## PART I

Our market share data is based on information provided by The NPD Group, Inc. ("NPD"). Unless otherwise indicated, references to market share in this Annual Report on Form 10-K are expressed as a percentage of total children's retail sales for a segment of the market. As the Company defines it, the baby and young children's apparel market includes apparel and related products for ages zero to seven.

The NPD market share data presented is based on NPD's definition of the baby and playclothes categories, which are different from the Company's definitions of these categories. The data presented is based upon The NPD Group/Consumer Tracking Service for Children's Apparel in the United States ("U.S.") and represents the twelve month period ending December 31, 2015.

Unless the context indicates otherwise, in this filing on Form 10-K, "Carter's," the "Company," "we," "us," "its," and "our" refers to Carter's, Inc. and its wholly owned subsidiaries.

Our fiscal year ends on the Saturday, in December or January nearest the last day of December, resulting in an additional week of results every five or six years. Fiscal 2015, which ended on January 2, 2016, contained 52 weeks. Fiscal 2014, which ended on January 3, 2015, contained 53 weeks. Fiscal 2013, which ended on December 28, 2013, contained 52 weeks.

This Annual Report on Form 10-K contains certain forward-looking statements regarding future circumstances. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Forward-looking statements can also be identified by words such as "anticipates," "believes," "estimates," "expects," "intends," "plans," "predicts," and similar terms. These forward-looking statements are based upon current expectations and assumptions of the Company and are subject to various risks and uncertainties that could cause actual results to differ materially from those contemplated in such forward-looking statements including, but not limited to, those discussed in the subsection entitled "Risk Factors" under Part I, Item 1A of this Annual Report on Form 10-K. Actual results, events, and performance may differ significantly from the results discussed in the forward-looking statements. Readers of this Annual Report on Form 10-K are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Except for any ongoing obligations to disclose material information as required by federal securities laws, the Company does not have any intention or obligation to update forward-looking statements after the filing of this Annual Report on Form 10-K. The inclusion of any statement in this Annual Report on Form 10-K does not constitute an admission by the Company or any other person that the events or circumstances described in such statement are material.

## ITEM 1. BUSINESS

### GENERAL

We are the largest branded marketer in the U.S. and Canada of apparel exclusively for babies and young children. We own two of the most highly recognized and most trusted brand names in the children's apparel industry, Carter's and OshKosh B'gosh (or "OshKosh"). Established in 1865, our Carter's brand is recognized and trusted by consumers for high-quality apparel for children sizes newborn to eight. Established in 1895, OshKosh is a well-known brand, trusted by consumers for apparel for children sizes newborn to 12, with a focus on playclothes for toddlers and young children. Given each brand's product category emphasis and brand aesthetic, we believe they provide a complementary product offering. We have extensive experience in the young children's apparel market and focus on delivering products that satisfy our consumers' needs. Our strategy is to market high-quality, essential core products at prices that deliver an attractive value proposition for consumers.

We believe each of our brands is uniquely positioned in the marketplace. In the \$20.5 billion baby and young children's apparel market ages zero to seven in the U.S., our Carter's brand has the #1 position with a 14.6% market share and our OshKosh brand has a 2.3% market share. We offer multiple product categories, including baby, sleepwear, playclothes, and related accessories. Our multi-channel business model enables us to reach a broad range of consumers across various socio-economic groups and geographic regions.

We distribute our products through multiple channels in the U.S. children's apparel market, which, as of January 2, 2016, included approximately 17,400 wholesale locations (including department stores, national chain stores, specialty stores and discount retailers), 982 Company-operated stores, and our websites. As of January 2, 2016, we operated 594 Carter's and 241 OshKosh stores in the U.S., and our products are sold through 147 Company-operated stores in Canada in addition to our international wholesale, licensing, and online channels.

The Company is a Delaware corporation. The Company and its predecessors have been doing business since 1865. The Company's principal executive offices are located in the U.S. at Phipps Tower, 3438 Peachtree Road NE, Suite 1800, Atlanta, Georgia 30326, and our telephone number is (678) 791-1000.

## OUR BRANDS, PRODUCTS, AND DISTRIBUTION CHANNELS

### CARTER'S BRANDS – United States

Under our Carter's brand, we design, source, and market a broad array of products, primarily for sizes newborn to eight. Our Carter's brand is sold in department stores, national chains, specialty stores, off-price sales channels, through our Carter's retail stores, and online at [www.carters.com](http://www.carters.com). Additionally, we sell our Child of Mine brand at Walmart and our Just One You and Precious Firsts brands at Target. In fiscal 2015, we sold over 342 million units of Carter's, Child of Mine, Just One You, and Precious Firsts products in the U.S., an increase of approximately 4.4% from fiscal 2014. Our strategy is to drive sales growth through our focus on essential, high-volume, core apparel products for babies and young children. Such products include bodysuits, pajamas, blanket sleepers, gowns, bibs, receiving blankets, and playwear. We believe that our core baby and sleepwear products are essential consumer staples and less dependent on changes in fashion trends.

We have cross-functional product teams focused on the development of our Carter's baby, sleepwear, and playclothes products. These teams are skilled in identifying and developing high-volume, core products. Each team includes members from merchandising, design, sourcing, product development, forecasting, and supply chain logistics. These teams follow a disciplined approach to fabric usage, color rationalization, and productivity and are supported by a dedicated art department and state-of-the-art design systems. We also license our brand names to other companies to create a broad collection of lifestyle products, including bedding, hosiery, shoes, room décor, furniture, and toys. The licensing team directs the use of our designs, art, and selling strategies to all licensees.

We believe this disciplined approach to core product design results in compelling product offerings to consumers, reduces our exposure to short-term fashion trends, and supports efficient operations. We conduct consumer research as part of our product development process and engage in product testing in our own stores.

### CARTER'S BRAND POSITIONING – United States

Our strategy is to drive our brand image as the leader in baby and young children's apparel and to consistently provide high-quality products at a great value to consumers. We employ a disciplined merchandising strategy that identifies and focuses on core products. We believe that we have strengthened our brand image with the consumer by differentiating our core products through fabric improvements, new artistic applications, and new packaging and presentation strategies. We also attempt to differentiate our products through store-in-store fixturing, branding and signage packages, and advertising. We have invested in display fixtures for our major wholesale customers that more clearly present our core products on their floors to enhance brand and product presentation. We also strive to provide our wholesale customers with a consistent, high-level of service, including delivering and replenishing products on time to fulfill customer needs. Our retail stores and websites focus on the customer experience through store and website design, visual enhancements, clear product presentation, and experienced customer service.

### CARTER'S PRODUCTS – United States

#### Baby

Carter's brand baby products include bodysuits, pants, dresses, three-piece sets, receiving blankets, layette gowns, bibs, caps, and booties both as single units and multi-piece sets. In fiscal 2015, we generated approximately \$1.05

billion in net sales of these products in the U.S., representing 34.9% of our consolidated net sales.

Our Carter's brand is the leading brand in the baby category in the U.S. In fiscal 2015, in department stores, national chains, outlet, specialty stores, and off-price sales channels, our aggregate Carter's brand market share in the U.S. was approximately 25.2% for baby ages zero to two, which represents more than five times the market share of the next largest brand. We sell a complete range of baby products for newborns, primarily made of cotton. We attribute our leading market position to our brand strength, distinctive print designs, artistic applications, reputation for quality, and ability to manage our dedicated floor space for our wholesale customers. We tier our products through marketing programs targeted toward experienced mothers, first-time

2

---

mothers, and gift-givers. Our Carter's Little Layette product line, the largest component of our baby business, provides parents with essential core products and accessories, including value-focused multi-piece sets. Our Little Collections product line consists of coordinated baby programs designed for first-time mothers and gift-givers.

#### Playclothes

Carter's brand playclothes products include knit and woven cotton apparel for everyday use in sizes newborn to eight. In fiscal 2015, we generated \$705.7 million in net sales of these products in the U.S., representing 23.4% of our consolidated net sales. We continue to focus on building our Carter's brand in the playclothes market by developing a base of essential, high-volume products that utilize original print designs and innovative artistic applications. Our aggregate fiscal 2015 Carter's brand playclothes market share in the U.S. was approximately 13.1% in the \$13.8 billion department store, national chain, outlet, specialty store, and off-price sales channels, which represents two times the market share of the next largest brand.

#### Sleepwear

Carter's brand sleepwear products include pajamas and blanket sleepers primarily in sizes 12 months to eight. In fiscal 2015, we generated \$331.7 million in net sales of these products in the U.S., representing 11.0% of our consolidated net sales. Our Carter's brand is the leading brand of sleepwear for babies and young children within the department store, national chain, outlet, specialty store, and off-price sales channels in the U.S. In fiscal 2015, in these channels, our Carter's brand market share was approximately 30.6%, which represents more than five times the market share of the next largest brand. As with our baby product line, we differentiate our sleepwear products by offering high-volume, high-quality core products with distinctive print designs and artistic applications.

#### Other Products

Our other product offerings include bedding, outerwear, swimwear, shoes, socks, diaper bags, gift sets, toys, and hair accessories. In fiscal 2015, we generated \$169.2 million in net sales of these other products in our Carter's retail stores and online, representing 5.6% of our consolidated net sales.

#### Royalty Income

We expand the distribution of our Carter's, Child of Mine, Just One You, and Precious Firsts product offerings by licensing these brands to 12 licensees in the U.S. as of January 2, 2016. These licensing partners develop and sell products through our multiple sales channels, while leveraging our brand strength, customer relationships, and designs. Licensed products provide our customers and consumers with a range of lifestyle products that complement and expand upon our baby and young children's apparel offerings. Our license agreements require strict adherence to our quality and compliance standards and provide for a multi-step product approval process. We work in conjunction with our licensing partners in the development of their products to ensure that they fit within our brand vision of high-quality, core products at attractive values to the consumer. In addition, we work closely with our wholesale customers and our licensees to gain dedicated floor space for licensed product categories. In fiscal 2015, our Carter's brand generated \$26.0 million in domestic royalty income.

#### OSHKOSH BRANDS – United States

Under our OshKosh brand, we design, source, and market a broad array of young children's apparel, primarily for children in sizes newborn to 12. Our OshKosh brand is currently sold in our OshKosh retail stores, department stores, national chains, specialty stores, through off-price sales channels, and online at [www.oshkoshbgosh.com](http://www.oshkoshbgosh.com) and [www.oshkosh.com](http://www.oshkosh.com). In fiscal 2015, we sold 49.2 million units of OshKosh products in the U.S. through our retail stores, to our wholesale customers, and online, an increase of approximately 4.8% from fiscal 2014. We also have a

licensing agreement with Target Corporation ("Target") through which Target sells products under our Genuine Kids from OshKosh brand.

OSHKOSH BRAND POSITIONING – United States

We believe our OshKosh brand provides for high-quality playclothes in sizes newborn to 12. Our core OshKosh brand products include denim, overalls, t-shirts, fleece, and other playclothes. Our OshKosh brand is generally positioned towards an older segment (young children, sizes 2 to 7) and at slightly higher average prices than our Carter's brand. We believe our OshKosh brand has significant brand name recognition, which consumers associate with high-quality, durable, and authentic playclothes for young children.

## OSHKOSH PRODUCTS – United States

### Playclothes

Our OshKosh brand is best known for its playclothes products. OshKosh brand playclothes products include denim apparel products with multiple wash treatments and coordinating garments, overalls, woven bottoms, knit tops, bodysuits, and playclothes products for everyday use in sizes newborn to 12. In fiscal 2015, we generated \$342.4 million in net sales of OshKosh brand playclothes products in the U.S., representing 11.4% of our consolidated net sales. Our aggregate fiscal 2015 OshKosh brand playclothes market share in the U.S. was approximately 2.6% of the \$13.8 billion young children's playclothes market.

We believe our OshKosh brand represents a significant opportunity for us to increase our market share in the playclothes category as the young children's playclothes market in the U.S. is highly fragmented. For fiscal 2015, this market was nearly four times the size of the baby and sleepwear markets combined. We plan to grow this business by strengthening our product offerings, improving product value, reducing product complexity, and leveraging our strong customer relationships and global supply chain expertise.

### Other Products

The remainder of our OshKosh brand product offerings include baby, sleepwear, outerwear, shoes, hosiery, and accessories. In fiscal 2015, we generated \$86.3 million in net sales of these other products in our OshKosh retail stores and online, which represented 2.9% of our consolidated net sales.

### Royalty Income

We partner with a number of domestic licensees to extend the reach of our OshKosh brand. We currently have eight domestic licensees selling apparel and accessories. Our largest licensing agreement is with Target. All Genuine Kids from OshKosh products sold by Target are sold pursuant to this licensing agreement. Our licensed products provide our customers and consumers with a range of OshKosh products including outerwear, underwear, swimwear, socks, shoes, and accessories. In fiscal 2015, we earned approximately \$13.2 million in domestic royalty income from our OshKosh brands.

## INTERNATIONAL

Our international segment includes Company-operated retail stores, wholesale, and online operations in addition to royalty income from our international licensees. In fiscal 2015, our international sales were \$326.2 million, representing 10.8% of our consolidated net sales. As of January 2, 2016, we operated 147 co-branded Carter's and OshKosh retail stores in Canada. Additionally, we reach consumers in approximately 60 countries through wholesale and licensing relationships and in over 100 countries through our websites.

As of January 2, 2016, we partnered with 33 licensees to sell the Carter's and OshKosh brands internationally. In fiscal 2015, our OshKosh international licensees generated retail sales of \$43.1 million, on which we earned approximately \$3.0 million in royalty income. In fiscal 2015, our international licensees generated Carter's brand retail sales of \$31.6 million, on which we earned \$1.8 million in royalty income.

## SEGMENTS

Financial and geographical information for our five reportable segments, Carter's Retail, Carter's Wholesale, OshKosh Retail, OshKosh Wholesale, and International, is contained in Item 8 - "Financial Statements and Supplementary

Data," under Note 13 - "Segment Information" to the accompanying audited consolidated financial statements.

#### SALES, MARKETING AND DISTRIBUTION

As described above, we sell our products through the wholesale channel, through our retail stores in the U.S. and Canada, and online.

Our Carter's brand wholesale customers include major retailers, such as, in alphabetical order, Costco, JCPenney, Kohl's, Macy's, Sam's Club, Target, Toys "R" Us, and Walmart. We collaboratively plan store assortments with our wholesale customers. We intend to drive continued growth with our wholesale customers through our focus on managing our key accounts' business through replenishment, product mix, brand presentation, marketing, and frequent meetings with the senior management of our major wholesale customers.

Our OshKosh brand wholesale customers include major retailers, such as, in alphabetical order, Baby's "R" Us, Belk, Bon-Ton, Costco, Fred Meyer, JCPenney, Kohl's, Sears, Stage Stores, and Toys "R" Us. We continue to work with our customers to establish seasonal plans. The majority of our OshKosh brand playclothes products will be planned and ordered seasonally.

As of January 2, 2016, we operated 594 Carter's retail stores in the U.S. These stores carry a complete assortment of baby and young children's apparel, accessories, and gift items. Our stores average approximately 4,400 square feet per location and are distinguished by an easy, consumer-friendly shopping environment. Our brand stores are generally located in high-traffic strip shopping centers in or near major cities. We believe our brand strength and our assortment of core products have made our stores a destination location within many outlet and strip centers. Our outlet stores are generally located within 20 to 30 minutes of densely-populated areas.

As of January 2, 2016, we operated 241 OshKosh retail stores in the U.S. These stores carry a wide assortment of young children's apparel, accessories, and gift items, and average approximately 4,000 square feet per location.

We operate "side-by-side" locations wherein adjacent retail stores for our Carter's and OshKosh brands are connected, allowing customers to shop for both brands in a single location. Each "side-by-side" location is counted as one Carter's retail store and one OshKosh retail store. As of January 2, 2016, the U.S. store count data presented in the two preceding paragraphs for Carter's and OshKosh included 97 "side-by-side" locations.

As of January 2, 2016, we operated 147 co-branded retail stores in Canada. These stores average approximately 5,100 square feet per location, slightly larger than our U.S. based stores, and offer a similar product assortment, localized for climate differences.

#### Store Expansion

We use a real estate selection process whereby we assess all new locations based on demographic factors, retail adjacencies, and population density.

#### Marketing

Our marketing is focused on connecting with millennials. As such, we continue to strengthen and evolve our digital programs to put our brands in front of the consumer in new and innovative ways. These digital programs, along with our core direct marketing, are all focused on driving a deeper relationship with the consumer across all touch points. Our goal is for Carter's and OshKosh to be the preferred apparel brands in the young children's market, driving loyalty through increased purchase frequency.

In addition, during fiscal 2015, we implemented our Rewarding Moments® rewards program to drive customer traffic, sales, and brand loyalty.

#### Distribution

Domestically, we operate two distribution centers in Georgia, including our 1,062,000 square feet state-of-the-art distribution center in Braselton, Georgia. We also utilize a distribution center on the west coast. These three U.S.

distribution centers supply products to our domestic wholesale customers and to our direct-to-consumer ("DTC") retail operations in the U.S.

Internationally, we operate and utilize distribution centers in Canada and Asia to support our international wholesale customers and Canadian DTC retail operations.

#### GLOBAL SOURCING NETWORK

5

---

We source products from an international network of suppliers, primarily from Asia. One sourcing agent currently manages approximately 60% of our inventory purchases. Our sourcing network consists of over 150 vendors located in 16 countries.

We believe that our sourcing arrangements are sufficient to meet our current operating requirements and provide capacity for growth.

We also have direct sourcing operations in Hong Kong and we intend to increase our direct sourcing mix over time in an effort to improve the competitiveness and performance of our supply chain.

## COMPETITION

The baby and young children's apparel market is highly competitive. Competition is generally based upon product quality, brand name recognition, price, selection, service, and convenience. Both branded and private label manufacturers compete in the baby and young children's apparel market. Our primary competitors in the wholesale channel include private label product offerings, and, in alphabetical order, Disney and Gerber. Our primary competitors in the retail channel include, in alphabetical order, Disney, Gap, Gymboree, Old Navy, and The Children's Place. Most retailers, including our wholesale customers, have significant private label product offerings that compete with our products. Because of the highly-fragmented nature of the industry, we also compete with many small manufacturers and retailers. We believe that the strength of our Carter's, OshKosh, and related brand names, combined with our breadth of product offerings and operational expertise, position us well against these competitors.

## SEASONALITY

We experience seasonal fluctuations in our sales and profitability due to the timing of certain holidays and key retail shopping periods, which generally have resulted in lower sales and gross profit in the first half of our fiscal year versus the second half of the year. Accordingly, our results of operations during the first half of the year may not be indicative of the results we expect for the full fiscal year.

## TRADEMARKS AND COPYRIGHTS

We own many trademarks and copyrights, including Carter's®, OshKosh®, OshKosh B'gosh®, Genuine Kids®, Child of Mine®, Just One You®, Precious Firsts®, Little Collections®, Little Layette™, Rewarding Moments®, and Count on Carter's®, many of which are registered in the U.S. and in more than 140 countries and territories.

## EMPLOYEES

As of January 2, 2016, we had approximately 16,800 employees globally. We have no unionized employees and believe that our labor relations are good.

## AVAILABLE INFORMATION

Our primary internet address is [www.carters.com](http://www.carters.com). The information contained on our website is not included as part of, or incorporated by reference into, this Annual Report on Form 10-K or any other reports we file with or furnish to the SEC. On our website, we make available, free of charge, our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements, director and officer reports on Forms 3, 4, and 5, and any amendments to these reports, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission ("SEC"). Our SEC reports can be accessed through the investor relations section of our website. We also make available on our website the Carter's Code of Ethics, our Corporate Governance Principles, and the charters for the Compensation, Audit, and Nominating and Corporate Governance

Committees of the Board of Directors. Our SEC filings are also available for reading and copying at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site, [www.sec.gov](http://www.sec.gov), containing reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

## ITEM 1A. RISK FACTORS

You should carefully consider each of the following risk factors as well as the other information contained in this Annual Report on Form 10-K and our other filings with the SEC in evaluating our business. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently consider immaterial may also impact our business operations. If any of the following risks actually occur, our operating results may be affected.

The loss of one or more of our major wholesale customers could result in a material loss of revenues.

We derived approximately 25% of our consolidated net sales from our top five wholesale customers for the fiscal year ended January 2, 2016. We do not enter into long-term sales contracts with our major wholesale customers, relying instead on product performance, long-standing relationships, and on our position in the marketplace. As a result, we face the risk that one or more of these or other customers may significantly decrease their business with us or terminate their relationship with us as a result of competitive forces, consolidation, reorganization, financial difficulties, including bankruptcy or insolvency, or other reasons, which could result in significant levels of excess inventory, a material decrease in our sales, or material impact on our operating results.

Financial difficulties for our major customers or licensees could have a significant impact on us.

A large percentage of our gross accounts receivables are typically from our largest wholesale customers. For example, 79% of our gross accounts receivable at January 2, 2016 were from our ten largest wholesale customers, with five of these customers having individual receivable balances in excess of 10% of our total accounts receivable. Our reserves for doubtful accounts for estimated losses resulting from the inability of our customers to make payments may prove not to be sufficient if any one or more of our customers are unable to meet outstanding obligations to us, which could materially adversely affect our operating results. If the financial condition or credit position of one or more of our customers or licensees were to deteriorate, or such customer or licensee fails, or is unable to pay the amounts owed to us in a timely manner, this could have a significant adverse impact on our business and results of operations.

The acceptance of our products in the marketplace is affected by consumers' tastes and preferences, along with fashion trends.

We believe that continued success depends on our ability to provide a compelling value proposition for our consumers in our distribution channels. There can be no assurance that the demand for our products will not decline, or that we will be able to successfully and timely evaluate and adapt our products to changes in consumer tastes and preferences or fashion trends. If demand for our products declines, promotional pricing may be required to move seasonal merchandise, and our gross margins and results of operations could be adversely affected.

