PART I

Item 1. Business.

General

EFC Bancorp, Inc. (also referred to as the Company or Registrant), was incorporated under Delaware law in October 1997. The Registrant was formed to acquire Elgin Financial Savings Bank and subsidiaries, Elgin, Illinois, (the Bank) as part of the Bank's conversion from a mutual to a stock form of organization (the Conversion). In connection with the Conversion, the Company issued an aggregate of 7,491,434 shares of its common stock, par value \$0.01 per share (Common Stock) at a purchase price of \$10 per share, of which 6,936,513 shares were issued in a subscription offering and 554,921 shares were issued to the Elgin Financial Foundation (the Foundation), a charitable foundation established by the Bank. The Company received approval to become a savings and loan holding company and is subject to regulation by the Office of Thrift Supervision (OTS) and the Securities and Exchange Commission (SEC). The Company's acquisition of the Bank occurred on April 3, 1998.

The Bank is a community-oriented savings institution that was originally organized in 1924 as a federally-chartered mutual savings and loan association. The Bank reorganized in the 1980s to become Elgin Federal Financial Center, a federally-chartered mutual savings association, and again in 1996 to become Elgin Financial Center, S.B., an Illinois state-chartered mutual savings bank. In 1998, the Bank changed its name to Elgin Financial Savings Bank. Most recently, in October 2002 the Bank changed its name to EFS Bank. The Bank's principal business consists of the acceptance of retail deposits from the general public in the areas surrounding its full-service branch offices and the investment of those deposits, together with funds generated from operations and borrowings, primarily in one- to four-family residential mortgage loans and, to a lesser extent, multi-family and commercial real estate loans, construction and land loans, commercial business loans, home equity loans, and automobile and passbook savings loans. The Bank generally originates all of its loans for investment. The Bank also invests primarily in government insured or guaranteed mortgage-backed securities, U.S. Government obligations and municipal securities. The Bank's revenues are derived principally from the interest on its mortgage, consumer and commercial business loans and securities and from servicing fees. The Bank's primary sources of funds are retail savings deposits and, to a lesser extent, advances from the Federal Home Loan Bank of Chicago (the FHLB-Chicago).

Market Area

Headquartered in largely suburban Kane County, Illinois, the Bank has been, and intends to continue to be, a community-oriented financial institution offering a variety of financial services to meet the needs of the communities it serves. The Bank currently operates four full-service banking facilities in Elgin and four full service facilities located in West Dundee, East Dundee, Huntley and Carpentersville, Illinois. The Bank's primary lending and deposit gathering area is concentrated around the areas where its full-service banking facilities are located which the Bank generally considers to be its primary market area.

Elgin is located on U.S. Interstate 90 (the Northwest tollway) in the Fox River Valley approximately 38 miles northwest of downtown Chicago and 25 miles west of O'Hare International Airport. Interstate 90 provides easy access to the City of Chicago and is a major corridor of suburban growth for Chicago. The economy in the Bank's primary market area has historically benefited from the growth of the Chicago suburbs into Kane, Western Cook and McHenry Counties with an influx of new residents and employers. Other employment and economic activity is provided by a variety of wholesale and retail trade, hospitals and a riverboat gambling facility located on the Fox River in Elgin.

Competition

Edgar Filing: EFC BANCORP INC - Form 10-K

The Bank faces significant competition both in making loans and in attracting deposits. The State of Illinois has a high density of financial institutions, many of which are branches of significantly larger institutions, which have greater financial resources than the Bank, all of which are competitors of the Bank to varying degrees. The Bank's competition for loans comes principally from savings banks, savings and loan associations, commercial banks, mortgage banking companies, credit unions, insurance companies and other financial service companies. Its most direct competition for deposits has historically come from savings and loan associations, savings banks, commercial banks and credit unions. The Bank faces additional competition for deposits from non-depository competitors such as the mutual fund industry, securities and brokerage firms and insurance companies. Competition may also increase as a result of the lifting of restrictions on the interstate operations of financial institutions. There are approximately 21 financial institutions with operations in Elgin and approximately 51 financial institutions

with operations in the Bank's primary market area.

Lending Activities

Loan Portfolio Composition. The types of loans that the Bank may originate are subject to federal and state laws and regulations. Interest rates charged by the Bank on loans are affected principally by the demand for such loans, the supply of money available for lending purposes and the rates offered by its competitors. These factors are, in turn, affected by general and economic conditions, monetary policies of the federal government, including the Federal Reserve Board (FRB), legislative tax policies and governmental budgetary matters.

The Bank's loan portfolio primarily consists of first mortgage loans secured by one- to four-family residences most of which are located in its primary market area. At December 31, 2003, the Bank's gross loan portfolio totaled \$720.8 million, of which \$467.0 million were one- to four-family residential mortgage loans, or 64.8% of total loans. At such date, the remainder of the loan portfolio consisted of \$52.2 million of multi-family loans, or 7.3% of total loans; \$109.4 million of commercial real estate loans, or 15.2% of total loans; \$36.4 million of construction and land loans, or 5.0% of total loans; \$22.6 million of commercial loans, or 3.1% of total loans; and \$33.3 million of consumer loans, or 4.6% of total loans, consisting of \$27.5 million of home equity lines of credit, \$4.3 million of secured and unsecured personal loans and \$1.5 million of automobile loans. The Bank sold loans totaling \$20.8 million and \$13.2 million during the years ended December 31, 2003 and December 31, 2002, respectively. At December 31, 2003, 39.0% of the Bank's mortgage loans had adjustable interest rates, most of which were indexed to the one year Constant Maturity Treasury (CMT) Index.

Edgar Filing: EFC BANCORP INC - Form 10-K

The following table sets forth the composition of the Bank's loan portfolio in dollar amounts and in percentages of the respective portfolios at the dates indicated.

Loan Originations. The Bank's mortgage lending activities are conducted by its loan personnel operating at its eight branch offices as well as through participation and loan acquisition programs. All loans originated by the Bank are underwritten by the Bank pursuant to the Bank's policies and procedures. The Bank originates both adjustable-rate and fixed-rate mortgage loans, commercial loans, and consumer loans. The Bank's ability to originate fixed- or adjustable-rate loans is dependent upon the relative customer demand for such loans, which is affected by the current and expected future level of interest rates. It is the general policy of the Bank to retain loans originated in its portfolio.

During the years ended December 31, 2003 and 2002, the Bank originated \$93.6 million and \$87.2 million of fixed-rate one- to four-family residential mortgage loans, respectively, and for the years ended December 31, 2003 and 2002, the Bank originated \$62.5 million and \$15.9 million of adjustable-rate one- to four-family residential mortgage loans, respectively, all of which were retained by the Bank. Based upon the Bank's investment needs and market opportunities, the Bank participates and purchases loans, consisting of one-to-four family, multi-family and commercial real estate mortgage loans, and construction loans secured by property located in Illinois, southern Wisconsin and, to a lesser extent, in Minnesota, and had \$167.6 million of purchased loan participation interests at December 31, 2003.

The following tables set forth the Bank's loan originations, purchases and principal repayments for the periods indicated. All loans originated by the Bank are generally held for investment.

One- to Four-Family Lending. The Bank currently offers both fixed-rate and adjustable-rate mortgage (ARM) loans with maturities up to 30 years secured by one- to four-family residences which are generally located in the Bank s primary market area. One- to four-family mortgage loan originations are generally obtained from the Bank s in-house loan representatives,

mortgage brokers, from existing or past customers, through advertising, and through referrals from local builders, real estate brokers and attorneys. At December 31, 2003, the Bank's one- to four-family mortgage loans totaled \$467.0 million, or 64.8%, of total loans. Of the one- to four-family mortgage loans outstanding at that date, 60.3% were fixed-rate mortgage loans and 39.7% were ARM loans.

The Bank currently offers fixed-rate mortgage loans with terms from 10 to 30 years. These loans have generally been priced at current market rates for such loans. The Bank currently offers a number of ARM loans with terms of up to 30 years and interest rates which adjust every one, two or three years from the outset of the loan or which adjust annually after a two, three or five year initial fixed period. The interest rates for the Bank's ARM loans are indexed to the one-year CMT Index. The Bank originates ARM loans with initially discounted rates, often known as teaser rates. The Bank's ARM loans generally provide for periodic (not more than 2%) and overall (not more than 6%) caps on the increase or decrease in the interest rate at any adjustment date and over the life of the loan. However, interest rates on the Bank's residential ARM loans may never adjust to be less than the initial rate of interest charged on any such loan.

The origination of adjustable-rate residential mortgage loans, as opposed to fixed-rate residential mortgage loans, helps reduce the Bank's exposure to increases in interest rates. However, adjustable-rate loans generally pose credit risks not inherent in fixed-rate loans, primarily because as interest rates rise, the underlying payments of the borrower rise, thereby increasing the potential for default. Periodic and lifetime caps on interest rate increases help to reduce the risks associated with adjustable-rate loans but also limit the interest rate sensitivity of such loans.

The Bank has also purchased one-to-four family first mortgage loans generally out of our primary market area. As of December 31, 2003, the Bank had \$97.6 million of these loans. In addition, the Bank sold loans totaling \$20.8 million and \$13.2 million for the years ended December 31, 2003 and 2002, respectively.

Multi-Family and Commercial Real Estate Lending. The Bank originates multi-family and commercial real estate loans that are generally secured by five or more unit apartment buildings and properties used for business purposes such as small office buildings or retail facilities located in the Bank's primary market area. The Bank's multi-family and commercial real estate underwriting policies provide that such real estate loans may be made in amounts up to 80% of the appraised value of the property, subject to the Bank's current loans-to-one-borrower limit, which at December 31, 2003 was \$19.5 million. The Bank's multi-family and commercial real estate loans may be made with terms up to 25 years and are offered with interest rates that adjust periodically. In reaching its decision on whether to make a multi-family or commercial real estate loan, the Bank considers the net operating income of the property, the borrower's expertise, credit history and profitability and the value of the underlying property. The Bank has generally required that the properties securing these real estate loans have debt service coverage ratios (the ratio of earnings before debt service to debt service) of at least 1.20x. Environmental impact surveys are generally required for all commercial real estate loans. Generally, all multi-family and commercial real estate loans made to corporations, partnerships and other business entities require personal guarantees by the principals. On an exception basis, the Bank may not require a personal guarantee on such loans depending on the creditworthiness of the borrower and the amount of the down payment and other mitigating circumstances. The Bank continues to emphasize commercial real estate lending. The Bank's multi-family real estate loan portfolio at December 31, 2003 was \$52.2 million, or 7.3% of total loans, and the Bank's commercial real estate loan portfolio at such date was \$109.4 million, or 15.2% of total loans. The largest multi-family or commercial real estate loan in the Bank's portfolio (excluding loan participation interests) at December 31, 2003 was a \$4.9 million commercial real estate loan secured by a golf course located in Algonquin, Illinois.

Edgar Filing: EFC BANCORP INC - Form 10-K

The Bank also purchases up to 90% participation interests in multi-family, commercial real estate and construction loans secured by real estate, most of which is located outside of the Bank's primary market area in southern Wisconsin and Minnesota. When determining whether to participate in such loans, the Bank will underwrite its participation interest according to its own underwriting standards. The Bank will generally hedge against participating in problematic loans by participating in those loans that have been in existence for at least one to two years and, accordingly, possess an established payment history. At December 31, 2003, the Bank had \$26.1 million in multi-family real estate loan participation interests, or 50.0% of multi-family loans and 3.6% of total loans. In addition, the Bank had \$43.9 million in commercial real estate loan participation interests as of the same date.

Loans secured by multi-family and commercial real estate properties generally involve larger principal amounts and a greater degree of risk than one- to four-family residential mortgage loans. Because payments on loans secured by multi-family and commercial real estate properties are often dependent on successful operation or management of the properties, repayment of such

loans may be subject to adverse conditions in the real estate market or the economy. The Bank seeks to minimize these risks through its underwriting standards.

Construction and Land Lending. The Bank originates fixed-rate construction loans for the development of residential property primarily located in the Bank's market area. Construction loans are offered primarily to experienced local developers operating in the Bank's primary market area and, to a lesser extent, to individuals for the construction of their residence. The majority of the Bank's construction loans are originated or participation interests purchased primarily to finance the construction of one- to four-family, owner-occupied residential real estate and multi-family real estate properties located in the Bank's primary market area as well as southern Wisconsin and Minnesota. Construction loans are generally offered with terms up to 12 months and may be made in amounts up to 80% of the appraised value of the property, as improved. Construction loan proceeds are disbursed periodically in increments as construction progresses and as inspections by the Bank's lending personnel warrant.

The Bank also originates fixed-rate land loans to local developers for the purpose of developing the land for sale. Such loans are secured by a lien on the property, are limited to 75% of the appraised value of the secured property and have terms of up to three years. The principal of the loan is reduced as lots are sold and released. The Bank's land loans are generally secured by properties located in its primary market area. Generally, if the borrower is a corporation, partnership or other business entity, personal guarantees by the principals are required.

The Bank originated \$19.4 million, \$31.0 million and \$30.8 million of construction and land loans for the years ended December 31, 2003, 2002 and 2001, respectively. At December 31, 2003, the Bank's largest construction or land loan was a performing loan with a \$8.2 million balance secured by 36 acres of vacant land for development in Algonquin, Illinois. This loan was granted to a joint venture, of which the Bank's wholly-owned subsidiary, EFS Service Corporation, is involved. For more information see the Subsidiary Activities section of this report. At December 31, 2003, the Bank had \$36.4 million of construction and land loans, which amounted to 5.0% of the Bank's total loans.

Construction and land financing is generally considered to involve a higher degree of credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction loan is dependent largely upon the accuracy of the initial estimate of the property's value at completion of construction or development compared to the estimated cost (including interest) of construction and other assumptions, including the estimated time to sell residential properties. If the estimate of value proves to be inaccurate, the Bank may be confronted with a project, when completed, having a value that is insufficient to assure full repayment.

Commercial Business Lending. The Bank also originates commercial business loans in the forms of term loans and lines of credit to small- and medium-sized businesses operating in the Bank's primary market area. Equipment, leases, inventory, accounts receivable, and marketable securities generally secure such loans; however, the Bank also makes unsecured commercial business loans. The maximum amount of a commercial business loan is limited by the Bank's loans-to-one-borrower limit which, at December 31, 2003, was \$19.5 million. Depending on the collateral used to secure the loans, commercial loans are made in amounts up to 80% of the value of the property securing the loan. Term loans are generally offered with fixed rates of interest and terms of up to 10 years. All term loans fully amortize during the term of such loan. Business lines of credit have adjustable rates of interest and terms of up to one year. Business lines of credit adjust on a daily basis and are indexed to the prime rate as published in *The Wall Street Journal*. The Bank also issues both secured and unsecured letters of credit to business customers of the Bank. Acceptable collateral includes an assigned deposit account with the Bank, real estate or marketable securities. Letters

of credit have a maximum term of 36 months.

In making commercial business loans, the Bank considers primarily the financial resources of the borrower, the borrower's ability to repay the loan out of net operating income, the Bank's lending history with the borrower and the value of the collateral. Generally, if the borrower is a corporation, partnership or other business entity, personal guarantees by the principals are required. However, personal guarantees may not be required on such loans depending on the creditworthiness of the borrower and other mitigating circumstances. The Bank continues to emphasize commercial business loans. The Bank's largest commercial loan at December 31, 2003 was \$2.0 million. At such date, the Bank had \$13.7 million of unadvanced commercial lines of credit. At December 31, 2003, the Bank had \$22.6 million of commercial business loans, which amounted to 3.1% of the Bank's total loans. The Bank originated \$8.9 million, \$9.1 million and \$28.9 million in commercial business loans for the years ended December 31, 2003, 2002 and 2001, respectively.

Unlike mortgage loans, which generally are made on the basis of the borrower's ability to make repayment from his or her

employment or other income, and are secured by real property which value tends to be more easily ascertainable, commercial loans are of higher risk and typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business. As a result, the availability of funds for the repayment of commercial loans may be substantially dependent on the success of the business itself. Further, any collateral securing such loans may depreciate over time, may be difficult to appraise and may fluctuate in value.

Consumer Lending. Consumer loans at December 31, 2003 amounted to \$33.3 million, or 4.6% of the Bank's total loans, and consisted primarily of home equity lines of credit and, to a significantly lesser extent, secured and unsecured personal loans and new and used automobile loans. Such loans are generally originated in the Bank's primary market area and generally are secured by real estate, deposit accounts, personal property and automobiles.

