Notes to Consolidated Financial Statements

(Information with respect to interim periods is unaudited)

NOTE A - BASIS OF PRESENTATION AND MANAGEMENT REPRESENTATION

The accompanying consolidated financial statements include the accounts of Mid-State Bancshares and its wholly owned subsidiary Mid-State Bank & Trust and the Bank's subsidiaries, MSB Properties and Mid-Coast Land Company (collectively the Company, Bank or Mid-State). All significant inter-company transactions have been eliminated in consolidation. These consolidated financial statements should be read in conjunction with the Form 10-K Annual Report for the year ended December 31, 2003 of Mid-State Bancshares. A summary of the Company's significant accounting policies is set forth in the Notes to Consolidated Financial Statements contained therein.

These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States on a basis consistent with the accounting policies reflected in the audited consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2003. They do not, however, include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments including normal recurring accruals considered necessary for a fair presentation have been included. Operating results for the interim periods presented are not necessarily indicative of the results that may be expected for any other interim period or for the year as a whole.

NOTE C RECENT ACCOUNTING PRONOUNCEMENTS

In January of 2003, the FASB issued FIN No. 46, Consolidation of Variable Interest Entities. FIN No. 46 addresses consolidation by business enterprises of variable interest entities, which have one or both of the following characteristics: i) the equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support from other parties, which is provided through other interests that will absorb some or all of the expected losses of the entity; and ii) the equity investors lack an essential characteristic of a controlling financial interest. FIN No. 46 was initially effective for all financial statements issued on or after February 1, 2003, but subsequently the adoption date was deferred to January 1, 2004. The adoption of FIN No. 46 did not have a material impact on the Company's results of operations and financial position.

In April 2003, the FASB issued SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities. SFAS 149 amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. SFAS 149 was effective for contracts entered into or modified after June 30, 2003, and for hedging relationships designated after June 30, 2003. The guidance should be applied prospectively. The adoption of SFAS 149 did not have a material impact on the Company's results of operations and financial position.

The FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity in May of 2003. SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). Many of those instruments were previously classified as equity. SFAS No. 150 was effective for financial instruments entered into or modified after May 31, 2003, and otherwise was effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of SFAS No. 150 did not have a material impact on the Company's results of operations and financial position.

The FASB issued SFAS No. 132 (revised 2003), Employers' Disclosures about Pensions and Postretirement Benefits in December of 2003. SFAS No. 132 requires additional disclosures about the assets, obligations and cash flows of defined benefit pension and postretirement plans, as well as the expense recorded for such plans.

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

As of December 31, 2003, the Company has disclosed the required elements related to its defined benefit pension plan in Note 16 to those consolidated financial statements.

In December 2003, the Accounting Standards Executive Committee (AcSEC) of the American Institute of Certified Public Accountants (AICPA) issued Statement of Position (SOP) 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer. The SOP is effective for loans acquired in fiscal years beginning after December 15, 2004, with early adoption encouraged. The SOP addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an Investor's initial investment in loans or debt securities acquired in a transfer if those differences are attributable, at least in part, to credit quality. The adoption of SOP 03-3 is not expected to have a material impact on the Company's results of operations and financial position.

In June 2004, the Emerging Issues Task Force of the FASB issued final guidance on its Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments. A consensus was reached regarding disclosures about unrealized losses on available-for-sale debt and equity securities accounted for under FASB Statements No. 115, Accounting for Certain Investments in Debt and Equity Securities, and No. 124, Accounting for Certain Investments Held by Not-for-Profit Organizations. The guidance for evaluating whether an investment is other-than-temporarily impaired should be applied in other-than-temporary impairment evaluations made in reporting periods beginning after June 15, 2004. The disclosures are effective in annual financial statements for fiscal years ending after December 15, 2003, for investments accounted for under Statements 115 and 124. For all other investments within the scope of this Issue, the disclosures are effective in annual financial statements for fiscal years ending after June 15, 2004. The additional disclosures for cost method investments are effective for fiscal years ending after June 15, 2004.

The amortization expense for core deposit intangibles is included within other operating expenses on the consolidated statements of income. The projected amortization expense for core deposit intangibles, assuming no further acquisitions or dispositions, is approximately \$1.4 million per year over the next five years.

