NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – THE COMPANY AND BASIS OF PREPARATION.

T. Rowe Price Group (Price Group) derives its consolidated revenues and net income primarily from investment advisory services that its subsidiaries provide to individual and institutional investors in the sponsored T. Rowe Price U.S. mutual funds and other investment portfolios, including separately managed accounts, subadvised funds, and other sponsored investment portfolios. We also provide our investment advisory clients with related administrative services, including distribution, mutual fund transfer agent, accounting, and shareholder services; participant recordkeeping and transfer agent services for defined contribution retirement plans; brokerage; and trust services.

Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management impact our revenues and results of operations.

These unaudited condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, which require the use of estimates and reflect all adjustments that are, in the opinion of management, necessary to a fair statement of our results for the interim periods presented. All such adjustments are of a normal recurring nature. Actual results may vary from our estimates. Certain prior year amounts have been reclassified to conform to the 2016 presentation.

The unaudited interim financial information contained in these condensed consolidated financial statements should be read in conjunction with the consolidated financial statements contained in our 2015 Annual Report.

NEW ACCOUNTING GUIDANCE.

We implemented Accounting Standards Update No. 2015-02 - Consolidation (Topic 810): Amendments to the Consolidation Analysis on January 1, 2016, which did not require the restatement of prior year periods. In connection with the adoption of this guidance, we reevaluated all of our investments for consolidation, including our investments in sponsored investment portfolios. The adoption of the guidance resulted in sponsored investment products regulated outside the U.S. previously accounted for as voting interest entities (VOE) to be evaluated as variable interest entities (VIE) and led to the consolidation of an additional 24 portfolios that were previously accounted for as available-for-sale securities. The adoption also resulted in the consolidation of an additional eight U.S. sponsored investment portfolios that were previously accounted for as available-for-sale securities. The impact to the condensed consolidated balance sheet upon adoption was the consolidation of \$1.6 billion of assets, \$21.3 million of liabilities, and \$672.7 million of non-controlling interests. We also reclassified \$32.5 million in accumulated comprehensive income to retained earnings. The consolidation guidance provides a scope exception for reporting entities with interests in legal entities that are required to comply with, or operate in accordance with, requirements similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. Additional disclosures relating to consolidated voting interest entities and variable interest entities, and the impact the new accounting guidance has had on the quarter and year-to-date period are included in Note 5.

We early adopted Accounting Standards Update No. 2016-09 - Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting on July 1, 2016, which required adjustments to be reflected as of January 1, 2016. The amendments in this update change the accounting for certain aspects of stock-based compensation awards, including the accounting for income taxes upon settlement of awards, the classification of cash flows associated with awards, and the accounting for award forfeitures. The primary impact of early adoption was the recognition in our provision for income taxes for the nine-month period ended September 30,

2016, of excess tax benefits over financial statement expense totaling \$16.9 million, or \$.06 in diluted earnings per share, that was previously recognized in additional paid in capital during the first half of 2016. We also elected to account for forfeitures of stock-based compensation awards as they occur; therefore, we reversed forfeiture estimates, net of tax, of \$9.0 million recognized prior to January 1, 2016, as a cumulative effect adjustment to our condensed consolidated balance sheet, resulting in a reduction of retained earnings of \$9.0 million and an increase of other assets and additional paid in capital balances totaling \$3.9 million and \$12.9 million, respectively. Lastly, the guidance requires excess tax benefits from share-based compensation awards to be reported as operating activities in the consolidated statements of cash flows rather than financing activities. As permitted by the guidance, we elected to apply this guidance retrospectively and have reclassified \$22.1 million in excess tax benefits previously disclosed as a financing activity in the statement of cash flows for the nine-month period ended September 30, 2015, to operating activities.

CONSOLIDATION.

Our condensed consolidated financial statements include the accounts of all subsidiaries and sponsored investment portfolios in which we have a controlling interest. We are generally deemed to have a controlling interest when we own the majority of the voting interest of an entity or are deemed to be the primary beneficiary of a VIE. We perform an analysis of our investments to determine if the investment entity is a VOE or VIE. Our analysis involves judgment and considers several factors, including an entity’s legal organization, capital structure, the rights of the equity investment holders, our ownership interest in the entity, and our contractual involvement with the entity. We continually review and reconsider our VIE or VOE conclusions upon the occurrence of certain events, such as changes to our ownership interest, changes to an entity’s legal structure, or amendments to governing documents. All material accounts and transactions between consolidated entities are eliminated in consolidation.

Upon consolidation of sponsored investment portfolios, the Company retains the specialized investment company accounting principles of the underlying funds. All of the underlying investments held by these portfolios are carried at fair value with corresponding changes in the investments’ fair values reflected in non-operating income (expense) on the condensed consolidated statements of income.

Variable interest entities

VIEs are entities that, by design (i) lack sufficient equity to permit the entity to finance its activities independently, or (ii) have equity holders that do not have the power to direct the activities of the entity that most significantly impact the entity’s economic performance, the obligation to absorb the entity’s losses, or the rights to receive the entity’s residual returns. We consolidate a VIE when we are the primary beneficiary, which is the party that has both (i) the power to direct the activities of the VIE that most significantly impact its economic performance and (ii) the obligation to absorb losses of the entity or the right to receive benefits from the VIE that could potentially be significant. Our Luxembourg-based SICAV (Société d’Investissement à Capital Variable) funds and other sponsored investment portfolios regulated outside the U.S. are determined to be VIEs.

Along with VIEs that we consolidate, we also hold variable interests in other VIEs, including several investment partnerships, that are not consolidated because we are not the primary beneficiary.

Redeemable non-controlling interests

We recognize redeemable non-controlling interests for the portion of the net assets of our consolidated sponsored investment portfolios held by unrelated third party investors as their interest is convertible to cash and other assets at their option. As such, we reflect redeemable non-controlling interests as temporary equity in our condensed consolidated balance sheet.

NOTE 2 – INFORMATION ABOUT RECEIVABLES, REVENUES, AND SERVICES.

Accounts receivable from our sponsored investment portfolios, including our U.S. mutual funds, for advisory fees and advisory-related administrative services aggregate \$287.1 million at December 31, 2015, and \$291.3 million at September 30, 2016.

## NOTE 3 - INVESTMENTS.

The carrying values of investments (in millions) we do not consolidate are as follows:

	12/31/2015	9/30/2016
Available-for-sale sponsored investment portfolios	\$ 1,612.3	\$ 694.3
Equity method investments		
Sponsored investment portfolios	113.7	245.9

Cost method investments	69.4	73.1
U.S. Treasury note	1.0	1.0
Total	\$ 1,961.2	\$ 1,214.9

In connection with the adoption of the new consolidation accounting guidance on January 1, 2016, we reevaluated all of our investments for consolidation, including our investments in sponsored investment portfolios. We determined that our interests in a number of our available-for-sale holdings held at December 31, 2015, were deemed controlling interests under the new accounting standard and resulted in these sponsored investment portfolios being consolidated on January 1, 2016.

During the first nine months of 2015 and 2016, certain sponsored investment portfolios in which we provided initial seed capital at the time of formation were deconsolidated, as we no longer had a controlling interest. Additionally, during 2016 a sponsored investment portfolio that was being accounted for as an equity method investment was consolidated, as we regained a controlling interest. The net impact of these changes on our condensed consolidated balance sheet in 2016 was a net reduction of portfolio assets of \$678.3 million, liabilities of \$31.0 million and redeemable non-controlling interests of \$398.6 million, which represent the carrying values on the date the portfolios were deconsolidated or consolidated. The impact of deconsolidation on our consolidated balance sheet in 2015 was immaterial.

