PART I

ITEM 1. BUSINESS.

In this Annual Report on Form 10-K, we refer to Umpqua Holdings Corporation as the "Company," "Umpqua," "we," "us," "our," or similar references; to Sterling Financial Corporation as "Sterling"; and to the merger of Sterling with and into Umpqua effective as of April 18, 2014, as the "Sterling merger" or the "Merger." This Annual Report on Form 10-K contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbor for "forward-looking statements" provided by the Private Securities Litigation Reform Act of 1995. These statements may include statements that expressly or implicitly predict future results, performance or events. Statements other than statements of historical fact are forward-looking statements. You can find many of these statements by looking for words such as "anticipates," "expects," "believes," "estimates" and "intends" and words or phrases of similar meaning. We make forward-looking statements regarding projected sources of funds, availability of acquisition and growth opportunities, dividends, adequacy of our allowance for loan and lease losses, reserve for unfunded commitments and provision for loan and lease losses, performance of troubled debt restructurings, our commercial real estate portfolio and subsequent chargeoffs, our covered loan portfolio and the Federal Deposit Insurance Corporation ("FDIC") indemnification asset, the benefits of the Financial Pacific leasing, Inc. ("FinPac") acquisition, and the merger ("Merger") with Sterling Financial Corporation, the Sterling merger integration, and the impact of Basel III on our capital. Forward-looking statements involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond our control. There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Risks and uncertainties that could cause our financial performance to differ materially from our goals, plans, expectations and projections expressed in forward-looking statements include those set forth in our filings with the Securities and Exchange Commission ("SEC"), Item 1A of this Annual Report on Form 10-K, and the following:

- our ability to attract new deposits and loans and leases;
 - demand for financial services in our market areas;
 - competitive market pricing factors;
 - deterioration in economic conditions that could result in increased loan and lease losses;
 - risks associated with concentrations in real estate related loans;
 - market interest rate volatility;
 - compression of our net interest margin;
 - stability of funding sources and continued availability of borrowings;
 - changes in legal or regulatory requirements or the results of regulatory examinations that could restrict growth;
 - our ability to recruit and retain key management and staff;
 - availability of, and competition for acquisition opportunities;
 - risks associated with merger and acquisition integration;
 - significant decline in the market value of the Company that could result in an impairment of goodwill;
 - our ability to raise capital or incur debt on reasonable terms;
 - regulatory limits on the Bank's ability to pay dividends to the Company;
 - the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") on the Company's business operations, including the impact of provisions and regulations related to executive compensation; FDIC deposit insurance assessments, and interchange fees, which may affect our regulatory compliance costs, interest expense and ability to recruit executives; and
 - the impact of the new "Basel III" capital rules issued by federal banking regulators in July 2013 ("Basel III Rules") including on the fair value, of our trust preferred securities.
- benefits from the Merger may not be fully realized or may take longer to realize than expected, including as a result of
- changes in general economic and market conditions, interest rates, monetary policy, laws and regulations and their enforcement, and the degree of competition in the geographic and business areas in which we operate;
 - Merger integration may take longer to accomplish than expected;
 -

the anticipated growth opportunities and cost savings from the Merger may not be fully realized or may take longer to realize than expected;

3

Table of Contents

operating costs, customer losses and business disruption following the Merger and during integration activities, including adverse developments in relationships with employees, may be greater than expected; and management time and effort will be diverted to the resolution of Merger-related issues.

For a more detailed discussion of some of the risk factors, see the section entitled "Risk Factors" below. We do not intend to update any factors, except as required by SEC rules, or to publicly announce revisions to any of our forward-looking statements. Any forward-looking statement speaks only as of the date that such statement was made. You should consider any forward looking statements in light of this explanation, and we caution you about relying on forward-looking statements.

Introduction

Umpqua Holdings Corporation, an Oregon corporation, was formed as a bank holding company in March 1999. At that time, we acquired 100% of the outstanding shares of South Umpqua Bank, an Oregon state-chartered bank formed in 1953. We became a financial holding company in March 2000 under the provisions of the Gramm-Leach-Bliley Act of 1999 ("GLB Act"). Umpqua has two principal operating subsidiaries, Umpqua Bank (the "Bank") and Umpqua Investments, Inc. ("Umpqua Investments").

We file annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and other information with the SEC. You may obtain these reports, and any amendments, from the SEC's website at www.sec.gov. You may obtain copies of these reports, and any amendments, through our website at www.umpquaholdingscorp.com. These reports are available through our website as soon as reasonably practicable after they are filed electronically with the SEC.

General Background

With headquarters located in Roseburg, Oregon, Umpqua Bank is considered one of the most innovative community banks in the United States and has implemented a variety of retail marketing strategies to increase revenue and differentiate itself from its competition. The Bank combines a high touch customer experience with the sophisticated products and expertise of a commercial bank. The Bank provides a wide range of banking, wealth management, mortgage and other financial services to corporate, institutional, and individual customers. The Bank also has a wholly-owned subsidiary, Financial Pacific Leasing Inc., a commercial equipment leasing company.

Umpqua Investments is a registered broker-dealer and registered investment advisor with offices in Portland, Lake Oswego, and Medford, Oregon, and Santa Rosa, California, and also offers products and services through Umpqua Bank stores. The firm is one of the oldest investment companies in the Northwest and is actively engaged in the communities it serves. Umpqua Investments offers a full range of investment products and services including: stocks, fixed income securities (municipal, corporate, and government bonds, CDs, and money market instruments), mutual funds, annuities, options, retirement planning, money management services and life insurance.

Along with its subsidiaries, the Company is subject to the regulations of state and federal agencies and undergoes periodic examinations by these regulatory agencies.

Recent Development

As of the close of business on April 18, 2014, the Company completed its merger with Sterling Financial Corporation, a Washington corporation ("Sterling"). The results of Sterling's operations are included in the Company's financial results beginning April 19, 2014 and the combined company's banking operations are operating under the Umpqua Bank name and brand.

Business Strategy

Umpqua Bank's principal objective is to become the leading community-oriented financial services retailer throughout the Western United States. The merger completed with Sterling in April 2014 expanded into Southern California, Eastern Washington, Eastern Oregon, and Idaho markets. We intend to continue to grow our assets and increase profitability and shareholder value by differentiating ourselves from competitors through the following strategies:

Capitalize on Innovative Product Delivery System. Our philosophy has been to develop an environment for the customer that makes the banking experience relevant and enjoyable. With this approach in mind, we have developed a unique store concept that offers "one-stop" shopping and includes distinct physical areas or boutiques, such as a "serious about service center," an "investment opportunity center" and a "computer café," which make the Bank's products and services more tangible and accessible. In 2006, we introduced our "Neighborhood Stores" and in 2007, we introduced the Umpqua "Innovation Lab." In 2010, we introduced the next generation version of our Neighborhood Store in the Capitol Hill area of Seattle, Washington. In 2013, we introduced the next generation of our flagship store in San Francisco. We are continuing to remodel existing and acquired stores in metropolitan locations to further our retail vision and have a consistent brand experience.

Table of Contents

Deliver Superior Quality Service. We insist on quality service as an integral part of our culture, from the Board of Directors to our newest associates, and believe we are among the first banks to introduce a measurable quality service program. Under our "return on quality" program, the performance of each sales associate and store was evaluated based on specific measurable factors such as the "sales effectiveness ratio" that totals the average number of banking products purchased by each new customer. The evaluations also encompass factors such as the number of new loan and deposit accounts generated in each store, reports by incognito "mystery shoppers" and customer surveys. Based on scores achieved, Umpqua's "return on quality" program rewards both individual sales associates and store teams with financial incentives. Through such programs, we are able to measure the quality of service provided to our customers and maintain employee focus on quality customer service.

Establish Strong Brand Awareness. As a financial services retailer, we devote considerable resources to developing the "Umpqua Bank" brand. This is done through design strategy, marketing, merchandising, community based events, and delivery through our customer facing channels. From Bank branded bags of custom roasted coffee beans and chocolate coins with each transaction, to educational seminars and Umpqua-branded ice cream trucks, Umpqua's goal is to engage our customer with the brand in a whole new way. The unique look and feel of our stores and interactive displays help position us as an innovative, customer-friendly retailer of financial products and services. We build consumer preference for our products and services through strong brand awareness.

Use Technology to Expand Customer Base. Although our strategy continues to emphasize superior personal service, as consumer preferences evolve we continue to expand user-friendly, technology-based systems to attract customers who want to interact with their financial institution electronically. We offer technology-based services including remote deposit capture, online banking, bill pay and treasury services, mobile banking, voice response banking, automatic payroll deposit programs, advanced function ATMs, interactive product kiosks, and a robust internet web site. We believe the availability of both traditional bank services and electronic banking services enhances our ability to attract a broader range of customers and wrap our value proposition across all channels.

Increase Market Share in Existing Markets and Expand Into New Markets. As a result of our innovative retail product orientation, measurable quality service program and strong brand awareness, we believe that there is significant potential to increase business with current customers, to attract new customers in our existing markets and to enter new markets.

Pursue Strategic Acquisitions. A part of our strategy is to pursue the acquisition of banks and financial services companies in markets where we see growth potential.

Marketing and Sales

Our goal of increasing our share of financial services in our market areas is driven by a marketing and sales strategy with the following key components:

Media Advertising. Our comprehensive marketing campaigns aim to strengthen the Umpqua Bank brand and heighten public awareness about our innovative delivery of financial products and services. The Bank has been recognized nationally for its use of new media and unique approach. From programs like the Bank's Discover Local Music Project and ice cream trucks, to campaigns like Save Hard Spend Smart and the Lemonaire, Umpqua is utilizing nontraditional media channels and leveraging mass market media in new ways.

Retail Store Concept. As a financial services provider, we believe that the store environment is critical to successfully market and sell products and services. Retailers traditionally have displayed merchandise within their stores in a manner designed to encourage customers to purchase their products. Purchases are made on the spur of the moment due to the products' availability and attractiveness. Umpqua Bank believes this same concept can be applied to financial institutions and accordingly displays financial services and products through tactile merchandising within our stores. Unlike many financial institutions whose strategy is to discourage customers from visiting their facilities in favor of ATMs or other forms of electronic banking, we encourage customers to visit our stores, where they are greeted by well-trained sales associates and encouraged to browse and to make "impulse purchases." Our "Next Generation" store model includes features like free wireless, free use of laptop computers, open rooms with refrigerated beverages and innovative products packaging like MainStreet for businesses - a package that includes relationship pricing for deposit and loan products, and invitation to "Business Therapy" seminars. The stores host a variety of after-hours events, from poetry readings to seminars on how to build an art collection. To bring financial

services to our customers in a cost-effective way, we introduced "Neighborhood Stores." We build these stores in established neighborhoods and design them to be neighborhood hubs. These stand-alone full-service stores are smaller and emphasize advanced technology. To strengthen brand recognition, all Neighborhood Stores are similar in appearance. Umpqua's "Innovation Lab" is a one-of-a-kind location, showcasing emerging and existing technologies that foster community and redefine what consumers can expect from a banking experience. As a testing ground for new initiatives, the "Innovation Lab" will change regularly to feature new technology, products, services and community events. In 2013, Umpqua Bank launched our flagship store in San Francisco which received international recognition as the Retail Design Institutes 2013 Store of the Year award.

Table of Contents

Service Culture. We believe strongly that if we lead with a service culture, we will have more opportunity to sell our products and services and to create deeper customer relationships across all divisions, from retail to mortgage and commercial. Although a successful marketing program will attract customers to visit, a service environment and a well-trained sales team are critical to selling our products and services. We believe that our service culture has become well established throughout the organization due to our unique facility designs and ongoing training of our associates on all aspects of sales and service. We provide training at our in-house training facility, known as "The World's Greatest Bank University," to recognize and celebrate exceptional service, and pay commissions for the sale of the Bank's products and services. This service culture has helped transform us from a traditional community bank to a nationally recognized marketing company focused on selling financial products and services.

Products and Services

We offer a full array of financial products to meet the banking needs of our market area and target customers. To ensure the ongoing viability of our product offerings, we regularly examine the desirability and profitability of existing and potential new products. To make it easy for new prospective customers to bank with us and access our products, we offer a "Switch Kit," which allows a customer to open a primary checking account with Umpqua Bank in less than ten minutes. Other avenues through which customers can access our products include our web site equipped with an e-switchkit which includes internet banking through "umpqua.online," mobile banking, and our 24-hour telephone voice response system.

Deposit Products. We offer a traditional array of deposit products, including non-interest bearing checking accounts, interest bearing checking and savings accounts, money market accounts and certificates of deposit. These accounts earn interest at rates established by management based on competitive market factors and management's desire to increase certain types or maturities of deposit liabilities. Our approach is to tailor fit products and bundle those that meet the customer's needs. This approach is designed to add value for the customer, increase products per household and generate related fee income.

Private Bank. Umpqua Private Bank serves high net worth individuals with liquid investable assets by providing customized financial solutions and offerings. The private bank is designed to augment Umpqua's existing high-touch customer experience, and works collaboratively with the Bank's affiliate retail brokerage Umpqua Investments and with the independent investment management firm Ferguson Wellman Capital Management, Inc. ("Ferguson Wellman") to offer a comprehensive, integrated approach that meets clients' financial goals, including financial planning, trust services, and investments.

