VODAFONE AND AFRIMAX GROUP ANNOUNCE FRAMEWORK AGREEMENT IN SUB-SAHARAN AFRICA

· Vodafone signs new Partner Market agreement with Afrimax in Uganda

Vodafone and Afrimax Group (Afrimax) - a 4G LTE telecommunications operator in sub-Saharan Africa - today jointly announced a strategic framework agreement to cooperate and explore opportunities for Partner Market agreements in the region. Also today, Vodafone has announced a Partner Market agreement in Uganda with Afrimax.

Under the non-equity framework agreement, Vodafone and Afrimax will explore potential Partner Market opportunities in a variety of territories in sub-Saharan Africa.

Under the Partner Market agreement in Uganda, the two companies will offer customers voice and data products and services using the Vodafone Uganda brand. Vodafone s multinational corporate customers will benefit from the addition of Uganda to their existing contracts for international managed services.

Vodafone Partner Markets Chief Executive Stefano Gastaut said: Uganda is an attractive market and we are delighted to welcome Afrimax to our successful Partner Markets community, which already operates in more than fifty countries. We look forward to exploring the potential for further Partner Market agreements in sub-Saharan Africa with Afrimax, under our framework cooperation agreement.

Afrimax management Peter Langkilde, CEO and Rob Philpott, CFO commented: We are excited about the partnership with Vodafone and the opportunity to work with a brand that is not only passionate about technology, but passionate about people and the impact that technology can have on peoples lives. The partnership with Vodafone solidifies our ongoing plans to be a leading provider of high speed network services in sub-Saharan Africa.

The framework agreement will complement Vodacom Group's operations in South Africa, Tanzania, the Democratic Republic of Congo, Lesotho and Mozambique and has been agreed in conjunction with Vodacom Group.

Vodafone Group Plc (the Company)

In accordance with Disclosure and Transparency Rule 3.1.4R(1), the Company gives notice of the following changes in share interests of directors, persons discharging managerial responsibilities (PDMRs) of the Company or their connected persons:

	Number of ordinary shares of US\$0.2020/21 in the capital of Vodafone Group Plc		
	A	B	C
	Vesting of long term incentive awards ⁽¹⁾	No. of vested shares sold ⁽²⁾	No. of shares transferred ⁽³⁾
Serpil Timuray	18,361	6,612	11,749

(1) This share award, which was granted on 16 November 2011, has vested. The award was granted in accordance with the rules of the Vodafone Global Incentive Plan. The award was based on the adjusted free cash flow for the three year period ended on 31 March 2014 and following assessment of the performance and employment conditions, 37.2% of the shares comprised in this award vested.

(2) The figure in column B is the number of shares of those listed in column A that the Company has been advised by UBS Corporate Employee Financial Services International (UBS CEFS) were sold on behalf of the PDMR on 17 November 2014, inter alia, to satisfy the tax liabilities arising on the vesting of the awards. These share sales were made at 226.7034 pence per share.

(3) The figure in column C is the number of shares that the Company has been advised by UBS CEFS were on 17 November 2014 transferred to the PDMR in satisfaction of the vesting of the awards disclosed in column A, after deduction of shares sold as disclosed in column B.

The Company was notified of this change on 18 November 2014.

European youth divided on appeal of entrepreneurship

- Comprehensive Vodafone Institute survey among 6,000 young adults in six European countries
- Three-quarters of German 18 to 30-year-olds not interested in setting up digital business or working for ICT start-up, while Spanish and Italians want to become digital entrepreneurs
- Eighty per cent of Spanish and Italians keen to start own businesses, while only half of Germans considering entrepreneurship
- Italian 18 to 30-year-olds surveyed pessimistic about their futures, Dutch and Germans most optimistic

Three-quarters of 18 to 30-year-olds in Germany have no interest in working for a digital start-up or setting up their own businesses in the ICT sector. However, Spanish and Italian young people have a far greater appetite to become digital entrepreneurs.

When asked if they would like to set up their own business in any sector, 80 per cent of young Italians and 78 per cent of Spanish interviewed said they would want to. This number was much lower in Germany (53 per cent) and in the UK (58 per cent).

