Twelve Largest Investments - March 31, 2006" on pages 9 through 11 of our Annual Report to Shareholders for the Year Ended March 31, 2006 (our "2006 Annual Report") which is herein incorporated by reference. Certain of the information presented on the twelve largest investments has been obtained from the respective companies and, in certain cases, from public filings of such companies. The financial information presented on each of the respective companies is from such companies' audited financial statements.

We compete for attractive investment opportunities with venture capital partnerships and corporations, venture capital affiliates of industrial and financial companies, SBICs and wealthy individuals.

The number of persons employed by us at March 31, 2006 was seven.

Our internet website address is [www.capitalsouthwest.com](http://www.capitalsouthwest.com). You can review the filings we have made with the U.S. Securities and Exchange Commission, free of charge by linking directly from our website to NASDAQ, a database that links to EDGAR, the Electronic Data Gathering, Analysis, and Retrieval System of the SEC. You should be able to access our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934. The charters adopted by the committees of our board of directors are also available on our website.

### Item 1A. Risk Factors

You should carefully consider the risks described below and all other information contained in this annual report on Form 10-K, including our consolidated financial statements and the related notes thereto before making a decision to purchase our common stock. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties not presently known to us, or not presently deemed material by us, may also impair our operations and performance. If any of the following risks actually occur, our business, financial condition or results of operations could be materially adversely affected. If that happens, the trading price of our common stock could decline, and you may lose all or part of your investment.

1

There is uncertainty regarding the value of our investments in restricted securities.

Our net asset value is based on the values assigned to the various investments in our portfolio, determined in good faith by our board of directors. Because of the inherent uncertainty of the valuation of portfolio securities which do not have readily ascertainable market values, our fair value determinations may differ materially from the values which would be applicable to unrestricted securities having a public market.

The lack of liquidity of our restricted securities may adversely affect our business.

Our portfolio contains many securities which are subject to restrictions on sale because they were acquired from issuers in "private placement" transactions or because we are deemed to be an affiliate of the issuer. Unless an exemption from the registration requirements of the Securities Act of 1933 is available, we will not be able to sell these securities publicly without the expense and time required to register the securities under applicable federal and state securities laws. In addition, contractual or practical limitations may restrict our ability to liquidate our securities in portfolio companies, because we may own a relatively large percentage of the issuer's outstanding securities. Sales may also be limited by unfavorable market conditions. The illiquidity of our investments may preclude or delay the disposition of such securities, which may make it difficult for us to obtain cash equal to the value at which we record our investments.

There is limited publicly available information regarding the companies in which we invest.

Many of the securities in our portfolio are issued by privately held companies. There is generally little or no publicly available information about such companies, and we must rely on the diligence of our management to obtain the information necessary for our decision to invest. There can be no assurance

## Edgar Filing: CAPITAL SOUTHWEST CORP - Form 10-K

that such diligence efforts will uncover all material information necessary to make fully informed investment decisions.

Certain of our portfolio companies are highly leveraged.

Many of our portfolio companies have incurred substantial indebtedness in relation to their overall capital base. Such indebtedness often has a term that will require the balance of the loan to be refinanced when it matures. If portfolio companies cannot generate adequate cash flow to meet the principal and interest payments on their indebtedness, the value of our investments could be reduced or eliminated through foreclosure on the portfolio company's assets or by the portfolio company's reorganization or bankruptcy.

Fluctuations may occur in our quarterly results.

Our quarterly operating results may fluctuate materially due to a number of factors including, among others, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our portfolio companies' markets, the ability to find and close suitable investments, and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods. See "Management's Discussion and Analysis of Financial Condition and Results of Operations."

We may not continue to qualify for pass-through tax treatment.

We may not qualify for conduit tax treatment as a Regulated Investment Company ("RIC") if we are unable to comply with the requirements of Subchapter M of the Internal Revenue Code. If we fail to satisfy such requirements and cease to qualify for conduit tax treatment, we will be subject to federal taxes on our net investment income. The loss of this pass-through tax treatment could have a material adverse effect on the total return, if any, obtainable from an investment in our common stock.

Historically, we have distributed net investment income semi-annually. Our current intention is to continue these distributions of ordinary income to

2

our stockholders. Also, historically, we have retained net realized capital gains, paid the resulting tax at the corporate level and retained the after-tax gains to supplement our equity capital and support continuing additions to our portfolio. Our shareholders then report such capital gains on their tax returns, receive credit for the tax we paid and are deemed to have reinvested the amount of the retained after-tax gain. We cannot assure you that we will achieve investment results or maintain a RIC tax status that will allow any specified level of cash distributions or our shareholders' current tax treatment of realized and retained capital gains.

Our financial condition and results of operations will depend on our ability to effectively manage any future growth.

Sustaining growth depends on our ability to identify, evaluate, finance, and invest in companies that meet our investment criteria. Accomplishing such results on a cost-effective basis is a function of our marketing capabilities and skillful management of the investment process. Failure to achieve future growth could have a material adverse effect on our business, financial condition, and results of operations.

We are dependent upon management for our future success.

## Edgar Filing: CAPITAL SOUTHWEST CORP - Form 10-K

Selection, structuring and closing our investments depends upon the diligence and skill of our management, which is responsible for identifying, evaluating, negotiating, monitoring and disposing of our investments. Our management's capabilities may significantly impact our results of operations. If we lose any member of our management team and he/she cannot be promptly replaced with an equally capable team member, our results of operations could be significantly impacted.

