SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 28, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 1-12203

Ingram Micro Inc.
(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)
1600 E. St. Andrew Place, Santa Ana, California 92705-4926
(Address, including zip code, of principal executive offices)
(714) 566-1000
(Registrant's telephone number, including area code)

62-1644402
(I.R.S. Employer
Identification No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant had submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer
Non-Accelerated Filer (Do not check if a smaller reporting company) Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The Registrant had 154,145,192 shares of Class A Common Stock, par value \$0.01 per share, outstanding at September 28, 2013.

INGRAM MICRO INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

(Unaudited)

Note 1 – Organization and Basis of Presentation

Ingram Micro Inc. and its subsidiaries are primarily engaged in the distribution of information technology (“IT”) products, supply chain services and mobile device lifecycle services worldwide. Ingram Micro Inc. and its subsidiaries operate in North America; Europe; Asia-Pacific, Middle East and Africa; and Latin America. In 2012, we added a reporting segment for mobility which reflects our October 2012 acquisition of Brightpoint, Inc. (“BrightPoint”). The consolidated financial statements include the accounts of Ingram Micro Inc. and its subsidiaries. Unless the context otherwise requires, the use of the terms “Ingram Micro,” “we,” “us” and “our” in these notes to the consolidated financial statements refers to Ingram Micro Inc. and its subsidiaries. These consolidated financial statements have been prepared by us, without audit, pursuant to the rules and regulations of the United States Securities and Exchange Commission (the “SEC”). In the opinion of management, the accompanying unaudited consolidated financial statements contain all material adjustments (consisting of only normal, recurring adjustments) necessary to fairly state our consolidated financial position as of September 28, 2013, our consolidated results of operations and comprehensive income for the thirteen and thirty-nine weeks ended September 28, 2013 and September 29, 2012 and our consolidated cash flows for the thirty-nine weeks ended September 28, 2013 and September 29, 2012. All significant intercompany accounts and transactions have been eliminated in consolidation. As permitted under the applicable rules and regulations of the SEC, these consolidated financial statements do not include all disclosures and footnotes normally included with annual consolidated financial statements and, accordingly, should be read in conjunction with the consolidated financial statements and the notes thereto, included in our Annual Report on Form 10-K filed with the SEC for the year ended December 29, 2012. The consolidated results of operations for the thirteen and thirty-nine weeks ended September 28, 2013 may not be indicative of the consolidated results of operations that can be expected for the full year.

Book Overdrafts

Book overdrafts of \$469,047 and \$415,207 as of September 28, 2013 and December 29, 2012, respectively, represent checks issued on disbursement bank accounts but not yet paid by such banks. These amounts are classified as accounts payable in our consolidated balance sheet. We typically fund these overdrafts through normal collections of funds or transfers from other bank balances at other financial institutions. Under the terms of our facilities with the banks, the respective financial institutions are not legally obligated to honor the book overdraft balances as of September 28, 2013 and December 29, 2012, or any balance on any given date.

Trade Accounts Receivable Factoring Programs

We have three uncommitted factoring programs, one in North America and two in Europe, under which trade accounts receivable of two large customers may be sold, without recourse, to financial institutions. Available capacity under these programs is dependent on the amount of trade accounts receivable already sold to and held by the financial institutions, the level of our trade accounts receivable eligible to be sold into these programs and the financial institutions’ willingness to purchase such receivables. At September 28, 2013 and December 29, 2012, we had a total of \$329,865 and \$242,626, respectively, of trade accounts receivable sold to and held by financial institutions under these programs. Factoring fees of \$833 and \$553 incurred for the thirteen weeks ended September 28, 2013 and September 29, 2012, respectively, and \$1,841 and \$2,515 for the thirty-nine weeks ended September 28, 2013 and September 29, 2012, respectively, related to the sale of trade accounts receivable under these facilities are included in “other” in the other expense (income) section of our consolidated statement of income.

Table of Contents

INGRAM MICRO INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

Note 2 – Share Repurchase Program

In October 2010, our Board of Directors authorized a \$400,000 share repurchase program, which originally was set to expire on October 26, 2013, and was subsequently extended through October 27, 2015. At September 28, 2013, \$124,095 remained available for repurchase. Under this program, we may repurchase shares in the open market and through privately negotiated transactions. Our repurchases are funded with available borrowing capacity and cash. The timing and amount of specific repurchase transactions will depend upon market conditions, corporate considerations and applicable legal and regulatory requirements. We account for repurchased shares of common stock as treasury stock. Treasury shares are recorded at cost and are included as a component of stockholders' equity in our consolidated balance sheet. We have issued shares of common stock out of our cumulative balance of treasury shares. Such shares are issued to certain of our associates upon the exercise of their options or vesting of their equity awards under the Ingram Micro Inc. 2011 Incentive Plan, as amended (see Note 4). We did not repurchase shares during the thirty-nine weeks ended September 28, 2013. Our stock issuance activity for the thirty-nine weeks ended September 28, 2013 is summarized in the table below:

	Shares	Weighted Average Price Per Share	Amount
Cumulative balance of treasury stock at December 29, 2012	38,029	\$17.04	\$648,066
Issuance of Class A Common Stock	(466) 17.24	(8,032
Cumulative balance of treasury stock at September 28, 2013	37,563	17.04	\$640,034

Note 3 – Earnings Per Share

We report a dual presentation of Basic Earnings per Share (“Basic EPS”) and Diluted Earnings per Share (“Diluted EPS”). Basic EPS excludes dilution and is computed by dividing net income by the weighted average number of common shares outstanding during the reported period. Diluted EPS uses the treasury stock method to compute the potential dilution that could occur if stock-based awards and other commitments to issue common stock were exercised. The computation of Basic EPS and Diluted EPS is as follows:

	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 28, 2013	September 29, 2012	September 28, 2013	September 29, 2012
Net income	\$78,938	\$53,311	\$198,383	\$204,558
Weighted average shares	153,710	150,150	152,439	150,793
Basic EPS	\$0.51	\$0.36	\$1.30	\$1.36
Weighted average shares, including the dilutive effect of stock-based awards (3,434 and 2,666 for the thirteen weeks ended September 28, 2013 and September 29, 2012, respectively, and 3,190 and 3,078 for the thirty-nine weeks ended September 28, 2013 and September 29, 2012, respectively)	157,144	152,816	155,629	153,871
Diluted EPS	\$0.50	\$0.35	\$1.27	\$1.33

There were approximately 79 and 4,214 stock-based awards for the thirteen weeks ended September 28, 2013 and September 29, 2012, respectively, and 657 and 3,485 stock-based awards for the thirty-nine weeks ended September 28, 2013 and September 29, 2012, respectively, that were not included in the computation of Diluted EPS because the exercise price was greater than the average market price of the Class A Common Stock during the

respective periods, thereby having an antidilutive effect.

Note 4 – Stock-Based Compensation

We currently have a single stock incentive plan, the Ingram Micro Inc. 2011 Incentive Plan, for the granting of equity-based incentive awards including incentive stock options, non-qualified stock options, restricted stock, restricted stock units and stock appreciation rights, among others, to key employees and members of our Board of Directors. During the second quarter of 2013, our stockholders approved an amendment of the Ingram Micro Inc. 2011 Incentive Plan (the “2011 Amended Plan”), which

Table of Contents

INGRAM MICRO INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

increased the number of shares that we may issue by 12,000. The authorized pool of shares available for grant is a fungible pool. The authorized share limit is reduced by one share for every share subject to a stock option or stock appreciation right granted and 2.37 shares for every share granted after June 8, 2011 (2.29 shares after June 7, 2013) under any award other than an option or stock appreciation right for awards.

We grant time- and/or performance-vested restricted stock and/or restricted stock units, in addition to stock options, to key employees and members of our Board of Directors. The performance measures for vesting of restricted stock and restricted stock units for grants to management for the periods presented are based on earnings growth, return on invested capital, total shareholder return, income from operations as a percent of revenue and income before tax.

Awards granted under the 2011 Amended Plan were as follows:

	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 28, 2013	September 29, 2012	September 28, 2013	September 29, 2012
Stock options granted (a)	—	—	52	51
Restricted stock and restricted stock units granted (a)	146	108	3,782	2,740
Stock-based compensation expense	\$7,693	\$7,240	\$21,649	\$21,815
Related income tax benefit	\$1,792	\$2,427	\$5,885	\$6,768
Exercised stock options	1,372	21	2,420	1,955
Vested restricted stock and/or restricted stock units (b)	27	19	2,086	2,122

As of September 28, 2013, approximately 15,800 shares were available for grant under the 2011 Amended Plan, (a) taking into account granted options, time-vested restricted stock units/awards and performance-vested restricted stock units assuming maximum achievement.