NOTE E STOCK OPTIONS

At June 30, 2004, the Company had one stock option plan which is described more fully in Note 15 in the Company's 2003 Annual Report on Form 10-K. The Company accounts for stock options using the intrinsic value method under the provisions of Accounting Principles Board (APB) Opinion No. 25 and provides proforma net income and proforma earnings per share disclosures for employee stock option grants as if the fair-value-based method, defined in SFAS No. 123, Accounting for Stock-Based Compensation, had been applied. Had the Company determined compensation cost based on the fair value at the grant date for its stock options under SFAS No. 123, the Company's net income would have been reduced to the pro forma amounts indicated below for the three and six month periods ended June 30:

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

Important Factors Relating to Forward-Looking Statements. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements so long as those statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those projected in such statements. All of the statements contained in this Quarterly Report on Form 10-Q, including those in Items 2 and 3, which are not identified as historical should be considered forward-looking. In connection with certain forward-looking statements contained in this Quarterly Report on Form 10-Q and those that may be made in the future by or on behalf of the Company which are identified as forward-looking, which usually contain the words estimate, project, objective, goal or similar expressions, the Company notes that there are various factors that could cause actual results to differ materially from those set forth in any such forward-looking statements. Such factors include the following: (i) the effect of changing regional and national economic conditions; (ii) significant changes in interest rates and prepayment speeds; (iii) credit risks of commercial, real estate, consumer, and other lending activities; (iv) changes in federal and state banking laws or regulations; (v) competitive pressure in the banking industry; (vi) changes in governmental fiscal or monetary policies; (vii) uncertainty regarding the economic outlook resulting from the continuing war on terrorism, as well as actions taken or to be taken by the U.S. or other governments as a result of further acts or threats of terrorism; (viii) dividend restrictions; (ix) asset/liability pricing risks and liquidity risks; (x) changes in the securities markets; (xi) certain operational risks involving data processing systems or fraud; (xii) the State of California's fiscal difficulties; and (xiii) other external developments which could materially impact the Company's operational and financial performance. Additional information on these and other factors that could affect financial results are included in the Company's Securities and Exchange Commission filings. Accordingly, there can be no assurance that the forward-looking statements contained in this Quarterly Report on Form 10-Q will be realized or that actual results will not be significantly higher or lower. The forward-looking statements have not been audited by, examined by or subjected to agreed-upon procedures by independent accountants, and no third-party has independently verified or reviewed such statements. Readers of this Quarterly Report on Form 10-Q should consider these facts in evaluating the information contained herein. The inclusion of the forward-looking statements contained in this Quarterly Report on Form 10-Q should not be regarded as a representation by the Company or any other person that the forward-looking statements contained in this Quarterly Report on Form 10-Q will be achieved. In light of the foregoing, readers of this Quarterly Report on Form 10-Q are cautioned not to place undue reliance on the forward-looking statements contained herein. The Company disclaims any obligation to update any such factors or to publicly announce the results of any revisions to any of the forward-looking statements contained herein to reflect future events or developments.

Critical Accounting Policies and Estimates This Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as, disclosures included elsewhere in this Form 10-Q, are based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements require Management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosure of contingencies. A summary of the more significant accounting policies of the Company can be found in Footnote One to the financial statements which is included in Item 8 of the Company's Annual Report on Form 10-K and in the Management's Discussion and Analysis included in Item 7 of that same report entitled Critical Accounting Policies and Estimates.

Performance Summary. The Company posted net income of \$9.4 million for the three months ended June 30, 2004 compared to \$8.4 million in the like 2003 period. On a per share basis, diluted earnings per share were \$0.39 in the 2004 period compared to \$0.34 in the same quarter of 2003. The annualized return on assets was the same for both periods at 1.68%. The annualized return on equity was 13.73% for the second quarter of 2004 compared to 12.82% in the second quarter of 2003. The improvement in the return on equity in the face of identical return on assets ratios is attributable to the increased leverage of the Company, primarily due to 1) the payment of half of the acquisition cost of Ojai Valley Bank in cash on October 31, 2003 and 2) the Company's on-going stock repurchase program (see the section on Capital Resources below). The Company's leverage ratio was 9.7% at June 30, 2004 compared to 10.5%

one year earlier reflecting the increased leverage. Positively affecting earnings were: 1) increases in net interest income despite a drop in the net interest margin (owing to volume improvements in earning assets), 2) a benefit to the provision for loan losses because of improved asset quality, and 3) improvements in non-interest income, especially because of gains on sale of Other Real Estate

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

Owned (OREO). These positive affects more than offset the increases experienced in non-interest expense, thereby leading to an increase in earnings commensurate with the growth in assets of the Company across the two quarters.