The impact of deconsolidating certain sponsored investment portfolios on our condensed consolidated statement of income during the first nine months of 2015 and 2016 was a loss of \$5.8 million and a gain of \$1.1 million, respectively. These losses and gains were the result of reclassifying currency translation adjustments accumulated on investment portfolios' with non-USD functional currencies from accumulated other comprehensive income to non-operating income. Since the remaining consolidated investment portfolios' functional currency in 2016 was U.S. dollars and carried at fair value, we did not recognize any additional gain or loss in our consolidated statement of income upon deconsolidation. Depending on our ownership interest, we are now reporting our residual interests in deconsolidated sponsored investment portfolios as either equity method or available-for-sale investments.

The following table details the number of holdings, the unrealized holding losses, and the aggregate fair value of available-for-sale sponsored investment portfolios with unrealized losses categorized by the length of time they have been in a continuous unrealized loss position:

	Number of holdings	Unrealized holding losses	Aggregate fair value
December 31, 2015			
Less than 12 months	18	\$ (15.8 )	\$ 419.6
12 months or more	4	(10.4 )	298.6
Total	22	\$ (26.2 )	\$ 718.2

12 months or more	2	(1.5 )	171.0
Total	6	\$ (1.6 )	\$ 196.2

In addition to the duration of the impairments, we reviewed the severity of the impairment as well as our intent and ability to hold the investments for a period of time sufficient for an anticipated recovery in fair value. Accordingly, impairment of these investment holdings is considered temporary at December 31, 2015 and September 30, 2016.

#### VARIABLE INTEREST ENTITIES.

Our investments at September 30, 2016, include \$111.3 million of investments in variable interest entities that we do not consolidate as we are not deemed the primary beneficiary. Our maximum risk of loss related to our involvement with these entities at September 30, 2016, is \$164.5 million, which includes our carrying value, any unfunded capital commitments, and uncollected investment advisory and administrative fees.

#### NOTE 4 – FAIR VALUE MEASUREMENTS.

We determine the fair value of our cash equivalents and certain investments using the following broad levels of inputs as defined by related accounting standards:

Level 1 – quoted prices in active markets for identical securities.

Level 2 – observable inputs other than Level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 – unobservable inputs reflecting our own assumptions based on the best information available. We do not value any investments using Level 3 inputs.

These levels are not necessarily an indication of the risk or liquidity associated with our investments. There have been no transfers between the levels. The following table summarizes our investments (in millions) that are recognized in our condensed consolidated balance sheets using fair value measurements determined based on the differing levels of inputs.

	Level 1	Level 2

Total	\$1,934.5	\$2.8

The table above excludes investments held by consolidated sponsored investment portfolios which are presented separately on our condensed consolidated balance sheets and are detailed in Note 5.

#### NOTE 5 - CONSOLIDATED SPONSORED INVESTMENT PORTFOLIOS.

The sponsored investment portfolios that we consolidate in our condensed consolidated financial statements are generally those products we provided initial seed capital at the time of their formation and have a controlling interest. Our U.S. sponsored investment portfolios are considered voting interest entities, while those regulated outside the U.S. are considered variable interest entities.

The following table details the net assets of the consolidated sponsored investment portfolios at September 30, 2016.

	Voting interest entities	Variable interest entities	Total
Cash and cash equivalents	\$ 12.6	\$ 73.7	\$ 86.3
Investments	200.1	1,815.5	2,015.6

Attributable to T. Rowe Price Group	140.8	826.8	967.6
	\$ 205.3	\$ 1,876.2	\$ 2,081.5

Although we can redeem our net interest in these sponsored investment portfolios at any time, we cannot directly access or sell the assets held by the portfolios to obtain cash for general operations. Additionally, the assets of these investment portfolios are not available to our general creditors.

Since third party investors in these investment funds have no recourse to our credit, our overall risk related to the net assets of consolidated sponsored investment portfolios is limited to valuation changes associated with our net interest. We, however, are required to recognize the valuation changes associated with all underlying investments held by these portfolios in our condensed consolidated statements of income, and disclose the portion attributable to third party investors as net income attributable to redeemable non-controlling interests.

The operating results (in millions) of the consolidated sponsored investment portfolios for the three- and nine-months ended September 30, 2016, are reflected in our condensed consolidated statement of income as follows:

	Three months ended 9/30/2016			Nine months ended 9/30/2016

	\$8.3	\$ 61.7	\$70.0	\$19.6	\$ 94.5	\$114.1

The operating expenses of these consolidated portfolios are reflected in other operating expenses. For the three- and nine-months ended September 30, 2016, we eliminated \$2.2 million and \$5.3 million, respectively, of these expenses against our investment advisory and administrative fees earned in preparing our condensed consolidated financial statements. The net investment income reflected in non-operating income includes dividend and interest income, and realized and unrealized gains and losses on the underlying securities held by the consolidated sponsored investment portfolios.

The table below details the impact of these consolidated investment portfolios on the individual lines of our condensed consolidated statement of cash flows (in millions) for the nine months ended September 30, 2016.

	Nine months ended 9/30/2016

The net cash provided by (used in) financing activities during the first nine months of 2016 includes \$215.1 million of net subscriptions we made into the consolidated sponsored investment portfolios, net of dividends received. These cash flows were eliminated in consolidation.

## FAIR VALUE MEASUREMENTS.

We determine the fair value of investments held by consolidated sponsored investment portfolios using the following broad levels of inputs as defined by related accounting standards:

Level 1 – quoted prices in active markets for identical securities.

Level 2 – observable inputs other than Level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 – unobservable inputs reflecting our own assumptions based on the best information available. We do not value any investments using Level 3 inputs.

These levels are not necessarily an indication of the risk or liquidity associated with these investment holdings. There have been no material transfers between the levels. The following table summarizes the investment holdings held by our consolidated sponsored investment portfolios (in millions) using fair value measurements determined based on the differing levels of inputs.

## NOTE 8 – EARNINGS PER SHARE CALCULATIONS.

The following table presents the reconciliation (in millions) of net income attributable to T. Rowe Price Group to net income allocated to our common stockholders and the weighted-average shares (in millions) that are used in calculating the basic and diluted earnings per share on our common stock. Weighted-average common shares outstanding assuming dilution reflect the potential dilution, determined using the treasury stock method, that could occur if outstanding stock options were exercised and non-participating stock awards vested.

#### NOTE 10 - DELL APPRAISAL RIGHTS MATTER.

During the second quarter of 2016, we recognized a nonrecurring operating charge of \$166.2 million to compensate certain T. Rowe Price mutual funds, trusts, separately managed accounts, and subadvised clients (collectively, "Clients") for the difference in valuation plus statutory interest, resulting from the denial of their appraisal rights by the Delaware Chancery Court (Court) in connection with the 2013 leveraged buyout of Dell, Inc. (Dell).

The Court ruled on May 11, 2016, that the Clients could not pursue an appraisal of any shares they held that were voted in favor of the Dell merger. The appraisal statute governing the transaction required the record holder to vote against or abstain from voting on the transaction in order to assert appraisal rights. After previously voting against prior transaction proposals, the voting instructions submitted on behalf of the Clients in connection with voting on the final proposed transaction were incorrectly submitted in favor of the transaction.

On May 31, 2016, the Court determined that the fair value of Dell at the time of the merger was \$17.62 per share, as opposed to the \$13.75 price offered in the transaction. As a result, any shareholder perfecting appraisal rights is entitled to a payment at \$17.62 per share plus statutory interest from the date the Dell transaction closed. The compensation to Clients was intended to make them whole for the voting discrepancy that resulted in the denial of their appraisal rights.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders  
T. Rowe Price Group, Inc.:

We have reviewed the condensed consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries (“the Company”) as of September 30, 2016, the related condensed consolidated statements of income and comprehensive income for the three- and nine- month periods ended September 30, 2016 and 2015, the related condensed consolidated statements of cash flows for the nine-month periods ended September 30, 2016 and 2015, and the related condensed consolidated statement of stockholders’ equity for the nine-month period ended September 30, 2016. These condensed consolidated financial statements are the responsibility of the Company’s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries as of December 31, 2015, and the related consolidated statements of income, comprehensive income, stockholders’ equity, and cash flows for the year then ended (not presented herein); and in our report dated February 5, 2016, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2015, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

GENERAL.

