NOTE 1 BASIS OF PRESENTATION AND GOING CONCERN

OnScreen Technologies, Inc. (the Company) is commercializing its innovative OnScreenTM light emitting diode (LED) technology to the world of visual communications. The Company is focused on the design, development and sale of LED displays utilizing the OnScreenTM architecture. The Company seeks to develop innovative approaches to these products and delivery systems, which concentrates in the commercial and government markets.

The accompanying financial statements have been prepared on the assumption that the Company will continue as a going concern. As reflected in the accompanying financial statements, the Company has a net loss of \$5,586,815 and cash used in operations of \$3,714,306 for the nine months ended September 30, 2005. The ability of the Company to continue as a going concern is dependent on the Company's ability to bring the OnScreen(TM) products to market, generate increased sales, obtain positive cash flow from operations and raise additional capital. The financial statements do not include any adjustments that may result from the outcome of this uncertainty.

The Company is continuing to raise additional capital for the commercialization of its OnScreen(TM) technology product lines; which the Company believes will provide sufficient cash to meet its funding requirements to bring the OnScreen(TM) technology product lines into production during 2005 and 2006. As the Company continues to expand and develop its technology and product lines, additional funding will be required. The Company has experienced negative cash flows from operations and incurred net losses in the past and there can be no assurance as to the availability or terms upon which additional financing and capital might be available, if needed.

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the United States Securities and Exchange Commission for interim financial information which includes condensed financial statements. Accordingly, they do not include all the information and footnotes necessary for a comprehensive presentation of financial position and results of operations and should be read in conjunction with the Company's Annual Report, Form 10-KSB for the year ended December 31, 2004.

It is management's opinion that all material adjustments (consisting of normal recurring adjustments) have been made which are necessary for a fair financial statement presentation. The results for the interim period are not necessarily indicative of the results to be expected for the year.

NOTE 2 REVENUE

The Company recognizes revenue from its products when persuasive evidence of an arrangement exists, the product(s) has been shipped, collectability is reasonably assured and the price is fixed or determinable. In the event that the contract provides for multiple elements (e.g., products, installation and training), the total amount invoiced is allocated to these elements based on "vendor-specific objective evidence" of fair value. If any portion of the revenue is subject to forfeiture, refund or other contractual contingencies, the Company will postpone revenue recognition until these contingencies have been removed. The Company generally accounts for installation and training services separate from product revenue for those multi-element arrangements where services are a separate element and are not essential to the customer's functionality requirements and there is "vendor-specific objective evidence" of fair value for these services. Installation and education services revenue, is recognized when the service has been performed.

Revenue from warranty and maintenance activities is recognized ratably over the term of the warranty and maintenance period and the unrecognized portion is recorded as deferred revenue.

The Company records any rental income pro-rata as earned over the rental period.

NOTE 3 INVENTORY

Inventories are stated at the lower of cost (first-in, first-out basis) or market. All of the inventory is finished goods.

NOTE 4 LOSS PER COMMON SHARE

Common stock equivalents in the three- and nine-month periods ended September 30, 2005 and 2004 were anti-dilutive due to the net losses sustained by the Company during these periods, thus the diluted weighted average common shares outstanding in these periods are the same as the basic weighted average common shares outstanding.

NOTE 5 INCOME TAXES

The Company has not recognized an income tax benefit for its operating losses generated in the three- and nine-month periods ended September 30, 2005 and 2004 based on uncertainties concerning its ability to generate taxable income in future periods. The tax benefits for the three- and nine-month periods ended September 30, 2005 and 2004 is offset by a valuation allowance established against deferred tax assets arising from operating losses and other temporary differences, the realization of which could not be considered more likely than not. In future periods, tax benefits and related deferred tax assets will be recognized when management considers realization of such amounts to be more likely than not.

