

JAPAN EQUITY FUND INC  
Form N-30D  
January 02, 2003

THE JAPAN EQUITY FUND, INC.

-----  
GENERAL INFORMATION  
-----

THE FUND

The investment objective of the Fund is to outperform over the long term, on a total return basis (including appreciation and dividends), the Tokyo Stock Price Index ("TOPIX"), a composite market-capitalization weighted index of all common stocks listed on the First Section of the Tokyo Stock Exchange ("TSE"). The Fund seeks to achieve its investment objective by investing substantially all of its assets in equity securities of companies listed on the TSE or listed on the over-the-counter market in Japan or listed on other stock exchanges in Japan. Daiwa SB Investments (U.S.A.) Ltd. is the Fund's Investment Manager. Daiwa SB Investments Ltd. is the Fund's Investment Adviser. The Fund implements an "active" portfolio management policy, which is an approach that involves quantitative valuation of securities to identify an appropriate universe of securities from which to select investments, with judgmental analysis then applied to this universe to determine the actual investments to be made by the Fund.

SHAREHOLDER INFORMATION

The Fund's shares are listed on the New York Stock Exchange ("NYSE"). The Fund understands that its shares may trade periodically on certain exchanges other than the NYSE, but the Fund has not listed its shares on those other exchanges and does not encourage trading on those exchanges.

The Fund's NYSE trading symbol is "JEQ". Weekly comparative net asset value ("NAV") and market price information about the Fund is published each Monday in THE WALL STREET JOURNAL, each Sunday in THE NEW YORK TIMES, and each Saturday in BARRON'S, and also appears in many other newspapers. The Fund's weekly NAV is also available by visiting [www.daiwast.com](http://www.daiwast.com) or calling (800) 933-3440 or (201) 915-3020. Also, the Fund's website includes a monthly market review and a list of the Fund's top ten industries and holdings.

INQUIRIES

Inquiries concerning your share account should be directed to PFPC Inc. (the "Plan Agent") at the number noted below. All written inquiries should be directed to the Fund, c/o Daiwa Securities Trust Company, One Evertrust Plaza, 9th Floor, Jersey City, New Jersey 07302-3051.

DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN

A Dividend Reinvestment and Cash Purchase Plan (the "Plan") is available to provide Shareholders with automatic reinvestment of dividends and capital gain distributions in additional Fund shares. The Plan also allows you to make optional annual cash investments in Fund shares through the Plan Agent. A brochure fully describing the Plan's terms and conditions is available from the Plan Agent by calling (800) 331-1710 or by writing The Japan Equity Fund, Inc., c/o PFPC Inc. P.O. Box 43027, Providence, RI 02940-3027.

THE JAPAN EQUITY FUND, INC.

-----  
A brief summary of the material aspects of the Plan follows:

## Edgar Filing: JAPAN EQUITY FUND INC - Form N-30D

WHO CAN PARTICIPATE IN THE PLAN? If you wish to participate and your shares are held in your name, you may elect to become a direct participant in the Plan by completing and mailing the Enrollment Authorization form on the back cover of the Dividend Reinvestment and Cash Purchase Plan Brochure available from the Plan Agent. However, if your shares are held in the name of a brokerage firm, bank or nominee, you should instruct your nominee to participate in the Plan on your behalf. If your nominee is unable to participate in the Plan for you, you should request that your shares be registered in your name, so that you may elect to participate directly in the Plan.

MAY I WITHDRAW FROM THE PLAN? If your shares are held in your name and you wish to receive all dividends and capital gain distributions in cash rather than in shares, you may withdraw from the Plan without penalty at any time by contacting the Plan Agent. If your shares are held in nominee name, you should be able to withdraw from the Plan without a penalty at any time by sending written notice to your nominee. If you withdraw, you or your nominee will receive a share certificate for all full shares or, if you wish, the Plan Agent will sell your shares and send you the proceeds, after the deduction of brokerage commissions. The Plan Agent will convert any fractional shares to cash at the then-current market price and send to you a check for the proceeds.

HOW ARE THE DIVIDENDS AND DISTRIBUTIONS REINVESTED? If the market price of the Fund's shares on the payment date should equal or exceed their net asset value per share, the Fund will issue new shares to you at the higher of net asset value or 95% of the then-current market price. If the market price is lower than net asset value per share, the Fund will issue new shares to you at the market price. If the dividends or distributions are declared and payable as cash only, you will receive shares purchased for you by the Plan Agent on the NYSE or otherwise on the open market to the extent available.