Includes 0 and 0 shares, for the thirteen weeks ended September 28, 2013 and September 29, 2012, respectively, (b) and 1,535 and 1,495 shares, for the thirty-nine weeks ended September 28, 2013 and September 29, 2012, respectively, which were issued based on performance-based grants previously approved by the Human Resources Committee of the Board of Directors.

Note 5 – Derivative Financial Instruments

Our derivatives designated as hedging instruments have consisted primarily of foreign currency forward contracts to hedge certain foreign currency-denominated intercompany management fees. We also use foreign currency forward contracts that are not designated as hedges primarily to manage currency risk associated with foreign currency-denominated trade accounts receivable, accounts payable and intercompany loans.

Table of Contents

INGRAM MICRO INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

The notional amounts and fair values of derivative instruments in our consolidated balance sheet were as follows:

	Notional Amounts (1)		Fair Value	
	September 28, 2013	December 29, 2012	September 28, 2013	December 29, 2012
Derivatives designated as hedging instruments recorded in:				
Other current assets				
Foreign exchange contracts	\$ 1,320	\$—	\$ 24	\$—
Accrued expenses				
Foreign exchange contracts	9,224	—	(197) —
	10,544	—	(173) —
Derivatives not receiving hedge accounting treatment recorded in:				
Other current assets				
Foreign exchange contracts	333,846	817,172	3,136	2,897
Accrued expenses				
Foreign exchange contracts	854,903	607,836	(8,358) (3,776
	1,188,749	1,425,008	(5,222) (879
Total	\$ 1,199,293	\$ 1,425,008	\$ (5,395) \$(879

(1) Notional amounts represent the gross amount of foreign currency bought or sold at maturity for foreign exchange contracts.

The amount recognized in earnings from our derivative instruments not receiving hedge accounting treatment, including ineffectiveness, is recorded in foreign currency exchange loss as follows and was largely offset by the change in fair value of the underlying hedged assets or liabilities:

	Thirteen Weeks Ended		Thirty-nine Weeks Ended	
	September 28, 2013	September 29, 2012	September 28, 2013	September 29, 2012
Net loss recognized in earnings	\$(30,789) \$(23,474) \$(1,428) \$(31,582

The unrealized gains or losses associated with our derivatives designated as hedging instruments, net of taxes, are reflected in our consolidated statement of comprehensive income (loss) for the thirteen and thirty-nine weeks ended September 28, 2013 and September 29, 2012.

Note 6 – Fair Value Measurements

Our assets and liabilities carried at fair value are classified and disclosed in one of the following three categories: Level 1 – quoted market prices in active markets for identical assets and liabilities; Level 2 – observable market-based inputs or unobservable inputs that are corroborated by market data; and Level 3 – unobservable inputs that are not corroborated by market data.

As of September 28, 2013, our assets and liabilities measured at fair value on a recurring basis are categorized in the table below:

Table of Contents

INGRAM MICRO INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

	September 28, 2013			
	Total	Level 1	Level 2	Level 3
Assets:				
Cash equivalents, consisting primarily of money market accounts and short-term certificates of deposit	\$79,602	\$79,602	\$—	\$—
Marketable trading securities ^(a)	52,466	52,466	—	—
Derivative assets	3,160	—	3,160	—
Total assets at fair value	\$135,228	\$132,068	\$3,160	\$—
Liabilities:				
Derivative liabilities	\$8,555	\$—	\$8,555	\$—
Total liabilities at fair value	\$8,555	\$—	\$8,555	\$—

(a) Included in other current assets in our consolidated balance sheet.

As of December 29, 2012, our assets and liabilities measured at fair value on a recurring basis are categorized in the table below:

	December 29, 2012			
	Total	Level 1	Level 2	Level 3
Assets:				
Cash equivalents, consisting primarily of money market accounts and short-term certificates of deposit	\$189,381	\$189,381	\$—	\$—
Marketable trading securities ^(a)	46,938	46,938	—	—
Derivative assets	2,897	—	2,897	—
Total assets at fair value	\$239,216	\$236,319	\$2,897	\$—
Liabilities:				
Derivative liabilities	\$3,776	\$—	\$3,776	\$—
Total liabilities at fair value	\$3,776	\$—	\$3,776	\$—

(a) Included in other current assets in our consolidated balance sheet.

The fair value of the cash equivalents approximated cost and the gain or loss on the marketable trading securities was recognized in the consolidated statement of income to reflect these investments at fair value.

Our senior unsecured notes due in 2022 and 2017 are stated at amortized cost, and their respective fair values were determined based on Level 2 criteria. The fair values and carrying values of these notes are shown in the table below:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

Note 7 – Acquisitions, Goodwill and Intangible Assets

On September 12, 2013, we acquired all of the outstanding shares of Canada-based SoftCom Inc., a leading cloud marketplace and global service provider, for cash of \$12,000 and payment of outstanding debt of \$3,000. In addition, the purchase price includes a deferred payment of \$5,000, payable over three years and a \$3,650 three-year performance-based earn-out. We have preliminarily allocated the purchase price to the identifiable assets acquired and liabilities assumed at their estimated fair values with approximately \$9,000 recorded as goodwill. This acquisition will enhance our cloud offerings road map and aggregation platform.

On October 15, 2012, we completed the acquisition of BrightPoint, a U.S. publicly traded company and a global leader in providing device lifecycle services to the wireless industry, for cash and the assumption of its debt. The results of operations of BrightPoint are included in our consolidated financial statements from the date of the merger. The consideration paid was \$868,192, net of cash acquired, primarily comprised of \$9.00 cash per share of BrightPoint's outstanding common stock (including common stock underlying restricted stock units and shares issued pursuant to restricted stock awards accelerated upon closing of the transaction) and payment of BrightPoint's outstanding debt of \$260,257 as of October 15, 2012.

We expect to realize operational benefits by leveraging existing channel relationships and utilizing the assembled workforce. We also expect the combined entity to achieve significant savings in corporate and operational overhead costs. We anticipate opportunities for growth through our entry into the global wireless industry, expansion of our geographic reach and customer segment diversity, and the ability to leverage additional products and capabilities. These factors, among others, contributed to a purchase price in excess of the estimated fair value of BrightPoint's net identifiable assets acquired, and, as a result, we have recorded goodwill in connection with this transaction. The following table summarizes the allocation of the purchase price to the estimated fair values of the assets acquired and liabilities assumed on the closing date of October 15, 2012:

Tangible assets (includes trade accounts receivable, inventory, property and equipment and other assets)	\$ 1,156,075
Goodwill	420,065
Identifiable intangible assets	309,000
Liabilities (includes accounts payable, accrued expenses and other liabilities)	(1,016,948)
	\$ 868,192

The components of identifiable intangible assets acquired in connection with the BrightPoint acquisition were as follows:

	Fair Value	Estimated Useful Life
Logistics customer relationships	\$ 237,000	10 years
Distribution customer relationships	59,000	7 years
Trade name	13,000	3 years
Total identifiable intangible assets	\$ 309,000	

The following represents pro forma operating results for the thirteen and thirty-nine weeks ended September 29, 2012 as if BrightPoint had been included in our consolidated statement of income as of the first day of fiscal year 2012 and includes business combination accounting effects from our acquisition including amortization of acquired intangible assets and increase in interest expense associated with the issuance of our senior unsecured notes due in 2022 and additional borrowings from our revolving senior unsecured credit facility debt to fund the acquisition.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

The above unaudited pro forma results have been prepared for informational purposes only and do not purport to represent what the results of operations would have been had the acquisition occurred as of those dates, nor of future results of operations.

In the first nine months of 2013 and 2012, we paid one of the annual earn-out payments related to a prior period acquisition totaling \$325 and \$338, respectively, which was previously accrued at the time of the acquisition.