Comparing results across the two time periods is affected by the Company's acquisition of Ojai Valley Bank, completed on October 31, 2003. Ojai Valley Bank, which was not part of the Company's second quarter 2003 results, earned \$236 thousand in the year ago period. Six months year-to-date in 2003, they earned \$490 thousand. The former Ojai Valley Bank's assets, deposits and certain of its staff members were fully part of the Company throughout the second quarter of 2004.

For the six months year-to-date, the Company posted net income of \$17.0 million compared to \$15.8 million earned in the like 2003 period. Diluted earnings per share were \$0.71 in the first half of 2004 compared to \$0.64 in the like period one year earlier. These earnings represent an annualized return on assets of 1.54% and 1.62%, respectively, for the comparable 2004 and 2003 periods. The annualized return on equity was 12.40% for the first six months of 2004 compared to 12.34% in the first six months of 2003. The slightly improved return on equity in the face of a lower return on assets again reflects the increased leverage of the Company in the first half of 2004 compared to the like 2003 period. The same factors identified above for the improvements in earnings in the second quarter apply to the year-to-date results with the additional benefit of \$373 thousand in securities gains realized during the first quarter of the year. However, the increase in earnings did not quite keep pace with the increase in the size of the Company thereby leading to the modest 8 basis point decline in Return on Assets.

Net Interest Income. The following table delineates the impacts of changes in the volume of earning assets, changes in the volume of interest bearing liabilities, and changes in interest rates on net interest income for the three month periods ended June 30, 2004 and 2003.

Mid-State's year-to-date annualized yield on interest earning assets was 5.29% for the second quarter of 2004 (5.71% on a taxable equivalent basis) compared to 5.84% in the like 2003 period (6.24% on a taxable equivalent basis). The decrease in yield is related to the general decline in interest rates. The Prime Rate, to which many of the Bank's loans are tied, averaged 4.00% in the second quarter of 2004 compared to 4.25% in 2003. Annualized interest expense as a percent of earning assets also decreased from 0.78% in the three months ended June 2003 to

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

0.54% in the comparable 2004 period. Overall, Mid-State's annualized Net Interest Income, expressed as a percent of earning assets, decreased from 5.26% for the three month period of 2003 (5.67% on a taxable equivalent basis) to 4.90% in the comparable 2004 period (5.31% on a taxable equivalent basis). Annualized Net Interest Income as a percent of average total assets declined from 4.76% in the second quarter of 2003 (5.13% taxable equivalent) to 4.42% in the comparable 2004 period (4.79% taxable equivalent). The impact of the decline in net interest margin by itself would have caused net interest income to decline, however, as noted in the table above, the increase in volume of loans and investment securities increased net interest income. The combination of the volume and rate considerations resulted in net interest income increasing across the comparable periods (\$24.6 million in the second quarter of 2004 compared to \$23.6 million in the like 2003 period). The Company is endeavoring to improve its net interest margin (and consequently its return on assets and return on equity) by altering the mix of its earning asset base in favor of more loans and fewer investment securities and lower fed funds sold. The mix did improve modestly across the two quarters with loans averaging 63.8% of earning assets in the 2004 period compared to 62.9% in the 2003 period.

Average earnings assets for the three months ended June 30, 2004 increased \$221.2 million from the like 2003 period (\$2,022.5 million compared to \$1,801.3 million). Approximately \$82.0 million of this increase relates to the acquisition completed October 31, 2003 of Ojai Valley Bank. Average interest bearing deposits in this same time-frame were up \$148.4 million, (\$1,456.6 million compared to \$1,308.2 million) of which approximately \$79.0 million can be traced to that merger.

The following table presents a similar analysis of changes in interest income and expense for the six month period ended June 30, 2004 and 2003.

Mid-State's year-to-date annualized yield on interest earning assets was 5.29% for the first six months of 2004 (5.71% on a taxable equivalent basis) compared to 5.89% in the like 2003 period (6.29% on a taxable equivalent basis). The decrease in yield is related to the general decline in interest rates. The Prime Rate, to which many of the Bank's loans are tied, averaged 4.00% in the first six months of 2004 compared to 4.25% in the like period of 2003. Annualized interest expense as a percent of earning assets also decreased from 0.84% in the first six months of 2003 to 0.57% in the comparable 2004 period.