WHAT IS THE CASH PURCHASE FEATURE? The Plan participants have the option of making annual investments in Fund shares through the Plan Agent. You may invest any amount from \$100 to \$3,000 annually. The Plan Agent will purchase shares for you on the NYSE or otherwise on the open market on or about February 15th of each year. Plan participants should send voluntary cash payments to be received by the Plan Agent approximately ten days before the annual purchase date. The Plan Agent will return any cash payments received more than thirty days prior to the purchase date. You may withdraw a voluntary cash payment by written notice, if the notice is received by the Plan Agent not less than two business days before the purchase date.

IS THERE A COST TO PARTICIPATE? There are no Plan charges or brokerage charges for shares issued directly by the Fund. However, each participant will pay a pro rata portion of brokerage commissions for shares purchased on the NYSE or on the open market by the Plan Agent.

WHAT ARE THE TAX IMPLICATIONS? The automatic reinvestment of dividends and distributions does not relieve you of any income tax which may be payable (or required to be withheld) on such dividends and distributions. In addition, the Plan Agent will reinvest dividends for foreign participants and for any participant subject to federal backup withholding after the deduction of the amounts required to be withheld.

PLEASE NOTE THAT, IF YOU PARTICIPATE IN THE PLAN THROUGH A BROKERAGE ACCOUNT, YOU MAY NOT BE ABLE TO CONTINUE AS A PARTICIPANT IF YOU TRANSFER THOSE SHARES TO ANOTHER BROKER. CONTACT YOUR BROKER OR NOMINEE OR THE PLAN AGENT TO ASCERTAIN WHAT IS THE BEST ARRANGEMENT FOR YOU TO PARTICIPATE IN THE PLAN.

---

December 4, 2002

DEAR SHAREHOLDERS:

It is our pleasure on behalf of the Board of Directors to present the Annual Report for The Japan Equity Fund, Inc. (the "Fund") for the fiscal year ended October 31, 2002.

### BACKGROUND

The objective of the Fund is to outperform over the long-term, on a total return basis (including appreciation and dividends), the Tokyo Stock Price Index ("TOPIX"). With this investment objective, the Fund is permitted to invest in companies in the financial services sector of the TOPIX. Stock selection in Japan is facilitated by the use of a value screen applied to all stocks listed on the First and Second Sections of the Tokyo Stock Exchange ("TSE"), the over-the-counter market in Japan and listed on other stock exchanges in Japan. The way in which the Fund seeks to meet its objective is to identify under-valued stocks by examining certain fundamental characteristics of stocks which are listed on the exchanges listed above. These fundamental characteristics include, among others, the earnings-to-price ratio and the book-to-price ratio. This method of stock selection results in a master list of 300 stocks (from a universe of 3,300 stocks) from which stocks are selected for the Fund in accordance with predetermined sector and size parameters.

### PERFORMANCE OF THE JAPANESE STOCK MARKET

Over the period from November 2001 to October 2002, the TOPIX first section declined by -18.61%. The stock market movement was characterized by the combination of a strong rebound from the middle of February and a continuous decline from June. The main points in reviewing the market during the months were as follows:

- November 01: The Tokyo stock market showed mixed movements in November 2001. Shares of exporters, especially semiconductor-related and large electronics makers were favored, as investors welcomed the following factors: (1) the U.S. and other foreign stock markets showed strong movement supported by optimism about the U.S. economy; and (2) the Yen's exchange rate declined against the U.S. Dollar. On the other hand, bank shares plunged amid increasing concerns over the Japanese financial system, while defensive sectors declined due to profit-taking. As a result, this wiped out the hike in exporter shares.
- December 01: Investors shied away from investments in shares with high credit risks, after Enron Corp. and Aoki Corp. collapsed in early December. On the other hand, exporter shares, especially automobile makers, were favored amid the Yen's decline against the major currencies. However, this failed to even out the effect of the decline in bank shares, trading concern shares and so on. The economic releases tended to indicate that the Japanese economy's deterioration was accelerating. The third quarter Gross Domestic Product ("GDP") figures showed that the economy slid back into recession for the third time in a decade, led by a 1.7% decline in consumer spending. Moreover, the Bank of Japan ("BoJ") Tankan Survey showed that business sentiment sank for the fourth consecutive quarter. The closely watched Diffusion Index for large manufacturers fell 5 points to -38, the lowest since March 1999.
- January 02: The Tokyo stock market plummeted in January 2002, although investor concerns over potential corporate bankruptcies eased off, while the Yen declined against the dollar. Investors shied

## Edgar Filing: JAPAN EQUITY FUND INC - Form N-30D

3

THE JAPAN EQUITY FUND, INC.

