CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act, that involve substantial risks and uncertainties. In addition, we, or our executive officers on our behalf, may from time to time make forward-looking statements in reports and other documents we file with the Securities and Exchange Commission, or SEC, or in connection with oral statements made to the press, potential investors or others. All statements, other than statements of historical facts, including statements regarding our strategy, future operations, future financial position, future revenues, projected costs, prospects, plans and objectives of management are forward-looking statements. The words "expect," "estimate," "anticipate," "predict," "believe," "think," "plan," "will," "should," "intend," "seek," "potential" and similar expressions and variations are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words.

Forward-looking statements in this report are subject to a number of known and unknown risks and uncertainties that could cause our actual results, performance or achievements to differ materially from those described in the forward-looking statements, including, but not limited to, the risks and uncertainties described in the section entitled "Risk Factors" in our Annual Report on Form 10-K filed with the SEC on February 18, 2011, in this report as well as in the other documents we file with the SEC from time to time, and such risks and uncertainties are specifically incorporated herein by reference.

Forward-looking statements speak only as of the date the statements are made. Except as required under the federal securities laws and rules and regulations of the SEC, we undertake no obligation to update or revise forward-looking statements to reflect actual results, changes in assumptions or changes in other factors affecting forward-looking information. We caution you not to unduly rely on the forward-looking statements when evaluating the information presented in this report.

PART I FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

The consolidated financial statements of TAL International Group, Inc. ("TAL" or the "Company") as of June 30, 2011 and December 31, 2010 and for the three and six months ended June 30, 2011 and June 30, 2010 included herein have been prepared by the Company, without audit, pursuant to U.S. generally accepted accounting principles and the rules and regulations of the SEC. In addition, certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. These financial statements reflect, in the opinion of management, all adjustments (consisting only of normal recurring adjustments) necessary to present fairly the results for the interim periods. The results of operations for such interim periods are not necessarily indicative of the results for the full year. These financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in the Company's Annual Report on Form 10-K filed with the SEC, on February 18, 2011, from which the accompanying December 31, 2010 Balance Sheet information was derived, and all of our other filings filed with the SEC from October 11, 2005 through the current date pursuant to the Exchange Act.

Table of Contents

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Description of the Business, Basis of Presentation, Recently Issued Accounting Pronouncements

A. Description of the Business

TAL International Group, Inc. ("TAL" or the "Company") leases intermodal transportation equipment, primarily maritime containers, and provides maritime container management services, through a worldwide network of offices, third party depots and other facilities. The Company operates in both international and domestic markets. The majority of the Company's business is derived from leasing its containers to shipping line customers through a variety of long-term and short-term contractual lease arrangements. The Company also sells its own containers and containers purchased from third parties for resale. TAL also enters into management agreements with third party container owners under which the Company manages the leasing and selling of containers on behalf of the third party owners.

B. Basis of Presentation

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the reported amounts of revenues and expenses during the reporting period and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany transactions and balances have been eliminated in consolidation.

Effective October 1, 2010, the Company increased the residual value estimates used in its equipment depreciation policy. The impact of the change in residual value estimates resulted in a decrease of depreciation expense of approximately $5.4 million ($3.5 million after tax or $0.11 per fully diluted share) in the second quarter of 2011 and approximately $10.8 million ($7.0 million after tax or $0.22 per fully diluted share) in the six months ended June 30, 2011.

C. Recently Issued Accounting Pronouncements

In July 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2010-20 ("ASU 2010-20"), *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*. The Company adopted the provisions of ASU 2010-20 effective December 31, 2010, and ASU 2010-20 did not impact the Company's consolidated financial results but did increase disclosure. Refer to Note 5 for more information.

In May 2011, the FASB issued Accounting Standards Update No. 2011-04 ("ASU 2011-04"), *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*. This update provides guidance that is expected to result in common fair value measurement and disclosure requirements between U.S. GAAP and IFRS, and changes the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. This update is not intended to result in a change in the application of the requirements in Topic 820. The amendments in this update include those that clarify the FASB's intent about the application of existing fair value measurement requirements and those that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The amendments in this update are effective for interim and annual periods beginning after December 15, 2011, and are to be applied prospectively. The Company does not expect the adoption of ASU 2011-04 to have a material effect on its consolidated financial results.

Table of Contents

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 1 Description of the Business, Basis of Presentation, Recently Issued Accounting Pronouncements (Continued)

In June 2011, the FASB issued Accounting Standards Update No. 2011-05 ("ASU 2011-05"), *Comprehensive Income (Topic 220)*. This update requires presentation of the components of net income, other comprehensive income and total comprehensive income in a single continuous statement or in two separate but consecutive statements. The presentation required by ASU 2011-05 is effective for interim and annual periods beginning after December 15, 2011. The Company does not expect the adoption of ASU 2011-05 to impact its consolidated financial results as it is presentation-only in nature.

Note 2 Fair Value of Financial Instruments

The Company believes the carrying amounts of cash and cash equivalents, accounts receivable, net investment in finance leases and other assets approximated fair value at June 30, 2011.

The Company estimates that at June 30, 2011, the carrying value of the Company's debt instruments was approximately $8.6 million lower than its fair value. The Company estimated the fair value of its debt instruments based on the net present value of its future debt payments, using a discount rate which reflects the Company's estimate of current market interest rates as of June 30, 2011.

Note 3 Dividends

The Company paid the following quarterly dividends during the six months ended June 30, 2011 and 2010 on its issued and outstanding common stock:

Record Date	Payment Date	Aggregate Payment	Per Share Payment
June 2, 2011	June 23, 2011	$ 16.5 million	$ 0.50
March 3, 2011	March 24, 2011	$ 13.8 million	$ 0.45
June 3, 2010	June 24, 2010	$ 9.1 million	$ 0.30
March 11, 2010	March 25, 2010	$ 7.6 million	$ 0.25

Note 4 Stock-Based Compensation Plans

The Company records compensation cost relating to stock-based payment transactions in accordance with FASB Accounting Standards Codification No. 718 (ASC 718) *Compensation Stock Compensation*. The cost is measured at the grant date, based on the calculated fair value of the award, and is recognized as an expense over the employee's requisite service period (generally the vesting period of the equity award).

The following compensation costs were reported in administrative expenses in the Company's statements of operations related to the Company's stock-based compensation plans as a result of stock

Table of Contents

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 4 Stock-Based Compensation Plans (Continued)

options granted in 2006 and restricted shares granted during the years 2009, 2010 and 2011 (dollars in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Stock options	$	$ 7	$	$ 12
Restricted stock	544	393	1,194	788
Total	$ 544	$ 400	$ 1,194	$ 800

Total unrecognized compensation cost of approximately $4.2 million as of June 30, 2011 related to 314,250 restricted shares granted during 2009, 2010 and 2011 will be recognized over the remaining weighted average vesting period of approximately 1.6 years.

During the three and six months ended June 30, 2011, the Company issued 23,555 and 63,907 shares of common stock due to stock option exercises, respectively.

Note 5 Net Investment in Finance Leases

The following table represents the components of the net investment in finance leases (in thousands):

	June 30, 2011	December 31, 2010
Gross finance lease receivables	$ 211,926	$ 223,611
Allowance on gross finance lease receivables(1)	(1,201)	(1,169)
Gross finance lease receivables, net of allowance	210,725	222,442
Unearned income	(46,970)	(51,025)
Net investment in finance leases	$ 163,755	$ 171,417

(1) The Company evaluates potential losses in its finance lease portfolio by regularly reviewing the specific receivables in the portfolio and analyzing historical loss experience. For the period 2004 through the second quarter of 2011, the Company's loss experience on its gross finance lease receivables, after considering equipment recoveries, was less than 1%. Net investment in finance lease receivables is generally charged off after an analysis is completed which indicates that collection of the full balance is remote.

In order to estimate its allowance for losses contained in the gross finance lease receivables, the Company categorizes the credit worthiness of the receivables in the portfolio based on internal customer credit ratings, which are reviewed and updated, as appropriate, on an ongoing basis. The internal customer credit ratings are developed based on a review of the financial performance and condition, operating environment, geographical location and trade routes of our customers.

Table of Contents

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 5 Net Investment in Finance Leases (Continued)

The categories of gross finance lease receivables based on the Company's internal customer credit ratings can be described as follows:

Tier 1 These customers are typically large international shipping lines who have been in business for many years and have world class operating capabilities and significant financial resources. In most cases, the Company has had a long commercial relationship with these customers and currently maintains regular communication with them at several levels of management which provides TAL with insight into the customer's current operating and financial performance. In the Company's view, these customers have the greatest ability to withstand cyclical downturns and would likely have greater access to needed capital than lower rated customers. The Company views the risk of default for Tier 1 customers to range from minimal to modest.

Tier 2 These customers are typically either smaller shipping lines with less operating scale or shipping lines with a high degree of financial leverage, and accordingly the Company views these customers as subject to higher volatility in financial performance over the business cycle. The Company generally expects these customers to have less access to capital markets or other sources of financing during cyclical down turns. The Company views the risk of default for Tier 2 customers as moderate.

Tier 3 Customers in this category exhibit volatility in payments on a regular basis, thus they are considered non-performing. The Company has initiated or implemented plans to recover equipment on lease to these customers and believes that default is likely, or has already occurred.

Based on the above categories, the Company's gross finance lease receivables as of June 30, 2011, are as follows (in thousands):

Tier 1	$ 124,658
Tier 2	87,268
Tier 3	
	$ 211,926

The Company considers an account past due when a payment has not been received in accordance with the terms of the related lease agreement. As of June 30, 2011, approximately $0.1 million of the Company's Tier 1 gross finance lease receivables and $0.4 million of the Company's Tier 2 gross finance lease receivables were past due, substantially all of which were aged approximately 31 days. Gross finance lease receivables that were in non-accrual status as of June 30, 2011 were immaterial. The Company recognizes income on gross finance lease receivables in non-accrual status as collections are made.