Retail Brokerage Services and Investment Advisory Services. Umpqua Investments in its combined role as a broker/dealer and a registered investment advisor may provide comprehensive financial planning advice to its clients as well as standard broker/dealer services for traditional brokerage accounts. This advice can include cash management, risk management (insurance planning/sales), investment planning (including investment advice, supervisory services and/or portfolio checkups), retirement planning (for employees and employers), and/or estate planning. The broker/dealer side of Umpqua Investments offers a full range of brokerage services including equity and fixed income products, mutual funds, annuities, options and life insurance products. At December 31, 2014, Umpqua Investments has 42 Series 7-licensed financial advisors serving clients at four stand-alone retail brokerage offices, one location within a retirement facility, and "Investment Opportunity Centers" located in many Bank stores.

Commercial Loans and Leases and Commercial Real Estate Loans. We offer specialized loans for business and commercial customers, including accounts receivable and inventory financing, multi-family loans, equipment loans, commercial equipment leases, international trade, real estate construction loans and permanent financing and Small Business Administration ("SBA") program financing as well as capital markets and treasury management services. Additionally, we offer specially designed loan products for small businesses through our Small Business Lending Center, and have a business banking division to increase lending to small and mid-sized businesses. Ongoing credit management activities continue to focus on commercial real estate loans given this is a significant portion of our loan portfolio. We are also engaged in initiatives that continue to diversify the loan portfolio including a strong focus on commercial and industrial loans in addition to financing owner-occupied properties.

Residential Real Estate Loans. Real estate loans are available for construction, purchase, and refinancing of residential owner-occupied and rental properties. Borrowers can choose from a variety of fixed and adjustable rate

options and terms. We sell most residential real estate loans that we originate into the secondary market. Servicing is retained on the majority of these loans. We also support the Home Affordable Refinance Program and Home Affordable Modification Program.

Consumer Loans. We provide loans to individual borrowers for a variety of purposes, including secured and unsecured personal loans, home equity and personal lines of credit and motor vehicle loans. Loans may be made directly to borrowers or through Umpqua's dealer banking department.

Table of Contents

Market Area and Competition

The geographic markets we serve are highly competitive for deposits, loans, leases and retail brokerage services. We compete with traditional banking institutions, as well as non-bank financial service providers, such as credit unions, brokerage firms and mortgage companies. In our primary market areas of Oregon, Washington, California, Idaho, and Nevada, major banks and large regional banks generally hold dominant market share positions. By virtue of their larger capital bases, these institutions have significantly larger lending limits than we do and generally have more expansive branch networks. Competition also includes other commercial banks that are community-focused.

As the industry becomes increasingly dependent on and oriented toward technology-driven delivery systems, permitting transactions to be conducted by telephone, computer and the internet, non-bank institutions are able to attract funds and provide lending and other financial services even without offices located in our primary service area. Some insurance companies and brokerage firms compete for deposits by offering rates that are higher than may be appropriate for the Bank in relation to its asset and liability management objectives. However, we offer a wide array of deposit products and believe we can compete effectively through rate-driven product promotions. We also compete with full service investment firms for non-bank financial products and services offered by Umpqua Investments. Credit unions present a significant competitive challenge for our banking services and products. As credit unions currently enjoy an exemption from income tax, they are able to offer higher deposit rates and lower loan rates than we can on a comparable basis. Credit unions are also not currently subject to certain regulatory constraints, such as the Community Reinvestment Act ("CRA"), which, among other things, requires us to implement procedures to make and monitor loans throughout the communities we serve. Adhering to such regulatory requirements raises the costs associated with our lending activities, and reduces potential operating profits. Accordingly, we seek to compete by focusing on building customer relationships, providing superior service and offering a wide variety of commercial banking products, such as commercial real estate loans, inventory and accounts receivable financing, and SBA program loans for qualified businesses.

During the past several years, the States of Oregon, California, Washington, Idaho, and Nevada have experienced economic difficulties. To the extent the fiscal condition of state and local governments does not improve, there could be an adverse effect on business conditions in the affected state that would negatively impact the prospects for the Bank's operations located there.

The following table presents the Bank's market share percentage for total deposits as of June 30, 2014, in each county where we have operations. The table also indicates the ranking by deposit size in each market. All information in the table was obtained from SNL Financial, which compiles deposit data published by the FDIC as of June 30, 2014 and updates the information for any bank mergers and acquisitions completed subsequent to the reporting date.

Lending and Credit Functions

The Bank makes both secured and unsecured loans to individuals and businesses. At December 31, 2014, commercial real estate, commercial, residential, and consumer and other represented approximately 58.1%, 19.2%, 20.2%, and 2.5%, respectively, of the total loan and lease portfolio.

Inter-agency guidelines adopted by federal bank regulators mandate that financial institutions establish real estate lending policies with maximum allowable real estate loan-to-value limits, subject to an allowable amount of non-conforming loans as a percentage of capital. We have adopted as loan policy loan-to-value limits that range from 5% to 10% less than the federal guidelines for each category; however, policy exceptions are permitted for real estate loan customers with strong financial credentials.

Table of Contents

Loans and Leases

We manage asset quality and control credit risk through diversification of the loan and lease portfolio and the application of policies designed to promote sound underwriting and loan and lease monitoring practices. The Bank's Credit Quality Group is charged with monitoring asset quality, establishing credit policies and procedures and enforcing the consistent application of these policies and procedures across the Bank. The provision for loan and lease losses charged to earnings is based upon management's judgment of the amount necessary to maintain the allowance at a level adequate to absorb probable incurred losses. The amount of provision charged is dependent upon many factors, including loan and lease growth, net charge-offs, changes in the composition of the loan and lease portfolio, delinquencies, management's assessment of loan and lease portfolio quality, general economic conditions that can impact the value of collateral, and other trends. The evaluation of these factors is performed through an analysis of the adequacy of the allowance for loan and lease losses. Reviews of non-performing, past due loans and leases and larger credits, designed to identify potential charges to the allowance for loan and lease losses, and to determine the adequacy of the allowance, are conducted on a quarterly basis. These reviews consider such factors as the financial strength of borrowers, the value of the applicable collateral, loan and lease loss experience, estimated loan and lease losses, growth in the loan and lease portfolio, prevailing economic conditions and other factors.

A loan is considered impaired when, based on current information and events, we determine it is probable that we will not be able to collect all amounts due according to the loan contract, including scheduled interest payments.

Generally, when loans are identified as impaired they are moved to our Special Assets Department. When we identify a loan as impaired, we measure the loan for potential impairment using discount cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we will use the current fair value of collateral, less selling costs. The starting point for determining the fair value of collateral is through obtaining a current external appraisal. Generally, external appraisals for collateral dependent loans are updated every 12 months. We obtain appraisals from a pre-approved list of independent, third party, local appraisal firms. Upon receipt and review, an external appraisal is utilized to measure a loan for potential impairment. Our impairment analysis documents the date of the appraisal used in the analysis, whether the officer preparing the report deems it current, and, if not, allows for internal valuation adjustments with justification. Typical justified adjustments might include discounts for continued market deterioration subsequent to appraisal date, adjustments for the release of collateral contemplated in the appraisal, or the value of other collateral or consideration not contemplated in the appraisal. An appraisal over one year old in most cases will be considered stale dated and an updated or new appraisal will be required. Any adjustments from appraised value to net realizable value are detailed and justified in the impairment analysis, which is reviewed and approved by senior credit quality officers and the Bank's ALLL Committee. Although an external appraisal is the primary source to value collateral dependent loans, we may also utilize values obtained through purchase and sale agreements, negotiated short sales, broker price opinions, or the sales price of the note. These alternative sources of value are used only if deemed to be more representative of value based on updated information regarding collateral resolution. Impairment analyses are updated, reviewed and approved on a quarterly basis at or near the end of each reporting period. Appraisals or other alternative sources of value received subsequent to the reporting period, but prior to our filing of periodic reports, are considered and evaluated to ensure our periodic filings are materially correct and not misleading. Based on these processes, we do not believe there are significant time lapses for the recognition of additional loan loss provisions or charge-offs from the date they become known.

Loans and leases are classified as non-accrual when collection of principal or interest is doubtful—generally if they are past due as to maturity or payment of principal or interest by 90 days or more—unless such loans and leases are well-secured and in the process of collection. Additionally, all loans that are impaired are considered for non-accrual status. Loans and leases placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospects for future payments in accordance with the loan or lease agreement appear relatively certain.

Upon acquisition of real estate collateral, typically through the foreclosure process, we promptly begin to market the property for sale. If we do not begin to receive offers or indications of interest we will analyze the price and review market conditions to assess whether a lower price reflects the market value of the property and would enable us to sell the property. In addition, we update appraisals on other real estate owned property six to 12 months after the most recent appraisal. Increases in valuation adjustments recorded in a period are primarily based on a) updated appraisals received during the period, or b) management's authorization to reduce the selling price of the property during the period. Unless a current appraisal is available, an appraisal will be ordered prior to a loan moving to other real estate owned. Foreclosed properties held as other real estate owned are recorded at the lower of the recorded investment in the loan (prior to foreclosure) or the fair market value of the property less expected selling costs.

Loans are reported as restructured when the Bank grants a more than insignificant concession(s) to a borrower experiencing financial difficulties that it would not otherwise consider. Examples of such concessions include a reduction in the loan rate, forgiveness of principal or accrued interest, extending the maturity date(s) or providing a lower interest rate than would be normally available for a transaction of similar risk. As a result of these concessions, restructured loans are impaired as the Bank will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

Table of Contents

Employees

As of December 31, 2014, we had a total of 4,569 full-time equivalent employees. None of the employees are subject to a collective bargaining agreement and management believes its relations with employees to be good. Information regarding employment agreements with our executive officers is contained in Item 11 below, which item is incorporated by reference to our proxy statement for the 2015 annual meeting of shareholders.

Government Policies

The operations of our subsidiaries are affected by state and federal legislative and regulatory changes and by policies of various regulatory authorities, including, domestic monetary policies of the Board of Governors of the Federal Reserve System ("Federal Reserve"), United States fiscal policy, and capital adequacy and liquidity constraints imposed by federal and state regulatory agencies.

Supervision and Regulation

General. We are extensively regulated under federal and state law. These laws and regulations are generally intended to protect depositors and customers, not shareholders. To the extent that the following information describes statutory or regulatory provisions, it is qualified in its entirety by reference to the particular statute or regulation. Any change in applicable laws or regulations may have a material effect on our business and prospects. We cannot accurately predict the nature or the extent of the effects on our business and earnings that fiscal or monetary policies, or new federal or state legislation or regulation may have in the future. Umpqua is subject to the disclosure and other requirements of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, and rules promulgated thereunder and administered by the Securities and Exchange Commission. As a listed company on NASDAQ, Umpqua is subject to NASDAQ rules for listed companies.

Holding Company Regulation. We are a registered financial holding company under the GLB Act, and are subject to the supervision of, and regulation by the Federal Reserve. As a financial holding company, we are examined by and file reports with the Federal Reserve. The Federal Reserve expects a bank holding company to serve as a source of financial and managerial strength to its subsidiary bank and, under appropriate circumstances, to commit resources to support the subsidiary bank.

Financial holding companies are bank holding companies that satisfy certain criteria and are permitted to engage in activities that traditional bank holding companies are not. The qualifications and permitted activities of financial holdings companies are described below under "Regulatory Structure of the Financial Services Industry."

Federal and State Bank Regulation. Umpqua Bank, as a state chartered bank with deposits insured by the FDIC, is primarily subject to the supervision and regulation of the Oregon Department of Consumer and Business Services Division of Finance and Corporate Securities ("DCBS"), the Washington Department of Financial Institutions ("DFI"), the California Department of Business Oversight ("DBO"), the Idaho Department of Finance Banking Section, the Nevada Division of Financial Institutions, the FDIC and the Consumer Financial Protection Bureau ("CFPB"). These agencies may prohibit the Bank from engaging in what they believe constitute unsafe or unsound banking practices. Our primary state regulator, DCBS, regularly examines the Bank or participates in joint examinations with the FDIC.

The CRA requires that, in connection with examinations of financial institutions within its jurisdiction, the FDIC evaluate the record of the financial institutions in meeting the credit needs of their local communities, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of those institutions. These factors are also considered in evaluating mergers, acquisitions and applications to open a branch or new facility. A less than "Satisfactory" rating would result in the suspension of any growth of the Bank through acquisitions or opening de novo branches until the rating is improved. As of the most recent CRA examination, the Bank's CRA rating was "Satisfactory."

Banks are also subject to certain restrictions imposed by the Federal Reserve Act on extensions of credit to executive officers, directors, principal shareholders or any related interest of such persons. Extensions of credit must be made on substantially the same terms, including interest rates and collateral as, and follow credit underwriting procedures that are not less stringent than, those prevailing at the time for comparable transactions with persons not affiliated with the bank, and must not involve more than the normal risk of repayment or present other unfavorable features. Banks are

also subject to certain lending limits and restrictions on overdrafts to such persons. A violation of these restrictions may result in the assessment of substantial civil monetary penalties on the affected bank or any officer, director, employee, agent or other person participating in the conduct of the affairs of that bank, the imposition of a cease and desist order, and other regulatory sanctions.