---

- away from investments in shares due to the following factors: (1) the supply-demand balance worsened as banks accelerated the unwinding of their cross-held shares--they sold 175 billion Yen in the market; (2) investor expectations for accelerated bad-loan write-offs were sidetracked in the Daiei Inc. restructuring plan unveiled mid-month; and (3) investors have doubted the feasibility of the government's reform plans, after Prime Minister Koizumi dismissed Foreign Minister Makiko Tanaka late in the month. The TOPIX Index recorded a 16-year low at 964.75 on January 30.
- February 02: The market plunged due to mounting investor doubts about the feasibility of the government's reform plans. However, the key indices were lifted in latter February, supported by the following factors: (1) the supply-demand balance improved dramatically mainly due to the short-covering done after the government announced that it would tighten the short-selling regulations; (2) investor confidence that the U.S. economy had already entered into recovery-mode strengthened as favorable economic figures and some upgrades of corporate profit forecasts were released. Also there was the belief that the Japanese economy will be favorably affected by the U.S. economic rebound; and (3) market participants expected that the government would act on their reform plans, ahead of the Japan-U.S. talks. Since the middle of the month, rising discussion about a public funds injection into ailing banks boosted investor expectations for imminent action by the government to help the ailing financial system. This expectation mounted ahead of G7 and the Japan-U.S. high-level meetings and pushed up the market. Moreover, the supply-demand balance improved dramatically, especially later in the month. The Financial Service Agency ("FSA") tightened up on the short-selling regulations. It announced the introduction of the so-called "up-tick rules" effective on March 6, which prohibits short selling at a lower than current price. This announcement made short-sellers buy back shares to close their short-positions, while the FSA watched transactions more closely.
  - March 02: The stock market gained early in March 2002 due to the following factors: (1) the U.S. stock markets showed strong movement supported by mounting optimism about the economic recovery; (2) the supply-demand balance remained tight partly due to the continual buybacks by foreign investors; and (3) there were growing signs that manufacturers, especially electric component makers, would finish inventory adjustments. On March 11, the TOPIX rose to a seven month high of 1,125.43. The supply-demand balance remained tight after a number of brokerages recommended upgrading exposure to the Japanese market in the global equity allocation. This prompted foreign investors to buy back Japanese shares to adjust their under-weight positions. They bought 771 billion Yen in the first week of the month. However, after the Government Pension Benefit Fund ("GPBF") announced its investment plans for fiscal year 2002 ("FY2002"), where it would invest 1.7 trillion Yen into the domestic stock market, investor optimism about the supply-demand balance decreased since there were expectations that the amount would be 2-4 trillion Yen.
  - April 02: The stock market showed a strong movement, although the U.S. stock market plunged later in the month and the Yen's exchange rate rose against the U.S. Dollar. The following factors supported the market: (1) optimistic corporate profit outlooks for FY2002, especially in the technology sectors, boosted investor expectations for a "V-shaped" recovery of corporate performances; (2) international demand for Japanese shares kept supply-demand tight, as foreign investors turned more favorably to the prospect of a Japanese economic recovery. Meanwhile,

## Edgar Filing: JAPAN EQUITY FUND INC - Form N-30D

their

4

THE JAPAN EQUITY FUND, INC.

