**Item 1.01. Entry into a Material Definitive Agreement**

Prior to the opening of the Nasdaq National Market on November 16, 2005, the Compensation Committee of our Board of Directors approved the accelerated vesting of all unvested and out-of-the-money non-qualified and incentive stock options previously awarded to current employees, including officers, during the period beginning on February 23, 2004 and ending on March 8, 2005 (the Acceleration Period) under our 2004 Long-Term Incentive Plan. Options awarded to our non-employee directors under our 1993 Nonemployee Director Stock Option Plan are excluded from the vesting acceleration. In order to prevent unintended personal benefits to our senior officers, as a condition to the acceleration of their options, our senior officers at the level of Senior Vice President and above must agree to the imposition of restrictions on the sale of any shares received through the exercise of accelerated options. In general, these restrictions will prevent the sale of any shares received from the exercise of an accelerated option until the original vesting date of the option pursuant to the terms of the respective award agreements.

The exercise prices for options granted during the Acceleration Period ranged from \$19.13 to \$30.22, with a weighted average exercise price of \$22.77. The accelerated options represent approximately 27.5 percent of the total of all of our outstanding options.

Under the recently revised Financial Accounting Standards Statement No. 123, Share-Based Payment (SFAS 123(R)), we will be required to recognize the expense associated with our outstanding unvested stock options beginning in the first quarter of fiscal year 2006. As a result of the acceleration, we expect to reduce the stock option expense we otherwise would be required to record in connection with the accelerated options by approximately \$15.1 million over the original option vesting period.

The decision to accelerate the vesting of these options, which our Compensation Committee believes is in the best interest of Fossil, Inc., our stockholders and employees, was made primarily to reduce non-cash compensation expense that would have been recorded in our income statement in future periods upon the adoption of SFAS 123(R) beginning in January 2006. In addition, because these options have exercise prices in excess of current market values, they are not fully achieving their original objectives of incentive compensation and employee retention.

Certain statements contained herein that are not historical facts, including, but not limited to, statements regarding our expected results of operations, constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and involve a number of risks and uncertainties. The actual results of the future events described in such forward-looking statements could differ materially from those stated in such forward-looking statements. Among the factors that could cause actual results to differ materially are: general economic conditions, competition, acts of terrorism or acts of war, government regulation, changes in foreign currency valuations in relation to the United States Dollar and possible future litigation, as well as the risks and uncertainties set forth in the Company's Current Report on Form 8-K dated September 14, 2004 and the Company's Form 10-K and Form 10-Q reports filed with the Securities and Exchange Commission.

**SIGNATURES**