Our revenues and net income are derived primarily from investment advisory services provided to individual and institutional investors in our sponsored U.S. mutual funds and other investment portfolios. The other investment portfolios include: separately managed accounts, subadvised funds, and other sponsored investment portfolios including collective investment trusts, target-date retirement trusts, Luxembourg-based funds offered to investors outside the U.S., and portfolios offered through variable annuity life insurance plans in the U.S. Investment advisory clients domiciled outside the U.S. account for nearly 5% of our assets under management at September 30, 2016.

We manage a broad range of U.S., international and global stock, bond, and money market mutual funds and other investment portfolios, which meet the varied needs and objectives of individual and institutional investors. Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management affect our revenues and results of operations. We incur significant expenditures to develop new products and services and improve and expand our capabilities and distribution channels in order to attract new investment advisory clients and additional investments from our existing clients. These efforts often involve costs that precede any future revenues that we may recognize from an increase to our assets under management.

We remain debt-free with substantial liquidity and resources that allow us to take advantage of attractive growth opportunities, invest in key capabilities, including investment professionals, technologies, and new investment strategies and products; and, most importantly, provide our clients with strong investment management expertise and service both now and in the future.

We expect to increase our pace of spending on a series of key strategic priorities to address evolving client needs and to grow and further diversify our business. We currently expect that our 2016 expenses (excluding the \$166.2 million charge recognized in the second quarter of 2016 related to the Dell appraisal rights matter) will be about six percent higher than 2015. We also expect, based on current planned initiatives and depending on market conditions, operating expenses will grow in the mid- to high single-digit range in 2017 compared with 2016 expenses (excluding the \$166.2 million charge related to the Dell appraisal rights matter).

BACKGROUND.

U.S. equities rose in the third quarter of 2016 as the stock market rallied in July amid expectations that major central banks would act to mitigate an expected economic slowdown following the UK's late-June decision to leave the European Union. Equities were also helped by better than expected second-quarter earnings—although year-over-year earnings declined for the fifth consecutive quarter and, following a fairly quiet August, market volatility picked up in September amid concerns that central banks in developed countries were reaching limits in their ability to provide stimulus. While the Federal Reserve did not raise short-term interest rates at its September policy meeting, Fed officials noted in their post-meeting statement that “the case for an increase in the federal funds rate has strengthened.” This could mean that a rate hike will occur in the next few months.

Stocks in developed non-U.S. markets outperformed large-cap U.S. shares, as strength in some non-U.S. currencies lifted returns in dollar terms. Most developed Asian markets produced strong returns; Japanese shares rose almost 9%. In Europe, most markets advanced. Equities in the UK returned about 4% in dollar terms, as a weaker British pound sterling reduced stronger local returns to U.S. investors. Emerging markets stocks outperformed shares in developed markets, with Asian markets performing best. In emerging Europe, Russian shares rallied about 9%, while stocks in

Turkey fell more than 5%, as the government tightened its grip on the country following a failed coup attempt in mid-July. In Latin America, Brazilian shares climbed more than 11%.

Returns of several major equity market indexes for the three- and nine-month periods ended September 30, 2016, are as follows:

Index	Three months ended	Nine months ended
	9/30/2016	9/30/2016
S&P 500 Index	3.9%	7.8%
NASDAQ Composite Index <sup>(1)</sup>	9.7%	6.1%
Russell 2000 Index	9.1%	11.5%
MSCI EAFE (Europe, Australasia, and Far East) Index	6.5%	2.2%
MSCI Emerging Markets Index	9.2%	16.4%

<sup>(1)</sup> returns exclude dividends

Global bond returns in the third quarter were mostly positive in dollar terms. In the U.S., even though the Fed refrained from raising short-term rates, Treasury and municipal bond prices declined and yields increased across all maturities. The 10-year Treasury note yield rose from 1.5% to 1.6%. Investment-grade corporate bonds performed well, thanks to strong demand. Mortgage-backed securities edged higher. High yield bonds significantly outperformed high-quality bonds, as investors continued to seek securities with attractive yields.

Government bonds in developed non-U.S. markets produced positive returns in dollar terms, as the dollar depreciated against some major currencies amid uncertainty about the upcoming U.S. elections and the timing of the Fed's next interest rate increase. Emerging markets bonds also produced gains for U.S. investors, helped by demand for fixed income securities with attractive yields.

Returns for several major bond market indexes for the three- and nine-month periods ended September 30, 2016, are as follows:

Index	Three months ended	Nine months ended
	9/30/2016	9/30/2016

JPMorgan Global High Yield Index	5.5%	15.5%

Total assets under management	\$763.1	\$ 812.9

The following table details the changes in our assets under management (in billions) during the three- and nine-month periods ended September 30, 2016:

	Three months ended 9/30/2016			Nine months ended 9/30/2016		
	Sponsored U.S. mutual funds	Other investment portfolios	Total	Sponsored U.S. mutual funds	Other investment portfolios	Total

Assets under management at September 30, 2016	\$517.0	\$ 295.9	\$812.9	\$517.0	\$ 295.9	\$812.9

The client transfers from mutual funds to other investment portfolios noted in the table above were primarily transfers from mutual funds to collective investment trusts, including our retirement date trusts.

The net cash flows after client transfers (in billions) during the three- and nine-month periods ended September 30, 2016, include the following:

	Three months ended 9/30/2016	Nine months ended 9/30/2016

Fixed income, money market, and stable value	2.1	5.3
	.2	3.0
Total net cash flows after client transfers	\$ (.2 )	\$ 2.2

Our target-date retirement portfolios invest in a broadly diversified portfolio of other T. Rowe Price funds or T. Rowe Price collective investment trusts, and automatically rebalance to maintain their specific asset allocation weightings. Total net cash flows after client transfers for the three- and nine-month period ended September 30, 2016, include \$1.9 billion and \$8.2 billion, respectively, that originated in our target-date retirement portfolios. Assets under management in these portfolios at September 30, 2016, totaled \$188.6 billion, including \$151.4 billion in target-date retirement funds and \$37.2 billion in target-date retirement trusts.

## RESULTS OF OPERATIONS.

The table below presents financial results on a U.S. GAAP basis as well as a non-GAAP basis to adjust for the impact of the consolidated sponsored investment portfolios and other non-operating income. <sup>(2)</sup> See the reconciliation to the comparable U.S. GAAP measures at the end of the results of operations sections of this management discussion and analysis.

Investment advisory fees earned in the third quarter of 2016 increased over the comparable 2015 quarter as average assets under our management increased \$40.5 billion, or 5.3%, to \$803.6 billion. The average annualized effective fee rate earned on our assets under management during the third quarter of 2016 was 48.0 basis points, which was the same as the rate earned during the third quarter of 2015. In order to maintain a positive yield for fund investors, we voluntarily waived \$2.1 million in advisory fees and fund expenses from certain of our money market mutual funds in the third quarter of 2016, as compared to \$11.6 million in the comparable 2015 quarter. The total waivers in 2016 are less than 1% of total investment advisory fees earned during the third quarter of 2016. The combined net assets at September 30, 2016, of the funds in which we waived fees in the third quarter of 2016 were \$15.8 billion. We expect these fee waivers will continue for the remainder of 2016 and into 2017.