---

- excessive expectations for the U.S. economic recovery were adjusted downward; and (3) expectations for a recovery in commodity prices increased due to the oil price hike and mounting expectations for an economic recovery.
- May 02: The Tokyo stock market maintained strong movement for two consecutive months, although exporters declined as the U.S. stock market plunged and the Yen's exchange rate rose sharply against the U.S. Dollar. On the other hand, domestic-demand-related shares were favored, while investors' expectations increased for Japan's economic recovery ahead of the release of the first quarter GDP figures. In addition, the following factors supported the market: (1) foreign investors sought after Japanese shares continually, as expectations for a Japanese economic recovery percolated through, while some disappointment to the U.S. economic releases were seen; (2) many companies announced buy-back plans for the FY2002. Investors expected this move would absorb the selling pressure from the banks' unwinding of cross-held shares; and (3) investor concerns about a possible plunge in the market receded, while The TOPIX Banks sub-index rebounded drastically, partly due to a number of positive recommendations from brokerages.
  - June 02: The Tokyo stock market fell by 8.5%, although a sustained economic recovery was under way. The following factors pushed the market down: (1) U.S. stock market fell; (2) Yen's exchange rate rose sharply against the dollar; and (3) foreign investors turned net sellers of Japanese shares for the first time in ten weeks. Investor confidence in the domestic economic recovery was boosted, as the government declared that the economy already hit a bottom. On June 28, the Economic Planning Agency reported that industrial production rose by 3.9% in May from a month ago. This strong gain was caused by exporters, like machinery, steel and electric equipment companies. The share prices of these exporters fell, however, pressured by the strong Yen which threatens overseas earnings and makes exports less competitive.
  - July 02: The Tokyo stock market lost ground for the second month in a row, as the Nikkei225 average dropped below 10,000 to a five-month low. The following factors pushed the market down: (1) U.S. stock market fell sharply; (2) concerns over earnings outlook depressed investor sentiment; and (3) foreign investors aggressively sold Japanese shares. The Nikkei225 regained 11,000 in early July, as favorable economic indicators, such as May machinery orders and diffusion indices underpinned the rally. However, the market reversed its direction in the middle of the month, forced by heavy selling of foreign investors who were likely to be obliged by the redemption of U.S. mutual funds.
  - August 02: The Tokyo stock market declined 2.4%. The Nikkei225 regained 10,000 on August 26 on the back of the rally in the U.S. stock market. However, the market declined at the month end because (1) index futures selling and the unwinding of crossheld shares; and (2) concerns over the outlook for the semiconductor industry. Index futures selling, which appeared to be related to the launch of Exchange Traded Funds ("ETF") put a cap on the market. Banks and some insurance companies were assumed to provide their holding stocks to ETFs, for the reduction of their equity exposures. Also, a brokerage was said to have sold index futures in order to hedge its position against the ETFs.

## Edgar Filing: JAPAN EQUITY FUND INC - Form N-30D

- September 02: The TOPIX closed 2.2% lower at 921.05, while the Nikkei225 declined 2.5% to 9,383.29. A sharp fall of the U.S. stock market and an increasing possibility in the downgrade of

5

THE JAPAN EQUITY FUND, INC.

---

economic and earnings forecast dampened the market. On the other hand, a weaker Yen and the expectation for government measures supported investor sentiment. On September 18, the BoJ's announcement that it would buy shares held by other major banks boosted investor sentiment. However, the sentiment cooled down almost immediately, due to the lack of the swift follow-up action by the government. Foreign investors remained major sellers throughout the month and banks accelerated the pace of unwinding crossheld shares to some extent. However, the selling pressure was mostly offset by the huge buying rumored to be done by the public pension fund. Corporate share buybacks were also visible.

- October 02: The Nikkei225 declined by 7.9% to 8,397.03, while the TOPIX closed 6.4% lower at 862.24. Early in the month, the market fell sharply because of growing concerns over the deflation pressure as a result of heightened prospects for the accelerated disposal of bad loans as well as on-going foreign investor selling. After the post-bubble-low was touched on October 10, the market stopped falling as U.S. stocks rebounded. However, the market's upside was limited due to the controversy over the government package that was released at the end of the month. The anti-deflation package announced on October 30 did not offer any surprises while "Takenaka's Bad-loan plan" was not as draconic as originally planned. Though there was nothing to stimulate the market sentiment in this announcement, the market did not show much negative reaction because it was already discounted by share prices. Interim results were generally better than expected. However, they failed to send the market upward, since major electronics companies, the mainstay of the market, downgraded their earnings forecasts for the second half.