The value of our brands, and our sales, could be diminished if we are associated with negative publicity, including through actions by our vendors, independent manufacturers and licensees, over whom we have limited control.

Although we maintain policies with our vendors, independent manufacturers and licensees that promote ethical business practices and our employees, agents, and third-party compliance auditors periodically visit and monitor the operations of these entities, we do not control our vendors, independent manufacturers, or licensees, or their labor practices. A violation of our vendor policies, licensee agreements, health and safety standards, labor laws, or other policies or laws by these vendors, independent manufacturers, or licensees could damage the image and reputation of our brands and could subject us to liability. As a result, negative publicity regarding us or our brands or products, including licensed products, could adversely affect our reputation and sales. Further, while we take steps to ensure the reputation of our brands is maintained through license and vendor agreements, there can be no guarantee that our

brand image will not be negatively impacted through its association with products or actions of our licensees or vendors.

Our failure to protect our intellectual property rights could diminish the value of our brand, weaken our competitive position, and adversely affect our results.

We currently rely on a combination of trademark, unfair competition, and copyright laws, as well as licensing and vendor arrangements, to establish and protect our intellectual property rights. The steps taken by us or by our licensees and vendors to

7

---

protect our proprietary rights may not be adequate to prevent either the counterfeit production of our products or the infringement of our trademarks or proprietary rights by others. In addition, intellectual property protection may be unavailable or limited in some foreign countries where laws or law enforcement practices may not protect our proprietary rights and where third parties may have rights to conflicting marks, and it may be more difficult for us to successfully challenge the use of our proprietary rights by other parties in those countries. If we fail to protect and maintain our intellectual property rights, the value of our brands could be diminished and our competitive position may suffer. Further, third parties may assert intellectual property claims against us, particularly as we expand our business geographically, and any such claim could be expensive and time consuming to defend, regardless of its merit. Successful infringement claims against us could result in significant monetary liability or prevent us from selling some of our products, which could have an adverse effect on our results of operations.

We are subject to various claims and pending or threatened lawsuits, including as a result of investigations or other proceedings related to previously disclosed investigations, and as a result, may incur substantial costs that adversely affect our business, financial condition, and results of operations.

As previously reported, in 2009 the SEC and the U.S. Attorney's Office began conducting investigations, with which the Company cooperated, related to customer margin support provided by the Company, including undisclosed margin support commitments and related matters. In December 2010, the Company and the SEC entered into a non-prosecution agreement pursuant to which the SEC agreed not to charge the Company with any violations of federal securities laws, commence any enforcement action against the Company, or require the Company to pay any financial penalties in connection with the SEC investigation of customer margin support provided by the Company, conditioned upon the Company's continued cooperation with the SEC's investigation and with any related proceedings. The Company has incurred, and may continue to incur, substantial expenses for legal services due to the SEC and U.S. Attorney's Office investigations and any related proceedings. These matters may continue to divert management's time and attention away from operations. The Company also expects to bear additional costs pursuant to its advancement and indemnification obligations to directors and officers under our organizational documents in connection with proceedings related to these matters. Our insurance does not provide coverage to offset all of the costs incurred in connection with these proceedings.

In addition, we are subject to various other claims and pending or threatened lawsuits in the course of our business. We are impacted by trends in litigation, including class action litigation brought under various consumer protection, employment, and privacy and information security laws. In addition, litigation risks related to claims that technologies we use infringe intellectual property rights of third parties have been amplified by the increase in third parties whose primary business is to assert such claims. Reserves are established based on our best estimates of our potential liability. However, we cannot accurately predict the ultimate outcome of any such proceedings due to the inherent uncertainties of litigation. Regardless of the outcome or whether the claims are meritorious, legal and regulatory proceedings may require that management devote substantial time and expense to defend the Company. In the event we are required or determine to pay amounts in connection with any such lawsuits, such amounts could exceed any applicable insurance coverage or contractual rights available to us. As a result, such lawsuits could be significant and have a material adverse impact on our business, financial condition, and results of operations.

Our and our vendors' systems containing personal information and payment card data of our retail store and eCommerce customers, employees and other third parties, could be breached, which could subject us to adverse publicity, costly government enforcement actions or private litigation, and expenses.

We rely on the security of our networks, databases, systems and processes and, in certain circumstances, those of third parties, such as vendors, to protect our proprietary information and information about our customers, employees, and vendors. Criminals are constantly devising schemes to circumvent information technology security safeguards and other retailers have recently suffered serious data security breaches. If unauthorized parties gain access to our networks or databases, or those of our vendors, they may be able to steal, publish, delete, or modify our private and

sensitive third-party information including credit card information and personal identification information. In addition, employees may intentionally or inadvertently cause data or security breaches that result in unauthorized release of personal or confidential information. In such circumstances, we could be held liable to our customers, other parties, or employees as well as be subject to regulatory or other actions for breaching privacy law or failing to adequately protect such information. This could result in costly investigations and litigation exceeding applicable insurance coverage or contractual rights available to us, civil or criminal penalties, operational changes or other response measures, loss of consumer confidence in our security measures, and negative publicity that could adversely affect our financial condition, results of operations, and reputation. Further, if we are unable to comply with the security standards, established by banks and the payment card industry, we may be subject to fines, restrictions, and expulsion from card acceptance programs, which could adversely affect our retail operations.

Our profitability may decline as a result of increasing pressure on margins, including deflationary pressures on our selling price and increases in production costs.

The apparel industry is subject to pricing pressure caused by many factors, including intense competition, the promotional retail environment and changes in consumer demand. If these factors cause us to reduce our sales prices and we fail to sufficiently reduce our product costs or operating expenses, our profitability could decline. This could have a material adverse effect on our results of operations, liquidity, and financial condition. In addition, our product costs are subject to fluctuations in costs, such as manufacturing, cotton, labor, fuel, and transportation.

Our business is sensitive to overall levels of consumer spending, particularly in the young children apparel segment.

Consumers' demand for young children's apparel, specifically brand name apparel products, is impacted by the overall level of consumer spending. Discretionary consumer spending is impacted by a number of factors such as the overall economy, employment levels, weather, gasoline and utility costs, business conditions, foreign currency exchange rates, availability of consumer credit, tax rates, interest rates, levels of consumer indebtedness, and overall levels of consumer confidence. Reductions, or lower-than-expected growth, in the level of discretionary or overall consumer spending may have a material adverse effect on our sales and results of operations.

Our revenues, product costs and other expenses are subject to foreign economic and currency risks due to our operations outside of the U.S.

We have operations in Canada and Asia and our vendors, independent manufacturers, and licensees are located around the world. The value of the U.S. dollar against other foreign currencies has seen significant volatility recently. While our business is primarily conducted in U.S. dollars, we source substantially all of our production from Asia, and we generate significant revenues in Canada. Cost increases caused by currency exchange rate fluctuations could make our products less competitive or have a material adverse effect on our profitability. Currency exchange rate fluctuations could also disrupt the business of our independent manufacturers that produce our products by making their purchases of raw materials or products more expensive and more difficult to finance. Additionally, fluctuations in exchange rates impact the amount of our reported sales and expenses, which could have a material adverse effect on our financial position, results of operations, and cash flows.

We source substantially all of our products through foreign production arrangements. Our dependence on foreign supply sources are subject to risks associated with global sourcing and manufacturing which could result in disruptions to our operations.

We source substantially all of our products through a network of vendors primarily in Asia, principally coordinated by our sourcing agent and directly through our Hong Kong sourcing office. Our foreign supply chain could be negatively affected due to a number of factors, including:

- financial instability, including bankruptcy or insolvency, of one or more of our major vendors;
- political instability or other international events resulting in the disruption of trade in foreign countries from which we source our products;
- interruptions in the supply of raw materials, including cotton, fabric, and trim items;
- increases in the cost of labor in our sourcing locations;
- the imposition of new regulations relating to imports, duties, taxes, and other charges on imports;

- the occurrence of a natural disaster, unusual weather conditions, or a disease epidemic in foreign countries from which we source our products;
- changes in the U.S. customs procedures concerning the importation of apparel products;
- unforeseen delays in customs clearance of any goods;

- disruptions in the global transportation network such as a port strike, work stoppages or other labor unrest, capacity withholding, world trade restrictions, acts of terrorism or war;
- the application of adverse foreign intellectual property laws;
- the ability of our vendors to secure sufficient credit to finance the manufacturing process including the acquisition of raw materials;
- potential social compliance concerns resulting from our use of international vendors, independent manufacturers, and licensees, over whom we have limited control;
- manufacturing delays or unexpected demand for products may require the use of faster, but more expensive, transportation methods such as air-freight services;
- compliance with disclosure rules regarding the identification and reporting on the use of "conflict minerals" sourced from the Democratic Republic of the Congo or its surrounding countries in our products; and
- other events beyond our control that could interrupt our supply chain and delay receipt of our products into the U.S.

The occurrence of one or more of these events could result in disruptions to our operations, which in turn could increase our cost of goods sold, decrease our gross profit, or impact our ability to get products to our customers.

A small number of vendors supply a significant amount of our products, and losing one or more of these vendors could have a material adverse effect on our business, results of operations, and financial condition.

In fiscal 2015, we purchased approximately 59% of our products from ten vendors, of which approximately half comes from three vendors. We expect that we will continue to source a significant portion of our products from these vendors. We do not have agreements with our major vendors that would provide us with assurances on a long-term basis as to adequate supply or pricing of our products. If any of our major vendors decide to discontinue or significantly decrease the volume of products they manufacture for us, raise prices on products we purchase from them, or become unable to perform their responsibilities (e.g., if our vendors experience financial difficulties, lack of capacity or significant labor disputes) our business, results of operations, and financial condition may be adversely affected.

We have limited control over our vendors and we may experience delays, product recalls, or loss of revenues if our products do not meet our quality standards.

Because we do not control our vendors, our vendors may not continue to provide products that are consistent with our standards. We have occasionally received, and may in the future continue to receive, shipments of product that fail to conform to our quality control standards. A failure in our quality control program may result in diminished product quality, which in turn may result in increased order cancellations and returns, decreased consumer demand for our products, or product recalls, any of which may have a material adverse effect on our results of operations and financial condition. In addition, products that fail to meet our standards, or other unauthorized products, could end up in the marketplace without our knowledge. This could materially harm our brand and our reputation in the marketplace.

Labor or other disruptions along our supply chain may adversely affect our relationships with customers, reputation with consumers, and results of operations.

Our business depends on our ability to source and distribute products in a timely manner. Labor disputes at independent factories where our goods are produced, the shipping ports we use, or our transportation carriers create

significant risks for our business, particularly if these disputes result in work slowdowns, lockouts, strikes, or other disruptions during our peak manufacturing and importing times. For example, we source a significant portion of our products through a single port on the west coast of the U.S. Work slowdowns and stoppages relating to labor agreement negotiations involving the operators of our west coast port and unions have in the past resulted in a significant backlog of cargo containers. As a result, we have in the past experienced delays in the shipment of our products. In the event that these slow-downs, disruptions or strikes occur in the future in connection with labor agreement negotiations or otherwise, it may have a material adverse effect on our financial position, results of operations, or cash flows.

We may experience delays, product recalls, or loss of revenues if our products do not meet regulatory requirements.

Our products are subject to regulation of and regulatory standards with respect to quality and safety set by various governmental authorities around the world, including in the U.S., Canada, China, and the European Union. These regulations and standards may change from time to time. Our inability, or that of our vendors, to comply on a timely basis with regulatory requirements could result in significant fines or penalties, which could adversely affect our reputation and sales. Issues with the compliance of merchandise we sell with these regulations and standards, regardless of our culpability, or customer concerns about such issues, could result in damage to our reputation, lost sales, uninsured product liability claims or losses, merchandise recalls, and increased costs.

The loss of a sourcing agent or our inability to effectively source inventory directly could negatively impact our ability to timely deliver our inventory supply and disrupt our business, which may adversely affect our operating results.

As of January 2, 2016, one sourcing agent managed approximately 60% of our inventory purchases. Although we believe that other buying agents could be retained, or that we could procure some of the inventory directly, the loss of this buying agent could delay our ability to timely receive inventory supply and disrupt our business, which could result in a material adverse effect on our operating results. We source a significant amount of inventory directly and plan to continue to further increase such amounts. If we experience significant increases in demand or need to replace an existing vendor, there can be no assurance that additional manufacturing capacity will be available when required on terms that are acceptable to us or that any vendor would allocate sufficient capacity to us in order to meet our requirements. In addition, for any new vendors, we may encounter delays in production and added costs as a result of the time it takes to train our vendors in producing our products and adhering to our quality control standards. Moreover, in the event of a significant disruption in the supply of the fabrics or raw materials used by our vendors in the manufacture of our products, our vendors might not be able to locate alternative suppliers of materials of comparable quality at an acceptable price. Any delays, interruption, or increased costs in the manufacture of our products could have a material adverse effect on our operating results.

Profitability and our reputation and relationships could be negatively impacted if we do not adequately forecast the demand for our products and, as a result, create significant levels of excess inventory or insufficient levels of inventory.

There can be no assurance that we will be able to successfully anticipate changing consumer preferences and product trends or economic conditions and, as a result, we may not successfully manage inventory levels to meet our future order requirements. If we fail to accurately forecast consumer demand, we may experience excess inventory levels or a shortage of product required to meet the demand. Inventory levels in excess of consumer demand may result in inventory write-downs and the sale of excess inventory at discounted prices, which could have an adverse effect on the image and reputation of our brands and negatively impact profitability. On the other hand, if we underestimate demand for our products, our manufacturing facilities or third-party manufacturers may not be able to produce products to meet consumer requirements, and this could result in delays in the shipment of products and lost revenues, as well as damage to our reputation and relationships. These risks could have a material adverse effect on our brand image as well as our results of operations and financial condition.

We operate in a highly competitive market and the size and resources of some of our competitors may allow them to compete more effectively than we can, resulting in a loss of market share and, as a result, a decrease in revenue and gross profit.

The baby and young children's apparel market is very competitive, and includes both branded and private label manufacturers. Because of the fragmented nature of the industry, we also compete with many other manufacturers and retailers. Some of our competitors have greater financial resources and larger customer bases than we have. As a

result, these competitors may be able to adapt to changes in customer requirements more quickly; take advantage of acquisition and other opportunities more readily; devote greater resources to the marketing and sale of their products; and adopt more aggressive pricing strategies than we can.

We expect to make significant capital investments and have significant expenses related to our multi-channel sales strategy and failure to execute our strategy could have a material adverse effect on our business, results of operations, and how we meet consumer expectations.

We distribute our products through multiple channels in the U.S. children's apparel market, which, as of January 2, 2016, included approximately 17,400 wholesale locations (including department stores, national chain and specialty stores, and discount retailers), 982 company-operated stores, and our website. As of January 2, 2016, we operated 835 stores in the U.S. Internationally, our products are sold via company-operated stores in Canada, which totaled 147 as of January 2, 2016, and in

our international wholesale, licensing, and online channels. Our multi-channel strategy allows our customers to shop across all sales channels globally, and allows us to meet changing customer experience expectations.

This strategy has and will continue to require significant investment in cross-functional operations and management focus, along with investment in supporting technologies. Multi-channel retailing is rapidly evolving and we must anticipate and meet changing customer expectations and counteract new developments and technology investments by our competitors. Our multi-channel retailing strategy includes implementing new technology, software, and processes to be able to fulfill customer orders from any point within our system of stores and distribution centers, which is extremely complex and may not meet customer expectations for timely and accurate deliveries. If we are unable to attract and retain team members or contract with third-parties having the specialized skills needed to support our multi-channel efforts, implement improvements to our customer facing technology in a timely manner, allow real-time and accurate visibility to product availability when customers are ready to purchase, quickly and efficiently fulfill our customers orders using the fulfillment and payment methods they demand, or provide a convenient and consistent experience for our customers regardless of the ultimate sales channel, our ability to compete and our results of operations could be adversely affected. In addition, if [carters.com](http://carters.com), [oshkosh.com](http://oshkosh.com), or our other customer facing technology systems do not appeal to our customers, reliably function as designed, or maintain the privacy of customer data, or if we are unable consistently meet our brand promise to our customers, we may experience a loss of customer confidence or lost sales, or be exposed to fraudulent purchases, which could adversely affect our reputation and results of operations.

Our retail success and future growth is dependent upon identifying locations and negotiating appropriate lease terms for retail stores.

A significant portion of our revenues are through our retail stores in leased retail locations across the U.S. and Canada. Successful operation of a retail store depends, in part, on the overall ability of the retail location to attract a consumer base sufficient to make store sales volume profitable. If we are unable to identify new retail locations with consumer traffic sufficient to support a profitable sales level, our retail growth may be limited. Further, if existing stores do not maintain a sufficient customer base that provides a reasonable sales volume or we are unable to negotiate appropriate lease terms for the retail stores, there could be a material adverse impact on our sales, gross margin, and results of operations.

We also must be able to effectively renew our existing store leases on acceptable terms. In addition, from time to time, we may seek to downsize, consolidate, reposition, or close some of our real estate locations, which in most cases requires a modification of an existing store lease. Failure to renew existing store leases, secure adequate new locations or successfully modify existing locations, or failure to effectively manage the profitability of our existing fleet of stores, could have a material adverse effect on our results of operations.

Additionally, the economic environment may at times make it difficult to determine the fair market rent of real estate properties within the U.S. and internationally. This could impact the quality of our decisions to exercise lease options at previously negotiated rents and the quality of our decisions to renew expiring leases at negotiated rents. Any adverse effect on the quality of these decisions could impact our ability to retain real estate locations adequate to meet our targets or efficiently manage the profitability of our existing fleet of stores and could have a material adverse effect on our results of operations.

Our eCommerce business faces distinct risks, and our failure to successfully manage it could have a negative impact on our profitability.

The successful operation of our eCommerce business as well as our ability to provide a positive shopping experience that will generate orders and drive subsequent visits depends on efficient and uninterrupted operation of our order-taking and fulfillment operations. Risks associated with our eCommerce business include:

- risks associated with the failure of the computer systems, including those of third-party vendors, that operate our website including, among others, inadequate system capacity, computer viruses, human error, changes in programming, security breaches, system upgrades or migration of these services to new systems;
- disruptions in telephone service or power outages;
- reliance on third parties for computer hardware and software, as well as delivery of merchandise to our customers;
- rapid technology changes;

- credit or debit card fraud;
- the diversion of sales from our physical stores;
- natural disasters or adverse weather conditions;
- changes in applicable federal, state and international regulations;
- liability for online content; and
- consumer privacy concerns and regulation.

Problems in any of these areas could result in a reduction in sales, increased costs and damage to our reputation and brands, which could adversely affect our business and results of operations.

We may be unsuccessful in expanding into international markets.

We cannot be sure that we can successfully complete any planned international expansion or that new international business will be profitable or meet our expectations. We do not have significant experience operating in markets outside of the U.S. and Canada. Consumer demand, behavior, tastes, and purchasing trends may differ in international markets and, as a result, sales of our products may not be successful or meet our expectations, or the margins on those sales may not be in line with those we currently anticipate. We may encounter differences in business culture and the legal environment that may make working with commercial partners and hiring and retaining an adequate employee base more challenging. We may also face difficulties integrating foreign business operations with our current operations. Any of these challenges could hinder our success in new markets. Our entry into new markets may have upfront investment costs that may not be accompanied by sufficient revenues to achieve typical or expected operational and financial performance and such costs may be greater than expected. If our international expansion plans are unsuccessful, our results could be materially adversely affected.

We may not achieve sales growth plans, cost savings, and other assumptions that support the carrying value of our intangible assets.

The carrying value of our goodwill, tradename assets, and brands are subject to annual impairment reviews as of the last day of each fiscal year or more frequently, if deemed necessary, due to any significant events or changes in circumstances. Estimated future cash flows used in these impairment reviews could be negatively impacted if we do not achieve our sales plans, planned cost savings, and other assumptions that support the carrying value of these intangible assets, which could result in impairment of the remaining asset values. Any material impairment would adversely affect our results of operations.

We have substantial debt, which could adversely affect our financial health and our ability to obtain financing in the future and to react to changes in our business.

As of January 2, 2016, we had \$584.4 million aggregate principal amount of debt outstanding (excluding \$7.7 million of outstanding letters of credit), and \$307.9 million of undrawn availability under our senior secured revolving credit facility after giving effect to \$7.7 million of letters of credit issued under our senior secured revolving credit facility. As a result, our ability to obtain additional financing for working capital, capital expenditures, acquisitions, debt service requirements, or general corporate or other purposes may be limited, and we may be unable to renew or refinance our debt on terms as favorable as our existing debt or at all.

If our cash flows and capital resources are insufficient to fund our debt service obligations and other cash requirements, we could be forced to reduce or delay investments and capital expenditures or to sell assets or operations, seek additional capital, or restructure or refinance our indebtedness. We may not be able to effect any such alternative measures, if necessary, on commercially reasonable terms or at all and, even if successful, such alternative actions may not allow us to meet our scheduled debt service obligations. In the absence of such operating results and resources, we could face substantial liquidity problems and might be required to dispose of material assets or

operations to meet our debt service and other obligations.

In addition, both our senior secured revolving credit facility and indenture governing the senior notes contain restrictive covenants that, subject to specified exemptions, restrict our ability to incur indebtedness, grant liens, make certain investments, pay dividends or distributions on our capital stock, engage in mergers, dispose of assets and use the proceeds from any such dispositions, and raise debt or equity capital to be used to repay other indebtedness when it becomes due. These restrictions

13

---

may limit our ability to engage in acts that may be in our long-term best interests, and may make it difficult for us to execute our business strategy successfully or effectively compete with companies that are not similarly restricted. We may also incur future debt obligations that might subject us to additional restrictive covenants that could affect our financial and operational flexibility.

