Services revenues amounted to \$24,968 (+21.4% vs. 9M14) and represented 87.3% of consolidated revenues (vs. 85.1% in 9M14). Equipment revenues slightly increased amounting to \$3,622 and represented 12.7% of consolidated revenues (vs. 14.9% in 9M14).

#### **Fixed Services**

During 9M15, services revenues generated by this segment amounted to \$7,676 (+\$1,478 or 23.8% vs. 9M14), where Internet revenues have grown the most (+\$928 or +39.6% vs. 9M14), followed by voice retail services (+\$270 or +12.8% vs. 9M14) and data transmission services (+\$227 or +21.4% vs. 9M14).

#### Ø <u>Voice</u>

Voice retail revenues reached \$2,379 in 9M15 (+12.8% vs. 9M14). These revenues are still affected by tariffs of regulated services. Revenues from regulated services reached approximately 26% of the segment services revenues in 9M15 (vs. 29% in 9M14).

Monthly Charges and Supplementary Services increased \$97 or +10.8% vs. 9M14, reaching \$992, as a consequence of an increase in supplementary services (not regulated), mainly due to an increase of their prices and, to a lesser extent, to the increase in the subscriber base. It also includes higher monthly charges to commercial, professional and government customers amounting to \$49.

Revenues generated by measured services (Local Measured Service, Domestic Long Distance and International Long Distance services) amounted to \$1,315 (+\$184 or 16.3% vs. 9M14). The increase was mainly due to the increase in plans prices (both in local and long national distance), while customers remain stable. According to this, local measured service revenues increased 24.5% vs. 9M14 and DLD revenues increased 11.4% vs. 9M14. The Average Monthly Revenue per User ( ARBU ) amounted to \$64.8 pesos per month in 9M15 vs. \$56.5 pesos per month amounted in 9M14, representing an increase of 14.8%. The remaining retail voice revenues amounted to \$72 in 9M15 (-13.3% vs. 9M14). The decrease was mainly due to a decrease in customers and consumption of public telecommunication services and a decrease in customers rehabilitation charges.

Voice wholesale revenues (including fixed and mobile interconnection revenues and lease of circuits, together with the revenues generated by the subsidiary Telecom USA amounting to \$105) amounted to \$734 in 9M15 (+7.8% vs. 9M14). Interconnection fixed and mobile revenues amounted to \$484 and the other wholesale revenues amounted to \$250 in 9M15 (+9.6% vs. 9M14), mainly due to higher prices related to cell sites rentals due to the variation of the \$/US\$ exchange rate.

#### Ø Data

Data revenues (including the revenues generated by the subsidiary Telecom USA amounted to \$4) amounted to \$1,290 (+\$227 or +21.4% vs. 9M14). These revenues were generated focusing on the Company s position as an integrated TIC provider (Datacenter, VPN, among others) for wholesale and government segments. The increase was primarily due to higher prices of these services related to the variation of the \$/US\$ exchange rate and to the increase in the number of customers of *Innovation* services (particularly *Integra*, which increased \$15 or +7.1% vs. 9M14).

#### Ø Internet

Internet revenues amounted to \$3,273 (+\$928 or +39.6% vs. 9M14) mainly due to the expansion of the Broadband customers (+3.1% vs. 9M14) and an increase in average prices resulting in an improvement in the Average Monthly Revenue per User ( ARPU ), that amounted to \$199pessos per month in 9M15 vs. \$148.1 pessos per month in 9M14 (+34.6% vs. 9M14). As of September 30, 2015, Telecom Argentina reached approximately 1,804,000 ADSL customers. These connections represent approximately 44.5% of Telecom Argentina s fixed lines in service (vs. 42.6% in 9M14). The churn rate per month amounted td .4% in 9M15 (vs. 1.3% in 9M14).

Internet revenues represent 13.1% of consolidated services revenues (vs. 11.4% in 9M14) and 42.6% of Fixed Services segment services revenues (vs. 37.8% in 9M14).