Overall, Mid-State's annualized Net Interest Income, expressed as a percent of earning assets, decreased from 5.28% for the first six month period of 2003 (5.68% on a taxable equivalent basis) to 4.89% in the comparable 2004 period (5.30% on a taxable equivalent basis). Annualized Net Interest Income as a percent of average total assets (not shown in the table above) declined from 4.78% in the first six months of 2003 (5.14% taxable equivalent) to 4.42% in the comparable 2004 period (4.80% taxable equivalent). As with the quarterly comparison, the impact of the decline in net interest margin by itself would have caused net interest income to decline, however, as noted in the table above, the increase in volume of loans and investment securities increased net interest income. The combination of the volume and rate considerations resulted in net interest income increasing across the comparable periods (\$48.8 million in the first half of 2004 compared to \$46.7 million in the like 2003 period). Average earnings assets for the six months ended June 30, 2004 increased from the like 2003 period (\$2,007.8 million compared to \$1,783.0 million).

Provision and Allowance for Loan Losses. Mid-State took a benefit to the provision for loan losses of \$2.7 million for the six months and three months ended June 30, 2004. This compares to a provision for loan losses of \$150 thousand in the second quarter of 2003 and \$260 thousand for the six month period ended June 30, 2003.

Management believes that the allowances for loan losses and unfunded commitments, which collectively stand at 1.2% of total loans at June 30, 2004, are adequate to cover inherent losses. Management has determined that the combination of the required standard reserve requirement allocated to its non performing loans, and the general loan loss reserve, are sufficient to offset potential losses, if any, arising from less than full recovery of the loans from the supporting collateral. Non performing loans consist of loans on non-accrual and accruing loans 90 days or more past due. The \$15.5 million of collective allowances for credit losses is approximately 131% of the level of non performing loans compared to 120% one year earlier. Non performing loans were \$11.8 million at June 30, 2004 compared to \$16.4 million one year earlier. A combination of loan payoffs and improvements in the underlying credit quality of certain borrowers led to a dramatic drop in internally classified assets during the second quarter.

Non performing loans also dropped in the second quarter, albeit not as dramatically as the decline in internally classified assets, and the totals were further reduced on July 2 with the payoff of a \$1.6 million non accrual loan. The improving trend in non performing loans, continued improvements in the level of internally classified assets, net recoveries from the Company's on-going collection efforts and continuing improvement in local economic conditions have significantly improved the Company's asset quality. These factors led to Management's decision to take the aforementioned \$2.7 million benefit to the provision for loan losses.

The unallocated portion of the allowance for loan losses was reduced from the level of approximately \$6.7 million to approximately \$4.0 million by virtue of the benefit to the provision for loan losses. The major factor driving the reduction was the payoffs of selected problematic borrowers along with the upgrade in credit quality of selected borrowers. The unallocated portion of the allowance which stood at \$4.7 million at the end of June 2003, then fell to \$4.0 million by December 2003, and then started to rise at the very end of the first quarter to \$5.5 million in March 2004. During the first quarter review of the allowance, it was decided not to reduce the allowance as there was continuing uncertainty surrounding the loss potential in two of the Company's problem credits and there was still some uncertainty surrounding general economic conditions. During Management's review of the allowance in June, circumstances had changed dramatically with respect to two significant problem credits with much of the uncertainty of loss lifted. Moreover, further evidence suggested improving trends in the overall economy. Less significantly, but a factor nonetheless, there has also been a very modest change in portfolio mix over the last twelve months with real estate secured loans (excluding Construction and Land Development) now accounting for 62.4% of the portfolio compared to 54.4% one year earlier which carries general reserves in the allowance for loan loss calculation at a lower rate (due to historically lower loss rates) than

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

other categories of loans. This had a minor effect on the size of the unallocated portion of the allowance. Terms offered on most categories of loans have remained substantially similar over this period of time and did not have a bearing on the change in the allowance for loan losses.