Table of Contents

The Federal Reserve Act and related Regulation W limit the amount of certain loan and investment transactions between the Bank and its affiliates, require certain levels of collateral for such loans, and limit the amount of advances to third parties that may be collateralized by the securities of Umpqua or its subsidiaries. Regulation W requires that certain transactions between the Bank and its affiliates be on terms substantially the same, or at least as favorable to the Bank, as those prevailing at the time for comparable transactions with or involving nonaffiliated companies or, in the absence of comparable transactions, on terms and under circumstances, including credit standards, that in good faith would be offered to or would apply to nonaffiliated companies. Umpqua and its subsidiaries have adopted an Affiliate Transactions Policy and have entered into various affiliate agreements in compliance with Regulation W. The Federal Reserve and the FDIC have adopted non-capital safety and soundness standards for institutions. These standards cover internal controls, information and internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, and standards for asset quality, earnings and stock valuation. An institution that fails to meet these standards must develop a plan acceptable to the agency, specifying the steps that it will take to meet the standards. Failure to submit or implement such a plan may subject the institution to regulatory sanctions. We believe that the Bank is in compliance with these standards.

Federal Deposit Insurance. Substantially all deposits with Umpqua Bank are insured up to applicable limits by the Deposit Insurance Fund ("DIF") of the FDIC and are subject to deposit insurance assessments to maintain the DIF. In October 2010, the FDIC adopted a new DIF restoration plan to ensure that the fund reserve ratio reaches 1.35% by September 30, 2020, as required by the Dodd-Frank Act. At least semi-annually, the FDIC will update its loss and income projections for the DIF and, if needed, increase or decrease assessment rates.

On February 7, 2011, the FDIC adopted a final rule modifying the risk-based assessment system from a domestic deposit base to a scorecard based assessment system, effective April 1, 2011. As of April 1, 2011, the Bank was categorized as a large institution as the Bank has more than \$10 billion in assets. The initial base assessment rates range from 5 to 35 basis points. After potential adjustments related to unsecured debt and brokered deposit balances, the final total assessment rates range from 2.5 to 45 basis points. Initial base assessment rates for large institutions ranged from 5 to 35 basis points. The Bank's assessment rate for 2014 fell at the low end of this range. Further increases in the assessment rate could have a material adverse effect on our earnings, depending upon the amount of the increase.

The Dodd-Frank Wall Street Reform and Consumer Protection Act permanently raised the standard maximum federal deposit insurance amount from \$100,000 to \$250,000 per qualified account.

The FDIC may terminate the deposit insurance of any insured depository institution if it determines that the institution has engaged in or is engaging in unsafe and unsound banking practices, is in an unsafe or unsound condition or has violated any applicable law, regulation or order or any condition imposed in writing by, or pursuant to, any written agreement with the FDIC. The termination of deposit insurance for the Bank would have a material adverse effect on our financial condition and results of operations.

Dividends. Under the Oregon Bank Act and the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), the Bank is subject to restrictions on the payment of cash dividends to its parent company. A bank may not pay cash dividends if that payment would reduce the amount of its capital below that necessary to meet minimum applicable regulatory capital requirements. In addition, under the Oregon Bank Act, the amount of the dividend paid by the Bank may not be greater than net unreserved retained earnings, after first deducting to the extent not already charged against earnings or reflected in a reserve, all bad debts, which are debts on which interest is unpaid and past due at least six months unless the debt is fully secured and in the process of collection; all other assets charged-off as required by Oregon bank regulators or a state or federal examiner; and all accrued expenses, interest and taxes of the Bank. In addition, state and federal regulatory authorities are authorized to prohibit banks and holding companies from paying dividends that would constitute an unsafe or unsound banking practice. The Federal Reserve has issued a policy statement on the payment of cash dividends by bank holding companies, which expresses the Federal Reserve's view that a bank holding company should pay cash dividends only to the extent that its net income for the past year is sufficient to cover both the cash dividends and a rate of earnings retention that is consistent with the holding company's capital needs, asset quality, and overall financial condition.

Capital Adequacy. The federal and state bank regulatory agencies use capital adequacy guidelines in their examination and regulation of holding companies and banks. If capital falls below the minimum levels established by these guidelines, a holding company or a bank may be denied approval to acquire or establish additional banks or non-bank businesses or to open new facilities.

Table of Contents

The FDIC and Federal Reserve have adopted risk-based capital guidelines for holding companies and banks. The risk-based capital guidelines are designed to make regulatory capital requirements more sensitive to differences in risk profile among holding companies and banks, to account for off-balance sheet exposure and to minimize disincentives for holding liquid assets. Assets and off-balance sheet items are assigned to broad risk categories, each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items. The capital adequacy guidelines limit the degree to which a holding company or bank may leverage its equity capital.

Federal regulations establish minimum requirements for the capital adequacy of depository institutions, such as the Bank. Banks with capital ratios below the required minimums are subject to certain administrative actions, including prompt corrective action, the termination of deposit insurance upon notice and hearing, or a temporary suspension of insurance without a hearing.

On July 2, 2013, federal banking regulators approved final rules that revise the regulatory capital rules to incorporate certain revisions by the Basel Committee on Banking Supervision to the Basel capital framework ("Basel III"). The phase-in period for the final rules will begin for the Company on January 1, 2015, with full compliance with the final rules entire requirement phased in on January 1, 2019.

The final rules, among other things, include a new common equity Tier 1 capital ("CET1") to risk-weighted assets ratio, including a capital conservation buffer, which will gradually increase from 4.5% on January 1, 2015 to 7.0% on January 1, 2019. The final rules also raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0% on January 1, 2015 to 8.5% on January 1, 2019, as well as require a minimum leverage ratio of 4.0%.

The final rules also provide for a number of adjustments to and deductions from the new CET1. Under current capital standards, the effects of accumulated other comprehensive income items included in capital are excluded for the purposes of determining regulatory capital ratios. Under Basel III, the effects of certain accumulated other comprehensive items are not excluded; however, non-advanced approaches banking organizations, including the Company and the Bank, may choose to continue to exclude these items. The Company and Bank expect to make this election in order to avoid significant variations in the level of capital depending upon the impact of interest rate fluctuations on the fair value of the Company's securities portfolio. In addition, deductions include, for example, the requirement that mortgage servicing rights, certain deferred tax assets not dependent upon future taxable income and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1.

FDICIA requires federal banking regulators to take "prompt corrective action" with respect to a capital-deficient institution, including requiring a capital restoration plan and restricting certain growth activities of the institution. Umpqua could be required to guarantee any such capital restoration plan required of the Bank if the Bank became undercapitalized. Pursuant to FDICIA, regulations were adopted defining five capital levels: well capitalized, adequately capitalized, undercapitalized, severely undercapitalized and critically undercapitalized. Under the regulations, the Bank is considered "well capitalized" as of December 31, 2014.

Federal and State Regulation of Broker-Dealers. Umpqua Investments is a fully disclosed introducing broker-dealer clearing through First Clearing LLC. Umpqua Investments is regulated by the Financial Industry Regulatory Authority ("FINRA") and has deposits insured through the Securities Investors Protection Corp ("SIPC") as well as third party insurers. FINRA performs regular examinations of the Umpqua Investments that include reviews of policies, procedures, recordkeeping, trade practices, and customer protection as well as other inquiries. SIPC protects client securities and cash up to \$500,000, including \$100,000 for cash with additional coverage provided through First Clearing for the remaining net equity balance in a brokerage account, if any. This coverage does not include losses in investment accounts.

Broker-Dealer and Related Regulatory Supervision. Umpqua Investments is a member of, and is subject to the regulatory supervision of, FINRA. Areas subject to FINRA oversight review include compliance with trading rules, financial reporting, investment suitability, and compliance with stock exchange rules and regulations.

Effects of Government Monetary Policy. Our earnings and growth are affected not only by general economic conditions, but also by the fiscal and monetary policies of the federal government, particularly the Federal Reserve. The Federal Reserve implements national monetary policy for such purposes as curbing inflation and combating recession, through its open market operations in U.S. Government securities, control of the discount rate applicable to borrowings from the Federal Reserve, and establishment of reserve requirements against certain deposits. These activities influence growth of bank loans, investments and deposits, and also affect interest rates charged on loans or paid on deposits. The nature and impact of future changes in monetary policies and their impact on us cannot be predicted with certainty.

Table of Contents

Regulation of the Financial Services Industry. Federal laws and regulations governing banking and financial services underwent significant changes in recent years and we believe will continue to undergo significant changes in the future. From time to time, legislation is introduced in the United States Congress that contains proposals for altering the structure, regulation, and competitive relationships of the nation's financial institutions. If enacted into law, these proposals could increase or decrease the cost of doing business, limit or expand permissible activities, or affect the competitive balance among banks, savings associations, and other financial institutions. Whether or in what form any such legislation may be adopted or the extent to which our business might be affected thereby cannot be predicted. The GLB Act, enacted in November 1999, repealed sections of the Banking Act of 1933, commonly referred to as the Glass-Steagall Act, that prohibited banks from engaging in securities activities, and prohibited securities firms from engaging in banking. The GLB Act created a new form of holding company, known as a financial holding company, that is permitted to acquire subsidiaries that are variously engaged in banking, securities underwriting and dealing, and insurance underwriting.

A bank holding company, if it meets specified requirements, may elect to become a financial holding company by filing a declaration with the Federal Reserve, and may thereafter provide its customers with a broader spectrum of products and services than a traditional bank holding company is permitted to do. A financial holding company may, through a subsidiary, engage in any activity that is deemed to be financial in nature and activities that are incidental or complementary to activities that are financial in nature. These activities include traditional banking services and activities previously permitted to bank holding companies under Federal Reserve regulations, but also include underwriting and dealing in securities, providing investment advisory services, underwriting and selling insurance, merchant banking (holding a portfolio of commercial businesses, regardless of the nature of the business, for investment), and arranging or facilitating financial transactions for third parties.

To qualify as a financial holding company, the bank holding company must be deemed to be well-capitalized and well-managed, as those terms are used by the Federal Reserve. In addition, each subsidiary bank of a bank holding company must also be well-capitalized and well-managed and be rated at least "satisfactory" under the CRA. A bank holding company that does not qualify, or has not chosen, to become a financial holding company must limit its activities to traditional banking activities and those non-banking activities the Federal Reserve has deemed to be permissible because they are closely related to the business of banking.

The GLB Act also includes provisions to protect consumer privacy by prohibiting financial services providers, whether or not affiliated with a bank, from disclosing non-public personal, financial information to unaffiliated parties without the consent of the customer, and by requiring annual disclosure of the provider's privacy policy.

The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 ("Riegle-Neal Act"), which became effective in 1995, permits interstate banking and branching, which allows banks to expand nationwide through acquisition, consolidation or merger. Under this law, an adequately capitalized bank holding company may acquire banks in any state or merge banks across state lines if permitted by state law. Further, banks may establish and operate branches in any state subject to the restrictions of applicable state law. Under Oregon law, an out-of-state bank or bank holding company may merge with or acquire an Oregon state chartered bank or bank holding company upon receipt of approval from the Director of the Oregon Department of Consumer and Business Services. The Bank now has the ability to open additional de novo branches in the states of Oregon, California, Washington, Idaho, and Nevada.

Section 613 of the Dodd-Frank Act eliminated interstate branching restrictions that were implemented as part of the Riegle-Neal Act, and removed many restrictions on de novo interstate branching by national and state-chartered banks. The FDIC and the Office of the Comptroller of the Currency now have authority to approve applications by insured state nonmember banks and national banks, respectively, to establish de novo branches in states other than the bank's home state if "the law of the State in which the branch is located, or is to be located, would permit establishment of the branch, if the bank were a State bank chartered by such State." The enactment of this Section 613 may significantly increase interstate banking by community banks in western states, where barriers to entry were previously high.

Anti-Terrorism Legislation. The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act ("USA Patriot Act"), enacted in 2001:

- prohibits banks from providing correspondent accounts directly to foreign shell banks;
- imposes due diligence requirements on banks opening or holding accounts for foreign financial institutions or wealthy foreign individuals;
- requires financial institutions to establish an anti-money-laundering ("AML") compliance program; and
- generally eliminates civil liability for persons who file suspicious activity reports.

Table of Contents

The USA Patriot Act also increases governmental powers to investigate terrorism, including expanded government access to account records. The Department of the Treasury is empowered to administer and make rules to implement the Act, which to some degree, affects our record-keeping and reporting expenses. Should the Bank's AML compliance program be deemed insufficient by federal regulators, we would not be able to grow through acquiring other institutions or opening de novo branches.

Sarbanes-Oxley Act of 2002. The Sarbanes-Oxley Act of 2002 addresses public company corporate governance, auditing, accounting, executive compensation and enhanced and timely disclosure of corporate information.

The Sarbanes-Oxley Act represents significant federal involvement in matters traditionally left to state regulatory systems, such as the regulation of the accounting profession, and regulation of the relationship between a Board of Directors and management and between a Board of Directors and its committees.

The Sarbanes-Oxley Act provides for, among other things:

- prohibition on personal loans by Umpqua to its directors and executive officers except loans made by the Bank in accordance with federal banking regulations;
- independence requirements for Board audit committee members and our auditors;
- certification of reports under the Securities Exchange Act of 1934 ("Exchange Act") by the chief executive officer, chief financial officer and principal accounting officer;
- disclosure of off-balance sheet transactions;
- expedited reporting of stock transactions by insiders; and
- increased criminal penalties for violations of securities laws.