#### Personal Mobile Services

During 9M15, total services revenues amounted to \$16,163 (+\$2,891 or 21.8% vs. 9M14), being the principal business segment in revenues terms (64.7% and 64.5% of services consolidated revenues in 9M15 and 9M14, respectively). Personal reached 19.4 million subscribers in Argentina (-1.6% vs. 9M14). Approximately 68% of the subscriber base is prepaid subscribers and 32% is postpaid subscribers (including Cuentas claras plans and Mobile Internet dongles). The churn rate per month amounted to 3.1% in 9M15 (vs. 3.0% in 9M14).

#### Ø <u>Voice</u>

Voice retail revenues amounted to \$5,109 in 9M15 (+33.4% vs. 9M14). The increase was mainly due to the increase in monthly charges prices for the postpaid and Cuentas claras subscribers and prepaid services, offset by the net variation of the subscribers base, showing an increase in Cuentas claras subscribers base (+4.5% vs. 9M14) and a decrease in postpaid subscribers base (-6.4% vs. 9M14) and prepaid subscribers base (-2.1% vs. 9M14).

Voice wholesale revenues amounted to \$1,395 in 9M15 (-4.2% vs. 9M14), mainly due to the decrease in interconnection traffic volume (especially TLRD and CPP).

#### Ø Data

Mobile data services revenues amounted to \$5,376 (-\$316 or -5.6% vs. 9M14). The decrease was due to lower revenues from the principal item of VAS revenues, SMS consumption, which decreased \$491 as compared to 9M14 (-14.3%), showing a decrease in TOU (-44.6% vs. 9M14) and an increase in such services prices for Cuentas claras and postpaid subscribers. Notwithstanding, this effect was partially offset with a constant increase of the SMS with content sales, as a result of several campaigns launched by Personal, which represented an inter-annual increase of \$189 or +9%.

#### Ø Internet

Mobile Internet revenues amounted to \$4,283 (+\$1,989 or +86.7% vs. 9M14). This increase is mainly explained by the increase in browsing services consumption of Personal s subscribers, which was mainly fueled by the increase in the offer of services, plans and packs (including VAS) launched by Personal. This growth was fueled by new subscribers, the migration of the existing ones to higher-value plans and the increase of subscribers that acquired 3G handsets, which facilitate Internet browsing in all subscribers segments. Internet flat rate services revenues have decreased mainly due to the decrease of Mobile Internet dongles subscribers (-37.7% vs.9M14).

As a consequence of the increase in monthly charges tariffs and Internet consumption, ARPU increased to \$88.8 pesos per month in 9M15 (vs. \$71.7pesos per month in 9M14), which represents an increase of 23.8%.

VAS revenues (data and Internet) amounted to \$9,659 (+20.9% vs. 9M14) and represented 59.8% of Personal Mobile Services revenues (vs. 60.2% in 9M14).

#### Núcleo Mobile Services

This segment generated services revenues equivalent to \$1,129 during 9M15 (+\$31 or 2.8% vs. 9M14) mainly due to the Internet revenues increase (+20.9% vs. 9M14), mainly related to the increase of browsing generated by subscribers with mobile equipment prepared for that purpose. As of September 30, 2015, Núcleo s subscriber base reached 2.5 million customers. Prepaid and postpaid subscribers (including Plan Control subscribers and mobile Internet subscribers) represented 80% and 20% in 9M15, respectively.

VAS revenues (data and Internet) amounted to \$608 (+6.9% vs. 9M14) and represented 53.9% of Núcleo Mobile Services segment services revenues (vs. 51.8% in 9M14).

#### **Equipment**

Revenues from equipment amounted to \$3,622, +\$7 or +0.2% vs. 9M14. The Personal Mobile Services segment shows a decrease of \$47 vs. 9M14 due to lower handsets sold (-35% vs. 9M14) but with an increase in handset s average sale prices (+52% vs. 9M14), resulting in a higher operating margin of handsets (+\$350 or +67.8% vs. 9M14). Núcleo Mobile Services segment reached an increase of \$50 (+89.3% vs. 9M14) due to higher sales of handsets (+72% vs. 9M14) but with a decrease in handset s average sale prices (-16% vs. 9M14).