Table of Contents

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 5 Net Investment in Finance Leases (Continued)

The following table represents the activity of the Company's allowance on gross finance lease receivables for the six months ended June 30, 2011 (in thousands):

	Beginning Balance	Additions/ (Reversals)	(Write-offs) Reversals	Other(a)	Ending Balance
Finance Lease Allowance for doubtful accounts:					
For the six months ended June 30, 2011	$ 1,169	$ 28	$	$ 4	$ 1,201

(a) Primarily relates to the effect of foreign currency translation.

Note 6 Debt

Debt consisted of the following (amounts in thousands):

	June 30, 2011	December 31, 2010
Asset backed securitization term notes (ABS)	$ 1,312,811	$ 984,880
Term loan facilities	452,183	441,133
Asset backed warehouse facility	160,000	122,500
Revolving credit facility	90,000	90,000
Capital lease obligations	120,915	131,819
Total Debt	$ 2,135,909	$ 1,770,332

As of June 30, 2011 we had $940.4 million of debt outstanding on facilities with fixed interest rates and $1,195.5 million of debt outstanding on facilities with interest rates based on floating rate indices (such as LIBOR). We economically hedge the risks associated with fluctuations in interest rates on our floating rate borrowings by entering into interest rate swap contracts that convert our floating rate debt to a fixed rate basis, thus reducing the impact of interest rate changes on future interest expense. As of June 30, 2011, we had interest rate swaps in place with a total notional value of $967.0 million to fix the floating interest rates on a portion of our floating rate debt obligations.

The Company is subject to certain financial covenants under its debt facilities and as of June 30, 2011, was in compliance with all such covenants.

Asset Backed Securitization Term Notes

In January and May 2011, the Company issued $174 million and $235 million of fixed rate secured notes under the Asset Backed Securitization ("ABS") facilities, respectively. The notes, which were rated "A" by Standard & Poor's, were issued at par and have scheduled maturities of January 2021 and May 2021, respectively.

Asset Backed Warehouse Facility

In April 2011, the Company increased the size of its asset backed warehouse facility from $350 million to $400 million.

Table of Contents

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 6 Debt (Continued)

Term Loan Facilities

During the six months ended June 30, 2011, the Company entered into new delayed draw term loan agreements with financial institutions, increasing the aggregate borrowings available under its term loan facilities by $150 million. These facilities mature in 2018. As of June 30, 2011, the Company has borrowed $40 million under one of these facilities.

Note 7 Derivative Instruments

Interest Rate Swaps

The Company has entered into interest rate swap agreements to manage interest rate risk exposure. The interest rate swap agreements utilized by TAL effectively modify the Company's exposure to interest rate risk by converting its floating rate debt to a fixed rate basis, thus reducing the impact of interest rate changes on future interest expense. These agreements involve the receipt of floating rate amounts in exchange for fixed rate interest payments over the lives of the agreements without an exchange of the underlying principal amounts. The counterparties to these agreements are highly rated financial institutions. In the unlikely event that the counterparties fail to meet the terms of the interest rate swap agreements, the Company's exposure is limited to the interest rate differential on the notional amount at each monthly settlement period over the life of the agreements. The Company does not anticipate any non-performance by the counterparties. Substantially all of the assets of certain indirect, wholly owned subsidiaries of the Company have been pledged as collateral for the underlying indebtedness and the amounts payable under the interest rate swap agreements for each of these entities. In addition, certain assets of TAL International Container Corporation, a wholly owned subsidiary of the Company, are pledged as collateral for the Revolving Credit Facility and the amounts payable under certain interest rate swap agreements.

As of June 30, 2011, the Company had in place total interest rate swap contracts to fix the floating interest rates on a portion of the borrowings under its debt facilities as summarized below:

Total Notional Amount at June 30, 2011	Weighted Average Fixed Leg Interest Rate at June 30, 2011	Weighted Average Remaining Term
$967.0 million	3.36%	4.1 years

Most of the Company's interest rate swap contracts have not been accounted for as hedging instruments under FASB Accounting Standards Codification No. 815 (ASC 815) *Derivatives and Hedging*, and changes in the fair value of the interest rate swap contracts are reflected in the statements of operations as net loss on interest rate swaps.

In February 2011, the Company entered into a 10-year forward starting interest rate swap contract with a notional value of $75 million to fix interest rates on future borrowings before the end of May 2011. In connection with the closing of the fixed rate term notes issued in May 2011 under the ABS facilities, the Company terminated this swap contract and paid $2.3 million to its counterparty. Since this swap was designated as a cash flow hedge, the loss recorded in accumulated other comprehensive loss as of the date the contract was terminated will be amortized to interest expense over the original term of the swap contract. There was no material ineffectiveness during the period the hedge was designated.

Table of Contents

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 7 Derivative Instruments (Continued)

As of June 30, 2011, the unamortized pre-tax balance in accumulated other comprehensive loss attributable to interest rate swap contracts that have been terminated and de-designated was approximately $14.6 million, of which $3.1 million is expected to be amortized to interest expense over the next 12 months. Amounts recorded in accumulated other comprehensive loss attributable to the de-designated and terminated interest rate swap contracts would be recognized in earnings immediately in conjunction with a termination of the related debt agreements.

In April 2011, the Company terminated various non-designated interest rate swap contracts with a notional value of $200 million that were set to expire in 2012 and 2013, and replaced them with a $100 million notional value swap with a 2018 expiration date. The Company paid $10.2 million to its swap counterparties to terminate these contracts. Since these swaps were non-designated, the loss has been previously recognized in the Company's statements of operations as net loss on interest rate swaps.

Foreign Currency Rate Swaps

In April 2008, the Company entered into foreign currency rate swap agreements to manage foreign currency rate risk exposure by exchanging Euros for U.S. Dollars based on expected payments under its Euro denominated finance lease receivables. The Company will pay a total of approximately 4.2 million Euros and receive approximately $6.4 million over the remaining term of the foreign currency rate swap agreements, which expire in April 2015. The Company does not account for the foreign currency rate swap agreements as hedging instruments under ASC 815, and therefore changes in the fair value of the foreign currency rate swap agreements are reflected in the statements of operations in administrative expenses.

Fair Value of Derivative Instruments

Under the criteria established by ASC 820, the Company has elected to use the income approach to value its interest rate swap and foreign currency rate swap contracts, using observable Level 2 market expectations at the measurement date and standard valuation techniques to convert future amounts to a single present amount (discounted) assuming that participants are motivated, but not compelled to transact. The Level 2 inputs for the interest rate swap and forward valuations are limited to quoted prices for similar assets or liabilities in active markets (specifically futures contracts and spot currency rates) and inputs other than quoted prices that are observable for the asset or liability (specifically forward currency points, LIBOR cash and swap rates, basis swap adjustments and credit risk at commonly quoted intervals).

Note 8 Earnings Per Share

The following table sets forth the calculation of basic and diluted earnings per share for the three and six months ended June 30, 2011 and 2010 (in thousands, except earnings per share):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Numerator:				
Net income applicable to common stockholders for basic and diluted earnings per share	$ 23,191	$ 4,652	$ 55,778	$ 10,551
Denominator:				
Weighted average shares outstanding for basic earnings per share	32,905	30,434	31,732	30,432
Dilutive stock options	448	290	432	184
Weighted average shares for diluted earnings per share	33,353	30,724	32,164	30,616
Earnings per share:				
Basic	$ 0.70	$ 0.15	$ 1.76	$ 0.35
Diluted	$ 0.70	$ 0.15	$ 1.73	$ 0.34

For the three and six months ended June 30, 2010, 1,500 and 13,000 options to purchase shares of common stock, respectively, were not included in the calculation of weighted average shares for diluted earnings per share because their effects were antidilutive.

Note 9 Segment and Geographic Information

Industry Segment Information

The Company conducts its business activities in one industry, intermodal transportation equipment, and has two segments:

Equipment leasing the Company owns, leases and ultimately disposes of containers and chassis from its lease fleet, as well as manages leasing activities for containers owned by third parties.

Equipment trading the Company purchases containers from shipping line customers, and other sellers of containers, and resells these containers to container traders and users of containers for storage or one-way shipment. Included in the Equipment trading segment revenues are leasing revenues from equipment purchased for resale that is currently on lease until containers are dropped off.

Income before income taxes(1)	48,141	2,897	51,038	20,852	1,362	22,214

(1) Segment income before income taxes excludes net loss on interest rate swaps of $15,139 and $15,002 for the three months ended June 30, 2011 and 2010, respectively.

	Six Months Ended June 30, 2011			Six Months Ended June 30, 2010		
	Equipment Leasing	Equipment Trading	Totals	Equipment Leasing	Equipment Trading	Totals
Total revenues	$ 205,796	$ 38,953	$ 244,749	$ 148,626	$ 18,336	$ 166,962
Equipment trading expenses		29,383	29,383		14,853	14,853
Depreciation and amortization expense	67,265	149	67,414	54,947	306	55,253
Net (gain) on sale of leasing equipment	(24,784)		(24,784)	(11,659)	(44)	(11,703)
Interest and debt expense	48,458	1,023	49,481	33,952	863	34,815
Income before income taxes(2)	85,617	7,859	93,476	36,514	1,913	38,427
Goodwill at June 30	70,898	1,000	71,898	70,898	1,000	71,898
Total assets at June 30	2,933,102	72,926	3,006,028	2,012,119	41,414	2,053,533
Purchases of leasing equipment(3)	558,510	15,644	574,154	257,261	15,778	273,039
Investments in finance leases(3)	2,614		2,614	433		433

(2) Segment income before income taxes excludes net loss on interest rate swaps of $7,132 and $21,786 for the six months ended June 30, 2011 and 2010, respectively.