The Sarbanes-Oxley Act also requires:

- management to establish, maintain, and evaluate disclosure controls and procedures;
- management to report on its annual assessment of the effectiveness of internal controls over financial reporting;
- our external auditor to attest to the effectiveness of internal controls over financial reporting.

The SEC has adopted regulations to implement various provisions of the Sarbanes-Oxley Act, including disclosures in periodic filings pursuant to the Exchange Act. Also, in response to the Sarbanes-Oxley Act, NASDAQ adopted new standards for listed companies.

The Dodd-Frank Wall Street Reform and Consumer Protection Act. On July 21, 2010, the Dodd-Frank Act was signed, which was a sweeping overhaul of financial industry regulation. Among other provisions, the Act:

Created a systemic-risk council of top regulators, the Financial Stability Oversight Council (FSOC), whose purpose is to identify risks and respond to emerging threats to the financial stability of the U.S. arising from large, interconnected bank holding companies or nonbank financial companies;

Gave the FDIC authority to unwind large failing financial firms. Treasury would supply funds to cover the up-front costs of winding down the failed firm, but the government would have to put a "repayment plan" in place. Regulators will recoup any losses incurred from the wind-down afterwards by assessing fees on financial firms with more than \$50 billion in assets;

Directed the FDIC to base deposit-insurance assessments on assets minus tangible capital instead of on domestic deposits and requires the FDIC to increase premium rates to raise the Deposit Insurance Fund's ("DIF") minimum reserve ratio from 1.15% to 1.35% by September 30, 2020. Banks, like Umpqua, with consolidated assets greater than \$10 billion would pay the increased premiums;

Permanently increased FDIC deposit-insurance coverage to \$250,000, retroactive to January 1, 2008. The act also eliminated the 1.5% cap on the DIF reserve ratio and automatic dividends when the ratio exceeds 1.35%. The FDIC also has discretion on whether to provide dividends to DIF members;

Authorized banks to pay interest on business checking accounts;

Created the CFPB, housed under the Federal Reserve and led by a director appointed by the President and confirmed by the Senate. All existing consumer laws and regulations will be transferred to this agency and each existing regulatory agency will contribute their respective consumer regulatory and exam staffs to the CFPB;

Table of Contents

Gave the CFPB the authority to write consumer protection rules for banks and nonbank financial firms offering consumer financial services or products and to ensure that consumers are protected from "unfair, deceptive, or abusive" acts or practices. The CFPB also now has authority to examine and enforce regulations for banks with greater than \$10 billion in assets;

Authorized the CFPB to require banks to compile and provide reports relating to its consumer lending, marketing and other consumer business activities and to make that information available to the public if doing so "in the public interest";

Directed the Federal Reserve to set interchange fees for debit card transactions charged by banks with more than \$10 billion in assets. The Federal Reserve must establish what it determines are reasonable fees by factoring in their transaction costs compared to those for checks;

Requires loan originators to retain 5% of any loan sold and securitized, unless it is a "qualified residential mortgage", which includes standard 30 and 15 year fixed rate loans. It also specifically exempts from risk retention FHA, VA, Farmer Mac and Rural Housing Service loans;

Adopted additional various mortgage lending and predatory lending provisions;

Required federal regulators jointly to prescribe regulations mandating that financial institutions with more than \$1 billion in assets to disclose to their regulators their incentive compensation plans to permit the regulators to determine whether the plans provide executive officers, employees, directors or principal shareholders with excessive compensation, fees or benefits, or could lead to material financial loss to the institution;

Imposed a number of requirements related to executive compensation that apply to all public companies, such as prohibition of broker discretionary voting in connection with a shareholder vote on executive compensation; mandatory shareholder "say on pay" (every one to three years) and "say on golden parachutes"; and clawback of incentive compensation from current or former executive officers following any accounting restatement;

Established a modified version of the "Volcker Rule" and generally prohibits banks from engaging in proprietary trading or holding or obtaining an interest in a hedge fund or private equity fund, to the extent that it would exceed 3% of the bank's Tier 1 capital. A bank's interest in any single hedge fund or private equity fund may not exceed 3% of the assets of that fund.

Stress Testing and Capital Planning. Umpqua is subject to the annual Dodd-Frank Act capital stress testing (DFAST) requirements of the Federal Reserve and the FDIC. As part of the DFAST process, Umpqua will release certain results from stress testing exercises, generally in June of each year.

CFPB Regulation and Supervision. As noted above, the Dodd-Frank Act gives the CFPB authority to examine Umpqua and Umpqua Bank for compliance with a broad range of federal consumer financial laws and regulations, including the laws and regulations that relate to credit card, deposit, mortgage and other consumer financial products and services the Bank offers. In addition, the Dodd-Frank Act gives the CFPB broad authority to take corrective action against Umpqua and Umpqua Bank as it deems appropriate. The CFPB is authorized to issue regulations and take enforcement actions to prevent and remedy acts and practices relating to consumer financial products and services that it deems to be unfair, deceptive or abusive. The agency also has authority to impose new disclosure requirements for any consumer financial product or service. These authorities are in addition to the authority the CFPB assumed on July 21, 2011 under existing consumer financial law governing the provision of consumer financial products and services. The CFPB has concentrated much of its initial rulemaking efforts on a variety of mortgage related topics required under the Dodd-Frank Act, including ability-to-repay and qualified mortgage standards, mortgage servicing standards, loan originator compensation standards, high-cost mortgage requirements, appraisal and escrow standards and requirements for higher-priced mortgages.

In January 2014, new rules issued by the CFPB for mortgage origination and mortgage servicing became effective. The rules require lenders to conduct a reasonable and good faith determination at or before consummation of a residential mortgage loan that the borrower will have a reasonable ability to repay the loan. The regulations also define criteria for making Qualified Mortgages which entitle the lender and any assignee to either a conclusive or rebuttable presumption of compliance with the ability to repay rule. The new mortgage servicing rules include new

standards for notices to consumers, loss mitigation procedures, and consumer requests for information. Both the origination and servicing rules create new private rights of action for consumers in the event of certain violations. In addition to the exercise of its rulemaking authority, the CFPB is continuing its ongoing examination and supervisory activities with respect to a number of consumer businesses and products.

Joint Agency Guidance on Incentive Compensation. On June 21, 2010, federal banking regulators issued final joint agency guidance on Sound Incentive Compensation Policies. This guidance applies to executive and non-executive incentive compensation plans administered by banks. The guidance says that incentive compensation programs must:

- Provide employees incentives that appropriately balance risk and reward.
- Be compatible with effective controls and risk- management; and

Table of Contents

Be supported by strong corporate governance, including active and effective oversight by the board;

The Federal Reserve reviews, as part of the regular, risk-focused examination process, the incentive compensation arrangements of the Company and other banking organizations. The findings of the supervisory initiatives are included in reports of examination and any deficiencies will be incorporated into the Company's supervisory ratings, which can affect the Company's ability to make acquisitions and take other actions.

ITEM 1A. RISK FACTORS.

In addition to the other information set forth in this report, you should carefully consider the factors discussed below. These factors could materially adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the forward-looking statements contained in this report.

Difficult market conditions have adversely affected and may continue to have an adverse effect on the financial services industry and on our business, financial condition and results of operations.

Our business and financial performance are vulnerable to weak economic conditions, primarily in the United States. The severe conditions from 2007 to 2009 had a significant negative impact on the financial services industry, and on Umpqua, including significant write-downs of asset values, bank failures and volatile financial markets. We have experienced moderate improvement in these conditions in the recent past, but not at a consistent pace. There is a risk that economic conditions will deteriorate or economic recovery is delayed. A worsening of conditions would likely exacerbate the adverse effects of the recent difficult market conditions on us and others in the financial institutions industry. In particular, we may face the following risks in connection with these events:

Increased regulation of our industry, including the continued implementation of regulations under the Dodd-Frank Act. Compliance with such regulation will increase our costs, reduce existing sources of revenue and may limit our ability to pursue business opportunities.

Our ability to assess the creditworthiness of our customers may be impaired if the models and approaches we use to select, manage, and underwrite our customers become less predictive of future performance.

The process we use to estimate losses inherent in our loan portfolio requires difficult, subjective, and complex judgments, including forecasts of economic conditions and how these economic predictions might impair the ability of our borrowers to repay their loans, which process may no longer be capable of accurate estimation and may, in turn, impact its reliability.

There may be downward pressure on our stock price.

We may face increased competition due to intensified consolidation of the financial services industry.

If market disruption and volatility worsen, there can be no assurance that we will not experience an adverse effect, which may be material, on our ability to access capital and on our business, financial condition and results of operations.

The majority of our assets are loans, which if not repaid would result in losses to the Bank.

The Bank, like other lenders, is subject to credit risk, which is the risk of losing principal or interest due to borrowers' failure to repay loans in accordance with their terms. Underwriting and documentation controls cannot mitigate all credit risk. A downturn in the economy or the real estate market in our market areas or a rapid increase in interest rates could have a negative effect on collateral values and borrowers' ability to repay. To the extent loans are not paid timely by borrowers, the loans are placed on non-accrual status, thereby reducing interest income. Further, under these circumstances, an additional provision for loan and lease losses or unfunded commitments may be required. See Management's Discussion and Analysis of Financial Condition and Results of Operations- "Allowance for Loan and Lease Losses and Reserve for Unfunded Commitments", "Provision for Loan and Lease Losses" and "Asset Quality and Non-Performing Assets".

A large percentage of our loan portfolio is secured by real estate, in particular commercial real estate. Deterioration in the real estate market or other segments of our loan portfolio would lead to additional losses, which could have a material adverse effect on our business, financial condition and results of operations.

As of December 31, 2014, approximately 80% of our total loan portfolio is secured by real estate, the majority of which is commercial real estate. Increases in commercial and consumer delinquency levels or declines in real estate market values would require increased net charge-offs and increases in the allowance for loan and lease losses, which could have a material adverse effect on our business, financial condition and results of operations and prospects.

Table of Contents

The effects of the economic recession have been particularly severe in our primary market areas in the Pacific Northwest, California, and Nevada.

Substantially all of our loans are to businesses and individuals in California, Oregon, Washington, Idaho, and Nevada. The Pacific Northwest has had one of the nation's highest unemployment rates. A further deterioration in the economic conditions or a prolonged delay in economic recovery in our primary market areas could result in the following consequences, any of which could materially and adversely affect our business: loan delinquencies may increase; problem assets and foreclosures may increase putting further price pressures on valuations generally; demand for our products and services may decrease; low cost or noninterest bearing deposits may decrease; and collateral for loans made by us, especially real estate, may decline in value, in turn reducing customers' borrowing power, and reducing the value of assets and collateral associated with our existing loans.

The integration of Sterling may be more difficult, costly or time consuming than expected and the anticipated benefits and cost savings of the Merger may not be realized.

The success of the Merger, including anticipated benefits and cost savings, will depend, in part, on Umpqua's ability to successfully combine and integrate the businesses of Umpqua and Sterling in a manner that permits growth opportunities and does not materially disrupt the existing customer relations nor result in decreased revenues due to loss of customers. It is possible that the integration process could result in the loss of key employees, the disruption of either company's ongoing businesses or inconsistencies in standards, controls, procedures and policies that adversely affect the combined company's ability to maintain relationships with clients, customers, depositors and employees or to achieve the anticipated benefits and cost savings of the merger. The loss of key employees could adversely affect our ability to successfully conduct its business, which could have an adverse effect on our financial results and the value of its common stock. If we experience difficulties with the integration process, the anticipated benefits of the merger may not be realized fully or at all, or may take longer to realize than expected. As with any merger of financial institutions, there also may be business disruptions that cause us to lose customers. Integration efforts will also divert management attention and resources. In addition, the actual cost savings of the Merger upon completion of integration activities could be less than anticipated.

A rapid change in interest rates, or maintenance of rates at historically high or low levels for an extended period, could make it difficult to maintain our current interest income spread and could result in reduced earnings.

Our earnings are largely derived from net interest income, which is interest income and fees earned on loans and investments, less interest paid on deposits and other borrowings. Interest rates are highly sensitive to many factors that are beyond the control of our management, including general economic conditions and the policies of various governmental and regulatory authorities. The actions of the Federal Reserve influence the rates of interest that we charge on loans and that we pay on borrowings and interest-bearing deposits. We cannot predict the nature or timing of future changes in monetary, tax and other policies or the effects that they may have on our activities and financial results. As interest rates change, net interest income is affected. With fixed rate assets (such as fixed rate loans and most investment securities) and liabilities (such as certificates of deposit), the effect on net interest income depends on the cash flows associated with the maturity of the asset or liability. Asset/liability management policies may not be successfully implemented and from time to time our risk position is not balanced. An unanticipated rapid decrease or increase in interest rates could have an adverse effect on the spreads between the interest rates earned on assets and the rates of interest paid on liabilities, and therefore on the level of net interest income. For instance, any rapid increase in interest rates in the future could result in interest expense increasing faster than interest income because of fixed rate loans and longer-term investments. Historically low rates for an extended period of time result in reduced returns from the investment and loan portfolios. The current very low interest rate environment, which is expected to continue at least through mid-year 2015 based on statements by the Chairman of the Federal Reserve, could affect consumer and business behavior in ways that are adverse to us and negatively impact our ability to increase our net interest income. Further, substantially higher interest rates generally reduce loan demand and may result in slower loan growth than previously experienced. See Management's Discussion and Analysis of Financial Condition and Results of Operations-"Quantitative and Qualitative Disclosures about Market Risk".