Our success is dependent upon retaining key individuals within the organization to execute our strategic plan.

Our ability to attract and retain qualified executive management, marketing, merchandising, design, sourcing, operations, and support function staffing is key to our success. If we are unable to attract and retain qualified individuals in these areas, this may result in an adverse impact on our growth and results of operations. Our inability to retain personnel could cause us to experience business disruption due to a loss of historical knowledge and a lack of business continuity and may adversely affect our results of operations, financial position, and cash flows.

Our failure to properly manage strategic projects in order to achieve our objectives may negatively impact our business.

The implementation of our business strategy periodically involves the execution of complex projects, which may require that we make significant estimates and assumptions about a project, and these projects could place significant demands on our accounting, financial, information and other systems and on our business overall. In addition, our ability to successfully implement such projects is dependent on management's ability to manage these projects effectively and implement them successfully. For example, in fiscal 2015 we implemented our Rewarding Moments® rewards program to drive customer traffic, sales, and brand loyalty. If our estimates and assumptions about a project, such as our Rewarding Moments® program, are incorrect, or if we miscalculate the resources or time we need to complete a project or fail to implement a project effectively, our business and operating results could be adversely affected.

Failure to implement new information technology systems or needed upgrades to our systems, including operational and financial systems, could adversely affect our business.

As our business has grown in size, complexity, and geography, we have enhanced and upgraded our information technology infrastructure and we expect there to be a regular need for additional enhancements and upgrades if we continue to grow. Failure to implement new systems or upgrade systems, including operation and financial systems, as needed or complications encountered in implementing new systems or upgrading existing systems could cause disruptions that may adversely affect our business and results of operations. Further, additional investment needed to upgrade and expand our information technology infrastructure will require significant investment of additional resources and capital, which may not always be available or available on favorable terms.

Our Braselton, Georgia distribution facility handles a large portion of our merchandise distribution. If we encounter problems with this facility, our ability to deliver our products to the market could be adversely affected.

We handle a large portion of our merchandise distribution for all of our stores, and our online retail operations from a single facility in Braselton, Georgia. Our ability to meet consumer expectations, manage inventory, complete sales, and achieve objectives for operating efficiencies depends on proper operation of this facility. If we are not able to distribute merchandise to our stores or customers because we have exceeded our capacity at the distribution facility (such as due to a high level of demand during peak periods) or because of natural disasters, accidents, system failures, disruptions, or other events, our sales could decline, which may have a materially adverse effect on our earnings, financial position, and our reputation. In addition, we use an automated system that manages the order processing for our eCommerce business. In the event that this system becomes inoperable for any reason, we may be unable to ship direct-to-consumer orders in a timely manner, and as a result, we could experience a reduction in our direct-to-consumer business, which could negatively impact our sales and profitability.

Our business could suffer a material adverse effect from extreme or unseasonable weather conditions.

Our business is susceptible to unseasonable weather conditions, which could influence customer trends, consumer traffic and shopping habits. For example, extended periods of unseasonably warm temperatures during the winter season or cool temperatures during the summer season could reduce demand and thereby would have an adverse effect on our operational results, financial position, and cash flows. In addition, extreme weather conditions in the areas in which our stores are located could negatively affect our business, operational results, financial position, and cash flows. Frequent or unusually heavy snowfall, ice storms, rainstorms, or other extreme weather conditions over an extended period could make it difficult for our customers to travel to our stores, which could negatively impact our operational results.

Failure to comply with the various laws and regulations as well as changes in laws and regulations could have an adverse impact on our reputation, consolidated financial condition or results of operations.

We must comply with various laws and regulations, including applicable employment and consumer protection laws. Our policies, procedures and internal controls are designed to help us comply with all applicable foreign and domestic laws, accounting and reporting requirements, regulations and tax requirements, including those imposed by the Sarbanes-Oxley Act of 2002, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the SEC and the New York Stock Exchange ("NYSE") as well as other laws. Our failure to comply with these various laws and regulations could have an adverse impact on our reputation, consolidated financial condition or results of operations. In addition, any changes in regulations, the imposition of additional regulations or the enactment of any new legislation that affects employment and labor, trade, product safety, transportation and logistics, health care, tax, privacy, operations or environmental issues, among other things, may increase the complexity of the regulatory environment in which we operate and the related cost of compliance. Although we undertake to monitor changes in these laws, if these laws change without our knowledge, or are violated by importers, designers, manufacturers, distributors or agents, we could experience delays in shipments and receipt of goods, or be subject to fines or other penalties under the controlling regulations, any of which could negatively affect the our business and results of operations.

Our results of operations, financial position, and cash flows, and our ability to conduct business in international markets may be affected by legal, regulatory, political, and economic risks.

Our ability to conduct business in new and existing international markets is subject to legal, regulatory, political, and economic risks. These include the burdens of complying with foreign laws and regulations, including trade and labor restrictions; unexpected changes in regulatory requirements; and new tariffs or other barriers in some international markets. Additionally, the U.S. Foreign Corrupt Practices Act, and similar world-wide anti-bribery laws, prohibit companies and their intermediaries from making improper payments to government officials for the purpose of obtaining or retaining business. Our policies mandate compliance with anti-bribery laws. Our internal control policies and procedures, or those of our vendors, may not adequately protect us from reckless or criminal acts committed by our employees, agents, or vendors. Violations of these laws, or allegations of such violations, could disrupt our business and result in a material adverse effect on our financial condition, results of operations, and cash flows.

We are also subject to general political and economic risks in connection with our international operations, including political instability and terrorist attacks; differences in business culture; different laws governing relationships with employees and business partners; changes in diplomatic and trade relationships; and general economic fluctuations in specific countries or markets.

We cannot predict whether quotas, duties, taxes, or other similar restrictions will be imposed by the U.S. or foreign countries upon the import or export of our products in the future, or what effect any of these actions would have, if any, on our business, financial condition, or results of operations. Changes in regulatory, geopolitical, social or economic policies, and other factors may have a material adverse effect on our business in the future or may require us to exit a particular market or significantly modify our current business practices.

We may experience fluctuations in our tax obligations and effective tax rate.

We are subject to income taxes in federal and applicable state and local tax jurisdictions in the U.S., Canada, and other foreign jurisdictions. We record tax expense based on our estimates of current and future payments, which include reserves for estimates of uncertain tax positions. At any time, many tax years are subject to audit by various taxing jurisdictions. The results of these audits and negotiations with taxing authorities may impact the ultimate settlement of these tax positions. As a result, there could be ongoing variability in our quarterly tax rates as taxable events occur and

exposures are re-evaluated. Further, our effective tax rate in any financial statement period may be materially impacted by changes in the mix and level of earnings.

Failure to continue to pay quarterly cash dividends to our shareholders could cause the market price for our common stock to decline.

In 2013, we initiated a quarterly cash dividend. Future declarations of quarterly cash dividends and the establishment of future record and payment dates are at the discretion of our Board of Directors based on a number of factors, including our future financial performance and other investment priorities. Additionally, provisions in our senior credit facility and the indenture

governing our senior notes could have the effect of restricting our ability to pay future cash dividends on, or make future repurchases of, our common stock. Any reduction or discontinuance by us of the payment of quarterly cash dividends could cause the market price of our common stock to decline.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

## ITEM 2. PROPERTIES

We utilize space for retail stores, showrooms, distribution centers, and offices, principally in the U.S. and Canada. The majority of our premises are leased.

The following sets forth information with respect to our key properties:

Location	Approx. floor space in square feet	Principal use	Lease expiration date
Braselton, Georgia	1,062,000	Distribution/warehousing	September 2026
Stockbridge, Georgia	505,000	Distribution/warehousing	April 2018
Chino, California	413,000	Distribution/warehousing (1)	July 2017
Atlanta, Georgia	292,000	Corporate headquarters (2)	April 2030
Griffin, Georgia	224,000	Information technology	Owned
Fayetteville, Georgia	30,000	Information technology	September 2020
Cambridge, Ontario	277,000	Distribution/warehousing	March 2020
Cambridge, Ontario	37,000	Canadian corporate office (3)	June 2021

(1) This space is leased and operated by a third party service provider.

(2) The amount of space occupied is expected to increase to approximately 304,000 square feet by May 2016.

(3) In November 2015, we signed a lease for our new Canadian corporate office in Mississauga, Ontario. The new Canadian corporate office is expected to have approximately 28,000 square feet. During the second or third quarter of fiscal 2016, we expect to occupy the new Canadian corporate office and early terminate, without penalty, the lease on our existing Canadian corporate office.

At January 2, 2016, we operated 835 leased retail stores in 48 states in the U.S. and in Puerto Rico. In Canada, we operated 147 leased retail stores. The majority of the lease terms for our retail stores range between 5 and 10 years.

## ITEM 3. LEGAL PROCEEDINGS

We are subject to various claims and pending or threatened lawsuits in the normal course of our business. The Company is not currently a party to any legal proceedings that it believes would have a material adverse effect on our financial position, results of operations, or cash flows.

## ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

## PART II

## ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

## HISTORICAL STOCK PRICE AND NUMBER OF RECORD HOLDERS

Our common stock trades on the New York Stock Exchange under the symbol CRI. The last reported sale price per share of our common stock on February 19, 2016 was \$87.47. On that date there were 194 holders of record of our common stock.

The following table sets forth for the fiscal years and quarters indicated the high and low sales prices per share of our common stock as reported by the New York Stock Exchange:

2015	High	Low
First quarter	\$93.89	\$80.98
Second quarter	\$108.84	\$91.92
Third quarter	\$108.98	\$87.67
Fourth quarter	\$94.00	\$84.08
2014	High	Low
First quarter	\$77.97	\$64.84
Second quarter	\$79.36	\$67.83
Third quarter	\$83.52	\$67.94
Fourth quarter	\$87.31	\$75.10

## SHARE REPURCHASES

The following table provides information about shares repurchased through our repurchase program described below during the fourth fiscal quarter of 2015:

Period	Total number of shares purchased (1)	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs (2)	Approximate dollar value of shares that may yet be purchased under the plans or programs
October 4, 2015 through October 31, 2015	131,263	\$89.82	131,263	\$95,007,894
November 1, 2015 through November 28, 2015	100,972	\$87.65	100,100	\$86,233,902
November 29, 2015 through January 2, 2016	127,900	\$89.03	127,900	\$74,847,185
Total	360,135		359,263	

(1) Includes shares of our common stock surrendered by our employees to satisfy required tax withholding upon the vesting of restricted stock awards. There were 872 shares surrendered between October 4, 2015 and January 2,

2016.

Amounts purchased during the fiscal year were made in accordance with the share repurchase authorizations (2) described in Note 8 to the accompanying audited consolidated financial statements contained in this Annual Report on Form 10-K.

19

---

## Repurchase Program

In the second quarter of fiscal 2013, our Board of Directors authorized the repurchase of shares in an amount up to \$300 million, inclusive of amounts remaining under previous authorizations. The total remaining capacity under the repurchase authorizations as of January 2, 2016 was approximately \$74.8 million.

On February 24, 2016, our Board of Directors authorized a new \$500 million share repurchase program. The new share repurchase authorization permits us to repurchase shares of our common stock up to \$500 million, in addition to the approximate \$74.8 million remaining at January 2, 2016 under previous authorizations described above.

Repurchases under the authorizations may be made in the open market or in privately-negotiated transactions, with the level and timing of such activity at the discretion of our management depending on market conditions, stock price, other investment priorities, and other factors. The share repurchase authorizations have no expiration dates.

## Open Market Purchases

During the fiscal year ended January 2, 2016, we repurchased and retired 1,154,288 shares with an average share price of \$95.55 for an aggregate cost of approximately \$110.3 million, in open market transactions.

## DIVIDENDS

On February 24, 2016, our Board of Directors authorized a quarterly cash dividend payment of \$0.33 per common share, payable on March 25, 2016 to shareholders of record at the close of business on March 11, 2016.

In fiscal 2015, we paid quarterly cash dividends of \$0.22 per share each quarter. In fiscal 2014, we paid quarterly cash dividends of \$0.19 per share each quarter. Future declarations of quarterly dividends and the establishment of future record and payment dates are at the discretion of our Board of Directors based on a number of factors, including our future financial performance and other investment priorities.

Provisions in our secured revolving credit facility and indenture governing our senior notes could have the effect of restricting our ability to pay future cash dividends on or make future repurchases of our common stock. For more information concerning these dividend restrictions, refer to the "Financial Condition, Capital Resources, and Liquidity" section of Item 7 in this Annual Report on Form 10-K.

## RECENT SALES OF UNREGISTERED SECURITIES

Not applicable.

## ITEM 6. SELECTED FINANCIAL DATA

The following selected financial and other data has been derived from our consolidated financial statements for each of the five years presented. The following information should be read in conjunction with Item 7 - "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Item 8-"Financial Statements and Supplementary Data" which includes the consolidated financial statements and related notes appearing elsewhere in this Annual Report on Form 10-K, or the respective prior fiscal years' Form 10-K.

The Company's fiscal year ends on the Saturday, in December or January, nearest the last day of December, resulting in an additional week of results every five or six years. All fiscal years for which financial information is set forth below contained 52 weeks, except for the fiscal year ended January 3, 2015, which contained 53 weeks.

(dollars in thousands, except per share data)	For the fiscal years ended				
	January 2, 2016	January 3, 2015	December 28, 2013	December 29, 2012	December 31, 2011
<b>Operating Data:</b>

Workforce reduction, facility write-down, and closure costs	\$—	\$9,126	\$38,214	\$9,490	—
Accretion and adjustment of contingent consideration	\$1,886	\$1,348	\$2,825	\$3,589	2,484
Acquisition-related charges	\$—	\$—	\$—	\$—	3,050

(c) Represents total current assets less total current liabilities.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion of our results of operations and current financial condition. You should read this discussion in conjunction with our consolidated historical financial statements and notes included elsewhere in this Annual Report on Form 10-K. Our discussion of our results of operations and financial condition includes various forward-looking statements about our markets, the demand for our products and services, and our future results. We based these statements on assumptions that we consider reasonable. Actual results may differ materially from those suggested by our forward-looking statements for various reasons including those discussed in the "Risk Factors" in Item 1A of this Annual Report on Form 10-K. Those risk factors expressly qualify all subsequent oral and written forward-looking statements attributable to us or persons acting on our behalf. Except for any ongoing obligations to disclose material information as required by the federal securities laws, we do not have any intention or obligation to update forward-looking statements after we file this Annual Report on Form 10-K.

### Fiscal Year

Our fiscal year ends on the Saturday, in December or January nearest the last day of December, resulting in an additional week of results every five or six years. Fiscal 2015, which ended on January 2, 2016, contained 52 weeks. Fiscal 2014, which ended on January 3, 2015, contained 53 weeks. Fiscal 2013, which ended on December 28, 2013, contained 52 weeks.

The 53rd week in fiscal 2014 contributed approximately \$44.1 million of incremental consolidated revenue. Certain expenses increased in relationship to the additional revenue from the 53rd week, while other expenses, such as fixed costs and expenses incurred on a calendar-month basis, did not increase. The consolidated gross margin for the incremental revenue was comparable to our consolidated gross margin for all of fiscal 2014.

### Our Business

We are the largest branded marketer in the U.S. and Canada of apparel exclusively for babies and young children. We own two of the most highly recognized and most trusted brand names in the children's apparel industry, Carter's and OshKosh B'gosh ("OshKosh"). Established in 1865, our Carter's brand is recognized and trusted by consumers for high-quality apparel for children sizes newborn to eight. Established in 1895, OshKosh is a well-known brand, trusted by consumers for apparel for children sizes newborn to 12, with a focus on playclothes for toddlers and young children. Given each brand's product category emphasis and brand aesthetic, we believe the brands provide a complementary product offering. We have extensive experience in the young children's apparel market and focus on delivering products that satisfy our consumers' needs. Our strategy is to market high-quality, essential core products at prices that deliver an attractive value proposition for consumers.

In the U.S., our brands compete in the \$20.5 billion children's apparel market, for children ages zero to seven. In 2015, our Carter's brand was the largest brand with a 14.6% market share and our OshKosh brand had a 2.3% market share. We offer multiple product categories, including baby, sleepwear, playclothes, and related accessories. Our distribution strategy enables us to reach a broad range of consumers across various channels, socio-economic groups, and geographic regions.

We distribute our products through multiple channels of distribution in the U.S. children's apparel market, which, as of January 2, 2016, includes approximately 17,400 wholesale locations (including department stores, national chain stores, specialty stores, and discount retailers), 982 Company-operated stores, and our websites. As of January 2, 2016, we operated 594 Carter's and 241 OshKosh stores in the U.S. As of January 2, 2016, our products were sold through 147 Company-operated stores in Canada in addition to our international wholesale, licensing, and online channels.

We operate "side-by-side" locations wherein adjacent retail stores for our Carter's and OshKosh brands are connected, allowing customers to shop for both brands in a single location. Each "side-by-side" location is counted as one Carter's retail store and one OshKosh retail store. As of January 2, 2016, the U.S. store count data presented in the preceding paragraph includes 97 such "side-by-side" locations for both Carter's and OshKosh.

#### Segments

The five segments we use to manage and evaluate our performance are: Carter's Retail, Carter's Wholesale, OshKosh Retail, OshKosh Wholesale, and International. These segments are our operating and reportable segments.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

## RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, (i) selected statement of operations data expressed as a percentage of consolidated net sales and (ii) the number of retail stores open at the end of fiscal year:

	For the fiscal years ended			
	January 2, 2016 (52 weeks)	January 3, 2015 (53 weeks)	December 28, 2013 (52 weeks)	
Net sales				
Carter's Retail	38.2	% 37.6	% 36.2	%
Carter's Wholesale	36.8	% 37.4	% 39.2	%
Total Carter's (U.S.)	75.0	% 75.0	% 75.4	%
OshKosh Retail	12.0	% 11.6	% 11.0	%
OshKosh Wholesale	2.2	% 2.5	% 2.8	%
Total OshKosh (U.S.)	14.2	% 14.1	% 13.8	%
International	10.8	% 10.9	% 10.8	%
Consolidated net sales	100.0	% 100.0	% 100.0	%
Cost of goods sold	58.3	% 59.1	% 58.5	%
Gross profit	41.7	% 40.9	% 41.5	%
Selling, general, and administrative expenses	30.2	% 30.8	% 32.9	%
Royalty income	(1.5)	)% (1.4	)% (1.4	)%
Operating income	13.0	% 11.5	% 10.0	%
Interest expense	0.9	% 1.0	% 0.5	%
Interest income	n/m	n/m	n/m	
Other (income) expense, net	(0.1)	)% 0.1	% n/m	
Income before income taxes	12.2	% 10.4	% 9.5	%
Provision for income taxes	4.3	% 3.7	% 3.4	%
Net income	7.9	% 6.7	% 6.1	%
Number of retail stores at end of fiscal year:				
Carter's - U.S.	594	531	476	
OshKosh - U.S.	241	200	181	
International	147	124	117	
Total	982	855	774	

n/m - rounds to less than 0.1%, therefore not material.

Note: Results may not be additive due to rounding.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

## STORE COUNT DATA

		Carter's Retail	OshKosh Retail	Canada	Total
Fiscal 2014:	Openings	61	27	23	111
	Closings	6	8	1	15
Fiscal 2015:	Openings	67	47	23	137
	Closings	4	6	—	10
Projections for fiscal 2016:	Openings	60	52	19	131
	Closings	4	5	1	10

Most all of the OshKosh retail store openings included in the above table are in a "side-by-side" format with a Carter's retail store.

## COMPARABLE SALES METRICS

Our comparable store sales metrics include sales for all stores and eCommerce websites that were open during the comparable fiscal period, including remodeled stores and certain relocated stores. A store becomes comparable following 13 consecutive full fiscal months of operations. If a store relocates within the same center with no business interruption or material change in square footage, the sales of such store will continue to be included in the comparable store metrics. If a store relocates to another center, or there is a material change in square footage, such store is treated as a new store. Stores that are closed during the relevant fiscal period are included in the comparable store sales metrics up to the last full fiscal month of operations.

Our fiscal years 2015 and 2013 each contained 52 weeks, while our fiscal year 2014 contained 53 weeks. When presenting U.S. and Canada comparable retail sales, the following adjustments to sales metrics were used to align periods for comparability:

- When comparing 2015 to 2014, comparable 52-week periods were used; and
- When comparing 2014 to 2013, comparable 53-week periods were used.

However, in all other discussion and analysis related to fiscal years 2015, 2014, and 2013, the net sales amounts are based on the same fiscal-year periods used to prepare the consolidated financial statements.

The method of calculating sales metrics varies across the retail industry. As a result, our method of calculating comparable sales may not be the same as that of other retailers.

## FISCAL YEAR ENDED JANUARY 2, 2016 (52 WEEKS) COMPARED TO FISCAL YEAR ENDED JANUARY 3, 2015 (53 WEEKS)

## U.S. COMPARABLE RETAIL SALES

The following table presents the percentage changes for our U.S. direct-to-consumer ("DTC") comparable sales:

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

U.S. Direct-to-Consumer Comparable Sales

Change from 2014 to 2015

Increase (Decrease)

	Carter's Retail	OshKosh Retail
Stores	(3.1)%	(2.5)%
eCommerce	+18.9%	+24.0%
Total DTC	+1.2%	+2.4%

The decreases in Carter's Retail and OshKosh Retail comparable store sales during the 2015 period were primarily due to decreases in the number of transactions and the average price per unit.

During the 2015 period, we believe that total DTC comparable sales were negatively impacted by lower demand from international tourists shopping in our U.S. stores and eCommerce websites, likely resulting from the strength of the U.S. dollar relative to other global currencies.

The increases in eCommerce comparable sales during the 2015 period were primarily due to an increase in the number of transactions.