Substantially all of the Bank's home equity lines of credit are secured by second mortgages on owner-occupied single-family residences located in the Bank's primary market area. At December 31, 2003, these loans totaled \$27.5 million, or 3.8% of the Bank's total loans and 82.7% of consumer loans. Home equity lines of credit generally have adjustable-rates of interest, which adjust on a monthly basis. The unused home equity lines of credit totaled \$28.6 million at December 31, 2003. The adjustable-rate of interest charged on such loans is indexed to the prime rate as reported in *The Wall Street Journal*. Home equity lines of credit generally have an 18% lifetime limit on interest rates. Generally, the maximum combined LTV ratio on home equity lines of credit is 89.9%. The underwriting standards employed by the Bank for home equity lines of credit include a determination of the applicant's credit history and an assessment of the applicant's ability to meet existing obligations and payments on the proposed loan and the value of the collateral securing the loan. The stability of the applicant's monthly income may be determined by verification of gross monthly income from primary employment and, additionally, from any verifiable secondary income. Creditworthiness of the applicant is of primary consideration.

The Bank also originates other types of consumer loans consisting of secured and unsecured personal loans and new and used automobile loans. Secured personal loans are generally secured by deposit accounts. Unsecured personal loans generally have a maximum borrowing limitation of \$25,000 and generally require a debt ratio of 38%. Automobile loans have a maximum borrowing limitation of 80% of the sale price of the automobile, except that existing customers of the Bank who meet certain underwriting criteria may borrow up to 100% of the sale price of the automobile. At December 31, 2003, personal loans (both secured and unsecured) totaled \$4.3 million or 0.6% of the Bank's total loans and 12.9% of consumer loans; and automobile loans totaled \$1.5 million, or 0.2% of total loans and 4.4% of consumer loans.

With respect to automobile loans, full-time employees of the Bank, other than executive officers and directors, who satisfy certain lending criteria and the general underwriting standards of the Bank receive an interest rate 1% less than that which is offered to the general public; provided, however, that the discounted interest rate is at no time less than 75 basis points above the Bank's overall cost of funds, rounded to the highest quarter percentage point.

Loans secured by rapidly depreciable assets such as automobiles or that are unsecured entail greater risks than one- to four-family residential mortgage loans. In such cases, repossessed collateral for a defaulted loan may not provide an adequate source of repayment of the outstanding loan balance, since there is a greater likelihood of damage, loss or depreciation of the underlying collateral. Further, consumer loan collections on these loans are dependent on the borrower's continuing financial stability and, therefore, are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Finally, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans in the event of a default.

Loans-to-One Borrower Limitations. The Illinois Savings Bank Act imposes limitations on the aggregate amount of loans that an Illinois chartered savings bank can make to any one borrower. Under the Illinois Savings Bank Act the

permissible amount of loans-to-one borrower is the greater of \$500,000 (for a savings bank meeting its minimum capital requirements) or 25% of a savings bank's total capital plus general loan loss reserves. In addition, a savings bank may make loans in an amount equal to an additional 10% of the savings bank's capital plus general loan loss reserves if the loans are 100% secured by readily marketable collateral. Under Illinois law, a savings bank's capital consists of capital stock and noncumulative perpetual preferred stock, related paid-in capital, retained earnings and other forms of capital deemed to be qualifying capital by the Federal Deposit Insurance Corporation (the FDIC). Illinois law also permits an institution with capital in excess of 6% of assets to request permission of the Illinois Commissioner of Banks and Real Estate (the Commissioner) to lend up to 30% of the institution's total capital and general loan loss reserves to one borrower for the development of residential housing properties within Illinois. At December 31, 2003, the Bank's ordinary limit on loans-to-one borrower under the Illinois Savings Bank Act was \$19.5 million.

The 30% limitation equaled \$23.4 million at that date. At December 31, 2003, the Bank's five largest groups of loans-to-one borrower ranged from \$4.8 million to \$8.6 million, with the largest single loan in such groups being a \$8.6 million loan secured by land located in Algonquin, Illinois. At December 31, 2003, there were no loans exceeding the 25% limitation. A substantial portion of each large group of loans is secured by real estate.

Loan Approval Procedures and Authority. The Board of Directors establishes the lending policies and loan approval limits of the Bank. The Board of Directors has established the Loan Committee (the Committee) of the Board, which considers and approves all loans within its designated authority as established by the Board. In addition, the Board of Directors has authorized certain officers of the Bank (the designated officers) to consider and approve all loans within their designated authority as established by the Board.

Underwriting. With respect to loans originated by the Bank, it is the general policy of the Bank to retain such loans in its portfolio. The Bank does not have a policy of underwriting its loans in conformance with the Federal National Mortgage Association (FNMA) or Federal Home Loan Mortgage Corporation (FHLMC) guidelines. Upon receipt of a completed loan application from a prospective borrower, a credit report is ordered and certain other information is verified by an independent credit agency. If necessary, additional financial information may be required. An appraisal of real estate intended to secure a proposed loan generally is required to be performed by the Bank's in-house appraisers or outside appraisers approved by the Bank. For proposed mortgage loans, the Board annually approves independent appraisers used by the Bank and approves the Bank's appraisal policy. The Bank's policy is to obtain title and hazard insurance on all mortgage loans and flood insurance when necessary and the Bank may require borrowers to make payments to a mortgage escrow account for the payment of property taxes.

At December 31, 2003, the Bank's ratio of nonperforming loans to total loans was 0.39%, and its ratio of nonperforming assets to total assets was 0.31%. The Bank did not have any real estate owned at December 31, 2003. Net charge-offs amounted to \$14,000 in 2002. There were no charge-offs in 2003. See **Delinquent Loans, Classified Assets and Real Estate Owned.**

The Bank's one- to four-family lending policy permits the investment in mortgage loans where the borrower's monthly mortgage and prorated real estate tax payments were less than 32% of the borrower's gross income, and where the borrower's total monthly obligations did not exceed 43% of the borrower's gross income. It is also the general practice of the Bank not to require private mortgage insurance, though the Bank retains the right to require such insurance on any loan with a loan to value ratio in excess of 80.0%. All loans with loan to value ratios in excess of 89.9% must have private mortgage insurance, with the exception of its First-Time Home Buyer and American Dream Loan programs. In addition, the Bank had historically priced its one- to four- family loans with loan to value ratios of between 80.0% and 89.9% at 25 basis points higher than loans with loan to value ratios of less than 80.0%, again in an effort to control the origination of such loans. The Bank believes that its underwriting standards are sufficient to allow it to adequately assess the creditworthiness of prospective borrowers. There can be no assurances, however, that increasing the permissible debt coverage ratios and loan-to-value ratios permitted for borrowers will not result in the Bank experiencing increased delinquencies and defaults on loans.

Delinquent Loans, Classified Assets and Real Estate Owned

Delinquencies, Classified Assets and Real Estate Owned. Reports listing all delinquent accounts are generated and reviewed by management on a monthly basis and the Board of Directors performs a monthly review of all loans or lending relationships delinquent 45 days or more. The procedures taken by the Bank with respect to delinquencies vary depending on the nature of the loan, period and cause of delinquency and whether the borrower is habitually delinquent. When a borrower fails to make a required payment on a loan, the Bank takes a number of steps to have the borrower cure the delinquency and restore the loan to current status. The Bank generally sends the borrower a written notice of non-payment after the loan is first past due. The Bank's guidelines provide that telephone, written correspondence and/or face-to-face contact will be attempted to ascertain the reasons for delinquency and the prospects of repayment. When contact is made with the borrower at any time prior to foreclosure, the Bank will attempt to obtain full payment, offer to work out a repayment schedule with the borrower to avoid foreclosure or, in some instances, accept a deed in lieu of foreclosure. In the event payment is not then received or the loan not otherwise satisfied, additional letters and telephone calls generally are made. If the loan is still not brought current or satisfied and it becomes necessary for the Bank to take legal action, which typically occurs after a loan is 90 days or more delinquent, the Bank will commence foreclosure proceedings against any real property that secured the loan. If a foreclosure action is instituted and the loan is not brought current, paid in full, or refinanced before the foreclosure sale, the property securing the loan generally is sold at foreclosure and, if purchased by the Bank, becomes real estate owned.

Federal regulations and the Bank's internal policies require that the Bank utilize an internal asset classification system as a means of reporting problem and potential problem assets. The Bank currently classifies problem and potential problem assets as Substandard, Doubtful or Loss assets. An asset is considered Substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Assets classified as Doubtful have all of the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. Assets classified as Loss are those considered uncollectible and of such little value that their continuance as assets, without the establishment of a specific loss reserve, is not warranted. Assets which do not currently expose the Bank to a sufficient degree of risk to warrant classification in one of the aforementioned categories but possess weaknesses are required to be designated Special Mention.

When the Bank classifies one or more assets, or portions thereof, as Substandard or Doubtful, it establishes a specific allowance for probable loan losses in an amount deemed appropriate by management. When the Bank classifies one or more assets, or portions thereof, as Loss, it either establishes a specific allowance for losses equal to 100% of the amount of the assets so classified or charges off such amount.

The Bank's determination as to the classification of its assets and the amount of its allowances for loan losses is subject to review by the FDIC and Commissioner, which can order the establishment of additional general or specific loss allowances. The FDIC, in conjunction with the other federal banking agencies, adopted an interagency policy statement on the allowance for loan and lease losses. The policy statement provides guidance for financial institutions on both the responsibilities of management for the assessment and establishment of adequate allowances and guidance for banking agency examiners to use in determining the adequacy of general valuation guidelines. Generally, the policy statement recommends that institutions have effective systems and controls to identify, monitor and address asset quality problems; that management has analyzed all significant factors that affect the collectibility of the portfolio in a reasonable manner; and that management has established acceptable allowance evaluation processes that meet the objectives set forth in the policy statement. While the Bank believes that it has established an adequate allowance for loan losses, there can be no assurance that regulators, in reviewing the Bank's loan portfolio, will not request the Bank to increase at that time its allowance for loan losses, thereby negatively affecting the Bank's financial condition and earnings at that time. Although management believes that adequate specific and general loan loss allowances have been established, future provisions are dependent upon future events such as loan growth and portfolio diversification and, as such, further additions to the level of the allowance for loan losses may become necessary.

The Bank reviews and classifies its assets on a quarterly basis and the Board of Directors reviews the results of the reports on a quarterly basis. The Bank classifies its assets in accordance with the management guidelines described above. At December 31, 2003, the Bank had \$2.8 million of assets, representing 0.39% of loans receivable, or 0.31%, of assets, designated as Substandard. No loans were classified as Doubtful, Loss, or Special Mention. Loans classified Special Mention may have been delinquent in the past or had other weaknesses, however, in management's judgment risk of loss is not probable. This classification represents a watch list of loans for management to closely monitor.

Edgar Filing: EFC BANCORP INC - Form 10-K

The following tables set forth delinquencies in the Bank's loan portfolio past due 60 days or more:

	At December 31, 2003				At December 31, 2002			
	60-89 Days		90 Days or More		60-89 Days		90 Days or More	
	Number of Loans	Principal Balance of Loans	Number of Loans	Principal Balance of Loans	Number of Loans	Principal Balance of Loans	Number of Loans	Principal Balance of Loans
	(Dollars in thousands)

Total	19	\$ 1,195	10	\$ 2,641
Delinquent loans to total loans (1)		0.22%		0.49%

(1) Total loans represent gross loans receivable less deferred loan fees and unearned discounts.

Nonperforming Assets. The following table sets forth information regarding nonperforming loans and REO. It is the general policy of the Bank to cease accruing interest on loans 90 days or more past due and to fully reserve for all previously accrued interest. For each of the five years ended December 31, 2003, the amount of additional interest income that would have been recognized on non-accrual loans if such loans had continued to perform in accordance

with their contractual terms was \$82,000 \$198,000, \$187,000, \$89,000, and \$46,000, respectively.

Edgar Filing: EFC BANCORP INC - Form 10-K

	At December 31,				
	2003	2002	2001	2000	1999
	(Dollars in thousands)

(1) Loans receivable, gross.

(2) Nonperforming assets consist of nonperforming loans and REO.

Nonperforming loans totaled \$2.8 million as of December 31, 2003, and included nine one- to four-family loans, with an aggregate balance of \$853,000, one commercial real estate loan totaling \$505,000, seven commercial business loans totaling \$1.3 million, four automobile loans totaling \$22,000, one consumer loan totaling \$1,000 and three home equity lines of credit totaling \$89,000.

Allowance for Loan Losses Critical Accounting Policy

The allowance for loan losses is considered by management to be a critical accounting policy. The allowance for loan losses is maintained through provisions for loan losses based on management's on-going evaluation of the risks inherent in its loan portfolio in consideration of the trends in its loan portfolio, the national and regional economies and the real estate market in the Bank's primary lending area. The allowance for loan losses is maintained at an amount management considers adequate to cover probable losses in its loan portfolio, based on information currently known to management. The Bank's loan loss allowance determinations also incorporate factors and analyses which consider the probable principal loss associated with the loan, costs of acquiring the property securing the loan through foreclosure or deed in lieu of foreclosure. While management estimates loan losses using the best available information, no assurance can be given that future additions to the allowance will not be necessary based on changes in economic and real estate market conditions, further information obtained regarding problem loans, identification of additional problem loans and other factors, both within and outside of management's control.

Edgar Filing: EFC BANCORP INC - Form 10-K

Management calculates a loan loss allowance sufficiency analysis quarterly based upon the loan portfolio composition, asset classifications, loan-to-value ratios, impairments in the loan portfolio and other factors. The analysis is compared to actual losses, peer group comparisons and economic conditions. As of December 31, 2003, the Bank's allowance for loan losses was \$3.8 million, or 0.52% of total loans and 135.7% of nonperforming loans as compared to \$3.1 million, or 0.53% of total loans and 131.1% of nonperforming loans as of December 31, 2002. The Bank had total nonperforming loans of \$2.8 million at December 31, 2003 as compared to \$2.4 million at December 31, 2002 and nonperforming loans to total loans of 0.39% and 0.40% at December 31, 2003 and 2002, respectively. The Bank will continue to monitor and modify its allowance for loan losses as conditions dictate. Management believes that, based on information available at December 31, 2003, the Bank's allowance for loan losses was adequate to cover probable losses inherent in its loan portfolio at that time. Based upon the Bank's plan to increase its emphasis on non-one- to four-family mortgage lending which consist of secured commercial loans which are generally considered to involve a higher degree of risk than one- to four-family mortgage lending, the Bank has and may continue to further

Edgar Filing: EFC BANCORP INC - Form 10-K

increase its allowance for loan losses over future periods depending upon the then current conditions. The percentage of one- to four-family loans to total loans decreased to 64.8% at December 31, 2003 from 67.6% at December 31, 2002. At the same time, the percentage of commercial real estate loans to total loans increased to 15.2% at December 31, 2003 from 8.7% at December 31, 2002. However, no assurances can be given that the Bank's level of allowance for loan losses will be sufficient to cover loan losses incurred by the Bank or that future adjustments to the allowance for loan losses will not be necessary if economic and other conditions differ substantially from the economic and other conditions used by management to determine the current level of the allowance for loan losses. In addition, the FDIC and the Commissioner, as an integral part of their examination processes, periodically review the Bank's allowance for loan losses. Such agencies may require the Bank to make additional provisions for estimated loan losses based upon judgments different from those of management.

The following table sets forth activity in the Bank's allowance for loan losses for the periods set forth in the table.

	At or For the Year Ended December 31,				
	2003	2002	2001	2000	1999
	(Dollars in thousands)				
Balance at beginning of year	\$ 3,141	\$ 2,255	\$ 1,881	\$ 1,545	\$ 1,373

Charge-offs		(16)	(126)	(28)	(41)
Recoveries		2		1	2
Balance at end of year	\$ 3,754	\$ 3,141	\$ 2,255	\$ 1,881	\$ 1,545
Allowance for loan losses as a percent of loans (1)	0.52%	0.52%	0.42%	0.41%	0.39%
Allowance for loan losses as a percent of nonperforming loans	135.7%	131.1%	87.4%	41.5%	112.7%

(1) Loans receivable, gross.

Real Estate Owned. At December 31, 2003, the Bank did not have any real estate owned (REO). When the Bank acquires property through foreclosure or deed in lieu of foreclosure, it is initially recorded at the lower of the recorded investment in the corresponding loan or the fair value of the related assets at the date of foreclosure, less costs to sell. Thereafter, if there is a further deterioration in value, the Bank provides for a specific valuation allowance and charges operations for the diminution in value.

Real Estate Held For Development. On June 19, 2002, EFS Service Corporation, a wholly-owned subsidiary of the Bank, acquired approximately 16 acres of vacant land for the development of 29 single-family home-sites located in West Dundee, Illinois. The investment in this project totaled \$4.2 million as of December 31, 2003. All improvements to the land have been made. In addition, there have been no sales and there were two model homes under construction as of the same date.

Investment Activities

The Board of Directors sets the investment policy and procedures of the Bank. This policy generally provides that investment decisions will be made based on the safety of the investment, liquidity requirements of the Bank and, to a lesser extent, potential return on the investments. In pursuing these objectives, the Bank considers the ability of an investment to provide earnings consistent with factors of quality, maturity, marketability and risk diversification. While the Board of Directors has final authority and responsibility for the securities investment portfolio, the Bank has established an Investment Committee comprised of five Directors to supervise the Bank's investment activities. The Bank's Investment Committee meets at least quarterly and evaluates all investment activities for safety and soundness, adherence to the Bank's investment policy, and assurance that authority levels are maintained.

