Explanatory Note

We are filing this Amendment No. 1 on Form 10-Q/A to Simtek Corporation's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2006, which was originally filed with the Securities and Exchange Commission (the "SEC") on May 15, 2006 (the "Original Form 10-Q") to reflect that Simtek has determined that it is appropriate to recognize the non-refundable advance royalty payments under its License and Development Agreement, dated March 26, 2006, with Cypress Semiconductor Corporation ("Cypress") as royalty revenue upon receipt from Cypress. Therefore, this Form 10-Q/A restates Simtek's consolidated financial statements as of and for the three months ended March 31, 2006 such that total revenue for such three month period is reported as \$5,778,000 (\$1,035,000 more than the \$4,743,000 reported in the Original Form 10-Q), net loss for such three months period is reported as \$901,000 (rather than the \$1,936,000 reported in the Original Form 10-Q), total liabilities are reduced from \$8,430,000 (as reported in the Original Form 10-Q) to \$7,395,000, accumulated deficit is reduced from \$48,127,000 (as reported in the Original Form 10-Q) to \$47,092,000, and total shareholders' equity is increased from

Edgar Filing: SIMTEK CORP - Form 424B3

\$2,008,000 (as reported in the Original Form 10-Q) to \$3,043,000. We decided to amend and restate after management and the audit committee of the Board of Directors discussed with our independent registered public accounting firm the recognition of such non-refundable advance royalty payments. We concluded that our financial statements for the three months ended March 31, 2006 should be restated.

Part I of this Form 10-Q/A contains more information about the restatement in "Note 2. Change in Accounting Principle," which accompanies the condensed consolidated financial statements in Item 1.

This Form 10-Q/A speaks as of March 31, 2006, and except as noted herein, we have not materially modified or updated the disclosures herein for events that occurred at a later date. Events occurring after the date of the Original Form 10-Q, and other disclosures necessary to reflect subsequent events, have been addressed, in accordance with applicable disclosure requirements, in our Form 8-Ks filed after March 31, 2006 will be addressed, in accordance with applicable disclosure requirements, in our Form 10-Q for the three months ended June 30, 2006.

SIMTEK CORPORATION NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

The consolidated financial statements include the accounts of Simtek and its wholly owned subsidiaries. Intercompany accounts and transactions have been eliminated. The financial statements included herein are presented in accordance with the requirements of Form 10-Q and consequently do not include all of the disclosures normally made in the registrant's annual Form 10-K filing. These financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Annual Report and Form 10-K and Annual Report and Form 10-K/A for Simtek Corporation ("Simtek" or the "Company") filed on April 7, 2006 and April 28, 2006, respectively for fiscal year 2005.

In the opinion of management, the unaudited financial statements reflect all adjustments of a normal recurring nature necessary to present a fair statement of the results of operations for the respective interim periods. The year-end balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. Results of operations for the interim periods are not necessarily indicative of the results of operations for the full fiscal year.

Stock-Based Compensation

Adoption of SFAS 123(R)

Effective January 1, 2006, the Company adopted the fair value recognition provisions of Statement of Financial Accounting Standard 123(R) "Share-Based Payment" ("SFAS 123(R)") using the modified prospective transition method. In addition, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 107 "Share-Based Payment" ("SAB 107") in March, 2005, which provides supplemental SFAS 123(R) application guidance based on the views of the

Edgar Filing: SIMTEK CORP - Form 424B3

SEC. Under the modified prospective transition method, compensation cost recognized in the quarterly period ended March 31, 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123, and (b) compensation cost for all share-based payments granted beginning January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS 123(R). In accordance with the modified prospective transition method, results for prior periods have not been restated.

The adoption of SFAS 123(R) resulted in stock compensation expense for the quarterly period ended March 31, 2006 of \$119,000 to loss from continuing operations and loss before income taxes. The Company did not recognize a tax benefit from the stock compensation expense because the Company considers it is more likely than not that the related deferred tax assets, which have been reduced by a full valuation allowance, will not be realized. The following table summarizes the effects of the share-based compensation resulting from the application of SFAS No. 123(R) to options granted under the Company's stock option plan.

SIMTEK CORPORATION NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The Black-Scholes option-pricing model was used to estimate the option fair values. The option-pricing model requires a number of assumptions, of which the most significant are, expected stock price volatility and the expected option term (the amount of time from the grant date until the options are exercised or expire). Expected volatility was calculated based upon actual historical stock price movements over the most recent periods ending March 31, 2006 equal to the expected option term. In accordance with SFAS No. 123(R), the Company adjusts share-based compensation on a quarterly basis for changes to the estimate of expected forfeitures based on actual forfeiture experience. The effect of

Edgar Filing: SIMTEK CORP - Form 424B3

adjusting the forfeiture rate for all expense amortization after January 1, 2006 is recognized in the period the forfeiture estimate is changed. The effect of forfeiture adjustments in the first quarter of 2006 was insignificant. The expected option term was calculated using the "simplified" method permitted by SAB 107.

SFAS 123(R) requires tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options ("excess tax benefits") to be classified and reported as both an operating cash outflow and a financing cash inflow upon adoption of SFAS 123(R). As discussed in Note 7 - Taxes from the Company's report on Form 10-K for the period ending December 31, 2005, as a result of the Company's net operating losses, the excess tax benefits that would otherwise be available to reduce income taxes payable have the effect of increasing the Company's net operating loss carry forwards. Accordingly, because the Company is not able to realize these excess tax benefits, such benefits have not been recognized in the condensed statement of cash flow for the quarterly period ended March 31, 2006.

Pro-Forma Stock Compensation Expense for the Quarterly Period Ended March 31, 2005

Prior to January 1, 2006, as permitted under the SFAS No. 123, Accounting for Stock-Based Compensation, the Company accounted for its stock-based compensation in accordance with the provisions of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees. As such, compensation expense was recorded on the date of grant if the current market price of the underlying stock exceeds the exercise price. Certain pro forma net loss and EPS disclosures for employee stock option grants are included below as if the fair value method as defined in SFAS No. 123 had been applied. Transactions in equity instruments with non-employees for goods or services are accounted for by the fair value method. Had compensation cost been determined based on the fair value at the grant dates for awards under employee stock based compensation plans consistent with the fair value method for the quarter ending March 31, 2005, the Company's net loss and EPS would have been increased to the pro forma amounts indicated below.

 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

In accordance with the modified prospective transition method of SFAS 123(R), the prior comparative quarterly results have not been restated.