Table of Contents

Our merger with Sterling, given its size and scope, will likely make it difficult for us to engage in traditional merger and acquisition transactions in the near term.

The successful integration of our merger with Sterling is presently our top priority and it will take significant resources through the first half of 2015 to accomplish that goal. During this integration phase it is unlikely that we would receive regulatory approval to acquire another bank and our ability to engage in traditional merger and acquisition transactions will be constrained over the near term.

The benefits of our FDIC loss-sharing agreements may be reduced or eliminated.

In connection with Umpqua Bank's assumption of the banking operations of Evergreen Bank, Rainier Pacific Bank, and Nevada Security Bank, the Bank and the FDIC entered into Whole Bank Purchase and Assumption Agreements with Loss-Share (collectively, "Loss Share Agreements"). Our decisions regarding the fair value of assets acquired, including the FDIC loss-sharing assets, could be inaccurate which could materially and adversely affect our business, financial condition, results of operations, and future prospects. Management makes various assumptions and judgments about the collectability of the acquired loans, including the creditworthiness of borrowers and the value of the real estate and other assets serving as collateral for the repayment of secured loans. In FDIC-assisted acquisitions that include loss-sharing agreements, we record a loss-sharing asset that reflects our estimate of the timing and amount of future losses that are anticipated to occur in and used to value the acquired loan portfolio. In determining the size of the loss-sharing asset, we analyze the loan portfolio based on historical loss experience, volume and classification of loans, volume and trends in delinquencies and nonaccruals, local economic conditions, and other pertinent information.

If our assumptions relating to the timing or amount of expected losses are incorrect, our operating results could be negatively impacted. Increases in the amount of future losses in response to different economic conditions or adverse developments in the acquired loan portfolio may result in increased credit loss provisions. Changes in our estimate of the timing of those losses, specifically if those losses are to occur beyond the applicable loss-sharing periods, may result in impairments of the FDIC indemnification asset.

In addition, the non-single family Loss Share Agreements expire, by their terms on or before July 1, 2015. After expiration, we will no longer receive reimbursement from the FDIC for losses sustained in these acquired portfolios. Our ability to obtain reimbursement under the loss-sharing agreements on covered assets depends on our compliance with the terms of the loss-sharing agreements.

Management must certify to the FDIC on a quarterly basis our compliance with the terms of the Loss share Agreements as a prerequisite to obtaining reimbursement from the FDIC for realized losses on covered assets. The required terms of the Loss Share Agreements are extensive and failure to comply with any of the guidelines could result in a specific asset or group of assets permanently losing their loss-sharing coverage. Additionally, management may decide to forgo loss-share coverage on certain assets to allow greater flexibility over the management of certain assets.

Under the terms of the FDIC loss-sharing agreements, the assignment or transfer of a loss-sharing agreement to another entity generally requires the written consent of the FDIC. No assurances can be given that we will manage the covered assets in such a way as to maintain loss-share coverage on all such assets.

Deterioration in the real estate market could result in loans that we have restructured to become delinquent and classified as non-accrual loans.

We restructured loans, primarily during the recent recession, in response to borrower financial difficulty, by providing modification of loan repayment terms. Loans are reported as restructured when we grant significant concessions to a borrower experiencing financial difficulties that we would not otherwise consider. Examples of such concessions include forgiveness of principal or accrued interest, extending loan maturity dates or providing a lower interest rate than would be normally available for a transaction of similar risk. In exchange for these concessions, at the time of restructure, we require additional collateral to bring the loan to value to at most 100%. A decline in the economic conditions in our general market areas and other factors affecting the specific borrower could adversely impact borrowers with restructured loans and cause borrowers to become delinquent or otherwise default or call into question their ability to repay full interest and principal in accordance with the restructured terms, which would result in the

restructured loan being reclassified as a non-accrual loan.

20

Table of Contents

Interest rate volatility and credit risk adjusted rate spreads may impact our financial assets and liabilities measured at fair value, particularly the fair value of our junior subordinated debentures.

The widening of the credit risk adjusted rate spreads on potential new issuances of junior subordinated debentures above our contractual spreads and reductions in three month LIBOR rates have contributed to the cumulative positive fair value adjustment in our junior subordinated debentures carried at fair value. Tightening of these credit risk adjusted rate spreads and interest rate volatility may result in recognizing negative fair value adjustments charged to earnings in the future.

The Dodd-Frank Act and other legislative and regulatory initiatives contain numerous provisions and requirements that could detrimentally affect the Company's business.

The Dodd-Frank Act and related regulations subject us and other financial institutions to additional restrictions, oversight, reporting obligations and costs, which could have an adverse impact on our business, financial condition, results of operations or the price of our common stock. In addition, this increased regulation of the financial services industry restricts the ability of firms within the industry to conduct business consistent with historical practices, including aspects such as compensation, interest rates, new and inconsistent consumer protection regulations and mortgage regulation, among others. Congress or state legislatures could also adopt laws reducing the amount that borrowers are otherwise contractually required to pay under existing loan contracts, require lenders to extend or restructure certain loans or limit foreclosure and collection remedies. Federal and state regulatory agencies also frequently adopt changes to their regulations or change the manner in which existing regulations are applied.

We cannot predict the substance or impact of pending or future legislation or regulation, or the application thereof. Compliance with such current and potential regulation and scrutiny could significantly increase our costs, impede the efficiency of our internal business processes, may require us to increase our regulatory capital and may limit our ability to pursue business opportunities in an efficient manner. In response, we may be required to or choose to raise additional capital, which could have a dilutive effect on the existing holders of our common stock and adversely affect the market price of our common stock.

We are subject to extensive regulation under federal and state laws. These laws and regulations are primarily intended to protect customers, depositors and the deposit insurance fund, rather than shareholders. The Bank is an Oregon state-chartered commercial bank whose primary regulator is the DCBS. The Bank is also subject to the supervision by and the regulations of the DFI, the DBO, the Idaho Department of Finance Banking Section, the Nevada Division of Financial Institutions, the FDIC, which insures bank deposits and the CFPB. Umpqua Investments is subject to extensive regulation by the SEC and the FINRA. Umpqua is subject to regulation and supervision by the Federal Reserve, the SEC and NASDAQ. Federal and state regulations may place banks and brokerage firms at a competitive disadvantage compared to less regulated competitors such as finance companies, credit unions, mortgage banking companies and leasing companies. There is also the possibility that laws could be enacted that would prohibit a company from controlling both an FDIC-insured bank and a broker dealer, or restrict their activities if under common ownership. If we receive less than satisfactory results on regulatory examinations, we could be restricted from making acquisitions, adding new stores, developing new lines of business, or otherwise continuing our growth strategy for a period of time. Future changes in federal and state banking and brokerage regulations could adversely affect our operating results and ability to continue to compete effectively.

We may be required to raise additional capital in the future, but that capital may not be available when it is needed, or it may only be available on unacceptable terms, which could adversely affect our financial condition and results of operations.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. Our ability to raise additional capital, if needed, will depend on conditions in the capital markets at that time, which are outside our control, and on our financial performance. Accordingly, we may not be able to raise additional capital, if needed, on terms acceptable to us. If we cannot raise additional capital when needed, our ability to further expand our operations and pursue our growth strategy could be materially impaired. We and the Bank are currently well capitalized under applicable regulatory guidelines. However, our business could be negatively affected if we or the Bank failed to remain well capitalized. For example, because Umpqua Bank is well capitalized and we otherwise qualify as a financial holding company, we are permitted to engage in a broader range of activities than are

permitted to a bank holding company. Loss of financial holding company status could require that we cease these broader activities. The banking regulators are authorized (and sometimes required) to impose a wide range of requirements, conditions, and restrictions on banks, thrifts, and bank holding companies that fail to maintain adequate capital levels. Further the new capital requirements of the Basel III Rules will become applicable to us beginning January 1, 2015.

Table of Contents

New rules will require increased capital and restrict TRUPS as a component of as Tier 1 Capital.

In June 2013, federal banking regulators jointly issued the Basel III Rules. The rules impose new capital requirements and implement Section 171 of the Dodd Frank Act. The new rules are to be phased in through 2019, beginning January 1, 2015. Among other things, the rules will require that we maintain a common equity Tier 1 capital ratio of 4.5%, a Tier 1 capital ratio of 6%, a total capital ratio of 8%, and a leverage ratio of 4%. In addition, we will have to maintain an additional capital conservation buffer of 2.5% of total risk weighted assets or be subject to limitations on dividends and other capital distributions, as well as limiting discretionary bonus payments to executive officers. The new rules also restrict trust preferred securities/junior subordinated debentures ("TRUPS") from comprising more than 25% of our Tier 1 capital. TRUPS now constitute approximately 20% of our Tier 1 capital. If an institution grows above \$15 billion as a result of an acquisition, as we did in the 2014 with the Sterling merger, the combined trust preferred issuances will be phased out of Tier 1 and into Tier 2 capital (75% in 2015 and 100% in 2016). It is possible the Company may accelerate redemption of the existing junior subordinated debentures. This could result in adjustments to the fair value of these instruments including the acceleration of losses on junior subordinated debentures carried at fair value within non-interest income. The Company currently does not intend to redeem the junior subordinated debentures in order to support regulatory total capital levels. The new rules may require us to raise more common capital or other capital that qualifies as Tier 1 capital. The application of more stringent capital requirements could, among other things, result in lower returns on invested capital and result in regulatory actions if we were to be unable to comply with such requirements. But based on the current components and levels of our capital and assets, we believe that we will be in compliance with the new capital requirements.

Conditions in the financial markets may limit our access to additional funding to meet our liquidity needs.

Liquidity is essential to our business. An inability to raise funds through deposits, borrowings, the sale or pledging as collateral of loans and other assets could have a substantial negative effect on our liquidity. Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. An adverse regulatory action against us could detrimentally impact our access to liquidity sources. Our ability to borrow could also be impaired by factors that are nonspecific to us, such as severe disruption of the financial markets or negative news and expectations about the prospects for the financial services industry as a whole as evidenced by turmoil in the domestic and worldwide credit markets.

Our wholesale funding sources may prove insufficient to support our future growth or an unexpected reduction in deposits.

We must maintain sufficient funds to respond to the needs of depositors and borrowers. As a part of our liquidity management, we use a number of funding sources in addition to core deposit growth and repayments and maturities of loans and investments. If we grow more rapidly than any increase in our deposit balances, we are likely to become more dependent on these sources, which include Federal Home Loan Bank advances, proceeds from the sale of loans and liquidity resources at the holding company. Our financial flexibility will be severely constrained if we are unable to maintain our access to funding or if adequate financing is not available to accommodate future growth at acceptable interest rates. If we are required to rely more heavily on more expensive funding sources to support future growth, our revenues may not increase proportionately to cover our costs, and our profitability would be adversely affected.

As a bank holding company that conducts substantially all of our operations through the Bank, our ability to pay dividends, repurchase our shares or to repay our indebtedness depends upon liquid assets held by the holding company and the results of operations of our subsidiaries.

The Company is a separate and distinct legal entity from our subsidiaries and it receives substantially all of its revenue from dividends paid from the Bank. There are legal limitations on the extent to which the Bank may extend credit, pay dividends or otherwise supply funds to, or engage in transactions with, us. Our inability to receive dividends from the Bank could adversely affect our business, financial condition, results of operations and prospects.

Our net income depends primarily upon the Bank's net interest income, which is the income that remains after deducting from total income generated by earning assets the expense attributable to the acquisition of the funds required to support earning assets (primarily interest paid on deposits). The amount of interest income is dependent on many factors including the volume of earning assets, the general level of interest rates, the dynamics of changes in interest rates and the levels of nonperforming loans. All of those factors affect the Bank's ability to pay dividends to

the Company.

22

Table of Contents

Various statutory provisions restrict the amount of dividends the Bank can pay to us without regulatory approval. The Bank may not pay cash dividends if that payment could reduce the amount of its capital below that necessary to meet the "adequately capitalized" level in accordance with regulatory capital requirements. It is also possible that, depending upon the financial condition of the Bank and other factors, regulatory authorities could conclude that payment of dividends or other payments, including payments to us, is an unsafe or unsound practice and impose restrictions or prohibit such payments. Under Oregon law, the Bank may not pay dividends in excess of unreserved retained earnings, deducting there from, to the extent not already charged against earnings or reflected in a reserve, the following: (1) all bad debts, which are debts on which interest is past due and unpaid for at least six months, unless the debt is fully secured and in the process of collection; (2) all other assets charged-off as required by Oregon bank regulators or a state or federal examiner; and (3) all accrued expenses, interest and taxes of the institution. The Federal Reserve has issued a policy statement on the payment of cash dividends by bank holding companies, which expresses the Federal Reserve's view that a bank holding company should pay cash dividends only to the extent that its net income for the past year is sufficient to cover both the cash dividends and a rate of earnings retention that is consistent with the holding company's capital needs, asset quality and overall financial condition. A decline in the Company's stock price or expected future cash flows, or a material adverse change in our results of operations or prospects, could result in impairment of our goodwill.