Our operating margin in the third quarter of 2016 was 43.5%, virtually unchanged from 43.7% earned in the 2015 quarter.

The third quarter of 2016 results include greater non-operating income resulting from implementing new accounting guidance on January 1, 2016, related to the consolidation of certain sponsored investment portfolios in which we provide initial seed capital at formation. This implementation resulted in investment gains and losses on a larger number of our investments in sponsored portfolios to be recognized in the statement of income compared to the

statement of comprehensive income in the prior year. The consolidation of these portfolios results in the recognition in our consolidated statement of income each portfolio's investment income and operating expenses, including the portion that was held by unrelated third party investors

(redeemable non-controlling interests). The portion attributable to unrelated third party investors is removed from our net income to arrive at net income attributable to T. Rowe Price Group, which is used in our calculation of earnings per share.

For the third quarter of 2016, the impact (in millions) of consolidating these sponsored investment portfolios on the individual lines of our condensed consolidated statements of income is as follows:

Operating expenses reflected in net operating income	\$(3.8 )
Net investment income reflected in non-operating income	73.8
Impact on income before taxes	\$70.0
Net income attributable to the firm's interest in the consolidated sponsored investment portfolios	\$35.1
Net income attributable to redeemable non-controlling interests (unrelated third party investors)	34.9
	\$70.0

Additionally, we adopted new accounting guidance related to stock-based compensation that reduced our income tax provision by \$4.3 million, or \$.02 in diluted earnings per share, in the third quarter of 2016. See Note 1, The Company and Basis of Preparation, in the condensed consolidated financial statements contained in Part I, Item 1 of this filing for more information related to the impact of the guidance.

#### Net revenues

Investment advisory revenues earned in the third quarter of 2016 from the T. Rowe Price mutual funds distributed in the U.S. were \$703.5 million, an increase of \$32.7 million, or 4.9%, from the comparable 2015 quarter. Average mutual fund assets under management in the third quarter of 2016 were \$511.3 billion, an increase of 4.0% from the average in the third quarter of 2015. The increase in advisory revenues earned from the mutual funds is due to both the increase in average assets under management as well as the reduction in money market fee waivers in the third quarter of 2016 compared with the 2015 quarter.

Investment advisory revenues earned in the third quarter of 2016 from the other investment portfolios were \$267.0 million, an increase of \$15.2 million, or 6.0%, from the comparable 2015 quarter. Average assets under management in the third quarter of 2016 were \$292.3 billion, an increase of 7.7% from the average in the third quarter of 2015.

#### Operating expenses

Compensation and related costs was \$386.2 million in the third quarter of 2016, an increase of \$6.8 million, or 1.8%, compared to the third quarter of 2015. Our base salaries and related benefits have increased \$15.9 million as a result of modest increases in base salaries at the beginning of 2016 combined with a 4.1% increase in our average staff size from the third quarter of 2015. Our stock-based compensation expense increased \$1.5 million in the third quarter of 2016. These increases were offset in part by the interim accrual for annual variable compensation in the third quarter of 2016 being \$5.7 million less than the accrual in the 2015 quarter. Our interim accrual for annual variable compensation program is recognized ratably over the year using the ratio of recognized quarterly net operating income to forecasted annual net operating income. Declines in temporary personnel and other employee-related costs in the third quarter of 2016 make up the remainder of the change from the 2015 quarter. We employed 6,239 associates at September 30, 2016.

Advertising and promotion costs were \$14.7 million in the third quarter of 2016, compared with \$13.2 million in the comparable 2015 period. We currently expect advertising and promotion costs for the full-year 2016 to be comparable to 2015 levels.

Occupancy and facility costs together with depreciation expense were \$79.3 million in the third quarter of 2016, an increase of \$5.9 million, or 8.0%, compared to the third quarter of 2015. The increase is primarily attributable to the added costs to update and enhance technology capabilities, including related maintenance programs, and to renovate existing facilities.

Other operating expenses in the third quarter of 2016 were up \$13.7 million from the comparable 2015 quarter. This increase includes higher costs attributable to BNY Mellon's performance of certain fund accounting and portfolio recordkeeping services for a full quarter in 2016 as compared to a partial quarter in 2015, as well as implementation services related to our transition to their technology platform. The remainder of the increase in costs is due to higher business demands and the firm's continued investment in its operating capabilities.

## Non-operating income

Net non-operating income in the third quarter of 2016 was \$88.3 million, an increase of \$88.0 million from the 2015 quarter. The following table details the components of non-operating income (in millions) during the third quarter of 2015 and 2016.

	Three months ended		Dollar change
	9/30/2016	9/30/2015	
Net gains realized on dispositions of available-for-sale investments	\$9.6	\$ —	\$(9.6 )
Other-than-temporary impairment of available-for-sale investments	(4.8 )	—	4.8
Net gain (loss) recognized on deconsolidation of a sponsored fund	(5.8 )	1.1	6.9
Ordinary and capital gain dividends on sponsored fund investments	3.4	1.7	(1.7 )
Investment gains (losses) on sponsored equity method and trading investments	(5.1 )	9.0	14.1
Net investment income (loss) on sponsored fund investments not consolidated	(2.7 )	11.8	14.5
Other investment income	6.2	2.7	(3.5 )
Total income earned from investments	3.5	14.5	11.0
Net investment income (loss) of consolidated sponsored investment portfolios	(1.5 )	73.8	75.3
Other non-operating expenses	(1.7 )	—	1.7
Non-operating income	\$ .3	\$ 88.3	\$ 88.0

The increase in investment gains (losses) on sponsored equity method and trading investments is driven by an increase in the number of sponsored funds accounted for as equity method investments as well as market gains. The investment income on consolidated sponsored investment portfolios has increased in the third quarter of 2016 as the number of portfolios we consolidate, as discussed above, increased significantly upon the adoption of the new consolidation accounting guidance. See Note 1, The Company and Basis of Preparation, in the condensed consolidated financial statements contained in Part I, Item 1 of this filing for more information related to the impact of the guidance.

## Provision for income taxes

The effective tax rate for the third quarter of 2016 was 35.7%. We currently estimate our effective tax rate for the full-year 2016 will be 36.3% compared with our estimate of 38.3% disclosed at the end of the second quarter of 2016. The decrease in the estimated effective tax rate is related in part to the increase in net income attributable to redeemable non-controlling interest related to our consolidated sponsored investment portfolios as we do not recognize taxes associated with these earnings. Additionally, the estimated effective tax rate has declined as a result of us electing to adopt the new stock-based compensation accounting guidance as discussed in Note 1, The Company and Basis of Preparation, in the condensed consolidated financial statements contained in Part I, Item 1 of this filing. Under the new guidance, tax benefits and shortfalls on exercised options and vested restricted stock relative to the stock-based compensation expense recognized will now be included in the provision for income taxes rather than as additional paid in capital on the balance sheet.

<sup>(2)</sup> See the reconciliation to the comparable U.S. GAAP measures at the end of the results of operations sections of this management discussion and analysis.

Investment advisory revenues earned in the first nine months of 2016 increased slightly over the comparable 2015 period. The average annualized fee rate earned on our assets under management was 48.0 basis points in the first nine months of 2016, virtually unchanged from the 48.0 basis points earned in the first nine months of 2015. We waived \$9.4 million in money market related fees, including advisory fees and fund expenses, in the first nine months of 2016, a decrease of \$28.4 million from the \$37.8 million waived in the 2015 period. The fee waivers in the first nine months of 2016 represent less than 1% of total investment advisory revenues earned during the same period.

During the first nine months of 2016, our operating expenses include a nonrecurring operating charge of \$166.2 million, which reduced net income by \$100.7 million or \$.39 in diluted earnings per common share, related to our decision to compensate certain clients in regard to the Dell appraisal rights matter.