The Bank currently does not participate in hedging programs, interest rate swaps, or other activities involving the use of derivative financial instruments. Similarly, the Bank does not invest in mortgage-related securities which are deemed to be high risk, or purchase bonds which are not rated investment grade.

Mortgage-Backed Securities. The Bank currently purchases mortgage-backed securities in order to: (i) generate positive interest rate spreads with minimal administrative expense; and (ii) lower its credit risk as a result of the guarantees provided by FHLMC, FNMA, and the Government National Mortgage Association (GNMA). The Bank invests in mortgage-backed securities insured or guaranteed by FNMA, FHLMC and GNMA. At December 31, 2003, mortgage-backed securities totaled \$10.2 million, or 1.1% of total assets and 1.2% of total interest earning assets, all of which was classified as available-for-sale. At December 31, 2003, 14.0% of the mortgage-backed securities were backed by adjustable-rate loans and 86.0% were backed by fixed-rate loans. The mortgage-backed securities portfolio had coupon rates ranging from 4.0% to 10.0% and had a weighted average yield of 4.92% at December 31, 2003.

Mortgage-backed securities are created by the pooling of mortgages and issuance of a security with an interest rate that is less than the interest rate on the underlying mortgages. Mortgage-backed securities typically represent a participation interest in a pool of single-family or multi-family mortgages, although the Bank focuses its investments on mortgage-backed securities backed by single-family mortgages. The issuers of such securities (generally U.S. Government agencies and government sponsored enterprises, including FNMA, FHLMC and GNMA) pool and resell the participation interests in the form of securities to investors such as the Bank and guarantee the payment of principal and interest to investors. Mortgage-backed securities generally yield less than the loans that underlie such securities because of the cost of payment guarantees and credit enhancements. In addition, mortgage-backed securities are usually more liquid than individual mortgage loans and may be used to collateralize certain liabilities and obligations of the Bank. Investments in mortgage-backed securities involve a risk that actual prepayments will be greater than estimated prepayments over the life of the security, which may require adjustments to the amortization of any premium or accretion of any discount relating to such instruments thereby reducing the net yield on such securities. There is also reinvestment risk associated with the cash flows from such securities or in the event the issuer redeems such securities. In addition, the market value of such securities may be adversely affected by changes in interest rates. The Bank estimates prepayments for its mortgage-backed securities at purchase to ensure that prepayment assumptions are reasonable considering the underlying collateral for the mortgage-backed securities at issue and current mortgage interest rates and to determine the yield and estimated maturity of its mortgage-backed security portfolio. Of the Bank's \$10.2 million mortgage-backed securities portfolio at December 31, 2003, \$34,000 with a weighted average yield of 7.63% had contractual maturities within five years and \$10.1 million with a weighted average yield of 4.93% had contractual maturities over five years. However, the actual maturity of a mortgage-backed security may be less than its stated maturity due to prepayments of the underlying mortgages. Prepayments that are faster than anticipated may shorten the life of the security and may result in a loss of any premiums paid and thereby reduce the net yield on such securities. Although prepayments of underlying mortgages depend on many factors, the difference between the interest rates on the underlying mortgages and the prevailing mortgage interest rates generally is the most significant determinant of the rate of prepayments. During periods of declining mortgage interest rates, refinancing generally increases and accelerates the prepayment of the underlying mortgages and the related security. Under such circumstances, the Bank may be subject to reinvestment risk because, to the

extent that the Bank's mortgage-backed securities prepay faster than anticipated, the Bank may not be able to reinvest the proceeds of such repayments and prepayments at a comparable rate.

U.S. Government Obligations. At December 31, 2003, the Bank's U.S. Government securities portfolio totaled \$36.1 million, all of which were classified as available-for-sale. Such portfolio primarily consists of medium-term (maturities of three to fifteen years) securities.

Municipal Securities. At December 31, 2003, the Bank's municipal security portfolio totaled \$33.7 million and was classified as available-for-sale. This portfolio consists of general obligations issued by municipalities.

Equity Investments. At December 31, 2003, the Bank's equity investment portfolio totaled \$15.5 million, all of which were classified as available-for-sale. The portfolio consists of \$100,000 of common stock and \$200,000 of preferred stock in a small privately held company specializing in interest rate risk management and web site design consulting and \$10.2 million and \$5.0 million of FNMA and FHLMC preferred stock, respectively.

Corporate Bonds. At December 31, 2003, the Bank's corporate bond portfolio totaled \$5.4 million, all of which were classified as available-for-sale. This portfolio consists of highly rated corporate debt issuances.

The following table sets forth the composition of the carrying value of the Bank's available-for-sale investment and mortgage-backed securities portfolios in dollar amounts and in percentages at the dates indicated:

	2003		At December 31, 2002		2001

Sources of Funds

General. Deposits, repayments and prepayments of loans, cash flows generated from operations and FHLB advances are the primary sources of the Bank's funds for use in lending, investing and for other general purposes.

Deposits. The Bank offers a variety of deposit accounts with a range of interest rates and terms. The Bank's deposit accounts consist of savings, retail checking/NOW accounts, commercial checking accounts, money market accounts, club accounts and certificate of deposit accounts. The Bank offers certificate of deposit accounts with balances in excess of \$100,000 at preferential rates (jumbo certificates) and also offers Individual Retirement Accounts (IRAs) and other qualified plan accounts.

At December 31, 2003, the Bank's deposits totaled \$596.8 million, or 73.8%, of interest-bearing liabilities. For the year ended December 31, 2003, the average balance of core deposits (savings, NOW, money market and non-interest-bearing checking accounts) totaled \$340.4 million, or 60.0% of total average deposits. At December 31, 2003, the Bank had a total of \$245.1 million in certificates of deposit, of which \$126.1 million had maturities of one year or less reflecting the shift in deposit accounts from savings accounts to shorter-term certificate accounts that

Edgar Filing: EFC BANCORP INC - Form 10-K

has occurred in recent years. For the year ended December 31, 2003, the average balance of core deposits represented approximately 57.0% of total deposits and average certificate accounts represented 38.0%, as compared to the average balance of core deposits representing 54.4% of total deposits and average certificate accounts representing 36.1% of deposits for the year ended December 31, 2002. Although the Bank has a significant portion of its deposits in core deposits, management monitors activity on the Bank's core deposits and, based on historical experience and the Bank's current pricing strategy, believes it will continue to retain a large portion of such accounts. The Bank is not limited with respect to the rates it may offer on deposit products.

At December 31, 2003, the Bank had brokered deposits totaling \$16.0 million compared to \$6.1 million at December 31, 2002.

The flow of deposits is influenced significantly by general economic conditions, changes in money market rates, prevailing interest rates and competition. The Bank's deposits are obtained predominantly from the areas in which its branch offices are located. The Bank relies primarily on customer service and long-standing relationships with customers to attract and retain these deposits; however, market interest rates and rates offered by competing financial institutions affect the Bank's ability to attract and retain deposits. The Bank uses traditional means of advertising its deposit products, including radio and print media

20

and generally does not solicit deposits from outside its market area. While certificate accounts in excess of \$100,000 are accepted by the Bank, and may be subject to preferential rates, the Bank does not actively solicit such deposits as such deposits are more difficult to retain than core deposits.

At December 31, 2003, the Bank had outstanding \$106.5 million in certificate of deposit accounts in amounts of \$100,000 or more, maturing as follows:

Maturity Period	Amount (Dollars in thousands)	Weighted Average Rate
Three months or less	\$ 17,374	2.80%
Over three through six months	17,468	2.65
Over six through 12 months	24,646	2.54
Over 12 months	47,026	3.37
Total	\$ 106,514	2.97

The following table sets forth the distribution of the Bank's deposit accounts for the periods indicated and the weighted average interest rates on each category of deposits presented.

Subsidiary Activities

EFS Service Corporation. Fox Valley Service Corporation of Elgin was renamed EFS Service Corporation (EFSSC) in October 2002 and is the Bank's wholly-owned subsidiary which was incorporated in 1974 for the purpose of entering into joint venture real estate development projects. On June 19, 2002, EFSSC purchased approximately 16 acres of

land to be developed into 29 home-sites for single-family residences. All land improvements have been made. As of December 31, 2003, there were no sales, two model homes were under construction and the total investment was \$4.2 million. In addition, EFSSC currently owns a single parcel of real estate valued at \$92,000. In addition, EFSSC entered into two 50/50 joint venture agreements in 2003, known as Algonquin 80 LLC and Algonquin 36 LLC. Algonquin 80 LLC is 80 acres of vacant land in Algonquin, Illinois to be sold and subsequently developed into residential properties. The Bank has made a loan to the joint venture in the amount of \$7.4 million at December 31, 2003 primarily for the acquisition of the land. Algonquin 36 LLC consists of 36 acres of vacant land in Algonquin, Illinois. The strategy is for the joint venture to develop the parcel into commercial properties. The Bank has made a loan to the joint venture in the amount of \$8.2 million at December 31, 2003 primarily for the acquisition of the land.

EFS Financial Services, Inc. Fox Valley Financial Services, Inc. was renamed EFS Financial Services, Inc. (EFSFS) in October 2002 and is the wholly owned subsidiary of EFS Service Corporation. EFSFS is a service corporation that offers a wide variety of financial products and services for individuals and businesses, which includes various investment and insurance products. EFSFS has four salespeople who are employed on a commission basis.

Computer Dynamics Group, Inc. Computer Services Dynamics, Inc. was renamed Computer Dynamics Group, Inc. (CDGI) in 2002 and is the Company's majority owned subsidiary, which was purchased on January 7, 2002, at a cost of \$420,000. CDGI is an information technology consulting/services company with main offices in West Chicago, Illinois, and generally services clients located in the Chicago metropolitan area.

Personnel

As of December 31, 2003, the Bank had 141 full-time employees and 47 part-time employees. A collective bargaining unit does not represent the employees and the Bank considers its relationship with its employees to be good.

REGULATION AND SUPERVISION

General

The Bank is an Illinois State chartered savings bank and its deposit accounts are insured up to applicable limits by the FDIC under the Savings Association Insurance Fund (SAIF). The Bank is subject to extensive regulation by the Commissioner, as its chartering authority, and by the FDIC, as the deposit insurer. The Bank must file reports with the Commissioner and the FDIC concerning its activities and financial condition, in addition to obtaining regulatory approvals prior to entering into certain transactions such as establishing branches and mergers with, or acquisitions of, other depository institutions. There are periodic examinations by the Commissioner and the FDIC to assess the Bank's compliance with various regulatory requirements and financial condition. This regulation and supervision establishes a framework of activities in which a savings bank can engage and is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Any change in such regulation, whether by the Commissioner, the FDIC or through legislation, could have a material adverse impact on the Company and the Bank and their operations and stockholders. The Holding Company is also required to file certain reports with, and otherwise comply with the rules and regulations, of the OTS, the Commissioner and of the Securities and Exchange Commission (SEC) under the federal securities laws. Certain of the regulatory requirements applicable to the Bank and to the Holding Company are referred to below or elsewhere herein.

The Commissioner has established a schedule for the assessment of supervisory fees upon all Illinois savings banks to fund the operations of the Commissioner. These supervisory fees are computed on the basis of each savings bank's total assets (including consolidated subsidiaries) and are payable at the end of each calendar quarter. A schedule of fees has also been established for certain filings made by Illinois savings banks with the Commissioner. The Commissioner also assesses fees for examinations conducted by the Commissioner's staff, based upon the number of hours spent by the Commissioner's staff performing the examination. During the year ended December 31, 2003, the Bank paid approximately \$96,000 in supervisory fees and expenses.

Regulations

Capital Requirements. Under the Illinois law and the regulations of the Commissioner, an Illinois savings bank must maintain a minimum level of capital equal to the highest of 3% of total assets or the amount required to maintain insurance of deposits by the FDIC. The Commissioner has the authority to require an Illinois savings bank to maintain a higher level of capital if deemed necessary based on the savings bank's financial condition, history, management or earnings prospects.

The FDIC has also adopted risk-based capital guidelines to which the Bank is subject. The Bank is required to maintain certain levels of regulatory capital in relation to regulatory risk-weighted assets. Risk-based capital ratios are determined by allocating assets and specified off-balance sheet items to four risk-weighted categories ranging from 0% to 100%, with higher levels of capital being required for the categories perceived as representing greater risk. The guidelines divide a savings bank's capital into two tiers. The first tier (Tier I) includes common equity, retained earnings, certain non-cumulative perpetual preferred stock (excluding auction rate issues) and minority interests in equity accounts of consolidated subsidiaries, less goodwill and other intangible assets (except mortgage servicing rights and purchased credit card relationships subject to certain limitations). Recent regulatory amendments require the deduction from Tier 1 capital of a percentage of the carrying value of investments in equity securities of non-financial companies acquired after March 13, 2000. Supplementary (Tier II) capital includes, among other items, cumulative perpetual and long-term limited-life preferred stock, mandatory convertible securities, certain hybrid capital instruments, term subordinated debt, a portion of pretax net unrealized holding gains on available-for-sale equity securities with readily determinable fair values and the allowance for loan losses, subject to certain limitations, less required deductions. Savings banks are required to maintain a total risk-based capital ratio of 8%, of which at least 4% must be Tier I capital.

In addition, the FDIC has established regulations prescribing a minimum Tier I leverage ratio. These regulations provide for a minimum Tier I leverage ratio of 3% for banks that meet certain specified criteria, including that they have the highest

examination rating and are not experiencing or anticipating significant growth. All other banks are required to maintain a Tier I leverage ratio of 3% plus an additional cushion of at least 1%. The FDIC may, however, set higher leverage and risk-based capital requirements on individual institutions when particular circumstances warrant.

The following is a summary of the Bank's regulatory capital at December 31:

	2003	2002
Total Capital to Total Assets	8.35%	8.96%
Total Capital to Risk-Weighted Assets	11.74%	13.41%
Tier I Leverage Ratio	8.27%	8.92%
Tier I to Risk-Weighted Assets	11.60%	12.82%

The FDIC and the other federal banking agencies, have adopted a regulation providing that the agencies will take account of the exposure of a bank's capital and economic value to changes in interest rate risk in assessing a bank's capital adequacy.

Standards for Safety and Soundness. The federal banking agencies have adopted final regulations and Interagency Guidelines Establishing Standards for Safety and Soundness to implement safety and soundness standards. The Guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the Guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard.

Lending Restrictions. The Bank is prohibited by Illinois from making secured or unsecured loans for business, corporate, commercial or agricultural purposes representing in the aggregate an amount in excess of 15% of its total assets, unless the Commissioner authorizes in writing a higher percentage limit for such loans upon the request of an institution.

The Bank is also subject to a loans-to-one borrower limitation. Under the Illinois law, the total loans and extensions of credit by the Bank to any person outstanding at one time must not exceed the greater of \$500,000 or 25% of the Bank's total capital plus general loan loss reserves. In addition, the Bank may make loans in an amount equal to an additional 10% of the Bank's capital plus general loan loss reserves if secured by readily marketable collateral.

Dividend Limitations. Under the ISBA, dividends may only be declared when the total capital of the Bank is greater than that required by Illinois law. Dividends may be paid by the Bank out of its net profits. The written approval of the Commissioner must be obtained, however, before a savings bank having total capital of less than 6% of total assets may declare dividends in any year in an amount in excess of 50% of its net profits for that year. A savings bank may not declare dividends in excess of its net profits in any year without the approval of the Commissioner. Finally, the

Bank will be unable to pay dividends in an amount which would reduce its capital below the greater of (i) the amount required by the FDIC capital regulations or otherwise specified by the FDIC, (ii) the amount required by the Commissioner or (iii) the amount required for the liquidation account to be established by the Bank in connection with the Bank's conversion. The Commissioner and the FDIC also have the authority to prohibit the payment of any dividends by the Bank if the Commissioner or the FDIC determines that the distribution would constitute an unsafe or unsound practice.

Prompt Corrective Regulatory Action

Federal law requires, among other things, that federal bank regulatory authorities take prompt corrective action with respect to banks that do not meet minimum capital requirements. For these purposes, the law establishes various capital categories. The FDIC has adopted regulations to implement the prompt corrective action legislation. Under the regulations, an institution is deemed to be undercapitalized if it has a total risk-based capital ratio of less than 8%, a Tier I risk-based capital ratio of less than 4%, or generally a leverage ratio of less than 4%. An institution is deemed to be significantly undercapitalized if it has a total risk-based capital ratio of less than 6%, a Tier I risk-based capital ratio of less than 3%, or a leverage ratio of less than 3%. An institution is deemed to be critically undercapitalized if it has a ratio of tangible equity (as defined in the regulations) to total assets that is equal to or less than 2%.