CONSOLIDATED NET SALES

Compared to fiscal 2014, consolidated net sales in fiscal 2015 increased \$120.0 million, or 4.1%, to \$3.0 billion. This improvement was primarily due to sales growth in all of our segments except OshKosh Wholesale. The 53rd week in fiscal 2014 contributed approximately \$44.1 million in additional consolidated net sales in fiscal 2014. Fiscal 2015 contained 52 weeks. Changes in foreign currency exchange rates in fiscal 2015 as compared to fiscal 2014 negatively impacted consolidated net sales by approximately \$35.1 million, or 1.2%.

For the fiscal years ended

(dollars in thousands)	January 2, 2016 (52 weeks)	% of Total Net Sales	January 3, 2015 (53 weeks)	% of Total Net Sales	
Net sales:					
Carter's Retail	\$1,151,268	38.2	% \$1,087,165	37.6	%
Carter's Wholesale	1,107,706	36.8	% 1,081,888	37.4	%
Total Carter's (U.S.)	2,258,974	75.0	% 2,169,053	75.0	%
OshKosh Retail	363,087	12.0	% 335,140	11.6	%
OshKosh Wholesale	65,607	2.2	% 73,201	2.5	%
Total OshKosh (U.S.)	428,694	14.2	% 408,341	14.1	%
International	326,211	10.8	% 316,474	10.9	%
Total net sales	\$3,013,879	100.0	% \$2,893,868	100.0	%

CARTER'S RETAIL SALES (U.S.)

Carter's Retail net sales increased \$64.1 million, or 5.9%, in fiscal 2015 to \$1.2 billion. The change in fiscal 2015 was primarily driven by an/a:

• Increase of \$68.9 million from new store openings;  
• Increase of \$38.5 million in eCommerce sales;  
• Decrease of \$25.9 million in comparable store sales; and  
• Decrease of \$4.0 million due to the impact of store closings.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

The 53rd week of fiscal 2014 contributed additional net sales of approximately \$13.7 million to fiscal 2014.

CARTER'S WHOLESALE SALES (U.S.)

Carter's Wholesale net sales increased \$25.8 million, or 2.4%, in fiscal 2015 to \$1.1 billion. Compared to fiscal 2014, the 2015 growth reflected a 1.5% increase in average price per unit and a 0.9% increase in units shipped, primarily driven by increased seasonal product demand, a new playwear initiative, and favorable replenishment trends. The 53rd week of fiscal 2014 contributed approximately \$19.4 million in additional net sales to fiscal 2014.

OSHKOSH RETAIL SALES (U.S.)

OshKosh Retail net sales increased \$27.9 million, or 8.3%, in fiscal 2015 to \$363.1 million. The growth in net sales in fiscal 2015 was primarily driven by an/a:

- Increase of \$30.9 million from new store openings;
- Increase of \$14.2 million in eCommerce sales;
- Decrease of \$6.5 million in comparable store sales; and
- Decrease of \$6.0 million due to the impact of store closings.

The 53rd week of fiscal 2014 contributed additional net sales of approximately \$4.8 million to fiscal 2014.

OSHKOSH WHOLESALE SALES (U.S.)

OshKosh Wholesale net sales decreased \$7.6 million, or 10.4%, in fiscal 2015 to \$65.6 million. Compared to fiscal 2014, this decrease reflected a 15.8% decline in units shipped, partially offset by a 5.4% increase in the average price per unit, primarily driven by lower seasonal bookings and a decline in sales to the off-price channel. The 53rd week of fiscal 2014 contributed additional net sales of approximately \$1.9 million to fiscal 2014.

INTERNATIONAL SALES

Net sales in our International segment include our Canada operations, wholesale sales to our international licensees, China eCommerce and other international eCommerce sales.

International net sales increased \$9.7 million, or 3.1%, in fiscal 2015 to \$326.2 million. Changes in foreign currency exchange rates in fiscal 2015 as compared to fiscal 2014, primarily between the U.S. dollar and the Canadian dollar, negatively impacted the International segment net sales by approximately \$35.1 million, or 11.1%.

This overall increase in sales for fiscal 2015 primarily reflected an/a:

- Increase of \$9.6 million from international wholesale locations, excluding Canada;
- Increase of \$7.2 million from eCommerce driven primarily by our Canadian website;
- Increase of \$6.9 million from our Canadian retail stores;
- Increase of \$5.9 million from eCommerce primarily due to the 2015 launch of our website in China;
- Decrease of \$15.0 million in our wholesale business primarily due to the Target Canada bankruptcy that occurred in early 2015; and
- Decrease of \$4.4 million related to the exit of retail operations in Japan during the first quarter of fiscal 2014.

The changes noted above include approximately \$4.3 million of additional net sales that occurred in the 53rd week of fiscal 2014.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Comparable store sales, which were measured based on aligned years as previously discussed, in Canada increased 6.4% during the 2015 compared to 2014. Because 2014 did not contain a full year of sales from our Canadian eCommerce website, comparable eCommerce metrics are not presented for 2015.

GROSS PROFIT AND GROSS MARGIN

Our consolidated gross profit increased \$73.6 million, or 6.2%, to \$1.3 billion in fiscal 2015, primarily due to increased sales. Consolidated gross margin increased from 40.9% in fiscal 2014 to 41.7% in fiscal 2015. The increase was primarily attributable to margin improvements in our domestic wholesale and international segments.

We include distribution costs in selling, general, and administrative ("SG&A") expenses. Accordingly, our gross profit and gross margin may not be comparable to other entities that include such distribution costs in their cost of goods sold.

SELLING, GENERAL, AND ADMINISTRATIVE ("SG&A") EXPENSES

Consolidated SG&A expenses in fiscal 2015 increased \$19.0 million, or 2.1%, to \$909.2 million. As a percentage of consolidated net sales, consolidated SG&A expenses decreased from 30.8% in fiscal 2014 to 30.2% in fiscal 2015.

The decrease in SG&A expenses, as a percentage of net sales, in fiscal 2015 primarily reflected a:

- \$10.2 million decrease in amortization expense for the H.W. Carter & Sons trademarks;
- \$6.7 million decrease in provisions for doubtful receivables;
- \$6.6 million decrease in expenses associated with office consolidations occurring in prior periods;
- \$6.5 million decrease in expenses for legal and consulting services;
- \$6.3 million decrease in fulfillment and distribution expenses;
- \$4.0 million decrease in expenses related to our exit from Japan retail operations in the first quarter of fiscal 2014; and
- \$2.0 million decrease in incentive compensation expenses;

which were partially offset by a:

- \$29.8 million increase in expenses related to retail store operations, primarily due to new stores;
- \$10.5 million increase in expenses related to marketing and brand management;
- \$6.3 million increase in insurance and other benefits primarily due to higher health insurance costs; and
- \$1.8 million increase in the Company's match of 401(k) contributions due to higher employee participation.

ROYALTY INCOME

We license the use of our Carter's, Just One You, Child of Mine, OshKosh B'gosh, OshKosh, Genuine Kids from OshKosh, and Precious Firsts brand names. Royalty income from these brands increased \$4.9 million, or 12.5%, to \$44.1 million in fiscal 2015. The increase in fiscal 2015 primarily reflected growth in both our domestic Carter's and OshKosh licensing revenues, along with the timing of favorable settlements with our licensees in the first half of fiscal 2015.

OPERATING INCOME

Compared to fiscal 2014, consolidated operating income for fiscal 2015 increased \$59.5 million, or 17.9%, to \$392.9 million. Consolidated operating margin increased from 11.5% in fiscal 2014 to 13.0% in fiscal 2015. The table below summarizes the changes in each of our segments' operating results and unallocated corporate expenses during fiscal 2015:

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

(dollars in thousands)	Carter's Wholesale	Carter's Retail	OshKosh Wholesale	OshKosh Retail	International	Unallocated Corporate Expenses	Total
Operating income (loss) for fiscal 2014	\$ 185,463	\$ 211,297	\$ 8,842	\$ 8,210	\$ 39,470	\$(119,937)	\$ 333,345
Increase (decrease) in:							
Gross profit	32,872	20,214	2,114	12,073	7,974	(1,663)	73,584
Royalty income	1,832	1,627	1,438	969	(956)	—	4,910
SG&A expenses	(12,330)	34,098	(876)	9,321	(516)	(10,715)	18,982
Operating income (loss) for fiscal 2015	\$ 232,497	\$ 199,040	\$ 13,270	\$ 11,931	\$ 47,004	\$(110,885)	\$ 392,857

The following table summarizes the operating margin for each of our five operating segments in fiscal 2014 and fiscal 2015, as well as the primary drivers of the change in operating margin between those two periods. Each driver is presented in terms of the difference in that driver's margin (based on net sales) between fiscal 2014 and fiscal 2015, in each case expressed in basis points ("bps").

	Carter's Retail	Carter's Wholesale	OshKosh Retail	OshKosh Wholesale	International	
Operating margin for fiscal 2014	19.4 %	17.1 %	2.4 %	12.1 %	12.5 %	%
Favorable (unfavorable) bps changes in fiscal 2015:						
Gross profit	(130) bps	240 bps	(40) bps	540 bps	110 bps	
Royalty income	10 bps	10 bps	20 bps	350 bps	(40) bps	
SG&A expenses	(90) bps	140 bps	110 bps	(80) bps	120 bps	
Operating margin for fiscal 2015	17.3 (a)	21.0 (b)	3.3 (c)	20.2 (d)	14.4 (e)	%

(a) Carter's Retail operating income in fiscal 2015 decreased \$12.3 million, or 5.8%, from fiscal 2014 to \$199.0 million. The segment's operating margin decreased 210 bps from 19.4% in fiscal 2014 to 17.3% in fiscal 2015. The primary drivers of the change in the operating margin were a:

- 130 bps decrease in gross profit primarily due to lower average price per unit; and
- 90 bps increase in SG&A expenses mainly due to a:
  - 60 bps increase in marketing expenses; and
  - 50 bps increase in expenses associated with new stores.

(b) Carter's Wholesale operating income in fiscal 2015 increased \$47.0 million, or 25.4%, from fiscal 2014 to \$232.5 million. The segment's operating margin increased 390 bps from 17.1% in fiscal 2014 to 21.0% in fiscal 2015. The primary drivers of the change in the operating margin were a:

- 240 bps increase in gross profit primarily due to strong demand and product performance, supply chain efficiencies, favorable product costs, and higher average price per unit as a result of product mix; and
- 140 bps decrease in SG&A expenses consisting primarily of a:

100 bps decrease in distribution and other expenses driven by efficiencies at our Braselton, Georgia distribution center; and  
20 bps decrease related to provisions for accounts receivable.

29

---

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

(c) OshKosh Retail operating income in fiscal 2015 increased \$3.7 million, or 45.3%, from fiscal 2014 to \$11.9 million. The segment's operating margin increased 90 bps from 2.4% in fiscal 2014 to 3.3% in fiscal 2015. The primary drivers of the change in the operating margin were a:

- 10 bps decrease in SG&A expenses primarily due to a:
  - 70 bps decrease in retail administration expenses;
- 60 bps decrease in fulfillment and distribution expenses; and
- 40 bps increase in marketing expenses;
- 20 bps increase in royalty income from our licensees; and
- 40 bps decrease in gross profit due to lower average price per unit.

(d) OshKosh Wholesale operating income in fiscal 2015 increased \$4.4 million, or 50.1%, from fiscal 2014 to \$13.3 million. The segment's operating margin increased 810 bps from 12.1% in fiscal 2014 to 20.2% in fiscal 2015. The primary drivers of the change in the operating margin were a:

- 540 bps increase in gross profit primarily due to favorable product costs and a higher average price per unit as a result of product mix;
- 350 bps increase in royalty income primarily due to sales growth from our licensees; and
- 80 bps increase in SG&A expenses primarily due to a:
  - 190 bps increase in customer service expenses; and
  - 80 bps decrease in distribution and freight expenses.

(e) International operating income in fiscal 2015 increased \$7.5 million, or 19.1%, from fiscal 2014 to \$47.0 million. This segment's operating margin increased 190 bps from 12.5% in fiscal 2014 to 14.4% in fiscal 2015. The primary drivers of the change in the operating margin were a:

- 110 bps increase in gross profit driven primarily by growth in our eCommerce channel;
- 40 bps decrease in royalty income; and
- 120 bps decrease in SG&A expenses consisting mainly of a:
  - 210 bps decrease due to the exit of retail operations in Japan in the first quarter of fiscal 2014;
  - 60 bps decrease in customer service expenses;
  - 40 bps decrease related to provisions for accounts receivable;
  - 90 bps increase in retail expenses associated with new stores in Canada;
  - 60 bps increase in marketing expenses; and
  - 60 bps increase in distribution and freight expenses.

Unallocated corporate expenses decreased by \$9.1 million, from \$119.9 million in fiscal 2014 to \$110.9 million in fiscal 2015. Unallocated corporate expenses as a percentage of consolidated net sales decreased from 4.1% in fiscal 2014 to 3.7% in fiscal 2015. The decrease primarily reflected a/an:

- Decrease of \$10.2 million in amortization expense for the H.W. Carter & Sons tradenames;
- Decrease of \$6.6 million in expenses related to office consolidations that occurred in prior periods;
- Decrease of \$4.0 million in administrative and legal expenses;

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Increase of \$8.0 million in insurance and other benefits, primarily driven by higher employee health insurance costs and higher 401-K match expense due to higher employee participation; and  
Increase of \$4.2 million in expenses related to information technology.

INTEREST EXPENSE

Interest expense and effective interest rate calculations include the amortization of debt issuance costs.

Interest expense in fiscal 2015 decreased \$0.6 million from fiscal 2014 to \$27.0 million. Weighted-average borrowings for fiscal 2015 were \$585.9 million at an effective interest rate of 4.59%, compared to weighted-average borrowings for fiscal 2014 of \$586.0 million at an effective interest rate of 4.68%. The decrease in the effective interest rate for fiscal 2015 compared to fiscal 2014 was due primarily to a lower interest rate on the U.S. borrowings outstanding under our amended revolving credit agreement, partially offset by a higher interest rate on the new Canadian portion of the outstanding borrowings on our amended revolving credit agreement and higher debt issuance costs.

During fiscal 2015, we amended our revolving credit agreement to, among other things, achieve better pricing terms. The change in weighted-average borrowings between fiscal 2015 and fiscal 2014 was due solely to changes in foreign currency exchange rates between the U.S. and Canadian dollars.

OTHER EXPENSE, NET

Other expense (income), net is comprised primarily of net gains and losses on foreign currency transactions and foreign currency contracts. The amounts related to foreign currency represented a gain of \$1.8 million for fiscal 2015 and a loss of \$3.2 million for fiscal 2014.

As part of our overall strategy to manage the level of exposure to the risk of foreign currency exchange rate fluctuations, primarily between the U.S. dollar and Canadian dollar, in fiscal 2015 our Canadian subsidiary began using foreign currency forward contracts to hedge currency exposure on purchases that are made in U.S. dollars, primarily for inventory.

INCOME TAXES

Our consolidated effective tax rates for fiscal 2015 and 2014 were 35.4% and 35.7%, respectively.

NET INCOME

Our consolidated net income for fiscal 2015 increased \$43.2 million, or 22.2%, to \$237.8 million as compared to \$194.7 million in fiscal 2014, due to the factors previously discussed.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

FISCAL YEAR ENDED JANUARY 3, 2015 (53 WEEKS) COMPARED TO FISCAL YEAR ENDED DECEMBER 28, 2013 (52 WEEKS)

## U.S. COMPARABLE RETAIL SALES

The following table presents the percentage changes for our U.S. DTC comparable sales which were measured based on aligned years as previously discussed:

Increase (Decrease)	U.S. Direct-to-Consumer Comparable Sales	
	Change from 2013 to 2014	
	Carter's Retail	OshKosh Retail
Stores	(1.0)%	+3.3%
eCommerce	+26.1%	+27.4%
Total DTC	+3.7%	+7.3%

The increases in eCommerce comparable sales during the 2014 period were primarily due to an increase in the number of transactions.

## CONSOLIDATED NET SALES

Compared to fiscal 2013, consolidated net sales in fiscal 2014 increased \$255.2 million, or 9.7%, to 2.9 billion. The growth primarily reflected strength in both our Carter's segments and in our OshKosh Retail segment. The 53rd week in fiscal 2014 contributed approximately \$44.1 million in additional consolidated net sales. Changes in foreign currency exchange rates in fiscal 2014 as compared to fiscal 2013 negatively impacted consolidated net sales by approximately \$16.0 million, or 0.6%.

(dollars in thousands)	For the fiscal years ended				
	January 3, 2015 (53 weeks)	% of Total Net Sales	December 28, 2013 (52 weeks)	% of Total Net Sales	
Net sales:					
Carter's Retail	\$1,087,165	37.6	% \$954,160	36.2	%
Carter's Wholesale	1,081,888	37.4	% 1,035,420	39.2	%
Total Carter's	2,169,053	75.0	% 1,989,580	75.4	%
OshKosh Retail	335,140	11.6	% 289,311	11.0	%
OshKosh Wholesale	73,201	2.5	% 74,564	2.8	%
Total OshKosh	408,341	14.1	% 363,875	13.8	%
International	316,474	10.9	% 285,256	10.8	%
Total net sales	\$2,893,868	100.0	% \$2,638,711	100.0	%

CARTER'S RETAIL SALES

Carter's Retail net sales increased \$133.0 million, or 13.9%, in fiscal 2014 to \$1.1 billion. The increase in fiscal 2014 was primarily driven by an/a:

32

---

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

- Increase of \$87.7 million from new store openings;
- Increase of \$43.2 million in eCommerce sales;
- Decrease of \$9.0 million in comparable store sales driven by a decline in the number of transactions;
- Decrease of \$3.3 million due to the impact of store closings; and
- Increase of \$13.7 million in incremental net sales during the 53rd week of fiscal 2014, exclusive of the other factors noted above.

CARTER'S WHOLESALE SALES

Carter's Wholesale net sales increased \$46.5 million, or 4.5%, in fiscal 2014 to \$1.1 billion. This growth was reflected a 3.9% increase in average price per unit and a 0.6% increase in units shipped, as compared to fiscal 2013. Additionally, the 53rd week in fiscal 2014 contributed approximately \$19.4 million in additional net sales to the Carter's Wholesale segment.

OSHKOSH RETAIL SALES

OshKosh Retail net sales increased \$45.8 million, or 15.8%, in fiscal 2014 to \$335.1 million. The growth in net sales in fiscal 2014 was primarily driven by an/a:

- Increase of \$25.4 million from new store openings;
- Increase of \$12.7 million in eCommerce sales;
- Increase of \$7.0 million in comparable store sales driven by an increase in the average transaction value;
- Decrease of \$4.4 million due to the impact of store closings; and
- Increase of \$4.8 million in incremental net sales during the 53rd week of fiscal 2014, exclusive of the other factors noted above.

OSHKOSH WHOLESALE SALES

OshKosh Wholesale net sales decreased \$1.4 million, or 1.8%, in fiscal 2014 to \$73.2 million. Compared to fiscal 2013, the decrease in wholesale net sales reflected a 2.6% decline in units shipped, partially offset by a 0.8% increase in average price per unit. Additionally, the 53rd week in fiscal 2014 contributed approximately \$1.9 million in net sales to our OshKosh wholesale segment.

INTERNATIONAL SALES

Net sales in our International segment included our Canada and Japan retail operations, Canada wholesale sales, international eCommerce, and wholesale sales.

International net sales increased \$31.2 million, or 10.9%, in fiscal 2014 to \$316.5 million. This overall increase in net sales for fiscal 2014 reflected:

- \$14.0 million in incremental sales in our international wholesale locations excluding Canada;
- \$12.4 million in incremental sales in our Canadian wholesale business;
- \$11.8 million in incremental sales in our Canadian retail stores primarily due to new store openings; and

\$4.4 million in incremental sales from our international eCommerce business primarily due to the launch of the Canada website in fiscal 2014.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

These increases were partially offset by an \$11.5 million decrease in our retail operations in Japan, which we substantially exited in the first quarter of fiscal 2014. Changes in foreign currency exchange rates in fiscal 2014 as compared to fiscal 2013 negatively impacted the International segment's net sales by approximately \$16.0 million, or 5.7%. Additionally, sales that occurred during the 53rd week of fiscal 2014 totaled \$4.3 million for our International segment.

Comparable store sales in Canada declined 3.4% in fiscal 2014, which reflected the combined growth in the Carter's and OshKosh branded products that was more than offset by the discontinuation of the legacy Bonnie Togs private label brands.

GROSS PROFIT AND GROSS MARGIN

Our consolidated gross profit increased \$89.1 million, or 8.1%, to \$1.2 billion in fiscal 2014. Consolidated gross margin decreased from 41.5% in fiscal 2013 to 40.9% in fiscal 2014, primarily attributable to higher product costs and unfavorable foreign exchange rate movements, partially offset by a favorable mix of direct-to-consumer business and favorable freight expenses.

We include distribution costs in selling, general, and administrative expenses. Accordingly, our gross profit may not be comparable to other companies that include such distribution costs in their cost of goods sold.

SELLING, GENERAL, AND ADMINISTRATIVE ("SG&A") EXPENSES

Consolidated SG&A expenses in fiscal 2014 increased \$21.8 million, or 2.5%, to \$890.3 million. As a percentage of consolidated net sales, consolidated SG&A expenses decreased from 32.9% in fiscal 2013 to 30.8% in fiscal 2014.

The decrease in consolidated SG&A expenses, as a percentage of consolidated net sales, in fiscal 2014 primarily reflected a:

- \$26.6 million decrease in expenses associated with the office consolidation;
- \$13.0 million decrease in associated with our exit from Japan retail operations in the first quarter of 2014;
- \$7.7 million decrease in marketing expenses;
- \$3.3 million decrease in expenses associated with insurance and other employee benefits; and
- \$1.0 million decrease in incentive compensation expenses.