Changes in the allowance for loan losses (in thousands) for the periods ended June 30, 2004 and 2003 are as follows:

At June 30, 2004, the recorded investments in loans, which have been identified as impaired totaled \$11,844,000. Of this amount, \$2,118,000 related to loans with no valuation allowance and \$9,725,000 related to loans with a corresponding valuation allowance of \$2,949,000. Impaired loans totaled \$17,504,000 at June 30, 2003. Of this amount, \$2,684,000 related to loans with no valuation allowance and \$14,820,000 related to loans with a corresponding valuation allowance of \$2,366,000. For the quarter ended June 30, 2004, the average recorded investment in impaired loans was \$12,137,000 compared to \$17,545,000 in the 2003 period. A loan is identified as impaired when it is probable that interest and principal will not be collected according to the contractual terms of the loan agreement. Because this definition is very similar to that used by bank regulators to determine on which loans interest should not be accrued, the Bank expects that most impaired loans will be on non-accrual status.

Non-interest Income. Non-interest income for the second quarter of 2004 was \$7.9 million, up modestly from the \$7.5 million earned in the 2003 period. There was an increase in service charges and fees of approximately \$208 thousand over the comparable periods, primarily as a result of the implementation of a new decision plan module for handling non-sufficient fund and overdraft accounts. The slowdown in refinance activity caused the net gain on sale of mortgage loans held for sale to decline to \$229 thousand in the second quarter of 2004 compared to \$987 thousand in the comparable quarter of 2003. Other non interest income rose from \$0.7 million in the second quarter of 2003 to \$1.7 million in the comparable 2004 period. The increase was primarily due to a gain on the sale of other real estate of approximately \$1.1 million.

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

For the six months ended June 30, 2004, non interest income rose slightly, to \$14.9 million from \$14.4 million in the comparable 2003 period. There was an increase in service charges and fees of approximately \$508

thousand over the comparable periods, primarily as a result of the implementation of a new decision plan module for handling nonsufficient fund and overdraft accounts. Pre-tax securities gains increased by \$353 thousand across the comparable periods. The majority of this was due to accepting a tender offer for a \$1.0 million block of corporate bonds held by the Bank resulting in a \$352 thousand gain in the first quarter of 2004. Other non interest income rose from \$1.4 million in the first half of 2003 to \$2.5 million in the comparable 2004 period. The increase was primarily due to a gain on the sale of other real estate of approximately \$1.1 million. Offsetting these increases in non interest income across the comparable six month periods was a decline in the net gain on sale of mortgage loans held for sale of \$1.6 million. This was because of the dramatic slowdown in refinance activity currently being experienced by the mortgage industry. Management fully expects this source of income to be lower in the balance of 2004 as well compared to 2003 levels.

Non-interest Expense. Non-interest expense for the second quarter of 2004 was \$20.9 million. This compares to \$18.0 million in the like 2003 period. This increase was the result of increases in salaries and benefits of approximately \$2.0 million, an increase in occupancy and furniture expense of \$236 thousand and an increase in other operating expenses of \$643 thousand.

The increase in salaries and benefits in the comparable quarters was comprised of \$1.0 million in salary increases and \$1.0 million in benefit cost increases. The amount of increase was influenced by several factors, including: 1) the addition of employees from the acquisition of Ojai Valley Bank resulting in approximately \$283 thousand more salaries and benefits expense, 2) increases in accrual rates for incentive compensation of \$300 thousand, 3) increases in the Company cost of health care coverage for employees of approximately \$164 thousand, 4) increases in workers compensation premiums of approximately \$52 thousand, 5) increases in payroll tax rates for California's Family Leave Act estimated at approximately \$59 thousand, 6) one-time severance costs for terminated employees of approximately \$25 thousand, and 7) regular salary increases representing the majority of the balance of the increase.

The increases in Occupancy expense across the comparable quarters noted above was primarily attributable to increased rental expenses for the new Ojai facilities and partly to increases in maintenance expenses. The increase in other operating expenses is due primarily to an increase in advertising and promotion expense of \$228 thousand across the two quarters and a \$270 thousand increase in professional expense.

Non-interest expense for the first six months of 2004 was \$40.6 million. This compares to \$36.4 million in the comparable 2003 period. This increase was the result of increases in salaries and benefits of approximately \$3.0 million, an increase in occupancy and furniture expense of \$0.6 million and an increase in other operating expenses of \$0.6 million.