Stock Options as of the Quarterly Period Ended March 31, 2006

The Company adopted a Non-Qualified Stock Option Plan in 1994, as amended, that authorizes 18,600,000 non-qualified stock options that may be granted to directors, employees, and consultants. The plan permits the issuance of non-statutory options and provides for a minimum exercise price equal to 100% of the fair market value of the Company's common stock on the date of grant. The maximum term of options granted under the plans are 10 years and options granted to employees expire three months after the termination of employment. In 2004, the Non-Qualified Stock Option Plan was extended for 10 more years. None of the options may be exercised during the first six months of the option term.

The following table summarizes stock options outstanding and changes during the quarterly period ended March 31, 2006:

	Number of Shares	Weighted Average Exercise Price

There were no options exercised in the period ended March 31, 2006. Shares available for grant under the Plan as of March 31, 2006 were 5,665,017.

Edgar Filing: SIMTEK CORP - Form 424B3

Stock options outstanding and currently exercisable at March 31, 2006 are as follows:

Exercise Price	Outstanding Number Outstanding	Weighted Average Remaining Contractual Life in Months	Weighted Average Exercise Price	Number Exercisable

Total estimated unrecognized compensation cost from unvested stock options as of March 31, 2006 was approximately \$1 million, which is expected to be recognized over the next three years.

The weighted average per share fair value of stock options granted during the quarterly periods ending March 31, 2006 and 2005 was \$0.1727 and \$0.3856, respectively. The fair value was estimated as of the grant date using the Black-Scholes option pricing model with the following assumptions:

	Three Months Ended March 31,	
	2006	2005
Volatility	85%	83%
Expected option term	4 years	4 years
Risk-free interest rate	4.59%	3.54%
Expected dividend yield	0%	0%

Modifications of Stock Options Granted

In May 2005, the Company accelerated vesting of certain unvested and out-of-the-money stock options previously awarded to employees and officers. Because the price of the Company's common stock was \$0.57 on the day of acceleration, the options, which are exercisable at \$0.62 and above, had no economic value on the date of acceleration. As a result of the acceleration, options to purchase approximately 1.7 million shares of Simtek common stock are now exercisable. Options held by non-employee directors were excluded from the vesting acceleration.

SIMTEK CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Non-competition Agreement

In December 2005, the Company entered into a non-competition agreement with Zentrum Mikroelektronik Dresden AG ("ZMD") as part of the acquisition of ZMD's nvSRAM product line. The Company assigned a value of \$8,910,000 to the non-competition agreement in December 2005. The value assigned to the non-competition agreement is being amortized on a straight-line basis over its five-year life. The Company recorded an expense, for the amortization, of approximately \$451,000 to sales and marketing for the three months ended March 31, 2006.

Goodwill

Goodwill represents the excess of the total amount paid to ZMD for the nvSRAM assets acquired on December 30, 2005 and the fair value assigned to specific assets. This amount will not be amortized, but will be reviewed for impairment on a periodic basis. As of March 31, 2006 no impairment of value has been recorded.

Accumulated other comprehensive income (loss)

The functional currency for Simtek GmbH is the local currency, the Euro. Assets and Liabilities for this foreign operation are translated at the exchange rate in effect at the balance sheet date, and income and expenses are translated at average exchange rates prevailing during the period. Translation gains or losses are included within shareholders' equity as part of accumulated other comprehensive income (loss).

2. Change in Accounting Principle

The Company originally recorded the receipt of the non-refundable prepaid royalties received from Cypress on March 24, 2006 as a liability to be recognized as revenue in the future based upon shipments of products by Cypress to its customers (See Note 7 below). However, the Company subsequently determined that the non-refundable prepaid royalties are more appropriately accounted for as minimum royalty payments as described in Staff Accounting Bulletin 101 "Revenue Recognition in Financial Statements." All of the revenue recognition criteria contained in Statement of Financial Accounting Concepts No. 5 "Recognition and Measurement in Financial Statements of Business Enterprises" have been met. Under the previous method of accounting, if Cypress does not actually sell product, Simtek would never recognize the revenue. Since Simtek fulfilled all of its obligations prior to receipt of the payment, the non-refundable payments are more properly accounted for as minimum royalty payments and recorded as revenue when received.

The following table reflects the amounts as previously reported and as restated:

3. Liquidity

During the three months ended March 31, 2006 and the twelve months ended December 31, 2005, the Company incurred a net loss of approximately \$1,936,000 and \$5,785,000, respectively and has an accumulated deficit of \$48,127,000 as of March 31, 2006. The Company was also not in compliance with its debentures throughout 2005 and the first three months of 2006, but was successful in obtaining waivers through April 1, 2007 from the debenture holders. The Company will issue the debenture holders a total of 50,000 warrants for receipt of the waiver. The Company has working capital of approximately \$4,846,000 as of March 31, 2006.

The Company operates in a volatile industry, whereby its average selling prices and product costs are influenced by competitive factors. Furthermore, the Company continues to incur significant research and development costs for product development. These factors create pressures on sales, costs, earnings and cash flows, which will impact liquidity.

If the Company is unable to achieve profitable operations in 2006 it may result in increased liquidity pressure on the Company, whereby it might be required to enter into debt or equity arrangements that may not be as otherwise favorable to the Company.

4. Revenue Recognition

Revenue Recognition - Product sales revenue is recognized when a valid purchase order has been received with a fixed price and the products are shipped to customers FOB origin (Colorado Springs, Colorado or Dresden, Germany), including distributors. Based on historic business with the majority of the Company's customers and, in the case of new customers, the Company is reasonably assured that collectibility on our shipments will occur. Customers receive a one-year product warranty and sales to distributors are subject to a limited

Edgar Filing: SIMTEK CORP - Form 424B3

product exchange program and a price protection in the event of changes in the Company's product price. The Company provides a reserve for possible product returns, product price protection and warranty costs at the time the sale is recognized. The Company has a detailed procedure to ensure that its estimates for reserves are reasonable and reliable. The reserve for product returns is based on the actual inventory value of the Company's semiconductor products held by its distributors. The Company's distributors are permitted to rotate up to 5% of their stock every six months with the stipulation that they must submit a replacement order of equal dollar value to the stock that they are returning. The reserve for price protection is used when the Company authorizes special pricing to one of its distributors for a specific customer. To date, the estimates have not been materially different from the credits we have issued under these reserves.

Revenue from royalties related to non-refundable prepaid royalty payments is recognized upon receipt. Revenue from royalties related to sales of products by license partners is recognized upon the notification to us of shipment of product from the Company's technology license partners to direct customers.