Finite-lived identifiable intangible assets are amortized over their remaining useful lives ranging up to 20 years. The gross and net carrying amounts of finite-lived identifiable intangible assets are as follows:

	September 28, 2013	December 29, 2012
Gross carrying amount of finite-lived intangible assets	\$458,443	\$445,385
Net carrying amount of finite-lived intangible assets	\$350,169	\$372,482

Note 8 – Reorganization Costs

2013 Actions

During the third quarter, we announced a plan to reduce headcount in Germany to respond to the current market environment resulting in reorganization charges primarily related to employee termination benefits. In addition, we exited a BrightPoint facility in the U.S. resulting in reorganization charges primarily related to facility exit costs and employee termination benefits.

Earlier in 2013, we began integrating certain BrightPoint operations into Ingram Micro, resulting in headcount reductions and facility exit costs. We continued to move certain transaction-oriented service and support functions in Europe to our European shared services center and exited a portion of one of our Australian offices in Asia-Pacific. Associated with these actions, we incurred reorganization costs primarily related to employee termination benefits throughout our regions and facility exit costs in Australia.

2012 Actions

In 2012, we implemented headcount reductions primarily in Australia and New Zealand to better align our operating expenses with each country's lower sales volumes. Additionally, we moved certain transactions-oriented service and support functions to shared service centers in Asia-Pacific and Europe. We closed our in-country Argentina operations in Latin America and are now servicing this market through our export operations in Miami. Associated with these actions, we incurred net reorganization costs related to employee termination benefits.

2011 and Prior Actions

In the second half of 2011, we implemented a cost-reduction program related to our Australian operations in Asia-Pacific primarily to align our level of operating expenses with declines in sales volume and the loss of market share in that country. We also implemented headcount reductions in certain operations in North America, Europe and Latin America.

In 2009 and earlier, we incurred costs to integrate past acquisitions, and launch various other outsourcing and optimization plans, to improve operating efficiencies and better align our level of operating expenses with the decline in sales volumes resulting from the economic downturn in that period.

While these reorganization actions were completed prior to the periods included herein, future cash outlays are required for future lease payments related to exited facilities.

Facility Costs	6,214	—	(2,338)) (187)) 3,689	(e)
	\$8,119	\$20,050	\$(13,533)) \$(343)) \$14,293	

(a) Adjustments reflected in the table above include a reduction of \$188 and \$12 to reorganization liabilities recorded in prior years in Europe and Asia-Pacific, respectively, for lower than expected employee termination benefits.

(b) Reflects the net foreign currency impact on the U.S. dollar liability.

(c) We expect the remaining liabilities to be substantially utilized by the end of 2016.

(d) We expect the remaining liabilities to be substantially utilized by the end of 2014.

(e) We expect the remaining liabilities to be fully utilized by the end of 2015.

Note 9 – Debt

The carrying value of our outstanding debt consists of the following:

	September 28, 2013	December 29, 2012
Senior unsecured notes, 5.25% due 2017	\$300,000	\$300,000
Senior unsecured notes, 5.00% due 2022, net of unamortized discount of \$1,590 and \$1,725, respectively	298,410	298,275
North America revolving trade accounts receivable-backed financing program	214,993	345,000
Lines of credit and other debt	77,161	111,268
	890,564	1,054,543
Short-term debt and current maturities of long-term debt	(77,161)) (111,268)

\$813,403

\$943,275

We have a \$940,000 revolving senior unsecured credit facility from a syndicate of multinational banks which was scheduled to mature in September 2016. In August 2013, we entered into an amendment of this facility to extend its maturity to September 2018. In addition, the amendment provides an option to increase the total commitment by \$310,000, subject to certain conditions. The interest rate on this facility is based on LIBOR plus a predetermined margin that is based on our debt ratings and leverage ratio. We had no borrowings at September 28, 2013 or December 29, 2012 under this revolving senior unsecured credit facility. This credit facility may also be used to issue letters of credit. At September 28, 2013 and December 29, 2012, letters of credit of

17

Table of Contents

INGRAM MICRO INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

\$14,608 and \$4,491, respectively, were issued to certain vendors and financial institutions to support purchases by our subsidiaries, payment of insurance premiums and flooring arrangements. Our available capacity under the agreement is reduced by the amount of any outstanding letters of credit.

Note 10 – Income Taxes

Our effective tax rate for the thirteen weeks ended September 28, 2013 was 30.5% compared to 28.9% for the thirteen weeks ended September 29, 2012. For the thirty-nine weeks ended September 28, 2013 and September 29, 2012, our effective tax rate was 29.9% and 17.2%, respectively. Under U.S. accounting rules for income taxes, quarterly effective tax rates may vary significantly depending on the actual operating results in the various tax jurisdictions, as well as changes in the valuation allowance related to the expected recovery of deferred tax assets.

The thirteen weeks ended September 28, 2013 included net discrete benefits of approximately \$4,570, or 4.0 percentage points of the effective tax rate driven primarily by the release of a previously recorded reserve against the deferred tax assets of one of our foreign operating units. The thirteen weeks ended September 29, 2012 included net discrete benefits of approximately \$1,658, or 2.2 percentage points of the effective tax rate, which primarily reflected the positive adjustments agreed with the U.S. Internal Revenue Service ("IRS") during that period. The remaining year-over-year change in our effective tax rate reflects the change in mix of profit among different tax jurisdictions and losses in certain tax jurisdictions in which we are not able to record a tax benefit.

The thirty-nine weeks ended September 28, 2013 included net discrete tax benefits of approximately \$11,521, or 4.1 percentage points of the effective tax rate, which includes the discrete items noted for the quarter as well as net discrete benefits of \$5,766 recorded last quarter primarily due to a change in estimate of the amount of BrightPoint acquisition costs deductible for tax purposes. In addition, there were net discrete benefits of \$1,185 recorded in the first quarter of 2013, primarily due to the release of valuation allowance on U.S. state net operating losses.

The thirty-nine weeks ended September 29, 2012 included net discrete tax benefits of approximately \$34,600, or 14.0 percentage points of the effective tax rate, which included the third quarter 2012 net discrete benefit of \$1,658 as discussed above, and a benefit of \$32,942, which was primarily the result of the write-off of the historical tax basis of the investment we had maintained in one of our Latin American subsidiary holdings companies, realized during the first quarter of 2012.

Our effective tax rate differed from the U.S. federal statutory rate of 35% during these periods primarily due to the discrete items noted above, as well as the relative mix of earnings or losses within the tax jurisdictions in which we operate, such as: (a) earnings in lower-tax jurisdictions for which no U.S. taxes have been provided because such earnings are planned to be reinvested indefinitely outside the United States; (b) losses in certain jurisdictions in which we are not able to record a tax benefit; and (c) changes in the valuation allowance on deferred tax assets.

At September 28, 2013, we had gross unrecognized tax benefits of \$39,964 compared to \$38,790 at December 29, 2012, representing a net increase of \$1,174 during the thirty-nine weeks ended September 28, 2013. Substantially all of the gross unrecognized tax benefits, if recognized, would impact our effective tax rate in the period of recognition. We recognize interest and penalties related to unrecognized tax benefits in income tax expense. In addition to the gross unrecognized tax benefits identified above, the interest and penalties recorded to date by us totaled \$8,380 and \$7,889 at September 28, 2013 and December 29, 2012, respectively.

Our future effective tax rate will continue to be affected by changes in the relative mix of taxable income and losses in the tax jurisdictions in which we operate, changes in the valuation of deferred tax assets, or changes in tax laws or interpretations thereof. In addition, our income tax returns are subject to continuous examination by the IRS and other tax authorities. The IRS has concluded its examinations of tax years prior to tax year 2010. In 2013, the IRS initiated its examination of tax years 2010 to 2011. It is possible that within the next twelve months, ongoing tax examinations in the U.S. states and several of our foreign jurisdictions may be resolved, that new tax exams may commence and that other issues may be effectively settled. However, we do not expect our assessment of unrecognized tax benefits to change significantly over that time.

Note 11 – Segment Information

Subsequent to our acquisition of BrightPoint, we have operated predominantly in the following industry segments: (1) distribution of IT products and supply chain solutions worldwide and (2) distribution of mobile devices as well as device lifecycle services and logistics solutions. Our IT distribution reporting segments are based on geographic location, and the measure of segment profit is income from operations.

Geographic areas in which we operated our IT distribution reporting segments during 2013 include North America (the United States and Canada), Europe (Austria, Belgium, France, Germany, Hungary, Italy, the Netherlands, Spain, Sweden, Switzerland and the United Kingdom), Asia-Pacific (Australia, the People's Republic of China including Hong Kong, India, Indonesia, Malaysia, New Zealand, Singapore, Thailand, Lebanon, United Arab Emirates, Turkey, Egypt and South Africa), and Latin America (Brazil, Chile, Colombia, Mexico, Peru, and our Latin American export operations in Miami).