NOTE 6 STOCK-BASED EMPLOYEE COMPENSATION

For the stock options and warrants issued to employees, the Company has elected to apply the intrinsic value based method of accounting prescribed by Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations. Under the intrinsic value based method, compensation cost is measured on the date of grant as the excess of the fair market value of the underlying stock over the exercise price. Such compensation amounts are amortized over the respective vesting periods of the options.

The following table illustrates the effect on net loss and loss per share as if the fair value based method of accounting had been applied to stock-based employee compensation, as required by SFAS No. 123, "Accounting for Stock-Based Compensation" and SFAS 148 "Accounting for Stock-Based Compensation - transition and disclosure", an amendment of SFAS No. 123 for the three and nine months ended September 30, 2005 and 2004:

8

			====		===:		====	

The Company estimates the fair value of each stock option and warrant at the grant date by using the Black-Scholes option-pricing model.

NOTE 7 NOTES PAYABLE AND NOTES PAYABLE WITH RELATED PARTIES

During March 2005, the Company executed a \$1.5 million unsecured six-month promissory note with a related party. The interest rate is 15% per annum. Interest only payments are due monthly until maturity of the note when the principal is due, October 1, 2005. One of the Company's Board of Directors and another officer of the Company both have a controlling interest in the company that is the note holder. The Company defaulted on the note, but the note was extended to November 1, 2005 (see Note 12).

During the third quarter of 2005, the Company executed unsecured three-month convertible promissory notes totaling \$1.6 million. One of the note holders is the CFO who has a \$100,000 note with the same terms as the other note holders. The Company has the option to extend these notes for an additional three-month period. The Company intends to extend these notes. The interest rate is 12% per annum. Interest only payments are due monthly until the maturity of these notes at which time the principal is due. If the notes are paid prior to the maturity date or the extended maturity date, the Company is required to pay the interest for the entire three-month periods. The note holders have the right to convert their notes to common stock at the exercise price of 0.25 per share. The beneficial conversion intrinsic value related to the convertible feature of the debt was valued at \$994,074 and will be amortized over the three-month term of the notes. At September 30, 2005, \$516,593 remained on the Company's Balance Sheet as a discount to debt related to this convertible feature. There were two note holders who were eligible to receive 100,000 shares of common stock each (200,000 shares in total) based upon a \$500,000 investment each. These shares were valued at \$74,074 based upon the allocation of the \$1,000,000 proceeds received to debt and equity based upon their fair market values. As of September 30, 2005, \$37,037 of the \$74,074 discount had been amortized. The notes payable at September 30, 2005 was as follows:

9

Notes Payable\$1,500,000Discount - Shares issued(37,037)Discount - Beneficial conversion value(486,593)

Notes payable,	net of discount	\$	976,370
		===	

The notes payable, related parties at September 30, 2005 was as follows:

Notes Payable Discount-Beneficial conversion value	\$1,600,000 (30,000)
Notes payable, net of discount	\$1,570,000
Notes payable, net of discount	\$1 , 576 , 666

NOTE 8 TECHNOLOGY RIGHT AND LICENSE AGREEMENT

On February 16, 2005 the inventor of the OnScreenTM technology, who licensed to the Company the rights of the direct view LED video display technology conveyed to a third party company, all of the inventor's right, title and interest of the OnScreenTM technology. This third party company conveyed to the Company all right, title and interest of the OnScreenTM technology for \$200,000. One of the Company's Board of Directors and another officer of the Company both have a controlling interest in the third-party company that conveyed these rights. The Company now owns all patent rights to the OnScreenTM technology unencumbered subject to the rights of a separate party relating to the percentages of revenue from commercialization of the direct view LED video display technology.