5. Inventories

6. Convertible Debentures

On July 1, 2002, the Company received funding of \$3,000,000 in a financing transaction with Renaissance Capital Growth and Income Fund III, Inc., Renaissance US Growth & Investment Trust PLC and BFSUS Special Opportunities Trust PLC. RENN Capital Group, Inc. is the agent for the RENN investment funds. One of the Company's directors holds the position of Senior Vice President of RENN Capital Group. The \$3,000,000 funding consists of convertible debentures with a 7-year term at a 7.5% per annum interest rate. Each fund equally invested \$1,000,000. The holder of the debenture shall have the right, at any time, to convert all, or in multiples of \$100,000, any part of the Debenture into fully paid and nonassessable shares of Simtek Corporation common stock. The debentures were originally convertible into Simtek common stock at \$0.312 per share, which was in excess of the market price per share on July 1, 2002. Through March 31, 2006, the Company was not in compliance with two of the covenants set forth in the loan agreement. These covenants relate to the interest coverage ratio and

Edgar Filing: SIMTEK CORP - Form 424B3

debt to equity ratio. On May 10, 2006, the Company received a waiver for the two covenants through April 1, 2007. The Company will issue the debenture holders a total of 50,000 warrants for receipt of the waiver. However, significant variances in future actual operations from the Company's current estimates could result in the reclassification of this note to current liabilities. The Convertible Debentures allows for an adjustment in the conversion price, if the Company issues Common Stock in connection with an equity financing, where the sale price is less than the conversion price of \$0.312. This occurred in December 2005 in connection with the common stock sale of \$11,000,000 at a price of \$0.16 per share. Pursuant to the terms of the 2002 convertible debentures, the Company agreed with the RENN Capital Group that the conversion price would be reduced to \$0.22 per share. Based on the conversion rate of \$0.22 per share, each RENN investment fund is entitled to 4,545,455 shares upon conversion.

On June 28, 2005, the Company received a waiver from the debenture holders extending until July 1, 2006 the commencement date for principal payments of the \$3 million aggregate principal amount 7.5% convertible debentures issued by the Company in 2002. The original terms of the debentures required the Company to make monthly principal payments of \$10 per \$1,000 of the then remaining principal amount, beginning on June 28, 2005. The Company will still be required to make interest payments. Under the terms of the waiver, monthly principal payments of \$13.33 per \$1,000 of the then remaining outstanding principal amount will commence on July 1, 2006. The final maturity date remains as June 28, 2009. As consideration for the extension, the Company has issued to the debenture holders warrants to purchase 200,000 shares of Simtek common stock at \$0.50 per share, a premium to the market price on the date of the waiver. The Company estimated the value of the warrants at the time of grant, using the Black Scholes option-pricing model, to be approximately \$62,000. The Company recognized \$4,000 as additional interest expense for the three months ending March 31, 2006.

7. Non-Refundable Prepaid Royalties

On March 24, 2006, the Company entered into a Development and License Agreement with Cypress pursuant to which, among other things, Cypress agreed to license certain intellectual property from the Company to develop and manufacture standard, custom and embedded nvSRAM products and Cypress has agreed to pay to the Company \$4,000,000 in non-refundable pre-paid royalties of which \$2 million was paid upon signing of the agreement and \$1 million is payable on each of June 30, 2006 and December 31, 2006. In addition, the Company licensed rights to use certain intellectual property from Cypress for use in its products. As part of the Development and License Agreement, the Company agreed to issue to Cypress warrants to purchase 20 million shares of the Company's common stock for \$0.75 per share. The warrants have a ten year life. The warrants will be issued upon receipt of each of the prepaid royalty amounts. As of March 31, 2006, the Company received \$2,000,000 from Cypress in pre-paid royalties. In addition, the Company has issued warrants to purchase 10 million shares of common stock. The value of the warrants issued of \$965,000 was determined by an independent valuation firm and has been recorded as an increase in additional paid in capital. The net balance of the non-refundable prepaid royalties of \$1,035,000 was recognized as revenue at the time the payment was received.

10. Discontinued Operation

On August 30, 2005, the Company, along with the Company's wholly-owned subsidiary, Q-DOT, Inc. ("Q-DOT"), entered into an Asset Purchase Agreement with Hittite Microwave Corporation ("Hittite") and a wholly-owned subsidiary of Hittite, HMC Acquisition Corporation ("HMC Acquisition"), whereby substantially all of the assets of Q-DOT were sold to HMC Acquisition in exchange for a cash payment of approximately \$2.2 million. The Company realized a net gain of approximately \$1,687,000. In addition, Hittite assumed certain future obligations of Q-DOT, including obligations related to Q-DOT's real estate lease and certain software license agreements. Incident to the Asset Purchase Agreement, the parties also entered an Escrow Agreement, whereby \$200,000 of the purchase price was placed in escrow for one year to secure certain indemnification obligations of Simtek and Q-DOT. In addition, the parties entered into a Confidentiality, Non-Disclosure and Restrictive Covenant Agreement, whereby, among other things, Simtek and Q-DOT agreed not to compete against Hittite and HMC Acquisition for a period of four years with respect to certain businesses relating to Q-DOT's operations.

In accordance with SFAS No. 144, the consolidated financial statements of the Company have been recast to present this business as a discontinued operation. Accordingly, the revenues, the costs and expenses and assets and liabilities of the discontinued operation have been excluded from the respective captions in the accompanying Consolidated Statements of Operations and Consolidated Balance Sheets. In addition, certain of the Notes to the Consolidated Financial Statements have been recast for all periods to reflect the discontinuance of this operation.

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis in this quarterly report on Form 10-Q is intended to provide greater details of the results of operations and financial condition of our Company. The following discussion should be read in conjunction with our condensed consolidated financial statements and notes thereto and other financial data included elsewhere herein. Certain statements under this caption constitute forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The reader should not place undue reliance on these forward looking statements for many reasons including those risks discussed in this document. In addition, when used in this quarterly report, the words "believes," "anticipates," "expects," "plans," "intends" and similar expressions are intended to identify forward-looking statements. Forward-looking statements and statements of expectations, plans and intent are subject to a number of risks and uncertainties. Actual results in the future could differ materially from those described in the forward-looking statements, as a result, among other things, of changes in technology, customer requirements and needs. We undertake no obligation to release publicly the results of any revisions to these forward-looking statements that may be made to reflect any future events or circumstances.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America, which require us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosures. Our accounting policies are discussed in Note 1 of the Notes to Consolidated Financial Statements included in our 2005 Form 10-K. The estimates used by us are based upon our historical experiences combined with our understanding of current facts and circumstances. Certain of our accounting policies are considered critical as they are both important to the portrayal of our financial condition and the results of our operations and require significant or complex judgments on our part. We believe that the following represent the critical accounting policies of Simtek as described in Financial Reporting Release No. 60, Cautionary Advice Regarding Disclosure About Critical Accounting Policies, which was issued by the Securities and Exchange Commission: inventories; deferred income taxes; allowance for doubtful accounts; and, allowance for sales returns.

