Financial Information

Item 2.02.

Results of Operations and Financial Condition.

AllianceBernstein Holding L.P. (“AllianceBernstein Holding”) is furnishing the news release it issued on January 24, 2007 concerning financial and operating results for the quarter and full year ended December 31, 2006 (“4Q06 Earnings Release”). The 4Q06 Earnings Release is attached hereto as Exhibit 99.01.

AllianceBernstein Holding is furnishing its Fourth Quarter 2006 Review, dated January 24, 2007 (“4Q06 Review”). The Fixed Income performance figures displayed on slide 36 reflect corrections to the version originally presented. The 4Q06 Review is attached hereto as Exhibit 99.02.

AllianceBernstein Holding is furnishing a transcript of its conference call with analysts relating to financial and operating results for the quarter and full year ended December 31, 2006 (“4Q06 Transcript”). The call took place on January 24, 2007. The 4Q06 Transcript is attached hereto as Exhibit 99.03.

The 4Q06 Earnings Release, 4Q06 Review, and the conference call with analysts (reflected in the 4Q06 Transcript) include forward looking statements predicting increases in net asset inflows, describing the likelihood of improved performance by growth equities relative to value equities, expecting an increase in assets under management subject to performance fees and a related increase in seasonal volatility, indicating anticipated expense levels, estimating the impact a clerical error may have on our earnings, and anticipating the recovery of most of the cost of this error. The actual performance of financial markets generally, how our performance measures against that of our competitors, and other factors we cannot control will affect our asset inflows and whether performance by growth equities relative to value equities improves. Performance-based fees are by nature seasonal and volatile and thus difficult to predict. Our expense levels in future periods depend in part on headcount and office space needed in response to the growth in volume, complexity and global nature of our firm. The estimate of the impact of the clerical error is based on very preliminary data. Accordingly, the estimated impact on earnings may prove inaccurate as we gather and analyze additional information. In addition, our ability to recover most of the cost of the error is dependent, in part, on the availability of funds from the related class-action settlement fund, the amount of which is not known, and the willingness of our insurers to reimburse us under existing policies for this cost.
