CareDecision Corporation
(a Development Stage Company)

Notes

Note 1 Basis of presentation

The consolidated interim financial statements included herein, presented in accordance with United States generally accepted accounting principles and stated in US dollars, have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading.

These statements reflect all adjustments, consisting of normal recurring adjustments, which, in the opinion of management, are necessary for fair presentation of the information contained therein. It is suggested that these consolidated interim financial statements be read in conjunction with the consolidated financial statements of the Company for the period ended December 31, 2003 and notes thereto included in the Company's Form 10-KSB. The Company follows the same accounting policies in the preparation of consolidated interim reports.

Results of operations for the interim periods are not indicative of annual results.

Note 2 Fixed assets

Depreciation expense totaled \$33,315 and \$36,377 for the three-month periods ended March 31, 2004 and 2003, respectively.

Note 3 Notes payable

The Company determined during the nine months ending September 30, 2003 that it is appropriate to reclassify software acquired in 2002 from intellectual property to fixed assets. The effect of the change in accounting principle requires a restatement of the December 31, 2002, and March 31, 2003 financial statements in order to properly reflect the asset reclassification and the related adjustment to depreciation expense. The effect of this change was to decrease net income for the year ended December 31, 2002 and the three months ended March 31, 2003 by \$119,988 and \$63,409, respectively. Retained earnings as of January 1, 2002 has been adjusted for the retroactive application of the change in accounting principle.

M and E Equities, LLC Renegotiated Note

Based on terms negotiated on March 4, 2002, and after a further documentation process that was completed on April 23, 2002, Medicius, Inc., the Company's merger partner in its June 2002 merger, was loaned \$475,000 from M and E Equities, LLC (M&E) (as previously discussed in Note 6). A condition of the loan stipulated that Medicius, Inc. complete its merger with the Company and become a fully reporting public company. As of December 31, 2003, after a partial payment of interest and principal and a settlement of a legal dispute that arose over this note and other issues, the remaining value of the note and accrued interest was \$522,527. On March 2, 2004, the Company renegotiated its debt with M&E. The terms of the agreement are stipulated as follows:

-

\$320,000 is paid to M&E by Wells & Company, Inc., Lima Capital, Inc., JC Financial, Inc. and Corporate Architects, Inc. to satisfy a remaining principal amount of \$400,000.

-

M&E agreed to transfer 10,000,000 of the Class A Warrants, formerly issued by Medicius, Inc., with an expiration date of January 5, 2005 to Empyreon.net Corp. for \$30,000, and 2,000,000 Class A Warrants to Mr. Moshe Mendlowitz for \$20.00. The Company incurred interest expense during the first quarter ended March 31, 2004 totaling \$405,700, the deemed value of the Warrants on the transfer date based on the Black-Scholes Valuation Model.

7

#

CareDecision Corporation
(a Development Stage Company)

Notes

•

The outstanding note balance of \$200,526 was recapitalized into 207,526 shares of the Company's \$0.001 par value Class A 2002 Convertible Preferred Stock and registered in M&E's name. Each share of Class A 2002 Convertible Preferred Stock is convertible into 18 shares (3,717,468 total) of the Company's \$0.001 par value common stock at \$0.055556 per share. M&E agrees to hold the Preferred Shares for a minimum of one year, pursuant to Rule 144, with no conversions allowed during that period of time. After the one year, M&E may convert and sell only 500,000 shares of the Company's \$0.001 par value common stock every 60 days as permissible by Rule 144.

Pinnacle Investment Partners, LP Promissory Note

On March 24, 2004, the Company was loaned \$700,000 from Pinnacle Investment Partners, LP (Pinnacle). The Secured Convertible Promissory Note bears interest at the rate of 12% per annum, matures September 25, 2004, except if extended for an additional six months at the option of the company, and is secured by 14,000,000 shares of the Company's \$0.001 par value common stock. Pinnacle may, at its option, at any time from time to time, elect to convert some or all of the then-outstanding principal of the Note into shares of the Company's \$0.001 par value common stock at a conversion price of \$0.08 per share, unless such conversion would result in Pinnacle being deemed the beneficial owner of 4.99% or more of the then-outstanding Common Shares within the meaning of Rule 13d-3 of the Securities Exchange Act of 1934, as amended. In the event the Company fails to pay any installment or principal or interest when due, the interest rate will then accrue at a rate of 24% per annum on the unpaid balance until the payment default is cured.