Our BrightPoint reporting segment has operations in the following geographic areas: the United States, Finland, Germany, Norway, Poland, Portugal, Senegal, Slovakia, South Africa, Spain, Sweden, Switzerland, the United Arab Emirates, the United Kingdom, Australia, Hong Kong, India, Malaysia, New Zealand and Singapore.

We do not allocate stock-based compensation recognized (see Note 4) to our operating units; therefore, we are reporting this as a separate amount.

(In 000s, except per share data)

Note 12 – Commitments and Contingencies

Our Brazilian subsidiary has received a number of tax assessments including: (1) a 2005 Federal import tax assessment claiming certain commercial taxes totaling Brazilian Reais 12,714 (\$5,633 at September 28, 2013 exchange rates) were due on the import of software acquired from international vendors for the period January through September of 2002; (2) a 2007 Sao Paulo Municipal tax assessment claiming Brazilian Reais 29,111 (\$12,898 at September 28, 2013 exchange rates) of service taxes were due on the resale of acquired software covering years 2002 through 2006, plus Brazilian Reais 25,972 (\$11,507 at September 28, 2013 exchange rates) of associated penalties; and (3) a 2011 Federal income tax assessment, a portion of which claims statutory penalties totaling Brazilian Reais 15,900 (\$7,044 at September 28, 2013 exchange rates) for delays in providing certain electronic files during the audit of tax years 2008 and 2009, which was conducted through the course of 2011. After working with our advisors, we believe the matters raised in the various assessments, other than the three assessments noted above, represent a remote risk of loss.

In addition to the amounts assessed, it is possible that we could also be assessed up to Brazilian Reais 40,193 (\$17,807 at September 28, 2013 exchange rates) for penalties and interest on the 2005 assessment and up to Brazilian Reais 135,961 (\$60,236 at September 28, 2013 exchange rates) for interest and inflationary adjustments on the 2007 assessment. After working with our advisors on these matters, we believe we have good defenses against each matter and do not believe it is probable that we will suffer a material loss for amounts in the 2007 and the 2011 assessments or any other unassessed amounts noted above. While we will continue to vigorously pursue administrative and, if applicable, judicial action in defending against the 2005 Federal import tax assessment, we continue to maintain a reserve for the full amount assessed at September 28, 2013.

There are various other claims, lawsuits and pending actions against us incidental to our operations. It is the opinion of management that the ultimate resolution of these matters will not have a material adverse effect on our consolidated financial position, results of operations or cash flows. However, we can make no assurances that we will ultimately be successful in our defense of any of these matters.

As is customary in the IT distribution industry, we have arrangements with certain finance companies that provide inventory-financing facilities for their customers. In conjunction with certain of these arrangements, we have agreements with the finance companies that would require us to repurchase certain inventory, which might be repossessed from the customers by the finance companies. Due to various reasons, including among other factors, the lack of information regarding the amount of saleable inventory purchased from us still on hand with the customer at any point in time, repurchase obligations relating to inventory cannot be reasonably estimated. Repurchases of inventory by us under these arrangements have been insignificant to date.

INGRAM MICRO INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In 000s, except per share data)

Note 13 – New Accounting Standards

In July 2013, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists, which requires a reporting entity to present an unrecognized tax benefit as a liability in the financial statements separate from deferred tax assets if a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available as of the reporting date to settle taxes that would result from the disallowance of the tax position or if a reporting entity does not intend to use the deferred tax asset for such purpose. This standard will be effective for us beginning December 29, 2013, the first day of fiscal year 2014. We are currently assessing the impact of this new guidance.

In December 2011, the FASB issued a new accounting standard related to enhanced disclosures on offsetting (netting) of assets and liabilities in the financial statements. This standard requires improved information about financial instruments and derivative instruments that are either allowed to be offset in accordance with another accounting standard or subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in accordance with another accounting standard. Under this standard, financial statements should disclose the gross amounts of those recognized assets and liabilities and the amounts offset, whether permitted by another accounting standard or subject to master netting arrangement, to determine the net amounts presented in the statement of financial position. This standard was effective for us beginning December 30, 2012 and did not have a material impact on our consolidated financial position.

Note 14 – Legal Settlement

We have been a claimant in a class action proceeding seeking damages from certain manufacturers of LCD flat panel displays. On July 12, 2013, the federal district judge overseeing the proceeding issued an order approving a plan of distribution to the class claimants. In July 2013, we received a distribution of \$29,500, net of all attorney fees and expenses, which was reflected as a reduction of selling, general and administrative expenses. The court has deferred distribution of a portion of the settlement fund. Accordingly, we may receive up to an additional \$7,000 from the remaining escrowed settlement fund in the future depending on the extent to which subsequent, approved claims are made on the fund.

Note 15 – Subsequent Event

On September 30, 2013, the first day of our fiscal fourth quarter, we acquired all of the outstanding shares of U.S.-based CloudBlue Technologies, Inc. (“CloudBlue”), a global leader in enterprise IT asset disposition, onsite data destruction and e-waste recycling services for a cash purchase price of approximately \$37,000. This acquisition expands our supply-chain services and broadens our array of forward and reverse logistics services, adding eco-friendly, secure hardware disposal and onsite data destruction and a more complete offering in managing returns, including item inspection.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Unless otherwise stated, all currency amounts, other than per share information, contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations are stated in thousands.

The following discussion contains forward-looking statements, including, but not limited to, management's expectations of competition; market share; revenues, margin, expenses and other operating results and ratios; economic conditions; vendor terms and conditions; deployment of enterprise systems; pricing strategies and customer terms and conditions; process and efficiency enhancements; cost-savings; cash flows; inventory levels; working capital days; capital expenditures; liquidity; capital requirements; acquisitions and integration costs; operating models; exchange rate fluctuations and related currency gains or losses; resolution of contingencies; seasonality; interest rates and expenses; and rates of return. In evaluating our business, readers should carefully consider the important factors included in Item 1A "Risk Factors" in our Annual Report on Form 10-K for the year ended December 29, 2012, as filed with the Securities and Exchange Commission. These factors could cause our actual results and conditions to differ materially from our historical performance or those projected in our forward-looking statements. We disclaim any duty to update any forward-looking statements.

Overview of Our Business

We are the largest wholesale technology distributor and a global leader in IT supply-chain and mobile device lifecycle services worldwide based on revenues. We offer a broad range of IT products and supply chain solutions and help generate demand and create efficiencies for our customers and suppliers around the world. Our acquisition of BrightPoint in October 2012 expanded our product and service offerings to mobile device lifecycle services and logistics solutions worldwide. Our results of operations have been, and will continue to be, directly affected by the conditions in the economy in general. The IT distribution industry in which we operate is characterized by narrow gross profit as a percentage of net sales, or gross margin, and narrow income from operations as a percentage of net sales, or operating margin. Historically, our margins have also been impacted by pressures from price competition and declining average selling prices, as well as changes in vendor terms and conditions, including, but not limited to, variations in vendor rebates and incentives, our ability to return inventory to vendors, and time periods qualifying for price protection. We expect competitive pricing pressures and restrictive vendor terms and conditions to continue in the foreseeable future. In addition, our margins have and may continue to be impacted by our inventory levels, which are based on projections of future demand, product availability, product acceptance and marketability, and market conditions. Any sudden decline in demand and/or rapid technological changes in products could cause us to have a charge for excess and/or obsolete inventory. We continue to monitor and refine our pricing strategies, inventory management processes and vendor program processes to respond and to mitigate the impact of these factors. In addition, we continuously monitor and work to change, as appropriate, certain terms, conditions and credit offered to our customers to reflect those being imposed by our vendors, to recover costs and/or to facilitate sales opportunities. We also strive to improve our profitability through diversification of product offerings, including our presence in adjacent product categories, such as automatic identification/data capture and point-of-sale, or AIDC/POS, enterprise computing and data center, cloud computing, consumer electronics, fee-for-service supply chain offerings and expansion into mobile device lifecycle services and logistics solutions. Our business also requires significant levels of working capital primarily to finance trade accounts receivable and inventory. We have historically relied on, and continue to rely heavily on, trade credit from vendors, available cash, debt and factoring of trade accounts receivable for our working capital needs.