NOTE 9 COMMITMENTS

On March 28, 2005, an addendum was made to the current business development director and previous CEO/President's employment agreement. The term of the agreement was extended three years expiring on December 31, 2008. The current business development director and previous CEO/President received an additional 2.1 million shares of the Company's common stock and the vehicle allowance was increased. Also in this addendum, the current business development director and previous CEO/President relinquished certain rights he had to revenue which he had previously been entitled to per his contract. The 2.1 million shares were valued at \$0.27 per share totaling \$567,000 based on contemporaneous cash sales and will be recorded as compensation expense over the remaining term of his employment agreement.

On June 13, 2005, the Company entered into a three-year employment agreement with a newly hired Chairman of the Board of Directors who was appointed CEO during the third quarter of 2005. The annual salary is \$225,000 and he will also be entitled to a stock bonus award totaling five million shares of the Company's common stock based upon continued employment at specified dates over a two-year period. The stock bonus awards are accelerated if the Company's stock price achieves certain price per share levels. The compensation expense related to the bonus shares will be expensed over the vesting period of each award. The total value of the awards as measured on the grant date was \$1,350,000 based on a \$0.27 per share contemporaneous cash sales price of which \$759,375 was recorded as compensation expense as of September 30, 2005 and \$354,375 was recorded as accrued compensation payable with common stock at September 30, 2005. At June 30, 2005, the Chairman was entitled to 1.5 million shares upon execution of his agreement which is recorded as common stock issuable at September 30, 2005.

10

During May 2005, the Director of Administrative Services' employment agreement automatically renewed for a three-year period. The annual salary is \$75,000 with an annual stock bonus of the Company's registered common stock equal in value to \$25,000.

On September 14, 2005, the Company entered into an agreement for a contractor to provide some research and development work on its products. The Company will retain all the rights and technology related to this work. For this work, the Company will pay this contractor \$100,000 of which \$50,000 had been paid at September 30, 2005. The \$50,000 paid was expensed to research and development during 2005 as the work had been performed.

NOTE 10 PREFERRED STOCK

During the nine months ended September 30, 2005, the Company converted 1,101,487 shares of the Company's Series A convertible preferred stock into 4,405,948 shares of the Company's common stock at the request of certain Series A convertible preferred stock holders.

During 2005, the Company issued 240,000 shares of its Series A convertible preferred stock to its COO/CFO in accordance with his employment agreement. The 240,000 shares were valued at \$1.00 per share based on contemporaneous cash sales around the grant date. The total value of these shares of \$240,000 is being expensed over the three-year employment agreement with \$100,000 deferred and \$140,000 expensed as of September 30, 2005.

NOTE 11 OTHER EQUITY TRANSACTIONS

During 2005, the Company issued 28,751 shares of its common stock to an employee in accordance with his employment agreement. These shares were valued at \$25,000 using a thirty-day average price at December 31, 2004, in accordance with the employee's employment agreement.

During April 2005, the landlord who had held 200,000 shares of the Company's common stock which were held contingent on payment of the rent returned the shares to the Company and the shares were cancelled. These shares had properly not been included as outstanding shares in the Company's financial statements since they were contingently returnable as collateral shares, therefore there was no financial accounting effect of this transaction.

In accordance with the employment agreement, during the nine months ended September 30, 2005, the Company repurchased 150,000 shares of common stock for \$225 from one of its employees who left the Company. These shares were recorded as treasury stock shares. During the third quarter of 2005, the Company cancelled these 150,000 shares of its common stock. These shares were not vested at the time the employee left the Company; therefore, additional paid-in-Capital and deferred compensation was reduced by \$151,500 during 2005.

During 2005, the Company repriced options to a former employee to purchase 1,050,000 shares of its common stock that previously had exercise prices ranging from \$0.25 to \$0.35 per share to an exercise price of \$0.20 per share. The Company recorded \$38,500 of compensation expense and additional paid-in-capital related to this transaction.

During 2005, the Company issued 200,000 shares of its common stock that it had accrued for at December 31, 2004.

11

During 2005, warrants and options were exercised to purchase 355,000 of the Company's common stock. The Company received \$99,250 of proceeds from these exercises of warrants and options. Also, during 2005, the Company reduced the deferred compensation account by \$27,200 for the cancellation of an option that was not fully vested when the employee left the Company.