Our operating margin in the first nine months of 2016 was 37.4%, compared to 45.9% in the 2015 period, as the nonrecurring operating charge related to the Dell appraisal rights matter recognized in the 2016 period reduced our operating margin by about 5%. The additional decline in our operating margin from the first nine months of 2015 is a result of the investments we have been making to broaden and deepen our investment management, distribution, and service capabilities around the world.

The adoption of the new consolidation guidance on January 1, 2016, as discussed in Note 1, The Company and Basis of Preparation, in the condensed consolidated financial statements contained in Part I, Item 1 of this filing, has significantly impacted our results for the first nine months of 2016. The impact (in millions) the consolidated sponsored investment portfolios had on the individual lines of our income statement is as follows:

Operating expenses reflected in net operating income	\$(9.9 )
Net investment income reflected in non-operating income	124.0
Impact on income before taxes	\$114.1
Net income attributable to the firm's interest in the consolidated sponsored investment portfolios	\$62.1
Net income attributable to redeemable non-controlling interests (unrelated third party investors)	52.0
	\$114.1

The first nine months of 2016 results were also impacted by the implementation of accounting guidance related to stock-based compensation. As discussed in Note 1, The Company and Basis of Preparation, to the condensed consolidated financial statements, the guidance required us to adjust results of the first and second quarters of 2016 in order to reflect the impact as of the beginning of the calendar year, despite adopting the guidance in the third quarter of 2016. As such, our provision for income taxes for the first nine months of 2016 includes an income tax benefit of \$16.9 million, or \$.06 in diluted earnings per share, related to the settlement of options and restricted stock that in the first half of 2016 was recognized in the balance sheet.

#### Net revenues

Investment advisory revenues earned from the T. Rowe Price mutual funds distributed in the U.S. increased .3%, or \$5.0 million, to \$2.0 billion. Average mutual fund assets in the first nine months of 2016 were \$489.7 billion, a decrease of 1.1% from the average for the comparable 2015 period. The increase in advisory revenues was due in part to the reduction in money market fee waivers made in the first nine months of 2016 compared with the 2015 period.

Investment advisory revenues earned on the other investment portfolios for the first nine months of 2016 were \$757.2 million, a decrease of \$4.4 million, or .6%, from the \$761.6 million earned in the comparable 2015 period. The first nine months of 2016 includes the elimination of \$5.9 million in advisory fees against the related management fee expense recorded by our consolidated sponsored investment portfolios. Average assets in these portfolios were \$278.6 billion during the first nine months of 2016, up 1.8% from the comparable 2015 period.

Administrative fee revenues decreased \$9.3 million to \$263.6 million in the first nine months of 2016. The decrease is primarily attributable to transfer agent servicing activities provided to the mutual funds and their investors, as well as the shift to BNY Mellon fund accounting and portfolio recordkeeping operations that, prior to August 2015, we provided to our sponsored U.S. mutual funds. Changes in administrative fee revenues are generally offset by similar changes in related operating expenses that are incurred to provide services to the funds and their investors.

Distribution and servicing fee revenues earned from 12b-1 plans of the Advisor, R, and Variable Annuity II class shares of our sponsored portfolios were \$106.2 million in the first nine months of 2016, a decrease of \$8.0 million from the comparable 2015 period on lower average assets under management in these share classes. The 12b-1 fees earned are offset entirely by the costs paid to third party intermediaries who source these assets. These costs are reported as distribution and servicing costs in the condensed consolidated income statements.

## Operating expenses

Compensation and related costs was \$1,112.4 million in the first nine months of 2016, an increase of \$25.6 million, or 2.4%, compared to the 2015 period. The largest part of the increase is attributable to a \$40.2 million increase in salaries and related benefits which resulted from a modest increase in salaries at the beginning of 2016 combined with an increase of 2.8% in average headcount from the 2015 period. Higher non-cash stock-based compensation expense of \$10.5 million was offset in part by an increase of \$5.9 million in the level of labor capitalized in 2016 compared with the 2015 period. These net increases were offset in part by the interim accrual for our annual variable compensation in the 2016 period being \$5.4 million less than the interim accrual in the 2015 period. Our interim accrual for annual variable compensation program is recognized ratably over the year using the ratio of recognized quarterly net operating income to forecasted annual net operating income. The overall increase in compensation and related costs and our average staff size from the first nine months of 2015 were muted by lower compensation costs resulting from shifting 210 associates in August 2015 and for the ongoing transition support we provide to BNY Mellon. However, these lower compensation costs are offset by increases in costs paid to BNY Mellon to provide these administrative services and other transition-related activities, which are reflected in other operating expenses.

Occupancy and facility costs, together with depreciation expense, increased \$14.6 million, or 6.9%, compared to the first nine months of 2015. The increase is primarily attributable to the added costs to update and enhance technology capabilities, including related maintenance programs, and to renovate existing facilities.

Other operating expenses were \$296.6 million in the first nine months of 2016, an increase of \$58.7 million from the comparable 2015 period. About half of this increase is attributable to costs being paid to BNY Mellon since August 2015 for the performance of certain administrative services, as mentioned above. The increase also includes \$4.6 million in operating expenses, net of investment advisory fees paid to us, of those sponsored investment portfolios that we began consolidating at the beginning of 2016. The remaining balance of the change is due to increased business demands and our continued investment in capabilities.

## Non-operating income

Net non-operating investment activity during the first nine months of 2016 resulted in income of \$214.9 million compared with \$60.1 million in the 2015 period. The following table details the components of non-operating income (in millions) during the first nine months of 2015 and 2016.

	Nine months ended		Dollar change
	9/30/2015	9/30/2016	
Net gains realized on dispositions of available-for-sale investments	\$48.9	\$ 52.3	\$3.4
Other-than-temporary impairments of available-for-sale investments	(4.8 )	—	4.8
Net gain (loss) recognized on deconsolidation of a sponsored fund	(5.8 )	1.1	6.9
Ordinary and capital gain dividends on sponsored fund investments	10.7	5.0	(5.7 )
Investment gains (losses) on sponsored equity method and trading investments	(1.9 )	21.8	23.7
Net investment income on sponsored fund investments not consolidated	47.1	80.2	33.1
Other investment income	14.7	10.9	(3.8 )
Total investment income on investments	61.8	91.1	29.3
Net investment income on consolidated sponsored investment portfolios	.9	124.0	123.1
Other non-operating expense	(2.6 )	(.2 )	2.4
Non-operating income	\$60.1	\$ 214.9	\$154.8

The increase in investment gains on sponsored equity method and trading investments is driven by an increase in the number of sponsored funds accounted for as equity method investments as well as market gains. The investment income on consolidated sponsored investment portfolios has increased in the first nine months of 2016 as the number of portfolios we consolidate, as discussed above, increased significantly upon the adoption of the new consolidation accounting guidance. See Note 1, The Company and Basis of Preparation, in the condensed consolidated financial statements contained in Part I, Item 1 of this filing for more information related to the impact of the guidance.

## Non-GAAP information and reconciliation

We believe the non-GAAP financial measures below provide relevant and meaningful information to investors about our core operating results. These measures have been established in order to increase transparency for the purpose of evaluating our core business, for comparing current results with prior period results, and to enable more appropriate comparison with industry peers. However, non-GAAP financial measures should not be considered as a substitute for financial measures calculated in accordance with U.S. GAAP and may be calculated differently by other companies. The following schedule reconciles (in millions, except for per share amounts) U.S. GAAP financial measures to non-GAAP measures for the three and nine-months ended September 30, 2016.