Over the past few years, we have complemented our internal growth initiatives with strategic business acquisitions including BrightPoint as noted previously; Promark Technology Inc. in North America; Eurequat SA, Intertrade A.F. AG, Paradigm Distribution Ltd., Symtech Nordic AS, Computacenter Distribution, Albora Soluciones SL, interAct BVBA and Aretê Sistemas S.A. in Europe; and Aptec Holdings Inc., Vantex Technology Distribution Limited, Value Added Distributors Limited, Asiasoft Hong Kong Limited and the Cantechs Group in Asia-Pacific. These acquisitions have expanded our geographic reach as well as our presence in the value-added distribution of mobile data and AIDC/POS solutions and in the mid-range enterprise market. During the third quarter of 2013, we acquired SoftCom Group, Inc. ("SoftCom") in Canada, which will enhance our cloud offerings roadmap and aggregation platform. In

addition, on September 30, 2013, which was the first day of our fiscal fourth quarter, we acquired CloudBlue Technologies, Inc. ("CloudBlue") in the U.S., which expands our supply-chain capabilities and solutions offerings, adding global enterprise IT asset disposition, onsite data destruction and e-waste recycling services.

We manage our business through continuous cost controls and process and efficiency enhancements. This may also include, from time to time, reorganization actions to further enhance productivity and profitability and could result in the recognition of reorganization costs or impairment of assets.

We are in the process of migrating our operations from our legacy proprietary system that was developed in the late-1980s to SAP in a phased, country-by-country approach over the next several years. We have deployed SAP in several operations globally beginning in 2009 with our last deployment in early 2013 in Columbia. Additional deployments have been on hold as we continue to address certain improvements within the system to better address our internal and customer needs. We are continuing to evaluate our SAP deployment schedule and currently do not plan any deployments in large countries for the remainder of 2013.

Table of Contents

Management's Discussion and Analysis Continued

We sell finished products purchased from many vendors but generated approximately 14% of our consolidated net sales for the thirteen weeks ended September 28, 2013 from products purchased from Hewlett-Packard Company, and 23%, 14% and 11% from products purchased from Hewlett-Packard Company, Apple Inc. and Cisco Systems, Inc., respectively, for the thirteen weeks ended September 29, 2012.

For the thirty-nine weeks ended September 28, 2013, we generated approximately 15% of our consolidated net sales from products purchased from Hewlett-Packard Company, and 21%, 11% and 10% from products purchased from Hewlett-Packard Company, Apple Inc. and Cisco Systems, Inc., respectively, for the thirty-nine weeks ended September 29, 2012.

The year-over-year decreases in products purchased from these vendors, as a percentage of net sales, for the periods discussed above reflects the higher mix of products purchased from other vendors as a result of changes in the market in general and our acquisition of BrightPoint which does not have significant products purchased from these vendors. There were no other vendors or any customers that represented 10% or more of our consolidated net sales in either of the periods presented.

Management's Discussion and Analysis Continued

The increase in our consolidated net sales for the thirteen weeks ended September 28, 2013, or third quarter of 2013, compared to the thirteen weeks ended September 29, 2012, or third quarter of 2012, largely reflected our acquisitions of BrightPoint, Aptec and Promark which accounted for approximately 12 percentage points of our growth in consolidated net sales. Modest growth in North America helped offset revenue declines in China. The translation impact of foreign currencies relative to the U.S. dollar did not have a material impact on our consolidated net sales. The modest increase in our North American net sales reflects strategic management of growth and pricing in various segments as the region continues to face competitive pricing. Revenue growth was driven by advanced solutions, with particular strength in storage and infrastructure systems and strength in sales of consumer electronics. Additionally, Canada continued its momentum, with another quarter of low double-digit revenue growth driven by share gains across several product categories and strong sales of advanced solutions.

European net sales were flat in dollars, which reflects the favorable translation impact of stronger local currencies, which contributed approximately four percentage points of increase. This impact was offset by the continued impact of weak macro-economic conditions throughout the region. Certain countries such as United Kingdom, France and the Netherlands outperformed the market, while others, such as Germany, Belgium and Spain, were negatively impacted by weak economic conditions that persist in this region where we have higher exposure to retail demand.

The net decrease in our Asia-Pacific net sales reflects the unfavorable translation impact of weaker local currencies which contributed three percentage points of decline, plus a mix of growth and declines in other markets in the region. In China, revenue declined 19% driven by slower sales of tablets which was a large driver of China's double-digit growth last year. This decline was partially offset by the acquisition of Aptec, which contributed approximately three percentage points to the region's overall growth and higher sales in Australia and India. Australia's revenue grew for the third quarter in a row, despite an overall IT market that is declining across most sectors in the country. India generated double-digit revenue growth supported by increases across multiple product lines particularly with networking solutions.

The decrease in Latin American net sales primarily reflects the unfavorable translation impact of weaker local currencies, which contributed approximately three percentage points of decline, as well as lower revenues in Miami export which were negatively impacted by slower demand in gaming products and tablets, due in part to a lack of new product introductions versus last year. These declines were partially offset by solid revenue growth in Brazil, as we continue to gain share with large vendors and drive growth. Also, Mexico started to recover from recent quarterly revenue declines, supported by a return in consumer demands.

Gross margin increased 88 basis points in the third quarter of 2013 compared to the third quarter of 2012. The third quarter of 2013 gross margin benefited by 63 basis points from the addition of higher gross margin revenue from BrightPoint. Gross margin in our IT distribution business increased 25 basis points year-over-year, benefiting from lower sales of tablets and steady pricing discipline, as we appropriately managed growth.

Total selling, general and administrative expenses, or SG&A expenses, increased \$89,327, or 25.3%, in the third quarter of 2013 compared to the third quarter of 2012, and increased 45 basis points as a percentage of consolidated net sales. The current year quarter included a net benefit of approximately \$24,500 or 24 basis points of consolidated net sales, relating to the receipt of \$29,500 from a LCD flat panel display class action settlement; partially offset by the negative impact of approximately \$5,000 reserve recorded for estimated potential penalties and other charges related to indirect tax declarations in Europe. The acquisition of BrightPoint added approximately \$97,000 of cost and increased our consolidated operating expense ratio by 56 basis points due to the higher labor content required by the high-touch nature of its value-added services. The increase in our SG&A expenses also reflects integration costs associated with this acquisition and continued investments in key strategic areas across all regions to further diversify our revenues.

Amortization of intangible assets increased \$9,092 in the third quarter of 2013 compared to the third quarter of 2012, and increased eight basis points as a percentage of consolidated net sales in the third quarter of 2013 compared to the third quarter of 2012. The increase in the current year quarter reflects our acquisitions of BrightPoint, Aptec and Promark.

During the third quarter of 2013, we incurred net reorganization costs of \$6,748 primarily related to headcount reductions in Germany as we are adjusting its cost structure in line with the current market conditions and our exit of a BrightPoint facility in the U.S. (see Note 8 to our consolidated financial statements). During the third quarter of 2012, we incurred net reorganization costs of \$5,268, primarily related to workforce reductions associated with transition of some functions to shared services centers.

Operating margin increased 33 basis points in the third quarter of 2013 compared to the third quarter of 2012, reflecting the higher gross margin as discussed above, partially offset by the higher SG&A expenses, amortization of intangible assets and

Table of Contents

Management's Discussion and Analysis Continued

reorganization and integration costs, all of which primarily relate to the BrightPoint acquisition. The third quarter of 2013 also included a charge related to inventory losses in one of our mobility warehouses.

The increase in our North American operating margin in the third quarter of 2013 compared to the third quarter of 2012 reflects the impact of the LCD class action settlement of \$28,500, or 70 basis points of North American net sales, recognized in this region, as well as good pricing discipline and the realization of initial benefits from earlier strategic investments.

The decrease in our European operating margin in the third quarter of 2013 compared to the third quarter of 2012 reflects the impact of the charge of \$5,000, or 21 basis points of European net sales, related to the indirect tax declarations noted above and the impact of continued challenging macro-economic conditions throughout the region. The region also incurred incremental termination benefit costs as it is adjusting its cost structure in line with the current market conditions.

The increase in our Asia-Pacific operating margin in the third quarter of 2013 compared to the third quarter of 2012 primarily relates to improvement in Australia, which reduced its operating loss to less than \$2,000 in the current year quarter from approximately \$9,000 in the prior year quarter, lower reorganization costs in the current period, and operating leverage on growth in India, partially offset by the market compression noted in China.