From time to time, the Company's common stock has traded at a price below its book value, including goodwill and other intangible assets. A significant and sustained decline in our stock price and market capitalization, a significant decline in our expected future cash flows, a significant adverse change in the business climate or slower growth rates could result in impairment of our goodwill. If impairment was deemed to exist, a write down of goodwill would occur with a charge to earnings.

We have a gross deferred tax asset position of \$423.3 million at December 31, 2014, and we are required to assess the recoverability of this asset on an ongoing basis.

Deferred tax assets are evaluated on a quarterly basis to determine if they are expected to be recoverable in the future. Our evaluation considers positive and negative evidence to assess whether it is more likely than not that a portion of the asset will not be realized. The risk of a valuation allowance increases if continuing operating losses are incurred. Future negative operating performance or other negative evidence may result in a valuation allowance being recorded against some or all of this amount. A valuation allowance on our deferred tax asset could have a material adverse impact on our capital and results of operations.

We are pursuing an aggressive growth strategy that is expected to include mergers and acquisitions, which could create integration risks.

Umpqua is among the fastest-growing community financial services organizations in the United States. Since 2000, we have completed the acquisition and integration of 12 other financial institutions. There is no assurance that future acquisitions will be successfully integrated. We continue to pursue traditional merger and acquisition transactions and to open new stores to continue our growth strategy. If we pursue our growth strategy too aggressively, or if factors beyond management's control divert attention away from our integration plans, we might not be able to realize some or all of the anticipated benefits. Moreover, we are dependent on the efforts of key personnel to achieve the synergies associated with our acquisitions. The loss of one or more of our key persons could have a material adverse effect upon our ability to achieve the anticipated benefits.

The financial services industry is highly competitive with respect to deposits, loans and products.

We face pricing competition for loans and deposits. We also face competition with respect to customer convenience, product lines, accessibility of service and service capabilities. Our most direct competition comes from other banks, brokerages, mortgage companies and savings institutions. We also face competition from credit unions, government-sponsored enterprises, mutual fund companies, insurance companies and other non-bank businesses. This significant competition in attracting and retaining deposits and making loans as well as in providing other financial services throughout our market area may impact future earnings and growth. Our success depends, in part, on the ability to adapt products and services to evolving industry standards. There is increasing pressure to provide products

and services at lower prices. This can reduce net interest income and non-interest income from fee-based products and services. In addition, new technology-driven products and services are often introduced and adopted, which could require us to make substantial capital expenditures to modify or adapt existing products and services or develop new products and services. We may not be successful in introducing new products and services or those new products may not achieve market acceptance. We could lose business, be forced to price products and services on less advantageous terms to retain or attract clients, or be subject to cost increases. As a result, our business, financial condition or results of operations may be adversely affected.

Table of Contents

Involvement in non-bank business creates risks associated with the securities industry.

Umpqua Investments' retail brokerage operations present special risks not borne by community banks that focus exclusively on community banking. For example, the brokerage industry is subject to fluctuations in the stock market that may have a significant adverse impact on transaction fees, customer activity and investment portfolio gains and losses. Likewise, additional or modified regulations may adversely affect Umpqua Investments' operations. Umpqua Investments is also dependent on a small number of established brokers, whose departure could result in the loss of a significant number of customer accounts. A significant decline in fees and commissions or trading losses suffered in the investment portfolio could adversely affect Umpqua Investments' income and potentially require the contribution of additional capital to support its operations. Umpqua Investments is subject to claim arbitration risk arising from customers who claim their investments were not suitable or that their portfolios were too actively traded. These risks increase when the market, as a whole, declines. The risks associated with retail brokerage may not be supported by the income generated by those operations. See Management's Discussion and Analysis of Financial Condition and Results of Operations-"Non-interest Income".

The value of the securities in our investment securities portfolio may be negatively affected by continued disruptions in securities markets.

The market for some of the investment securities held in our portfolio has become extremely volatile over the past three years. Volatile market conditions or deteriorating financial performance of the issuer or obligor may detrimentally affect the value of these securities. There can be no assurance that the declines in market value associated with these disruptions will not result in other-than-temporary or permanent impairments of these assets, which would lead to accounting charges that could have a material adverse effect on our net income and capital levels. The volatility of our mortgage banking business can adversely affect earnings if our mitigating strategies are not successful.

Changes in interest rates greatly affect the mortgage banking business. One of the principal risks in this area is prepayment of mortgages and the consequent detrimental effect on the value of mortgage servicing rights. We may employ hedging strategies to mitigate this risk but if the hedging decisions and strategies are not successful, our net income could be adversely affected. See Management's Discussion and Analysis of Financial Condition and Results of Operations-"Mortgage Servicing Rights".

Our business is highly reliant on technology and our ability to manage the operational risks associated with technology.

Our business involves storing and processing sensitive consumer and business customer data. A cyber security breach may result in theft of such data or disruption of our transaction processing systems. We depend on internal systems and outsourced technology to support these data storage and processing operations. Our inability to use or access these information systems at critical points in time could unfavorably impact the timeliness and efficiency of our business operations. A material breach of customer data security may negatively impact our business reputation and cause a loss of customers, result in increased expense to contain the event and/or require that we provide credit monitoring services for affected customers, result in regulatory fines and sanctions and/or result in litigation. Cyber security risk management programs are expensive to maintain and will not protect the Company from all risks associated with maintaining the security of customer data and the Company's proprietary data from external and internal intrusions, disaster recovery and failures in the controls used by our vendors. In addition, Congress and the legislatures of states in which we operate regularly consider legislation that would impose more stringent data privacy requirements.

Our business is highly reliant on third party vendors and our ability to manage the operational risks associated with outsourcing those services.

We rely on third parties to provide services that are integral to our operations. These vendors provide services that support our operations, including the storage and processing of sensitive consumer and business customer data, as well as our sales efforts. A cyber security breach of a vendor's system may result in theft of our data or disruption of business processes. A material breach of customer data security at a service provider's site may negatively impact our business reputation and cause a loss of customers; result in increased expense to contain the event and/or require that we provide credit monitoring services for affected customers, result in regulatory fines and sanctions and/or result in litigation. In most cases, we will remain primarily liable to our customers for losses arising from a breach of a

vendor's data security system. We rely on our outsourced service providers to implement and maintain prudent cyber security controls. We have procedures in place to assess a vendor's cyber security controls prior to establishing a contractual relationship and to periodically review assessments of those control systems; however, these procedures are not infallible and a vendor's system can be breached despite the procedures we employ. We have alliances with other companies that assist in our sales efforts. In our wealth management business, we have an alliance with Ferguson Wellman, a registered investment advisor to whom we refer customers for investment advice and asset management services. We cannot be sure that we will be able to maintain these relationships on favorable terms. In addition, some of our data processing services are provided by companies associated with our competitors. The loss of these vendor relationships could disrupt the services we provide to our customers and cause us to incur

Table of Contents

significant expense in connection with replacing these services.

Store construction can disrupt banking activities and may not be completed on time or within budget, which could result in reduced earnings.

The Bank has, over the past several years, been transformed from a traditional community bank into a community-oriented financial services retailer. We build new stores as part of our de novo branching strategy, including our "Neighborhood Stores." We also continue to remodel acquired bank branches to resemble retail stores that include distinct physical areas or boutiques such as a "serious about service center," an "investment opportunity center" and a "computer cafe." Store construction involves significant expense and risks associated with locating store sites and delays in obtaining permits and completing construction. Remodeling involves significant expense, disrupts banking activities during the remodeling period, and presents a new look and feel to the banking services and products being offered. Financial constraints may delay remodeling projects. Customers may not react favorably to the construction-related activities or the remodeled look and feel. There are risks that construction or remodeling costs will exceed forecasted budgets and that there may be delays in completing the projects, which could cause disruption in those markets.

Damage to our brand and reputation could significantly harm our business and prospects.

Our brand and reputation are important assets. Our relationship with many of our customers is predicated upon our reputation as a high quality provider of financial services that adheres to the highest standards of ethics, service quality and regulatory compliance. We believe that our brand has been, and continues to be, well received in our industry, with current and potential customers, investors and employees. Our ability to attract and retain customers, investors and employees depends upon external perceptions of us. Damage to our reputation among existing and potential customers, investors and employees could cause significant harm to our business and prospects and may arise from numerous sources, including litigation or regulatory actions, failing to deliver minimum standards of service and quality, lending practices, inadequate protection of customer information, sales and marketing efforts, compliance failures, unethical behavior and the misconduct of employees. Adverse developments with respect to our industry may also, by association, negatively impact our reputation or result in greater regulatory or legislative scrutiny or litigation against us.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

The executive offices of Umpqua and Umpqua Investments are located at One SW Columbia Street in Portland, Oregon in office space that is leased. The Bank's headquarters, located in Roseburg, Oregon, is owned. At December 31, 2014, the Bank conducted community banking activities or operated Commercial Banking Centers at 385 locations, in California, Oregon and Washington along the I-5 corridor; in the San Francisco Bay area, Inland Foothills, Napa, and Coastal regions in California; in Bend and along the Pacific Coast of Oregon; in greater Seattle and Bellevue, Washington, and in Idaho and Reno, Nevada, of which 147 are owned and 238 are leased under various agreements. As of December 31, 2014, the Bank also operated 25 facilities for the purpose of administrative and other functions, such as back-office support, of which 3 are owned and 22 are leased. All facilities are in a good state of repair and appropriately designed for use as banking or administrative office facilities. As of December 31, 2014, Umpqua Investments leased four stand-alone offices from unrelated third parties, one stand-alone office from the Bank, and also leased space in nine Bank stores under lease agreements based on market rates.

ITEM 3. LEGAL PROCEEDINGS.

Due to the nature of our business, we are involved in legal proceedings that arise in the ordinary course of our business. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations, cash flows, or our ability to close the proposed Sterling merger.

In our Form 10-K for the period ending December 31, 2011, we initially reported on a class action lawsuit filed in the U.S. District Court for the Northern District of California against the Bank by Amber Hawthorne relating to overdraft

fees and the posting order of point of sale and ACH items. In March 2014, the parties reached an agreement to settle the case and have executed a comprehensive written settlement agreement. On September 15, 2014, the court entered an order granting a motion for preliminary approval of the class settlement and held a final approval hearing on February 19, 2015. Settlement of this matter on the agreed terms will have no material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

In our Form 10-K for the period ending December 31, 2013, we initially reported on two separate class action lawsuits filed in Spokane County, Washington, Superior Court against the Company and other defendants arising from the then-proposed Merger,

Table of Contents

which the court consolidated. The consolidated litigation generally alleges that directors of Sterling breached their duties to the Sterling shareholders by approving the Merger, failing to take steps to maximize shareholder value, engaging in a flawed sales process, and agreeing to deal protection provisions in the Merger agreement that are alleged to unduly favor the Company. The Company is alleged to have aided and abetted the alleged breaches of duty. The consolidated litigation also alleges that the disclosures approved by the Sterling board in connection with the Merger and the vote thereon are false and misleading in various respects. As relief, the complaints sought to enjoin the Merger and seek, among other things, damages in an unspecified amount and payment of plaintiffs' attorneys' fees and costs. The defendants believe that the lawsuits are without merit. On January 16, 2014, the parties executed a Memorandum of Understanding (the "MOU") that contains the essential terms of a settlement and dismissal of the consolidated cases. The MOU does not call for the payment of any money damages, but required the defendants to make certain additional disclosures relating to the Merger and to pay the attorney fees, costs, and expenses of plaintiffs' counsel incurred in connection with the action. The agreed additional disclosures were made and included in the joint proxy statement/prospectus filed January 22, 2014. The MOU further provides that if the parties cannot agree on the amount of fees, costs, and expenses to be paid by the defendants to plaintiffs' counsel, such amount shall be decided by the court. There has been no significant activity in the cases since the MOU was executed. On September 26, 2014, the parties to the litigation filed a notice of settlement with the Court. The Court preliminarily approved the proposed settlement on December 5, 2014. The Court will consider final approval of the proposed settlement at a hearing scheduled for March 27, 2015.

The Company assumed, as successor-in-interest to Sterling, the defense of litigation matters pending against Sterling. Sterling previously reported that on December 11, 2009, a putative securities class action complaint captioned City of Roseville Employees' Retirement System v. Sterling Financial Corp., et al., No. CV 09-00368-EFS, was filed in the United States District Court for the Eastern District of Washington against Sterling and certain of its current and former officers. On June 18, 2010, lead plaintiff filed a consolidated complaint alleging that the defendants violated sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and SEC Rule 10b-5 by making false and misleading statements concerning Sterling's business and financial results. Plaintiffs sought unspecified damages and attorneys' fees and costs. On August 30, 2010, Sterling moved to dismiss the Complaint, and the court granted the motion to dismiss without prejudice on August 5, 2013. On October 11, 2013, the lead plaintiff filed an amended consolidated complaint with the same defendants, class period, alleged violations, and relief sought. On January 24, 2014, Sterling moved to dismiss the amended consolidated complaint, and on September 17, 2014, the court entered an order dismissing the amended consolidated complaint in its entirety with no further leave to amend. On October 24, 2014, plaintiffs filed a Notice of Appeal to the U.S. Court of Appeals for the Ninth Circuit from the district court's order granting the motion to dismiss the amended consolidated complaint and appellant's opening brief is due April 3, 2015.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

(a) Our common stock is traded on The NASDAQ Global Select Market under the symbol "UMPQ." As of December 31, 2014, there were 400,000,000 common shares authorized for issuance. The following table presents the high and low sales prices of our common stock for each period, based on inter-dealer prices that do not include retail mark-ups, mark-downs or commissions, and cash dividends declared for each period:

Quarter Ended	High	Low	Cash Dividend Per Share
December 31, 2014	\$17.98	\$14.94	\$0.15
September 30, 2014	\$18.39	\$16.22	\$0.15
June 30, 2014	\$19.36	\$19.00	\$0.15
March 31, 2014	\$19.60	\$16.50	\$0.15
December 31, 2013	\$19.65	\$16.09	\$0.15
September 30, 2013	\$17.48	\$15.08	\$0.15
June 30, 2013	\$15.29	\$11.45	\$0.20
March 31, 2013	\$13.54	\$12.00	\$0.10

As of December 31, 2014, our common stock was held by approximately 5,255 shareholders of record, a number that does not include beneficial owners who hold shares in "street name", or shareholders from previously acquired companies that have not exchanged their stock. At December 31, 2014, a total of 807,000 stock options, 1,386,000 shares of restricted stock and 675,000 restricted stock units were outstanding.