The valuation of inventories involves complex judgments on our part. Excess finished goods inventories are a natural component of market demand of semiconductor devices. We continually evaluate and balance the levels of inventories based on sales projections, current orders scheduled for future delivery and historical product demand. While certain finished goods items will sell out, quantities of other finished goods items will remain. These finished goods are reserved as excess inventory. We believe we have adequate controls with respect to the amount of finished goods inventories that are anticipated to become excess. While we believe this process produces a fair valuation of inventories, changes in general economic conditions of the semiconductor

Edgar Filing: SIMTEK CORP - Form 424B3

industry could materially affect valuation of our inventories.

The allowance for doubtful accounts reflects a reserve that reduces customer accounts receivable to the net amount estimated to be collectible. Estimating the credit worthiness of customers and the recoverability of customer accounts requires management to exercise considerable judgment. In estimating uncollectible amounts, we consider factors such as industry specific economic conditions, historical customer performance and anticipated customer performance. While we believe our processes to be adequate to effectively quantify our exposure to doubtful accounts, changes in industry or specific customer conditions may require us to adjust our allowance for doubtful accounts.

15

SIMTEK CORPORATION

We record an allowance for sales returns as a net adjustment to customer accounts receivable. The allowance for sales returns consists of two separate segments, distributor stock rotation and distributor price reductions. When we record the allowance, the net method reduces customer accounts receivables and gross sales. Generally, we calculate the stock rotation portion of the allowance based upon actual reported distributor inventory levels. The contracts we have with certain of our distributors generally allow them to return to us a 5% percent of their inventory every 6 months, in exchange for inventory that better meets their demands. At times, our distributors reduce the selling price of a specific device in order to meet competition related to a specific end customer program, which we support through a credit back to the distributor for that specific program. When this occurs, we record an allowance for potential credit that our distributors will be requesting. This allowance is based on approved pricing changes, inventory affected and historical data. We believe that our processes to adequately predict our allowance for sales returns are effective in quantifying our exposures due to industry or specific customer conditions.

We record an allowance that directly relates to the warranty of our products for one year. The allowance for warranty return reduces our gross sales. This allowance is calculated by looking at annual revenues and historical rates of our products returned due to warranty issues. While we believe this process adequately predicts our allowance for warranty returns, changes in the manufacturing or design of our product could materially affect valuation of our warranties.

We assess the impairment of long-lived assets when events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. Factors that we consider in deciding when to perform an impairment review include significant under-performance of the business in relation to expectations, significant negative industry or economic trends, and significant changes or planned changes in our use of the assets. Recoverability of assets that will continue to be used in our operations is measured by comparing the carrying amount of the assets to our estimate of the related future net cash flows. If the asset's carrying amount is not recoverable through the related cash flows, the asset is considered to be impaired. The impairment is measured by the difference between the asset's carrying amount and its fair value, based on the best information available, including market prices or discounted cash

Edgar Filing: SIMTEK CORP - Form 424B3

flows.

Goodwill represents the excess of the purchase price over the fair value of identifiable net tangible and intangible assets acquired in the acquisition of the nvSRAM assets from ZMD. Goodwill is required to be tested for impairment. We performed goodwill impairment testing as of March 31, 2006, and determined that no impairment existed at that date. This assessment requires estimates of future revenue, operating results and cash flows, as well as estimates of critical valuation inputs such as discount rates, terminal values and similar data. We will continue to perform periodic and annual impairment analyses of goodwill. As a result of such impairment analyses, impairment charges may be recorded and may have a material adverse impact on our financial position and operating results. Additionally, we may make strategic business decisions in future periods which impact the fair value of goodwill, which could result in significant impairment charges. There can be no assurance that future goodwill impairments will not occur.

We have recorded a valuation allowance on deferred tax assets. Future operations may change our estimate in connection with potential utilization of these assets.

Overview

Total revenue for the three months ended March 31, 2006 was \$5.8 million, including \$1.0 million of royalty revenue. Total unit shipments of our semiconductor memory products increased for the three months ended March 31, 2006 as compared to the three months ended March 31, 2005. Our net product

16

SIMTEK CORPORATION

revenue was \$4,743,000 for the three months ended March 31, 2006 up from the \$2,976,000 for the comparable period of 2005, an approximate 59% increase. This increase was due primarily to increased product demand and the addition of revenue from customers previously serviced by ZMD prior to the acquisition of the nvSRAM product line from ZMD in December 2005.

An approximate decrease of 3% in product gross margin percentage and increased operating expenses had an impact on our profitability for the three months ended March 31, 2006 compared to the three months ended March 31, 2005. The increase in operating expenses includes non-cash charges of \$448,000 for amortization of the non-compete agreement with ZMD and \$119,000 for expenses related to employee stock options, plus first-time operating expenses of \$225,000 for our European subsidiary, Simtek GmbH.

Consolidated revenue, from our product sales, for the first quarter of 2006 of \$4,745,000 compared to \$2,794,000 in the fourth quarter of 2005, an increase of 70 percent, reflecting the effects of adding the nvSRAM business that was acquired from ZMD, as well as increasing customer demand. During the first quarter of 2006, we recorded royalty revenue of \$1,035,000 received from Cypress. Net loss for the first quarter of 2006 was \$901,000, or \$0.01 per share, compared to a net loss of \$1,851,000, or \$0.02 per share, in the fourth quarter of 2005. Net loss in the first quarter includes non-cash charges of \$448,000 for amortization of the non-compete agreement with ZMD, and \$119,000

Edgar Filing: SIMTEK CORP - Form 424B3

for expenses related to employee stock options, plus "first-time" operating expenses of approximately \$225,000 for Simtek GmbH. There were no comparable charges in the fourth quarter of 2005 for these three first-quarter 2006 charges.