During the third quarter of 2005, the Company issued 7,500 shares of its common

stock for the purchase of the website, www.onscreentechnologies.com. These shares were valued at \$3,000 using the quoted market price on the date of grant.

During the third quarter of 2005, the Company granted a stock option to an employee to purchase 5,000 shares of its common stock after a one-year vesting period. The exercise price was \$0.25 and the quoted market value of the Company's common stock was \$0.28 on the date of grant. The Company recorded an intrinsic value of \$150 related to this stock option.

On August 25, 2005, the Board of Directors approved the 2005 Equity Incentive Plan for 2,000,000 shares of the Company's common stock. The shareholders will vote to approve this plan during the 2005 annual shareholder meeting on December 13, 2005.

During the third quarter of 2005, there were \$15,726 of deferred stock issuance costs incurred which is included in other assets on the balance sheet.

NOTE 12 SUBSEQUENT EVENT

On October 4, 2005, the Company paid \$50,000 to extend a letter of intent for the sale and purchase of certain intellectual property. One of the Company's Board of Directors and another officer of the Company both have a controlling interest in the company that is selling the intellectual property. The letter of intent gives the Company the right to acquire the WayCool technology for \$800,000 and the issuance of warrants to acquire five percent of the Company's fully diluted equity securities after giving effect to the Company's fund raising efforts. The warrants will have the same pricing and terms issued in connection with our private equity fund raising.

During October and November 2005, the Company entered into unsecured three-month convertible promissory notes totaling \$1.7 million. The Company has the option to extend these notes for an additional three-month period. The interest rate is 12% per annum. Interest only payments are due monthly until the maturity of these notes at which time the principal is due. If the notes are paid prior to the maturity date or the extended maturity date, the Company is required to pay the interest for the entire three-month periods. The note holders have the right to convert their notes to common stock at the exercise price of \$0.25 per share. The beneficial conversion intrinsic value related to the convertible feature of the debt was valued at \$691,059 and will be amortized over the three-month term of the notes. Certain note holders who had notes of \$500,000 or greater will receive a total of 300,000 shares of common stock. These shares were valued at \$85,425 based upon the allocation of the \$1,500,000 proceeds received to debt and equity based upon their fair market values. The Company will pay \$64,000 of costs related to these notes which will be recorded as deferred finance fees and amortized over the term of the notes.

The maturity date of the \$1.5 million note payable which was due on October 1, 2005 was extended to November 1, 2005 and the Company paid a \$2,500 fee to extend this note held by a related party. In late October, this \$1.5 million note was paid off by a convertible bridge loan with the same terms as the Company's other convertible notes payable. The beneficial conversion intrinsic value related to the convertible feature of the debt was valued at \$17,303 and will be amortized over the three-month term of the notes. The Company will issue 300,000 shares of common stock in conjunction with this convertible bridge loan. These shares were valued at \$55,776 based upon the allocation of the \$1,500,000 proceeds received to debt and equity based upon their fair market values.

On November 11, 2005, the Company relocated its corporate offices to Portland, Oregon. A field office will remain in Florida. The Company estimates the costs associated with this move and restructuring is approximately \$61,000.

12

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

General

Management's discussion and analysis contains various "forward looking statements." Such statements consist of any statement other than a recitation of historical fact and can be identified by the use of forward-looking terminology such as "may," "expect," "anticipate," "estimate," or "continue" or use of negative or other variations or comparable terminology.

We caution that these statements are further qualified by important factors that could cause actual results to differ materially from those contained in the forward-looking statements, that these forward-looking statements are necessarily speculative, and there are certain risks and uncertainties that could cause actual events or results to differ materially from those referred to in such forward-looking statements.