Undercapitalized banks are subject to growth, capital distribution (including dividend) and other limitations and are required to submit a capital restoration plan. A bank's compliance with such plan must be guaranteed by any company that controls the undercapitalized institution in an amount equal to the lesser of 5.0% of the Bank's total assets when deemed

undercapitalized or the amount necessary to achieve the status of adequately capitalized. If an undercapitalized bank fails to submit an acceptable plan, it is treated as if it is significantly undercapitalized. Significantly undercapitalized banks are subject to one or more of a number of additional restrictions, including but not limited to an order by the FDIC to sell sufficient voting stock to become adequately capitalized, requirements to reduce total assets and cease receipt of deposits from correspondent banks or dismiss directors or officers. Critically undercapitalized institutions also may not make any payment of principal or interest on certain subordinated debt or extend credit for a highly leveraged transaction or enter into any material transaction outside the ordinary course of business. In addition, subject to a narrow exception, the appointment of a receiver or conservator is required for a critically undercapitalized institution within 270 days after it obtains such status.

Transactions with Affiliates

Federal law governs transactions between depository institutions and their affiliates. An affiliate of a savings bank is any company or entity that controls, is controlled by, or is under common control with the savings bank, other than certain subsidiaries. In a holding company context, at a minimum, the parent holding company of a savings bank and any companies that are controlled by such parent holding company are affiliates of the savings bank. Generally, the extent to which the savings bank or its subsidiaries may engage in covered transactions, including loans, with any one affiliate is limited to 10% of such savings bank's capital stock and surplus, and there is an aggregate limit on all such transactions with all affiliates of 20% of such capital stock and surplus. Federal law also establishes specific collateral requirements for loans or extensions of credit to, or guarantees, acceptances on letters of credit issued on behalf of an affiliate. Covered transactions and a broad list of other specified transactions also must be on terms substantially the same, or no less favorable, to the savings bank or its subsidiary as similar transactions with nonaffiliates.

Federal law also restricts a savings bank with respect to loans to directors, executive officers, and principal stockholders. Loans to directors, executive officers and stockholders who control, directly or indirectly, 10% or more of voting securities of a savings bank, and certain related interests of any of the foregoing, may not exceed the savings bank's total capital and surplus. Loans to directors, executive officers and principal shareholders must be made on terms substantially the same as offered in comparable transactions to other persons, except that such insiders may receive preferential loans made pursuant to a benefit or compensation program that is widely available to the Bank's employees and does not give preference to the insider over the employees. Federal law also establishes board of director approval requirements for loans exceeding a certain amount. There are additional limitations on loans to executive officers.

Enforcement

The Commissioner and FDIC have extensive enforcement authority over Illinois-chartered savings banks, including the Bank. This enforcement authority includes, among other things, the ability to assess civil money penalties, to issue cease and desist orders and to remove directors and officers. In general, these enforcement actions may be initiated in response to violations of laws and regulations and to unsafe or unsound practices.

The Commissioner is given authority by Illinois law to appoint a conservator or receiver for an Illinois savings bank under certain circumstances including, but not limited to, insolvency, a substantial dissipation of assets due to violation of law, regulation, order of the Commissioner or an unsafe or unsound practice. The FDIC also has authority under federal law to appoint a conservator or receiver for an insured savings bank under certain circumstances.

Insurance of Deposit Accounts

Deposits of the Bank are presently insured by the SAIF. The FDIC maintains a risk-based assessment system by which institutions are assigned to one of three categories based on their capitalization and one of three subcategories based on examination ratings and other supervisory information. An institution's assessment rate depends upon the categories to which it is assigned. Assessment rates for SAIF member institutions are determined semiannually by the FDIC and currently range from zero basis points for the healthiest institutions to 27 basis points of assessable deposits for the riskiest.

In addition to the assessment for deposit insurance, institutions are required to make payments on bonds issued in the late 1980s by the Financing Corporation (FICO) to recapitalize the predecessor to the SAIF. During 2003, FICO payments for SAIF members approximated 1.60 basis points of assessable deposits.

The Bank's assessment rate for 2003 was zero. Payments toward the FICO bonds amounted to \$85,000. The FDIC has

authority to increase insurance assessments. A significant increase in SAIF insurance premiums would likely have an adverse effect on the operating expenses and results of operations of the Bank. Management cannot predict what insurance assessment rates will be in the future.

Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or the OTS. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

Federal Reserve System

The Federal Reserve Board regulations require savings institutions to maintain non-interest earning reserves against their transaction accounts (primarily negotiable order of withdrawal and regular checking accounts). The regulations generally provide that reserves be maintained against aggregate transaction accounts as follows: a 3% reserve ratio is assessed on net transaction accounts up to and including \$45.4 million; a 10% reserve ratio is applied above \$45.4 million. The first \$6.6 million of otherwise reservable balances (subject to adjustments by the Federal Reserve Board) are exempted from the reserve requirements. These are adjusted annually. The Bank complies with the foregoing requirements.

Federal Home Loan Bank System

The Bank is a member of the FHLB System, which consists of 12 regional FHLBs. The FHLB provides a central credit facility primarily for member institutions. The Bank, as a member of the FHLB, is required to acquire and hold shares of capital stock in the FHLB in an amount at least equal to 1% of the aggregate principal amount of its unpaid residential mortgage loans and similar obligations at the beginning of each year, or 1/20 of its advances (borrowings) from the FHLB, whichever is greater. The Bank was in compliance with this requirement with an investment in FHLB stock at December 31, 2003 of \$10.9 million.

The FHLBs are required to provide funds for the resolution of insolvent thrifts and to contribute funds for affordable housing programs. These requirements could reduce the amount of dividends that the FHLBs pay to their members and could also result in the FHLBs imposing a higher rate of interest on advances to their members. For the years ended December 31, 2003, 2002 and 2001, dividends from the FHLB to the Bank amounted to approximately \$614,000, \$483,000 and \$539,000, respectively.

Holding Company Regulation

Federal law allows a state savings bank that qualifies as a qualified thrift lender to elect to be treated as a savings association for purposes of the savings and loan holding company provisions of federal law. Such election results in its holding company being regulated as a savings and loan holding company by the OTS rather than as a bank holding company by the Federal Reserve Board. The Bank has made such election and has received approval from the OTS to become a savings and loan holding company. The Company has registered with the OTS and is subject to OTS regulations, examinations, supervision and reporting requirements. In addition, the OTS has enforcement authority over the Company and its non-savings institution subsidiaries. Among other things, this authority permits the OTS to restrict or prohibit activities that are determined to be a serious risk to the subsidiary savings institution. Additionally, the Bank is required to notify the OTS at least 30 days before declaring

Edgar Filing: EFC BANCORP INC - Form 10-K

any dividend to the Company. Because the Bank is chartered under Illinois law, the Company is also subject to registration with and regulation by the Commissioner.

As a unitary savings and loan holding company, the Company is generally not restricted under existing laws as to the types of business activities in which it may engage. The Gramm-Leach-Bliley Act of 1999 provided that no company may acquire control of a savings association after May 4, 1999 unless it engages only in the financial activities permitted for financial holding companies under the law or for multiple savings and loan holding companies as described below. Further, the Gramm-Leach-Bliley Act specifies that existing savings and loan holding companies may only engage in such activities. The Gramm-Leach-Bliley Act, however, grandfathered the unrestricted authority for activities with respect to unitary savings and loan holding companies existing prior to May 4, 1999, such as the Company, so long as the Bank continues to comply with the qualified thrift lender test. Upon any non-supervisory acquisition by the Company of another savings association as a separate subsidiary, the Company would become a multiple savings and loan holding company and would be subject to limitations on the types of business activities in which it could engage. Federal law limits the activities of a multiple savings and loan holding company and its non-insured institution subsidiaries primarily to activities permissible for bank holding companies under Section 4(c)(8) of the Bank Holding Company Act, subject to the prior approval of the OTS, to those permissible for financial holding companies and to

other activities authorized by OTS regulation. Multiple savings and loan holding companies are prohibited from acquiring or retaining, with certain exceptions, more than 5% of a non-subsidiary company engaged in activities other than those permitted by federal law.

Federal law prohibits a savings and loan holding company, directly or indirectly, or through one or more subsidiaries, from merging with or acquiring more than 5% of the voting stock of another savings institution or holding company thereof without prior written approval of the OTS. In evaluating applications by holding companies to acquire savings institutions, the OTS must consider the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on the risk to the insurance funds, the convenience and needs of the community and competitive factors.

The OTS is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, except: (i) interstate supervisory acquisitions by savings and loan holding companies; and (ii) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisitions. The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

In order to elect and continue to be regulated as a savings and loan holding company by the OTS, the Bank must continue to qualify as a qualified thrift lender. This requires the Bank to maintain compliance with the test for a domestic building and loan association, as defined in the Internal Revenue Code, or with a Qualified Thrift Lender Test. Under the Test, a savings institution is required to maintain at least 65% of its portfolio assets (total assets less: (i) specified liquid assets up to 20% of total assets; (ii) intangibles, including goodwill; and (iii) the value of property used to conduct business) in certain qualified thrift investments (primarily residential mortgages and related investments, including certain mortgage-backed and related securities) in at least 9 months out of each 12 month period. A holding company of a savings institution that fails to qualify as a qualified thrift lender must either convert to a bank holding company and thereby become subject to the regulation and supervision of the Federal Reserve Board or operate under certain restrictions. As of December 31, 2003, the Bank maintained in excess of 65% of its portfolio assets in qualified thrift investments. The Bank also met the test in each of the prior 12 months and, therefore, is a qualified thrift lender. Recent legislative amendments have broadened the scope of qualified thrift investments that go toward meeting the test to fully include credit card loans, student loans and small business loans.

Under the Federal Change in Bank Control Act, a notice must be submitted to the Office of Thrift Supervision if any person (including a company), or group acting in concert, seeks to acquire control of a savings and loan holding company. Under certain circumstances, a change of control may occur, and prior notice is required, upon the acquisition of 10% or more of the Company's outstanding voting stock, unless the Office of Thrift Supervision has found that the acquisition will not result in a change of control of the Company. Under the Change in Bank Control Act, the Office of Thrift Supervision has 60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the anti-trust effects of the acquisition. Any company that acquires control would then be subject to regulation as a savings and loan holding company.

Federal Securities Laws

Shares purchased by an affiliate of the Company will be subject to the resale restrictions of Rule 144 under the Securities Act. If the Company meets the current public information requirements of Rule 144 under the Securities Act, each affiliate of the Company who complies with the other conditions of Rule 144 (including those that require the affiliate's sale to be aggregated with those of certain other persons) would be able to sell in the public market, without registration, a number of shares not to exceed, in any three-month period, the greater of (i) 1% of the outstanding shares of the Company or (ii) the average weekly volume of trading in such shares during the preceding four calendar weeks. Provision may be made in the future by the Company to permit affiliates to have their shares registered for sale under the Securities Act under certain circumstances.

FEDERAL AND STATE INCOME TAXATION

Federal Taxation

General. The Company files a consolidated federal income tax return. To the extent a member incurs a loss that is utilized to reduce the consolidated federal tax liability, that member will be reimbursed for the tax benefit utilized from the member(s) incurring federal tax liabilities.

Amounts provided for income tax expense are based upon income reported for financial statement purposes and do not necessarily represent amounts currently payable to federal and state tax authorities. Deferred income taxes, which principally arise from the temporary difference related to the recognition of certain income and expense items for financial reporting purposes and the period in which they affect federal and state taxable income, are included in the amounts provided for income taxes.

Bad Debt Reserves. The Small Business Job Protection Act of 1996 (the 1996 Act), which was enacted on August 20, 1996, made significant changes to provisions of the Code relating to a savings institution's use of bad debt reserves for federal income tax purposes and requires such institutions to recapture (i.e. take into income) certain portions of their accumulated bad debt reserves. Prior to the enactment of the 1996 Act, the Bank was permitted to establish tax reserves for bad debts and to make annual additions thereto, which additions, within specified formula limits, were deducted in arriving at the Bank's taxable income. The Bank's deduction with respect to qualifying loans, which are generally loans secured by certain interests in real property, could be computed using an amount based on a six-year moving average of the Bank's actual loss experience (the Experience Method), or a percentage equal to 8% of the Bank's taxable income (the PTI Method), computed without regard to this deduction and with additional modifications and reduced by the amount of any permitted addition to the non-qualifying reserve. The Bank's deduction with respect to non-qualifying loans was required to be computed under the Experience Method.

The 1996 Act. The Bank is required to recapture (i.e. take into income) over a six-year period the excess of the balance of its tax bad debt reserves as of December 31, 1996 over the balance of such reserves as of December 31, 1987. As of December 31, 1995, the Bank's tax bad debt reserve exceeded the balance of such reserve as of December 31, 1987 by \$2.2 million. However, the Bank will not incur an additional tax liability related to its tax bad debt reserves since the Bank has previously provided deferred taxes on the recapture amount.

Distributions. Under the 1996 Act, if the Bank makes non-dividend distributions to the Company, such distributions will be considered to have been made from the Bank's unrecaptured tax bad debt reserves (including the balance of its reserves as of December 31, 1987) to the extent thereof, and an amount based on the amount distributed (but not in excess of the amount of such reserves) will be included in the Bank's income. The term non-dividend distributions is defined as distributions in excess of the Bank's current and accumulated earnings and profits, as calculated for federal income tax purposes, distributions in redemption of stock, and distributions in partial or complete liquidation. Dividends paid out of the Bank's current or accumulated earnings and profits will not cause this pre-1988 reserve to be included in the Bank's income.

The amount of additional taxable income created from a non-dividend distribution is an amount that, when reduced by the tax attributable to the income, is equal to the amount of the distribution. Thus, if the Bank makes a non-dividend distribution to the Company, approximately one and one-half times the amount of such distribution (but not in excess of the amount of such reserves) would be includable in income for federal income tax purposes, assuming a 35% federal corporate income tax rate. The Bank does not intend to pay dividends that would result in a recapture of any portion of its tax bad debt reserves.

Dividends Received Deduction and Other Matters. The Company may exclude from its income 100% of dividends received

from the Bank as a member of the same affiliated group of corporations. The corporate dividends received deduction is generally 70% in the case of dividends received from unaffiliated corporations with which the Company and the Bank will not file a consolidated tax return, except that if the Company and the Bank own more than 20% of the stock of a corporation distributing a dividend, then 80% of any dividends received may be excluded.

State Taxation

Illinois State Taxation. The Bank and its subsidiaries are required to file Illinois income tax returns and pay tax at an effective tax rate of 7.18% of Illinois taxable income. For these purposes, Illinois taxable income generally means federal taxable income subject to certain modifications the primary one of which is the exclusion of interest income on United States obligations.

Delaware State Taxation. As a Delaware holding company not earning income in Delaware, the Company is exempt from Delaware Corporate income tax but is required to file an annual report with and pay an annual franchise tax to the State of Delaware.

Available Information

Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports are available without charge on our website, www.efcbancorp.com, as soon as reasonably practicable after they are filed electronically with the SEC. We are providing the address to our internet site solely for the information of investors; we do not

intend the address to be an active link or to otherwise incorporate the contents of the website into this report.

Item 2. Properties.

The Bank conducts its business through an executive and full-service branch office located in Elgin and seven other full-service branch offices. The downtown Elgin, Illinois branch was relocated to a larger downtown facility in 2002 and the original downtown location was sold in February 2004. The Company believes that the Bank's facilities are adequate to meet the present and immediately foreseeable needs of the Bank and the Company.

Location	Leased or Owned	Original Year Leased or Acquired	Date of Lease Expiration	Net Book Value of Property or Leasehold Improvements at December 31, 2003 (In thousands)

- (1) The property consists of one commercial retail unit and a parking lot. The property is located across the street from the Bank's main office and the parking lot is utilized by Bank customers and employees.
- (2) The property is located immediately adjacent to the Bank's main office. The Lifestyle Advantage, Information Technology, Human Resources and Marketing Departments are located in this property.
- (3) This is the prior downtown Elgin branch, which was sold in February 2004. The branch was relocated to the 28 North Grove building in 2002.
- (4) These properties consist primarily of land for future branch locations.

Item 3. Legal Proceedings.

The Company is not involved in any pending legal proceedings other than routine legal proceedings occurring in the ordinary course of business. Such routine legal proceedings, in the aggregate, are believed by management to be immaterial to the financial condition and results of operations of the Company.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

PART II

Item 5. Market for the Company's Common Equity and Related Stockholder Matters.

The Common Stock of the Company is traded on the American Stock Exchange under the symbol EFC. The stock began trading on April 3, 1998. During 2003 and 2002, the Company declared dividends to its shareholders amounting to \$0.575 and \$0.535 per share, respectively. As of March 8, 2004, there were approximately 2,384 shareholders of the Common Stock of the Company, which includes shares held in street name. The following table sets forth for the quarters indicated the range of high and low sale price information for the Common Stock of the Company as reported on the American Stock Exchange and dividends declared.

	Year Ended December 31, 2003			
	4 th Quarter	3 rd Quarter	2 nd Quarter	1 st Quarter

Item 6. Selected Financial Data.