### FUND PERFORMANCE

As of October 31, 2002, the Fund's net assets were approximately \$49.1 million, which represents a net asset value of \$4.54 per share. The return on the Fund's net assets was -18.78% since the Fund's fiscal year ended on October 31, 2001. Over the same period, the Benchmark TOPIX return was -19.17%, as measured in U.S. Dollars.

The change in net asset value in U.S. Dollars depends on several factors such as: (1) the percentage change in the Benchmark during the period; (2) the over- or under- performance of the Fund's portfolio, after expenses, relative to the Benchmark; and (3) the change in the Japanese Yen/U.S. Dollar exchange rate.

Our investment strategy is to invest in undervalued securities based on intensive bottom-up analysis supported by quantitative screening. In our research efforts, we place a priority on evaluation of the top management, and its commitment to enhance shareholders' value through clear-cut strategies, including restructuring, that will be eventually reflected in share prices. We add value primarily through a bottom-up stock selection approach for the fundamental Japan equity product.

It is important to emphasize again that it has not been an objective of the Fund to predict changes in its Benchmark. Rather, its goal is to outperform the Benchmark, while staying fairly fully invested. Specifically, the goal is to hold no more than 5% in cash. On October 31, 2002, the proportion of the Fund's net assets invested in Japanese equities listed on the First Section of the TSE

## Edgar Filing: JAPAN EQUITY FUND INC - Form N-30D

was 97.76%, while short-term investments and other net assets represented 2.24%.

6

THE JAPAN EQUITY FUND, INC.  
-----

The invested position of the Fund's assets consisted of common stocks of companies operating in 26 different industries. The Fund had relatively large weightings in Electric Appliances (19.86% of net assets), Transportation Equipment (10.48%), Pharmaceuticals (6.85%) and Chemicals (6.14%).

During the fiscal year ended October 31, 2002, the Fund's market price on the New York Stock Exchange ("NYSE") ranged from a low of \$3.88 per share on October 9, 2002 to a high of \$6.99 on May 28, 2002. The Fund's NYSE market price closed at \$4.15 per share on October 31, 2002.

The NYSE trading price in relation to the Fund's net asset value per share, as measured by the weekly closing prices during the fiscal year ended October 31, 2002 ranged from a discount of 15.71% on December 20, 2001 to a premium of 14.29% on May 23, 2002, and ended the period at a discount of 8.59%.

The Fund has not invested in derivative securities. Although foreign currency hedging is permitted by the Fund's prospectus, the Fund has not engaged in any foreign currency hedging.

### PORTFOLIO MANAGEMENT

Mr. Koichi Ogawa, CFA, is the Executive Director and Chief Portfolio Manager of Daiwa SB Investments Ltd. ("DSBI") for all North American clients. A senior member of the Investment Policy Committee (IPC), Mr. Ogawa possesses 28 years of investment experience and has been responsible for Japan stock selection since 1984. He spent nine years with Daiwa Securities as an institutional research analyst and three years in New York analyzing U.S. securities. He graduated from Tohoku University with a B.A. in Law in 1972.

Mr. Kazuhiko Hosaka, CMA, is a Senior Portfolio Manager, with a total of 14 years of experience in the Japanese equity market. He joined Daiwa in 1990 as a portfolio manager after spending two years as a securities analyst at Barclays Securities Group. He has been directly responsible for managing Japanese equity portfolios for several North American and European pension clients. He graduated from Aoyama Gakuin University with a B.A. in Law in 1988.

We thank you for your support of The Japan Equity Fund, Inc. and your continued interest in the Japanese economy and marketplace.

Sincerely,

/s/ Hiroshi Kimura  
HIROSHI KIMURA  
CHAIRMAN OF THE BOARD

/s/ Shunsuke Ichijo  
SHUNSUKE ICHIJO  
PRESIDENT

THE JAPAN EQUITY FUND, INC.

NOTES TO FINANCIAL STATEMENTS

ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

The Japan Equity Fund, Inc. (the "Fund") was incorporated in Maryland on July 12, 1990 under its former name "The Japan Emerging Equity Fund, Inc." and commenced operations on July 24, 1992. It is registered with the Securities and Exchange Commission as a closed-end, diversified management investment company.

The following significant accounting policies are in conformity with generally accepted accounting principles in the United States of America for investment companies. Such policies are consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts and disclosures in the financial statements. Actual reporting results could differ from those estimates.