<sup>(1)</sup> Net income of consolidated sponsored investment portfolios, net of redeemable non-controlling interests: We implemented new consolidation accounting guidance on January 1, 2016, that resulted in a larger number of our sponsored investment portfolios, that we provide seed capital to at formation, to be consolidated in our financial statements as we were deemed to have a controlling financial interest. We now recognize investment gains and losses on a larger number of the investments in sponsored portfolios in our statement of income compared to our statement of comprehensive income in 2015. The non-GAAP adjustments add back the management fees we earn from the consolidated sponsored investment portfolios and remove the investment income and operating expenses of these portfolios that have been included in our U.S. GAAP condensed consolidated statements of income. We believe the consolidated sponsored investment portfolios may impact the reader's ability to understand our core operating results.

(2) Non-operating income, excluding impact of consolidated sponsored investment portfolios: This non-GAAP adjustment removes the non-operating income that remains after backing out the portion related to the consolidated sponsored investment portfolios. We believe excluding non-operating income helps the reader's ability to understand the firm's core operating results, and increases comparability to prior years. Additionally, we do not emphasize the impact of non-operating income when managing our firm and evaluating our performance.

	Three months ended		Nine months ended	
	9/30/2015		9/30/2016	
Total non-operating income	\$ .3	\$ 88.3	\$ 60.1	\$ 214.9
Less: net investment income (loss) of consolidated sponsored portfolios	(1.5 )	73.8	.9	124.0
Total other non-operating income	\$ 1.8	\$ 14.5	\$ 59.2	\$ 90.9

(3) Non-recurring charge related to Dell appraisal rights matter: As previously disclosed, we made the decision in June 2016 to compensate certain clients in regard to the Dell appraisal rights matter. We believe it is useful to readers of our condensed consolidated statement of income to adjust for this non-recurring charge in arriving at adjusted operating expenses and net income attributable to T. Rowe Price Group, Inc. and diluted earnings per share, as this will aid with comparability to prior periods and analyzing our core business results.

(4) Income tax impacts of non-GAAP adjustments: These were calculated using the effective tax rate applicable to the related items.

(5) Adjusted diluted earnings per common share: This non-GAAP measure was calculated by applying the two-class method to adjusted net income attributable to T. Rowe Price Group, Inc. divided by the weighted-average common shares outstanding assuming dilution.

#### CAPITAL RESOURCES AND LIQUIDITY.

We remain debt-free with ample liquidity, including cash and discretionary sponsored portfolio investment holdings of \$2.1 billion at September 30, 2016. We also have seed capital investments in sponsored investment portfolios of \$1.2 billion that are redeemable, although we generally expect to be invested for several years until unrelated third party investors substantially reduce our relative ownership percentage.

The following table details (in millions) the line items of the condensed consolidated balance sheet as of September 30, 2016, where our cash and discretionary sponsored portfolio investment holdings and seed capital investments are presented, as well as the amount of other investments that make up the remainder of the investments line. The investment presentation on the balance sheet is based on the type of investment, as well as how we account for the item.

	Interest Held by T. Rowe Price Group					
	Cash and discretionary investments in sponsored portfolios	Seed capital investments in sponsored portfolios	Investment in UTI and other investments	Total	Redeemable non-controlling interest	As reported on balance sheet 9/30/2016
Cash and cash equivalents	\$ 1,401.0	\$ —	\$ —	\$ 1,401.0	\$ —	\$ 1,401.0
Investments	616.1	383.5	215.3	1,214.9	—	1,214.9

Net assets of consolidated sponsored investment portfolios	114.1	853.5	—	967.6	1,113.9	2,081.5
	\$2,131.2	\$ 1,237.0	\$ 215.3	\$3,583.5	\$ 1,113.9	\$ 4,697.4

On January 1, 2016, we implemented new consolidation accounting guidance that resulted in the consolidation of sponsored investment portfolios in which we have a controlling interest. Our condensed consolidated balance sheet now reflects the cash and cash equivalents, investments, other assets and liabilities of the sponsored portfolios, as well as redeemable non-controlling interests for the portion of the sponsored portfolios that are held by unrelated third party investors. Although we can redeem our net interest in these sponsored investment portfolios at any time, we cannot directly access or sell the assets held by the portfolios to obtain cash for general operations. Additionally, the assets of these investment portfolios are not available to our general creditors. Our interest in these sponsored investment portfolios was used as initial seed capital and is recategorized as

discretionary when it is determined by management that the seed capital is no longer needed. We assess the discretionary investment portfolio and liquidate our interest, if decided, in a way as to not impact the portfolio and ultimately, the unrelated third party investors.

We expended \$546.9 million to repurchase 8.0 million shares, or 3.2%, of our outstanding common stock in the first nine months of 2016. We will generally repurchase our common stock over time to offset the dilution created by our equity-based compensation plans. Since the end of 2013, we have returned nearly \$3.9 billion to stockholders through stock repurchases, our regular quarterly dividends, and a special dividend in 2015.

(in millions)	Recurring dividend	Special dividend	Stock repurchases	Total cash returned to stockholders
2014	\$ 462.1	\$ —	\$ 415.5	\$ 877.6
2015	534.5	524.5	987.8	2,046.8
Nine months ended 9/30/2016	406.9	—	546.9	953.8
Total	\$ 1,403.5	\$ 524.5	\$ 1,950.2	\$ 3,878.2

We anticipate property and equipment expenditures for the full-year 2016 to be up to \$165 million, of which about two-thirds is planned for technology initiatives. Given the availability of our financial resources, we expect to fund our anticipated capital expenditures with operating resources, and do not maintain an available external source of liquidity.

The following table summarizes the cash flows (in millions) for the nine months ended September 30, 2016, that are attributable to T. Rowe Price Group, our consolidated sponsored investment portfolios, and the related eliminations required in preparing the statement.

Operating activities attributable to T. Rowe Price Group during the first nine months of 2016 provided cash flows of 1,235.3 million, a decrease of \$158.3 million from the 2015 period. The decline is primarily related to our decision in the first nine months of 2016 to compensate certain clients \$166.2 million in regard to the Dell appraisal rights matter. Our interim operating cash flows do not include the cash impact of variable compensation that is accrued throughout the year before being substantially paid out in December. The net cash provided by operating activities attributable to T. Rowe Price Group was offset in part by the net change in trading securities held in our consolidated sponsored investments' underlying investment portfolios.

Net cash used in investing activities that are attributable to T. Rowe Price Group totaled \$163.1 million in the first nine months of 2016. During the first nine months of 2016, we provided \$219.1 million in seed capital to new and existing sponsored investment portfolios. Since we consolidate these sponsored investment portfolios, the seed capital that we provided was eliminated in preparing our consolidated condensed statement of cash flow. We utilized a portion of the \$174.2 million in proceeds from the sale of certain available-for-sale investments and equity method investments in the first nine months of 2016 to fund these seed capital investments. Additionally, our net property and equipment additions were \$112.5 million in the first nine months of 2016 compared to \$114.6 million in the 2015 period. The cash flow attributable to consolidated sponsored investment portfolios of \$54.3 million represents the net cash added to our balance sheet from consolidating and deconsolidating portfolios during the first nine months of 2016.

Net cash used in financing activities attributable to T. Rowe Price Group were \$843.5 million in the first nine months of 2016 compared with \$1,686.7 million in the 2015 period. The decline in cash used in financing activities is largely related to the \$2.00 per share, or \$524 million, special dividend we paid in April 2015. We also expended \$295.0 million less in common stock purchases in the first nine months of 2016 compared to the 2015 period. The cash proceeds received from stock option exercises were higher in the first nine months of 2016 by \$27.6 million compared with the 2015 period. The net cash used in financing activities attributable to T. Rowe Price Group was largely offset by the \$798.2 million in cash provided by consolidated sponsored investment portfolios from the net subscriptions received from redeemable non-controlling interest holders.