The increase in our Latin American operating margin in the third quarter of 2013 compared to the third quarter of 2012 primarily reflects profitability improvements in Brazil and the impact of the LCD class action settlement of approximately \$1,000 recognized in this region (23 basis points of Latin American net sales), partially offset by declines in higher margin revenues in Mexico and in our Miami export business.

Other expense, net, consisted primarily of interest expense and income, foreign currency exchange losses and gains and other non-operating gains and losses. We incurred other expenses of \$24,188 in the third quarter of 2013 compared to \$17,623 in the third quarter of 2012. The year-over-year increase is primarily attributable to higher interest expense due to an increase in average debt outstanding resulting primarily from our acquisition of BrightPoint. In addition, we incurred higher net foreign currency exchange losses related to the foreign-currency translation impact on Euro-based inventory purchases in our pan-European entity, which designates the U.S. dollar as its functional currency, which was a loss of approximately \$4,600 in the third quarter of 2013 compared to a loss of approximately \$2,800 in the third quarter of 2012.

We recorded an income tax provision of \$34,565, or an effective tax rate of 30.5%, in the third quarter of 2013 compared to \$21,715, or an effective tax rate of 28.9%, in the third quarter of 2012. The current year income tax provision included net discrete tax benefits totaling approximately \$4,570, or 4.0 percentage points of the effective tax rate, recognized in the quarter, driven primarily by the release of a previously recorded reserve against the deferred tax assets of one of our foreign operating units. The impact of this benefit on our effective tax rate was more than offset by the change in mix of profit among different tax jurisdictions and losses in other tax jurisdictions in which we are not able to record a tax benefit.

We currently expect our 2013 full year effective tax rate to be approximately 31%; however, effective tax rates may vary significantly depending on the actual operating results in the various tax jurisdictions, as well as changes in the valuation allowance related to the expected recovery of our deferred tax assets.

The increase in our consolidated net sales for the thirty-nine weeks ended September 28, 2013, or first nine months of 2013, compared to the thirty-nine weeks ended September 29, 2012, or first nine months of 2012, largely reflects our acquisitions of

Table of Contents

Management's Discussion and Analysis Continued

BrightPoint, Aptec and Promark which contributed approximately 14 percentage points of our growth in consolidated revenue, as well as modest growth in our other operating regions except Europe, which is essentially flat year-over-year. The translation impact of foreign currencies relative to the U.S. dollar did not have a material impact on our consolidated net sales.

The increase in our North American net sales reflects solid growth in advanced solutions, strength in our key small and medium-sized business, or SMB, market in the U.S. and growth in consumer electronics.

Our European net sales were flat in dollars, which largely reflects the favorable translation impact of stronger local currencies which contributed approximately two percentage points of increase, principally offset by the impact of continued challenging macro-economic conditions in several markets in the region as discussed in the results for the third quarter.

The increase in our Asia-Pacific net sales reflects the acquisition of Aptec, which contributed approximately four percentage points to the region's overall growth, partially offset by the translation impact of weaker local currencies, which contributed approximately two percentage points of decline, plus a mix of growth and declines in other markets in the region, particularly Australia, India and China, which largely reflect the same factors discussed in our results for the third quarter.

The increase in Latin American net sales reflects continued improvement in Brazil, partially offset by declines in Mexico and Miami export. In Mexico, our sales have been impacted by delays in government spending and a slowdown in consumer spending in the first half of the year, while Miami has seen a slowdown in certain consumer-related products which benefited from new product launches in the prior year. The translation impact of foreign currencies relative to the U.S. dollar did not have a material impact on our consolidated net sales.

Gross margin increased 59 basis points in the first nine months of 2013 compared to the first nine months of 2012 and benefited by 61 basis points from the addition of BrightPoint's higher gross margin revenue, driven by its mobility services business. This benefit helped offset the dilutive impact of a more competitive selling environment, both in North America and Europe, as well as the loss of favorable hard disc drive pricing realized in the prior year first quarter.

Total SG&A expenses increased \$317,306, or 29.8%, in the first nine months of 2013 compared to the first nine months of 2012, and increased 47 basis points as a percentage of consolidated net sales. These increases are partially offset by the net benefit of approximately \$24,500, or eight basis points of net sales, recorded in the current year period related to the LCD class action settlement and the charge for indirect tax declarations in Europe as discussed in the results for the third quarter. The increase in SG&A costs largely reflects our acquisition of BrightPoint, which added approximately \$294,000 of cost and increased our consolidated expense ratio by 52 basis points due to the higher labor content required by the high-touch nature of its value-added services, as well as integration costs associated with this acquisition. The increase also reflects investments in key strategic areas across all regions to further diversify our revenues.

Amortization of intangible assets increased \$27,223 in the first nine months of 2013 compared to the first nine months of 2012 due to our acquisitions of BrightPoint, Aptec and Promark.

During the first nine months of 2013, we incurred net reorganization costs of \$20,050 relating to a number of key initiatives, including: (a) the integration of certain BrightPoint operations into Ingram Micro, resulting in headcount reductions and the closure of certain BrightPoint facilities, and the exit of a portion of one our Australian offices in Asia-Pacific; (b) an announced plan to reduce headcount in Germany to respond to the current market environment; and (c) the transition of certain transaction-oriented service and support functions to shared services centers. During the first nine months of 2012, we incurred reorganization costs of \$6,664 primarily related to workforce reductions associated with the transition of some functions to shared services centers.

Table of Contents

Management's Discussion and Analysis Continued

Operating margin in the first nine months of 2013 was relatively flat compared to the first nine months of 2012, primarily reflecting the net benefit of the LCD class action settlement and the indirect tax declaration expense discussed above, partially offset by higher costs for amortization of intangible assets, reorganization and integration costs, and investments in strategic growth areas in the current year as well as the loss of favorable hard disc drive pricing realized in the prior year first quarter.

The increase in our North American operating margin in the first nine months of 2013 compared to the first nine months of 2012 primarily reflects the benefit of the LCD class action settlement, partially offset by our loss of favorable hard disc drive pricing realized in the prior year first quarter and our continued strategic investments. The decrease in our European operating margin in the first nine months of 2013 compared to the first nine months of 2012 primarily related to the impact of continued challenging macro-economic conditions throughout the region, a continued competitive environment, the impact of the charge of \$5,000, or seven basis points of European net sales, related to the indirect tax declarations noted above and reorganization costs in Germany as it is adjusting its cost structure in line with the current market conditions.

The increase in our Asia-Pacific operating margin in the first nine months of 2013 compared to the first nine months of 2012 primarily related to an improvement in Australia, continued growth in India, and cost control measures in the region, partially offset by the negative impacts of the volume decline in China.

The increase in our Latin American operating margin in the first nine months of 2013 compared to the first nine months of 2012 primarily related to improvements in Brazil, a seven basis point benefit on the sale of land and a building in Argentina and the seven basis point benefit from the LCD class action settlement, partially offset by declines in higher margin revenues in Mexico and our Miami export business. In the prior year period, operating margin was negatively impacted by 17 basis points of costs associated with the closure of our Argentina in-country operations.

Other expense, net, consisted primarily of interest expense and income, foreign currency exchange losses and gains and other non-operating gains and losses. We incurred other expenses of \$59,102 in the first nine months of 2013 compared to \$47,411 in the first nine months of 2012. The year-over-year increase is primarily attributable to higher interest expense due to an increase in average debt outstanding resulting from our acquisition of BrightPoint as well as higher net foreign currency exchange losses.

We recorded an income tax provision of \$84,798, or an effective tax rate of 29.9%, in the first nine months of 2013 compared to \$42,516, or an effective tax rate of 17.2%, in the first nine months of 2012. The first nine months of 2013 included net discrete tax benefits totaling approximately \$11,521, or 4.1 percentage points of the effective tax rate, recognized primarily as a result of a change in estimate of the amount of BrightPoint acquisition costs deductible for tax purposes and due to the reduction of the reserve on the deferred tax assets of one of our foreign subsidiaries as discussed in the results for the third quarter. The first nine months of 2012 included net discrete tax benefits of approximately \$28,532, or 11.5 percentage points of the effective tax rate, which was primarily a result of the write-off of the historical tax basis of the investment we had maintained in one of our Latin American subsidiary holding companies, which was realized in the first quarter of 2012, and the \$4,378 or 1.8 percentage points of discrete benefits recognized in the second quarter of 2012. The remaining year-over-year change in the effective tax rate is driven by the change in mix of profit and losses among different tax jurisdictions.

