The Trust's investment objective is to maximize total return by providing a high level of current income, the potential for growth of income, and capital appreciation. The Trust's principal investments are privately placed, below-investment grade (as defined below), long-term debt obligations purchased directly from their issuers, which tend to be smaller companies. These investments may include equity features such as warrants, conversion rights, or other equity features that provide the Trust with the opportunity to realize capital gains. The Trust will also invest in publicly traded debt securities (including high yield securities), and in convertible preferred stocks and, subject to certain limitations, readily marketable equity securities. Below- investment grade or high yield securities have predominantly speculative characteristics with respect to the capacity of the issuer to pay interest and repay principal. TO OUR SHAREHOLDERS

April 30, 2015

We are pleased to present the March 31, 2015 Quarterly Report of Babson Capital Participation Investors (the "Trust").

The Board of Trustees declared a quarterly dividend of \$0.27 per share, payable on May 15, 2015 to shareholders of record on May 1, 2015. The Trust paid a \$0.27 per share dividend for the preceding quarter. The Trust earned \$0.24 per share of net investment income, including \$0.03 per share of non-recurring income, for the first quarter of 2015, compared to \$0.26 per share, including \$0.03 per share of non-recurring income, in the previous quarter.

During the first quarter, the net assets of the Trust increased to \$143,704,328 or \$13.93 per share compared to \$137,568,919 or \$13.35 per share on December 31, 2014. This translates into a 4.3% total return for the quarter, based on the change in the Trust's net assets assuming the reinvestment of all dividends. Longer term, the Trust returned 15.2%, 14.3%, 14.4%, 12.1% and 12.4% for the 1, 3, 5, 10, and 25-year periods, respectively, based on the change in the Trust's net assets assuming the reinvestment of all dividends.

The Trust's share price decreased 8.3% during the quarter, from \$13.23 per share as of December 31, 2014 to \$12.13 per share as of March 31, 2015. The Trust's market price of \$12.13 per share equates to a 12.9% discount to the March 31, 2015 net asset value per share of \$13.93. The Trust's average quarter-end premium for the 3, 5 and 10-year periods was 7.2%, 11.6% and 8.9%, respectively. U.S. equity markets, as approximated by the Russell 2000 Index, increased 4.3% for the quarter. U.S. fixed income markets, as approximated by the Barclays Capital U.S. Corporate High Yield Index, increased 2.5% for the quarter.

The Trust closed five new private placement investments during the first quarter. The five new investments were in AFC - Dell Holding Corporation, Animal Supply Company, Compass Chemical International LLC, Tristar Global Energy Solutions, Inc. and York Wall Holding Company. A brief description of these investments can be found in the Consolidated Schedule of Investments. The total amount invested by the Trust in these transactions was \$7,746,000.

It was an active first quarter for the Trust in terms of new investments. Middle market merger and acquisition activity, a key driver of deal flow for the Trust, was steady during the quarter. We expect deal flow to remain steady for the rest of the year, assuming no significant external shocks to the market, so we are optimistic about the level of new investment activity for the Trust through year end. The dark cloud on the horizon though, continues to be the high purchase prices and leverage levels that are common in buyout transactions today. Average purchase price multiples for small companies continue to be at their highest levels in the past 15 years. Leverage multiples are also elevated and are near their highs of the past 15 years as well. Though we are actively making new investments on behalf of the Trust in this market, we do so cautiously and with discipline, consistent with our longstanding investment philosophy of seeking to take prudent levels of risk and getting paid appropriately for the risk taken. We are not willing to provide financial leverage at levels that we believe are imprudent. This approach has served us well over the long term and through all kinds of market cycles.

The condition of the Trust's existing portfolio remained solid through the first quarter. We had significantly more credit upgrades then downgrades during the quarter. The number of companies on our watch list and in default continues to be at or near the lowest level we have seen over the last five years. We successfully exited five investments and benefited from dividends associated with the recapitalization of one company during the quarter. We realized significant gains from these transactions. We continue to have a backlog of portfolio companies that are in the

process of being sold, with a number of these expected to close this year. We had five portfolio companies fully or partially prepay their debt instruments held by the Trust during the quarter. This lower level of prepayment activity is welcome after the unprecedented levels of prepayments we experienced in 2013 and early 2014.

(Continued)

The Trust was able to maintain its \$0.27 per share quarterly dividend for the first quarter even though net investment income per share, excluding non-recurring income, was once again below the dividend rate. Net investment income per share from recurring sources has been below the dividend rate for every quarter since the second quarter of 2012. As we have discussed in prior reports, net investment income is down due principally to the considerable reduction in the number of private debt securities in the portfolio resulting from the high level of exit and prepayment activity that has occurred in recent quarters. We have been able to maintain the \$0.27 per share quarterly dividend with current income, non-recurring income and earnings carried forward from prior quarters. Over time, however, the Trust's dividend-paying ability tends to be correlated with its recurring earnings capacity. Absent non-recurring income, earnings available for the quarterly dividend would have been \$0.21 per share for the first quarter. This quarter, the Trust earned an additional \$0.03 per share of non-recurring income, and utilized \$0.03 per share of earnings carry-forwards to maintain the \$0.27 per share quarterly dividend. The Trust continues to have available earnings carry-forwards which should be available to supplement recurring income for the next few quarters. Unless market conditions change dramatically though, it is still unlikely that we will be able to rebuild the portfolio back to its former size in the near term and grow net investment income. As a result, it is likely that in 2015 we will have to reduce the dividend from the current \$0.27 per share quarterly rate. As we move through 2015, we and the Board of Trustees will continue to evaluate the current and future earnings capacity of the Trust and formulate a dividend strategy that is consistent with that earnings level.

Thank you for	r your continued	interest in and	l support of	Babson	Capital	Participation	Investors.

Sincerely,

Michael L. Klofas President