The information relating to selected financial data is incorporated herein by reference to the Registrant's 2003 Annual Report.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.**Forward-Looking Statements**

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies and expectations of the Company, are generally identifiable by use of the words believe, expect, intend, anticipate, estimate, project, or similar expressions. The

Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations and future prospects of the Company and the subsidiaries include, but are not limited to, changes in: interest rates, general economic conditions, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Company's market area and accounting principles, policies and guidelines. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Further information concerning the Company and its business, including additional factors that could materially affect the Company's financial results, is included in the Company's filings with the SEC.

The Company does not undertake - and specifically disclaims any obligation - to publicly release the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Management of Interest Rate Risk and Market Risk Analysis

The principal objective of the Company's interest rate risk management is to evaluate the interest rate risk inherent in certain balance sheet accounts, determine the level of risk appropriate given the Bank's business strategy, operating environment, capital and liquidity requirements and performance objectives, and manage the risk consistent with the Board of Directors' approved guidelines. Through such management, the Company seeks to reduce the vulnerability of its operations to changes in interest rates. The Bank's Board of Directors reviews the Bank's interest rate risk position on a quarterly basis. The Bank's Asset/Liability Committee is comprised of the Bank's entire Board of Directors and members of senior management. The Committee is responsible for reviewing the Bank's activities and strategies, the effect of those strategies on the Bank's net interest margin, the market value of the portfolio and the effect that changes in the interest rates will have on the Bank's portfolio and the Bank's exposure limits.

In recent years, the Bank has emphasized the origination, purchase and retention of adjustable-rate mortgage loans and shorter-term fixed-rate mortgage loans, consumer loans consisting primarily of home equity lines of credit and short-term commercial business loans to strategically manage interest rate risk. The Bank currently does not participate in hedging programs, interest rate swaps or other activities involving the use of derivative financial instruments.

In the event of sharply rising interest rates, the Bank has, with retention in mind, competitively priced deposits. During 2003, the Bank focused on attracting money market accounts as well as time deposits. As necessary, the Bank has offered competitive special products to increase retention. Historically, the Bank has retained significant levels of maturing time deposits based on the above practice, as well as effective customer service and long-standing relationships with customers. For the year ended December 31, 2003, the Bank retained 87.7% of funds maturing from time deposits.

Analysis of Net Interest Income

Edgar Filing: EFC BANCORP INC - Form 10-K

Net interest income represents the difference between income on interest-earning assets and expense on interest-bearing liabilities. Net interest income depends on the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rate earned or paid on them.

Average Balance Sheet. The following table sets forth certain information relating to the Bank for the years ended December 31, 2003, 2002 and 2001. The average yields and costs are derived by dividing income or expense by the average balance of interest-earning assets or interest-bearing liabilities, respectively, for the periods shown and reflect annualized yields and costs. Average balances are derived from average monthly balances. The yields and costs include fees that are considered adjustments to yields. Tax-exempt income has been calculated on a tax equivalent basis using a 34% tax rate. Interest income attributed to the tax adjustment totaled \$803,000, \$725,000, and 248,000 for the years ended December 31, 2003, 2002, and 2001, respectively. Net interest margin without the tax adjustment totaled 3.01%, 3.21% and 3.01% for the years ended December 31, 2003, 2002, and 2001, respectively. In addition, interest rate spread without the tax adjustment totaled 2.71%, 2.80%, and 2.38% for the same time periods, respectively.

Rate/Volume Analysis. The following table presents the extent to which changes in interest rates and changes in the volume of interest-earning assets and interest-bearing liabilities have affected the Bank's interest income and interest expense during the periods indicated. Information is provided in each category with respect to: (i) changes attributable to changes in volume (changes in volume multiplied by prior rate); (ii) changes attributable to changes in

rate (changes in rate multiplied by prior volume); (iii) changes due to a combination of volume and rate; and (iv) the net change. The change in interest, not solely due to changes in volume or rates, has been consistently allocated in proportion to the absolute dollar amount of the change in each.

Comparison of Financial Condition For the Years Ended December 31, 2003 and December 31, 2002

Total assets at December 31, 2003 were \$897.1 million, which represented an increase of \$114.7 million, or 14.7%, compared to \$782.4 million at December 31, 2002. The change in total assets was primarily due to increases in loans receivable, bank owned life insurance, and investment securities. Loans receivable, net, increased by \$119.9 million, or 20.1%, to \$716.9 million at December 31, 2003 as compared to \$597.0 million at December 31, 2002. The increase in loans receivable was attributable to a \$61.0 million increase in the Bank's one- to four-family mortgage loan portfolio; a \$57.3 million increase in the commercial real estate loan portfolio; and a \$9.8 million increase in the multi-family loan portfolio, which was partially offset by a \$5.0 million decrease in the construction and land loan portfolio during the year ended December 31, 2003. The overall increase in loans is primarily attributed to the Bank's growing market area and lower interest rate environment. In addition, the Bank purchased \$110.2 million in loans for the year ended December 31, 2003. Bank owned life insurance increased \$5.8 million, or 46.9%, to \$18.0 million at December 31, 2003 as compared to \$12.2 million at December 31, 2002. This increase was due to an investment of \$5.0 million made in May 2003. Investment securities increased by \$2.7 million to \$90.7 million at December 31, 2003, as compared to \$88.0 million at December 31, 2002. This increase was due to a \$5.0 million increase in FNMA preferred stock, and a \$3.2 million increase in U.S. Government obligations, which was partially offset by a \$3.6 million decrease in corporate bonds and a \$2.0 million decrease in municipal securities. Cash and cash equivalents decreased \$10.9 million to \$21.9 million at December 31, 2003 as compared to \$32.8 million at December 31, 2002. The growth in total assets was funded by increases in deposits and borrowed money. Deposits increased \$72.6 million, or 13.8%, to \$596.8 million at December 31, 2003 from \$524.2 million at December 31, 2002. The increase in deposits is largely due to increased advertising and two new branch offices. Borrowed money, primarily representing FHLB advances, increased \$40.0 million to \$211.8 million at

Edgar Filing: EFC BANCORP INC - Form 10-K

December 31, 2003 from \$171.8 million at December 31, 2002. Stockholders' equity increased by \$3.6 million to \$78.4 million at December 31, 2003 as compared to \$74.8 million at December 31, 2002. This increase is primarily the result of the Company's net income during the year, which was partially offset by a \$819,000 decrease in the Company's accumulated other comprehensive income relating to its available-for-sale investment portfolio, stock repurchases totaling \$2.6 million and dividends paid of \$2.4 million.

Comparison of Operating Results for the Years Ended December 31, 2003 and December 31, 2002

General. The Company's net income increased \$1.1 million, to \$7.2 million for the year ended December 31, 2003, from \$6.1 million for the year ended December 31, 2002.

Interest Income. Interest income increased \$731,000, or 1.6%, to \$45.7 million for the year ended December 31, 2003, compared with the year ended December 31, 2002. This increase resulted from an increase in average interest-earning assets offset by a decrease in average yield. The largest component was an increase of \$1.5 million in other loan interest income for the year ended December 31, 2003. This resulted from an increase in average balance of \$36.6 million, offset by a decrease in average yield of 75 basis points. Another component was an increase of \$332,000 in investment securities and interest bearing deposits interest income for the year ended December 31, 2003. This resulted from an increase in average balance of \$12.5 million offset by a decrease in average yield of 37 basis points. This was partially offset by a decrease of \$968,000 in mortgage loan interest income. This resulted from an increase in average balance of \$61.8 million offset by a decrease in average yield of 97 basis points. Overall, the average yield on the Bank's interest-earning assets decreased by 81 basis points to 5.80% for the year ended December 31, 2003 from 6.61% for the year ended December 31, 2002. The decrease in average yield is due to a general decline in interest rates. The average balance of interest-earning assets increased \$110.6 million, or 16.0%, to \$803.0 million for the year ended December 31, 2003 from \$692.4 million for the comparable period in 2002.

Interest Expense. Interest expense decreased by \$1.3 million, or 5.6%, to \$21.5 million for the year ended December 31, 2003, from \$22.8 million for the year ended December 31, 2002. This decrease resulted from the increase in the average balance of interest-bearing liabilities, the effect of which was offset by an overall decrease in the average rate paid on those interest-bearing liabilities. The average rate paid on total deposits decreased 75 basis points to 2.30% for the year ended December 31, 2003 from 3.05% for the year ended December 31, 2002. The average balance of deposits increased \$84.7 million, or 19.1%, to \$528.9 million for the year ended December 31, 2003 from \$444.2 million for the year ended December 31, 2002. The resulting decrease in interest expense totaled \$1.4 million for the year ended December 31, 2002. Interest expense resulting from borrowed money increased by \$128,000. The average rate paid on borrowed money decreased 42 basis points to 4.93% for the year ended December 31, 2003 from 5.35% for the year ended December 31, 2002. This decrease in average rate was offset by an increase of \$17.5 million in the average balance of borrowed money to \$190.5 million for the year ended December 31, 2003 from \$173.0 million for the year ended December 31, 2002.

Net Interest Income Before Provision for Loan Losses. Net interest income before provision for loan losses increased \$2.0 million, or 9.1%, to \$24.2 million for the year ended December 31, 2003 from \$22.2 million for the year ended December 31, 2002. This increase was primarily attributed to a \$110.6 million increase in average interest-earning assets, at an average yield of 5.80%, offset by an increase in the average balance of interest-bearing liabilities of \$102.2 million, at an average cost of 2.99%. The interest rate spread decreased 10 basis points to 2.81% for the year ended December 31, 2003 from 2.91% for the year ended December 31, 2002. The net interest margin as a percent of interest-earning assets decreased 20 basis points to 3.11% for the year ended December 31, 2003 as compared to 3.31% for the comparable period in 2002.

Provision for Loan Losses. The Bank's provision for loan losses decreased \$287,000 to \$613,000 for the year ended December 31, 2003 from \$900,000 in 2002. At December 31, 2003 and 2002, non-performing loans totaled \$2.8 million and \$2.4 million, respectively. At December 31, 2003 and 2002 the balance of the allowance for loan losses totaled \$3.8 million and \$3.1 million, respectively. At December 31, 2003, the ratio of the allowance for loan losses to non-performing loans was 135.7% compared to 131.1% at December 31, 2002. The ratio of the allowance to total loans was 0.52% and 0.53% at December 31, 2003 and 2002, respectively. Net charge-offs totaled \$14,000 in 2002 and there were no charge-offs for the year ended December 31, 2003. Management periodically calculates an allowance sufficiency analysis based upon the portfolio composition, asset classifications, loan-to-value ratios, impairments in the current loan portfolio, and other factors. This analysis is designed to reflect credit losses for specifically identified loans, as well as credit losses in the remainder of the loan portfolio. The reserve methodology employed by management reflects the difference in degree of risk between the various categories of loans in the Bank's portfolio. The reserve methodology also critically assesses those loans adversely classified in the portfolio by management as doubtful, substandard or special mention. These allowance components are set at a higher factor than the non-classified one- to four-family loans in the portfolio to reflect the greater level of risk to which management believes the Bank is exposed. Management believes that the allowance for loan losses is currently adequate to cover probable losses in the existing loan portfolio. While management estimates loan losses using the best available information, no assurance can be given that future additions to the allowance will not

be necessary based on changes in economic and real estate market conditions, further information obtained regarding problem loans, identification of additional problem loans and other factors, both within and outside of management's control. In addition, the FDIC and the Commissioner, as an integral part of their examination processes, periodically review the Bank's allowance for loan losses. Such agencies may require the Bank to make additional provisions for estimated loan losses based upon judgments different from those of management.

Noninterest Income. Noninterest income totaled \$5.7 million and \$4.3 million for the years ended December 31, 2003 and 2002, respectively. Service fees increased \$566,000 to \$2.2 million for the year ended December 31, 2003 from \$1.6 million for the comparable period in 2002. Service fees increased primarily due to the offering of an overdraft privilege account to our customers. Gains on sale of securities totaled \$816,000 for the year ended December 31, 2003. There were no securities sales for the year ended December 31, 2002. The gain on sale of securities was the result of repositioning the balance sheet and favorable market conditions. Gains on sale of foreclosed real estate totaled \$192,000 for the year ended December 31, 2003. There were no gains on sale of foreclosed real estate for the year ended December 31, 2002. Income related to bank owned life insurance increased \$151,000 to \$844,000 for the year ended December 31, 2003 from \$693,000 for the comparable period in 2002. This increase is primarily due to the additional investment of \$5.0 million made in May 2003. In addition, insurance and brokerage commissions increased \$37,000 to \$442,000 for the year ended December 31, 2003 from \$405,000 for the year ended December 31, 2002. These increases were partially offset by a \$496,000 decrease to \$786,000 in income generated by Computer Dynamics Group, Inc. (CDGI) for the year ended December 31, 2003. The decrease in income generated by CDGI is largely due to a decrease in sales related to a weaker demand for technology services.

Noninterest Expense. Noninterest expense increased by \$2.0 million, to \$18.6 million for the year ended December 31, 2003 from \$16.6 million for the comparable period in 2002. Compensation and benefits increased by \$747,000, or 7.3%, to \$11.0 million for the year ended December 31, 2003 compared to \$10.2 million for the year ended December 31, 2002. This increase was primarily due to a combination of annual salary increases and the addition of staff. The additional staff expenses are partially attributed to the Bank's two new branch offices. Office buildings operations increased by \$328,000 to \$2.7 million for the year ended December 31, 2003 compared to \$2.4 million for the comparable period in 2002. Other operating expenses, including advertising, marketing, postage, communications, data processing and other office expense increased by a combined \$243,000, or 11.1% to \$2.4 million for the year ended December 31, 2003 compared to \$2.2 million for the comparable period in 2003. Of this increase, \$92,000 is related to data processing expense; \$85,000 of NOW account operating expenses, and \$53,000 of advertising expenses. In addition, the Company incurred a goodwill impairment of \$264,000, relating to its majority owned subsidiary CDGI, for the year ended December 31, 2003. The goodwill impairment is primarily due to a weaker demand for technology services. The efficiency ratio improved to 62.2% for the year ended December 31, 2003 from 62.8% for the comparable prior year period. In addition, the noninterest expense to average total asset ratio decreased 8 basis points to 2.19% at December 31, 2003 from 2.27% for the prior year period. Management continues to emphasize the importance of expense management and control in order to continue to provide expanded banking services to a growing market base.

Income Tax Expense. Income tax expense totaled \$3.6 million for the year ended December 31, 2003 compared to \$2.9 million for the comparable period in 2002. The increase in the provision for income taxes was the result of an increase in pretax income of \$1.7 million to \$10.7 million for the year ended December 31, 2003 from \$9.0 million for the same period in 2002. The effective tax rate increased slightly to 33.8% for the year ended December 31, 2003

from 32.1% for the preceding year. The increase in the effective tax rate is partially due to a reduction in the municipal bond investment portfolio and the goodwill impairment related to CDGI, offset in part by the additional purchase of bank owned life insurance.

Comparison of Operating Results for the Years Ended December 31, 2002 and December 31, 2001

General. The Company's net income increased \$1.5 million, to \$6.1 million for the year ended December 31, 2002, from \$4.6 million for the year ended December 31, 2001.

Interest Income. Interest income increased \$1.2 million, or 2.7%, to \$45.0 million for the year ended December 31, 2002, compared with 2001. This increase resulted from an increase in average interest-earning assets, partially offset by a decrease in average yield. The largest component was an increase of \$898,000 in mortgage loan interest income for the year ended December 31, 2002. This resulted from an increase in average balance of \$41.1 million offset by a decrease in average yield of 45 basis points. Another component was an increase of \$881,000 in other loan interest income for the year ended December 31, 2002. This resulted from an increase in average balance of \$25.0 million offset by a decrease in average yield of 138 basis points. This

was partially offset by a decrease of \$332,000 in interest income on investment securities, FHLB stock and short-term deposits. This resulted from an increase in average balance of \$14.5 million offset by a decrease in average yield of 62 basis points. Overall, the average yield on the Bank's interest-earning assets decreased by 59 basis points to 6.61% for the year ended December 31, 2002 from 7.20% for the year ended December 31, 2001. The decrease in average yield is due to a general decrease in interest rates. The average balance of interest-earning assets increased by \$80.5 million, or 13.2%, to \$692.4 million for the year ended December 31, 2002 from \$611.9 million in 2001.

Interest Expense. Interest expense decreased by \$2.6 million, or 10.3%, to \$22.8 million for the year ended December 31, 2002, from \$25.4 million for the year ended December 31, 2001. This decrease resulted from the decrease in the average rate paid on interest-bearing liabilities offset by the increase in the average balance of interest-bearing liabilities. The average rate paid on total deposits decreased 108 basis points to 3.70% for the year ended December 31, 2002 from 4.78% for the year ended December 31, 2001. The related average balance of deposits increased \$77.3 million, or 21.1%, to \$444.2 million for the year ended December 31, 2002 from \$366.9 million for the comparable period in 2001. This increase was partially offset by a decrease in the average rate paid on those deposits of 144 basis points to 3.05% for the year ended December 31, 2002 compared to 4.49% for the year ended December 31, 2001. Interest expense resulting from borrowed money increased by \$276,000. The average rate paid on borrowed money decreased by 10 basis points to 5.35% for the year ended December 31, 2002 from 5.45% for the year ended December 31, 2001. This decrease in average rate paid was partially offset by an increase of \$8.2 million in the average balance of borrowed money to \$173.0 million for the year ended December 31, 2002 from \$164.8 million for the year ended December 31, 2001.