(3) Represents cash disbursements for purchases of leasing equipment and certain trading equipment purchased for resale, but that will be on lease for a period typically in excess of one year, as reflected in the consolidated statements of cash flows for the period indicated.

Table of Contents

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 9 Segment and Geographic Information (Continued)

There are no intercompany revenues or expenses between segments. Additionally, certain administrative expenses have been allocated between segments based on an estimate of services provided to each segment. A portion of the Company's equipment purchased for resale was purchased through certain sale-leaseback transactions with our shipping line customers. Due to the expected longer term nature of these transactions, these purchases are reflected as leasing equipment as opposed to assets held for sale and the cash flows associated with these transactions are and will be reflected as purchases of leasing equipment and proceeds from the sale of equipment in investing activities.

Geographic Segment Information

The Company earns its revenues from international containers which are deployed by its customers in a wide variety of global trade routes. Substantially all of the Company's leasing related revenue is denominated in U.S. dollars. The following table represents the geographic allocation of revenues for the periods indicated based on the customers' primary domicile and allocates equipment trading revenue based on the location of sale (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Total revenues:				
United States of America	$ 9,505	$ 7,444	$ 19,467	$ 13,940
Asia	46,207	36,020	103,113	66,921
Europe	56,123	38,485	106,568	75,775
Other International	8,386	5,415	15,601	10,326
Total	$ 120,221	$ 87,364	$ 244,749	$ 166,962

As all of the Company's containers are used internationally, where no one container is domiciled in one particular place for a prolonged period of time, substantially all of the Company's long-lived assets are considered to be international.

Note 10 Commitments and Contingencies

Residual Value Guarantees

During 2008, the Company entered into commitments for equipment residual value guarantees in connection with certain finance leases that were sold or brokered to financial institutions. The guarantees represent the Company's commitment that these assets will be worth a specified amount at the end of lease terms (if the lessee does not default on the lease) which expires in 2016. At June 30, 2011, the maximum potential amount of the guarantees under which the Company could be required to perform was approximately $27.1 million. The carrying values of the guarantees of $1.1 million have been deferred and are included in accounts payable and accrued expenses, and approximate fair value as of June 30, 2011. The Company accounts for the residual value guarantees under Accounting Standards Codification 450 (Contingencies) and expects that the market value of the equipment covered by the guarantees will equal or exceed the value of the guarantees. Under the criteria established by ASC 820, the Company has performed fair value measurements of the guarantees using

TAL INTERNATIONAL GROUP, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 10 Commitments and Contingencies (Continued)

Level 2 inputs, which were based on significant other observable inputs other than quoted prices, either on a direct or indirect basis.

Purchase Commitments

At June 30, 2011, commitments for capital expenditures totaled approximately $160.7 million.

Note 11 Income Taxes

The consolidated income tax expense for the three and six months ended June 30, 2011 and 2010 was determined based upon estimates of the Company's consolidated effective income tax rates for the years ending December 31, 2011 and 2010, respectively. The difference between the consolidated effective income tax rate and the U.S. federal statutory rate is primarily attributable to state income taxes, foreign income taxes and the effect of certain permanent differences.

Note 12 Comprehensive Income and Other

The following table provides a reconciliation of the Company's net income to comprehensive income (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Net income	$ 23,191	$ 4,652	$ 55,778	$ 10,551
Other comprehensive income:				
Unrealized loss on derivative instrument designated as a cash flow hedge (net of tax benefit of $554, $1,948, $827 and $1,948, respectively)	(1,013)	(3,516)	(1,513)	(3,516)
Foreign currency translation adjustments	(17)	(323)	60	(679)
Amortization of net loss (gain) on derivative instruments previously designated as cash flow hedges (net of tax expense (benefit) of $(244), $66, $(453) and $134, respectively)	441	(119)	828	(242)
Total	$ 22,602	$ 694	$ 55,153	$ 6,114

The Company recorded approximately nine thousand dollars of unrealized foreign exchange gains and $0.1 million of unrealized foreign currency exchange losses, which are reported in administrative expenses in the Company's statement of operations, for the three months ended June 30, 2011 and 2010, respectively. For the six months ended June 30, 2011 and 2010, the Company recorded $0.1 million of unrealized foreign exchange gains and $0.5 million of unrealized foreign currency exchange losses, respectively. These gains and losses resulted primarily from fluctuations in exchange rates related to the Company's Euro and Pound Sterling transactions and related assets.

Issuance of Common Stock

On April 6, 2011, the Company completed a public offering of 5,500,000 shares of common stock. Of the total shares offered, the Company issued and sold 2,500,000 shares of common stock and certain

Table of Contents

of the Company's stockholders sold an aggregate of 3,000,000 shares of common stock. The Company's proceeds from the offering were $85.5 million.

Note 13 Subsequent Events

Quarterly Dividend

On July 26, 2011 the Company's Board of Directors approved and declared a $0.52 per share quarterly cash dividend on its issued and outstanding common stock, payable on September 22, 2011 to shareholders of record at the close of business on September 1, 2011.

Table of Contents

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the consolidated financial condition and results of operations of TAL International Group, Inc. and its subsidiaries should be read in conjunction with related consolidated financial data and our annual audited consolidated financial statements and related notes thereto included in our Annual Report on Form 10-K filed with the SEC on February 18, 2011. The statements in this discussion regarding industry outlook, our expectations regarding our future performance, liquidity and capital resources and other non-historical statements are subject to numerous risks and uncertainties, including, but not limited to, the risks and uncertainties described under "Risk Factors" and "Forward-Looking Statements" in our Form 10-K. Our actual results may differ materially from those contained in or implied by any forward-looking statements.

Our Company

We are one of the world's largest and oldest lessors of intermodal containers and chassis. Intermodal containers are large, standardized steel boxes used to transport freight by ship, rail or truck. Because of the handling efficiencies they provide, intermodal containers are the primary means by which many goods and materials are shipped internationally. Chassis are used for the transportation of containers domestically.

We operate our business in one industry, intermodal transportation equipment, and have two business segments:

- Equipment leasing we own, lease and ultimately dispose of containers and chassis from our lease fleet, as well as manage containers owned by third parties.
- Equipment trading we purchase containers from shipping line customers, and other sellers of containers, and resell these containers to container traders and users of containers for storage or one-way shipment.

Operations

Our consolidated operations include the acquisition, leasing, re-leasing and subsequent sale of multiple types of intermodal containers and chassis. As of June 30, 2011, our total fleet consisted of 991,807 containers and chassis, including 27,299 containers under management for third parties, representing 1,621,465 twenty-foot equivalent units (TEU). We have an extensive global presence, offering leasing services through 18 offices in 11 countries and approximately 219 third party container depot facilities in 39 countries as of June 30, 2011. Our customers are among the largest shipping lines in the world. For the six months ended June 30, 2011, our twenty largest customers accounted for 79% of our leasing revenues, our five largest customers accounted for 48% of our leasing revenues, and our largest customer accounted for 15% of our leasing revenues.

Table of Contents

The following tables provide the composition of our equipment fleet as of the dates indicated below (in both units and TEU's):

Equipment Fleet in Units

Equipment trading fleet(2)	68,638		68,638	51,748		51,748	54,582		54,582
Total	1,572,269	49,196	1,621,465	1,346,644	50,539	1,397,183	1,193,635	52,123	1,245,758
Percentage	97.0%	3.0%	100.0%	96.4%	3.6%	100.0%	95.8%	4.2%	100.0%

(2) Includes 61,465 TEU on lease under sale-leaseback transactions as of June 30, 2011.

We primarily lease three principal types of equipment: (1) dry freight containers, which are used for general cargo such as manufactured component parts, consumer staples, electronics and apparel, (2) refrigerated containers, which are used for perishable items such as fresh and frozen foods, and (3) special containers, which are used for heavy and oversized cargo such as marble slabs, building products and machinery. We also lease chassis, which are used for the transportation of containers domestically, and tank containers, which are used to transport bulk liquid products such as chemicals. Our in-house equipment sales group manages the sale process for our used containers and chassis from our equipment leasing fleet and buys and sells used and new containers and chassis acquired from third parties.

Table of Contents

As of June 30, 2011, the percentages of our equipment fleet and leasing revenues by equipment type are as follows:

Equipment Type	Percent of total fleet units	Percent of leasing revenue
Dry	84.6%	63.8%
Refrigerated	4.8	22.9
Special	4.9	8.2
Chassis	0.9	2.1
Tank	0.4	2.0
Equipment leasing fleet	95.6	99.0
Equipment trading fleet	4.4	1.0
Total	100.0%	100.0%

We generally lease our equipment on a per diem basis to our customers under three types of leases: long-term leases, finance leases and service leases. Long-term leases, typically with initial contractual terms ranging from three to eight years, provide us with stable cash flow and low transaction costs by requiring customers to maintain specific units on-hire for the duration of the lease. Finance leases, which are typically structured as full payout leases, provide for a predictable recurring revenue stream with the lowest daily cost to the customer because customers are generally required to retain the equipment for the duration of its useful life. Service leases command a premium per diem rate in exchange for providing customers with a greater level of operational flexibility by allowing the pick-up and drop-off of units during the lease term. We also have expired long-term leases whose fixed terms have ended but for which the related units remain on-hire and for which we continue to receive rental payments pursuant to the terms of the initial contract. Some leases have contractual terms that have features reflective of both long-term and service leases and we classify such leases as either long-term or service leases, depending upon which features we believe are more predominant.