Results of Operations:

Revenues

The following table sets forth our net revenues for semiconductor devices by product markets for the three months ended March 31, 2006 and 2005 (in thousands):

	Three Months Ended March 31,		
	2006	2005	Variance
	-----	-----	-----
Commercial	\$ 3,951	\$ 2,407	\$ 1,544
High-end industrial and military	792	569	\$ 223
	-----	-----	-----
Total Semiconductor Revenue	\$ 4,743	\$ 2,976	\$ 1,767
	=====	=====	=====

Commercial revenues include revenue generated from our 0.8-micron products built from silicon wafers received from Chartered Semiconductor or purchased as finished units from ZMD, and from our 0.25-micron products built from silicon wafers received from Dongbu Electronics (DBE). Commercial revenues increased by \$1,544,000 for the three months ended March 31, 2006 as compared to the three months ended March 31, 2005. As stated previously, this increase was due primarily to increased product demand and the addition of revenue from customers previously serviced by ZMD prior to the acquisition of the nvSRAM product line from ZMD in December 2005. Other factors affecting the increase were an increase in unit shipments partially offset by a slight decrease in average selling prices, which was primarily due to increased price competition at our largest, high-volume customers and their subcontractors. Unit shipments increased due to increased product demand and the addition of the product line purchased at the end of 2005.

High-end industrial and military product revenues accounted for an increase of approximately \$223,000 for the three months ended March 31, 2006 as compared to the same period in 2005. The increase was due to the addition of new customer demand for our products and increased pricing to certain of our customers for industrial and military products.

One distributor and one direct customer together accounted for approximately 23% of our revenue for the quarter ended March 31, 2006. Products

Edgar Filing: SIMTEK CORP - Form 424B3

sold to distributors are sold without material recourse. Distributors sell our products to various end customers. If one of these distributors was to terminate its relationship with us, we believe that there would not be a material impact on our product sales, as we believe that we would be able to service these various end customers through other distributors.

Cost of Sales and Gross Profit

We recorded cost of sales of \$3,470,000 and \$2,071,000 for the three months ended March 31, 2006 and 2005, respectively. These costs reflect an approximate 3% decrease in gross margin percentages for our semiconductor products, for the three months ended March 31, 2006 as compared to the same period in 2005. Actual product gross margin percentages for the three months ended March 31, 2006 and March 31, 2005 were 27% and 30% respectively. This decrease reflects the lower average selling prices described above, partially offset by reduced costs of the 1 megabit device.

Research and Development

We believe that continued investments in new product development are required for us to remain competitive in the markets we serve. In 2005, our research and development department continued its efforts on the development, testing and qualification of our 1-megabit 3-volt nvSRAM with DBE. In September 2005, we qualified our 1-megabit products for use in the commercial and industrial markets. Final qualification of the smaller 256-kilobit and 256-kilobit with real time clock, and the 1-megabit version with real time clock, built on the 0.25-micron process at DBE is expected in the second quarter of 2006.

During the first quarter of 2006, we continued the development of our next generation nvSRAM product family, in conjunction with Cypress, pursuant to the terms of the May 5, 2005 development agreement. This new product family will be based on Cypress' 0.13-micron "S8" process and we expect it will include memory densities up to and beyond 4-megabits. In the first quarter of 2006 we achieved our third major milestone under the development agreement, as scheduled. There were no similar expenses in the first quarter of 2005.

As part of our strategic product development activities, on March 24, 2006, Simtek entered into a License and Development Agreement with Cypress which expands the agreement the two companies signed in May 2005. Under the terms of the new agreement:

- o Cypress will retain the right to include nvSRAM functionality on future programmable system-on-chip (PSoC(TM)) and customized integrated circuits originally granted in the May 2005 agreement, and now with clearly defined royalty payments to Simtek for the use of its SONOS-based nvSRAM intellectual property;
- o Simtek is granted the right to use certain intellectual property of Cypress in developing future generation nvSRAM products, including the jointly developed 0.13u SONOS-based CMOS process, advanced SRAM IP, design-related IP, design-for-manufacturability know-how; and other IP related to Cypress' advanced CMOS manufacturing processes and procedures;
- o Simtek and Cypress agree to broad manufacturing support terms that will provide Simtek with a range of industry-leading manufacturing skills and know-how to enable cost-effective manufacturing of leading-edge SONOS nvSRAMs;
- o Simtek and Cypress will extend the deployment of Simtek's proprietary nvSRAM technology, and work to establish SONOS as the preferred technology for high reliability, high endurance, and scaleable non-volatile products

Edgar Filing: SIMTEK CORP - Form 424B3

at 65nm and below;

- o Simtek and Cypress will jointly develop and market a family of products utilizing Simtek's patented SONOS-based non-volatile technology for production using Cypress's advanced manufacturing processes.

18

SIMTEK CORPORATION

Upon signing the agreement, Simtek received \$2 million from Cypress, and will receive additional payments of \$1 million on June 30, 2006 and December 31, 2006. The agreement also calls for Simtek to issue warrants to Cypress to purchase a total of 20 million shares of its common stock, 10 million of which were already issued upon the execution of the agreement, 5 million of which are expected to be issued on June 30, 2006 upon the payment by Cypress of certain royalties and 5 million of which are expected to be issued on December 31, 2006 upon the payment by Cypress of certain royalties. The warrants have, or will have, an exercise price of \$0.75 per share. Simtek believes that this new agreement will accelerate the timing of expanding nvSRAM adoption in new markets and shorten future product development cycle time. Please read Note 6 to the Condensed Consolidated Financial Statements for a discussion of the accounting treatment for the transactions related to this agreement.

Total research and development expenses were \$1,545,000 for the three months ended March 31, 2006 as compared to \$1,145,000 for the same period in 2005. The \$400,000 increase for the three month period was primarily related to an increase of \$315,000 related to the co-development with Cypress and \$80,000 related to final development of the 256-kilobit nvSRAM products built at DBE.

Administration

Total administration expenses were \$699,000 for the three months ended March 31, 2006 as compared to \$293,000 for the same period in 2005.

The \$406,000 increase was due primarily to increases in payroll and payroll related costs of \$162,000, accounting and legal fees of \$88,000, travel of \$41,000, contract services of \$38,000, expense related to employee and director stock options of \$64,000 and miscellaneous expenses of \$13,000. The increase in payroll and payroll overhead costs were due to additional headcount and the management restructure that began in May 2005. The increase in professional services was primarily due to increased legal and accounting fees, which were related to increased activity related to agreements with personnel and increased securities work. The increase of \$64,000 in employee and director stock option expense was due to the requirement of expensing costs related to stock option grants under FAS 123. See Note 1 to the Notes to the Condensed Consolidated Financial Statements above.