VALUATION OF INVESTMENTS--Securities which are listed on the Tokyo Stock Exchange or listed on the over-the-counter market in Japan or listed on other exchanges in Japan and for which market quotations are readily available are valued at the last reported sales price available to the Fund at the close of business on the day the securities are being valued or, lacking any such sales,

## Edgar Filing: JAPAN EQUITY FUND INC - Form N-30D

at the last available bid price. In instances where quotations are not readily available or where the price as determined by the above procedures is deemed not to represent fair market value, fair value will be determined in such manner as the Board of Directors (the "Board") may prescribe. Short-term investments having a maturity of 60 days or less are valued at amortized cost, except where the Board determines that such valuation does not represent the fair value of the investment. All other securities and assets are valued at fair value as determined in good faith by, or under the direction of, the Board.

FOREIGN CURRENCY TRANSLATION--The books and records of the Fund are maintained in U.S. dollars as follows: (1) the foreign currency market value of investment securities and other assets and liabilities stated in Japanese yen are translated at the exchange rates prevailing at the end of the period; and (2) purchases, sales, income and expenses are translated at the rate of exchange prevailing on the respective dates of such transactions. The resulting exchange gains and losses are included in the Statement of Operations. The Fund does not isolate the effect of fluctuations in foreign exchange rates from the effect of fluctuations in the market price of securities.

TAX STATUS--The Fund intends to continue to distribute substantially all of its taxable income and to comply with the minimum distribution and other requirements of the Internal Revenue Code applicable to regulated investment companies. Accordingly, no provision for federal income or excise taxes is required.

The Fund is not subject to any Japanese income, capital gains or other taxes except for withholding taxes on certain income, generally imposed at rates of 10% on interest and 15% on dividends, paid to the Fund by Japanese corporations.

INVESTMENT TRANSACTIONS AND INVESTMENT INCOME--Investment transactions are recorded on the trade date (the date upon which the order to buy or sell is executed). Realized and unrealized gains and losses from security and foreign currency transactions are calculated on the identified cost basis. Dividend income and corporate

14

THE JAPAN EQUITY FUND, INC.

-----  
NOTES TO FINANCIAL STATEMENTS (CONTINUED)  
-----

actions are recorded generally on the ex-date, except for certain dividends and corporate actions from Japanese securities which may be recorded after the ex-date, as soon as the Fund acquires information regarding such dividends or corporate actions. Interest income is recorded on an accrual basis.

DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS--The Fund records dividends and distributions payable to its shareholders on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles. These book basis/tax basis differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require reclassifications. Dividends and distributions which exceed net investment income and net realized capital gains for tax purposes are reported as distributions of paid-in-capital.

INVESTMENT MANAGER AND INVESTMENT ADVISER

The Fund has an Investment Management Agreement with Daiwa SB Investments (U.S.A.) Ltd. (the "Manager"). Daiwa SB Investments Ltd. ("DSBI" or the

## Edgar Filing: JAPAN EQUITY FUND INC - Form N-30D

"Adviser"), an affiliate of the Manager, acts as the Fund's investment adviser pursuant to an Investment Advisory Agreement between the Manager and DSBI. For such investment services, the Fund is obligated to pay the Manager a monthly fee at an annual rate of 0.60% of the first \$20 million, 0.40% of the next \$30 million and 0.20% of the excess over \$50 million of the Fund's average weekly net assets, of which fee 60% is paid by the Manager to DSBI.

Brokerage commissions of \$18,721 were paid by the Fund to Daiwa Securities America, Inc., an affiliate of both the Manager and DSBI, in connection with portfolio transactions during the year ended October 31, 2002. In addition, the Fund has agreed to reimburse the Manager and the Adviser for all out-of-pocket expenses related to the Fund. During the year ended October 31, 2002, expenses of \$4,810 were paid to the Adviser, representing reimbursement to the Adviser of costs relating to the attendance by its employees at meetings of the Fund's Board.

At October 31, 2002, the Fund owed \$20,012 to the Manager and the Manager informed the Fund that it owed the Adviser \$12,007.