Net Interest Income Before Provision for Loan Losses. Net interest income before provision for loan losses increased \$3.8 million, or 20.6%, to \$22.2 million for the year ended December 31, 2002 from \$18.4 million for 2001. This increase was primarily attributable to an \$80.5 million increase in average interest-earning assets, at an average yield of 6.61%, offset by an increase in the average balance of interest-bearing liabilities of \$85.5 million, at an average cost of 3.70%. This combination resulted in an increase in interest rate spread of 46 basis points to 2.91% for the year ended December 31, 2002, as compared to 2.42% for the year ended December 31, 2001. The increase in interest rate spread is due to a general decrease in rates in the Bank's local market area as well as deposits repricing faster than loans. The net interest margin as a percent of interest-earning assets increased by 26 basis points to 3.31% for the year ended December 31, 2002 as compared to 3.05% for the comparable period in 2001.

Provision for Loan Losses. The Bank's provision for loan losses increased by \$400,000 to \$900,000 for the year ended December 31, 2002 from \$500,000 in 2001. This increase is primarily due to the increased risk in the loan portfolio based on uncertain economic conditions and a greater emphasis placed on commercial lending. At December 31, 2002 and 2001, non-performing loans totaled \$2.4 million and \$2.6 million, respectively. At December 31, 2002 and 2001 the balance of the allowance for loan losses totaled \$3.1 and \$2.3 million, respectively. At December 31, 2002, the ratio of the allowance for loan losses to non-performing loans was 131.1% compared to 87.4% at December 31, 2001. The ratio of the allowance to total loans was 0.53% and 0.42% at December 31, 2002 and 2001, respectively. Net charge-offs totaled \$14,000 and \$126,000 in 2002 and 2001, respectively.

Noninterest Income. Noninterest income totaled \$4.3 million and \$1.8 million for the years ended December 31, 2002 and 2001, respectively. Insurance and brokerage commissions increased \$86,000 to \$405,000 for the year ended

December 31, 2002 from \$319,000 for the comparable period in 2001. Income related to bank owned life insurance increased from zero in 2001 to \$693,000 for the year ended December 31, 2002. Service fees increased \$371,000 to \$1.6 million for the year ended December 31, 2002 from \$1.2 million for the comparable prior year period. Revenues of \$1.3 million were generated by Computer Dynamics Group, Inc. (CDGI). As previously reported, the Company purchased a controlling interest in CDGI for \$420,000 in January 2002. CDGI is an information technology consulting/services company with main offices in West Chicago, Illinois and generally services clients located in the Chicago metropolitan area.

Noninterest Expense. Noninterest expense increased by \$4.0 million, to \$16.6 million for the year ended December 31, 2002 from \$12.6 million for the comparable period in 2001. Compensation and benefits increased by \$2.5 million, or 33.3%, to \$10.2 million for the year ended December 31, 2002 compared to \$7.7 million for the year ended December 31, 2001. This increase is primarily due to a combination of annual salary increases, the addition of staff and the related compensation and benefits of CDGI. The additional staff expenses are primarily attributed to the opening of a new branch office. All other operating expenses, including advertising, depreciation and repairs, marketing, insurance, postage, communications, data processing and other office

expense increased by a combined \$1.5 million, or 30.6%, to \$6.4 million for the year ended December 31, 2002 compared to \$4.9 million for the comparable period in 2001. Of this increase, \$203,000 is related to marketing and advertising expenses relating to a new branch office and increased advertising for EFS Financial Services, Inc., the Bank's wholly owned subsidiary, which offers a full range of investment products.

Income Tax Expense. Income tax expense totaled \$2.9 million for the year ended December 31, 2002 compared to \$2.5 million for the comparable period in 2001. The increase in the provision for income taxes was the result of an increase in pretax income of \$1.9 million, to \$9.0 million for the year ended December 31, 2002 from \$7.1 million for the same period in 2001. The effective income tax rate decreased to 32.1% for the year ended December 31, 2002 from 35.1% for the preceding year. The decrease in the effective tax rate is primarily due to the increase in municipal securities available-for-sale and investment in bank owned insurance for which income is non-taxable.

Off-Balance Sheet Arrangements

For a discussion of the Bank's off-balance sheet arrangements, see note 14 (Concentrations of Credit Risk and Financial Instruments with Off-Balance Sheet Risk) of the Notes to Consolidated Statements found on page F-23.

Contractual Obligations and Commercial Commitments

The Bank has certain obligations and commitments to make future payments under contracts. At December 31, 2003, the aggregate contractual obligations and commercial commitments are:

	At December 31, 2003							Total December 31, 2003
	Less than One Year	One to Two Years	Two to Three Years	Three to Four Years	Four to Five Years	More than Five Years		
(In thousands)								
Contractual obligations:								
Certificates of deposit	\$ 126,067	\$ 35,238	\$ 60,600	\$ 16,732	\$ 6,509	\$	\$	\$ 245,146
Federal home loan bank advances	47,700	23,000	15,000		19,000	100,000		204,700
Operating leases	106	108	109	110	112	293		838
Total at December 31, 2003	\$ 173,873	\$ 58,346	\$ 75,709	\$ 16,842	\$ 25,621	\$ 100,293	\$	\$ 450,684

	At December 31, 2003							Total December 31, 2003
	Less than One Year	One to Two Years	Two to Three Years	Three to Four Years	Four to Five Years	More than Five Years		

Edgar Filing: EFC BANCORP INC - Form 10-K

(In thousands)

Other commercial commitments:														
Lines of credit	\$	10,420	\$	952	\$	1,057	\$	612	\$	3,880	\$	25,421	\$	42,342
Loan commitments		11,516												11,516
Letters of credit		2,422		1,002		10		2,000						5,434
Total at December 31, 2003	\$	24,358	\$	1,954	\$	1,067	\$	2,612	\$	3,880	\$	25,421	\$	59,292

Liquidity and Capital Resources

The Bank's primary sources of funds are savings deposits, proceeds from the principal and interest payments on loans and proceeds from the maturation of securities and, to a lesser extent, borrowings from FHLB-Chicago. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit outflows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and competition.

The primary investing activities of the Bank are the origination of primarily residential one-to four-family loans and, to a lesser extent, multi-family and commercial real estate, construction and land, commercial and consumer loans and the purchase of mortgage-backed and mortgage-related securities. During the years ended December 31, 2003, 2002, and 2001, the Bank's loan originations totaled \$299.6 million, \$179.2 million and \$206.6 million, respectively. In addition, the Bank purchased loans totaling \$110.2 million, \$79.6 million and \$65.2 million for the same time periods. Primarily deposit growth, borrowings and principal repayments on loans, and mortgage-backed securities funded these activities. The Bank experienced a net increase in total deposits of \$72.6 million, \$104.1 million and \$50.6 million for the years ended December 31, 2003, 2002, and 2001, respectively. This increase can be attributed to an aggressive marketing campaign as well as the addition of a branch office. In addition, borrowings increased \$40.0 million, decreased \$3.5 million and increased \$35.0 million, respectively for the same time periods. The level of interest rates affects deposit flows, the interest rates and products offered by the local competitors and the Bank, and other factors.

The Bank's most liquid assets are cash and interest-bearing demand accounts. The levels of these assets are dependent on the Bank's operating, financing, lending and investing activities during any given period. At December 31, 2003, cash and interest-bearing demand accounts totaled \$21.9 million, or 2.4% of total assets. The Bank closely monitors its liquidity position on a daily basis. On a longer-term basis, the Bank maintains a strategy of investing in various lending products as described in greater detail under Item 1 to this Annual Report. In the event the Bank should require funds beyond its ability to generate them internally, additional sources of funds are available through FHLB advances. At December 31, 2003, the Bank had \$204.7 million of outstanding FHLB borrowings.

Outstanding commitments to originate first mortgage loans totaled \$11.5 million at December 31, 2003. Management of the Bank anticipates that it will have sufficient funds available to meet its current loan commitments. Certificates of deposit, which are scheduled to mature in one year or less from December 31, 2003, totaled \$126.1 million. For the year ended December 31, 2003, the Bank experienced an 87.7% retention rate of funds maturing from certificates of deposit. It has been and will continue to be a priority of management to retain time deposits. The Bank relies primarily on competitive rates, customer service, and long-standing relationships with customers to retain deposits. From time to time, the Bank will also offer competitive special products to its customers to increase retention. Based upon the Bank's experience with deposit retention and current retention strategies, management believes that, although it is not possible to predict future terms and conditions upon renewal, a significant portion of such deposits will remain with the Bank.

At December 31, 2003, the Bank exceeded all of its regulatory capital requirements with a leverage capital level of \$73.7 million, or 8.27% of adjusted assets, which is above the required level of \$35.7 million, or 4.00%, and risk-based capital of \$77.5 million, or 12.19% of adjusted assets, which is above the required level of \$50.9 million, or 8.00%.

The capital injection resulting from the Conversion in 1998 of \$72.8 million significantly increased liquidity and capital resources. A portion of the net proceeds was invested in marketable securities. The initial level of liquidity has been reduced as net proceeds are utilized for general corporate purposes, including the funding of lending activities and expansion of facilities and to a greater degree the repurchase of the Company's common stock. During 2003, the Company repurchased 134,500 shares of the Company's common stock at an average price per share of \$19.04. The Company believes that stock repurchases are a good way to manage its excess capital and a sound investment decision.

Edgar Filing: EFC BANCORP INC - Form 10-K

The primary source of funding for the Company is dividend payments from the Bank, sales and maturities of investment securities and, to a lesser extent, earnings on investments and deposits held by the Company. Dividend payments by the Bank have primarily been used to fund stock repurchase programs and pay dividends on Company stock. These repurchases totaled \$37.1 million as of December 31, 2003. The Bank's ability to pay dividends and other capital distributions to the Company is generally limited by the provisions of the Illinois state banking regulations and the Federal Deposit Insurance Corporation. Additionally, the Illinois State Banking Commissioner and Federal Deposit Insurance Corporation may prohibit the payment of dividends that are otherwise permissible by regulation for safety and soundness reasons. Under Illinois banking law, an Illinois state chartered stock savings bank may declare and pay dividends out of its net profits, unless there is an impairment of capital, but approval of the Commissioner is required if the total of all dividends declared in a calendar year would exceed 50% of the

Bank's net profits for that year if the Bank has total capital of less than 6% of total assets. A savings bank may not declare dividends in excess of its net profits in any year without the approval of the Commissioner. To the extent the Bank were to apply to pay a dividend or capital distribution to the Company in excess of the regulatory permitted dividend amounts, no assurances can be made such application would be approved by the regulatory authorities. See also "Regulation and Supervision" on page 27.

Impact of Inflation and Changing Prices

The Consolidated Financial Statements and Notes thereto presented in this Annual Report have been prepared in accordance with accounting principles generally accepted in the United States of America, which generally require the measurement of financial position and operating results in terms of historical dollar amounts without considering the changes in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increased cost of the Bank's operations. Unlike industrial companies, nearly all of the assets and liabilities of the Bank are monetary in nature. As a result, interest rates have a greater impact on the Bank's performance than do the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the price of goods and services.

Impact of Accounting Standards

In January 2003, the FASB issued Interpretation No. 46, "Consolidation of Variable Interest Entities" which provides new accounting guidance on when to consolidate a variable interest entity. A variable interest entity exists when either the total equity investment at risk is not sufficient to permit the entity to finance its activities by itself, or the equity investors lack one of three characteristics associated with owning a controlling financial interest. Those characteristics include the direct or indirect ability to make decisions about an entity's activities through voting rights or similar rights, the obligation to absorb the expected loss of an entity if they occur, and the right to receive the expected residual return of the entity if they occur. On October 9, 2003, the FASB issued a deferral to December 31, 2003 of the implementation of FIN 46 for variable interest entities in existence prior to February 1, 2003. We do not expect that the adoption of this Interpretation will have a material impact on our consolidated financial statements. On December 24, 2003, the Financial Accounting Standards Board issued FASB Interpretation No. 46 (revised December 2003), "Consolidation of Variable Interest Entities," (FIN 46R), which addresses how a business enterprise should evaluate whether it has a controlling financial interest in an entity through means other than voting rights and accordingly should consolidate the entity. FIN 46R replaces FASB Interpretation No. 46, "Consolidation of Variable Interest Entities," which was issued on January 17, 2003. We do not believe the implementation of FIN 46R will have a material effect on our financial statements.

In April 2003, the FASB issued SFAS No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities." This Statement amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. This Statement is effective for contracts entered into or modified after June 30, 2003 and for hedging relationships designated after June 30, 2003. Adoption of this Statement did not have a material impact on our consolidated financial statements.

In May 2003, the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity." This Statement would require that certain financial instruments with characteristics of both liabilities and equity be classified on the consolidated balance sheets as liabilities. The Statement is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. On October 29, 2003, the FASB deferred the application of certain requirements of SFAS No. 150. Adoption of this Statement did not have a material impact on our consolidated financial statements.

Edgar Filing: EFC BANCORP INC - Form 10-K

In November 2003, the FASB ratified a consensus reached by the Emerging Issues Task Force (EITF) in EITF 03-1, The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments, which is effective for fiscal years ending after December 15, 2003. The consensus requires certain quantitative and qualitative disclosures for debt and marketable equity securities classified as available-for-sale or held-to-maturity under SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities that are impaired at the balance sheet date but for which an other-than-temporary impairment has not been recognized. These disclosures are contained in Note 4 of the Notes to Consolidated Financial Statements.

Item 7A. Quantitative and Qualitative Disclosure About Market Risk

The Bank's interest rate sensitivity is monitored by management through the use of a Net Portfolio Value Model which generates estimates of the change in the Bank's net portfolio value (NPV) over a range of interest rate scenarios. NPV is the present value of expected cash flows from assets, liabilities, and off-balance sheet contracts. The NPV ratio, under any interest rate scenario, is defined as the NPV in that scenario divided by the market value of assets in the same scenario. The model assumes estimated loan prepayment rates, reinvestment rates and deposit decay rates similar to the assumptions utilized for the Gap Table. The Sensitivity Measure is the decline in the NPV ratio, in basis points, caused by a 2% increase or decrease in rates; whichever produces a larger decline. The higher the institution's Sensitivity Ratio, the greater its exposure to interest rate risk is considered to be. The following NPV Table sets forth the Bank's NPV as of December 31, 2003.

Change in Interest Rates In Basis Points (Rate Shock)	Net Portfolio Value			NPV as % of Portfolio Value of Assets	
	Amount	(\$ in thousands)		NPV Ratio	% Change
		Dollars	\$ Change		
300	\$ 48,762	\$ (38,604)	(44.19)%	5.60%	(41.24)%
200	62,633	(24,733)	(28.31)	7.07	(25.81)
100	75,730	(11,636)	(13.32)	8.42	(11.65)
Static	87,366			9.53	
(100)	83,338	(4,028)	(4.61)	9.07	(4.83)

Certain shortcomings are inherent in the methodology used in the above interest rate risk measurements. Modeling changes in NPV require certain assumptions which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the NPV Table presented assumes that the composition of the Bank's interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the NPV Table provides an indication of the Bank's interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on the Bank's net interest income and will differ from actual results. Due to the level of the current interest rate environment only a 100 basis point decline is shown.

For a further discussion regarding Quantitative and Qualitative Disclosure about Market Risk, see Item 7 of this Form 10-K, Management's Discussion and Analysis of Financial Condition and Results of Operations - Management of Interest Rate Risk and Market Risk Analysis.

Item 8. Financial Statements and Supplementary Data.

EFC BANCORP, INC. AND SUBSIDIARIES

Consolidated Financial Statements

December 31, 2003, 2002, and 2001

(With Independent Auditors' Report Thereon)

Independent Auditors Report

Edgar Filing: EFC BANCORP INC - Form 10-K

The Board of Directors
EFC Bancorp, Inc.:

We have audited the accompanying consolidated balance sheets of EFC Bancorp, Inc. and subsidiaries (the Company) as of December 2003 and 2002, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2003. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of EFC Bancorp, Inc. and subsidiaries as of December 31, 2003 and 2002, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2003 in conformity with accounting principles generally accepted in the United States of America.

EFC BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2003, 2002, and 2001

- (1) Summary of Significant Accounting Policies

The following describes the more significant policies which EFC Bancorp, Inc. (the Company) follows in preparing and presenting its consolidated financial statements.

Principles of Consolidation

The consolidated financial statements include the accounts of EFC Bancorp, Inc. and its wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. The Company purchased an 80% interest in Computer Dynamics Group, Inc. (CDGI) for \$420,000 in January 2002. CDGI is consolidated and a minority interest is recorded for the proportionate interest not owned by the Company.