### Operating costs

Consolidated operating costs including depreciations, amortizations and gain on disposal of PP&E and impairment of PP&E totaled \$24,146 in 9M15, which represents an increase of \$3,766 or +18.5% vs. 9M14. The increase in costs is mainly a consequence of a higher revenues, higher expenses related to competition in mobile and Internet businesses, higher direct and indirect labor costs on the cost structure of the Telecom Group in Argentina, the increase in fees for services related to higher supplier prices, the increase in taxes and fees with the Regulatory Authority, the increase of VAS costs, the increase in bad debt expenses, higher provisions costs, higher agent commissions and higher depreciation and amortization of PP&E and intangible assets, which were partially offset by lower costs of equipment and handsets of \$345.

The costs breakdown is as follows:

#### Employee benefit expenses and severance payments

Employee benefit expenses and severance payments amounted to \$5,292 (+\$1,290 or +32.2% vs. 9M14). The increase was mainly due to increases in salaries agreed by Telecom Argentina with several trade unions for the unionized employees and also to non-unionized employees, together with related social security charges. With a total headcount of 16,269 by the end of 9M15 (vs. 16,540 employees in 9M14), lines in service per employee reached 373 in the Fixed Services segment (+0.8% vs. 9M14), subscribers per employee reached 3,884 in the Personal Mobile Services segment (-1.3% vs. 9M14) and subscribers per employee reached 6,186 (+6.3% vs. 9M14) in the Núcleo Mobile Services segment.

Employee benefit expenses and severance payments represents in 9M15 18.5% of consolidated revenues (vs. 16.5% in 9M14).

#### **TELECOM ARGENTINA S.A.**

#### Interconnection costs and other telecommunication charges

Interconnection costs and other telecommunication charges (including charges for TLRD, Roaming, Interconnection costs, cost of international outbound calls and lease of circuits) amounted to \$1,559 (+\$23 or +1.5% vs. 9M14). The increase was mainly due to higher TLRD costs offset by lower traffic volume in roaming vs. 9M14.

#### Fees for services, maintenance, materials and supplies

Fees for services, maintenance, materials and supplies amounted to \$ 2,860, +\$378 or +15.2% vs. 9M14. The increase was mainly due to higher maintenance costs of radio bases and buildings in the mobile services segments, as a result of the variation in the \$/US\$ exchange rate, an increase in technical assistance cost of radio bases, higher costs of building maintenance, higher costs of sites location and storage costs. There were also increases in other maintenance costs and fees for services, mainly due to higher costs recognized to suppliers in all segments.

#### Taxes and fees with the Regulatory Authority

Taxes and fees with the Regulatory Authority (including turnover tax, fees with the Regulatory Authority, IDC, municipal and other taxes) amounted to \$2,841 (+18.4% vs. 9M14), influenced mainly by the increase in revenues of fixed and mobile services and by the increase of the IDC related to higher collections and payments to suppliers in 9M15 vs. 9M14.

#### **Commissions**

Commissions (including Agent, distribution of prepaid cards and other commissions) amounted to \$2,976 (+\$555 or +22.9% vs. 9M14). The increase was mainly due to the increase in Agents—commissions (associated to higher revenues) as a result of higher customer—s acquisition and retention costs recognized to them and the increase of outsourced sales commissions and collection commissions related to higher cash flows as compared to 9M14.

On the other hand, agent commissions capitalized as SAC amounted to \$781, +\$147 or +23.2% vs.9M14, and it is directly related to the increase in the Cuentas claras subscribers base in the Personal Mobile Services segment and the increase in the commissions prices.

#### Cost of equipment and handsets

Cost of equipments and handsets amounted to \$2,857 (-\$345 or -10.8% vs. 9M14) mainly due to a decrease in the units of handsets sold (-35% vs. 9M14), partially offset by an increase in the average unit cost of sales (+32% vs. 9M14) in the Personal Mobile Services segment.

On the other hand, SAC deferred costs from handsets sold amounted to \$66, -\$17 or -20.5% vs. 9M14. The lower capitalized amount was mainly due to the significant reduction of subsidies provided to customers in the Personal Mobile Services segment, especially in the postpaid segment.

#### Advertising

Advertising amounted to \$591 (+\$79 or +15.4% vs. 9M14), mainly due to higher commercial campaigns of Personal related to the launching of the 4G services throughout the country as compared to 9M14, especially those related to the new slogan *Hagamos que todo suceda* ( *Let s make it all happen* ).