#### CRITICAL ACCOUNTING POLICIES.

The preparation of financial statements often requires the selection of specific accounting methods and policies from among several acceptable alternatives. Further, significant estimates and judgments may be required in selecting and applying those methods and policies in the recognition of the assets and liabilities in our consolidated balance sheets, the revenues and expenses in our consolidated statements of income, and the information that is contained in our significant accounting policies and notes to consolidated financial statements. Making these estimates and judgments requires the analysis of information concerning events that may not yet be complete and of facts and circumstances that may change over time. Accordingly, actual amounts or future results can differ materially from those estimates that we include currently in our consolidated financial statements, significant accounting policies, and notes.

Given the impact the implementation of Accounting Standards Update No. 2015-02 - Consolidation (Topic 810): Amendments to the Consolidation Analysis on January 1, 2016, has had on our consolidated financial statements, we now consider our consolidation policy one of the policies that is most critical to the preparation and understanding of our consolidated financial statements. Our consolidation policy is included in Note 1, The Company and Basis of Preparation, in the condensed consolidated financial statements contained in Part I, Item 1 of this filing.

There have been no other material changes in the critical accounting policies previously identified in our 2015 Annual Report on Form 10-K.

#### NEW ACCOUNTING STANDARDS.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09 — Revenue from Contracts with Customers, and subsequently has issued four related accounting standard updates clarifying several aspects of ASU 2014-09. The overall objective of the new standard updates is to provide a single, comprehensive revenue recognition model for all contracts with customers to improve comparability within industries, across industries, and across capital markets. The revenue standard contains principles that will be applied to determine the measurement of revenue and timing of when it is recognized. We will be required to adopt the new standard on January 1, 2018. We are currently evaluating the impact these standards will have on our financial position and results of operations, as well as the available transition methods.

In January 2016, the FASB issued Accounting Standards Update No. 2016-01 — Financial Instruments — Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The amendments in this update address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The ASU is effective for fiscal years and interim periods within those years beginning after December 15, 2017, and requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. Early adoption is not permitted. The new guidance will require the change in fair value of equity investments with readily determinable fair values to be recognized through the income statements. We are currently evaluating the full impact of the standard, however, upon adoption the change in the fair value of our available-for-sale investments will be recognized in our consolidated income statement rather than our consolidated statement of comprehensive income.

In February 2016, the FASB issued Accounting Standards Update No. 2016-02 — Leases (Topic 842). The objective of the update is to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The amendments in this update are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact this standard will have on our financial position and results of operations.

In August 2016, the FASB issued Accounting Standards Update No. 2016-05 — Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force). The amendments in this update provide guidance on eight specific cash flow issues. The new guidance is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. The amendments in this update are effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact this standard will have on our consolidated statements of cash flows.

We have considered all other newly issued accounting guidance that is applicable to our operations and the preparation of our condensed consolidated statements, including those we have not yet adopted. We do not believe that any such guidance has or will have a material effect on our financial position or results of operations.

#### FORWARD-LOOKING INFORMATION.

From time to time, information or statements provided by or on behalf of T. Rowe Price, including those within this report, may contain certain forward-looking information, including information or anticipated information relating to: our revenues, net income and earnings per share on common stock; changes in the amount and composition of our assets under management; our expense levels; our estimated effective income tax rate; and our expectations regarding financial markets, future transactions and strategic initiatives, dividends, investments, capital expenditures, stock repurchases, and other conditions. Readers are cautioned that any forward-looking information provided by or on behalf of T. Rowe Price is not a guarantee of future performance. Actual results may differ materially from those in forward-looking information because of various factors including, but not limited to, those discussed below and in Item 1A, Risk Factors, of our Form 10-K Annual Report for 2015. Further, forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made or to reflect the occurrence of unanticipated events.

Our future revenues and results of operations will fluctuate primarily due to changes in the total value and composition of assets under our management. Such changes result from many factors including, among other things: cash inflows and outflows in the T. Rowe Price U.S. mutual funds (Price funds) and other managed investment portfolios; fluctuations in global financial markets that result in appreciation or depreciation of the assets under our management; our introduction of new products, including mutual funds and investment portfolios, and services; and changes in retirement savings trends relative to participant-directed investments and defined contribution plans. The

ability to attract and retain investors' assets under our management is dependent on investor sentiment and confidence; the relative investment performance of the Price funds and other managed investment portfolios as compared to competing offerings and market indexes; the ability to maintain our investment management and administrative fees at appropriate levels; competitive conditions in the mutual fund, asset management, and broader financial services sectors; and our level of success in implementing our strategy to expand our business. Our revenues are substantially dependent on fees earned under contracts with the Price funds and could be adversely affected if the independent directors of one or more of the Price funds terminated or significantly altered the terms of the investment management or related administrative services agreements. Non-operating income will also fluctuate as a result of the consolidation of certain of our investment portfolios as well as the size of our investments, changes in their market valuations, and any other-than-temporary impairments that may arise, or in the case of our equity method investments, our proportionate share of the investees net income.

Our future results are also dependent upon the level of our expenses, which are subject to fluctuation for the following or other reasons: changes in the level of our advertising expenses in response to market conditions, including our efforts to expand our investment advisory business to investors outside the U.S., and to further penetrate our distribution channels within the U.S.; variations in the level of total compensation expense due to, among other things, bonuses, stock option grants and other equity grants, other incentive awards, changes in our employee count and mix, and competitive factors; any goodwill or other asset impairment that may arise; fluctuation in foreign currency exchange rates applicable to our investment in and the costs of our international operations; expenses and capital costs, such as technology assets, depreciation, amortization, and research and development, incurred to maintain and enhance our administrative and operating services infrastructure; unanticipated costs that may be incurred to protect investor accounts and the goodwill of our clients; and disruptions of services, including those provided by third parties, such as fund accounting and other recordkeeping services, facilities, communications, power, and the mutual fund transfer agent and accounting systems.

Our business is also subject to substantial governmental regulation, and changes in legal, regulatory, accounting, tax, and compliance requirements may have a substantial effect on our operations and results, including but not limited to effects on costs that we incur and effects on investor interest in mutual funds and investing in general, or in particular classes of mutual funds or other investments.

#### Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There has been no material change in the information provided in Item 7A of the Form 10-K Annual Report for 2015.

#### Item 4. Controls and Procedures.

Our management, including our principal executive and principal financial officers, has evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2016. Based on that evaluation, our principal executive and principal financial officers have concluded that our disclosure controls and procedures as of September 30, 2016 are effective at the reasonable assurance level to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, including this Form 10-Q quarterly report, is recorded, processed, summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive and principal financial officers, has evaluated any change in our internal control over financial reporting that occurred during the third quarter of 2016, and has concluded that there was no change during the third quarter of 2016 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

## PART II – OTHER INFORMATION

### Item 1. Legal Proceedings.

On April 27, 2016, certain shareholders in the T. Rowe Price Blue Chip Growth Fund, T. Rowe Price Capital Appreciation Fund, T. Rowe Price Equity Income Fund, T. Rowe Price Growth Stock Fund, T. Rowe Price International Stock Fund, T. Rowe Price High Yield Fund, T. Rowe Price New Income Fund and T. Rowe Price Small Cap Stock Fund (the “Funds”) filed a Section 36(b) complaint under the caption Zoidis v. T. Rowe Price Assoc., Inc., against T. Rowe Price Associates, Inc. (“T. Rowe Price”) in the United States District Court for the Northern District of California. The complaint alleges that the management fees for the identified funds are excessive because T. Rowe Price charges lower advisory fees to subadvised clients with funds in the same strategy. The complaint seeks to recover the allegedly excessive advisory fees received by T. Rowe Price in the year preceding the start of the lawsuit, along with investments’ returns and profits. In the alternative, the complaint seeks the rescission of each fund’s investment management agreement and restitution of any allegedly excessive management fees. T. Rowe Price believes the claims are without merit and intends to vigorously defend the action.