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America and to general practice within the banking industry. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated balance sheet and revenues and expenses for the period. Actual results could differ from these estimates.

Financial Reporting of Segments

Statement of Financial Accounting Standards No. 131 (SFAS 131), *Disclosures About Segments of an Enterprise and Related Information*, establishes standards for the way public business enterprises report information about operating segments in annual financial statements. Operating segments are components of an enterprise for which separate financial information is available, and is evaluated regularly by management in deciding how to allocate resources and in assessing performance. SFAS 131 establishes standards for related disclosures about products, services, geographic areas, and major customers. The Company operates as a single segment.

EFS Bank (the Savings Bank) is principally engaged in the business of attracting deposits and investing these funds, together with borrowings, to originate and purchase primarily one-to-four family residential mortgages and construction loans and to purchase securities.

Loans Receivable

Loans receivable are stated at unpaid principal balances less deferred loan fees and the allowance for loan losses. Premiums and discounts on purchased loans are amortized and accreted to interest income using the level-yield method over the remaining period to contractual maturity.

Loan origination fees and certain direct costs associated with loan originations are deferred. Net deferred fees are amortized as yield adjustments over the contractual life of the related loans using the level-yield method.

The allowance for loan losses is provided by charges to operations. The balance of the allowance is based on management's estimate of probable losses in the loan portfolio and current economic conditions. Regulatory examiners may require the Company to recognize additions to the allowance based upon their judgments about information available to them at the time of their examination.

A provision for losses on specific loans is charged to operations when any permanent decline reduces the market value to less than the loan principal balance or carrying value less estimated costs to sell foreclosed real estate.

Management, considering current information and events regarding the borrower's ability to repay their obligations, considers a loan to be impaired when it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the note agreement, including principal and interest. The amount of impairment for individual loans is measured based on the fair value of the collateral, if the loan is collateral dependent, or alternatively, on the present value of expected future cash flows discounted at the loan's effective interest rate. Certain groups of small balance homogenous loans represented by installment and consumer credit and residential real estate loans are excluded from the impairment provisions.

A loan is generally classified as nonaccrual when collectibility is in doubt and the loan is contractually past due three months or more. When a loan is placed on nonaccrual status, previously accrued, but unpaid interest is reversed against interest income. Income on such loans is subsequently recorded to the extent that cash is received and where future collection of principal is probable.

Investment Securities and Mortgage-backed Securities

The Company classifies its investment and mortgage-backed securities in one of three categories: trading, available-for-sale, or held-to-maturity. Securities which the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity and measured at amortized cost. Securities purchased for the purpose of being sold in the near term are classified as trading securities and measured at fair value with any change in fair value included in earnings. All other securities that are not classified as held-to-maturity or trading are classified as available-for-sale. Securities classified as available-for-sale are measured at fair value with any changes in fair value reflected as a separate component of stockholders' equity, net of related tax effects. Gains and losses on the sale of such securities are determined using the specific identification method. Securities that have losses deemed other than temporary are recognized as losses in the consolidated statement of income and a new cost basis is established. The Company has classified all investment securities as available-for-sale at December 31, 2003 and 2002.

Discounts and premiums on mortgage-backed securities purchased are accreted and amortized to maturity, using a method which approximates the effective interest method. For investment securities, the straight-line method based upon the contractual life of the security is principally used, which approximates the effective interest method.

Office Properties and Equipment

Office properties and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization is computed for financial reporting purposes principally on the straight-line basis over the estimated useful lives (5 to 40 years) of the respective assets.

F-7

Income Taxes

Deferred income taxes arise from the recognition of certain items of income and expense for tax purposes in years different from those in which they are recognized in the consolidated financial statements. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases (temporary differences).

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income in the period that includes the enactment date. To the extent a deferred tax asset is established which is not likely to be realized, a valuation allowance is established against such asset.

Foreclosed Real Estate

Foreclosed real estate represents real estate acquired through foreclosure, and is recorded at the lower of cost (principal balance of the former first mortgage loan plus costs of obtaining title and possession) or net realizable value, at the date of foreclosure. After foreclosure, additional charges are recorded to operations as necessary to reflect further impairment of the estimated net realizable value.

Employee Stock Ownership Plan (ESOP)

Compensation expense under the ESOP is equal to the fair value of common shares released or committed to be released annually to participants in the ESOP. The difference between the fair value of the shares committed to be released and the cost of those shares to the ESOP is charged or credited to additional paid-in capital. Common stock purchased by the ESOP and not committed to be released to participants is included in the consolidated balance sheet at cost as a reduction of stockholders' equity. Dividends on allocated ESOP shares are recorded as a reduction of stockholders' equity; dividends on unallocated ESOP shares are used to pay debt service, and recorded as a reduction of debt and accrued interest.

Earnings per Share

Basic earnings per share is calculated by dividing net income available to common stockholders by the weighted average number of common shares outstanding. Diluted earnings per share is calculated by dividing net income by the weighted average number of common shares adjusted for the dilutive effect of outstanding stock options. ESOP shares are only considered outstanding for earnings per share calculations when they are committed to be released.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash and cash equivalents are considered to include cash on hand and in banks and interest bearing deposits with financial institutions.

F-8

Comprehensive Income

Comprehensive income consists of net income and net unrealized gains (losses) on available-for-sale securities and is presented in the consolidated statements of changes in stockholders' equity.

Stock Option Plan

Edgar Filing: EFC BANCORP INC - Form 10-K

The Company has stock option plans that authorize the granting of stock options to eligible employees. In December 2002, the Company adopted SFAS No. 148, *Accounting for Stock Based Compensation Transition and Disclosure*.

Under Statement 123, the Company is required to disclose pro forma net income and earnings per share as if compensation expense relative to the fair value of options granted had been included in earnings. Had the Company determined compensation cost based on the fair value at the grant date of its stock options under Statement 123, the Company's net income would have been reduced to the pro forma amounts indicated below:

	Year ended December 31		
	2003	2002	2001
Net income as reported	\$ 7,184,441	6,147,312	4,635,200
Add: Stock based compensation, net of tax included in the determination of net income as reported	509,125	624,702	633,602
Deduct: Stock based compensation, net of tax, that would have been reported if the fair value based method had been applied to all awards	(977,388)	(1,073,080)	(1,085,821)
Pro forma net income	\$ 6,716,178	5,698,934	4,182,981
Basic earnings per share			
As reported	\$ 1.70	1.46	1.09
Pro forma	1.59	1.35	0.98
Diluted earnings per share			
As reported	\$ 1.61	1.39	1.08
Pro forma	1.51	1.29	0.97

F-9

Edgar Filing: EFC BANCORP INC - Form 10-K

The Company follows the disclosure provisions of FASB Statement No. 123, *Accounting for Stock-Based Compensation*. The fair value of each option granted is estimated on the grant date using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	2003
Dividend yield	2.83% - 3.16%
Risk-free interest rate	3.54% - 3.83%
Weighted average expected life	10 Years
Expected volatility	14.7% - 17%

There were no options granted during 2002 and 2001.

The weighted average per share fair value of options granted in 2003 was \$2.61.

Basis of Presentation

Certain amounts for prior years have been reclassified to conform to the current year presentation.

(2) Earnings Per Share

Edgar Filing: EFC BANCORP INC - Form 10-K

The following table sets forth the computation of basic and diluted earnings per share for the periods indicated. ESOP shares are only considered outstanding for earnings per share calculations when they are committed to be released.

	Year ended December 31		
	2003	2002	2001
Basic:			
Net income	\$ 7,184,441	6,147,312	4,635,200
Weighted average common shares outstanding	4,214,480	4,215,039	4,249,640
Basic earnings per share	\$ 1.70	1.46	1.09
Diluted:			
Net income	\$ 7,184,441	6,147,312	4,635,200
Weighted average common shares outstanding	4,214,480	4,215,039	4,249,640
Effect of dilutive stock options outstanding	238,633	204,985	47,134
Diluted weighted average common shares outstanding	4,453,113	4,420,024	4,296,774
Diluted earnings per share	\$ 1.61	1.39	1.08

F-10

(3) Loans Receivable, Net

Edgar Filing: EFC BANCORP INC - Form 10-K

Loans receivable, net are summarized as follows:

	December 31,	
	2003	2002
Mortgage loans:		
One-to-four family residential	\$ 466,930,401	405,952,832
Multifamily	52,248,499	42,497,672
Commercial	109,426,205	52,154,556
Construction and land	36,356,150	41,323,317
Total mortgage loans	664,961,255	541,928,377
Other loans:		
Home equity loans	27,497,027	21,160,238
Commercial	22,603,322	33,315,091
Auto loans	1,471,200	1,115,795
Loans on savings accounts	228,563	1,017,541
Other	4,066,233	1,888,763
Total other loans	55,866,345	58,497,428
Total loans receivable	720,827,600	600,425,805
Less:		
Deferred loan fees	189,174	246,354
Allowance for loan losses	3,754,516	3,141,146
Loans receivable, net	\$ 716,883,910	597,038,305

Activity in the allowance for loan losses is summarized as follows:

	Year ended December 31		
	2003	2002	2001
Balance at beginning of year	\$ 3,141,146	2,255,146	1,881,084
Provision for loans losses	613,250	900,000	500,000
Charge-offs		(16,192)	(125,959)
Recoveries	120	2,192	21
Balance at end of year	\$ 3,754,516	3,141,146	2,255,146

Loans receivable in arrears three months or more and on nonaccrual status or in the process of foreclosure are as follows:

	Number of loans	Amount	Percent of gross loans receivable
December 31, 2003	18	\$ 1,884,550	0.26%
December 31, 2002	13	1,076,762	0.18
December 31, 2001	10	2,641,085	0.49

Interest income foregone that would have been recognized on nonaccrual loans if such loans had performed in accordance with their contractual terms was \$82,000, \$198,000, and \$187,000 for the years ended December 31, 2003, 2002, and 2001, respectively.

There were no impaired loans at December 31, 2003 and 2002.

The Savings Bank offers to its employees, officers, and directors adjustable-rate mortgage loans for the purchase or refinance of the individual's owner-occupied primary residence with interest rates which may be up to 1% below the rates offered to the Savings Bank's other customers. All other loans to officers, directors, and to associates of such persons are made in the ordinary course of business, on substantially the same terms, including collateral, as those prevailing at the time for comparable transactions with other customers and do not involve more than a normal risk of collectibility. As of December 31, 2003 and 2002, the outstanding balance on such loans was approximately \$4,544,000 and \$5,274,000, respectively. Loan originations, repayments, and other changes for the year ended December 31, 2003 were \$2,923,000, \$3,216,000, and \$437,000, respectively.

(4) Mortgage-backed Securities and Investment Securities Available-for-Sale

The amortized cost and estimated fair value of mortgage-backed securities and investment securities available-for-sale are summarized as follows:

	December 31, 2003			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
Mortgage-backed securities:				
Federal Home Loan Mortgage Corporation	\$ 3,039,557	16,910	(12,519)	3,043,948
Federal National Mortgage Association	2,081,020	27,116	(343)	2,107,793
Government National Mortgage Association	5,058,235	14,970	(60,445)	5,012,760
	10,178,812	58,996	(73,307)	10,164,501
Investment securities:				
United States Government obligations	36,081,402	277,043	(294,722)	36,063,723
Municipal securities	32,558,305	1,168,679	(76,525)	33,650,459
Corporate bonds	5,038,570	391,641		5,430,211
Equity securities	16,238,300	57,000	(783,485)	15,511,815
	89,916,577	1,894,363	(1,154,732)	90,656,208
	\$ 100,095,389	1,953,359	(1,228,039)	100,820,709

Edgar Filing: EFC BANCORP INC - Form 10-K

	December 31, 2002			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
Mortgage-backed securities:				
Federal Home Loan Mortgage Corporation	\$ 6,717,546	38,837	(22,359)	6,734,024
Federal National Mortgage Association	3,795,954	39,454	(109)	3,835,299
Government National Mortgage Association	4,661,310	39,401	(14,350)	4,686,361
	15,174,810	117,692	(36,818)	15,255,684
Investment securities:				
United States Government obligations	32,110,804	826,668	(95,895)	32,841,577
Municipal securities	34,764,789	905,781	(62,565)	35,608,005
Corporate bonds	8,870,890	156,126	(16,110)	9,010,906
Equity securities	10,247,703	302,910	(29,217)	10,521,396
	85,994,186	2,191,485	(203,787)	87,981,884
	\$ 101,168,996	2,309,177	(240,605)	103,237,568

During the year ended December 31, 2003, sales of investment securities available-for-sale totaled \$15,349,744. These sales resulted in gross gains of \$816,454 for 2003. There were no sales of investment securities available-for-sale for the year ended December 31, 2002. In addition, during the year ended December 31, 2001, sales of investment securities available-for-sale totaled \$4,032,812. These sales resulted in gross gains of \$32,812.

The amortized cost and estimated fair value of investment securities available-for-sale at December 31, 2003 by contractual maturity are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to prepay obligations.

	Amortized cost	Estimated fair value
Due in one year or less	\$ 500,000	500,328
Due after one year through five years	6,113,570	6,555,247
Due after five years through ten years	33,190,105	33,259,918
Due after ten years	33,874,602	34,828,900
Equity securities	16,238,300	15,511,815
	\$ 89,916,577	90,656,208

Edgar Filing: EFC BANCORP INC - Form 10-K

The following table provides the gross unrealized losses and fair value, aggregated by investment category and length of time the individualized securities have been in a continuous unrealized loss position at December 31, 2003:

Description	Less than 12 months		12 months or more		Total	
	Fair value	Unrealized loss	Fair value	Unrealized loss	Fair value	Unrealized loss
U.S. Government obligations	\$ 22,815,577	(294,722)			22,815,577	(294,722)
Municipal securities	1,994,331	(76,525)			1,994,331	(76,525)
Mortgage-backed securities	5,808,842	(46,759)	1,549,108	(26,548)	7,357,950	(73,307)
Subtotal, debt securities	30,618,750	(418,006)	1,549,108	(26,548)	32,167,858	(444,554)
Equity securities	10,697,470	(303,183)	2,457,345	(480,302)	13,154,815	(783,485)
Total temporarily impaired securities	\$ 41,316,220	(721,189)	4,006,453	(506,850)	45,322,673	(1,228,039)

Because the securities identified in the table above are classified as available for sale, and carried at fair value with unrealized losses net of related tax effect recorded in stockholders' equity, any charge to earnings in the future if the securities would be deemed by management to be other than temporarily impaired would not be expected to have a significant impact on stockholders' equity. None of the unrealized losses are related to credit deterioration. The Bank has the ability and intent to hold these securities until market values recover or until maturity date, if applicable. The \$480,000 of unrealized losses on equity securities are primarily on Fannie Mae and Freddie Mac floating rate preferred stock. These unrealized losses are considered temporary impairments due to the interest rate environment in 2003. It is expected that market values will recover in the future as the interest rate on the securities reprices higher as market interest rates increase.

(5) **Accrued Interest Receivable**

Accrued interest receivable is summarized as follows:

	December 31,	
	2003	2002
Loans receivable	\$ 3,184,334	2,793,170
Mortgage-backed securities	52,437	93,871
Investment securities	772,509	1,000,369
	\$ 4,009,280	3,887,410

(6) Office Properties and Equipment

Office properties and equipment at cost is summarized as follows:

	December 31,	
	2003	2002
Land	\$ 5,609,577	5,609,577
Land improvements	584,511	549,891
Office buildings	10,982,472	10,404,662
Leasehold improvements	499,296	492,345
Furniture, fixtures, and equipment	5,927,633	5,253,000
Construction in progress	607,837	
	24,211,326	22,309,475
Less accumulated depreciation and amortization	(6,538,764)	(5,512,790)
	\$ 17,672,562	16,796,685

Depreciation and amortization expense totaled \$1,153,959, \$834,635, and \$738,071 for the years ended December 31, 2003, 2002, and 2001, respectively.

The bank is obligated under non-cancelable leases primarily for office space. Rent expense under these leases for the years ended December 31, 2003, 2002, and 2001, was \$103,000, \$133,000 and \$103,000, respectively. The projected minimum rentals under existing leases as of December 31, 2003 is as follows (in thousands):

	Year ended December 31,
2004	\$ 106
2005	108
2006	109
2007	110
2008	112
2009 and thereafter	293

(7) Real Estate Activity***Real Estate Held for Development***

On June 19, 2002, EFS Service Corporation, a wholly owned subsidiary of the Bank, purchased approximately 16 acres of land located in West Dundee, Illinois. This land is being developed into 29 home-sites for single-family residences. As of December 31, 2003, this investment totaled \$4.2 million and there were two model homes under construction.