### ADMINISTRATOR AND CUSTODIAN AND OTHER RELATED PARTIES

Daiwa Securities Trust Company ("DSTC") an affiliate of the Adviser, provides certain administrative services to the Fund, for which the Fund pays to DSTC a monthly fee at an annual rate of 0.20% of the first \$60 million of the Fund's average weekly net assets, 0.15% of the next \$40 million and 0.10% of the excess over \$100 million, with a minimum annual fee of \$120,000. In addition, as permitted by the Administration Agreement, the Fund reimburses the Administrator for its out-of-pocket expenses related to the Fund. During the year ended October 31, 2002, expenses of \$7,849 were paid to the Administrator, representing reimbursement to the Administrator of costs relating to the attendance by its employees at meetings of the Fund's Board.

15

THE JAPAN EQUITY FUND, INC.

-----  
NOTES TO FINANCIAL STATEMENTS (CONCLUDED)  
-----

DSTC also acts as custodian for the Fund's assets and has appointed Sumitomo Mitsui Banking Corporation, formerly The Sumitomo Bank, Limited (the "Sub-Custodian"), an affiliate of the Manager, to act as the sub-custodian for all of the cash and securities of the Fund held in Japan. As compensation for its services as custodian, DSTC receives a monthly fee and reimbursement of out-of-pocket expenses. Such expenses include fees and out-of-pocket expenses of the Sub-Custodian. During the year ended October 31, 2002, DSTC and the Sub-Custodian earned \$31,698 and \$45,875, respectively, as compensation for custodial service to the Fund.

At October 31, 2002, the Fund owed \$10,000 and \$2,219 to DSTC for administration and custodian fees, respectively, excluding fees and expenses of \$3,266 payable to the Sub-Custodian.

During the year ended October 31, 2002, the Fund paid or accrued \$68,203 for legal services in connection with the Fund's on-going operations to a law firm of which the Fund's Assistant Secretary is a partner.

### INVESTMENTS IN SECURITIES AND FEDERAL INCOME TAX MATTERS

For federal income tax purposes, the cost of securities owned at October 31, 2002 was substantially the same as the cost of securities for financial statement purposes. At October 31, 2002, the net unrealized depreciation of

## Edgar Filing: JAPAN EQUITY FUND INC - Form N-30D

investments for federal income tax purposes, excluding short-term securities, of \$15,374,108 was composed of gross appreciation of \$185,752 for those investments having an excess of value over cost, and gross depreciation of \$15,559,860 for those investments having an excess of cost over value. For the year ended October 31, 2002, total aggregate purchases and sales of portfolio securities, excluding short-term securities, were \$45,252,412 and \$42,958,104, respectively.

In order to present accumulated net investment loss and accumulated net realized loss on investments on the Statement of Assets and Liabilities that more closely represent their tax character, certain adjustments have been made to paid-in capital in excess of par value, accumulated net investment loss and accumulated net realized loss on investments.

For the year ended October 31, 2002, the adjustments were to decrease accumulated net investment loss by \$421,926, decrease accumulated net realized loss on investments by \$81,954 and decrease paid-in-capital in excess of par by \$503,880, primarily relating to the Fund's net operating loss for the year ended October 31, 2002 and the reclassification of realized foreign currency losses. Net investment income, net realized losses and net assets were not affected by this change.

At October 31, 2002, the Fund had a remaining capital loss carryover of \$42,874,512, of which \$6,264,639 expires in the year 2005, \$16,909,841 expires in the year 2006, \$6,225,150 expires in the year 2009 and \$13,474,882 expires in the year 2010 available to offset future net capital gains.

As of October 31, 2002, the Fund had no distributable earnings.

### CAPITAL STOCK

There are 30,000,000 shares of \$.01 par value common stock authorized. Of the 10,815,688 shares of the Fund outstanding at October 31, 2002, Daiwa Securities America Inc. an affiliate of the Manager, Adviser and DSTC owned 14,532 shares.

THE JAPAN EQUITY FUND, INC.

-----  
 REPORT OF INDEPENDENT ACCOUNTANTS  
 -----

To The Shareholders and  
 Board of Directors of  
 The Japan Equity Fund, Inc.

In our opinion, the accompanying statement of assets and liabilities, including the portfolio of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of The Japan Equity Fund, Inc. (the "Fund") at October 31, 2002, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at October 31, 2002 by correspondence with the custodian, provide a reasonable basis for our opinion.