The following table provides a summary of our equipment leasing fleet portfolio by lease type, based on total on-hire units as of the dates indicated below:

Lease Portfolio	June 30, 2011	December 31, 2010	June 30, 2010
Long-term leases	67.0%	65.4%	63.5%
Finance leases	7.9	8.8	10.1
Service leases	20.2	18.5	16.1
Expired long-term leases (units on hire)	4.9	7.3	10.3
Total	100.0%	100.0%	100.0%

As of June 30, 2011, our long-term and finance leases had an average remaining contract term of approximately 51 months, assuming no leases are renewed.

Operating Performance

Our profitability is primarily determined by the extent to which our leasing and other revenues exceed our ownership, operating and administrative expenses. Our profitability is also impacted by the gain or loss that we realize on the sale of our used equipment and the net sales margins on our equipment trading activities.

Our leasing revenues are primarily driven by our owned fleet size, utilization and average rental rates. Our leasing revenues also include ancillary fees driven by drop-off volumes. Leasing revenues in

Table of Contents

the second quarter of 2011 increased 7.0% from the first quarter of 2011, and 41.1% from the second quarter of 2010.

Owned fleet size. As of June 30, 2011, our owned fleet included 1,572,269 TEUs, an increase of 16.8% from December 31, 2010 and 31.7% from June 2010. The increase in fleet size over both periods was due to several factors including large purchases of new containers and the completion of several large sale-leaseback transactions.

The investments we have made in our fleet this year have been supported by a favorable supply / demand balance for containers and an increase in the use of leasing by many of our major customers. A severe global shortage of containers developed in 2010 due to a lack of container production in 2009, a rapid recovery in trade volumes in 2010, and practical constraints faced by container manufacturers in ramping-up production to meet the renewed demand for containers. Many of our customers have been concerned that a container shortage might develop again in 2011, and we concluded a large number of lease agreements in the first part of 2011 and ordered a large volume of new containers to supply these lease agreements.

Our investment program in 2011 has been further supported by an increased reliance on leasing by our shipping line customers due to financial challenges they are facing as a result of low freight rates and the need to fund large vessel purchases. Historically, shipping lines have generally purchased 55%-60% of the containers they operate and leased 40-45% from leasing companies like TAL. In 2010 and 2011, leasing companies have purchased the majority of new containers, and we have seen an increased level of customer interest in sale-leaseback transactions, where our customers typically sell a large number of in-service containers to leasing companies and then lease-back the same containers for further use.

As of July 27, 2011, we have invested over $700 million in new container purchases or sale-leaseback transactions. Approximately 75% of this equipment (together with our beginning inventory of factory units as of January 1, 2011) is either on-hire or committed to lease transactions. Pick-up activity for new dry containers committed to leases was slower than expected in the second quarter, which delayed the start of leasing revenue on those units and will likely limit additional new dry container purchases in 2011. However, pick-up activity was fairly strong at the end of the second quarter and early in the third quarter, and the containers we purchased through sale-leaseback transactions during the second quarter were placed on-hire immediately. As a result, we expect the growth in our leasing revenue to accelerate in the third quarter as we see an increase in the contribution from our 2011 investments.

Utilization. Our average utilization was 98.6% during the second quarter of 2011, an increase of 0.3% from the first quarter of 2011 and an increase of 3.2% from the prior year second quarter. Ending utilization increased 0.3% from 98.5% as of March 31, 2011 to 98.8% as of June 30, 2011. Our dry container utilization has remained exceptionally high as shipping lines have generally preferred to retain leased containers on-hire to help them mitigate potential peak-season container shortages, and to allow them to continue to enjoy historical leasing rates that in many cases are well below current market levels.

Utilization and leasing demand for our refrigerated containers remained strong during the second quarter of 2011. The utilization of our refrigerated containers does not heavily influence our overall utilization since they represent only 4.8% of the units in our fleet. However, these container types are significantly more expensive than dry containers, generate higher per diem lease rates and currently represent approximately 22.9% of our leasing revenue. Leasing demand for both special containers and chassis remained steady.

Table of Contents

The following tables set forth our equipment fleet utilization(1) for the periods indicated below:

	Quarter Ended June 30, 2011	Quarter Ended March 31, 2011	Quarter Ended December 31, 2010	Quarter Ended September 30, 2010	Quarter Ended June 30, 2010	Quarter Ended March 31, 2010
Average Utilization	98.6%	98.3%	98.6%	98.1%	95.4%	91.8%

	June 30, 2011	March 31, 2011	December 31, 2010	September 30, 2010	June 30, 2010	March 31, 2010
Ending Utilization	98.8%	98.5%	98.3%	98.5%	97.1%	93.4%

(1) Utilization is computed by dividing our total units on lease by the total units in our fleet excluding new units not yet leased.

Average rental rates. Average lease rates for our dry container product line increased 1.1% from the first quarter of 2011 and increased 22.8% from the prior year's second quarter. New dry container prices have decreased from peak levels reached in the first quarter of this year, but they remain at historically high levels, and market leasing rates remain well above our portfolio average rates. Our average dry container lease rates increased in the second quarter as new containers were picked up on lease and as selected existing leases were re-priced. However, the percentage increase in the second quarter was less than it had been for the last several quarters due to the slower than expected pace of new container pick-ups. We expect our average lease rates to continue to trend upwards throughout the rest of 2011 as more of our new containers committed to leases go on hire.

During the second quarter of 2011, average lease rates for refrigerated containers were generally flat compared to the first quarter of 2011 and 0.9% higher than the second quarter of 2010, while the average lease rates for special containers were 0.6% higher than the first quarter of 2011 and 1.1% higher compared to the second quarter of 2010. The increase in average lease rates for our refrigerated containers was primarily due to the expiration of lease rate concessions that were provided to certain customers in 2009 for lease extension transactions, and partially offset by new units going on-hire at lease rates slightly below our portfolio average. The increase in average lease rates for our special containers was due to new special containers going onto leases with rates higher than our portfolio average.

Equipment disposals. During the second quarter of 2011, we recognized a $16.9 million gain on the sale of our used containers compared to gains of $7.9 million in the first quarter of 2011 and $7.2 million in the second quarter of 2010. Gain on sale increased in the second quarter as compared to the first quarter of 2011 due to higher selling prices and higher selling volumes. While selling volumes increased over the first quarter of 2011, they remained historically low due to constraints on the supply of sale age containers. Average selling prices for dry containers during the second quarter climbed 14.3% above the first quarter level in 2011 and over 100% above the second quarter level in 2010. Selling prices for used dry containers have climbed to record levels this year as the ongoing tight supply / demand situation continues to limit the number of older containers being made available for disposal.

For the six months ended June 30, 2011 we sold approximately 27,094 TEU's of our owned containers, or 2.1% of our owned equipment fleet as of the beginning of the year. This annual disposal rate of 4.2% is below the 6%-8% annual long term average disposal rate we expect given the 12-14 year expected useful life of our containers. Our inventory of disposal containers began the year at a low level and container drop-off volumes in 2011 have been exceptionally low.

Equipment ownership expenses. Our ownership expenses, which consist principally of depreciation and interest expense, increased by $4.9 million or 8.8% in the second quarter of 2011 compared to the first quarter of 2011 and increased by $14.9 million or 32.2% compared to the second quarter of 2010.

Table of Contents

TAL purchased a large volume of new containers during 2010 and the first half of 2011, and as a result, the average net book value of our revenue earning assets increased by 10.7% compared to the first quarter of 2011 and 49.7% compared to the second quarter 2010. Depreciation expense increased $2.9 million or 9.0% during the second quarter of 2011 compared to the first quarter and increased $6.9 million or 24.4% compared to the second quarter 2010, though the change from the second quarter of 2010 would have been $12.3 million or 43.5% without the change in residual value estimates that was made effective October 1, 2010.

Interest expense increased $2.0 million or 8.4% in the second quarter of 2011 compared to the first quarter and increased $8.0 million or 44.9% compared to the second quarter of 2010. The increase from both periods was due to an increase in our average outstanding debt, partially offset by a decrease in our average effective interest rate.

Credit performance. Our credit performance remained strong during the first six months of 2011, and we recorded a provision for doubtful accounts of $0.1 million. However, we are concerned that credit risk may be increasing again after strong profitability for our customers in 2010. Freight rates on the major east-west trade lanes have been pressured in 2011 by reduced vessel utilization due to the re-introduction of ships that had been laid up in 2009 and 2010. Higher fuel prices have combined with the drop in freight rates to squeeze the profitability of our customers, and many of our customers reported losses in the first part of this year. Vessel over-capacity is generally expected to continue to pressure freight rates for several years due to the large number of new orders being placed for very large container ships as shipping lines strive to achieve cost efficiencies. As a result, we expect the potential for credit losses to remain historically high for the next several years and we will continue to be vigilant with our credit and collection processes.

Operating expenses. Our direct operating expenses were $4.4 million during the second quarter of 2011, compared to $4.1 million in the first quarter of 2011 and $6.6 million during the second quarter of 2010. Our direct operating expenses increased slightly during the second quarter of 2011 compared to the first quarter of 2011 due to higher repair costs due to a higher volume of redeliveries. Our direct operating expenses decreased during the second quarter of 2011 compared to the second quarter of 2010 due to lower repair and storage costs due to fewer idle containers. Our administrative expenses stayed relatively flat at $10.6 million compared to the first quarter of 2011 and second quarter of 2010.