Overview

OnScreen Technologies, Inc. (the Company) is commercializing its innovative OnScreenTM light emitting diode (LED) technology to the world of visual communications. The Company is focused on the design, development and sale of LED displays utilizing the OnScreenTM architecture. The Company seeks to develop innovative approaches to these products and delivery systems, which concentrates in the commercial and government markets.

The Company began shipping its living windowTM product during June 2005. The Company expects its other products will begin shipping during 2006. The Company completed its commercial prototype for RediAlertTM during August 2005. The Company does not expect to record any significant growth in revenues until its living windowTM product is fully deployed nationwide. The Company expects to continue to receive some revenue from its mobile LED truck.

During the nine months ended September 30, 2005, the Company continued to incur significant losses from operations. The Company incurred a net loss of \$5,586,815 for the nine months ended September 30, 2005. This net loss of \$5,586,815 includes non-cash charges of approximately \$1,417,000 for compensation and services expense including amortization of deferred compensation related to equity given or to be given to employees and consultants for services provided and \$514,518 of non-cash amortization of the intrinsic value of convertible debt and the debt discount.

A priority of management during 2005 is to continue to raise the capital needed to fund the development and marketing of the Company's OnScreen(TM) products. During the nine months ended September 30, 2005 the Company received proceeds of \$3.175 million for unsecured notes and \$84,250 from the exercise of warrants and options. These funds will assist the Company to continue to develop its OnScreen(TM) products and continue the Company's operations until the Company brings the OnScreen(TM) products to market. However, the Company anticipates expanding and developing its technology and product lines which will require additional funding.

Intellectual Property

The Company relies on various intellectual property laws and contractual restrictions to protect its proprietary rights in products, logos and services. These include confidentiality, invention assignment and nondisclosure agreements with the Company's employees,

13

contractors, suppliers and strategic partners. The confidentiality and nondisclosure agreements with employees, contractors and suppliers are in perpetuity or for a sufficient length of time so as to not threaten exposure of proprietary information. In addition, the Company intends to pursue the registration of its trademarks and service marks in the U.S. and internationally.

The Company continues to file and protect its intellectual property rights, trademarks and products through continued filings with the US Patent and Trademark Office and, as applicable, internationally.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that have a significant impact on the results we report in the Company's financial statements. Some of the Company's accounting policies require us to make difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Actual results may differ from these estimates under different assumptions or conditions.

Asset Impairment

The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset exceeds its fair value and may not be recoverable. In performing the review for recoverability, the Company estimates the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, an impairment loss is recognized as the excess of the carrying amount over the fair value. Otherwise, an impairment loss is not recognized. Management estimates the fair value and the estimated future cash flows expected. Any changes in these estimates could impact whether there was impairment and the amount of the impairment.

Valuation of Non-Cash Capital Stock Issuances

The Company values its stock transactions based upon the fair value of the equity instruments. Various methods can be used to determine the fair value of the equity instrument. The Company may use the fair value of the consideration received, the quoted market price of the stock or a contemporaneous cash sale of the common or preferred stock. Each of these methods may produce a different result. Management uses the method it determines most appropriately reflects the stock transaction. If a different method was used it could impact the expense, deferred stock and equity stock accounts.

Service Period of Employee Equity Transactions

The Company recognizes the compensation costs related to equity transactions over the period the services are performed. If the service period is not defined and the equity transaction is a part of an employee agreement, the service period is estimated to be the remaining portion of the contract even if the equity shares are issued prior to the services being rendered. Any changes in the estimate of when the service period is would impact the timing of when the compensation expense was recorded. For example if it was estimated that the shares had been issued for services already performed, the compensation expense would be recorded at the time the shares were issued.

Patent Costs

The Company estimates the patents it has filed have a future beneficial value to the Company, thus it capitalizes the costs associated with filing for its patents. At the time the patent is approved, the patent costs associated with the patent will be amortized over the useful life of the patent. If the patent is not approved, at that time the costs will be expensed. A change in the estimate of the patent having a future beneficial value to the Company will impact the other assets and expense accounts of the Company.