The Company recorded interest expense totaling \$9,051 and \$10,823 for the three months ended March 31, 2004 and 2003. The Company also recorded financing costs totaling \$408,255 for the three months ended March 31, 2004.

Note 4 Stockholder's equity

The Company is authorized to issue 5,000,000 shares of \$0.001 par value preferred stock and 290,000,000 shares of \$0.001 par value common stock.

Preferred stock

The Company issued 207,526 of its \$0.001 par value preferred shares for financing costs of \$354,800. Each preferred share is convertible into 18 shares of the Company's \$0.001 par value common stock at \$1.00 per share.

Common stock

The Company issued 7,350,000 shares of its \$0.001 par value common stock to various individuals to convert \$522,000 in debt to equity during the three months ended March 31, 2004.

The Company issued 23,115,500 shares of its \$0.001 par value common stock to various individuals and entities for consulting services, finders' fees to two individuals who introduced the company to its proposed satellite e-broadcast partner, agent's fees associated with the company's proposed acquisition of MDU Services, Inc., agent's fees for the introduction and fees associated with the company's recent agreement with an e-business partner for its hotel sector product, documentation and initiation fees owing to the Pinnacle Note investment, collectively valued at \$485,119 and professional fees valued at \$162,000.

The Company issued 6,510,000 shares of its \$0.001 par value common stock in order to settle the dispute with investors and agents, which arose over the M&E Note, and which allowed the M&E Note to be settled and converted. The value of the shares was \$317,136 and is recorded as a loss on debt settlement during the three months ended March 31, 2004.

There have been no other issuances of preferred or common stock.

#

Forward-Looking Statements

This Quarterly Report contains forward-looking statements about our business, financial condition and prospects that reflect our assumptions and beliefs based on information currently available. We can give no assurance that the expectations indicated by such forward-looking statements will be realized. If any of our assumptions should prove incorrect, or if any of the risks and uncertainties underlying such expectations should materialize, our actual results may differ materially from those indicated by the forward-looking statements.

The key factors that are not within our control and that may have a direct bearing on operating results include, but are not limited to, acceptance of our services, our ability to expand our customer base, our ability to raise capital in the future, the retention of key employees and changes in the regulation of our industry. There may be other risks and circumstances that we are unable to predict. When used in this Quarterly Report, words such as, "*believes,*" "*expects,*" "*intends,*" "*plans,*" "*anticipates,*" "*estimates*" and similar expressions are intended to identify forward-looking statements, although there may be certain forward-looking statements not accompanied by such expressions.

General

Although we are still considered to be in the development stage, we have begun commercial delivery of our products and services. In the quarter ended March 31, 2004 we booked the first revenues for our proprietary technologies and products directed toward the lodging sector, these revenues having resulted from commercial sales rather than a converted pre-commercial arrangement. Additional commercial sales orders have been received for our lodging sector products and services and additional deliveries have subsequently occurred and are increasing. In the current quarter we have expanded our services offered to the lodging sector by developing additional proprietary technology and executing a broad-based agreement with a large worldwide e-business reservation service. Management believes that this expanded service delivery coupled with the agreement with the e-business reservation service will greatly increase the commercial usage and viability of our products and services directed toward the lodging sector.

We have come to terms with a second company for the provision of commercial development, field implementation, field management and field support of our e-health products and services. This arrangement involves the delivery of our MD@Rx PDA-based products and services for electronic medication prescription fulfillment. Commercial delivery of the MD@Rx products as well as on-going development of same to better service the Medicaid and uninsured patients markets have begun subsequent to March 31. We have also executed an agreement with a nationwide medical IT services company to license and provide services related to our proprietary medical technologies in return for a significant equity stake. This agreement also contemplates the integration of some of our

proprietary technologies into the products and services of our new partner.

Our proprietary products and services directed toward the satellite re-broadcast sector remain in the pre-commercial stage although the company is in later-stage discussions with a major marketer of satellite re-broadcast services that conclude and thus lead to a commercial delivery or adoption of this third business line in the current quarter.

9

#

Our principal products are: an E-Health handheld information appliance (PDA) software application package, and a permanently affixed handheld information appliance and Wi-Fi (wireless) network designed for the hotel, motel and apartment marketplace and a handheld wireless information appliance for the satellite media market. We have applied for and received provisional approval for a family of trademarks making use of the mark MD@. The provisional approval applies to the first six individual marks applied for by us. In addition, we are in the process of applying for marks associated with our ResidenceWare hotel/motel products and technologies and our wireless SateLink products and technologies for the satellite media market.