The increase in salaries and benefits in the comparable six month periods was comprised of \$1.4 million in salary increases and \$1.6 million in benefit cost increases. As with the quarterly comparison above, the amount of increase was influenced by several factors, including: 1) the addition of employees from the acquisition of Ojai Valley Bank resulting in approximately \$565 thousand more salaries and benefits expense, 2) increases in accrual rates for incentive compensation of \$600 thousand, 3) increases in the Company cost of health care coverage for employees of approximately \$328 thousand, 4) increases in workers compensation premiums of \$105 thousand, 5) increases in payroll tax rates for California's Family Leave Act totaling approximately \$118 thousand, 6) one-time severance costs for terminated employees of approximately \$135 thousand, and 7) regular salary increases representing the majority of the balance of the increase.

The increases in Occupancy expense across the comparable six month periods noted above was primarily attributable to increased rental expenses for the new Ojai facilities and partly to increases in maintenance

expenses. The increase in other operating expenses is due primarily to increases in advertising and promotion expense of \$461 thousand.

Provision for Income Taxes. The year-to-date provision for income taxes was \$8.8 million, which is up slightly from the \$8.6 million in the same period in 2003. For the second quarter of 2004 the provision for income taxes rose \$403 thousand, up from the \$4.6 million in the 2003 period to \$5.0 million. The effective tax rate in 2004 was 34.0% compared to 35.3% in 2003. While the normal combined federal and state statutory tax rate is 42% for Mid-State Bancshares, the tax-exempt income generated by its municipal bond portfolio is the primary reason that the effective rate is lower. Higher levels of tax exempt interest income in 2004 is the primary contributing factor to the slightly lower effective tax rates in 2004 compared to 2003.

Balance Sheet. Total assets at June 30, 2004 totaled \$2.252 billion, up 11.3% from the level one year earlier of \$2.024 billion. This growth was fueled primarily by an increase in deposits of 12.3% to \$1.954 billion, up from \$1.740 billion one year earlier. Part of the growth in deposits (approximately \$79.0 million) was due to the merger with Ojai Valley Bank on October 31, 2003. While Time Deposits under \$100 thousand decreased from \$241.0 million one year earlier to \$236.4 million at period end, the Time Deposits over \$100 thousand increased by \$8.1 million. All other core deposit categories of Demand, NOW, Money Market and Savings increased to \$1.553 billion from \$1.343 billion one year earlier. In an ongoing effort to improve earnings, the Company continues to focus its attention on attracting lower cost core deposits and has consciously chosen not to pay the higher rates on certain more expensive Time Deposits. Loan activity over the last year has increased, with net loans increasing by \$218 million from \$1.084 billion to \$1.302 billion at period-end. Only approximately \$30 million of this growth was due to the merger with Ojai Valley Bank. Loans held for sale (single family, mortgage originations) decreased by \$37.1 million to \$12.8 million from one year earlier, reflecting the slow-down in refinance activity. Stockholders' equity increased by \$9.6 million when comparing June, 2004 over June, 2003 (see below under Capital Resources for a recap of the components of this change).

Mid-State Bank & Trust's loan to deposit ratio of 67.3% at June 30, 2004 is up from the 63.3% ratio one year earlier. There is ample internal liquidity to fund increases in this ratio through liquidation of Mid-State's investment portfolio which is categorized as available for sale.

Investment Securities and Fed Funds Sold. Of the \$674.4 million portfolio at June 30, 2004, 5% is invested in U.S. treasury securities, 38% is invested in U.S. government agency obligations, 56% is invested in municipal and corporate securities and 1% is invested in mortgage-backed securities. Sixty-four percent of all investment securities and fed funds sold combined mature within five years. Approximately 22% of the total portfolio matures in less than one year. The Bank's investment in mortgage-backed securities consist of investments in FNMA and FHLMC pools which have contractual maturities of up to 15 years. The actual time of repayment may be shorter due to prepayments made on the underlying collateral.

A summary of investment securities owned is as follows:

TOTAL	\$ 269,714	\$ (3,874)	\$ 6,947	\$ (259)	\$ 276,661	\$ (4,133)

All of the unrealized losses identified in the table above are primarily attributable to changes in general interest rate levels and are not considered to be other than temporary impairment. The unrealized losses are not the result of any deteriorating financial conditions or near term prospects of the underlying issuers and Management believes that it has the intent and ability to retain these investment securities to allow for the eventual recovery in market value.