Joint Ventures

EFS Service Corporation entered into two 50/50 joint venture agreements in 2003, known as Algonquin 80 LLC and Algonquin 36 LLC. Algonquin 80 LLC is 80 acres of vacant land in Algonquin, Illinois to be sold and subsequently developed into residential properties. The Bank has made a loan to the joint venture in the amount of \$7.4 million at December 31, 2003 primarily for the acquisition of the land. Algonquin 36 LLC consists of 36 acres of vacant land in Algonquin, Illinois. The strategy is for the joint venture to develop the parcel into commercial properties. The Bank has made a loan to the joint venture in the amount of \$8.2 million at December 31, 2003 primarily for the acquisition of the land.

(8) Deposits

Deposit balances are summarized as follows:

	December 31, 2003		Stated or weighted average rate	December 31, 2002		Stated or weighted average rate
	Amount	Percent		Amount	Percent

2008	4.24	19,000	4.78	14,000
2010	5.85	65,000	5.85	65,000
2011	4.66	35,000	4.66	35,000
	4.66%	\$ 204,700	5.27%	\$ 171,700

At December 31, 2003, the Savings Bank had \$15,000,000 in overnight borrowings at a floating interest rate of 1.21%. These borrowings are included in the above table maturing in 2004. In addition, \$5,000,000 of the advances due in 2008 have adjustable interest rates. All other advances have fixed interest rates. At December 31, 2003, \$134,000,000 in advances are callable by the Federal Home Loan Bank of Chicago (FHLB) beginning in 2004.

In addition, at December 31, 2003, the Savings Bank had \$7,000,000 in overnight borrowings at a floating interest rate of 1.27% at LaSalle National Bank.

The Savings Bank adopted a collateral pledge agreement whereby it has agreed to at all times keep on hand, free of all other pledges, liens, and encumbrances, performing first mortgage loans with unpaid principal balances aggregating no less than 167% of the outstanding secured advances from the FHLB. The carrying value of the collateral was approximately \$458,039,000 at December 31, 2003. All stock in the FHLB is also pledged as additional collateral for these advances.

(10) Income Taxes

Edgar Filing: EFC BANCORP INC - Form 10-K

Income tax expense (benefit) for the years ended December 31, 2003, 2002, and 2001 is as follows:

	Year ended December 31		
	2003	2002	2001
Current:			
Federal	\$ 2,520,966	2,727,959	2,071,628
State	689,802	430,787	243,666
	3,210,768	3,158,746	2,315,294
Deferred:			
Federal	410,688	(184,908)	168,966
State	(2,782)	(91,499)	23,551
	407,906	(276,407)	192,517
Total income tax expense	\$ 3,618,674	2,882,339	2,507,811

The actual Federal income tax expense for 2003 and 2002 differs from the expected income tax expense for those periods (computed by applying the statutory U.S. Federal corporate tax rate of 34% to earnings before income taxes) as follows:

	2003	2002	2001
Tax expense based on the statutory U.S. Federal corporate tax rate	\$ 3,644,656	3,070,081	2,428,624
State income taxes, net of federal impact	453,433	269,747	169,537
Tax exempt interest income	(474,343)	(415,202)	(163,688)
Bank owned life insurance	(251,468)	(208,353)	
Goodwill impairment	71,912		
Other, net	174,484	166,066	73,338
	\$ 3,618,674	2,882,339	2,507,811

The tax effects of existing temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31, 2003 and 2002 are as follows:

Edgar Filing: EFC BANCORP INC - Form 10-K

	2003	2002
Deferred tax assets:		
Allowance for loan losses	\$ 1,457,428	1,216,842
Loan fees	353,107	195,948
Charitable contribution carryforward		899,614
Compensation expense	279,207	159,324
Deferred sales income	68,761	
State net operating loss carryforward	151,493	65,728
Gross deferred tax assets	2,309,996	2,537,456
Less valuation allowance		(190,190)
	2,309,996	2,347,266
Deferred tax liabilities:		
FHLB stock dividends	(953,523)	(719,145)
Depreciation	(828,033)	(546,549)
Tax bad debt reserve in excess of base year amount		(145,231)
Unrealized gain or securities available-for-sale	(282,875)	(806,743)
Other, net	(2,306)	(2,301)
Gross deferred tax liabilities	(2,066,737)	(2,219,969)
Net deferred tax asset	\$ 243,259	127,297

Edgar Filing: EFC BANCORP INC - Form 10-K

Retained earnings at December 31, 2003 include approximately \$2,328,000 of tax bad debt reserves for which no provision for Federal or state income tax has been made. If, in the future this amount, or a portion thereof, is used for certain purposes, then a Federal and state tax liability, at the then-current corporate income tax rates, will be imposed on the amounts so used. The state net operating loss carryforwards total approximately \$3,144,000 and will expire starting in 2015. No valuation allowance was required at December 31, 2003 due to the expiration and utilization of the charitable contribution carryforward in 2003.

(11) Employee Benefit Plans

401(k) Plan and Trust

The Savings Bank adopted the Elgin Federal Financial Center 401(k) Employee Benefit Plan and Trust (Plan), effective November 1, 1986, for the exclusive benefit of eligible employees and their beneficiaries. The Plan is a qualified plan covering all employees of the Savings Bank who have completed at least six months of service for the Savings Bank and are age 20 or older. The Plan also provides benefits in the event of death, disability, or other termination of employment. Participants may make contributions to the Plan from 2% to 10% of their earnings, subject to Internal Revenue Service limitations. Matching contributions can be made at the Savings Bank's discretion each plan year. There were no contributions by the Savings Bank during 2003, 2002, and 2001.

Employee Stock Ownership Plan (ESOP)

In conjunction with the Savings Bank's conversion, the Company formed an ESOP. The ESOP covers substantially all employees that are age 21 or over and with at least 1,000 hours of service. The ESOP borrowed \$8,961,298 from the Company and purchased 599,314 common shares issued in the Conversion. The loan has a 15 year term, with an interest rate of 8.50%. The Savings Bank intends to make discretionary contributions to the ESOP sufficient to service the requirements of the loan over a period of 15 years. During the years ended December 31, 2003, 2002, and 2001, 39,954 shares were allocated annually. ESOP expense for the years ended December 31, 2003, 2002, and 2001 totaled \$800,414, \$641,091, and \$468,596, respectively. The fair value of unallocated shares totaled \$8,593,000 and \$7,292,000 at December 31, 2003 and 2002, respectively.

Stock Award Plan (SAP)

The Company has an SAP which may grant up to 4%, or 299,657 shares, of the common stock issued in the Company's initial public offering to eligible directors, officers, and certain key employees of the Company. All shares available under the SAP have been granted. Shares vest as follows: 20% per year for five (5) years of continuous service. Deferred compensation relating to the shares granted under the SAP totaled \$3,333,684, the fair value of the shares on the date of grant, and is being recognized as compensation expense as the participants vest in those shares. For the years ended December 31, 2003, 2002, and 2001, the Company recorded compensation expense of \$718,651, \$752,170, and \$664,503, respectively.

Shares of the Company's common stock were purchased by the SAP in the open market at a weighted average price of \$12.37 per share. The aggregate purchase price of all nonvested shares acquired by the SAP is reflected as a reduction of stockholders' equity as deferred compensation and additional paid-in capital.

Supplemental Executive Retirement Plan (SERP)

In 2002, the board of directors of the Bank adopted a SERP. This plan covers certain executives and directors of the Bank. For the years ended December 31, 2003 and 2002, the Company recorded compensation expense related to the SERP in the amount of \$312,700 and \$411,277, respectively.

(12) Stock Option Plans

In 1998, the Company adopted a stock option plan (the Stock Option Plan) pursuant to which the Company's board of directors may grant stock options to directors, officers, and employees of the Company and the Savings Bank. The number of common shares authorized under the Stock Option Plan is 749,143, equal to 10% of the total number of shares issued in the initial stock offering. A similar second plan, consisting of 254,256 shares, was approved by the stockholders in 2000. Stock options granted under the plans will vest at a rate of 20% per year beginning on the first anniversary date of the respective grant. Exercise prices are equal to the fair value of the common stock at the date of grant. Option terms cannot exceed ten years from the date the grant is awarded.

A summary of the status of the Company's stock option transactions under the plans for the years ended December 31, 2003, 2002, and 2001 is presented below:

Edgar Filing: EFC BANCORP INC - Form 10-K

	2003		2002		2001	
	Shares	Weighted average exercise price	Shares	Weighted average exercise price	Shares	Weighted average exercise price
Outstanding at beginning of year	648,318	\$ 10.99	771,500	\$ 11.01	793,500	\$ 11.01
Forfeitures			(6,000)	11.125	(22,000)	11.125
Granted	67,500	19.33				
Exercised	(124,647)	11.09	(117,182)	11.10		
Outstanding at end of year	591,171	11.93	648,318	10.99	771,500	11.01
Exercisable at end of year	499,271	\$ 11.02	482,018	\$ 11.05	443,300	\$ 11.07

(13) Regulatory Capital Requirements

The Savings Bank is subject to regulatory capital requirements administered by state and federal regulatory agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Savings Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Savings Bank must meet specific capital guidelines that involve quantitative measures of the Savings Bank's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Savings Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure adequacy require the Savings Bank to maintain minimum amounts and ratios as set forth below. Management believes, as of December 31, 2003, that the Savings Bank meets all capital adequacy requirements to which it is subject.

As of December 31, 2003 and 2002, the most recent notification from the Federal Deposit Insurance Corporation categorized the Savings Bank as well capitalized under the regulatory framework for prompt corrective action. At December 31, 2003, there are no conditions or events since the most recent notification that management believes have changed the institution's category.

Edgar Filing: EFC BANCORP INC - Form 10-K

The Savings Bank's actual capital amounts and ratios are as follows:

	Actual		For capital adequacy purposes		To be well capitalized under prompt corrective action	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2003:						
Total capital (to risk weighted assets)	\$ 74,630,000	11.74%	\$ 50,865,000	8.0%	\$ 63,582,000	10.0%
Tier I capital (to risk weighted assets)	73,743,000	11.60	25,433,000	4.0	38,149,000	6.0
Tier I capital (to average assets)	73,743,000	8.27	35,682,000	4.0	44,602,000	5.0
December 31, 2002:						
Total capital (to risk weighted assets)	71,674,000	13.41	42,754,000	8.0	53,442,000	10.0
Tier I capital (to risk weighted assets)	68,532,000	12.82	21,377,000	4.0	32,065,000	6.0
Tier I capital (to average assets)	68,532,000	8.92	30,724,000	4.0	38,405,000	5.0

(14) Concentrations of Credit Risk and Financial Instruments with Off-Balance Sheet Risk

A majority of the Savings Bank's mortgage loans are secured by single-family homes in Kane County. For loans originated, the Savings Bank evaluates each customer's creditworthiness on a case-by-case basis. Management believes the Savings Bank has a diversified loan portfolio and concentration of lending activities that does not result in an acute dependency upon the economic conditions of its lending area. Purchased participation loans are secured by properties primarily in the southern Wisconsin area and to a lesser extent by properties in the Chicagoland area.

The Savings Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. Those financial instruments primarily include commitments to extend credit. Commitments to extend credit are agreements to lend to a customer so long as there is no violation of any condition established in the contract. The Savings Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained is based on management's credit evaluation of the customer. The Savings Bank's exposure to credit loss in the event of nonperformance by the customer is represented by the contractual amount of those financial instruments. The commitments to originate first mortgage loans represent amounts which the Savings Bank plans to fund within a period of 30 to 90 days.

The Savings Bank's approved, but unused lines of credit are based on underwriting standards that generally do not allow total borrowings, including the equity line of credit to exceed 80% of the current appraised value of the customer's residence. However, the Savings Bank offers home equity lines of credit up to 90% of the home's current appraised value at a 1% higher interest rate.

The Savings Bank's standby letters of credit are conditional commitments issued by the Savings Bank to guarantee performance of a customer to a third party. The credit risk involved in these transactions is essentially the same as that involved in extending a loan to a customer in the normal course of business. Standby letters of credit are collateralized by mortgages, savings accounts, or liens on business assets. The fair value of the standby letters of credit approximates the amount of recorded related fees, which are not

considered material. The maximum risk of accounting loss for these items, which is represented by the total commitment outstanding, totaled \$5.4 million at December 31, 2003.

Edgar Filing: EFC BANCORP INC - Form 10-K

At December 31, 2003 and 2002, the Savings Bank had the following commitments:

Edgar Filing: EFC BANCORP INC - Form 10-K

	2003	2002
First mortgage loans	\$ 7,306,000	11,965,000
Construction loans	4,210,000	808,000
Unused lines of credit	42,342,000	32,666,000
Standby letters of credit	5,434,000	4,927,000

Edgar Filing: EFC BANCORP INC - Form 10-K

There are various matters of litigation pending against the Company that have arisen during the normal course of business. Based upon discussions with legal counsel, management believes that the liability, if any, resulting from these matters will not be material to the consolidated financial position or results of operations of the Company.

(15) Fair Value of Financial Instruments

FASB Statement No. 107, *Disclosures About Fair Value of Financial Instruments* (Statement 107), requires the disclosure of estimated fair values of all asset, liability, and off-balance sheet financial instruments. The estimated fair value amounts under Statement No. 107 have been determined as of a specific point in time utilizing various available market information, assumptions, and appropriate valuation methodologies. Accordingly, the estimated fair values presented herein are not necessarily representative of the underlying value of the Company. Rather, the disclosures are limited to reasonable estimates of the fair value of only the Company's financial instruments. The use of assumptions and various valuation techniques, as well as the absence of secondary markets for certain financial instruments, will likely reduce the comparability of fair value disclosures between financial institutions. The Company does not plan to sell most of its assets or settle most of its liabilities at these fair values.

The estimated fair values of the Company's financial instruments are set forth in the following table.

Edgar Filing: EFC BANCORP INC - Form 10-K

	December 31,			
	2003	Fair value	2002	Fair value
	Carrying amount		Carrying amount	
(In thousands)				
Financial assets:				
Cash and cash equivalents	\$ 21,876	21,876	32,844	32,844

Stock in FHLB of Chicago	10,878	10,878	9,362	9,362
Financial liabilities:				
Nonmaturing deposits	\$ 351,618	351,618	314,312	314,312
Deposits with stated maturities	245,146	249,094	209,878	213,923
Borrowed money	211,789	211,979	171,779	173,677
Accrued interest payable	1,218	1,218	1,056	1,056

Edgar Filing: EFC BANCORP INC - Form 10-K

The following methods and assumptions are used by the Company in estimating the fair value amounts for its financial instruments.

Cash and Cash Equivalents

The carrying value of cash and cash equivalents approximates fair value due to the short period of time between origination of the instrument and its expected realization.

Investment Securities, Mortgage-backed Securities, and FHLB Stock

The fair value of investment securities and mortgage-backed securities are estimated using quoted market prices. The fair value of FHLB stock is based on its redemption value.

Loans Receivable

The fair value of loans receivable is based on contractual cash flows adjusted for prepayment assumptions, discounted using the current rate at which similar loans would be made to borrowers with similar credit ratings and remaining terms to maturity.

Accrued Interest Receivable and Payable

The carrying value of accrued interest receivable and payable approximates fair value due to the relatively short period of time between accrual and expected realization.

F-25

Bank Owned Life Insurance

The carrying value of bank owned life insurance approximates its fair value. Bank owned life insurance, for reporting purposes, is reflected at its cash value.

Deposits

The fair value of deposits with no stated maturity, such as commercial checking, passbook savings, NOW, and money market accounts are disclosed as the amount payable on demand.

The fair value of fixed-maturity deposits is the present value of the contractual cash flows discounted using interest rates currently being offered for deposits with similar remaining terms to maturity. If the fair value estimate is less than the amount payable on demand at December 31, the fair value disclosed is the amount payable on demand as per Statement 107.

Borrowed Funds

The fair value of fixed rate FHLB advances is the present value of the contractual cash flows discounted by the current rate offered for similar remaining maturities. For variable rate advances, the carrying value approximates fair value. The carrying value of the overnight borrowings at LaSalle approximate fair value due to the daily repricing.

(16) Condensed Parent Company Only Financial Information

Edgar Filing: EFC BANCORP INC - Form 10-K

Presented below is the condensed balance sheets as of December 31, 2003 and 2002 and statements of income and cash flows for each of the years ended in the three-year period for EFC Bancorp, Inc. These statements should be read in conjunction with the consolidated financial statements and the notes thereto.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the Exchange Act). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (the SEC) (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

PART III

Item 10. Directors and Executive Officers of the Registrant.

The information relating to Directors and Executive Officers of the Registrant is incorporated herein by reference to the Registrants Proxy Statement for the Annual Meeting of Stockholders to be held on April 20, 2004, at pages 7 through 9 and 19.

The Registrant has adopted a Code of Ethics and Business Conduct. See the Exhibits to this Annual Report on Form 10-K.

The following table sets forth certain information regarding the executive officers of the Company and the Bank who are not also directors or Named Executive Officers. Each of the following executive officers has been employed at the Bank for at least five years except where noted. The executive officers are elected annually and hold office until their successors have been elected and qualified or until they are removed or are replaced.