Revenue Recognition

The recognition of the Company's revenues requires judgment, including whether a sale includes multiple elements, and if so, whether vendor-specific objective evidence (VSOE) of fair value exists for those elements. Customers receive certain elements of our products over a period of time. These elements include installation and training services. The ability to identify VSOE for those elements and the fair value of the respective elements could materially impact the amount of earned and unearned revenue. Also, the Company offers an extended warranty for which the revenues are initially recorded as deferred revenue and recorded to revenue ratably over the applicable warranty period. The Company does not have any history as to the costs expected to be incurred in performing these services.

Liquidity and Capital Resources

General

The Company's cash and cash equivalents balance at September 30, 2005 is \$870,391. The Company has a negative working capital balance at September 30, 2005 of \$2,024,130. The Company has funded its operations and investments in equipment through cash from operations, equity financings and borrowing from private parties as well as related parties. It has also funded its operations through stock paid to vendors, consultants and certain employees.

Cash used in operations

The Company's operating requirements generated a negative cash flow from operations of \$3,714,306 for the nine months ended September 30, 2005.

During the first nine months of 2005 and 2004, the Company has used stock and warrants as a form of payment to certain vendors, consultants and employees. For the first nine months of 2005, the Company recorded a total of approximately \$1,398,000 for compensation and services expense including amortization of deferred compensation related to equity given or to be given to employees and consultants for services provided.

As the Company focuses on the OnScreen(TM) technology during 2005, it will continue to fund research and development related to the OnScreen(TM) products as well as sales and marketing efforts related to these products. The Company does not expect to record much revenue until its living windowTM product is fully deployed nationwide. The living windowTM product began shipping in June 2005 and the Company's other products are expected to begin shipping during 2006.

Capital Expenditures and Investments

During the first nine months of 2005, the Company invested approximately \$91,000 in fixed assets which includes approximately \$24,000 for mainly computer equipment and software used for sales, marketing, research and development and administration and approximately \$67,000 for OnScreenTM products to be used for sales demonstrations at customer sites.

During the remainder of 2005, the Company anticipates that its capital expenditures should not significantly change. The Company outsources the manufacture of its products.

The Company invested \$329,412 in patent costs during the first nine months of 2005. The Company expects its investment in patent costs will continue throughout 2005 as it invests in patents to protect the rights to use its OnScreenTM product developments.

The Company received \$396,351 of proceeds from the sales of marketable securities during the first nine months of 2005.

Financing activities

During the first nine months of 2005, the Company received \$84,250 of proceeds from the exercise of warrants and options and \$1.5 million of proceeds from unsecured notes with a six- month term and \$1.6 million of proceeds from convertible three-month unsecured notes. The convertible notes have an exercise price of \$0.25 per share and a three-month term with a three-month extension. The Company plans on raising the capital needed to payoff the notes payable and to fund the further development and marketing of the Company's products. During the first nine months of 2005, the Company paid \$121,250 of cash dividends on its Series A convertible preferred stock. During the second quarter of 2005, the Company paid \$225 to buy 150,000 shares of its common stock in accordance with an agreement the Company had with an employee as part of the employee's separation from the Company. In conjunction with the fund raising efforts of the Company, the Company incurred \$15,726 of deferred stock issuance costs.

During October and November 2005, the Company received \$1.7 million of proceeds from convertible three-month unsecured notes. The convertible notes have an exercise price of \$0.25 per share and a three-month term with a three-month extension. The Company paid fees of \$64,000. The Company also replaced its \$1.5 million unsecured loan which was due with a \$1.5 million convertible three-month unsecured note with the same terms as the other convertible debt.