Dividends

We paid the following quarterly dividends during the six months ended June 30, 2011 and 2010 on our issued and outstanding common stock:

Record Date	Payment Date	Aggregate Payment	Per Share Payment
June 2, 2011	June 23, 2011	$ 16.5 million	$ 0.50
March 3, 2011	March 24, 2011	$ 13.8 million	$ 0.45
June 3, 2010	June 24, 2010	$ 9.1 million	$ 0.30
March 11, 2010	March 25, 2010	$ 7.6 million	$ 0.25

While most of our dividends have historically been treated as a non-taxable return of capital, based on our current estimates we believe that a portion of TAL's dividends paid in 2011 will be taxable to TAL shareholders with the balance treated as a return of capital. The taxability of the dividends to TAL shareholders does not impact TAL's corporate tax position. Investors should consult with a tax advisor to determine the proper tax treatment of these distributions.

Table of Contents

Results of Operations

The following table summarizes our results of operations for the three and six months ended June 30, 2011 and 2010 in thousands of dollars and as a percentage of total revenues:

	Three Months Ended June 30,				Six Months Ended June 30,			
	2011		2010		2011		2010	
	Dollars	Percent	Dollars	Percent	Dollars	Percent	Dollars	Percent
Leasing revenues	$ 106,518	88.6%	$ 75,495	86.4%	$ 206,088	84.2%	$ 148,358	88.9%

Comparison of Three Months Ended June 30, 2011 to Three Months Ended June 30, 2010.

Leasing revenues. The principal components of our leasing revenues are presented in the following table. Per diem revenue represents revenue earned under operating lease contracts; fee and ancillary lease revenue represent fees billed for the pick-up and drop-off of containers in certain geographic

Table of Contents

locations and billings of certain reimbursable operating costs such as repair and handling expenses; and finance lease revenue represents interest income earned under finance lease contracts.

	Three Months Ended June 30,	
	2011	2010
	(in thousands)	
Leasing revenues:		
Operating lease revenues:		
Per diem revenue	$ 97,855	$ 67,000
Fee and ancillary lease revenue	4,439	3,851
Total operating lease revenue	102,294	70,851
Finance lease revenue	4,224	4,644
Total leasing revenues	$ 106,518	$ 75,495

Total leasing revenues were $106.5 million for the three months ended June 30, 2011, compared to $75.5 million for the three months ended June 30, 2010, an increase of $31.0 million, or 41.1%.

Per diem revenue increased by $30.9 million compared to the second quarter of 2010. The primary reasons for the increase are as follows:

- $21.9 million increase due to an increase in average units on hire. This reflects an increase in the average number of containers in our fleet; and

- $9.2 million increase due to higher per diem rates resulting from a significant number of units placed on-hire during the second half of 2010 and first half of 2011 at lease rates exceeding our portfolio average, and the expiration of lease incentives primarily provided during 2009.

Fee and ancillary lease revenue increased $0.6 million as compared to the second quarter of 2010 due to an increase in repair and handling revenue.

Finance lease revenue decreased by $0.4 million in the second quarter of 2011, primarily due to a decrease in the average size of our finance lease portfolio.

Equipment Trading Activities. Equipment trading revenue represents the proceeds on the sale of equipment purchased for resale. Equipment trading expenses represent the cost of equipment sold, including costs associated with the acquisition, maintenance and selling of trading inventory, such as positioning, repairs, handling and storage costs, and estimated direct selling and administrative costs.

	Three Months Ended June 30,	
	2011	2010
	(in thousands)	
Equipment trading revenues	12,877	$ 10,956
Equipment trading expenses	(10,094)	(9,675)
Equipment trading margin	$ 2,783	$ 1,281

The equipment trading margin increased $1.5 million for the three months ended June 30, 2011 compared to the three months ended June 30, 2010. The trading margin increased by $2.2 million due to an increase in selling margin per unit, partially offset by a decrease of $0.7 million due to a decrease in sales volume.

Table of Contents

Direct operating expenses. Direct operating expenses primarily consist of our costs to repair equipment returned off lease, to store the equipment when it is not on lease and to reposition equipment that has been returned to locations with weak leasing demand.

Direct operating expenses were $4.4 million for the three months ended June 30, 2011, compared to $6.6 million for the three months ended June 30, 2010, a decrease of $2.2 million. The primary reasons for the decrease are outlined below:

- $1.2 million decrease in storage and handling costs due to a decrease in the number of idle units; and

- $1.0 million decrease in repair costs due to a lower repair volume, primarily for our dry and refrigerated containers.

Administrative expenses. Administrative expenses were relatively flat at $10.6 million for the three months ended June 30, 2011, as compared to $10.5 million for the three months ended June 30, 2010.

Depreciation and amortization. Depreciation and amortization was $35.2 million for the three months ended June 30, 2011, compared to $28.3 million for the three months ended June 30, 2010, an increase of $6.9 million or 24.4%. Depreciation increased by approximately $13.6 million due to a net increase in the size of the depreciable fleet and was partially offset by a decrease of $5.4 million due to an increase in the estimated residual values included in our depreciation policy effective October 1, 2010, and a decrease of $1.3 million due to another vintage year of equipment becoming fully depreciated during the fourth quarter of 2010.

Provision (reversal) for doubtful accounts. For the three months ended June 30, 2011, our provision for doubtful accounts was $0.1 million compared to a reversal of $0.5 million in the second quarter of 2010. In general, our provision for doubtful accounts has remained low due to the absence of any major customer defaults.

Net (gain) on sale of leasing equipment. Gain on sale of equipment was $16.9 million for the three months ended June 30, 2011, compared to a gain of $7.2 million for the three months ended June 30, 2010, an increase of $9.7 million. Gain on sale increased by $11.1 million primarily due to higher selling prices, and was partially offset by a $1.9 million decrease due to lower selling volumes. In addition, upfront gains on units placed on finance leases increased by $0.4 million. We recognize an up-front gain or loss when we place existing equipment on finance leases and the market value of the equipment is different from our net book value. We do not generate up-front gains or losses when we place existing equipment on operating leases.

Interest and debt expense. Interest and debt expense was $25.8 million for the three months ended June 30, 2011, compared to $17.8 million for the three months ended June 30, 2010, an increase of $8.0 million. Interest and debt expense increased by $10.3 million due to a higher average debt balance mostly due to new equipment purchases during the second half of 2010 and first half of 2011, and decreased by $2.3 million due to a lower effective interest rate.

Net loss on interest rate swaps. Net loss on interest rate swaps was $15.1 million for the three months ended June 30, 2011, compared to $15.0 million for the three months ended June 30, 2010. The fair value of our interest rate swap contracts decreased during the second quarter of 2011 due to a decrease in long-term interest rates.

Income tax expense. Income tax expense was $12.7 million for the three months ended June 30, 2011, compared to $2.6 million for the three months ended June 30, 2010. The effective tax rates were 35.4% for the three months ended June 30, 2011 and 35.5% for the three months ended June 30, 2010.

Table of Contents

While we record income tax expense we do not pay any significant federal, state or foreign income taxes due to the availability of net operating loss carryovers and accelerated tax depreciation for our equipment. The majority of the expense recorded for income taxes is recorded as a deferred tax liability on the balance sheet. We anticipate that the deferred income tax liability will continue to grow for the foreseeable future.

Comparison of Six Months Ended June 30, 2011 to Six Months Ended June 30, 2010.

Leasing revenues. The principal components of our leasing revenues are presented in the following table. Per diem revenue represents revenue earned under operating lease contracts; fee and ancillary lease revenue represent fees billed for the pick-up and drop-off of containers in certain geographic locations and billings of certain reimbursable operating costs such as repair and handling expenses; and finance lease revenue represents interest income earned under finance lease contracts.

	Six Months Ended June 30,	
	2011	2010
	(in thousands)	
Leasing revenues:		
Operating lease revenues:		
Per diem revenue	$ 189,048	$ 129,265
Fee and ancillary lease revenue	8,570	9,579
Total operating lease revenue	197,618	138,844
Finance lease revenue	8,470	9,514
Total leasing revenues	$ 206,088	$ 148,358

Total leasing revenues were $206.1 million for the six months ended June 30, 2011, compared to $148.4 million for the six months ended June 30, 2010, an increase of $57.7 million, or 38.9%.

Per diem revenue increased by $59.8 million compared to 2010. The primary reasons for the increase are as follows:

- $42.4 million increase due to an increase in average units on hire. This reflects increased utilization and an increase in the average number of dry, refrigerated and tank containers in our fleet;

- $19.6 million increase due to higher per diem rates resulting from a significant number of units placed on-hire during the second half of 2010 and first half of 2011 at lease rates exceeding our portfolio average, and the expiration of lease incentives primarily provided during 2009; and

- $1.8 million decrease due to the recognition of revenue in the first half of 2010 for the early termination of certain lease contracts that did not reoccur in 2011.

Fee and ancillary lease revenue decreased by $1.0 million as compared to the prior year primarily due to a decrease in repair and handling revenue resulting from a decrease in drop-off volumes.

Finance lease revenue decreased by $1.0 million in 2011, primarily due to a decrease in the average size of our finance lease portfolio.

Equipment Trading Activities. Equipment trading revenue represents the proceeds on the sale of equipment purchased for resale. Equipment trading expenses represent the cost of equipment sold,

Table of Contents

including costs associated with the acquisition, maintenance and selling of trading inventory, such as positioning, repairs, handling and storage costs, and estimated direct selling and administrative costs.

	Six Months Ended June 30,	
	2011	2010
	(in thousands)	
Equipment trading revenues	$ 37,093	$ 16,694
Equipment trading expenses	(29,383)	(14,853)
Equipment trading margin	$ 7,710	$ 1,841

The equipment trading margin increased $5.9 million for the six months ended June 30, 2011 compared to the six months ended June 30, 2010. The trading margin increased by $2.9 million due to an increase in selling margin per unit and $3.0 million due to an increase in sales volume.