Sales and Marketing

Total sales and marketing expenses were \$944,000 for the three months ended March 31, 2006 as compared to \$401,000 for the same period in 2005.

The \$543,000 increase was due primarily to amortization of the non-compete agreement with ZMD of \$448,000, an increase in payroll and payroll overhead costs of \$67,000, expense related to employee stock options of \$16,000 and miscellaneous other expenses. The increase in payroll and payroll overhead costs

Edgar Filing: SIMTEK CORP - Form 424B3

were due to changes in sales and marketing personnel.

Net Loss from Continuing Operations

We recorded a loss from continuing operations of \$901,000 and \$987,000 for the three months ended March 31, 2006 and 2005, respectively. The decrease of \$86,000 for the three-month period reflects the revenue and expense items discussed above.

Liquidity and Capital Resources

As of March 31, 2006, we had a net working capital of \$5,881,000 as compared to a net working capital of \$3,591,000 as of December 31, 2005.

As discussed previously, on March 24, 2006, we entered into a Development and License Agreement with Cypress pursuant to which, among other things, Cypress has agreed to license certain intellectual property from us to develop and manufacture standard, custom, and embedded nvSRAM products. Cypress will pay to Simtek royalties across all products they develop and sell which include intellectual property licensed from Simtek. We agreed to license from Cypress certain of their intellectual property for use in our design efforts. We agreed with Cypress to co-develop certain nvSRAM products and Cypress has agreed to pay us \$4 million in pre-paid royalties, \$2 million of which was received at the

19

SIMTEK CORPORATION

time the contract was executed. The remaining \$2 million will be paid in \$1 million payments the first of which is scheduled for June 30, 2006, and the final one scheduled for December 31, 2006. In addition, we agreed with Cypress to work together to develop new products and processes. Please read Note 7 to the Condensed Consolidated Financial Statements for a discussion of the accounting treatment for the transactions related to this agreement.

Cash flows used in operating activities for the three months ended March 31, 2006 were \$1,580,000 compared to \$531,000 in the same period in 2005, an increase of \$1,049,000 as compared to the same period in 2005. The net change is due to the decreased net loss, the increase in accounts receivable (compared to a decrease in the 2005 period), a larger increase in inventory, which were partially offset by the non-cash charges in 2006. The increase in inventory for the three months ended March 31, 2006 was due primarily to higher volume of silicon wafers and units in process, which will support future revenue.

Cash flows used in investing activities decreased for the three months ended March 31, 2006 by approximately \$14,000 as compared to the same period in 2005.

The increase of \$2,781,000 in cash flows provided by financing activities was primarily due to the receipt of funds related to the sale of common stock completed on December 30, 2005, for which some funds were received on January 3, 2006 and the value of the warrants issued to Cypress for the Development and License Agreement.

Short-term liquidity.

Our cash balance at March 31, 2006 was \$2,814,000.

Edgar Filing: SIMTEK CORP - Form 424B3

Our future liquidity will depend on our revenue growth and our ability to sell our products at positive gross margins and control of our operating expenses. Through December 31, 2006, we expect to spend approximately \$9,000,000, for operating expenses assuming revenue growth. We expect to meet these capital needs from sales revenues, the funds still due to us from Cypress under the Joint Development and License Agreement and, to the extent we do not have sufficient revenues, from our existing cash reserves.

Long-term liquidity.

Based on current revenue, cost and profitability projections, current working capital, plus the additional prepaid royalties due from Cypress, the Company believes that it has adequate capital to sustain its operations for the foreseeable future. However, the Company is also negotiating with a bank to provide an accounts receivable based credit facility to provide additional capital if needed.

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of loss that may impact our financial position, results of operations or cash flows due to adverse changes in financial and commodity market prices and rates. We are exposed to market risk in the areas of changes in United States interest rates and changes in foreign currency exchange rates as measured against the United States dollar. These exposures are directly related to our normal operating activities. We currently have no derivative financial instruments.

Interest payable on our convertible debentures is fixed at 7.5% over the term of the debentures. As such, changes in interest rates will not affect

Edgar Filing: SIMTEK CORP - Form 424B3

future expenses or cash flows.

We manage interest income by investing our excess cash in cash equivalents bearing variable interest rates, which are tied to various market indices. We do not believe that near-term changes in interest rates will result in a material effect on future earnings, fair values or cash flows.

We do not speculate in the foreign exchange market and do not manage exposures that arise in the normal course of business related to fluctuations in foreign currency exchange rates by entering into offsetting positions through the use of foreign exchange forward contracts.

Average selling prices of our products have not increased significantly as a result of inflation during the past several years, primarily due to intense competition within the semiconductor industry. The effect of inflation on our costs of production has been minimized through improvements in production efficiencies. We anticipate that these factors will continue to minimize the effects of any foreseeable inflation and other price pressures within the industry and markets in which we participate.

ITEM 4 CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

Harold Blomquist, who serves as the Company's chief executive officer, and Brian Alleman, who serves as the Company's chief financial officer, after evaluating the effectiveness of the Company's disclosure controls and procedures as of the

Edgar Filing: SIMTEK CORP - Form 424B3

end of the period covered by this quarterly report (the "Evaluation Date") concluded that as of the Evaluation Date, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported as specified in the SEC's rules and forms and to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is accumulated and communicated to our management to allow timely decisions regarding required disclosure.

(b) Changes in internal control over financial reporting.

There were no changes in the Company's internal control over financial reporting during the three months ended March 31, 2006, that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

Simtek Reaffirms and Refines Guidance for Second Quarter 2006
Mid Quarter Update

Edgar Filing: SIMTEK CORP - Form 424B3

- * Revenue Projected in the High End of the Range
- * Bookings Continue Strong Pace Set in Q1
- * Recent Design Wins in New Markets
- * Projected Return to Pro-forma Profit on Schedule

COLORADO SPRINGS, Colorado- May 15, 2006 - Simtek Corporation (OTC Bulletin Board: SRAM), the inventor, pioneer, and world's leading supplier of monolithic nonvolatile static random access memory (nvSRAM) integrated circuits announced today that revenues for the quarter ended June 30, 2006 are expected to be in the upper end of the previous range of guidance \$5.5 million to \$6.0 million.

Revenues for the quarter are expected to be in the range of \$5.8 million to \$6.0 million with the book to bill ratio projected to be above 1.1 supporting continuing growth in revenue in future quarters. New production programs recently awarded to Simtek cross between new 256 kilobit designs and 1 megabit designs. Production programs are coming from diverse market segments outside of the Company's traditional RAID market, and are contributing to the Company's steady growth in demand and revenue.