ROYALTY INCOME

We license the use of our Carter's, Just One You, Child of Mine, OshKosh B'gosh, OshKosh, Genuine Kids from OshKosh, and Precious Firsts brand names. Royalty income from these brands increased \$1.9 million, or 5.1%, to \$39.2 million in fiscal 2014.

OPERATING INCOME

Compared to 2013, consolidated operating income increased \$69.2 million, or 26.2%, to \$333.3 million in fiscal 2014. The table below summarizes the changes in each of our segments' operating results and unallocated corporate expenses during fiscal 2014:

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

(dollars in thousands)	Carter's Wholesale	Carter's Retail	OshKosh Wholesale	OshKosh Retail	International	Unallocated Corporate Expenses	Total
Operating income (loss) for fiscal 2013	\$185,501	\$181,169	\$9,796	\$(1,433)	\$40,641	\$(151,523)	\$264,151
Increase (decrease) in:							
Gross profit	2,240	63,458	(1,125)	21,210	2,070	1,208	89,061
Royalty income	(508)	1,297	263	316	536	—	1,904
SG&A expenses	1,770	34,627	92	11,883	3,777	(30,378)	21,771
Operating income (loss) for fiscal 2014	\$185,463	\$211,297	\$8,842	\$8,210	\$39,470	\$(119,937)	\$333,345

The following table summarizes the operating margin for each of our five operating segments in fiscal 2013 and fiscal 2014, as well as the primary drivers of the change in operating margin between those two periods. Each driver is presented in terms of the difference in that driver's margin (based on net sales) between fiscal 2013 and fiscal 2014, in each case expressed in basis points ("bps").

	Carter's Retail	Carter's Wholesale	OshKosh Retail	OshKosh Wholesale	International
Operating margin for fiscal 2013	19.0 %	17.9 %	(0.5 %)	13.1 %	14.2 %
Favorable (unfavorable) bps change in fiscal 2014:					
Gross profit	(90) bps	(100) bps	(20) bps	(120) bps	(400) bps
Royalty income	-	(10) bps	-	60 bps	-
SG&A expenses	130 bps	30 bps	310 bps	(40) bps	230 bps
Operating margin for fiscal 2014	19.4 % (a)	17.1 % (b)	2.4 % (c)	12.1 % (d)	12.5 % (e)

(a) Carter's Retail operating income in fiscal 2014 increased \$30.1 million, or 16.6%, from fiscal 2013 to \$211.3 million. The segment's operating margin increased 40 bps from 19.0% in fiscal 2013 to 19.4% in fiscal 2014. The primary drivers of the change in the operating margin were a:

- 30 bps decrease in SG&A expenses due primarily to a/an:
- 20 bps decrease in distribution and freight expenses;
- 40 bps decrease in marketing expenses due to the absence of television advertising in fiscal 2014;
- 40 bps increase in administrative expenses; and
- 90 bps decrease in gross profit primarily due to less favorable product costs.

(b) Carter's Wholesale operating income was \$185.5 million for both fiscal 2014 and fiscal 2013. The segment's operating margin decreased 80 bps from 17.9% in fiscal 2013 to 17.1% in fiscal 2014. The primary drivers of the change in the operating margin were a:

- 100 bps decrease in gross profit primarily due to less favorable product costs, partially offset by lower air freight related to inventory; and
- 30 bps decrease in SG&A expenses consisting primarily of a:
- 50 bps decrease in administrative expenses primarily due to cost savings from the office consolidation;
- 30 bps decrease in marketing expenses primarily due to the absence of television advertising in fiscal 2014; and

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

60 bps increase in distribution costs.

(c) OshKosh Retail operating income in fiscal 2014 increased \$9.6 million from fiscal 2013 to \$8.2 million. The segment's operating margin increased 290 bps from (0.5)% in fiscal 2013 to 2.4% in fiscal 2014. The primary drivers of the change in the operating margin were a:

- 10 bps decrease in SG&A expenses consisting primarily of a:
  - 250 bps decrease in retail store and eCommerce operating expenses;
  - 60 bps decrease in marketing expenses; and
  - 20 bps decrease in gross profit due primarily to less favorable product costs.

(d) OshKosh Wholesale operating income in fiscal 2014 decreased \$1.0 million, or 9.7%, from fiscal 2013 to \$8.8 million. The segment's operating margin decreased 100 bps from 13.1% in fiscal 2013 to 12.1% in fiscal 2014. The primary drivers of the change in the operating margin were a:

- 120 bps decrease in gross profit mainly due to less favorable product costs, inventory provisions, and increased promotional pricing;
- 60 bps increase in royalty income; and
- 40 bps increase in SG&A expenses primarily due to a:
  - 120 bps increase in distribution and freight costs;
  - 60 bps increase in administrative expenses; and
  - 160 bps decrease in marketing expenses primarily due to less advertising in fiscal 2014.

(e) International operating income in fiscal 2014 decreased \$1.2 million, or 2.9%, from fiscal 2013 to \$39.5 million. This segment's operating margin decreased 170 bps from 14.2% in fiscal 2013 to 12.5% in fiscal 2014. The primary drivers of the change in the operating margin were a:

- 400 bps decrease in gross profit primarily due to less favorable product costs and increased promotional pricing;
- 230 bps decrease in SG&A expenses due primarily to a:
  - 250 bps decrease in retail administration expenses due to the exit of retail operations in Japan;
  - 130 bps decrease in operating expenses related to our retail store and eCommerce; and
  - 120 bps increase in distribution and freight expenses.

Unallocated corporate expenses decreased by \$31.6 million, from \$151.5 million in fiscal 2013 to \$119.9 million in fiscal 2014. Unallocated corporate expenses as a percentage of consolidated net sales decreased from 5.7% in fiscal 2013 to 4.1% in fiscal 2014. The decrease in unallocated corporate expenses primarily reflected a:

- Decrease of \$26.6 million in expenses related to the completion of office consolidation and facility closures; and
- Decrease of \$3.3 million in insurance and other employee benefits.

#### INTEREST EXPENSE

Interest expense in fiscal 2014 increased \$14.2 million from fiscal 2013 to \$27.7 million. Weighted-average borrowings for fiscal 2014 were \$586.0 million at an effective interest rate of 4.68%, compared to weighted-average borrowings for fiscal 2013 of \$338.7 million at an effective interest rate of 3.92%. The increase in the effective interest rate (which includes the effect of the amortization of debt issuance costs) was primarily the result of a full year of interest expense in fiscal 2014 on the \$400 million senior notes that were issued in the third quarter of 2013 at an

interest rate of 5.25%.

Our financial results are subject to risks from interest rate fluctuations on our secured revolving credit facility, which carries variable interest rates. As of January 3, 2015, our outstanding variable rate debt aggregated \$186.0 million. An increase or

36

---

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

decrease of 1% in the applicable rate for our weighted-average borrowings would have increased or decreased our fiscal 2014 interest expense by approximately \$1.9 million.

OTHER EXPENSE, NET

Other expenses, net, in fiscal 2014 increased \$1.3 million, or 66.3% from fiscal 2013 to \$3.2 million primarily due to higher foreign currency losses in fiscal 2014.

INCOME TAXES

Our consolidated effective tax rate for both fiscal 2014 and fiscal 2013 was 35.7%.

NET INCOME

Our consolidated net income for fiscal 2014 increased \$34.3 million, or 21.4%, to \$194.7 million as compared to \$160.4 million in fiscal 2013 due to the cumulative impact of all the factors previously discussed.

FINANCIAL CONDITION, CAPITAL RESOURCES, AND LIQUIDITY

Our primary cash needs are for working capital and capital expenditures. We expect that our primary sources of liquidity will continue to be cash and cash equivalents on hand, cash flow from operations, and borrowings available under our secured revolving credit facility. We expect that these sources will fund our ongoing requirements for the foreseeable future. Further, we do not expect current economic conditions to prevent us from meeting our cash requirements. These sources of liquidity may be affected by events described in our risk factors, as further discussed in Part I, Item 1.A., Risk Factors, in this Annual Report on Form 10-K for the fiscal 2015 year ended January 2, 2016.

As of January 2, 2016, we had approximately \$381.2 million of cash and cash equivalents in major financial institutions, including approximately \$40.8 million in financial institutions located outside of the U.S. We maintain cash deposits with major financial institutions that exceed the insurance coverage limits provided by the Federal Deposit Insurance Corporation in the U.S. and by similar insurers for deposits located outside the U.S. To mitigate this risk, we utilize a policy of allocating cash deposits among major financial institutions that have been evaluated by us and third-party rating agencies.

BALANCE SHEET

Net accounts receivable at January 2, 2016 were \$207.6 million compared to \$184.6 million at January 3, 2015. The increase of \$23.0 million, or 12.5%, as compared to January 3, 2015 primarily reflected higher sales in fiscal 2015 and higher non-trade receivables such as supply chain rebates and tenant allowances. Net accounts receivable at January 3, 2015 were \$184.6 million compared to \$193.6 million at December 28, 2013. The decrease of \$9.0 million, or 4.7%, primarily reflected a decrease in other receivables primarily related to the 2014 collection of tenant improvement allowances for the new corporate headquarters facility.

Inventories at January 2, 2016 were \$469.9 million compared to \$444.8 million at January 3, 2015. The increase of \$25.1 million, or 5.6%, as compared to January 3, 2015, primarily reflected business growth, partially offset by lower product costs. Inventories at January 3, 2015 were \$444.8 million compared to \$417.8 million at December 28, 2013. The increase of \$27.0 million, or 6.5%, compared to December 28, 2013 primarily reflected an increase in inventory levels to support business growth and higher product costs as compared to the prior year.

#### CASH FLOW

Net cash provided by operating activities for fiscal 2015 was \$308.0 million compared to net cash provided by operating activities of \$282.4 million in fiscal 2014. The increase in operating cash flow primarily reflected an increase in net income

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

and favorable timing of payments for accounts payable, partially offset by higher outstanding accounts receivable at the end of fiscal year 2015 as compared to at the end of fiscal 2014.

Net cash provided by operating activities for fiscal 2014 was \$282.4 million compared to net cash provided by operating activities of \$209.7 million in fiscal 2013. This increase in operating cash flow for fiscal 2014 primarily reflected an increase in net income and favorable changes in net working capital. The timing of payments and receipts in the normal course of business can impact our working capital.

Our capital expenditures were approximately \$103.5 million in fiscal 2015 reflecting expenditures of \$66.7 million for our U.S. and international retail store openings and remodelings, \$19.5 million for information technology initiatives, \$6.3 million for the Braselton, Georgia distribution facility, and \$4.9 million for wholesale fixtures.

Our capital expenditures were approximately \$103.5 million in fiscal 2014 compared to \$182.5 million in fiscal 2013. Expenditures in fiscal 2014 primarily reflected expenditures of \$56.5 million for our U.S. and international retail store openings and remodelings, \$19.6 million for information technology initiatives, \$18.2 million for the Braselton, Georgia distribution facility, and \$8.5 million for the new corporate headquarters facility.

We plan to invest approximately \$115 million in capital expenditures in fiscal 2016, primarily for U.S. and international retail store openings and remodelings, and information technology initiatives.

Net cash used in financing activities was \$162.0 million in fiscal 2015 compared to \$122.4 million in fiscal 2014. This increase in fiscal 2015 primarily reflected increases in repurchases of our common stock, increases in payments of withholding taxes for vested restricted shares issued under our employee stock-based compensation plan, and increases in the payment of cash dividends. There was little net impact related to the activities with our revolving credit facility, which involved two cash transactions during fiscal 2015: first, in the first quarter in fiscal 2015, we replaced \$20.0 million of outstanding borrowings with CAD \$25.5 million of borrowings, which approximated \$20.3 million and second, in the third quarter of fiscal 2015, we amended and extended our revolving credit agreement and because of a change in the lead administrative agent and certain changes in commitment amounts among the lenders in the syndication, the amendment led to the repayment and simultaneous re-borrowing of the then-outstanding balance on the revolving credit agreement of approximately \$185.2 million.

Net cash used in financing activities was \$122.4 million in fiscal 2014 compared to \$84.7 million in fiscal 2013. This increase in fiscal 2014 was due primarily to higher cash dividends and repurchases of our common stock in excess of proceeds from issuance of senior notes.

#### AMENDED AND RESTATED CREDIT FACILITY

On September 16, 2015, we and a syndicate of lenders amended and restated our secured revolving credit facility (the "amended revolving credit facility") to, among other things: (i) refinance amounts outstanding on our existing credit facility in order to achieve better pricing terms and (ii) provide additional liquidity to be used for our ongoing working capital and for other general corporate purposes. The aggregate principal amount of the amended credit facility was increased from \$375 million to \$500 million to provide for (i) a \$400 million U.S. dollar revolving facility (including a \$175 million sub-limit for letters of credit and a swing line sub-limit of \$50 million) and (ii) a \$100 million multicurrency revolving facility (including a \$40 million sub-limit for letters of credit and a swing line sub-limit of \$15 million), available for borrowings denominated in U.S. dollars, Canadian dollars, Euros, Pounds Sterling, or other currencies agreed to by the applicable lenders. In connection with the amendment and restatement, we incurred approximately \$1.7 million in debt issuance costs which, together with the certain existing unamortized debt issuance costs, is being amortized over the remaining term of the amended facility (five years). Our amended revolving credit

facility matures September 16, 2020.

The interest rate margins applicable to our amended revolving credit facility were, as of the date here of, 1.375% for LIBOR-rate loans (which may be adjusted based on a leverage-based pricing grid ranging from 1.125% to 1.875%) and 0.375% for base-rate loans (which may be adjusted based on a leverage-based pricing grid ranging from 0.125% to 0.875%).

Our amended revolving credit facility also provides for incremental facilities in an aggregate amount not to exceed \$250 million, either in the form of a commitment increase under the existing credit facility or the incurrence of one or more tranches of term loans (with the aggregate U.S. dollar amount available to us not to exceed \$200 million and the aggregate multicurrency amount available not to exceed \$50 million).

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

As of January 2, 2016, we had approximately \$184.4 million in outstanding borrowings under our amended revolving credit facility, exclusive of \$7.7 million of outstanding letters of credit. As of January 2, 2016, there was approximately \$307.9 million available for future borrowings.

As of January 2, 2016, U.S. dollar borrowings outstanding under the amended revolving credit facility accrued interest at a LIBOR rate plus the applicable base rate, which was 1.72% on that date, and Canadian borrowings accrued interest at a CDOR (Canadian Dollar Offered Rate) rate plus the applicable base rate, which was 2.23% on that date.

Covenants

Subject to certain customary exceptions, the amended revolving credit facility contains covenants that restrict The William Carter Company's ("TWCC") and certain of its subsidiaries' ability to, among other things: (i) create or incur liens, debt, guarantees or other investments, (ii) engage in mergers and consolidations, (iii) pay dividends or other distributions to, and redemptions and repurchases from, equity holders, (iv) prepay, redeem or repurchase subordinated or junior debt, (v) amend organizational documents, and (vi) engage in certain transactions with affiliates.

The amended revolving credit facility also contains affirmative financial covenants. Specifically, we will not (i) permit at the end of any four consecutive fiscal quarters the Lease Adjusted Leverage Ratio (defined as, with certain adjustments, the ratio of the Company's consolidated indebtedness plus six times rent expense, as defined, to consolidated net income before interest, taxes, depreciation, amortization, and rent expense ("EBITDAR")) to exceed 4.00:1.00 (provided, however, that if any "Material Acquisition" occurs and the Lease Adjusted Leverage Ratio on a pro forma basis giving effect to the consummation of the Material Acquisition is less than 4.00:1.00, then the maximum Lease Adjusted Leverage Ratio may be increased to 4.50:1.00 for the fiscal quarter in which such Material Acquisition is consummated and the three fiscal quarters immediately following the fiscal quarter in which such Material Acquisition occurs) or (ii) permit at the end of any four consecutive fiscal quarters the Consolidated Fixed Charge Coverage Ratio (defined as, with certain adjustments, the ratio of consolidated EBITDAR to consolidated fixed charges (defined as interest plus rent expense)), for any such period to be less than 2.25:1.00 (provided, however, that if any Material Acquisition occurs and the Consolidated Fixed Charge Coverage Ratio on a pro forma basis giving effect to the consummation of the Material Acquisition is at least 2.25:1.00, then the minimum Consolidated Fixed Charge Coverage Ratio may be decreased to 2.00:1.00 for the fiscal quarter in which such Material Acquisition is consummated and the three fiscal quarters immediately following the fiscal quarter in which such Material Acquisition occurs). As of January 2, 2016, we were in compliance with our financial debt covenants.

SENIOR NOTES

On August 12, 2013, our 100% owned subsidiary, TWCC issued \$400 million principal amount of senior notes at par, bearing interest at a rate of 5.25% per annum, and maturing on August 15, 2021, all of which were outstanding as of January 2, 2016. TWCC received net proceeds from the offering of the senior notes of approximately \$394.2 million, after deducting bank fees. Approximately \$7.0 million, including both bank fees and other third party expenses, has been capitalized in connection with the issuance and is being amortized over the term of the senior notes.

The senior notes are unsecured and are fully and unconditionally guaranteed by Carter's, Inc. and certain subsidiaries of TWCC.

At any time prior to August 15, 2017, TWCC may redeem all or part of the senior notes at 100% of the principal amount redeemed plus an applicable premium and accrued and unpaid interest. On and after August 15, 2017, TWCC may redeem all or part of the senior notes at the redemption prices (expressed as percentages of principal amount of the senior notes to be redeemed) set forth below, plus accrued and unpaid interest. The redemption price applicable where the redemption occurs during the twelve-month period beginning on August 15 of each of the years indicated is

as follows:

Year	Percentage
2017	102.63%
2018	101.31%
2019 and thereafter	100.00%

In addition, until August 15, 2016, we may, at our option, redeem up to 35% of the aggregate principal amount of the senior notes at a redemption price equal to 105.25% of the aggregate principal amount, plus accrued and unpaid interest, subject to

39

---

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

certain terms, with the proceeds of certain equity offerings.

Upon the occurrence of specific kinds of changes of control, unless a redemption notice with respect to all the outstanding senior notes has previously or concurrently been mailed or delivered, we will be required to make an offer to purchase the senior notes at 101% of their principal amount. In addition, if we or any of our restricted subsidiaries engages in certain asset sales, under certain circumstances we will be required to use the net proceeds to make an offer to purchase the senior notes at 100% of their principal amount.

The indenture governing the senior notes includes a number of covenants, that, among other things and subject to certain exceptions, restrict TWCC's ability to: (i) incur, assume or guarantee additional indebtedness; (ii) issue disqualified stock and preferred stock; (iii) pay dividends, among other things, or make distributions or other restricted payments; (iv) prepay, redeem or repurchase certain debt; (v) make loans and investments (including joint ventures); (vi) incur liens; (vii) create restrictions on the payment of dividends or other amounts from restricted subsidiaries that are not guarantors of the notes; (viii) sell or otherwise dispose of assets, including capital stock of subsidiaries; (ix) consolidate or merge with or into, or sell substantially all of TWCC's assets to, another person; (x) designate subsidiaries as unrestricted subsidiaries; and (xi) enter into transactions with affiliates. Additionally, the terms of the notes contain customary affirmative covenants and provide for events of default which, if certain of them occur, would permit the trustee or the holders of at least 25% in principal amount of the then total outstanding senior notes to declare all amounts owing under the notes to be due and payable. Carter's, Inc. is not subject to these covenants.

During June 2014, TWCC completed the registration of the exchange offer for the senior notes that was required under the terms of such notes.

#### BONNIE TOGS ACQUISITION

On June 30, 2011, we purchased Bonnie Togs in Canada for total consideration of up to CAD \$95 million, of which \$61.2 million was paid in cash at closing and the balance to be paid contingent upon achieving certain earnings targets. In fiscal 2014, we paid approximately \$8.9 million after achieving interim earnings targets. In fiscal 2015, we made a final contingent consideration payment of approximately \$8.6 million of which approximately \$7.6 million was reported in the our consolidated statement of cash flows as a financing use of cash and the remaining portion, which represented a contingency adjustment, was reported as an operating use of cash. At January 2, 2016, we had no remaining contingent consideration liability related to the Bonnie Togs acquisition.

#### FACILITY CLOSURES

In 2013 and 2014, the Company consolidated its Shelton, Connecticut and Atlanta, Georgia offices, as well as certain functions from its other offices, into a new headquarters facility in Atlanta, Georgia. We have completed our consolidation efforts and the remaining balance in the accrual as of January 2, 2016 was approximately \$2.2 million, consisting primarily of costs related to a remaining lease liability. We do not expect to incur any additional costs related to our Atlanta and Shelton office consolidations.

In the fourth quarter of 2013, we made the decision to exit retail operations in Japan based on revised forecasts which did not meet our investment objectives. We recorded approximately \$1.5 million in closing related-costs for fiscal 2014 and \$3.0 million in fiscal 2013, primarily related to severance, accelerated depreciation, and other closing costs such as lease termination costs. During fiscal 2015, we did not incur any additional costs related to the exit of retail

operations in Japan, and we do not expect to incur any additional related costs in future periods.

#### SHARE REPURCHASES

In the second quarter of fiscal 2013, our Board of Directors authorized the repurchase of our common shares in an amount up to \$300 million, inclusive of amounts remaining under previous authorizations. In the third quarter of 2013, our Board of Directors authorized entry into two fixed-dollar accelerated stock repurchase ("ASR") agreements totaling \$400 million.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

The ASR agreements were settled in January 2014. As of the date of settlement, the Company had received a total of approximately 5.6 million shares. All shares received under the ASR agreements were retired upon receipt.

During the fiscal year ended January 3, 2015, we purchased, in open market transactions, and retired 1,111,899 shares of our common stock with an average share price of \$73.84 for an aggregate cost of approximately \$82.1 million.