#### Cost of VAS

Cost of VAS amounted to \$910 (+\$231 or +34.0% vs. 9M14). The increase was mainly due to the increase of VAS sales in the Personal Mobile Services segment, especially the SMS with content service, which grew as a consequence of several campaigns launched by Personal. Cost of VAS over its related revenues increased from 30% in 9M14 to 36% in 9M15.

#### **Provisions**

Provisions amounted to \$174, +\$72 or +70.6% vs. 9M14. The increase was mainly due to higher labor claims (+\$32 vs. 9M14), higher civil and commercial claims (+\$34 vs. 9M14) and higher regulatory and municipal contingencies (+\$6 vs. 9M14).

OPERATING AND FINANCIAL REVIEW AND PROSPECTS AS OF SEPTEMBER 30, 2015

#### **TELECOM ARGENTINA S.A.**

#### Bad debt expenses

Bad debt expenses amounted to \$410 (+\$83 or +25.4% vs. 9M14), representing approximately 1.4% of the consolidated revenues in 9M15 and 9M14. The major increase is observed in the Personal Mobile Services segment as a consequence of higher aging of the accounts receivables and higher incidence of handsets sales directly financed by Personal to its postpaid and Cuentas claras subscribers. The mentioned increase was partially offset by a \$19 decrease of these expenses in the Government and Corporate segment in Telecom Argentina in 9M15 as a consequence of the collections from some governmental entities.

#### Other operating costs

Other operating costs amounted to \$1,318 (+\$226 or +20.7% vs. 9M14). The increase was mainly due to higher prices on related services, especially in transportation, freight and travel expenses (+\$122 or +30.4% vs. 9M14), among others, in the operations in Argentina; the increase of rent prices (+\$89 or +29.8% vs. 9M14), as a result of new agreements and the renegotiation of some of the existing ones and the increase of the consumption of electricity (+\$38 or +18.0% vs. 9M14).

#### Operating income before depreciation and amortization

Operating income before depreciation and amortization amounted to \$7,664 (+\$1,478 or 23.9% vs. 9M14), representing 26.8% of consolidated revenues in 9M15 (vs. 25.6% in 9M14). This growth was mainly fueled by the Fixed Services segment (+\$196 or +12.7% vs. 9M14) and Personal Mobile Services segment (+\$1,286 or +30.5% vs. 9M14).

Operating income before depreciation and amortization generated by equipment and handset sales (including SAC capitalization) amounted to \$831 in 9M15 vs. \$496 in 9M14 (+\$335 or 67.5% vs. 9M14), while operating income before depreciation and amortization generated by services sales amounted to \$6,833 in 9M15 vs. \$5,690 in 9M14 (+\$1,143 or +20.1% vs. 9M14).

#### **Depreciation and amortization**

Depreciation and amortization amounted to \$3,154 (+\$800 or +34.0% vs. 9M14). The increase in depreciation and amortization includes \$425 from PP&E depreciation, \$238 from amortization of intangible assets without SAC (mainly 3G/4G Licenses which started their amortization in December 2014 and June 2015 and generated \$227 in 9M15) and \$137 from amortization of SAC and service connection costs. The increase in depreciation and amortization corresponds 24% to the Fixed Services segment and 76% to the mobile services segments.

#### Gain on disposal of PP&E and impairment of PP&E

Gain on disposal of PP&E increased \$10 vs. 9M14 and an impairment of \$79 related to work in progress was recorded in 9M15 in Personal Mobile Services segment, which includes \$49 mainly related to the mobile pricing system needed for the new management system.

#### Operating income

Operating income amounted to \$4,459 in 9M15 (+\$616 or 16.0% vs. 9M14). The margin over consolidated revenues represented 15.6% in 9M15 (vs. 15.9% in 9M14). This growth was mainly fueled by the Personal Mobile Services segment (+\$623 or +20.5% vs. 9M14) and the Fixed Services segment (+\$17 or +2.6% vs. 9M14).