Capital Resources. At the start of 2004, there were 872 shares of the Company's common stock remaining for repurchase under the Board of Directors May 2002 stock repurchase program authorization. At its regular Board meeting of January 21, 2004, the Board authorized the repurchase of up to 1,178,352 additional shares. The new authorization does not have an expiration date. There were 157,350 shares repurchased in the second quarter of 2004 at an average price of \$22.48 per share compared to 185,699 shares repurchased in the second quarter of 2003 at an average price of \$19.06 per share. Year-to-date, the Company has repurchased 158,212 shares at an average price of \$22.51 per share compared to 418,289 repurchased in the like 2003 period at an average price of \$17.93 per share. As of June 30, 2004, the Company is continuing the program and can repurchase up to 1,021,012 additional shares under this authorization.

June 30, 2004

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

In other matters concerning capital, the Board of Directors increased its first and second quarter 2004 dividends to \$0.14 per share, or \$0.28 for the six months, representing a 17% increase over the \$0.24 declared in the first half of 2003. The Company paid a dividend of \$0.13 in the second quarter of 2003.

Total stockholders' equity increased from \$262.4 million at June 30, 2003 to \$272.0 million at June 30, 2004. Changes in stockholders' equity over this 12 month period includes activity outlined in the following table (in 000's):

Liquidity. The focus of the Company's liquidity management is to ensure its ability to meet cash requirements. Sources of liquidity include cash, due from bank balances (net of Federal Reserve requirements to maintain reserves against deposit liabilities), fed funds sold, investment securities (net of pledging requirements), loan repayments, deposits and

fed funds borrowing lines. Typical demands on liquidity are deposit run-off from demand deposits and savings accounts, maturing time deposits, which are not renewed, and anticipated funding under credit commitments to customers.

The Bank has adequate liquidity at the present time. Its loan to deposit ratio at June 30, 2004 was 67.3% versus 63.3% one year earlier. The Bank normally strives for a loan to deposit ratio in the 65% to 75% range. The Bank's internally calculated liquidity ratio stands at 37.3% at June 30, 2004, which is above its minimum

policy of 15% and slightly lower than the 42.2% level of June 30, 2003. With the weaker loan demand experienced in recent years coupled with continued strong growth in the Bank's deposit base, the Bank has a stronger liquidity position and lower loan to deposit ratio than it would normally target. Management is not aware of any future capital expenditures or other significant demands or commitments which would severely impair liquidity.

Off Balance Sheet Transactions and Other Related Transactions. Off-balance sheet arrangements are any contractual arrangement to which an unconsolidated entity is a party, under which the Company has: 1) any obligation under a guarantee contract; 2) a retained or contingent interest in assets transferred to an unconsolidated entity or similar arrangement that serves as credit, liquidity or market risk support to that entity for such assets; 3) any obligation under certain derivative instruments; or 4) any obligation under a material variable interest held by the Company in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the Company, or engages in leasing, hedging or research and development services with the Company. In the ordinary course of business, the Company has entered into off-balance sheet financial instruments consisting of commitments to extend credit, commercial letters of credit, and standby letters of credit.

The Company is contingently liable for letter of credit accommodations made to its customers in the ordinary course of business totaling \$29.2 million at June 30, 2004, down from \$35.9 million one year earlier. Additionally, the Company has undisbursed loan commitments, also made in the ordinary course of business, totaling \$565.4 million, which was up from the \$474.8 million outstanding one year earlier. The Company has an allowance for losses-unfunded commitments totaling \$1,570,000 and \$1,812,000 at June 30, 2004 and 2003, respectively, to cover losses inherent in its letter of credit accommodations and undisbursed loan commitments.

There are no Special Purpose Entity (SPE) trusts, corporations, or other legal entities established by Mid-State which reside off-balance sheet. There are no other off-balance sheet items other than the aforementioned items related to letter of credit accommodations and un-disbursed loan commitments.

The Company does make loans and leases to related parties (directors and officers) in the ordinary course of business at prevailing rates and terms. These loans and leases totaled \$5.7 million and \$2.0 million at June 30, 2004 and 2003, respectively.

In the ordinary course of business, the Bank is a party to various operating leases. For a fuller discussion of these financial instruments, refer to Note 6 of the Company's consolidated financial statements contained in Item 8 of Part II of the Company's December 31, 2003 Form 10K.