Direct operating expenses. Direct operating expenses primarily consist of our costs to repair equipment returned off lease, to store the equipment when it is not on lease and to reposition equipment that has been returned to locations with weak leasing demand.

Direct operating expenses were $8.5 million for the six months ended June 30, 2011, compared to $14.8 million for the six months ended June 30, 2010, a decrease of $6.3 million. The primary reasons for the decrease are outlined below:

- $4.2 million decrease in storage and handling costs due to a decrease in the number of idle units;

- $2.2 million decrease in repair costs due to a lower repair volume, primarily for our dry and refrigerated containers;

- $0.7 million decrease in container repositioning costs due to low redelivery volumes; and

- $0.4 million increase in surveying costs due to new equipment delivered in the first half of 2011.

Administrative expenses. Administrative expenses were relatively flat at $21.2 million for the six months ended June 30, 2011, as compared to $21.1 million for the six months ended June 30, 2010.

Depreciation and amortization. Depreciation and amortization was $67.4 million for the six months ended June 30, 2011, compared to $55.3 million for the six months ended June 30, 2010, an increase of $12.1 million or 21.9%. Depreciation increased by approximately $25.5 million due to a net increase in the size of the depreciable fleet and was partially offset by a decrease of $10.8 million due to an increase in the estimated residual values included in our depreciation policy effective October 1, 2010, and a decrease of $2.6 million due to another vintage year of equipment becoming fully depreciated during the fourth quarter of 2010.

Provision (reversal) for doubtful accounts. Provision for doubtful accounts was $0.1 million for the six months ended June 30, 2011, as compared to a reversal of $0.6 million for the six months ended June 30, 2010. In general, our provision for doubtful accounts has remained low due to an absence of any major customer defaults.

Net (gain) on sale of leasing equipment. Gain on sale of equipment was $24.8 million for the six months ended June 30, 2011, compared to a gain of $11.7 million for the six months ended June 30, 2010, an increase of $13.1 million. Gain on sale increased by $17.1 million primarily due to higher selling prices, and was partially offset by a $4.1 million decrease due to lower selling volumes. In addition, upfront gains on units placed on finance leases decreased by $0.3 million. We recognize an up-front gain or loss when we place existing equipment on finance leases and the market value of the

equipment is different from our net book value. We do not generate up-front gains or losses when we place existing equipment on operating leases.

Interest and debt expense. Interest and debt expense was $49.5 million for the six months ended June 30, 2011, compared to $34.8 million for the six months ended June 30, 2010, an increase of $14.7 million. Interest and debt expense increased by $18.4 million due to a higher average debt balance mostly due to new equipment purchases during the second half of 2010 and first half of 2011, and decreased by $3.7 million due to a lower effective interest rate.

Net loss on interest rate swaps. Net loss on interest rate swaps was $7.1 million for the six months ended June 30, 2011, compared to $21.8 million for the six months ended June 30, 2010. The fair value of our interest rate swap contracts decreased during the second half of 2011 due to a decrease in long-term interest rates.

Income tax expense. Income tax expense was $30.6 million for the six months ended June 30, 2011, compared to $6.1 million for the six months ended June 30, 2010. The effective tax rates were 35.4% for the six months ended June 30, 2011 and 36.6% for the six months ended June 30, 2010. We anticipate that our annual effective tax rate will be approximately 35.4%.

While we record income tax expense we do not pay any significant federal, state or foreign income taxes due to the availability of net operating loss carryovers and accelerated tax depreciation for our equipment. The majority of the expense recorded for income taxes is recorded as a deferred tax liability on the balance sheet. We anticipate that the deferred income tax liability will continue to grow for the foreseeable future.

Business Segments

We operate our business in one industry, intermodal transportation equipment, and in two business segments, Equipment leasing and Equipment trading.

Equipment leasing

We own, lease and ultimately dispose of containers and chassis from our lease fleet, as well as manage containers owned by third parties. Equipment leasing segment revenues represent leasing revenues from operating and finance leases, fees earned on managed container leasing activities, as well as other revenues. Expenses related to equipment leasing include direct operating expenses, administrative expenses, depreciation expense, and interest expense. The Equipment leasing segment also includes gains and losses on the sale of owned leasing equipment.

Table of Contents

Segment Comparison of Quarter Ended June 30, 2011 to Quarter Ended June 30, 2010

The following table lists selected revenue and expense items for our Equipment leasing segment for the three months ended June 30, 2011 and 2010:

	Three Months Ended June 30,	
	2011	2010
	(in thousands)	
Equipment leasing segment:		
Total revenues	$ 106,416	$ 75,430
Depreciation and amortization expense	35,019	28,110
Interest and debt expense	25,237	17,281
Net (gain) on sale of leasing equipment	(16,899)	(7,191)
Income before income taxes(1)	48,141	20,852

(1) Income before income taxes excludes net losses on interest rate swaps of $15.1 million and $15.0 million for the three months ended June 30, 2011 and 2010, respectively.

Equipment leasing revenue. Total revenue for the Equipment leasing segment was $106.4 million in the three months ended June 30, 2011 compared to $75.4 million in the three months ended June 30, 2010, an increase of $31.0 million, or 41.1%. The primary reasons for the increase are as follows:

- $21.9 million increase due to an increase in average units on hire. This reflects an increase in the average number of containers in our fleet;
- $9.2 million increase due to higher per diem rates resulting from a significant number of units placed on-hire during the second half of 2010 and first half of 2011 at lease rates exceeding our portfolio average, and the expiration of lease incentives primarily provided during 2009;
- $0.6 million increase due to slightly higher fee and ancillary lease revenue due to an increase in repair and handling revenue; and
- $0.4 million decrease in finance lease revenue, primarily due to a decrease in the average size of our finance lease portfolio.

Equipment leasing income before income taxes. Income before income taxes for the Equipment leasing segment was $48.1 million in the three months ended June 30, 2011 compared to $20.9 million in the three months ended June 30, 2010, an increase of $27.2 million. The primary reasons for the increase in income before income taxes are as follows:

- $31.0 million increase in Equipment leasing revenue in the second quarter of 2011;
- $9.7 million increase in gain on the sale of leasing equipment, primarily due to higher selling prices;
- $2.2 million decrease in direct operating expenses, primarily resulting from decreased storage and repair costs associated with improved utilization and decreased volumes of idle containers;

$8.0 million increase in interest and debt expense due to a higher average debt balance mostly due to new equipment purchases during the second half of 2010 and first half of 2011, partially offset by a lower effective interest rate; and

$6.9 million increase in depreciation expense, due to a net increase in the size of the depreciable fleet, partially offset by the impact of an increase in the estimated residual values included in our depreciation policy effective October 1, 2010 and the impact of another vintage year of equipment becoming fully depreciated during the fourth quarter of 2010.

Table of Contents

Segment Comparison of Six Months Ended June 30, 2011 to Six Months Ended June 30, 2010

The following table lists selected revenue and expense items for our Equipment leasing segment for the six months ended June 30, 2011 and 2010:

	Six Months Ended June 30,	
	2011	2010
	(in thousands)	
Equipment leasing segment:		
Total revenues	$ 205,796	$ 148,626
Depreciation and amortization expense	67,265	54,947
Interest and debt expense	48,458	33,952
Net (gain) on sale of leasing equipment	(24,784)	(11,659)
Income before income taxes(1)	85,617	36,514

(1) Income before income taxes excludes net losses on interest rate swaps of $7.1 million and $21.8 million for the six months ended June 30, 2011 and 2010, respectively.

Equipment leasing revenue. Total revenue for the Equipment leasing segment was $205.8 million in the six months ended June 30, 2011 compared to $148.6 million in the six months ended June 30, 2010, an increase of $57.2 million, or 38.5%. The primary reasons for the increase are as follows:

- $42.4 million increase due to an increase in average units on hire. This reflects increased utilization and an increase in the average number of dry, refrigerated and tank containers in our fleet;

- $19.6 million increase due to higher per diem rates resulting from a significant number of units placed on-hire during the second half of 2010 and first half of 2011 at lease rates exceeding our portfolio average, and the expiration of lease incentives primarily provided during 2009;

- $1.8 million decrease due to the recognition of revenue in the first half of 2010 for the early termination of certain lease contracts that did not reoccur in 2011;

- $1.0 million decrease due to a decrease in repair and handling revenue resulting from a decrease in drop-off volumes; and

- $1.0 million decrease in finance lease revenue, primarily due to a decrease in the average size of our finance lease portfolio.

Equipment leasing income before income taxes. Income before income taxes for the Equipment leasing segment was $85.6 million in the six months ended June 30, 2011 compared to $36.5 million in the six months ended June 30, 2010, an increase of $49.1 million. The primary reasons for the increase in income before income taxes are as follows:

- $57.2 million increase in Equipment leasing revenue in the first half of 2011;

- $6.3 million decrease in direct operating expenses, primarily resulting from decreased storage and repair costs associated with improved utilization and decreased volumes of idle containers;

$13.1 million increase in gain on the sale of leasing equipment, primarily due to higher selling prices;

$14.5 million increase in interest and debt expense due to a higher average debt balance mostly due to new equipment purchases during the second half of 2010 and first half of 2011, partially offset by a lower effective interest rate; and

Table of Contents

$12.3 million increase in depreciation expense, due to a net increase in the size of the depreciable fleet, partially offset by the impact of an increase in the estimated residual values included in our depreciation policy effective October 1, 2010 and the impact of another vintage year of equipment becoming fully depreciated during the fourth quarter of 2010.