We presently have a comprehensive suite of medical information technology, cooperative advertising, instant messaging and fulfillment, and electronic commerce applications that are Internet enhanced, integrated for medical professional use, and hotel management/guest use, both software suites functioning through networks of wireless PDA Internet appliances. Our applications have been designed to meet the needs of the inpatient and outpatient medical environments, and the hotel management and guest (consumer), and are not just commercially viable but also regulatory standard compliant. Our satellite media applications leverage information obtained from a communications satellite. Additionally, our software applications were conceived and implemented to offer the management level user, either the medical professional or hotel manager, the ability to manage prospective and retrospective commerce.

We have filed two broad based patent applications and intend to file derivative patent applications covering the processes, use and functionality of our technologies and products. Our satellite media product is designed for use by installation and customer support technicians and offers instant and secure communication between the individual subscriber and the satellite broadcast service.

Our software is designed to integrate point of service applications. The medical appliance, the longest available product, monitors treatment protocols and up to the moment patient histories coupled with real-time on-line medical insurance claims submission. Our ultimate key to success resides in providing the private practice physician with the capability to, sequentially, learn about the history of his or her patient during, or prior to, entering the examining room, treat the patient and update the insurer of the episode of care. Accomplishing these objectives resolves a major dilemma for the health care provider; instantaneous communication of vital patient related information at or before the patient encounter.

Our medical technologies, the focus of one of the broad based patent applications now in the patent prosecution stage, are grounded in the central need to furnish the doctor with crucial point-of-care patient information rapidly and reliably via a PDA. The technologies utilize the power of the Internet to move large amounts of data to and from a variety of platforms securely via a powerful Windows CE based PDA designed for portability and upgradability. Totally compliant with the Health Insurance Portability and Accountability Act of 1996 (HIPAA), this PDA technology is among the first to offer complicated and real-time point of care applications, previously legacy (mainframe or PC network) system applications, on a totally portable (PDA) appliance.

The Wi-Fi hotel/motel and apartment software makes use of much of the foundation technologies resident in the medical product, however, given the differences in the two markets that the products service, the hotel/motel product is much more cooperative oriented, offering more consumer transactional services with the compliment of advertising.

Our technologies and products for the hotel/motel marketplace are designed to furnish hotel and motel guests with a menu of food service, office services and other remote service (dry cleaning for instance) choices that can be electronically ordered through our PDA-based information appliance for delivery directly to the hotel/motel guest.

Employing the latest in commercial Wi-Fi technology, we wrapped the time and volume tested commercial technologies into our patent pending PDA communication networking technologies, allowing us to be the first to offer complex and real-time point of sale applications through a totally wireless (PDA) appliance.

The satellite broadcast industry product also makes use of much of the foundation technologies resident in the medical product, however, given the differences in the two markets that the products service, the satellite broadcast product is much more security and customer service oriented, offering the satellite broadcast company the ability to better configure their services for the subscriber. This product also allows the office bound sales agent to be able to concentrate on the sale of additional services to subscribers.

Our technologies and products for the satellite broadcast marketplace are designed to allow the on-site technician the ability to configure a subscriber system in seconds while also allowing the satellite broadcast company to control the on-site technician, a person who is typically not employed by the satellite broadcast concern, thereby cutting down on fraud and waste inherent to their business models. Our product employs their proprietary technologies coupled with the latest off-the-shelf wireless communication devices into their patent pending PDA communication networking technologies, allowing us to be the first to offer complex and real-time point of sale applications through a wireless (PDA) appliance that communicates with a satellite.

Our PDA software operates on any Microsoft Windows CE Pocket PC based handheld device, either in a wireless or wired mode. The local host for our PDA devices is a Windows (9X, NT, XP or later) based PC, which, in turn, permits one to eight of the aforementioned PDAs to be linked to either a medical network or hotel/motel wide area network, or help-desk network, and allows each PDA to become a uniquely identified mobile node on that network, independent of PC linkage, thereby, assisting the professional, whether he be a doctor, hotel owner, hotel guest or satellite broadcast technician.

Our PDA software provides rules based software capabilities and the ability to receive order fulfillment information for over 5,000 users simultaneously, which represents approximately 3 years of user encounters in a typical network setting, and allows the user to access financial and technical data and/or rules, coverages and policies.