Recap of liquidity and capital resources

The Company is seeking to raise additional capital for the commercialization of its OnScreen(TM) technology product lines which the Company believes will provide sufficient cash to meet its short-term working capital requirements for the next twelve months. As the Company continues to expand and develop its technology and product lines, additional funding will be required. The Company will attempt to raise these funds through borrowing instruments or issuing additional equity.

The Company received \$1,600,000 of proceeds from a private placement of convertible notes during the third quarter of 2005 and this private placement of convertible notes is continuing during the fourth quarter of 2005 with \$1,700,000 of proceeds received during October and November 2005. The \$1.5 million unsecured loan that was due on November 1, 2005 was replaced with a \$1,500,000 convertible note. These convertible notes have three-month terms with a three-month extension at the option of the Company. The proceeds from the sale of such securities should be sufficient to satisfy the Company's short-term working capital requirements.

Management of the Company believes that equity financing or debt will be available to fund its operations until revenue streams are sufficient to fund operations; however, the terms and timing of such equity or debt cannot be predicted and there is no assurance that such financing will close. Management expects the OnScreenTM LED technology to be

commercialized during 2005 and 2006. The Company cannot assure that it will generate revenues by that date or that its revenues will be sufficient to cover all operating and other expenses of the Company. If revenues are not sufficient to cover all operating and other expenses, the Company will require additional funding. There is no assurance the Company will be able to raise such additional capital. The failure to raise additional capital or generate product sales in the expected time frame will have a material adverse effect on the Company.

Results of Operations

Revenue

During the nine months ended September 30 2005, revenue was \$90,653 and \$137,836 for the same period during 2004. The revenue for the nine months ended September 30, 2005 is comprised of \$53,477 from living windowTM products and related add-ons and \$37,176 from the LED Truck rental. For the nine months ended September 30, 2004, the Company recorded \$74,900 of revenue from the LED Truck and \$62,936 of other revenue.

During the three months ended September 30 2005, revenue was \$37,534 and \$56,643 for the same period during 2004. The revenue for the three months ended September 30, 2005 is comprised of \$36,034 from living windowTM products and related add-ons and \$1,500 from the LED Truck rental. For the three months ended September 30, 2004, the Company recorded \$6,440 of revenue from the LED Truck and \$50,203 from distributor's fees.

The Company began shipping its living windowTM product during late June 2005. As the living windowTM product penetrates the marketplace, the Company's expects its revenues will increase during 2005 compared to the prior quarters.

Cost of revenue

The cost of revenue for the nine months ended September 30, 2005 and 2004 was \$121,185 and \$488, respectively. For the three months ended September 30, 2005 and 2004, the cost of revenue was \$57,945 and \$0, respectively. While the Company's sales are low, it expects the cost of sales to fluctuate between periods as a percentage of its revenues.

During 2005, the Company refined its process of capturing the costs associated with the LED truck, thus the costs are higher for cost of sales related to the LED truck than for the same period in 2004.

Selling, General and Administrative Expenses Selling, General and Administrative (SG&A) expenses includes such items as wages, consulting, general office expenses, business promotion expenses and costs of being a public company including legal and accounting fees, insurance and investor relations.

SG&A expenses decreased from \$5,929,381 for the nine months ended September 30, 2004 to \$3,846,076 for the same period during 2005. This decrease of \$2,083,305 is primarily the result of decreased consulting expenses of approximately \$2,328,000 which is offset by increased compensation expenses of approximately \$137,000.

SG&A expenses increased \$371,836 for the three months ended September 30, 2005 compared to the same period in 2004. This increase is primarily the result of increased compensation costs of approximately \$616,000 which is offset by decreased consulting expenses of approximately \$157,000.

During 2004, the Company had issued equity for certain consulting services

provided to the Company. During 2005, the Company did not incur these consulting services as it had hired employees to assist with the functions previously provided by the consultants. This resulted in the decrease of \$157,000 and \$2,328,000 in consulting expense during the three and nine months ended September 30, 2005, respectively, compared to the same period in 2004.