Management's Discussion and Analysis Continued

Quarterly Data; Seasonality

Our quarterly operating results have fluctuated significantly in the past and will likely continue to do so in the future as a result of:

- the impact of and possible disruption caused by efforts to improve our IT capabilities, integrate acquisitions or implement reorganization actions, as well as the related expenses and/or charges;
- competitive conditions in our industry, which may impact the prices charged and terms and conditions imposed by our suppliers and/or competitors and the prices we charge our customers, which in turn may negatively impact our revenues and/or gross margins;
- general changes in economic or geopolitical conditions, including changes in legislation or regulatory environments in which we operate;
- seasonal variations in the demand for our products and services, which historically have included lower demand in Europe during the summer months, worldwide pre-holiday stocking in the retail channel during the September-to-December period and the seasonal increase in demand for our North American fee-based logistics services in the fourth quarter, which affect our operating expenses and gross margins;
- changes in product mix, including entry or expansion into new markets, as well as the exit or retraction of certain business;
- currency fluctuations in countries in which we operate;
- variations in our levels of excess inventory and doubtful accounts, and changes in the terms of vendor-sponsored programs such as price protection and return rights;
- changes in the level of our operating expenses;
- changes in our provision for taxes due to the mix of taxable earnings and losses across our operations, including losses in certain tax jurisdictions in which we are not able to record a tax benefit, as well as the resolution of uncertain tax positions or changes in the valuation allowance related to the expected recovery of our deferred tax assets;
- the impact of acquisitions and divestitures;
- the occurrence of unexpected events or the resolution of existing uncertainties, including, but not limited to, litigation, or regulatory matters;
- the loss or consolidation of one or more of our major suppliers or customers;
- product supply constraints; and
- interest rate fluctuations and/or credit market volatility, which may increase our borrowing costs and may influence the willingness or ability of customers and end-users to purchase products and services.

Historical variations in our business may not be indicative of future trends. In addition, our narrow operating margins may magnify the impact of the foregoing factors on our operating results.

Management's Discussion and Analysis Continued

Liquidity and Capital Resources

Cash Flows

We finance our working capital needs and investments in the business largely through net income before noncash items, available cash, trade and supplier credit and various financing facilities. As a distributor, our business requires significant investment in working capital, particularly trade accounts receivable and inventory, which is partially financed by vendor trade accounts payable. As a general rule, when sales volumes are increasing, our net investment in working capital dollars typically increases, which generally results in decreased cash flow generated from operating activities. Conversely, when sales volume decreases, our net investment in working capital decreases, which generally results in increases in cash flows generated from operating activities. The following is a detailed discussion of our cash flows for the first nine months of 2013 and 2012.

Operating activities provided net cash of \$113,401 in the first nine months of 2013 compared to net cash used of \$34,916 in the first nine months of 2012. The increase in our cash provided from operations from the first nine months of 2012 to the first nine months of 2013 reflects the increase in our net income before noncash charges in the current period and the impact of changes in working capital as compared to the prior year period which reflects variations in the seasonality of our business.

Investing activities used net cash of \$79,120 in the first nine months of 2013 compared to \$64,009 in the first nine months of 2012 primarily driven by capital expenditures in both periods as well as our acquisition of SoftCom in 2013.

Financing activities used net cash of \$115,054 in the first nine months of 2013 compared to net cash provided of \$360,345 in the first nine months of 2012. The net cash used by financing activities in the first nine months of 2013 primarily reflects the net payment of \$155,272 on our revolving credit facilities with funds generated from operating cash flows as well as the proceeds of \$39,517 from exercise of stock options. The net cash provided by financing activities in the first nine months of 2012 primarily reflects \$296,256 in net proceeds from the issuance of our senior unsecured notes due in 2022 and \$79,561 in net proceeds from our revolving credit facilities and proceeds from exercises of stock options of \$29,331; partially offset by our repurchase of \$50,000 of Class A Common Stock. Our levels of debt and cash and cash equivalents are highly influenced by our working capital needs. As such, our cash and cash equivalents balances and borrowings fluctuate from period to period and may also fluctuate significantly within a quarter. The fluctuation is the result of the concentration of payments received from customers toward the end of each month, as well as the timing of payments made to our vendors. Accordingly, our period-end debt and cash balances may not be reflective of our average levels or maximum debt and/or minimum cash levels during the periods presented or at any other point in time.

Capital Resources

We have a range of financing facilities which are diversified by type, maturity and geographic region with various financial institutions worldwide with a total capacity of approximately \$3,558,000, of which \$890,564 was outstanding, at September 28, 2013. These facilities have staggered maturities through 2022. Our cash and cash equivalents totaled \$501,626 and \$595,147 at September 28, 2013 and December 29, 2012, respectively, of which \$397,559 and \$533,585, respectively, resided in operations outside of the U.S. Our ability to repatriate these funds to the U.S. in an economical manner may be limited. Our cash balances are deposited and/or invested with various financial institutions globally that we endeavor to monitor regularly for credit quality. However, we are exposed to risk of loss on funds deposited with the various financial institutions and money market mutual funds and we may experience significant disruptions in our liquidity needs if one or more of these financial institutions were to suffer bankruptcy or similar restructuring. As of September 28, 2013 and December 29, 2012, we had book overdrafts of \$469,047 and \$415,207, respectively, representing checks issued on disbursement bank accounts but not yet paid by such banks. These amounts are classified as accounts payable in our consolidated balance sheet and are typically paid by the banks in a relatively short period of time. We believe that our existing sources of liquidity provide sufficient resources to meet our capital requirements, including the potential need to post cash collateral for identified contingencies (see Note 12 to our consolidated financial statements and Item 1. "Legal Proceedings" under Part II. "Other

Information” for further discussion of identified contingencies), for at least the next twelve months. Nevertheless, depending on capital and credit market conditions, we may from time to time seek to increase or decrease our available capital resources through changes in our debt or other financing facilities. Finally, since the capital and credit markets can be volatile, we may be limited in our ability to replace in a timely manner maturing credit facilities and other indebtedness on terms acceptable to us, or at all, or to access committed capacities due to the inability of our finance partners to meet their commitments to us. The following is a detailed discussion of our various financing facilities.

In August 2012, we issued through a public offering \$300,000 of 5.00% senior unsecured notes due 2022, resulting in cash proceeds of approximately \$296,256, net of discount and issuance costs of \$1,794 and \$1,950, respectively. Interest on the notes is payable semiannually in arrears on February 10 and August 10, commencing February 10, 2013. At September 28, 2013 and December 29, 2012, our senior unsecured notes due 2022 had a carrying value of \$298,410 and \$298,275, respectively, net of

Table of Contents

Management's Discussion and Analysis Continued

unamortized discount of \$1,590 and \$1,725, respectively. At September 28, 2013 and December 29, 2012, we also had \$300,000 of 5.25% senior unsecured notes due 2017. Interest on these notes is payable semiannually in arrears on March 1 and September 1 of each year. These notes may be redeemed by us in whole at any time or in part from time to time, at our option, at redemption prices that are designated in the terms and conditions of the respective notes.

We have a revolving trade accounts receivable-backed financing program in North America which provides for up to \$675,000 in borrowing capacity. This financing program matures in November 2015. This financing program, subject to the financial institutions' approval and availability of eligible receivables, may be increased to \$900,000 in accordance with the extended terms of the program. The interest rate of this program is dependent on designated commercial paper rates (or, in certain circumstances, an alternate rate) plus a predetermined margin. We had borrowings of \$214,993 and \$345,000 at September 28, 2013 and December 29, 2012, respectively, under this North American financing program.

We have three revolving trade accounts receivable-backed financing programs in Europe and in Asia-Pacific:

a) a program which provides for a borrowing capacity of up to €105,000, or approximately \$142,000 at September 28, 2013 exchange rates. In June 2013, we entered into an agreement to increase the borrowing capacity of this program to €105,000 from the previous amount of €100,000 and to extend its maturity to January 2017.

b) A program which provides for a maximum borrowing capacity of up to €45,000, or approximately \$61,000 at September 28, 2013 exchange rates. In May 2013, this program was extended and in June 2013, we entered into an agreement to reduce the borrowing capacity of this program to €45,000 from the previous amount of €90,000 and to extend its maturity to May 2016.

c) A program which provides for a maximum borrowing capacity of up to 160,000 Australian dollars, or approximately \$149,000 at September 28, 2013 exchange rates, maturing in May 2014.