Equipment trading

We purchase containers from shipping line customers and other sellers of containers, and resell these containers to container traders and users of containers for storage or one-way shipment. Equipment trading segment revenues represent the proceeds on the sale of containers purchased for resale. Also included in Equipment trading segment revenues are leasing revenues from equipment purchased for resale that is currently on lease until containers are dropped off. Equipment trading expenses represent the cost of equipment sold, including costs associated with the acquisition, maintenance and selling of trading inventory, such as positioning, repairs, handling and storage costs, and estimated direct selling and administrative costs. Other expenses in this segment include administrative overhead expenses, depreciation expense, provision for doubtful accounts and interest expense.

Segment Comparison of Quarter Ended June 30, 2011 to Quarter Ended June 30, 2010

The following table lists selected revenue and expense items for our Equipment trading segment for the three months ended June 30, 2011 and 2010:

	Three Months Ended June 30,	
	2011	2010
	(in thousands)	
Equipment trading segment:		
Total leasing revenues	$ 926	$ 978
Equipment trading revenues	12,877	10,956
Equipment trading expense	(10,094)	(9,675)
Equipment trading margin	2,783	1,281
Interest and debt expense	513	492
Income before income taxes(1)	2,897	1,362

(1) Income before income taxes excludes net losses on interest rate swaps of $15.1 million and $15.0 million for the three months ended June 30, 2011 and 2010, respectively.

Equipment trading margin. The Equipment trading margin, the difference between Equipment trading revenues and expenses, increased $1.5 million in the second quarter of 2011 as compared to the second quarter of 2010. The trading margin increased by $2.2 million due to an increase in selling margin per unit as a result of increased selling prices, partially offset by a decrease of $0.7 million due to a decrease in sales volume.

Equipment trading income before income taxes. Income before income taxes for the Equipment trading segment was $2.9 million in the three months ended June 30, 2011 compared to $1.4 million in the three months ended June 30, 2010. Income before income taxes increased primarily due to an increase in the Equipment trading margin.

Table of Contents

Segment Comparison of Six Months Ended June 30, 2011 to Six Months Ended June 30, 2010

The following table lists selected revenue and expense items for our Equipment trading segment for the six months ended June 30, 2011 and 2010:

	Six Months Ended June 30,	
	2011	2010
	(in thousands)	
Equipment trading segment:		
Total leasing revenues	$ 1,858	$ 1,642
Equipment trading revenues	37,093	16,694
Equipment trading expense	(29,383)	(14,853)
Equipment trading margin	7,710	1,841
Interest and debt expense	1,023	863
Income before income taxes(1)	7,859	1,913

(1) Income before income taxes excludes net losses on interest rate swaps of $7.1 million and $21.8 million for the six months ended June 30, 2011 and 2010, respectively.

Equipment trading margin. The Equipment trading margin, the difference between Equipment trading revenues and expenses, increased $5.9 million in the six months ended June 30, 2011 as compared to the six months ended June 30, 2010. The trading margin increased by $3.0 million due to an increase in sales volume and $2.9 million due to an increase in selling margin per unit.

Equipment trading income before income taxes. Income before income taxes for the Equipment trading segment was $7.9 million in the six months ended June 30, 2011, compared to $1.9 million in the six months ended June 30, 2010. Income before income taxes increased primarily due to an increase in the Equipment trading margin.

Liquidity and Capital Resources

Our principal sources of liquidity are cash flows provided by operating activities, proceeds from the sale of our leasing equipment, principal payments on finance lease receivables and borrowings under our credit facilities. Our cash in-flows and borrowings are used to finance capital expenditures, meet debt service requirements and pay dividends.

We continue to have sizable cash in-flows. For the twelve months ended June 30, 2011, cash provided by operating activities, together with the proceeds from the sale of our leasing equipment and principal payments on our finance leases, was $351.7 million. In addition, as of June 30, 2011, we had $60.4 million of unrestricted cash and $360.0 million of additional borrowing capacity under our current credit facilities.

We continue to increase our availability and issue debt under our existing credit and ABS facilities. In January 2011, we issued $174 million and in May 2011, we issued $235 million of fixed rate secured notes under the ABS facilities. During the first quarter, we increased the size of our asset backed warehouse credit facility to bring the maximum availability to $400 million. In addition, during the second quarter of 2011, we entered into secured term loan facilities with delayed draw features, further increasing our borrowing capacity by $150 million.

On April 6, 2011, we completed a public offering of 5,500,000 shares of our common stock. Of the total shares sold, we sold 2,500,000 shares of common stock and certain of our stockholders sold an aggregate of 3,000,000 shares of common stock. Our proceeds from the offering, net of underwriting discounts and other fees, were $85.5 million.

Table of Contents

As of June 30, 2011, major committed cash outflows in the next 12 months include $209.7 million of committed but unpaid capital expenditures and $273.7 million of scheduled principal payments on our existing debt facilities.

We believe that cash provided by operating activities and existing cash, proceeds from the sale of our leasing equipment, principal payments on our finance lease receivables and availability under our borrowing facilities will be sufficient to meet our obligations over the next 12 months.

At June 30, 2011, our outstanding indebtedness was comprised of the following (amounts in millions):

	Current Amount Outstanding	Current Maximum Borrowing Level
Asset backed securitization term notes (ABS)	$ 1,312.8	$ 1,312.8
Term loan facilities	452.2	562.2
Asset backed warehouse facility	160.0	400.0
Revolving credit facility	90.0	100.0
Capital lease obligations	120.9	120.9
Total Debt	2,135.9	2,495.9

The maximum commitment levels depicted in the chart above may not reflect the actual availability under all of the credit facilities. Certain of these facilities are governed by borrowing bases that limit borrowing capacity to an established percentage of relevant assets.

As of June 30, 2011 we had $940.4 million of debt outstanding on facilities with fixed interest rates and $1,195.5 million of debt outstanding on facilities with interest rates based on floating rate indices (such as LIBOR). We economically hedge the risks associated with fluctuations in interest rates on our floating rate borrowings by entering into interest rate swap contracts that convert our floating rate debt to a fixed rate basis, thus reducing the impact of interest rate changes on future interest expense. As of June 30, 2011, we had interest rate swaps in place with a total notional value of $967.0 million to fix the floating interest rates on a portion of our floating rate debt obligations.

Debt Covenants

We are subject to certain financial covenants under our debt agreements. At June 30, 2011, we were in compliance with all such covenants. Below are the primary financial covenants to which we are subject:

Minimum Earnings Before Interest and Taxes ("EBIT") to Cash Interest Expense;

Minimum Tangible Net Worth ("TNW"); and

Maximum Indebtedness to TNW.

Non-GAAP Measures

We rely primarily on our results measured in accordance with generally accepted accounting principles ("GAAP") in evaluating our business. EBIT, Cash Interest Expense, TNW, and Indebtedness are non-GAAP financial measures defined in our debt agreements that are used to determine our compliance with certain covenants contained in our debt agreements and should not be used as a substitute for analysis of our results as reported under GAAP. However, we believe that the inclusion of this non-GAAP information provides additional information to investors regarding our debt covenant compliance.

Table of Contents

Minimum EBIT to Cash Interest Expense

For the purpose of this covenant, EBIT is calculated based on the cumulative sum of our earnings for the last four quarters (excluding income taxes, interest expense, amortization, net gain or loss on interest rate swaps and certain non-cash charges). Cash Interest Expense is calculated based on interest expense adjusted to exclude interest income, amortization of deferred financing costs, and the difference between current and prior period interest expense accruals.

Minimum EBIT to Cash Interest Expense is calculated on a consolidated basis and for certain of our wholly owned special purpose entities ("SPEs"), whose primary activity is to issue asset backed notes. EBIT for each of our SPEs is calculated based on the net earnings generated by the assets pledged as collateral for the underlying debt issued. The actual EBIT to Cash Interest Expense ratio for each SPE may differ depending on the specific net earnings associated with those pledged assets. As of June 30, 2011, the required and actual Consolidated EBIT to Cash Interest Expense ratio and EBIT to Cash Interest Expense ratio for each of the issuers of our debt facilities that have a borrowing capacity of $200 million or greater were as follows:

Entity/Issuer	Minimum EBIT to Cash Interest Expense Ratio	Actual EBIT to Cash Interest Expense Ratio
Consolidated	1.10	2.67
TAL Advantage I, LLC	1.10	3.75
TAL Advantage II, LLC	1.10	1.65
TAL Advantage III, LLC	1.30	1.94
TAL Advantage IV, LLC	1.10	2.17

Minimum TNW and Maximum Indebtedness to TNW Covenants

We are required to meet consolidated Minimum TNW and Maximum Indebtedness to TNW covenants. For the purposes of calculating these covenants, all amounts are based on the consolidated balance sheet of TAL International Group, Inc. TNW is calculated as total tangible assets less total indebtedness, which includes equipment purchases payable and, in certain cases, includes the fair value of derivative instruments liability.

For the majority of our debt facilities, the required Minimum TNW is calculated as $321.4 million plus 50% of cumulative net income or loss since January 1, 2006. As of June 30, 2011, the required Minimum TNW and actual TNW for each of our SPEs was $472.3 million and $721.5 million, respectively. As of June 30, 2011, the required and actual Maximum Indebtedness to TNW ratios for each of our debt facilities that have a borrowing capacity of $200 million or greater was as follows (in thousands):

Entity/Issuer	Maximum Indebtedness to TNW Ratio	Actual Indebtedness to TNW Ratio
TAL Advantage I, LLC	4.75	3.11
TAL Advantage II, LLC	4.75	3.03
TAL Advantage III, LLC	4.75	3.03
TAL Advantage IV, LLC	4.75	3.03

As of June 30, 2011, our outstanding debt on facilities with borrowing capacity of approximately $200 million or greater was approximately $1,670 million.

Table of Contents

Failure to comply with these covenants would result in a default under the related credit agreements and could result in the acceleration of our outstanding debt if we were unable to obtain a waiver from the creditors.