We operate in a highly competitive market for investment opportunities.

We compete with a number of private equity funds, other investment entities and individuals for investment opportunities. Some of these competitors are substantially larger and have greater financial resources, and some are subject to different and frequently less stringent regulation. As a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time and there can be no assurance that we will be able to identify and make investments that satisfy our objectives.

Changes in laws or regulations governing our operations or our failure to comply with those laws or regulations may adversely affect our business.

We and our portfolio companies are subject to regulation by laws at the local, state and federal level. These laws and regulations, as well as their interpretation, may be changed from time to time. Accordingly, any changes in these laws and regulations or failure to comply with them could have a material adverse effect on our business. Certain of these laws and regulations pertain specifically to business development companies such as ours.

Failure to deploy new capital may reduce our return on equity.

If we fail to invest our capital effectively, our return on equity may be decreased, which could reduce the price of the shares of our common stock.

Investment in shares of our common stock should not be considered a complete investment program.

Our stock is intended for investors seeking long-term capital appreciation. Our investments in portfolio securities generally require many years to reach maturity, and such investments generally are illiquid. An investment in our shares should not be considered a complete investment program. Each prospective purchaser should take into account his or her investment objectives as well as his or her other investments when considering the purchase of our shares.

3

Our common stock often trades at a discount from net asset value.

Our common stock is listed on The Nasdaq Stock Market ("NASDAQ"). Stockholders desiring liquidity may sell their shares on NASDAQ at current market value, which has often been below net asset value. Shares of closed-end investment companies frequently trade at discounts from net asset value, which is a risk separate and distinct from the risk that a fund's performance will cause its net asset value to decrease.

The market price of our common stock may fluctuate significantly.

The market price and marketability of shares of our common stock may from time to time be significantly affected by numerous factors, including our

## Edgar Filing: CAPITAL SOUTHWEST CORP - Form 10-K

investment results, market conditions, and other influences and events over which we have no control and that may not be directly related to us.

### Item 1B. Unresolved Staff Comments

We have no unresolved staff comments to report pursuant to Item 1B.

### Item 2. Properties

We maintain our offices at 12900 Preston Road, Suite 700, Dallas, Texas, 75230, where we rent approximately 3,700 square feet of office space pursuant to a lease agreement expiring in February 2008. We believe that our offices are adequate to meet our current and expected future needs.

### Item 3. Legal Proceedings

We have no material pending legal proceedings to which we are a party or to which any of our property is subject.

### Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of security holders during the quarter ended March 31, 2006.

"Selected Consolidated Financial Data" on page 37 of our 2006 Annual Report is herein incorporated by reference.

### Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Pages 34 through 36 of our 2006 Annual Report are herein incorporated by reference.

### Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are subject to financial market risks, including changes in marketable equity security prices. We do not use derivative financial instruments to mitigate any of these risks.

Our investment performance is a function of our portfolio companies' profitability, which may be affected by economic cycles, competitive forces, foreign currency fluctuations and production costs including labor rates, raw

material prices and certain basic commodity prices. Most of the companies in our investment portfolio do not hedge their exposure to raw material and commodity

## Edgar Filing: CAPITAL SOUTHWEST CORP - Form 10-K

price fluctuations. However, the portfolio company with the greatest exposure to foreign currency fluctuations generally hedges its exposure. All of these factors may have an adverse effect on the value of our investments and on our net asset value.

Our investment in portfolio securities includes fixed-rate debt securities which totaled \$10,335,871 at March 31, 2006, equivalent to 1.9% of the value of our total investments. Generally, these debt securities are below investment grade and have relatively high fixed rates of interest, therefore; minor changes in market yields of publicly-traded debt securities have little or no effect on the values of debt securities in our portfolio and no effect on interest income. Our investments in debt securities are generally held to maturity and their fair values are determined on the basis of the terms of the debt security and the financial condition of the issuer.

A portion of our investment portfolio consists of debt and equity securities of private companies. We anticipate little or no effect on the values of these investments from modest changes in public market equity valuations. Should significant changes in market valuations of comparable publicly-owned companies occur, there may be a corresponding effect on valuations of private companies, which would affect the value and the amount and timing of proceeds eventually realized from these investments. A portion of our investment portfolio also consists of restricted common stocks of publicly-owned companies. The fair values of these restricted securities are influenced by the nature of applicable resale restrictions, the underlying earnings and financial condition of the issuers of such restricted securities and the market valuations of comparable publicly-owned companies. A portion of our investment portfolio also consists of unrestricted, freely marketable common stocks of publicly-owned companies. These freely marketable investments, which are valued at the public market price, are directly exposed to equity price risks, in that a change in an issuer's public market equity price would result in an identical change in the value of our investment in such security.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

As of March 31, 2006, an evaluation was performed under the supervision and with the participation of our management, including the President and Chairman of the Board and Secretary-Treasurer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934). Based on that evaluation, the President and Chairman of the Board and Secretary-Treasurer concluded that our disclosure controls and procedures are effective to ensure that the information required to be disclosed is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and is accumulated and communicated to management, including the President and Chairman of the Board and Secretary-Treasurer, as appropriate, to allow timely decisions regarding such required disclosure.

During the fiscal quarter ended March 31, 2006, there were no changes to the internal control over financial reporting that have materially affected, or are reasonably likely to materially affect our internal controls over financial reporting.

Item 9B. Other Information

None.