The current programs require certain commitment fees, and borrowings under this program incur financing costs based on the local short-term bank indicator rate for the currency in which the drawing is made plus a predetermined margin. We had no borrowings at September 28, 2013 or December 29, 2012 under any of these three financing programs.

Our ability to access financing under all our trade accounts receivable-backed financing programs in North America, Europe and Asia-Pacific, as discussed above, is dependent upon the level of eligible trade accounts receivable as well as continued covenant compliance. We may lose access to all or part of our financing under these programs under certain circumstances, including: (a) a reduction in sales volumes leading to related lower levels of eligible trade accounts receivable; (b) failure to meet certain defined eligibility criteria for the trade accounts receivable, such as receivables remaining assignable and free of liens and dispute or set-off rights; (c) performance of our trade accounts receivable; and/or (d) loss of credit insurance coverage for our European and Asia-Pacific facilities. At September 28, 2013, our actual aggregate capacity under these programs was approximately \$996,000 based on eligible trade accounts receivable available, of which \$214,993 of such capacity used. Even if we do not borrow, or choose not to borrow to the full available capacity of certain programs, most of our trade accounts receivable-backed financing programs prohibit us from assigning, transferring or pledging the underlying eligible receivables as collateral for other financing programs. At September 28, 2013, the amount of trade accounts receivable which would be restricted in this regard totaled approximately \$1,390,000.

We have a \$940,000 revolving senior unsecured credit facility from a syndicate of multinational banks. In August 2013, we entered into an amendment of this facility to extend its maturity to September 2018. In addition, the amendment provides an option to increase the total commitment by \$310,000, subject to certain conditions. The interest rate on this facility is based on LIBOR plus a predetermined margin that is based on our debt ratings and leverage ratio. We had no borrowings at September 28, 2013 or December 29, 2012 under this revolving senior unsecured credit facility. This credit facility may also be used to issue letters of credit. At September 28, 2013 and December 29, 2012, letters of credit of \$14,608 and \$4,491, respectively, were issued to certain vendors and financial institutions to support purchases by our subsidiaries, payment of insurance premiums and flooring arrangements. Our available capacity under the agreement is reduced by the amount of any outstanding letters of credit.

We also have additional lines of credit, short-term overdraft facilities and other credit facilities with various financial institutions worldwide, which provide for borrowing capacity aggregating approximately \$992,000 at September 28, 2013. Most of these arrangements are on an uncommitted basis and are reviewed periodically for renewal. At September 28, 2013 and December 29, 2012, respectively, we had \$77,161 and \$111,268 outstanding under these facilities. The weighted average interest rate on the outstanding borrowings under these facilities, which may fluctuate depending on geographic mix, was 6.5% and 7.9% per annum at September 28, 2013 and December 29, 2012, respectively. At September 28, 2013 and December 29, 2012, letters of

Table of Contents

Management's Discussion and Analysis Continued

credit totaling \$34,349 and \$30,829, respectively, were issued to various customs agencies and landlords to support our subsidiaries. The issuance of these letters of credit reduces our available capacity under these agreements by the same amount.

There have been no significant changes in our contractual obligations from those disclosed in our Annual Report on Form 10-K for the year ended December 29, 2012 other than those noted in this "Capital Resources" section.

Covenant Compliance

We are required to comply with certain financial covenants under the terms of certain of our financing facilities, including restrictions on funded debt and liens and covenants related to tangible net worth, leverage and interest coverage ratios and trade accounts receivable portfolio performance. We are also restricted by other covenants, including, but not limited to, restrictions on the amount of additional indebtedness we can incur, dividends we can pay, and the amount of common stock that we can repurchase annually. At September 28, 2013, we were in compliance with all material covenants or other material requirements set forth in our trade accounts receivable-backed programs, senior unsecured notes due 2017 and 2022, revolving unsecured credit facility and other credit agreements, as discussed above.

Trade Accounts Receivable Factoring Programs

We have three uncommitted factoring programs, one in North America and two in Europe, under which trade accounts receivable of two large customers may be sold, without recourse, to financial institutions. Available capacity under these programs is dependent on the amount of trade accounts receivable already sold to and held by financial institutions, the level of our trade accounts receivable eligible to be sold into these programs and the financial institutions' willingness to purchase such receivables. At September 28, 2013 and December 29, 2012, we had a total of \$329,865 and \$242,626, respectively, of trade accounts receivable sold to and held by the financial institutions under these programs.

Other Matters

See Note 12 to our consolidated financial statements and Item 1. "Legal Proceedings" under Part II "Other Information" for discussion of other matters.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There were no material changes in our quantitative and qualitative disclosures about market risk for the first nine months of 2013 from those disclosed in our Annual Report on Form 10-K for the year ended December 29, 2012. For further discussion of quantitative and qualitative disclosures about market risk, reference is made to our Annual Report on Form 10-K for the year ended December 29, 2012.

Item 4. Controls and Procedures

Our management evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

We are in the process of upgrading our computer systems used for operations in certain of our subsidiaries.

Implementation of these systems has necessitated changes in operating policies and procedures and the related internal controls and their method of application. However, there have been no changes in our internal control over financial reporting that occurred during the last fiscal quarter covered by this report that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Unless otherwise indicated, currency and share amounts in Part II are stated in thousands.

Item 1. Legal Proceedings

Our Brazilian subsidiary has received a number of tax assessments including: (1) a 2005 Federal import tax assessment claiming certain commercial taxes totaling Brazilian Reais 12,714 (\$5,633 at September 28, 2013

exchange rates) were due on the import of software acquired from international vendors for the period January through September of 2002; (2) a 2007 Sao

36

Table of Contents

Paulo Municipal tax assessment claiming Brazilian Reais 29,111 (\$12,898 at September 28, 2013 exchange rates) of service taxes were due on the resale of acquired software covering years 2002 through 2006, plus Brazilian Reais 25,972 (\$11,507 at September 28, 2013 exchange rates) of associated penalties; and (3) a 2011 Federal income tax assessment, a portion of which claims statutory penalties totaling Brazilian Reais 15,900 (\$7,044 at September 28, 2013 exchange rates) for delays in providing certain electronic files during the audit of tax years 2008 and 2009, which was conducted through the course of 2011. After working with our advisors, we believe the matters raised in the various assessments, other than the three assessments noted above, represent a remote risk of loss.

In addition to the amounts assessed, it is possible that we could also be assessed up to Brazilian Reais 40,193 (\$17,807 at September 28, 2013 exchange rates) for penalties and interest on the 2005 assessment and up to Brazilian Reais 135,961 (\$60,236 at September 28, 2013 exchange rates) for interest and inflationary adjustments on the 2007 assessment. After working with our advisors on these matters, we believe we have good defenses against each matter and do not believe it is probable that we will suffer a material loss for amounts in the 2007 and the 2011 assessments or any other unassessed amounts noted above. While we will continue to vigorously pursue administrative and, if applicable, judicial action in defending against the 2005 Federal import tax assessment, we continue to maintain a reserve for the full amount assessed at September 28, 2013.

In March 2008, we and one of our subsidiaries were named as defendants in a lawsuit arising out of the 2005 bankruptcy of Refco, Inc., and its subsidiaries and affiliates (collectively, "Refco"). The liquidators of numerous Cayman Island-based hedge funds filed suit (the "Krys action") against Grant Thornton LLP, Mayer Brown Rowe & Maw, LLP, Phillip Bennet, and numerous other individuals and entities. The Krys action alleges that we and our subsidiary aided and abetted the fraud and breach of fiduciary duty of Refco insiders and others by participating in loan transactions between the subsidiary and Refco in early 2000 and early 2001, causing damage to the hedge funds in an unspecified amount. The action is pending in the U.S. District Court for the Southern District of New York. On July 31, 2012, the trial court entered judgment in our favor, dismissing plaintiffs' claims against us and our subsidiary with prejudice. Plaintiffs have appealed that judgment, but we do not expect the final disposition of the Krys matter to have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 29, 2012, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

- (a) Not applicable
- (b) Not applicable
- (c) Not applicable