Item 3 - Quantitative and Qualitative Disclosure About Market Risk

The Bank expects its risk exposure to changes in interest rates to remain manageable and well within acceptable policy ranges. A recent review as of June 30, 2004 of the potential changes in the Bank's net interest income over a 12 month time horizon showed that it could fluctuate under extreme alternative rate scenarios from between +3.0% and -9.3% of the base case (rates unchanged) of \$97.1 million. The Bank's policy is to maintain a structure of assets and liabilities which are such that net interest income will not vary more than plus or minus 15% of the base forecast over the next 12 months. Management expects that its exposure to interest rate risk is manageable and it will continue to strive for an

optimal trade-off between risk and earnings.

The following table presents a summary of the Bank's net interest income forecasted for the coming 12 months under alternative interest rate scenarios.

Edgar Filing: MID-STATE BANCSHARES - Form 10-Q

	Change From Base
Rates Down Very Significant (Prime down to 2.00% over 6 months)	-9.3%
Rates Down Significant (Prime down to 3.00% over 7 months)	-3.0%
Rates Down Modestly (Prime down to 3.25% over 7 months)	-2.0%
Base Case - Rates Unchanged (Prime unchanged at 4.00% over 12 months)	
Rates Up Modestly (Prime up to 5.00% over 10 months)	+0.9%
Rates Up Aggressive (Prime up to 6.00% over 10 months)	+1.8%
Rates Up Very Aggressive (Prime up to 7.00% over 10 months)	+3.0%

Net interest income under the above scenarios is influenced by the characteristics of the Bank's assets and liabilities. In the case of N.O.W., savings and money market deposits (total \$1.055 billion) interest is based on rates set at the discretion of management ranging from 0.05% to 0.75%. In a downward rate environment, there is a limit to how far these deposit instruments can be re-priced and this behavior is similar to that of fixed rate instruments. In an upward rate environment, the magnitude and timing of changes in rates on these deposits is assumed to be more reflective of variable rate instruments.

It is important to note that the above table is a summary of several forecasts and actual results may vary. The forecasts are based on estimates and assumptions of management that may turn out to be different and may change over time. Factors affecting these estimates and assumptions include, but are not limited to - competitors' behavior, economic conditions both locally and nationally, actions taken by the Federal Reserve Board, customer behavior, and management's responses. Changes that vary significantly from the assumptions and estimates may have significant effects on the Bank's net interest income. Therefore the results of this analysis should not be relied upon as indicative of actual future results. Historically, the Bank has been able to manage its Net Interest Income in a fairly narrow range reflecting the Bank's relative insensitivity to interest rate changes. The impact of prepayment behavior on mortgages, real estate loans, mortgage backed securities, securities with call features, etc. is not considered material to the sensitivity analysis. Over the last 5 calendar years (1999 - 2003), the Bank's net interest margin (which is net interest income divided by average earning assets of the Bank) had ranged from a low of 5.14% to a high of 6.44% (not taxable equivalent). The Bank's net interest margin in 2003 of 5.14% was at the low end of this range by historical standards, coming off the higher levels experienced in 2000 of 6.44%. In the first half of 2004, the net interest margin fell further to 4.89% and for the second quarter the net interest margin was 4.90%. This is a result of both the lower level of interest rates and the change in mix of earning assets (the Bank now has a smaller portion in loans vis-à-vis investment securities compared to 2000 when the margin was at its widest level). The net interest margin under the forecasted alternative scenarios ranges from 4.25% to 4.82%. Management believes this range of scenarios, while lower than historical standards, is consistent with current experience and interest rate levels, but no assurances can be given that actual future experience will fall within this range.

The Bank's exposure with respect to interest rate derivatives, exchange rate fluctuations, and/or commodity price movements is nil. The Bank does not own any instruments within these markets.

Item 4 Controls and Procedures

As of the end of the period covered by this report, Management, including the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures with respect to the information generated for use in this Quarterly Report. The evaluation was based in part upon reports and affidavits provided by a number of executives. Based upon, and as of the date of that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective to provide reasonable assurances that information required to be disclosed in the reports the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within time periods specified in the SEC's rules and forms.

There was no change in the Company's internal controls over financial reporting during the quarter ended June 30, 2004 that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

In designing and evaluating disclosure controls and procedures, the Company's Management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable, not absolute, assurances of achieving the desired control objectives and Management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

PART II - OTHER INFORMATION
