**Management comments**

Commenting on the Q2 2006 performance, **Mr. Narendra K Patni, Chairman and CEO, Patni Computer Systems Ltd.**, said, *Our Q2 performance underscores Patni's ability to deliver sustained growth by leveraging the advantages of its highly scalable business model. We have delivered revenue growth significantly ahead of our guidance and internal estimates. Margins have been impacted by the annual salary revisions and the re-assessment of our obligations for taxes pertaining to prior years by IRS and a review by Department of Labor. Net income after adjusting for these additional provisions is at US\$ 16.7 million ahead of our guidance. Net income for Q2 includes operational efficiency benefits in line with our expectations.*

*Moving into Q3, we expect revenue growth of 4.5% to 5% and net income in the range of US\$ 18 to 18.2 million excluding forex variations and considering a constant dollar value of Rs.45.48 per US\$.*

*Overall, we remain very confident about our business momentum and continue to further expand the focus on driving internal efficiencies for delivering margin expansion.*

Commenting on the performance, **Mr. Mrinal Sattawala, Chief Operating Officer, Patni**, said, *Patni has delivered close to double digit growth during the quarter through revenue expansion across a diverse segment of its clients, across its focus vertical and technology segments and in most regions globally. This has resulted in further diversification of our revenue streams, a key focus area for us. During Q2, we have made several initiatives, some organic and others in conjunction with our partners, that are expected to accelerate our future growth prospects. Global outsourcers increasingly recognize our strengths in delivering highly robust IT services from a multi-location delivery platform and we expect to leverage this advantage to generate continuing expansion in our operations.*

Speaking on the occasion, **Mr. Deepak Sogani, Chief Financial Officer, Patni**, added, *In Q2 2006, Patni showed strong revenue growth driven by volume expansion. Annual planned salary revisions implemented across our global operations and the seasonal increase in legal immigration expenses led to a reduction in operating margins. We saw improvements in our operations resulting in better realized prices and higher utilization levels. SG&A also declined as a percentage of revenues and excluding salary revisions saw an absolute reduction of US\$ 0.8 million in Q2 2006. We have managed our cost base more efficiently during the quarter and expect to derive further upsides from operating efficiencies in the future. These would supplement the benefits derived from topline growth.*