The Company also reaffirms that profit on a pro-forma basis, which is GAAP Net Income minus certain non-cash items such as the amortization of the ZMD transaction and expensing of stock options, is expected to be achieved for the third and fourth quarters, with the cross-over from "loss to profit" expected to occur in June.

Harold Blomquist, chairman & CEO stated, "We are projecting growth in future quarters consistent with our prior guidance of between 10% and 15% per quarter and now that we've successfully integrated the customers acquired through the ZMD transaction, we are pleased to see that demand from all directions seems to be solid and increasing."

Item 1.01 Entry into a Material Definitive Agreement.

On June 2, 2006, Simtek Corporation (the "Company") secured a \$3.6 million revolving line of credit by entering into an Account Purchase Agreement (the "Agreement") with Wells Fargo Bank, National Association ("Wells Fargo"). The Agreement has a term of two years, but may be terminated at any time by the Company upon 60 days' written notice. 99.1	Press release of the Company, dated June 7, 2006, titled "Simtek Secures Revolving Credit Agreement with Wells Fargo Business Credit".

ACCOUNT PURCHASE AGREEMENT

This Agreement is dated as of May 22, 2006 between Wells Fargo Bank, National Association, acting through its Wells Fargo Business Credit operating division ("WFBC"), and Simtek Corporation ("Customer"). The Customer and WFBC agree as follows: ARTICLE I Purpose of Agreement

1.01 Purpose of Agreement. The Customer desires to sell and assign to WFBC acceptable accounts receivable and WFBC desires to purchase such accounts on the terms and conditions set forth herein. The purpose of this Agreement is commercial in nature and not for household, family and/or personal use. This Agreement sets forth the terms and conditions on which WFBC will consider purchasing accounts receivable from the Customer.

ARTICLE II
Definitions

2.01 "Account" means any right of payment of the net amount for goods sold, or leased and delivered or services rendered in the ordinary course of Customer's business which is not evidenced by an instrument or chattel paper.

2.02 "Acceptable Account" means an Account, in an amount not to be less than \$100, acceptable to WFBC, which conforms to the warranties and terms set forth herein, net of any credits or allowances of any nature and is not an Unacceptable Account as defined below.

2.03 "Account Debtor" means Customer's customer or any other person or entity owing money to the Customer with respect to the Account.

2.04 "Account Debtor Dispute" means a claim by Account Debtor against Customer, of any kind whatsoever, that reduces or may reduce the amount collectible from Account Debtor by WFBC which arises at anytime, whether before or after signing of this Agreement or the purchase of any Account. Any dispute which is a combination of a Credit Problem and an Account Debtor Dispute shall be deemed to be an Account Debtor Dispute for purposes of this Agreement.

2.05 "Collateral" means the intangible or tangible property given as security to WFBC by Customer for any obligations and liabilities of Customer to WFBC under this Agreement.

2.06 "Collected Reserve Account" means the account established by WFBC for Customer to which from time to time credits will be made, debits taken and disbursements made in accordance with this Agreement. Provided there is no Event of Default hereunder, or any event which with the passage of time or notice

Edgar Filing: SIMTEK CORP - Form 424B3

would be an Event of Default, any available balance held in the Collected Reserve Account shall be released to the Customer on a weekly basis. Any fee, charge or other obligation of the Customer under this Agreement may be charged against this account in WFBC's sole discretion.

2.07 "Customer" means the seller and assignor of the Accounts.

2.08 "Credit Problem" means, as established by the Customer, that an Account Debtor is unable to pay its debts because the Account Debtor is the subject of a bankruptcy, insolvency, or receivership proceeding within 75 days of the date of the invoice.

2.09 "Event of Default" shall mean the existence of a default pursuant to Article VII hereunder, or a default under any documents given to WFBC in connection with this Agreement.

2.10 "Initial Payment" shall mean with respect to a given Account an amount equal to the gross face amount of such Account less stated trade discounts offered by the Customer to the Account Debtor less (20%) twenty percent. This percentage may be adjusted by WFBC at any time at WFBC's sole discretion.

2.11 "Minimum Fee" shall mean the minimum fee paid per month by the Customer as stated in Section 6.06 below.

2.12 "Net Purchase Price" for any Account means an amount equal to the gross face amount of such Account less WFBC's Discount and other charges with respect to such Account and less any amount of any trade discounts, credits or allowances, or any other reductions or adjustments to such Account taken by the Account Debtor.

2.13 "Origination Fee" shall mean the fee payable on closing of this Agreement, and on each renewal of this Agreement, as set forth in Section 6.06 below.

2.14 "Part Payment" for any Account means any payment made by WFBC to the Customer with respect to such Account which is less than the full Net Purchase Price as more fully described in Article III below.

2.15 "Repurchase Price" for any Account means the Net Purchase Price less any amounts collected from the Account Debtor on the Account plus all fees, costs or expenses associated with the repurchase or collection of such Account. In any event where repurchase is required under this Agreement, WFBC, at its discretion, may charge the Repurchase Price to Customer's Collected Reserve Account which may create a deficit balance under Section 3.06 below.

2.16 "Unacceptable Account" shall mean Accounts which are not acceptable in WFBC's sole discretion including but not limited to the following Accounts:

2.16(a) Accounts owed by any unit of government, whether foreign or domestic (provided, however, that there shall be included in Acceptable Accounts that portion of Accounts owed by such units of government for which the Customer has provided evidence satisfactory to WFBC that (i) WFBC has a first priority perfected security interest and (ii) such Accounts may be enforced by WFBC directly against such unit of government under all applicable laws);

Edgar Filing: SIMTEK CORP - Form 424B3

2.16(b) Accounts owed by an Account Debtor located outside the United States which are not (i) backed by a bank letter of credit naming WFBC as beneficiary or assigned to WFBC, in WFBC's possession and acceptable to WFBC in all respects, in its sole discretion, (ii) covered by a foreign receivables insurance policy acceptable to WFBC in its sole discretion;

2.16(c) Accounts owed by an Account Debtor that is insolvent, the subject of bankruptcy proceedings or have gone out of business;

2.17 "WFBC Discount" means the amount to be paid by the Customer according to the following schedule:

Days -----	Rate -----
(for payment ----- of Account) -----	
1	0.055% of the gross face amount of each Account purchased by WFBC.