Critical Accounting Policy and Estimates

Our Management's Discussion and Analysis or Plan of Operation section discusses our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

On an on-going basis, management evaluates its estimates and judgments, including those related to accrued expenses, financing operations, and contingencies and litigation. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. The most significant accounting estimates inherent in the preparation of our financial statements include estimates as to the appropriate carrying value of certain assets and liabilities which are not readily apparent from other sources. These accounting policies are described at relevant sections in this discussion and analysis and in the notes to the financial statements included in this Quarterly Report on Form 10-QSB for the period ended March 31, 2004.

11

#

Results of Operations

The following is an itemization of our results of operations for the three-month period ended March 31, 2004 in comparison to our results of operations for the period ended March 31, 2003.

REVENUES. Total revenues for the three-month period ended March 31, 2004 were \$55,392 as compared to total revenues of \$500 for the three-month period ended March 31, 2003. As a development stage company we have yet to generate significant revenues and we cannot guarantee with certainty when we will begin to generate significant revenues. Our future revenues will be reliant on the acceptance of our software systems, communication tools and suite of software applications.

GENERAL AND ADMINISTRATIVE EXPENSES. General and Administrative expenses relate to the operation and leasing costs of our corporate office. General and administrative expenses for the three-month period ended March 31, 2004 were \$59,082 compared to \$38,878 for the three-month period ended March 31, 2003. We anticipate

19

purchases of equipment and other office related supplies in conjunction with the generation of revenues from business operations.

PAYROLL EXPENSE. Payroll expense consists primarily of management and employee salaries. Total payroll expense for the three-month period ended March 31, 2004 was \$80,540. The Company incurred payroll expense for the three-month period ended March 31, 2003 of \$58,881.

PROFESSIONAL FEES. Professional fees include fees paid to our accountants and attorneys. Our professional fees were \$238,530 for the three-month period ended March 31, 2004. The Company incurred professional fees for the three-month period ended March 31, 2003 of \$30,570.

STOCK-BASED COMPENSATION. Stock-based compensation expense represents stock paid to our executive officers in lieu of cash. Stock-based compensation expense for the three-month period ended March 31, 2004 was \$485,119 compared to \$231,000 for the three-month period ended March 31, 2003. Stock-based compensation is used to preserve cash for business operations.

SOFTWARE DEVELOPMENT. Software Development expense increased in the first quarter of 2004 as management focused on integrating our software systems; communication tools and suite of software applications with those of our partners. Software Development expense for the three-month period ended March 31, 2004 was \$69,641. The Company incurred software development expense for the three-month period ended March 31, 2003 of \$1,000.

IMPAIRMENT LOSS ON OPERATING ASSETS. Impairment loss on operating assets expense for the three-month period ended March 31, 2004 was \$111,473. The Company incurred no such expense for the three-month period ended March 31, 2003.

DEPRECIATION. Depreciation was \$33,315 for the three-month period ended March 31, 2004 compared to \$36,377 for the three-month period ended March 31, 2003. This represents depreciation on the assets of the Company.

TOTAL OPERATING EXPENSES. Total operating expenses for the three-month period ended March 31, 2004 were \$1,077,700 compared to \$396,706 for the three-month period ended March 31, 2003. The increase in total operating expenses was mainly a result of an increase in professional fees, stock-based compensation, software development expense and the impairment loss on operating assets.

LOSS ON DEBT SETTLEMENT. In the three-month period ended March 31, 2004 the Company retired past debts valued at \$317,136. The Company incurred no such expense for the three-month period ended March 31, 2003. We

will continue to retire our outstanding debt as revenue allows.

12

#

INTEREST INCOME. The Company did not record any interest income for the three-month period ended March 31, 2004 compared to \$560 for the three-month period ended March 31, 2003.

FINANCING COSTS. In the three-month period ended March 31, 2004 the Company incurred financing costs of \$408,255. The Company incurred no such expense for the three-month period ended March 31, 2003.

INTEREST EXPENSE. Interest expense was \$9,051 for the three-month period ended March 31, 2004 compared to \$10,823 for the three-month period ended March 31, 2003.

NET LOSS. Our loss from operations was \$1,756,750 for the three-month period ended March 31, 2004 compared to \$406,469 for the three-month period ended March 31, 2003. It should be expected that we will continue to incur losses from operations until such time as revenues can be generated to cover such costs.