During the fiscal year ended January 2, 2016, we purchased, in open market transactions, and retired 1,154,288 shares of our common stock with an average share price of \$95.55 for an aggregate cost of \$110.3 million.

The total remaining capacity under the repurchase authorizations as of January 2, 2016, was approximately \$74.8 million.

On February 24, 2016, our Board of Directors authorized a new \$500 million share repurchase program. The new share repurchase authorization permits us to repurchase shares of our common stock up to \$500 million, in addition to the approximate \$74.8 million remaining at January 2, 2016 under previous authorizations described above.

Future share repurchases may be made in the open market or in privately negotiated transactions, with the level and timing of activity being at management's discretion depending on market conditions, share price, other investment priorities, and other factors. The share repurchase authorizations have no expiration dates.

### DIVIDENDS

Our Board of Directors authorized quarterly cash dividends of \$0.22 per share in each quarter of fiscal 2015. The dividends were paid during the fiscal quarter in which they were declared.

On February 24, 2016, our Board of Directors authorized a quarterly cash dividend payment of \$0.33 per common share, payable on March 25, 2016 to shareholders of record at the close of business on March 11, 2016.

Future declarations of quarterly dividends and the establishment of future record and payment dates are at the discretion of our Board of Directors, and are based on a number of factors, including our future financial performance and other investment priorities.

Provisions in our secured revolving credit facility and indenture governing our senior notes could have the effect of restricting our ability to pay future cash dividends on or make future repurchases of our common stock.

### COMMITMENTS

The following table summarizes as of January 2, 2016, the maturity or expiration dates of mandatory contractual obligations and commitments for the following fiscal years:

(dollars in thousands)	2016	2017	2018	2019	2020	Thereafter	Total
Long-term debt (a)	\$—	\$—	\$—	\$—	\$186,000	\$400,000	\$586,000
Interest on debt (b)	24,266	24,266	24,266	24,266	23,450	35,000	155,514
Operating leases	141,707	136,104	127,376	115,097	104,317	369,410	994,011

Edgar Filing: CARTERS INC - Form 10-K

Other	392	392	365	231	231	673	2,284
Total financial obligations	166,365	160,762	152,007	139,594	313,998	805,083	1,737,809
Letters of credit	7,700	—	—	—	—	—	7,700
Total financial obligations and commitments (c) (d)	\$174,065	\$160,762	\$152,007	\$139,594	\$313,998	\$805,083	\$1,745,509

(a) Does not reflect potential currency impacts for debt repayable in Canadian dollars.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

(b) Reflects: 1) estimated variable rate interest on obligations outstanding on our secured revolving credit facility as of January 2, 2016 using an interest rate of 1.72% for U.S. dollar borrowings and an interest rate of 2.23% for Canadian borrowings and 2) a fixed interest rate of 5.25% for the senior notes.

(c) The table above excludes our reserves for income taxes, as we are unable to reasonably predict the ultimate amount or timing of settlement.

(d) The table above excludes purchase obligations. Our estimate as of January 2, 2016 for commitments to purchase inventory in the normal course of business, which are cancellable (with or without penalty, depending on the stage of production) and span a period of one year or less, was between \$300 and \$400 million.

(e) The table above excludes any potential future Company funding for obligations under our defined benefit retirement plans. Our estimates of such obligations as of January 2, 2016 have been determined in accordance with U.S. GAAP and are included in other current liabilities and other long-term liabilities on our consolidated balance sheet, as described in Note 10, Employee Benefit Plans, to the accompanying audited consolidated financial statements contained in Item 8 of this Annual Report on Form 10-K.

#### OFF-BALANCE SHEET OBLIGATIONS

We do not maintain off-balance sheet arrangements, transaction, obligations, or other relationships with unconsolidated entities except for those that are made in the normal course of our business and included in our Commitments table presented above.

#### LIQUIDITY OUTLOOK

Based on our current outlook, we believe that cash generated from operations and available cash, together with amounts available under our secured revolving credit facility, will be adequate to meet our working capital needs and capital expenditure requirements for the foreseeable future, although no assurance can be given in this regard.

#### EFFECTS OF INFLATION AND DEFLATION

We do not believe that inflation has had a significant effect on our net sales or our profitability. Substantial increases in cost, however, could have a significant impact on our business and the industry in the future. Additionally, while deflation could positively impact our merchandise costs, it could have an adverse effect on our average unit retail price, resulting in lower sales and profitability.

#### SEASONALITY

We experience seasonal fluctuations in our sales and profitability due to the timing of certain holidays and key retail shopping periods, which generally has resulted in lower sales and gross profit in the first half of our fiscal year versus the second half of the year. Accordingly, our results of operations during the first half of the year may not be indicative of the results we expect for the full year.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Our significant accounting policies are described in our accompanying audited consolidated financial statements. The following discussion addresses our critical accounting policies and estimates, which are those policies that require management's most difficult and subjective judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

REVENUE RECOGNITION AND ACCOUNTS RECEIVABLE ALLOWANCE

We recognize wholesale and eCommerce revenue after shipment of products to customers, when title passes, when all risks and rewards of ownership have transferred, the sales price is fixed or determinable, and collectibility is reasonably assured. In certain cases, in which we retain the risk of loss during shipment, revenue recognition does not occur until the goods have reached the specified customer. In the normal course of business, we grant certain accommodations and allowances to our wholesale customers to assist these customers with inventory clearance or promotions. Such amounts are reflected as a reduction of net sales and are recorded based upon agreements with customers, historical trends, and annual forecasts. Retail store revenues are recognized at the point of sale. We reduce revenue for estimated customer returns and deductions. We also maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make payments and for other estimated customer deductions. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, an additional allowance could be required. Past due balances over 90 days are reviewed individually for collectibility. Our credit and collections department reviews all other balances regularly. Account balances are charged off against the allowance when we believe it is probable the receivable will not be recovered.

We record cooperative advertising arrangements with major wholesale customers at fair value. Such fair value is determined based upon, among other factors, comparable market analysis for similar advertisements. We have included the fair value of these arrangements as a component of selling, general, and administrative expenses on the accompanying consolidated statements of operations rather than as a reduction of net sales. Amounts determined to be in excess of the fair value of these arrangements are recorded as a reduction of net sales.

INVENTORY

We provide reserves for slow-moving inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than we project, additional write-downs may be required.

GOODWILL AND TRADENAME

The carrying values of goodwill and indefinite-lived tradename assets are subject to annual impairment reviews as of the last day of each fiscal year. We perform impairment tests of goodwill at the reporting unit level. Between annual assessments, impairment reviews may also be triggered by any significant events or changes in circumstances affecting our business. Factors affecting such impairment reviews include the continued market acceptance of our current products and the development of new products. We use both qualitative and quantitative methods to assess for impairment, including the use of discounted cash flows ("income approach") and relevant data from guideline public companies ("market approach").

A qualitative assessment determines if it is "more likely than not" that the fair value of the reporting unit is less than its carrying value. Qualitative factors may include, but are not limited to: macroeconomic conditions; industry and market considerations; cost factors that may have a negative effect on earnings; overall financial performance; and other relevant entity-specific events.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

If it is determined that it is "more likely than not" that the fair value of the reporting unit is less than its carrying value, then the two-step goodwill impairment test using quantitative assessments is required to be performed.

If it is determined that it is "not likely" that the fair value of the reporting unit is less than its carrying value, then no further testing is required and the relevant qualitative factors supporting the strength in fair value are documented.

Under the quantitative assessment for goodwill, the first step is to compare the fair value of a reporting unit to its carrying value, including goodwill. We use discounted cash flow models to determine the fair value of a reporting unit. The assumptions used in these models are consistent with those we believe hypothetical marketplace participants would use. If the fair value of a reporting unit is less than its carrying value, the second step of the impairment test must be performed in order to determine the impairment loss, if any. The second step compares the implied fair value of the reporting unit goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit's goodwill exceeds its implied fair value, an impairment charge is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying amount of the goodwill.

A tradename is considered impaired if the estimated fair value of the tradename is less than the carrying amount. If a tradename is considered impaired, we recognize a loss equal to the difference between the carrying amount and the estimated fair value of the tradename. The process of estimating the fair value of a tradename incorporates the relief-from-royalty method, which requires us to make assumptions and to apply judgment, including forecasting future cash flows and selecting appropriate discount and royalty rates.

A deterioration of macroeconomic conditions may not only negatively impact the estimated operating cash flows used in our cash flow models, but may also negatively impact other assumptions used in our analysis, including, but not limited to, the estimated cost of capital and/or discount rates. Additionally, we are required to ensure that assumptions used to determine fair value in our analysis are consistent with the assumptions a hypothetical marketplace participant would use. As a result, the cost of capital and/or discount rates used in our analysis may increase or decrease based on market conditions and trends, regardless of whether our actual cost of capital has changed. Therefore, we may recognize an impairment of an intangible asset or assets even though realized actual cash flows are approximately equal to or greater than our previously forecast amounts.

Based upon our most recent assessment, performed as of January 2, 2016, there were no impairments in the values of goodwill or indefinite-lived tradename assets and no reporting units were at risk for impairment.

#### ACCRUED EXPENSES

Accrued expenses for workers' compensation, incentive compensation, health insurance, 401(k), and other outstanding obligations are assessed based on actual commitments, statistical trends, and/or estimates based on projections and current expectations, and these estimates are updated periodically as additional information becomes available.

#### LOSS CONTINGENCIES

We record accruals for various contingencies including legal exposures as they arise in the normal course of business. We determine whether to disclose and accrue for loss contingencies based on an assessment of whether the risk of loss is remote, reasonably possible, or probable. Our assessment is developed in consultation with our internal and external counsel and other advisors and is based on an analysis of possible outcomes under various strategies. Loss contingency assumptions involve judgments that are inherently subjective and can involve matters that are in litigation, which, by their nature are unpredictable. We believe that our assessment of the probability of loss

contingencies is reasonable, but because of the subjectivity involved and the unpredictable nature of the subject matter at issue, our assessment may prove ultimately to be incorrect, which could materially impact our consolidated financial statements.

#### ACCOUNTING FOR INCOME TAXES

As part of the process of preparing the accompanying audited consolidated financial statements, we are required to estimate our actual current tax exposure (state, federal, and foreign). We assess our income tax positions and record tax benefits for all years subject to examination based upon management's evaluation of the facts, circumstances, and information available at the reporting dates. We determine whether it is "more likely than not" that a tax position will be sustained upon the examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. For those income

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

tax positions where it is not "more likely than not" that a tax benefit will be sustained, no tax benefit has been recognized in the financial statements. Where applicable, associated interest and penalties are also recognized.

We also assess permanent and temporary differences resulting from differing bases and treatment of items for tax and accounting purposes, such as the carrying value of intangibles, deductibility of expenses, depreciation of property, plant, and equipment, stock-based compensation expense, and valuation of inventories. Temporary differences result in deferred tax assets and liabilities, which are included within our consolidated balance sheets. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income. Actual results could differ from this assessment if sufficient taxable income is not generated in future periods. To the extent we determine the need to establish a valuation allowance or increase such allowance in a period, we must include an expense within the tax provision in the accompanying consolidated statements of operations.

#### FOREIGN CURRENCY

The functional currency of substantially all of our foreign operations is the local currency.

Assets and liabilities are translated into U.S. dollars using the current exchange rates in effect at the balance sheet date, while revenues and expenses are translated at the average exchange rates for the period. The resulting translation adjustments are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity.

Transaction gains and losses, such as those resulting from the settlement of nonfunctional currency receivables and payables, including intercompany balances, are included in foreign currency gain or loss in our consolidated statements of operations. Additionally, payable and receivable balances denominated in nonfunctional currencies are marked-to-market at the end of each reporting period, and the gain or loss is recognized in our consolidated statements of operations.

As part of our overall strategy to manage the level of exposure to the risk of foreign currency exchange rate fluctuations, primarily between the U.S. dollar and Canadian dollar, our Canadian subsidiary may use foreign currency forward contracts to hedge purchases that are made in U.S. dollars, primarily for inventory purchases. As part of this hedging strategy, we use foreign currency forward exchange contracts that have maturities of less than 12 months to provide continuing coverage throughout the hedging period. As currently designed, these contracts are not designated for hedge accounting treatment, and therefore changes in the fair value of these contracts are recorded in our consolidated statement of operations. Such foreign currency gains and losses include the mark-to-market fair value adjustments at the end of each reporting period related to open contracts, as well as any realized gains and losses on contracts settled during the reporting period. Fair values are calculated by using readily observable market inputs (market-quoted currency exchange rates in effect between U.S. and Canadian dollars), classified as Level 2 within the fair value hierarchy.

#### EMPLOYEE BENEFIT PLANS

We sponsor a defined contribution (401(k)) plan, a frozen defined benefit pension plan and other unfunded post-retirement plans. The defined benefit pension and post-retirement plans require an actuarial valuation to determine plan obligations, and related periodic costs. Plan valuations require economic assumptions, including expected rates of return on plan assets, discount rates to value plan obligations and employee demographic assumptions including mortality rates. The applicable mortality tables were revised in 2014 and reflected increased

life expectancies for most all demographics. The actuarial assumptions used may differ materially from actual results due to changing market and economic conditions. Actual results that differ from the actuarial assumptions are reflected as unrecognized gains and losses. Unrecognized gains and losses that exceed 10% of the greater of the plan's projected benefit obligations or market value of assets are amortized to earnings over the estimated service life of the remaining plan participants.

Any future obligation under our pension plan not funded from investment returns on plan assets will be funded from cash flows from operations.

The most significant assumption used to determine the Company's projected benefit obligation under its defined benefit plans is the discount rate. See the employee benefit plans footnote to our accompanying audited consolidated financial statements for further details on rates and assumptions.

#### STOCK-BASED COMPENSATION ARRANGEMENTS

45

---

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

We account for the cost resulting from stock-based compensation arrangements at grant date fair value, utilizing the Black-Scholes option pricing model, which requires the use of subjective assumptions. These assumptions include the following:

**Volatility** – This is a measure of the amount by which a stock price has fluctuated or is expected to fluctuate. We use actual monthly historical changes in the market value of our stock covering the expected life of stock options being valued. An increase in the expected volatility will increase the fair value of the stock option and related compensation expense.

**Risk-free interest rate** – This is the U.S. Treasury rate as of the grant date having a term equal to the expected term of the stock option. An increase in the risk-free interest rate will increase the fair value of the stock option and related compensation expense.

**Expected term** – This is the period of time over which the stock options granted are expected to remain outstanding and is based on historical experience and estimated future exercise behavior. Separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. An increase in the expected term will increase the fair value of the stock option and related compensation expense.

**Dividend yield** – We estimate a dividend yield based on the current dividend amount as a percentage of our current stock price. An increase in the dividend yield will decrease the fair value of the stock option and related stock-based compensation expense.

**Forfeitures** – We estimate forfeitures of stock-based awards based on historical experience and expected future activity.

Changes in the subjective assumptions can materially affect the estimate of fair value of stock-based compensation and consequently, the related amount recognized in the accompanying consolidated statements of operations.

We account for performance-based awards over the vesting term of the awards that are expected to vest based on whether it is probable that the performance criteria will be achieved. We reassess the probability of vesting at each reporting period for awards with performance criteria and adjust stock-based compensation expense based on its probability assessment.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

CURRENCY AND INTEREST RATE RISKS

In the operation of our business, we have market risk exposures including those related to foreign currency risk and interest rates. These risks, and our strategies to manage our exposure to them, are discussed below.

Currency Risk

We contract for production with third parties primarily in Asia. While these contracts are stated in U.S. dollars, there can be no assurance that the cost for the future production of our products will not be affected by exchange rate fluctuations between the U. S. dollar and the local currencies of these contractors. Due to the number of currencies

involved, we cannot quantify the potential impact of future currency fluctuations on net income (loss) in future years.

The financial statements of our foreign subsidiaries that are denominated in functional currencies other than the U.S. dollar are translated into U.S. dollars using period-end exchange rates for assets and liabilities and weighted-average exchange rates for revenues and expenses. Gains and losses resulting from translating assets and liabilities from the functional currency to U.S. dollars are included in accumulated other comprehensive income (loss).

Our Canadian subsidiary records Canadian denominated sales which are then translated into U.S. dollars using weighted-average exchange rates. The changes in foreign currency exchange rates in fiscal 2015 as compared to fiscal 2014 negatively impacted international segment net sales in fiscal 2014 by \$35.1 million, primarily due to the devaluation of the Canadian dollar relative to the U.S. dollar.

Fluctuations in exchange rates, primarily between the U.S. dollar and the Canadian dollar, may affect our results of operations, financial position, and cash flows. Transactions by our Canadian subsidiary may be denominated in a currency other than the entity's functional currency, which is the Canadian dollar. Foreign currency transaction gains and losses also include the impact

of noncurrent intercompany loans with foreign subsidiaries that are marked to market. In our statement of operations, these gains and losses are recorded within other expense, net.

As part of our overall strategy to manage the level of exposure to the risk of foreign currency exchange rate fluctuations, primarily between the U.S. dollar and Canadian dollar, our Canadian subsidiary may use foreign currency forward contracts to hedge purchases that are made in U.S. dollars, primarily for inventory purchases. As part of this hedging strategy, we use foreign currency forward exchange contracts that have maturities of less than 12 months to provide continuing coverage throughout the hedging period.

#### Interest Rate Risk

Our operating results are subject to risk from interest rate fluctuations on our amended revolving credit facility, which carries variable interest rates. Weighted-average variable rate borrowings for the fiscal year ended January 2, 2016 were \$185.9 million. An increase or decrease of 1% in the effective interest rate on that amount would have increased or decreased our annual pretax interest cost for fiscal 2015 by approximately \$1.9 million.

#### OTHER RISKS

We enter into various purchase order commitments with our suppliers. We can cancel these arrangements, although in some instances, we may be subject to a termination charge reflecting a percentage of work performed prior to cancellation.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders' of Carter's, Inc.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Carter's, Inc. and its subsidiaries at January 2<sup>nd</sup>, 2016 and January 3<sup>rd</sup>, 2015, and the results of their operations and their cash flows for each of the three years in the period ended January 2<sup>nd</sup>, 2016 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 2<sup>nd</sup>, 2016, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

CARTER'S, INC.  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – THE COMPANY

Carter's, Inc. and its wholly owned subsidiaries (collectively, the "Company," and its) design, source, and market branded childrenswear under the Carter's, Child of Mine, Just One You, Precious Firsts, OshKosh, and other brands. The Company's products are sourced through contractual arrangements with manufacturers worldwide for wholesale distribution to major domestic and international retailers and for the Company's own retail stores and websites that market its brand name merchandise and other licensed products manufactured by other companies. As of January 2, 2016, the Company operated 594 Carter's domestic stores, 241 OshKosh domestic stores, and 147 Canadian stores.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

PRINCIPLES OF CONSOLIDATION

The accompanying audited consolidated financial statements include the accounts of Carter's, Inc. and its wholly owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation.

FISCAL YEAR

The Company's fiscal year ends on the Saturday, in December or January nearest the last day of December, resulting in an additional week of results every five or six years. Fiscal 2015, which ended on January 2, 2016, contained 52 weeks. Fiscal 2014, which ended on January 3, 2015, contained 53 weeks. Fiscal 2013, which ended on December 28, 2013, contained 52 weeks.

USE OF ESTIMATES IN THE PREPARATION OF THE CONSOLIDATED FINANCIAL STATEMENTS

The preparation of these consolidated financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

FOREIGN CURRENCY TRANSLATION AND TRANSACTIONS

Translation adjustments

The functional currency of substantially all of the Company's foreign operations is the local currency. Assets and liabilities are translated into U.S. dollars using the current exchange rates in effect at the balance sheet date, while revenues and expenses are translated at the average exchange rates for the period. The resulting translation adjustments are recorded as a component of accumulated other comprehensive income (loss) within the accompanying audited consolidated balance sheet.

Transaction adjustments

The Company also recognizes gains and losses on transactions that are denominated in a currency other than the respective entity's functional currency. Foreign currency transaction gains and losses also include intercompany loans

with foreign subsidiaries that are of a short-term investment nature. Foreign currency transaction gains and losses are recognized in earnings, as a separate component of other expense, net, within the audited consolidated statements of operations.

#### Foreign Currency Contracts

As part of the Company's overall strategy to manage the level of exposure to the risk of foreign currency exchange rate fluctuations, primarily between the U.S. dollar and Canadian dollar, the Company's Canadian subsidiary may use foreign currency forward contracts to hedge purchases that are made in U.S. dollars, primarily for inventory purchases. As part of this hedging strategy, the Company uses foreign currency forward exchange contracts that have maturities of less than 12 months to provide continuing coverage throughout the hedging period. As currently designed, the Company's contracts are not designated

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

for hedge accounting treatment, and therefore changes in the fair value of these contracts are recorded in other (income) expense, net in the Company's consolidated statement of operations. Such foreign currency gains and losses include the mark-to-market fair value adjustments at the end of each reporting period related to open contracts, as well as any realized gains and losses on contracts settled during the reporting period. The fair values of unsettled currency contracts are included in other current assets or other current liabilities on the Company's consolidated balance sheet. On the consolidated statement of cash flows, the Company includes all activity, including cash settlement of the contracts, as a component of cash flows from operations.

#### CASH AND CASH EQUIVALENTS

The Company considers all highly liquid investments that have original maturities of three months or less to be cash equivalents. Cash and cash equivalents consist of deposit accounts and cash management funds invested in U.S. government instruments. These investments are stated at cost, which approximates fair value.

#### Concentration of cash deposits risk

As of January 2, 2016, the Company had approximately \$381.2 million of cash and cash equivalents in major financial institutions, including approximately \$40.8 million in financial institutions located outside of the U.S. The Company maintains cash deposits with major financial institutions that exceed the insurance coverage limits provided by the Federal Deposit Insurance Corporation in the U.S. and by similar insurers for deposits located outside the U.S. To mitigate this risk, the Company utilizes a policy of allocating cash deposits among major financial institutions that have been evaluated by the Company and third-party rating agencies.