Dividends

We paid the following quarterly dividends during the six months ended June 30, 2011 and 2010 on our issued and outstanding common stock:

Record Date	Payment Date	Aggregate Payment	Per Share Payment
June 2, 2011	June 23, 2011	$ 16.5 million	$ 0.50
March 3, 2011	March 24, 2011	$ 13.8 million	$ 0.45
June 3, 2010	June 24, 2010	$ 9.1 million	$ 0.30
March 11, 2010	March 25, 2010	$ 7.6 million	$ 0.25

Cash Flow

The following table sets forth certain cash flow information for the six months ended June 30, 2011 and 2010 (in thousands):

	Six Months Ended June 30,	
	2011	2010
Net cash provided by operating activities	$ 109,927	$ 63,096
Net cash used in investing activities:		
Purchases of leasing equipment	$ (574,154)	$ (273,039)
Investment in finance leases	(2,614)	(433)
Proceeds from sale of equipment, net of selling costs	44,864	39,634
Cash collections on finance lease receivables, net of income earned	18,033	16,273
Other	13	(124)
Net cash used in investing activities	$ (513,858)	$ (217,689)
Net cash provided by financing activities	$ 401,783	$ 161,183

Operating Activities

Net cash provided by operating activities increased by $46.8 million to $109.9 million in the six months ended June 30, 2011, compared to $63.1 million in the six months ended June 30, 2010 primarily due to increased profitability. Partially offsetting this increase were payments of $12.5 million to the Company's interest rate swap counterparties for the termination of certain interest rate swap contracts.

Investing Activities

Net cash used in investing activities increased by $296.2 million to $513.9 million in the six months ended June 30, 2011 compared to $217.7 million in 2010. Major reasons for the increase were as follows:

We paid $576.8 million, including investments in finance leases of $2.6 million, for new equipment in the six months ended June 30, 2011 compared to $273.4 million, including investments in finance leases of $0.4 million, in the six months ended June 30, 2010.

Table of Contents

Sales proceeds from the disposal of equipment increased $5.3 million to $44.9 million in the six months ended June 30, 2011 compared to $39.6 million in the six months ended June 30, 2010. Proceeds from the disposal of used containers in the six months ended June 30, 2011 increased primarily as a result of higher selling prices.

Cash collections on finance leases, net of income earned, increased by $1.7 million to $18.0 million in the six months ended June 30, 2011 compared to $16.3 million in the six months ended June 30, 2010 primarily due to a prepayment of principal by one of our customers.

Financing Activities

Net cash provided by financing activities was $401.8 million in the six months ended June 30, 2011 compared to $161.2 million in the six months ended June 30, 2010. The major changes were as follows:

During the six months ended June 30, 2011, we had net borrowings of $364.9 million under our various debt facilities, which were primarily used to finance the purchase of new equipment, compared to net borrowings of $194.2 million in the six months ended June 30, 2010. In addition, effective April 6, 2011, we sold 2,500,000 shares of common stock for net proceeds of $85.5 million. In the six months ended June 30, 2011, we paid $30.3 million in dividends, compared to $16.7 million in dividends paid during the six months ended June 30, 2010.

Contractual Obligations

We are party to various operating and capital leases and are obligated to make payments related to our long term borrowings. We are also obligated under various commercial commitments, including obligations to our equipment manufacturers. Our equipment manufacturer obligations are in the form of conventional accounts payable, and are satisfied by cash flows from operating and long term financing activities.

The following table summarizes our contractual obligations and commercial commitments as of June 30, 2011:

	Contractual Obligations by Period					
Contractual Obligations:	**Total**	**Remaining 2011**	**2012**	**2013**	**2014**	**2015 and thereafter**
			(dollars in millions)			
Total debt obligations(1)	$ 2,419.0	$ 175.8	$ 446.2	$ 366.2	$ 330.2	$ 1,100.6
Capital lease obligations(2)	142.8	4.2	18.9	17.0	20.7	82.0
Operating leases (mainly facilities)	3.7	1.1	1.6	0.7	0.3	
Purchase obligations:						
Equipment purchases payable	49.0	49.0				
Equipment purchase commitments	160.7	160.7				
Total contractual obligations	$ 2,775.2	$ 390.8	$ 466.7	$ 383.9	$ 351.2	$ 1,182.6

(1) Amounts include actual and estimated interest for floating-rate debt based on June 30, 2011 rates and the net effect of the interest rate swaps.

(2) Amounts include interest.

Off-Balance Sheet Arrangements

At June 30, 2011, we did not have any relationships with unconsolidated entities or financial partnerships, such entities which are often referred to as structured finance or special purpose entities, which were established for the purpose of facilitating off-balance sheet

arrangements. We are,

Table of Contents

therefore, not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships.

Critical Accounting Policies

Our consolidated financial statements have been prepared in conformity with United States generally accepted accounting principles, which require us to make estimates and assumptions that affect the amounts and disclosures reported in the consolidated financial statements and accompanying notes. Our estimates are based on historical experience and currently available information. Actual results could differ from such estimates. Our critical accounting policies are discussed in our 2010 Form 10-K filed with the SEC on February 18, 2011.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of changes in value of a financial instrument, derivative or non-derivative, caused by fluctuations in interest rates, foreign exchange rates and equity prices. Changes in these factors could cause fluctuations in results of our operations and cash flows. In the ordinary course of business, we are exposed to interest rate and foreign currency exchange rate risks.

Interest Rate Risk

We enter into interest rate swap contracts to fix the interest rates on a portion of our floating rate debt. We assess and manage the external and internal risk associated with these derivative instruments in accordance with the overall operating goals. External risk is defined as those risks outside of our direct control, including counterparty credit risk, liquidity risk, systemic risk and legal risk. Internal risk relates to those operational risks within the management oversight structure and includes actions taken in contravention of our policy.

The primary external risk of our interest rate swap contracts is counterparty credit exposure, which is defined as the ability of a counterparty to perform its financial obligations under a derivative contract. All derivative agreements are with highly rated financial institutions. Credit exposures are measured based on the market value of outstanding derivative instruments. Both current exposures and potential exposures are calculated for each derivative contract to monitor counterparty credit exposure.

As of June 30, 2011, the Company had in place total interest rate swap contracts to fix the floating interest rates on borrowings under its debt facilities as summarized below:

Total Notional Amount at June 30, 2011	Weighted Average Fixed Leg Interest Rate at June 30, 2011	Weighted Average Remaining Term
$967.0	3.36%	4.1 years

Changes in the fair value of these interest rate swap contracts will be recognized in the consolidated statements of operations as net gains or losses on interest rate swaps.

Since approximately 81% of our variable rate debt is hedged using interest rate swaps, our interest expense is not significantly affected by changes in interest rates. However, our earnings are impacted by changes in interest rate swap valuations which cause gains or losses to be recorded. During the three months ended June 30, 2011, net loss on interest rate swaps totaled $15.1 million, compared to a net loss on interest rate swaps of $15.0 million for the three months ended June 30, 2010. During the six months ended June 30, 2011, net loss on interest rate swaps totaled $7.1 million, compared to a net loss on interest rate swaps of $21.8 million for the six months ended June 30, 2010.

Table of Contents

Foreign Currency Exchange Rate Risk

Although we have significant foreign based operations, the U.S. dollar is the operating currency for the large majority of our leases and obligations, and most of our revenues and expenses in 2011 and 2010 were denominated in U.S. dollars. However we pay our non-U.S. staff in local currencies, and certain of our direct operating expenses and disposal transactions for our older containers are structured in foreign currencies.

We recorded unrealized foreign currency exchange gains of approximately nine thousand dollars in the second quarter of 2011, and unrealized foreign currency exchange losses of $0.1 million in the second quarter of 2010. For the six months ended June 30, 2011 and 2010, we recorded unrealized foreign currency exchange gains of $0.1 million and unrealized foreign currency exchange losses of $0.5 million, respectively. These gains and losses resulted primarily from fluctuations in exchange rates related to our Euro and Pound Sterling transactions and related assets.

In April 2008, we entered into a foreign currency rate swap agreement to exchange Euros for U.S. Dollars based on expected payments under our Euro denominated finance lease receivables. The foreign currency rate swap agreement expires in April 2015. The fair value of this derivative contract was $0.4 million at June 30, 2011, and is reported as an asset in Fair Value of Derivative Instruments on the consolidated balance sheet.

ITEM 4. CONTROLS AND PROCEDURES.

Based upon the required evaluation of our disclosure controls and procedures, our President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer concluded that as of June 30, 2011 our disclosure controls and procedures were adequate and effective to ensure that information was gathered, analyzed and disclosed on a timely basis.

There has been no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our fiscal quarter ended June 30, 2011, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

From time to time, we are a party to litigation matters arising in connection with the normal course of our business. While we cannot predict the outcome of these matters, in the opinion of our management, based on information presently available to us, we believe that we have adequate legal defenses, reserves or insurance coverage and any liability arising from these matters will not have a material adverse effect on our business. Nevertheless, unexpected adverse future events, such as an unforeseen development in our existing proceedings, a significant increase in the number of new cases or changes in our current insurance arrangements could result in liabilities that have a material adverse impact on our business.

ITEM 1A. RISK FACTORS.

For a detailed discussion of our risk factors, refer to our 2010 Form 10-K filed with the Securities and Exchange Commission on February 18, 2011.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

On March 13, 2006, our Board of Directors authorized a stock repurchase program for the repurchase of our common stock. The stock repurchase program, as amended, authorizes us to repurchase up to 4.0 million shares of our common stock. There were no material repurchases of Treasury Stock during the three months ended June 30, 2011 and 2010.