Future Business

The elements of our future business strategy include: expanding geographically into key markets through a combination of opening new offices and developing relationships with clients to generate demand for our services,

21

particularly for our hotel/motel and satellite products; recruiting qualified, medical software and other technical personnel to perform technical, implementation and support duties as contracts are entered into, although there can be no assurance that any such contracts will be secured; and pursuing entry into new markets complementary to our proposed operations. Future operations are dependent upon our ability to implement our business and marketing strategies and to establish relationships and contracts with health insurers and HMOs to provide our e-healthcare products and services, and to establish relationships with large hotel and/or motel chains for our hotel/motel products.

Liquidity and Capital Resources

Management believes our cash and equivalents on hand of \$785,247 will be sufficient to fund ongoing fiscal 2003 and 2004 operations and provide for our working capital needs given we have positive working capital of \$687,845.

However, we may from time to time need to raise additional funds through capital markets. Our accountant has issued a note concerning our ability to continue as a going concern. As we are still considered to be in the development stage, our prospects of continuing as a going concern are contingent upon our ability to raise additional capital and to achieve and maintain profitable operations. Revenues generated over and above expenses will be used for further development of our services, to provide financing for marketing and promotion, to secure additional customers, equipment and personnel, and for other working capital purposes.

To date, we have financed our cash flow requirements through revenues generated from operations, an issuance of common stock and through the issuance of notes. During the three months ended March 31, 2004, we received a loan totaling \$700,000 at an interest rate of 12% maturing September 25, 2004.

During our normal course of business, we will experience net negative cash flows from operations, pending receipt of revenues. Further, we will be obtaining financing to fund operations through additional common stock offerings, note issuances and bank borrowings, to the extent available, or to obtain additional financing to the extent necessary to augment our available cash on hand.

All investor inquiries should be directed via mail to Mr. Keith Berman, Secretary, CareDecision Corporation, 2660 Townsgate Road, Suite 300, Westlake Village, California 91361.

Item 3. Controls and Procedures

(a) Evaluation of disclosure controls and procedures. We maintain controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Based upon their evaluation of those controls and procedures performed as of March 31, 2004, our chief executive officer and the principal financial officer concluded that our disclosure controls and procedures were adequate.

(b) Changes in internal controls. There were no significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation of those controls by the chief executive officer and principal financial officer.

Item 6(b) Reports Filed on Form 8-K

For the quarter ended March 31, 2004 the Company filed the following reports on Form 8-K with the Securities and Exchange Commission:

On January 16, 2004, the Company announced, under Item 9. Regulation FD Disclosure that we are in discussions with a media and commercial satellite broadcast concern for a series of revenue-generating agreements covering the product sale, marketing, service and additional projects based on our SateLink Satellite Wi-Fi technologies.

On January 30, 2004, the Company announced, under Item 9. Regulation FD Disclosure that we have received several unsolicited offers for the acquisition of, or rights to, our e-health technologies, software applications and other medically related intellectual properties that are not part of the Company's current core businesses.

On February 6, 2004, the Company announced, under Item 9. Regulation FD Disclosure that we have entered into a Strategic Partnership (Partnership) with DataFuzion Inc. (Fuzion). Fuzion is a Denver, CO-based medical data warehouse and data mining software application and services provider, and is also a participant in the field of medical business intelligence and decision-making tools. This Partnership will provide the Company with a substantial equity stake in Fuzion and grant Fuzion access to the Company's PDA based and Wi-Fi medical technologies.

#

On March 3, 2004, the Company announced, under Item 9. Regulation FD Disclosure that we have entered into an agreement for the placement of our proprietary PDA- based ResidenceWare Wi-Fi e-business systems to hotels located in the New York City metro region. This agreement will involve ResidenceWare implementations at individual member hotels chains such as Days Inn, Quality Inn, Comfort Inn and Super 8.

On March 12, 2004, the Company announced, under Item 9. Regulation FD Disclosure that our recent partnership and equity stake with DataFuzion, Inc. ("Fuzion") is being expanded to include an acquisition that Fuzion is making prior to its initial registration filing. The Company also announced that progress has been made with our proposed satellite media partner. An offer has been extended for an exclusive negotiation period to close a series of agreements, including a product development contract and a recurring revenue service arrangement. The Company is also in the final stages of negotiating a strategic partnership, investment agreement and a DataFuzion-like option agreement with a lodging e-business dotcom.

On March 15, 2004, the Company announced, under Item 9. Regulation FD Disclosure that we will be featured on an episode of the 30-minute financial program "Let's Talk Stock" (LTS), shown on CNBC TV. The episode highlighting CareDecision is expected to air in May.