The Vodafone Institute for Society and Communications in Germany commissioned YouGov to conduct a survey* among 6,000 young adults in six European countries, including Germany, the UK, Italy, the Netherlands, Spain and the Czech Republic, asking for their views on the labour market, education and digitisation. The research was undertaken in advance of Vodafone's Digitising Europe event in Berlin on 4 December, 2014 at which German Chancellor Angela Merkel will be a keynote speaker.

Spanish want to become digital entrepreneurs, Germans less keen

The majority of young people surveyed in Germany cannot imagine working for a digital start-up (70 per cent) or setting up their own business in the ICT sector (77 per cent). In contrast, in Spain and Italy there is a far higher level of digital career affinity. Sixty-one per cent of Spanish young adults surveyed would be interested in joining a start-up in the ICT sector, while 52 per cent said they would consider setting up their own digital businesses. Fifty-five per cent of Italians interviewed for the research said they would like to join a start-up in the ICT sector. A clear motivation for the Italians, Spanish and Czechs is the harsh job market.

Thirty-nine per cent of respondents in the UK and 33 per cent in Germany said they are definitely not willing to work in the ICT sector, while only eight per cent of respondents in Spain and 11 per cent in Italy said they definitely did not want careers in ICT.

Young Italians and Spanish pessimistic about their futures

The study found that the Dutch and Germans are optimistic about their futures, while Italians and Spanish surveyed for the research are more pessimistic. Only 23 per cent of Italians interviewed said they expect to have a better life than their parents' generation, and this figure was slightly higher in Spain (29 per cent). However, German respondents were more optimistic, with 43 per cent saying they expect to have a better life than their parents. When asked about how optimistic they feel about their futures, the Dutch were most optimistic, with 71 per cent expressing optimism, while the Italians were most pessimistic, with only 41 per cent optimistic. The Germans were also more positive, with 66 per cent expressing optimism.

Italians and Spanish think they will need to move abroad to secure work

Many Italian respondents agreed that job opportunities are better in other countries and 61 per cent interviewed said they plan to move to another country for work. Attitudes towards going abroad appear to be affected by the economic situation in Spain as well, with 58 per cent of Spanish respondents saying they plan to move abroad because of job opportunities. However, in Germany, just 27 per cent said they would choose to move abroad for work.

Italians worried about their country's competitiveness

The young adults' assessment of their country's competitiveness varied considerably from nation to nation. In Italy, 60 per cent of 18 to 30-year-olds surveyed are concerned about their country's competitiveness and potential future job losses as a result of digitisation. In Spain, 49 per cent are concerned. However, a much lower number of respondents expressed these concerns in the Netherlands (40 per cent), the UK (31 per cent), the Czech Republic (36 per cent) and Germany (35 per cent).

Young Britons see benefits of digitisation

The research demonstrates that the UK has the highest percentage of young adults (86 per cent) who said that the benefits of digitisation far outweigh the disadvantages. Seventy-two per cent of respondents in Spain, 70 per cent in Italy and 73 per cent in the Czech Republic share this opinion. Young people who were surveyed in Germany and the Netherlands are less positive, with 69 per cent of them believing there

are more benefits than risks associated with digitisation.

Closer collaboration needed between companies, schools and universities

The study also addressed the digital skills gap in the European workforce. Young Europeans surveyed suggested closer collaboration between companies, schools and universities. There was no consensus among the young adults in the surveyed countries on which institution should have overall responsibility for digital education. Half of British respondents thought that the general education system should be responsible (49 per cent). Twenty-six per cent of Germans thought that responsibility should be placed in the hands of the

corporate sector, while just three per cent of UK respondents thought that companies should take the lead in digital skills training.

Other speakers at the Digitising Europe event on 4 December, 2014 include Vodafone Group Chief Executive Vittorio Colao and Intel President Renée James. Information on the programme and speakers can be found at www.digitising-europe.eu The event is a collaboration between the Vodafone Institute in Germany and the Vodafone Foundation, Vodafone's philanthropic arm.

Vodafone Group Foundation Director Andrew Dunnett said: Europe faces two simultaneous and very serious challenges: chronic youth unemployment and a rapidly expanding skills gap arising from the digitisation of the workplace. The diverse responses to the survey among young people show the importance of placing the digital economy at the top of the agenda and focusing on the importance of technology in driving education and employment opportunities of the future.