#### ACCOUNTS RECEIVABLE

The components of accounts receivable, net, as of January 2, 2016 and January 3, 2015 are as follows:

(dollars in thousands)	January 2, 2016	January 3, 2015
Trade receivables	\$ 185,046	\$ 173,962
Royalties receivable	11,164	9,978
Tenant allowances and other receivables	20,303	12,831
Total gross receivables	\$ 216,513	\$ 196,771
Less:		
Allowance for doubtful accounts	(8,543	) (11,808
Sales returns reserve	(400	) (400
Total reserves	(8,943	) (12,208
Accounts receivable, net	\$ 207,570	\$ 184,563

#### Concentration of credit risk

In each of fiscal 2015, 2014, and 2013, no one customer accounted for 10% or more of the Company's consolidated net sales.

At January 2, 2016, five customers each had individual receivable balances in excess of 10% of gross accounts receivable, and the total receivable balances due from these five customers in the aggregate equaled approximately

60% of total gross accounts receivable outstanding. At January 3, 2015, five customers each had individual receivable balances in excess of 10% of gross accounts receivable, and the total receivable balances due from these five customers in the aggregate equaled approximately 59% of total gross accounts receivable outstanding.

Allowance for doubtful accounts

The Company maintains an allowance for doubtful accounts for estimated losses resulting from the inability of its customers to make payments and other estimated deductions. If the financial condition of a customer were to deteriorate, resulting in an

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

impairment of its ability to make payments, an additional allowance could be required. Past due balances over 90 days are reviewed individually for collectibility. The Company's credit and collections department reviews all other balances regularly. Account balances are charged off against the allowance when it is probable that the receivable will not be recovered. The Company also records reserves for potential returns based on historical experience.

#### INVENTORIES

Inventories, which consist primarily of finished goods, are stated at the lower of cost (first-in, first-out basis for wholesale inventory and average cost for retail inventories) or market. The Company adjusts for slow-moving inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. The Company also adjusts its inventory to reflect estimated shrinkage based on historical trends.

#### PROPERTY, PLANT, AND EQUIPMENT

Property, plant, and equipment are stated at cost, less accumulated depreciation and amortization. When fixed assets are sold or otherwise disposed of, the accounts are relieved of the original cost of the assets and the related accumulated depreciation or amortization and any resulting profit or loss is credited or charged to income. For financial reporting purposes, depreciation and amortization are computed on the straight-line method over the estimated useful lives of the assets as follows: buildings and improvements from 15 to 26 years, retail store fixtures, equipment, and computers from 3 to 10 years, and computer software from 3 to 7 years. Leasehold improvements and fixed assets purchased under capital lease are amortized over the lesser of the asset life or related lease term. The Company capitalizes the cost of its fixtures designed and purchased for use at major wholesale accounts. The cost of these fixtures is amortized over 3 years.

#### GOODWILL AND OTHER INTANGIBLE ASSETS

The Company's goodwill balance is comprised of amounts related to the acquisition of Carter's, Inc. by a predecessor company and the acquisition of Bonnie Togs. The goodwill balances have indefinite useful lives and are not deductible for income tax purposes. The Company's other intangible assets are comprised of tradenames and non-compete agreements. The tradenames include Carter's, OshKosh, Carter's Watch the Wear, H.W. Carter & Sons, and the Carter's tradename in the country of Chile. The Carter's and OshKosh tradenames have indefinite useful lives. The Carter's Watch the Wear and H.W. Carter & Sons have definite lives and are being amortized on an accelerated basis over three years. The Carter's tradename in Chile has a definite life and is being amortized over a period of 20 years.

#### Annual impairment reviews

The carrying values of the goodwill and indefinite-lived tradename assets are subject to annual impairment reviews which are performed as of the last day of each fiscal year. Additionally, a review for potential impairment is performed whenever significant events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. Significant assumptions in the impairment models include estimates of future cash flows, discount rates, and, in the case of tradenames, royalty rates. Based upon the Company's most recent assessment, performed as of January 2, 2016, there were no impairments in the values of goodwill or indefinite-lived tradename assets and no reporting units were at risk of an impairment.

#### Goodwill

The Company performs impairment tests of its goodwill at the reporting unit level. Both qualitative and quantitative methods may be used to assess for impairment, including the use of discounted cash flows ("income approach") and relevant data from guideline public companies ("market approach").

Under a qualitative assessment, the Company determines if it is "more likely than not" that the fair value of the reporting unit is less than its carrying value. Qualitative factors may include, but are not limited to: macroeconomic conditions, industry and market considerations, cost factors that may have a negative effect on earnings, overall financial performance, and other relevant entity-specific events. If the Company determines that it is "more likely than not" that the fair value of the reporting unit is less than its carrying value, then the Company performs the two-step goodwill impairment test as required. If it is determined that it is "not likely" that the fair value of the reporting unit is less than its carrying value, then no further testing is required and the Company documents the relevant qualitative factors that support the strength in the fair value.

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The first step of a quantitative assessment is to compare the fair value of the reporting unit to its carrying value, including goodwill. The Company uses a discounted cash flow model to determine the fair value, using assumptions consistent with those of hypothetical marketplace participants. If the fair value of a reporting unit is less than its carrying value, the second step of the impairment test must be performed. The second step compares the implied fair value of the reporting unit goodwill with the carrying value of that goodwill, in order to determine the amount of the impairment loss and charge to the consolidated statement of operations.

#### Indefinite-lived tradenames

For indefinite-lived tradenames, the Company may utilize a qualitative assessment, as described above, to determine whether the fair value of an indefinite-lived asset is less than its carrying value. If a quantitative assessment is necessary, the Company determines fair value using a discounted cash flow model that uses the relief-from-royalty method. If the carrying amount exceeds the fair value of the tradename, an impairment charge is recognized in the amount of the excess.

#### IMPAIRMENT OF OTHER LONG-LIVED ASSETS

The Company reviews other long-lived assets, including property, plant, and equipment, and licensing agreements, for impairment whenever events or changes in circumstances indicate that the carrying amount of such an asset may not be recoverable. Management will determine whether there has been a permanent impairment on such assets held for use in the business by comparing anticipated undiscounted future cash flows from the use and eventual disposition of the asset or asset group to the carrying value of the asset. The amount of any resulting impairment will be calculated by comparing the carrying value to fair value, which may be estimated using the present value of the same cash flows. Long-lived assets that meet the definition of held for sale will be valued at the lower of carrying amount or fair value, less costs to sell.

#### DEFERRED DEBT ISSUANCE COSTS

Debt issuance costs associated with the Company's secured revolving credit facility and senior notes are deferred and amortized to interest expense over the term of the related debt using the effective interest method.

#### FAIR VALUE MEASUREMENTS

The fair value framework requires the Company to categorize certain assets and liabilities into three levels, based upon the assumptions used to price those assets or liabilities. The three levels are defined as follows:

- Level 1: Quoted prices in active markets for identical assets or liabilities.
- Level 2: Quoted prices for similar assets and liabilities in active markets or inputs that are observable.
- Level 3: Unobservable inputs reflecting management's own assumptions about the inputs used in pricing the asset or liability.

The Company measures its pension assets, deferred compensation plan investment assets, unsettled foreign currency forward contracts, and contingent consideration liability for acquisitions (if any) at fair value, as disclosed in the accompanying notes to the consolidated financial statements. The Company's cash and cash equivalents, accounts receivable, and accounts payable are short-term in nature. As such, their carrying value approximates fair value.

The carrying values of the Company's outstanding borrowings are not required to be remeasured and adjusted to the then-current fair values at the end of each reporting period. Instead, the fair values of the Company's outstanding borrowings are disclosed at the end of each reporting period in Note 7, Long-Term Debt, to the accompanying consolidated financial statements. Had the Company been required to remeasure and adjust the carrying values of its outstanding borrowings to fair value at the end of each reporting period, such fair value measurements would have been disclosed as a Level 2 liability in the fair value hierarchy.

## REVENUE RECOGNITION

Revenues consist of sales to customers, net of returns, accommodations, allowances, deductions, and cooperative advertising. The Company considers revenue realized or realizable and earned when the product has been shipped, when title passes, when

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

all risks and rewards of ownership have transferred, the sales price is fixed or determinable, and collectibility is reasonably assured. In certain cases, in which the Company retains the risk of loss during shipment, revenue recognition does not occur until the goods have reached the specified customer.

In the normal course of business, the Company grants certain accommodations and allowances to its wholesale customers in order to assist these customers with inventory clearance and promotions. Such amounts are reflected as a reduction of net sales and are recorded based on agreements with customers, historical trends, and annual forecasts.

The Company records its cooperative advertising arrangements with certain of its major wholesale customers at fair value. Fair value is determined based upon, among other factors, comparable market analysis for similar advertisements. The Company has included the fair value of these arrangements of approximately \$3.9 million for each of the fiscal years 2015, 2014, and 2013, as a component of selling, general, and administrative expenses on the accompanying consolidated statements of operations, rather than as a reduction of net sales. Amounts determined to be in excess of the fair value of these arrangements are recorded as a reduction of net sales.

Retail store revenues are recognized at the point of sale. The Company reduces revenue for estimated customer returns and deductions.

#### ACCOUNTING FOR SHIPPING AND HANDLING FEES AND COSTS

Shipping and handling costs include related labor costs, third-party shipping costs, shipping supplies, and certain distribution overhead. Such costs are absorbed by the Company and are included in selling, general, and administrative expenses. These costs amounted to approximately \$67.2 million, \$72.1 million, and \$59.1 million for fiscal 2015, 2014, and 2013, respectively.

With respect to the freight component of the Company's shipping and handling costs, certain customers arrange for shipping and pay the related freight costs directly to third parties. However, in the event that the Company arranges and pays the freight for these customers and bills them for this service, such amounts billed are included in revenue and the related cost is charged to cost of goods sold. In addition, shipping and handling costs billed to the Company's eCommerce customers are included in revenue and the related cost is charged to cost of goods sold. Amounts billed to customers for such costs were approximately \$11.0 million, \$12.3 million, and \$12.1 million for fiscal years 2015, 2014, and 2013, respectively.

#### INCOME FROM ROYALTIES AND LICENSE FEES

The Company licenses the Carter's, Just One You, Precious Firsts, Child of Mine, OshKosh B'gosh, OshKosh, and Genuine Kids from OshKosh trademarks to other companies for use on baby and young children's products, including bedding, outerwear, sleepwear, shoes, underwear, socks, room décor, toys, stationery, hair accessories, furniture, and related products. These royalties are recorded as earned, based upon the sales of licensed products by licensees and reported as royalty income in the statements of operations.

#### ADVERTISING EXPENSES

Costs associated with the production of advertising, such as writing, copy, printing, and other costs, are expensed as incurred. Costs associated with communicating advertising that has been produced, such as magazine costs and website banners, are expensed when the advertising event takes place.

## STOCK-BASED COMPENSATION ARRANGEMENTS

The Company recognizes the cost resulting from all stock-based payment transactions in the financial statements at grant date fair value. Stock-based compensation expense is recognized over the requisite service period, net of estimated forfeitures.

### Stock Options

The Company determines the fair value of stock options using the Black-Scholes option pricing model, which requires the use of the following subjective assumptions:

**Volatility** - This is a measure of the amount by which a stock price has fluctuated or is expected to fluctuate. The Company uses actual monthly historical changes in the market value of its stock covering the expected life of options

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

being valued. An increase in the expected volatility will increase the fair value of the stock option and related compensation expense.

Risk-free interest rate - This is the U.S. Treasury rate as of the grant date having a term equal to the expected term of the stock option. An increase in the risk-free interest rate will increase the fair value of the stock option and related compensation expense.

Expected term - This is the period of time over which the stock options granted are expected to remain outstanding and is based on historical experience and estimated future exercise behavior. Separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. An increase in the expected term will increase the fair value of the stock option and the related compensation expense.

Dividend yield - The Company estimates a dividend yield based on the current dividend amount as a percentage of the current stock price. An increase in the dividend yield will decrease the fair value of the stock option and the related compensation expenses.

Forfeitures - The Company estimates forfeitures of stock-based awards based on historical experience and expected future activity.

Changes in these subjective assumptions can materially affect the estimate of fair value of stock-based compensation expense and the related amount recognized in the audited consolidated statements of operations.

#### Time-Based Restricted Stock Awards

The fair value of time-based restricted stock awards is determined based on the quoted closing price of the Company's common stock on the date of grant and is recognized as compensation expense over the vesting term of the awards, net of estimated forfeitures.

#### Performance-Based Restricted Stock Awards

The Company accounts for its performance-based restricted stock awards based on the quoted closing price of the Company's common stock on the date of grant and records stock-based compensation expense over the vesting term of the awards based on the probability that the performance criteria will be achieved. The Company reassesses the probability of vesting at each reporting period and prospectively adjusts stock-based compensation expense based on its probability assessment.

#### Stock Awards

The fair value of stock granted to non-management board members is determined based on the quoted closing price of the Company's common stock on the date of grant. The Company records the stock-based compensation expense immediately as there are no vesting terms.

#### INCOME TAXES

The accompanying consolidated financial statements reflect current and deferred tax provisions. The deferred tax provision is determined under the liability method. Deferred tax assets and liabilities are recognized based on differences between the book and tax bases of assets and liabilities using presently enacted tax rates. Valuation

allowances are established when it is "more likely than not" that a deferred tax asset will not be recovered. The provision for income taxes is the sum of the amount of income taxes paid or payable for the year as determined by applying the provisions of enacted tax laws to the taxable income for that year, the net change during the year in deferred tax assets and liabilities, and the net change during the year in any valuation allowances.

The Company assesses its income tax positions and records tax benefits for all years subject to examination based upon management's evaluation of the facts, circumstances, and information available at the reporting dates. The Company determines whether it is "more likely than not" that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. For those tax positions where it is not "more likely than not" that a tax benefit will be sustained, no tax benefit is recognized. Where applicable, associated interest and penalties are also recorded. Interest is recorded as a component of interest expense and penalties, if any, are recorded

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

within the provision for incomes taxes in the consolidated statements of operations and are classified on the consolidated balance sheets with the related liability for uncertain tax contingency liabilities.

#### SUPPLEMENTAL CASH FLOW INFORMATION

Interest paid in cash approximated \$25.1 million, \$26.1 million, and \$3.8 million for fiscal years 2015, 2014, and 2013, respectively. Income taxes paid in cash approximated \$108.4 million, \$95.8 million and \$83.3 million for fiscal years 2015, 2014, and 2013, respectively.

Additions to property, plant and equipment of approximately \$6.1 million, \$2.0 million, and \$17.8 million were excluded from capital expenditures on the Company's consolidated statements of cash flows for fiscal years 2015, 2014, and 2013, respectively, since these amounts were accrued and unpaid at the end of each respective fiscal year.

The Company's consolidated statement of cash flows shows the following sources and uses of financing cash flows related to the Company's revolving credit facility during fiscal 2015. In the first quarter, the Company replaced \$20.0 million of outstanding borrowings under the then-existing amended revolving credit facility with CAD 25.5 million of borrowings, which approximated \$20.3 million. Additionally, because of a change in the lead administrative agent and certain changes in commitment amounts among the lenders in the syndication, the third quarter amendment to the Company's secured revolving credit facility led to the repayment and simultaneous re-borrowing of the then-outstanding balance on the secured revolving credit agreement of approximately \$185.2 million.

#### EARNINGS PER SHARE

The Company calculates basic and diluted net income per common share under the two-class method for unvested share-based payment awards that contain participating rights to dividends or dividend equivalents (whether paid or unpaid).

Basic net income per share is calculated by dividing net income for the period by the weighted-average common shares outstanding for the period. Diluted net income per share includes the effect of dilutive instruments and uses the average share price for the period in determining the number of shares that are to be added to the weighted-average number of shares outstanding.

#### OPEN MARKET REPURCHASES OF COMMON STOCK

Shares of the Company's common stock that are repurchased ("buy back") by the Company through open market transactions are retired. Through the end of fiscal 2015, all such open market repurchases have been at prices that exceeded the par value of the repurchased common stock, and the amounts of the purchase prices that exceeded par value were charged to additional paid-in capital or to retained earnings if the balance in additional paid-in capital was not sufficient.

#### EMPLOYEE BENEFIT PLANS

The Company has several defined benefit plans. Various actuarial methods and assumptions are used in determining net pension and post-retirement costs and obligations. Key assumptions include the discount rate used to determine the present value of future benefits and the expected long-term rate of return on plan assets. The over-funded or under-funded status of the defined benefit plans is recorded as an asset or liability on the consolidated balance sheet.

The gains or losses that arise during the period are recognized as a component of comprehensive income, net of tax. These costs are then subsequently recognized as components of net periodic benefit cost in the consolidated statements of operations.

#### FACILITY CLOSURE AND OFFICE CONSOLIDATION

The Company records severance costs when the appropriate notifications have been made to affected employees or when the decision is made, if the benefits are contractual. When employees are required to work for a period before termination, the severance costs are recognized over the required service period. Relocation and recruitment costs are expensed as incurred. For operating leases, lease termination costs are recognized at fair value at the date the Company ceases to use the leased property, and adjusted for the effects of deferred items recognized under the lease and reduced by estimated sub-lease rental income. Useful lives assigned to fixed assets at the facility to be closed are revised based on the specifics of the exit plan, resulting in accelerated depreciation expense.

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## LEASES AND DEFERRED RENT

The Company enters into a significant number of lease transactions related to properties for its retail stores in addition to leases for offices, distribution facilities, and other uses. The lease agreements may contain provisions related to allowances for property improvements, rent escalation, and free rent periods. Substantially all of these leases are classified as operating leases for accounting purposes.

For property improvement allowances, the Company records a deferred lease credit on the consolidated balance sheet and amortizes the deferred lease credit as a reduction of rent expense over the terms of the applicable lease. For scheduled rent escalation clauses during the lease term, the Company records rent expense on a straight-line basis over the term of the lease. The difference between the rent expense and the amount payable under the lease is included within the Company's liabilities on the consolidated balance sheet. The term of the lease over which the Company amortizes allowances and minimum rental expenses on a straight-line basis begins on the date of initial possession, which is generally when the Company enters the space and/or begins construction.

Where leases provide for contingent rents, which are generally determined as a percentage of gross sales, the Company records additional rent expense when management determines that achieving the specified level of revenue during the fiscal year is probable. Amounts accrued for contingent rent are included within the Company's liabilities on the consolidated balance sheet.

## SEASONALITY

The Company experiences seasonal fluctuations in its sales and profitability due to the timing of certain holidays and key retail shopping periods, typically resulting in lower sales and gross profit in the first half of its fiscal year. Accordingly, the Company's results of operations during the first half of the year may not be indicative of the results for the full year.

## RECENT ACCOUNTING PRONOUNCEMENTS

### Revenue Recognition

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09, Revenue from Contracts with Customers (Topic 606), which clarifies the principles for recognizing revenue. The guidance is applicable to all contracts with customers regardless of industry-specific or transaction-specific fact patterns. Further, the guidance requires improved disclosures as well as additional disclosures to help users of financial statements better understand the nature, amount, timing, and uncertainty of revenue that is recognized. The standard is effective for the Company beginning in the first quarter of fiscal 2018, including interim periods within that first fiscal year, and early adoption is now permitted for 2017. Upon becoming effective, the Company will apply the amendments in the updated standard either retrospectively to each prior reporting period presented, or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application. The Company is currently evaluating the impact of adopting this standard on its consolidated financial position, results of operations, and cash flows. Since the original issuance of ASU 2014-09, the FASB has issued several amendments to this guidance, and additional amendments are currently being considered by the FASB.

### Presentation of Debt Issuance Costs for Term Debt

In April 2015, the FASB issued ASU No. 2015-03, Simplifying the Presentation of Debt Issuance Costs ("ASU 2015-03"). Upon adoption, ASU 2015-03 will require debt issuance costs associated with outstanding term debt to be presented in the balance sheet as a direct reduction in the carrying value of the associated debt liability, consistent with the current presentation of a debt discount. For fees paid to lenders to secure revolving lines of credit, such fees will continue to be presented as a deferred charge (asset) on the balance sheet, as clarified in August 2015 by the FASB's issuance of ASU 2015-15, Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements ("ASU 2015-15"). Under guidance prior to ASU 2015-03, all debt issuance costs, for both term debt and revolving lines of credit, are presented in the balance sheet as a deferred charge (asset). ASU 2015-03 is limited to the presentation of debt issuance costs and will not affect the recognition and measurement of debt issuance costs. Upon adoption, ASU 2015-03 and ASU 2015-15 must be applied on a retrospective basis. The Company adopted the provisions of ASU 2015-03 and ASU 2015-15 at the beginning of fiscal 2016. Since ASU 2015-03 and ASU 2015-15 involve balance sheet presentation only, their adoption will not have any impact on the Company's results of operations, financial condition, or cash flows.

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### Simplified Measurement Date for Defined Benefit Plan Assets and Obligations

In April 2015, the FASB issued ASU No. 2015-04, Practical Expedient for the Measurement Date of an Employer's Defined Benefit Obligation and Plan Assets ("ASU 2015-04"). Upon adoption, ASU 2015-04 will allow employers with fiscal year ends that do not coincide with a calendar month end to make an accounting policy election to measure defined benefit plan assets and obligations as of the end of the month closest to their fiscal year end (i.e., on an alternative measurement date). An employer that makes this election must consistently apply the practical expedient from year to year and to all of its defined benefit plans. The Company adopted the provisions of ASU 2015-04 at the beginning of fiscal 2016 and the Company does not expect the adoption to have a material impact on the Company's benefit plans or the Company's results of operations, financial condition, or cash flows.