The payment of future cash dividends is at the discretion of our Board of Directors and subject to a number of factors, including results of operations, general business conditions, growth, financial condition and other factors deemed relevant by the Board of Directors. Further, our ability to pay future cash dividends is subject to certain regulatory requirements and restrictions discussed in the Supervision and Regulation section in Item 1 above.

During 2014, Umpqua's Board of Directors approved a quarterly cash dividend of \$0.15 per common share for each quarter. These dividends were made pursuant to our existing dividend policy and in consideration of, among other things, earnings, regulatory capital levels, the overall payout ratio and expected asset growth. We expect that the dividend rate will be reassessed on a quarterly basis by the Board of Directors in accordance with the dividend policy. We have a dividend reinvestment plan that permits shareholder participants to purchase shares at the then-current market price in lieu of the receipt of cash dividends. Shares issued in connection with the dividend reinvestment plan are purchased in open market transactions.

Equity Compensation Plan Information

The following table sets forth information about equity compensation plans that provide for the award of securities or the grant of options to purchase securities to employees and directors of Umpqua and its subsidiaries and predecessors by merger that were in effect at December 31, 2014.

(shares in thousands)

Plan category	Equity Compensation Plan Information		
	(A)	(B)	(C)
	Number of securities to be issued upon exercise of outstanding options warrants and rights	Weighted average exercise price of outstanding options, warrants and rights (4)	Number of securities remaining available for future issuance under equity compensation plans excluding securities reflected in column (A)
Equity compensation plans approved by security holders			
2013 Stock Incentive Plan (1)	—	\$—	3,000
2003 Stock Incentive Plan (1)	708	\$17.64	—
2007 Long Term Incentive Plan (1),(2)	25	\$—	—
Other (3)	787	\$12.71	—
Total	1,520	\$16.80	3,000
Equity compensation plans not approved by security holders	—	\$—	—
Total	1,520	\$16.80	3,000

At the annual meeting on April 16, 2013, shareholders approved the Company's 2013 Incentive Plan (the "2013 Plan"), which, among other things, authorizes the issuance of equity awards to directors and employees and reserves 4,000,000 shares of the Company's common stock for issuance under the plan. With the adoption of the (1) 2013 Plan, no additional awards will be issued from the 2003 Stock Incentive Plan or the 2007 Long Term Incentive Plan. Under the terms of the 2013 Plan, options and awards generally vest ratably over a period of three to five years, the exercise price of each option equals the market price of the Company's common stock on the date of the grant, and the maximum term is ten years.

(2) As of December 31, 2014, 25,000 restricted stock units are expected to vest as the performance-based targets were satisfied and there are no securities available for future issuance.

(3) Includes other Umpqua stock plans and stock plans assumed through previous mergers.

(4) Weighted average exercise price is based solely on securities with an exercise price.

(b) Not applicable.

(c) The Company's share repurchase plan, which was first approved by the Board and announced in August 2003, was amended on September 29, 2011 to increase the number of common shares available for repurchase under the plan to 15 million shares. The repurchase program was extended in April 2013 to run through June 2015. As of December 31, 2014, a total of 12.0 million shares remained available for

repurchase. The Company did not repurchase any shares under the repurchase plan during 2014, repurchased 98,027 shares in 2013, and 512,280 shares under the repurchase plan in 2012. The timing and amount of future repurchases will depend upon the market price for our common stock, securities laws restricting repurchases, asset growth, earnings, and our capital plan.

There were 161,568 and 438,136 shares tendered in connection with option exercises during the years ended December 31, 2014 and 2013, respectively. Restricted shares cancelled to pay withholding taxes totaled 107,131 and 48,514 shares during the years ended December 31, 2014 and 2013, respectively. There were 129,766 restricted stock units cancelled to pay withholding taxes during the years ended December 31, 2014 and none in 2013, respectively.

(1) Excludes loans held for sale

Average common shareholders' equity less average intangible assets (excluding MSR) divided by shares outstanding at the end of the year. See Management's Discussion and Analysis of Financial Condition and Results of Operation - "Results of Operations - Overview" for the reconciliation of non-GAAP financial measures, in Item 7 of this report.

(3) Net earnings available to common shareholders divided by average assets.

(4) Net earnings available to common shareholders divided by average common shareholders' equity.

Net earnings available to common shareholders divided by average common shareholders' equity less average intangible assets. See Management's Discussion and Analysis of Financial Condition and Results of Operations - "Results of Operations - Overview" for the reconciliation of non-GAAP financial measures, in Item 7 of this report.

(6) Non-interest expense divided by the sum of net interest income (fully tax equivalent) and non-interest income.

Tier 1 capital divided by leverage assets. Leverage assets are defined as quarterly average total assets, net of goodwill, intangibles and certain other items as required by the Federal Reserve.

Net interest margin (fully tax equivalent) is calculated by dividing net interest income (fully tax equivalent) by average interest earnings assets.

(9) Non-interest income divided by the sum of non-interest revenue and net interest income.

(10) Dividends declared per common share divided by basic earnings per common share.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD LOOKING STATEMENTS AND RISK FACTORS

See the discussion of forward-looking statements and risk factors in Part I Item 1 and Item 1A of this report.

EXECUTIVE OVERVIEW

Significant items for the year ended December 31, 2014 were as follows:

Financial Performance

Net earnings available to common shareholders per diluted common share were \$0.78 for the year ended December 31, 2014, as compared to \$0.87 for the year ended December 31, 2013. Operating earnings per diluted common share, defined as earnings available to common shareholders before net gains or losses on junior subordinated debentures carried at fair value, net of tax and merger related expenses, net of tax, divided by the same diluted share total used in determining diluted earnings per common share, were \$1.08 for the year ended December 31, 2014, as compared to operating income per diluted common share of \$0.94 for the year ended December 31, 2013. Operating income per diluted share is considered a "non-GAAP" financial measure. More information regarding this measurement and reconciliation to the comparable GAAP measurement is provided under the heading Results of Operations - Overview below.

Net interest margin, on a tax equivalent basis, was 4.73% for the year ended December 31, 2014, compared to 4.01% for the year ended December 31, 2013. The increase in net interest margin is primarily attributable to a higher yield on interest-earning assets due to the acquisitions of Sterling and of FinPac, as well as a lower cost of funds.

Residential mortgage banking revenue was \$77.3 million for 2014, compared to \$78.9 million for 2013. The decrease was the result of lower gain on sale margins, and a larger loss from the change in the fair value of the MSR asset, consistent with the decline in mortgage interest rates, partially offset by higher mortgage originations and servicing fees.

Total gross loans and leases were \$15.3 billion as of December 31, 2014, an increase of \$7.6 billion, or 98.3%, as compared to December 31, 2013. This increase is primarily the result of the merger with Sterling which added \$7.1 billion of loans at acquisition.

Total deposits were \$16.9 billion as of December 31, 2014, an increase of \$7.8 billion, or 85.3%, as compared to December 31, 2013. The increase resulted primarily from the merger with Sterling which added \$7.1 billion of deposits at acquisition.

Total consolidated assets were \$22.6 billion as of December 31, 2014, as compared to \$11.6 billion at December 31, 2013.

Credit Quality

Non-performing assets increased to \$97.5 million, or 0.43% of total assets, as of December 31, 2014, as compared to \$59.3 million, or 0.51% of total assets, as of December 31, 2013. Non-performing loans and leases increased to \$59.6 million, or 0.39% of total loans and leases, as of December 31, 2014, as compared to \$35.3 million, or 0.46% of total loans and leases as of December 31, 2013.

Net charge-offs on loans were \$19.2 million for the year ended December 31, 2014, or 0.15% of average loans and leases, as compared to net charge-offs of \$19.3 million, or 0.26% of average loans and leases, for the year ended

December 31, 2013.

The provision for loan and lease losses was \$40.2 million for 2014, as compared to \$10.7 million recognized for 2013. The increase is due to new production of loans and leases during 2014, requiring a higher allowance for loan and lease losses.

32

Table of Contents

Capital and Growth Initiatives

Total risk based capital increased to 15.2% as of December 31, 2014, compared to 14.7% as of December 31, 2013, primarily due to the effects of the Sterling merger.

Declared cash dividends of \$0.60 per common share for 2014 and 2013.

Completed the Sterling merger in April 2014.

SUMMARY OF CRITICAL ACCOUNTING POLICIES

The SEC defines "critical accounting policies" as those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in future periods. Our significant accounting policies are described in Note 1 in the Notes to Consolidated Financial Statements in Item 8 of this report. Not all of these significant accounting policies require management to make difficult, subjective or complex judgments or estimates. Management believes that the following policies would be considered critical under the SEC's definition.

Allowance for Loan and Lease Losses and Reserve for Unfunded Commitments

The Bank performs regular credit reviews of the loan and lease portfolio to determine the credit quality and adherence to underwriting standards. When loans and leases are originated, they are assigned a risk rating that is reassessed periodically during the term of the loan through the credit review process. The Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the allowance for loan and lease losses. The Bank has a management Allowance for Loan and Lease Losses ("ALLL") Committee, which is responsible for, among other things, regularly reviewing the ALLL methodology, including loss factors, and ensuring that it is designed and applied in accordance with generally accepted accounting principles. The ALLL Committee reviews and approves loans and leases recommended for impaired status. The ALLL Committee also approves removing loans and leases from impaired status. The Bank's Audit and Compliance Committee provides board oversight of the ALLL process and reviews and approves the ALLL methodology on a quarterly basis.

Each risk rating is assessed an inherent credit loss factor that determines the amount of the allowance for loan and lease losses provided for that group of loans and leases with similar risk rating. Credit loss factors may vary by region based on management's belief that there may ultimately be different credit loss rates experienced in each region. Regular credit reviews of the portfolio also identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a specific component to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral dependent loans if it is determined that such amount represents a confirmed loss. The combination of the risk rating-based allowance component and the impairment reserve allowance component lead to an allocated allowance for loan and lease losses.

The Bank may also maintain an unallocated allowance amount to provide for other credit losses inherent in a loan and lease portfolio that may not have been contemplated in the credit loss factors. This unallocated amount generally comprises less than 5% of the allowance, but may be maintained at higher levels during times of economic conditions characterized by falling real estate values. The unallocated amount is reviewed periodically based on trends in credit losses, the results of credit reviews and overall economic trends. As of December 31, 2014, there was no unallocated allowance amount.

The reserve for unfunded commitments ("RUC") is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. These factors include the quality of the current loan portfolio; the trend in the loan portfolio's risk ratings; current economic conditions; loan concentrations; loan growth rates; past-due and non-performing trends; evaluation of specific loss estimates for all significant problem loans; historical charge-off and recovery experience; and other pertinent information.

Table of Contents

Management believes that the ALLL was adequate as of December 31, 2014. There is, however, no assurance that future loan losses will not exceed the levels provided for in the ALLL and could possibly result in additional charges to the provision for loan and lease losses. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review. Approximately 80% of our loan portfolio is secured by real estate, and a significant decline in real estate market values may require an increase in the allowance for loan and lease losses.

Acquired Loans including Covered Loans and FDIC Indemnification Asset

Acquired loans and leases are recorded at their fair value at the acquisition date. For purchased non-impaired loans, the difference between the fair value and unpaid principal balance of the loan at the acquisition date is amortized or accreted to interest income over the estimated life of the loans.

The acquired loans and purchase impaired loans are aggregated into pools based on individually evaluated common risk characteristics and aggregate expected cash flows were estimated for each pool. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. The cash flows expected to be received over the life of the pool were estimated by management with the assistance of a third party valuation specialist. These cash flows were input into an accounting loan system which calculates the carrying values of the pools and underlying loans, book yields, effective interest income and impairment, if any, based on actual and projected events. Default rates, loss severity, and prepayment speeds assumptions are periodically reassessed and updated within the accounting model to update our expectation of future cash flows. The excess of the cash flows expected to be collected over a pool's carrying value is considered to be the accretable yield and is recognized as interest income over the estimated life of the loan or pool using the effective yield method. The accretable yield may change due to changes in the timing and amounts of expected cash flows. Changes in the accretable yield are disclosed quarterly.