Item 8.01: Other Events

On March 24, 2006, Simtek Corporation ("Simtek") entered into a License and Development Agreement with Cypress Semiconductor Corporation ("Cypress") as more fully described on the Form 8-K filed by Simtek with the Securities and Exchange Commission on March 30, 2006. Under the terms of the License and Development Agreement, Cypress is required to make certain non-refundable advance royalty payments to Simtek. In its financial statements filed on Form 10-Q for the three months ended March 31, 2006, Simtek recorded the \$2,000,000 advance royalty payment received from Cypress on March 24, 2006 as \$965,000 for the value of the warrant issued to Cypress to purchase 10 million shares of common stock of Simtek and the remaining \$1,035,000 as unearned revenue on its consolidated balance sheet. The Form 8-K filed by Simtek on March 30, 2006 and the Form 10-Q filed by Simtek on May 15, 2006 set forth more details regarding the transaction with Cypress.

Simtek has subsequently determined that it is appropriate to recognize the non-refundable advance royalty payments under the License and Development Agreement as royalty revenue upon receipt from Cypress. Simtek will therefore restate its consolidated financial statements as of and for the three months ended March 31, 2006. As a result, total revenue for the three months ended March 31, 2006 will be reported as \$5,778,000 (\$1,035,000 more than the \$4,743,000 previously reported) and net loss for such three months period will be reported as \$901,000 (rather than the \$1,936,000 as previously reported). In addition, total liabilities are reduced from \$8,430,000 (as reported) to \$7,395,000; accumulated deficit is reduced from \$48,127,000 (as reported) to

Edgar Filing: SIMTEK CORP - Form 424B3

\$47,092,000; and, total shareholders' equity is increased from \$2,008,000 (as reported) to \$3,043,000.

Simtek intends to promptly amend its Form 10-Q for the three months ended March 31, 2006.

In this and subsequent reports an accounting change has been, and will be, made in how the non-refundable advance royalty payments from Cypress Semiconductor are accounted for. The change, settled upon after consultation with the Company's independent accountants, results in adding approximately \$1 million to Q1 2006 revenue and \$0.5 million to Q2 2006 revenue, or \$1.5 million in royalty revenue for the first six months of 2006. In this, and future reports, revenue will be reported for product sales, royalty revenue, and total revenue. Please refer to Simtek's related Form 8-K filed on July 26, 2006 for the effect on Q1 2006 financial statements.

Total revenue was \$6.9 million for the second quarter of 2006, including royalty revenue of \$0.5 million. Product sales for the second quarter was \$6.4 million, an increase of 192% from \$2.2 million in the second quarter of 2005, and an increase of 36% quarter-over-quarter compared to Q1 2006 product sales of \$4.7 million. The Company reported a net loss for 2006's second quarter of \$1.5 million or \$0.01 per share, compared to a net loss of \$2.9 million or \$0.05 per share for the second quarter of 2005. Excluding the effects of stock options and amortization of acquisition related costs, the net loss was \$0.9 million for the second quarter of 2006. There were no such charges in the 2005 period.

Total revenue for the first six months of 2006 was \$12.7 million, including royalty revenue of \$1.5 million. Product sales for the first six months of 2006 were \$11.2 million, an increase of 115% from \$5.2 million in the first six

months of 2005. The Company reported a net loss for the six months ended June 30, 2006 of \$2.4 million or \$0.02 per share, compared to a net loss of \$3.9 million or \$0.06 per share for the same period in 2005. Excluding the effects of stock options and amortization of acquisition related costs, the net loss was \$1.4 million for the 2006 period. There were no such charges in the 2005 period.

Simtek is guiding product revenue for the third quarter of 2006 to be in the range of \$7.2 million to \$7.5 million. The Company's order backlog, scheduled for delivery in the third quarter, stands at \$5.5 million at June 30, 2006 and represents a larger percentage of guided revenue for the subsequent quarter than in prior quarters.

The Company is raising its guidance for total revenue for 2006 from \$23 million to \$27 million to \$25 million to \$30 million, including the impact of royalty revenue from the non-refundable payments received from Cypress Semiconductor.

Based on margin improvement and increasing revenue, the Company is guiding to be profitable on a pro-forma basis for the third and fourth quarters of 2006. There is no prepaid royalty installment expected in the third quarter.

Brian Alleman, CFO stated "Achieving production qualification of the .25 micron 256 kilobit and real-time clock version of the 1 megabit devices, which the Company announced yesterday, is the culmination of several years of investment in process R&D and product development. We believe that the Company is now in a position to ramp current customer programs into production, and to aggressively cultivate new design wins. Product revenue for the first six months of 2006 exceeded total revenue for the full year 2005 by \$800,000. For the month of June, Simtek achieved what we consider to be an even more significant goal, namely reaching profitability for the month. Focused ASP management, with a favorable shift in product mix and aggressive cost reduction efforts resulted in gross margins on product sales of just over 40% for the month."

Alleman continued, "The Company continues to work on reducing product costs, particularly on the .25 micron parts. We expect to be investing in the third

Edgar Filing: SIMTEK CORP - Form 424B3

quarter in continued cost reductions, yield enhancements, and back end test efficiencies. We have also successfully transferred offshore the final testing of our highest volume device family. The combination of these actions is projected to increase gross margins in Q3 2006 by as much as 500 basis points over Q2 2006."

Revenue is increasing from improved ASPs, a shift in mix toward higher ASP 1 megabit devices, and from significant increases in unit volumes shipped in several product families. In the European market, the unit volume of shipment of products from Simtek GmbH to customers in Europe increased by 66% quarter-over-quarter compared to Q1 2006. Unit volume shipped on a global basis increased by 36% quarter-over-quarter compared to Q1 2006. Compared to the first six months of 2005, total unit volume shipped to customers increased by 179%.

Simtek President and CEO, Harold Blomquist stated, "Growth is coming from customers around the world and from markets as diverse as storage/RAID (redundant arrays of independent disks) subsystems, automated meter reading systems, display subsystems in multiple application areas, and networking subsystems. Shipments of our 1 megabit family increased by 293% quarter-over-quarter and is showing steady increase in demand from recently awarded programs from Fortune 50 industry leaders in the RAID, and other market segments."

Blomquist went on to say, "We believe that design wins from new and existing customers, and from current and new market segments early in the year is unparalleled in our history and continues at a brisk pace. Market acceptance of our nvSRAM technology continues to broaden. Cypress Semiconductor Corp. reported in its earnings call last week that it has begun sampling high-speed nonvolatile SRAM devices obtained through its partnership with Simtek. Simtek is pleased with its collaboration with Cypress which is expected to provide first samples of a jointly developed 4 megabit device at the beginning of 2007, and which is opening doors to new customers with high-volume programs."