#### Financial results, net

Financial results, net resulted in a net loss of \$192, representing an increase of \$422 vs. 9M14. This net loss is related to the net financial position, which turned into a net financial debt during 2015 as a consequence of the higher Group s investments. The increase was mainly due to higher interests on loans (+\$25\structure{5}\structure{

#### Net income

Telecom Argentina reached a net income of \$2,778 in 9M15, +\$94 or +3.5% as compared to 9M14, representing 9.7% of the consolidated revenues in 9M15 (vs. 11.1% in 9M14). Net income attributable to Telecom Argentina amounted to \$2,757 in 9M15, +\$113 or +4.3% as compared to 9M14.

This variation was mainly due to a decrease in the generation of cash from operating activities of the Telecom Group, mainly by higher CAPEX which include the acquisition of the 3G/4G Licenses amounting \$5,786 as of December 2014 and June 2015 - and cash dividends paid to its shareholders for a total amount of \$861 (including tax withholding on cash dividends). As of September 30, 2015, the Fixed Services segment has a financial asset of \$464 while Personal Mobile Services segment has a net financial debt of \$1,853 and Núcleo Mobile Services segment has a net financial debt of \$197.

Consolidated operating costs including depreciation, amortization and gain on disposal of PP&E and impairment of PP&E amounted to \$8,787 in 3Q15, which represented an increase of \$1,404 or 19.0% vs. 3Q14. The increase in costs is mainly a consequence of higher revenues, higher expenses related to competition in mobile and Internet businesses, higher direct and indirect labor costs on the cost structure in Argentina, the increase in fees for services related to higher supplier prices, the increase in taxes and fees with the Regulatory Authority, the increase of VAS costs, the increase in depreciation and amortization of PP&E and intangible assets and higher losses related to PP&E impairment, partially offset by lower equipment and handsets cost (-39% of equipment and handset sold).

| 8. | Outlook |  |  |  |
|    |         |  |  |  |

In 4Q15, the evolution of the fixed services segment is expected to continue in line with the trend experienced over the past years and shall be influenced by the level of maturity of the market with focus on increasing the value of the customers base. In the Broadband business, Arnet continued capturing the growth opportunities the market offers, extending the offer of services with higher speeds and with proposals of overall integrated offers for customers (Internet, the fixed services segment and cellular mobile calls).

As regards pricing in the Fixed Services segment, the Company will continue the correspondent proceedings pursuant the new rules proposed by the LAD to reach the readjustment of the prices of the regulated services, and with them, of the economic-financial equation of Telecom Argentina (Note 10.k to the consolidated financial statements). The growing pressures over the cost structure of the Company and its investment plans seeking to modernize its infrastructure to provide next-generation services emphasize this need.

Personal s leadership will continue strengthen by providing new added value added services especially in mobile broadband, based on the deployment of the new 4G networks which multiply tenfold the speed of mobile Internet speed in mobility. In this way, as the LTE infrastructure continues deploying on a national level, it is expected that our customers increase their access to content, among others, of the Personal Play platform (music, games and videos), the latter being one of the highest factors for revenue growth.

At the same time, and following with the commitment with quality, the Company expects to continue working to optimize the experience of customers who use the 3G/HSPA+ network, by means of improvements in the network infrastructure made possible as from December 2014 with the acquisition of additional spectrum. In this way, the third generation services will also expand, continuing with the technological reconversion and extension of the capacity of the network.

The infrastructure improvements and the availability of a wide portfolio of advanced devices within the offer will continue to be drivers of higher revenues based on innovative and convenient commercial proposals for those who choose Personal as mobile operator. This assumes favorable conditions for foreign trading, access to the exchange market and financing of LTE equipment, 4G handsets, hardware and software by the Telecom Group and its technological suppliers.

It is foreseen a moderate expansion of the subscribers base due to the level of maturity and the high penetration of mobile services in the market.

| The Telecom Argentina s corporate purpose change authorized by the AFTIC, by adapting it to the LAD provisions (Note 10.i to t | he |
|--|----|
| consolidated financial statements) will allow the Company to expand its products and a service offer and provides the Company  |    |
| with a better background to improve its position in ICTs and Audiovisual Communication markets.                                |    |

The strategy implemented by the Management of the Company lays out the basic necessary fundamentals for the Telecom Group to pursue its objectives of continuous improvement of the quality of its services, to strengthen its market position and to improve its operating efficiency in order to satisfy the growing needs of the dynamic telecommunications market, all in compliance with the correspondent laws and regulations. The ambitious investment plans of the Telecom Group are based on this forward-looking vision and on the commitment of the Telecom Group with our country and its people.