In addition to the matter discussed above, various claims against us arise in the ordinary course of business, including employment-related claims. In the opinion of management, after consultation with counsel, the likelihood that an adverse determination in one or more pending claims would have a material adverse effect on our financial position or results of operations is remote.

### Item 1A. Risk Factors.

With the exception of the following additions or updates to the Legal and Regulatory Risks discussed in Item 1A of our Form 10-K Annual Report for 2015, there have been no material changes in the risk factors previously provided.

Legal and regulatory developments in the mutual fund and investment advisory industry could increase our regulatory burden, impose significant financial and strategic costs on our business, and cause a loss of, or impact the servicing of, our clients and fund shareholders.

Our regulatory environment is frequently altered by new regulations and by revisions to, and evolving interpretations of, existing regulations. New regulations present areas of uncertainty susceptible to alternative interpretations; regulators and prospective litigants may not agree with reasoned interpretations we adopt. Future changes could require us to modify or curtail our investment offerings and business operations, or impact our expenses and profitability. Additionally, some regulations may not directly apply to our business but may impact the capital markets, service providers or have other indirect effects on our ability to provide services to our clients.

Potential impacts of current or proposed legal or regulatory requirements include, without limitation, the following:

As part of the debate in Washington, D.C. related to the economy and the U.S. deficit, there has been increasing focus on the framework of the U.S. retirement system. We could incur increased costs if new regulatory requirements are adopted since retirement plans are a significant part of our client base and other types of retirement accounts invest in our mutual funds. In addition, changes to the current framework may impact our business in other ways. For example, proposals to reduce contributions to Individual Retirement Accounts and Defined Contribution plans for certain individuals, as well as potential changes to Defined Benefit plans, may result in increased plan terminations and reduce our opportunity to manage and service retirement assets.

In April 2016, the U.S. Department of Labor finalized changes to definitions and rules related to fiduciaries. These changes will require modifications to how we interact with retirement customers and prospects, and may cause us to limit certain types of distribution or other business activities. The Securities and Exchange Commission (SEC) is

considering its own fiduciary rule proposal. Any such rule may also have an impact on our business activities.

The Federal Reserve Board has adopted final regulations related to non-bank Systemically Important Financial Institutions (SIFIs), and other jurisdictions are contemplating similar regulation. It has been suggested that large mutual funds, particularly money market funds, should be designated as SIFIs. We do not believe that mutual funds should be deemed SIFIs. Further, we do not believe SIFI designation was intended for traditional asset management businesses. However, if any T. Rowe Price fund or T. Rowe Price affiliate is deemed a SIFI, increased regulatory oversight would apply, which may include enhanced capital, liquidity, leverage, stress testing, resolution planning, and risk management requirements.

On July 23, 2014, the SEC adopted additional reforms regulating money market funds that will become effective in October 2016. The reforms will require institutional non-government money market funds to operate with a floating net asset value (NAV) and require all non-government money market funds to impose liquidity fees and redemption gates under certain conditions. Government and retail money market funds will continue using current pricing and accounting methods to seek to maintain a stable NAV. The SEC adopted other reforms for money market funds, including additional disclosure and reporting requirements, tightening of diversification requirements, and enhanced stress testing. These reforms could have a negative impact on the attractiveness of such funds to investors and also subject us to additional regulatory requirements and costs to comply with such requirements.

The Commodity Futures Trading Commission has adopted certain amendments to its rules that would limit the ability of mutual funds and certain other products we sponsor to use commodities, futures, swaps, and other derivatives without additional registration. If our use of these products on behalf of client accounts increases so as to require registration, we would be subject to additional regulatory requirements and costs associated with registration.

There has been increased global regulatory focus on the manner in which intermediaries are paid for distribution of mutual funds. Changes to long-standing market practices related to fees or enhanced disclosure requirements may negatively impact sales of mutual funds by intermediaries, especially if such requirements are not applied to other investment products.

Global regulations on OTC derivatives are evolving, including new and proposed regulations under The Dodd-Frank Wall Street Reform and Consumer Protection Act and European Market Infrastructure Regulation relating to central clearing counterparties, trade reporting, and repositories. In addition, the SEC has adopted new regulations that will require mutual funds to adopt liquidity risk management programs with specific requirements for measuring and reporting the liquidity of fund holdings. It also has proposed regulations detailing new exposure limits and asset coverage requirements for investments in derivatives, as well as adopting derivatives risk management programs. There remains uncertainty related to various requirements under these regulations and the exact manner in which they will impact current trading strategies for our clients.

The revised Markets in Financial Instruments Directive (MiFID II Directive) and Regulation (MiFIR) (together “MiFID II”) will apply across the European Union (“EU”) and member states of the European Economic Area beginning on January 3, 2018, unless this date is extended. Implementation of MiFID II will significantly impact both the structure and operation of EU financial markets. Some of the main changes introduced under MiFID II include applying enhanced disclosure requirements, enhancing conduct of business and governance requirements, broadening the scope of pre and post trade transparency, increasing transaction reporting requirements, transforming the relationship between client commissions and research, and further regulation of trading venues. Compliance with MiFID II will increase our costs.

We cannot predict the nature of future changes to the legal and regulatory requirements applicable to our business, nor the extent of the impacts that will result from current or future proposals. However, any such changes are likely to increase the costs of compliance and the complexity of our operations. They may also result in changes to our product or service offerings. The changing regulatory landscape may also impact a number of our service providers and, to the extent such providers alter their services or increase their fees, it may impact our expenses or those of the products we offer.

#### United Kingdom Exit from European Union.

We have a significant locally authorized and regulated presence in the United Kingdom (“UK”) to support our global investment management business. The ultimate impact of the UK exit (“Brexit”) from the European Union (“EU”), as a result of the referendum vote at the end of June 2016, on our business operations in the UK and Europe could vary

depending on the details of the separation agreement. We are preparing for multiple scenarios, and remain committed to our clients, associates and business expansion across the region.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c) Repurchase activity during the third quarter of 2016 is as follows:

Month	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares that May Yet Be Purchased Under the Program
July	443,347	\$ 70.61	400,000	15,781,526
August	2,540,012	\$ 69.08	2,498,995	13,282,531
September	1,543,606	\$ 67.19	1,519,918	11,762,613
Total	4,526,965	\$ 68.58	4,418,913	

Shares repurchased by us in a quarter may include repurchases conducted pursuant to publicly announced board authorization, outstanding shares surrendered to the company to pay the exercise price in connection with swap exercises of employee stock options, and shares withheld to cover the minimum tax withholding obligation associated with the vesting of restricted stock awards. Of the total number of shares purchased during the third quarter of 2016, 107,717 were related to shares surrendered in connection with employee stock option exercises and 335 were related to shares withheld to cover tax withholdings associated with the vesting of restricted stock awards.

The 4,418,913 shares of our common stock were repurchased pursuant to the Board of Directors' December 11, 2014 and December 10, 2015, publicly announced authorizations. The maximum number of shares that may yet be purchased as of September 30, 2016, under the Board of Directors' December 10, 2015 publicly announced authorization is 11,762,613.

## Item 4. Mine Safety Disclosures.

Not applicable.

## Item 5. Other Information.

On October 27, 2016, we issued a press release reporting our results of operations for the third quarter of 2016 and first nine months of 2016. A copy of that press release is furnished herewith as Exhibit 99. This information shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933.

## SEC FILINGS.

We make available free of charge through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC.