#### Accounting for Fees Paid in a Cloud Computing Arrangement

In April 2015, the FASB issued ASU No. 2015-05, Customer's Accounting for Fees Paid in a Cloud Computing Arrangement ("ASU 2015-05"). ASU 2015-05 provides new guidance for a customer's accounting for fees paid in a cloud computing arrangement. Previously, there was no specific U.S. GAAP guidance on accounting for such fees from the customer's perspective, and entities generally applied lease accounting guidance to acquired software licenses. Under ASU 2015-05, customers will apply the same criteria as vendors to determine whether a cloud computing arrangement contains a software license or is solely a service contract. More specifically, if a hosting arrangement includes a software license for internal use software, the software license will be capitalized and amortized over the life of the license, and a hosting arrangement that does not include software licenses will be accounted for as service contracts. For public entities, ASU 2015-05 is effective for annual periods, including interim periods, beginning after December 15, 2015. Early adoption is permitted. Entities will have the option of transitioning to the new guidance either retrospectively, or prospectively for all new transactions entered into or materially modified after the date of adoption. The Company prospectively adopted the provisions of ASU 2015-05 at the beginning of fiscal 2016, and the Company does not expect the adoption of ASU 2015-05 to have a material impact on the Company's results of operations, financial condition, or cash flows.

#### Simplified Subsequent Measurement of Inventory

In July 2015, the FASB issue ASU No. 2015-11, Inventory (Topic 330): Simplifying the Measurement of Inventory ("ASU 2015-11"). Upon adoption by an entity, ASU 2015-11 will simplify the subsequent measurement of inventory by replacing the current lower of cost or market test with a lower of cost and net realizable value test. The new guidance applies only to inventories for which cost is determined by methods other than last-in-first-out (LIFO) and the retail inventory method. For inventory within the scope of ASU 2015-11, entities will be required to compare the cost of inventory to only one measure, its net realizable value, and not the three measures required by current guidance ("market," "subject to a floor," and a "ceiling"). When evidence exists that the net realizable value of inventory is less than its cost (due to damage, physical deterioration, obsolescence, changes in price levels or other causes), entities will recognize the difference as a loss in earnings in the period in which it occurs. ASU 2015-11 is effective for public entities for fiscal years beginning after December 15, 2016, and interim periods within the year of adoption. Early adoption is permitted. The Company expects to adopt the provisions of ASU 2015-11 at the beginning of fiscal 2017. At this time, the Company does not believe the adoption of ASU 2015-11 will have a material impact on its consolidated financial condition, results of operations, or cash flows.

#### Balance Sheet Classification of Deferred Taxes

On November 20, 2015, the FASB issued ASU No. 2015-17, Balance Sheet Classification of Deferred Taxes ("ASU 2015-17"). Current GAAP requires the deferred taxes for each tax jurisdiction (or tax-paying component of a jurisdiction) to be presented as a net current asset or liability and net noncurrent asset or liability. This requires a jurisdiction-by-jurisdiction analysis based on the classification of the assets and liabilities to which the underlying temporary differences relate based on the period in which the attribute is expected to be realized. Upon adoption of

ASU 2015-17, all deferred tax assets and liabilities will be classified as noncurrent on an entity's balance sheet. As a result, each jurisdiction will have only one net noncurrent deferred tax asset or liability. ASU 2015-17 will not change the existing guidance that prohibits the offsetting of deferred tax liabilities of one jurisdiction against the deferred tax assets of another jurisdiction. ASU 2015-17 is effective for public entities in fiscal years beginning after December 15, 2016, including interim periods in the year of adoption. Early adoption is permitted, and adoption may be applied either prospectively or retrospectively. The Company plans to adopt ASU 2015-17 at the beginning of the first quarter of fiscal 2017. ASU 2015-17 will only involve classification of certain deferred tax assets and liabilities on the Company's consolidated balance sheet and will have no impact on the Company's results of operations or cash flows. The Company does not expect the adoption of ASU 2015-17 to be material to the Company's consolidated balance sheet.

## CARTER'S, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## NOTE 3 – ACQUISITION OF BONNIE TOGS

On June 30, 2011, the Company purchased all of the outstanding shares of capital stock of Bonnie Togs for total consideration of up to CAD \$95 million, of which USD \$61.2 million was paid in cash at closing. The Company made payments of approximately USD \$14.7 million and USD \$8.9 million related to the contingent consideration liability based on the achievement of interim earnings targets through June 2013 and 2014, respectively. In fiscal 2015, the Company made a final payment under the contingent consideration obligation of approximately USD \$8.6 million. Of this amount, approximately USD \$7.6 million is reported in the Company's consolidated statement of cash flows as a financing activity and the remaining portion, which represented the contingency adjustment recognized in the second quarter of fiscal 2015, is reported as an operating activity.

The following table summarizes the changes in the contingent consideration liability related to the 2011 acquisition of Bonnie Togs during fiscal 2013, 2014, and 2015 (dollars in thousands):

Balance at December 29, 2012		\$29,704	
Payments made		(14,721	)
Accretion expense		2,825	
Foreign currency translation adjustment		(1,460	)
Balance at December 28, 2013		16,348	
Payments made		(8,901	)
Accretion expense		1,348	
Foreign currency translation adjustment		(1,084	)
Balance at January 3, 2015		7,711	
Payments made		(8,568	)
Accretion expense		809	
Foreign currency translation adjustment		(1,029	)
Final contingent adjustment		1,077	
Balance at January 2, 2016		\$—	

## NOTE 4 – PROPERTY, PLANT, AND EQUIPMENT

Property, plant, and equipment, net consists of the following:

(dollars in thousands)	January 2, 2016	January 3, 2015	
Fixtures, equipment, computer hardware and software	\$367,593	\$325,852	
Land, buildings, and improvements	260,809	220,995	
Marketing fixtures	12,336	12,089	
Construction in progress	21,602	19,172	
	662,340	578,108	
Accumulated depreciation and amortization	(290,636	) (245,011	)
Total	\$371,704	\$333,097	

Depreciation and amortization expense related to property, plant, and equipment was approximately \$62.0 million, \$58.5 million, and \$54.7 million for fiscal years 2015, 2014, and 2013, respectively.

## NOTE 5 – GOODWILL AND OTHER INTANGIBLE ASSETS

Acquisition of Tradenames

In December 2014, the Company acquired the exclusive rights to the Carter's brands including trademark registrations in Chile. The Company acquired these rights in order to freely operate in Chile by offering products and service under the Carter's

64

---

## CARTER'S, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

brand. The total consideration paid was approximately \$3.6 million in cash and was accounted for as an asset acquisition. This tradename is being amortized over 20 years using a straight-line method.

In June 2013, the Company acquired worldwide rights to the Carter's Watch the Wear and H.W. Carter & Sons brands, including trademark registrations. The Company acquired these worldwide rights for defensive purposes to reduce brand confusion and facilitate expansion in certain key international markets. The total consideration paid was approximately \$38.0 million in cash and was accounted for as an asset acquisition. These tradenames are being amortized over three years, using an accelerated amortization method.

## Balance Sheet Components

The Company's goodwill and other intangible assets were as follows:

(dollars in thousands)	Weighted-average useful life	January 2, 2016			January 3, 2015		
		Gross amount	Accumulated amortization	Net amount	Gross amount	Accumulated amortization	Net amount
Carter's goodwill (1)	Indefinite	\$136,570	\$—	\$136,570	\$136,570	\$—	\$136,570

## CARTER'S, INC.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of January 2, 2016 and January 3, 2015, the cumulative pension liability adjustments were, net of tax effect, \$4.8 million and \$5.3 million, respectively. As of January 2, 2016 and January 3, 2015, the post-retirement liability adjustments were, net of tax effect, approximately \$0.8 million for each period.

For the fiscal years ended January 2, 2016 and January 3, 2015, amounts reclassified from accumulated other comprehensive loss to the consolidated statements of operations consisted of amortization of actuarial gains and losses related to the Company's defined benefit retirement plans. Such amortization amounts are included in the net periodic cost or benefit recognized for these plans during the respective fiscal year. See Note 10, Employee Benefit Plans, for additional details. Also, during the fiscal year ended January 3, 2015, approximately \$0.1 million was reclassified from cumulative translation adjustment into other expense, net on the consolidated statement of operations as a result of the completion of the Company's exit from retail operations in Japan.

## NOTE 7 – LONG-TERM DEBT

Long-term debt consisted of the following:

(dollars in thousands)	January 2, 2016	January 3, 2015
Senior notes	\$400,000	\$400,000
Secured revolving credit facility (1)	184,431	186,000
Total long-term debt	\$584,431	\$586,000

(1) Reported balance that is payable in Canadian dollars is subject to currency exchange rate changes.

## SENIOR NOTES

On August 12, 2013, the Company's 100% owned subsidiary, The William Carter Company ("TWCC") issued \$400 million principal amount of senior notes (the "senior notes") at par, bearing interest at a rate of 5.25% per annum, and maturing on August 15, 2021, all of which were outstanding as of January 2, 2016. At issuance, TWCC received net proceeds from the offering of the senior notes of approximately \$394.2 million, after deducting bank fees and other related fees. Approximately \$7.0 million, including both bank fees and other third party expenses, was capitalized in connection with the issuance and is being amortized over the term of the senior notes.

The senior notes are unsecured and are fully and unconditionally guaranteed by Carter's, Inc. and certain subsidiaries of TWCC. The guarantor subsidiaries are 100% owned directly or indirectly by Carter's, Inc. and all guarantees are joint, several and unconditional.

At any time prior to August 15, 2017, TWCC may redeem all or part of the senior notes at 100% of the principal amount redeemed plus an applicable premium and accrued and unpaid interest. On and after August 15, 2017, TWCC may redeem all or part of the senior notes at the redemption prices (expressed as percentages of principal amount of the senior notes to be redeemed) set forth below, plus accrued and unpaid interest. The redemption price applicable where the redemption occurs during the twelve-month period beginning on August 15 of each of the years indicated is as follows:

Year	Percentage	
2017	102.63	%
2018	101.31	%
2019 and thereafter	100.00	%

In addition, until August 15, 2016, TWCC may, at its option, redeem up to 35% of the aggregate principal amount of the senior notes at a redemption price equal to 105.25% of the aggregate principal amount, plus accrued and unpaid interest, subject to certain terms, with the proceeds of certain equity offerings.

Upon the occurrence of specific kinds of changes of control, unless a redemption notice with respect to all the outstanding senior notes has previously or concurrently been mailed or delivered, TWCC will be required to make an offer to purchase the senior

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

notes at 101% of their principal amount. In addition, if TWCC or any of its restricted subsidiaries engages in certain asset sales, under certain circumstances TWCC will be required to use the net proceeds to make an offer to purchase the senior notes at 100% of their principal amount.

The indenture governing the senior notes includes a number of covenants, that, among other things and subject to certain exceptions, restrict TWCC's ability and the ability of certain of its subsidiaries to: (a) incur, assume or guarantee additional indebtedness; (b) issue disqualified stock and preferred stock; (c) pay dividends or make distributions or other restricted payments; (d) prepay, redeem or repurchase certain debt; (e) make loans and investments (including joint ventures); (f) incur liens; (g) create restrictions on the payment of dividends or other amounts from restricted subsidiaries that are not guarantors of the notes; (h) sell or otherwise dispose of assets, including capital stock of subsidiaries; (i) consolidate or merge with or into, or sell substantially all of TWCC's assets to, another person; (j) designate subsidiaries as unrestricted subsidiaries; and (k) enter into transactions with affiliates. Specific provisions restrict the ability of the Company's operating subsidiary, TWCC, from paying cash dividends to Carter's, Inc. in excess of \$100.0 million plus an additional amount that builds based on 50% of our consolidated net income on a cumulative basis beginning with the third fiscal quarter of 2013 and subject to certain conditions, unless TWCC and its consolidated subsidiaries meet a leverage ratio requirement under the indenture, which could restrict Carter's, Inc. from paying cash dividends on our common stock. Additionally, the terms of the notes contain customary affirmative covenants and provide for events of default which, if certain of them occur, would permit the trustee or the holders of at least 25% in principal amount of the then total outstanding senior notes to declare all amounts owing under the notes to be due and payable. Carter's, Inc. is not subject to these covenants.

TWCC completed the required registered exchange offer during fiscal 2014.

#### SECURED REVOLVING CREDIT FACILITY

On October 15, 2010, the Company entered into a \$375 million (\$130 million sub-limit for letters of credit and a swing line sub-limit of \$40 million) secured revolving credit facility with Bank of America as sole lead arranger and administrative agent, JP Morgan Chase Bank as syndication agent, and other financial institutions. On December 22, 2011, the Company amended and restated the secured revolving credit facility to, among other things, provide a U.S. dollar secured revolving facility of \$340 million (including a \$130 million sub-limit for letters of credit and a swing line sub-limit of \$40 million) and a \$35 million multicurrency secured revolving facility (including a \$15 million sub-limit for letters of credit and a swing line sub-limit of \$5 million), which is available for borrowings by either TWCC or its Canadian subsidiary, in U.S. dollars or Canadian dollars.

On August 31, 2012, the Company and lenders amended and restated the secured revolving credit facility to, among other things, improve interest rates applicable to pricing, extend the maturity of the facility, and allow borrowings in currencies other than U.S. dollars or Canadian dollars subject to the consent of all multicurrency lenders. The aggregate principal amount of the facility remained unchanged at \$375 million consisting of a \$340 million U.S. dollar secured revolving credit facility and a \$35 million multicurrency secured revolving credit facility (although the sub-limit for U.S. dollar letters of credit was increased to \$175 million).

#### Amended and Restated Credit Facility

On September 16, 2015, the Company and a syndicate of lenders amended and restated the secured revolving credit facility (the "amended revolving credit facility") to, among other things: (i) refinance the Company's existing credit facility in order to achieve better pricing terms and (ii) provide additional liquidity to be used for ongoing working capital purposes and for general corporate purposes. The aggregate principal amount of the amended revolving credit

facility was increased from \$375 million to \$500 million to provide for (i) a \$400 million U.S. dollar revolving facility (including a \$175 million sub-limit for letters of credit and a swing line sub-limit of \$50 million) available for borrowings by TWCC and (ii) a \$100 million multicurrency revolving facility (including a \$40 million sub-limit for letters of credit and a swing line sub-limit of \$15 million), available for borrowing by TWCC and certain other subsidiaries of TWCC, in U.S. dollars, Canadian dollars, Euros, Pounds Sterling, or other currencies agreed to by the applicable lenders.

In connection with the amendment, the Company paid approximately \$1.6 million in debt issuance costs in connection with the amended and restated secured revolving credit agreement in fiscal 2015. These newly-incurred debt issuance costs, together with certain existing unamortized debt issuance costs, are being amortized over the remaining term of the amended revolving credit facility (five years). The amended revolving credit facility matures September 16, 2020.

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of January 2, 2016, the Company had approximately \$184.4 million in outstanding borrowings under its secured revolving credit facility, exclusive of \$7.7 million of outstanding letters of credit. As of January 2, 2016, there was approximately \$307.9 million available for future borrowing.

As of January 2, 2016, the interest rate margins applicable to the amended revolving credit facility were 1.375% for LIBOR (London Interbank Offered Rate) rate loans (which may be adjusted based on a leverage-based pricing grid ranging from 1.125% to 1.875%) and 0.375% for base rate loans (which may be adjusted based on a leverage-based pricing grid ranging from 0.125% to 0.875%).

At January 2, 2016, U.S. dollar borrowings outstanding under the secured revolving credit facility accrued interest at a LIBOR rate plus the applicable base rate, which was 1.72% on that date, and Canadian borrowing outstanding accrued interest at a CDOR rate plus the applicable base rate, which was 2.23% on that date.

#### Covenants

Subject to certain customary exceptions, the amended revolving credit facility contains covenants that restrict the Company's ability to, among other things: (i) create or incur liens, debt, guarantees or other investments, (ii) engage in mergers and consolidations, (iii) pay dividends or other distributions to, and redemptions and repurchases from, equity holders, (iv) prepay, redeem or repurchase subordinated or junior debt, (v) amend organizational documents, and (vi) engage in certain transactions with affiliates.

The amended revolving credit facility also contains affirmative financial covenants. Specifically, TWCC and its subsidiaries will not (i) permit at the end of any four consecutive fiscal quarters the Lease Adjusted Leverage Ratio (defined as, with certain adjustments, the ratio of the Company's consolidated indebtedness plus six times rent expense, as defined, to consolidated net income before interest, taxes, depreciation, amortization, and rent expense ("EBITDAR")) to exceed 4.00:1.00 (provided, however, that if any "Material Acquisition" occurs and the Lease Adjusted Leverage Ratio on a pro forma basis giving effect to the consummation of the Material Acquisition is less than 4.00:1.00, then the maximum Lease Adjusted Leverage Ratio may be increased to 4.50:1.00 for the fiscal quarter in which such Material Acquisition is consummated and the three fiscal quarters immediately following the fiscal quarter in which such Material Acquisition occurs) or (ii) permit at the end of any four consecutive fiscal quarters the Consolidated Fixed Charge Coverage Ratio (defined as, with certain adjustments, the ratio of consolidated EBITDAR to consolidated fixed charges (defined as interest plus rent expense)), for any such period to be less than 2.25:1.00 (provided, however, that if any Material Acquisition occurs and the Consolidated Fixed Charge Coverage Ratio on a pro forma basis giving effect to the consummation of the Material Acquisition is at least 2.25:1.00, then the minimum Consolidated Fixed Charge Coverage Ratio may be decreased to 2.00:1.00 for the fiscal quarter in which such Material Acquisition is consummated and the three fiscal quarters immediately following the fiscal quarter in which such Material Acquisition occurs).

The amended revolving credit facility also provides that certain covenants fall away and that the liens over the collateral securing each of the Company and certain subsidiaries' collective obligations are released following, among other things, the achievement of, and during the maintenance of, investment grade ratings by Moody's Investor Services, Inc. and Standard & Poor's Ratings Services.

The amended revolving credit facility also provides for incremental facilities in an aggregate amount not to exceed \$250 million, either in the form of a commitment increase under the existing credit facility or the incurrence of one or more tranches of term loans (with the aggregate U.S. dollar amount available to the Company not to exceed \$200 million and the aggregate multicurrency amount available not to exceed \$50 million).

As of January 2, 2016, the Company was in compliance with its financial debt covenants under the secured revolving credit facility.

#### NOTE 8 – COMMON STOCK

##### SHARE REPURCHASES

In the second quarter of fiscal 2013, the Company's Board of Directors authorized the repurchase of shares in an amount up to \$300 million, inclusive of amounts remaining under previous authorizations. In the third quarter of 2013, the Company's Board of Directors authorized entry into two fixed-dollar accelerated stock repurchase ("ASR") agreements totaling \$400 million.

Final settlement of the ASR agreements occurred in January 2014. As of final settlement, the Company had received a total of approximately 5.6 million shares, of which approximately one million million shares were received in January 2014. The total

CARTER'S, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

fair market value, at trade dates, of the shares was approximately \$398.7 million. All shares received under the ASR agreements were retired upon receipt. The ASR agreements were treated as equity classified forward contracts indexed to the Company's own stock.

During the fiscal year ended January 2, 2016, the Company repurchased, in open market transactions, and retired 1,154,288 shares with an average share price of \$95.55 for an aggregate amount of \$110.3 million. During the fiscal year ended January 3, 2015, the Company repurchased, in open market transactions, and retired 1,111,899 shares with an average share price of \$73.84 for an aggregate amount of \$82.1 million.

The total remaining capacity under the repurchase authorizations as of January 2, 2016, was approximately \$74.8 million.

On February 24, 2016, the Company's Board of Directors authorized a new \$500 million share repurchase program. The new share repurchase authorization permits the Company to repurchase shares of its common stock up to \$500 million, in addition to the approximate \$74.8 million remaining at January 2, 2016 under previous authorizations described above.

Future share repurchases may occur from time to time in the open market, in negotiated transactions, or otherwise. The timing and amount of any repurchases will be determined by the Company's management, based on its evaluation of market conditions, share price, other investment priorities, and other factors. The share repurchase authorizations have no expiration dates.

## DIVIDENDS

In fiscal 2015 the Company's Board of Directors paid quarterly cash dividends of \$0.22 per share during all four quarters. In fiscal 2014 the Company's Board of Directors paid quarterly cash dividends of \$0.19 per share during all four quarters.

On February 24, 2016, the Company's Board of Directors authorized a quarterly cash dividend payment of \$0.33 per common share, payable on March 25, 2016 to shareholders of record at the close of business on March 11, 2016.

Future declarations of dividends and the establishment of future record and payment dates are at the discretion of the Company's Board of Directors based on a number of factors, including the Company's future financial performance and other investment priorities.

Provisions in the Company's secured revolving credit facility and indenture governing its senior notes could have the effect of restricting the Company's ability to pay future cash dividends on or make future repurchases of its common stock, as further described in Note 7, Long-Term Debt.

## NOTE 9 – STOCK-BASED COMPENSATION

Under the Company's Amended and Restated Equity Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors may award incentive stock options, stock appreciation rights, restricted stock, unrestricted stock, stock deliverable on a deferred basis (including restricted stock units), and performance-based stock awards.

At the Company's May 13, 2011 shareholders' meeting, the shareholders approved an amendment to the Plan to (i) increase the maximum number of shares of stock available under the existing Plan by 3,725,000 shares from

12,053,392 shares to 15,778,392 shares and (ii) eliminate the Company's ability to grant cash awards and provide tax gross-ups under the Plan. As of January 2, 2016, there were 2,041,526 shares available for grant under the Plan. The Plan makes provision for the treatment of awards upon termination of service or in the case of a merger or similar corporate transaction. Participation in the Plan is limited to members of the Company's board of directors, executive officers and other key employees.

The limit on shares available under the Plan, the individual limits, and other award terms are subject to adjustment to reflect stock splits or stock dividends, combinations, and certain other events. All stock options issued under the Plan expire no later