Loans acquired in a FDIC-assisted acquisition that are subject to a loss-share agreement are referred to as "covered loans." The Company has elected to account for amounts receivable under the loss-share agreement as an indemnification asset. The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreement. The difference between the carrying value and the undiscounted cash flows the Company expects to collect from the FDIC will be accreted or amortized into non-interest income over the life of the FDIC indemnification asset, which is maintained at the loan pool level.

Residential Mortgage Servicing Rights ("MSR")

The Company determines its classes of servicing assets based on the asset type being serviced along with the methods used to manage the risk inherent in the servicing assets, which includes the market inputs used to value the servicing assets. The Company measures its residential mortgage servicing assets at fair value and reports changes in fair value through earnings. Fair value adjustments encompass market-driven valuation changes and the runoff in value that occurs from the passage of time, which are separately reported. Under the fair value method, the MSR is carried in the balance sheet at fair value and the changes in fair value are reported in earnings under the caption residential mortgage banking revenue in the period in which the change occurs.

Retained mortgage servicing rights are measured at fair values as of the date of sale. We use quoted market prices when available. Subsequent fair value measurements are determined using a discounted cash flow model. In order to determine the fair value of the MSR, the present value of expected net future cash flows is estimated. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income net of servicing costs. This model is periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar

portfolios as well as to MSR broker valuations and industry surveys, as available.

Valuation of Goodwill and Intangible Assets

Goodwill and other intangible assets with indefinite lives are not amortized but instead are periodically tested for impairment. Management performs an impairment analysis for the intangible assets with indefinite lives on an annual basis as of December 31. Additionally, goodwill and other intangible assets with indefinite lives are evaluated on an interim basis when events or circumstance indicate impairment potentially exists. The impairment analysis requires management to make subjective judgments. Events and factors that may significantly affect the estimates include, among others, competitive forces, customer behaviors and attrition, changes in revenue growth trends, cost structures, technology, changes in discount rates and specific industry and market conditions. There can be no assurance that changes in circumstances, estimates or assumption may result in additional impairment of all, or some portion of, goodwill.

Table of Contents

The Company performed its annual goodwill impairment analysis of the Community Banking reporting segment as of December 31, 2014. In the first step of the goodwill impairment test, the Company assessed qualitative factors to determine whether the existence of events and circumstances indicated that it is more likely than not that the indefinite-lived intangible asset is impaired, and determined no factors indicated an impairment. Based on this analysis, no further testing was determined to be necessary.

Stock-based Compensation

We recognize expense in the income statement for the grant-date fair value of stock options and other equity-based forms of compensation issued to employees over the employees' requisite service period (generally the vesting period). The requisite service period may be subject to performance conditions. The fair value of each grant is estimated as of the grant date using the Black-Scholes option-pricing model or a Monte Carlo simulation pricing model, as required by the features of the grants. Management assumptions utilized at the time of grant impact the fair value of the option calculated under the pricing model, and ultimately, the expense that will be recognized over the expected service period related to each option.

Fair Value

A hierarchical disclosure framework associated with the level of pricing observability is utilized in measuring financial instruments at fair value. The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of pricing observability and a lesser degree of judgment utilized in measuring fair value. Conversely, financial instruments rarely traded or not quoted will generally have little or no pricing observability and a higher degree of judgment utilized in measuring fair value. Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established and the characteristics specific to the transaction.

RECENT ACCOUNTING PRONOUNCEMENTS

Information regarding Recent Accounting Pronouncements is included in Note 1 of the Notes to Consolidated Financial Statements in Item 8 below.

RESULTS OF OPERATIONS-OVERVIEW

For the year ended December 31, 2014, net earnings available to common shareholders were \$147.0 million, or \$0.78 per diluted common share, as compared to net earnings available to common shareholders of \$97.6 million, or \$0.87 per diluted common share for the year ended December 31, 2013. The increase in net earnings available to common shareholders in 2014 is principally attributable to the merger with Sterling which increased net interest income. The increase in net interest income was offset by the increase in non-interest expense, including merger-related expenses, which are also attributable to the merger with Sterling.

For the year ended December 31, 2013, net earnings available to common shareholders were \$97.6 million, or \$0.87 per diluted common share, as compared to net earnings available to common shareholders of \$101.2 million, or \$0.90 per diluted common share for the year ended December 31, 2012. The decrease in net earnings available to common shareholders in 2013 is principally attributable to decreased net interest income, decreased non-interest income, increased non-interest expense, partially offset by decreased provision for loan and lease losses.

Umpqua recognizes gains or losses on our junior subordinated debentures carried at fair value resulting from the estimated market credit risk adjusted spread and changes in interest rates that do not directly correlate with the

Company's operating performance. Also, Umpqua incurs significant expenses related to the completion and integration of mergers and acquisitions. Additionally, we may recognize goodwill impairment losses that have no direct effect on the Company's or the Bank's cash balances, liquidity, or regulatory capital ratios. Lastly, Umpqua may recognize one-time bargain purchase gains on certain acquisitions that are not reflective of Umpqua's on-going earnings power. Accordingly, management believes that our operating results are best measured on a comparative basis excluding the impact of gains or losses on junior subordinated debentures measured at fair value, net of tax, merger-related expenses, net of tax, and other charges related to business combinations such as goodwill impairment charges or bargain purchase gains, net of tax. We define operating earnings as earnings available to common shareholders before gains or losses on junior subordinated debentures carried at fair value, net of tax, bargain purchase gains on acquisitions, net of tax, merger related expenses, net of tax, and goodwill impairment, and we calculate operating earnings per diluted share by dividing operating earnings by the same diluted share total used in determining diluted earnings per common share. Operating earnings and operating earnings per diluted share are considered "non-GAAP" financial measures. Although we believe the presentation of non-GAAP financial measures provides a better indication of our operating performance, readers of this report are urged to review the GAAP results as presented in the Financial Statements and Supplementary Data in Item 8 below.

Table of Contents

The following table provides the reconciliation of earnings available to common shareholders (GAAP) to operating earnings (non-GAAP), and earnings per diluted common share (GAAP) to operating earnings per diluted share (non-GAAP) for the years ended December 31, 2014, 2013, and 2012:

Reconciliation of Net Earnings Available to Common Shareholders to Operating Earnings
Years Ended December 31,

(in thousands, except per share data)	2014	2013	2012
Net earnings available to common shareholders	\$147,036	\$97,573	\$101,209
Adjustments:			
Net loss on junior subordinated debentures carried at fair value, net of tax (1)	3,054	1,318	1,322
Merger-related expenses, net of tax (1)	52,311	6,820	1,403
Operating earnings	\$202,401	\$105,711	\$103,934
Per diluted share:			
Net earnings available to common shareholders	\$0.78	\$0.87	\$0.90
Adjustments:			
Net loss on junior subordinated debentures carried at fair value, net of tax (1)	0.02	0.01	0.01
Merger-related expenses, net of tax (1)	0.28	0.06	0.02
Operating earnings	\$1.08	\$0.94	\$0.93

(1) Adjusted for income tax effect of pro forma operating earnings of 40% for tax-deductible items.

The following table presents the returns on average assets, average common shareholders' equity and average tangible common shareholders' equity for the years ended December 31, 2014, 2013, and 2012. For each of the periods presented, the table includes the calculated ratios based on reported net earnings available to common shareholders and operating income as shown in the table above. Our return on average common shareholders' equity is negatively impacted as the result of capital required to support goodwill. To the extent this performance metric is used to compare our performance with other financial institutions that do not have merger and acquisition-related intangible assets, we believe it beneficial to also consider the return on average tangible common shareholders' equity. The return on average tangible common shareholders' equity is calculated by dividing net earnings available to common shareholders by average shareholders' common equity less average goodwill and intangible assets, net (excluding MSRs). The return on average tangible common shareholders' equity is considered a non-GAAP financial measure and should be viewed in conjunction with the return on average common shareholders' equity.

Return on Average Assets, Common Shareholders' Equity and Tangible Common Shareholders' Equity
For the Years Ended December 31,

(dollars in thousands)	2014	2013	2012
Returns on average assets:			
Net earnings available to common shareholders	0.77	% 0.85	% 0.88
Operating earnings	1.06	% 0.92	% 0.90
Returns on average common shareholders' equity:			
Net earnings available to common shareholders	4.69	% 5.64	% 5.95
Operating earnings	6.45	% 6.11	% 6.11
Returns on average tangible common shareholders' equity:			
Net earnings available to common shareholders	9.16	% 9.78	% 9.87
Operating earnings	12.62	% 10.60	% 10.14
Calculation of average common tangible shareholders' equity:			

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-K

Average common shareholders' equity	\$3,137,858	\$1,729,083	\$1,701,403
Less: average goodwill and other intangible assets, net	(1,533,403)	(731,525)	(676,354)
Average tangible common shareholders' equity	\$1,604,455	\$997,558	\$1,025,049

Table of Contents

Additionally, management believes tangible common equity and the tangible common equity ratio are meaningful measures of capital adequacy. Umpqua believes the exclusion of certain intangible assets in the computation of tangible common equity and tangible common equity ratio provides a meaningful base for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the operating results and capital of the Company. Tangible common equity is calculated as total shareholders' equity less preferred stock and less goodwill and other intangible assets, net (excluding MSRs). In addition, tangible assets are total assets less goodwill and other intangible assets, net (excluding MSRs). The tangible common equity ratio is calculated as tangible common shareholders' equity divided by tangible assets. The tangible common equity and tangible common equity ratio is considered a non-GAAP financial measure and should be viewed in conjunction with the total shareholders' equity and the total shareholders' equity ratio.

The following table provides a reconciliation of ending shareholders' equity (GAAP) to ending tangible common equity (non-GAAP), and ending assets (GAAP) to ending tangible assets (non-GAAP) as of December 31, 2014 and December 31, 2013:

Reconciliations of Total Shareholders' Equity to Tangible Common Shareholders' Equity and Total Assets to Tangible Assets

(dollars in thousands)	December 31, 2014	December 31, 2013
Total shareholders' equity	\$3,780,997	\$1,727,426
Subtract:		
Goodwill and other intangible assets, net	1,842,958	776,683
Tangible common shareholders' equity	\$1,938,039	\$950,743
Total assets	\$22,613,274	\$11,636,112
Subtract:		
Goodwill and other intangible assets, net	1,842,958	776,683
Tangible assets	\$20,770,316	\$10,859,429
Tangible common equity ratio	9.33	% 8.75 %

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited. Although we believe these non-GAAP financial measure are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation or as a substitute for analyses of results as reported under GAAP.

NET INTEREST INCOME

Net interest income is the largest source of our operating income. Net interest income for 2014 was \$773.8 million, an increase of \$368.9 million or 91.1% compared to the same period in 2013. The increase in net interest income in 2014 as compared to 2013 is attributable to an increase in average interest-earning assets, primarily loans and investment securities, and an increase in net interest margin, partially offset by an increase in average deposits and other average interest-bearing liabilities.

Net interest income for 2013 was \$405.0 million, a decrease of \$2.3 million or 0.6% compared to the same period in 2012. The decrease in net interest income in 2013 as compared to 2012 is attributable to a decrease in outstanding average interest-earning assets, primarily investment securities, and a decrease in net interest margin, partially offset by an increase in average loans and leases and a decrease in interest-bearing liabilities.

The net interest margin (net interest income as a percentage of average interest-earning assets) on a fully tax equivalent basis was 4.73% for the 2014, an increase of 72 basis points as compared to the same period in 2013. The

increase in net interest margin primarily resulted from the increase in loan yields, the increase in average loans and leases, offset by an increase in average deposits and interest-bearing liabilities. Partially contributing to the increase in net interest margin in 2014, as compared to 2013, is the continued reduction of the cost of interest-bearing liabilities, specifically time deposits. The total cost of interest-bearing liabilities for 2014 was 0.41%, representing a decrease of 10 basis points compared 2013. The cost of time deposits was 0.58% in 2014 compared to 0.89% in 2013.

The net interest margin on a fully tax-equivalent basis was 4.01% for 2013, a decrease of 1 basis points as compared to the same period in 2012. The decrease in net interest margin primarily resulted from the decline in loan yields, a decline in investment yields, and an increase in average interest bearing cash, offset by an increase in average loans and leases outstanding, a decline in the cost of interest-bearing deposits, and a decrease in average interest-bearing liabilities.

Table of Contents

Our net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, as well as changes in the yields earned on interest-earning assets and rates paid on deposits and borrowed funds. The following table presents condensed average balance sheet information, together with interest income and yields on average interest-earning assets, and interest expense and rates paid on average interest-bearing liabilities for years ended December 31, 2014, 2013 and 2012:

Average Rates and Balances

(dollars in thousands)	2014	2013		2012		2011			
	Average	Interest Income or Expense	Average Yields or Rates	Average Balance	Interest Income or Expense	Average Yields or Rates	Average Balance	Interest Income or Expense	Average Yields or Rates
INTEREST-EARNING ASSETS:									
Loans held for sale	\$205,580	\$8,337	4.06 %	\$138,383	\$4,835	3.49 %	\$178,403	\$6,634	3.72 %
Loans and leases (1)	13,003,762	755,466	5.81 %	7,367,602	393,379	5.34 %	6,707,194	380,178	5.67 %
Taxable securities	2,072,936	46,109	2.22 %	1,952,611	34,398	1.76 %	2,743,672	59,161	2.16 %
Non-taxable securities (2)	301,535	15,692	5.20 %	247,010	13,477	5.46 %	258,816	13,834	5.34 %