- (i) Percentage of equity interest owned has been rounded.
- (ii) Dormant entity as of September 30, 2015 and December 31, 2014 and for the nine-month periods ended September 30, 2015 and 2014.
- (iii) Non-controlling interest of 32.50% is owned by the Paraguayan company ABC Telecomunicaciones S.A.

For the preparation of these consolidated financial statements, the Company followed the same accounting policies applied in the most recent annual consolidated financial statements except for Government bonds acquired during 9M15 which are valued at fair

value (Note 2.b)).

The preparation of these consolidated financial statements in conformity with IFRS requires the Company s Management to use certain critical accounting estimates. Actual results could differ from those estimates.

These consolidated financial statements (except for cash flow information) are prepared on an accrual basis of accounting. Under this basis, the effects of transactions and other events are recognized when they occur. Therefore income and expenses are recognized at fair value on an accrual basis regardless of when they are perceived or paid. When significant, the difference between the fair value and the nominal amount of income and expenses is recognized as finance income or expense using the effective interest method over the relevant period.

These consolidated financial statements have also been prepared on a going concern basis, as there is a reasonable expectation that Telecom Argentina and its subsidiaries will continue its operational activities in the foreseeable future (and in any event with a time horizon of more than twelve months).

Publication of these consolidated financial statements for the period ended September 30, 2015 was approved by resolution of the Board of Directors meeting held on November 2, 2015.

#### b) Financial statement formats

The financial statement formats adopted are consistent with IAS 1, In particular:

- <u>the consolidated statements of financial position</u> have been prepared by classifying assets and liabilities according to current and non-current criterion. Current assets and liabilities are those that are expected to be realized within twelve months after the period-end;
- <u>the consolidated income statements</u> have been prepared by classifying operating expenses by nature of expense as this form of presentation is considered more appropriate and representative of the specific business of the Telecom Group as evaluated by the Management, and are in line with the industrial sector of telecommunications:

### **TELECOM ARGENTINA S.A.**

- <u>the consolidated statements of comprehensive income</u> include the profit or (loss) for the period as shown in the consolidated income statement and all components of other comprehensive income;
- <u>the consolidated statements of changes in equity</u> have been prepared showing separately (i) profit (loss) for the period, (ii) other comprehensive income (loss) for the period, and (iii) transactions with shareholders (controlling and non-controlling);
- <u>the consolidated statements of cash flows</u> have been prepared by presenting cash flows from operating activities according to the <u>indirect method</u>, as permitted by IAS 7.

These consolidated financial statements contain all material disclosures required under IAS 34. Some additional disclosures required by the LGS and/or by the CNV have been also included, among them, complementary information required in the last paragraph of Article 1 Chapter III Title IV of the CNV General Resolution No. 622/13. Such information is disclosed in Notes 2 and 6 to these consolidated financial statements, as admitted by IFRS.

#### c) Segment reporting

An operating segment is defined as a component of an entity that engages in business activities from which it may earn revenues and incur expenses, and whose financial information is available, held separately, and evaluated regularly by the Telecom Group s Chief Executive Officer ( CEO ).

Operating segments are reported in a consistent manner with the internal reporting provided to the CEO, who is responsible for allocating resources and assessing performance of the operating segments at the net income (loss) level and under the accounting principles effective (IFRS as issued by the IASB) at each time for reporting to the Regulatory Bodies. The accounting policies applied for segment information are the same for all operating segments.

Information regarding segment reporting is included in Note 4.

### d) Net income per share

The Company computes net income per common share by dividing net income for the period attributable to Telecom Argentina (Controlling Company) by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing the net income for the period by the weighted average number of common and dilutive potential common shares then outstanding during the period. Since the Company has no dilutive potential common stock outstanding, there are no dilutive earnings per share amounts.

For the nine-month periods ended September 30, 2015 and 2014, the weighted average number of shares outstanding totaled 969,159,605 shares.