For the nine months ended September 30, 2005 compared to 2004, the increase in compensation was due mainly to the expenses associated with an increase in the number of employees during 2005 to assist with the commercialization of the OnScreenTM product lines. The Company recorded a non-cash compensation of \$1,398,000 and \$1,433,000 for the nine months ended September 30, 2005 and 2004. For the three months ended September 30, 2005 compared to 2004, the increase in compensation expense was mainly due to the non-cash compensation of \$470,000 recorded for the three months ended September 30, 2005, and the expenses associated with an increase in the number of employees during 2005 to assist with the commercialization of the OnScreenTM product lines.

The company anticipates its sales and marketing expenditures to increase during the remainder of 2005 compared to the first nine months of 2005 as the Company is in the process of the commercialization and marketing of its OnScreen(TM) product lines. The other general and administrative expenses will also increase during the remainder of 2005 as the Company puts the infrastructure in place to support the shipping of the OnscreenTM products.

Research and Development

The research and development costs are related to the OnScreen(TM) technology to which the Company acquired the licensing rights. The increase of \$95,627 and \$371,836 in research and development during the three and nine months ended September 30, 2005, respectively compared to the same period in 2004 is a result of activities to further research and develop the OnScreen(TM) technology and products. The Company anticipates increasing its expenditures in research and development during the remainder of 2005 compared to 2004.

Other Income

The Other Income remained relatively unchanged during the three and nine months ended September 30, 2005 compared to the same period in 2004. The Company does not expect this item to be significant during the balance of 2005.

Settlement Gain (Loss), Net

The Company did not have any significant settlement gain (loss) during the three and nine months ended September 30, 2005.

The net settlement gain for the three months ended September 30, 2005 was due mainly to the Company making a payment of \$68,121 to settle a consulting agreement and nine months ended September 30, 2004 was mainly due to the settlement of a disputed convertible promissory note which resulted in the Company recording a settlement gain of \$267,458.

Intrinsic value of convertible debt and amortization of debt discount

The Company recorded an expense of \$487,312 and \$514,518 for the three and nine months ended September 30, 2005, respectively for the intrinsic value of convertible debt and the amortization of debt discount. The total intrinsic value of convertible debt recorded was \$994,074 and a debt discount of \$74,074. These amounts will be amortized to expense over the three-month term of the notes.

Interest Expense

The interest expense of \$103,657 and \$132,701 for the three and nine months ended September 30, 2005, respectively is for the interest on the \$1.5 million unsecured note entered into during March 2005 and the \$1.6 million of unsecured convertible notes entered into during the third quarter of 2005. The Company will continue to incur interest on these notes until they are paid off.

The interest expense of \$64,070 for the nine months ended September 30, 2004, was for \$46,500 of non-cash interest related to the value of options issued under default provisions of certain notes and \$17,570 of other non-cash interest. The \$8,558 of interest expense for the three months ended September 30, 2004 was for non-cash interest.

Preferred Stock Dividends

During the nine months ended September 30, 2005 and 2004, the Company recorded Series A Convertible Preferred Stock dividends of \$154,350 and \$391,747, respectively. During the three months ended September 30, 2005 and 2004, the Company recorded Series A Convertible Preferred Stock dividends of \$48,144 and \$195,725, respectively. The Company expects the preferred stock dividends will be lower for 2005 compared to 2004 as some of the preferred stock was converted into common stock during 2005.

Item 3. Controls and Procedures

Within 90 days prior to the filing of this report, the Company carried out an evaluation, under the supervision and with the participation of its management, including the Chief Executive Officer and Chief Financial Officer, of the design and operation of its disclosure controls and procedures. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective for the gathering, analyzing and disclosing the information the Company is required to disclose in the reports it files under the Securities Exchange Act of 1934, within the time periods specified in the SEC's rules and forms. There have been no significant changes in the Company's internal controls or in other factors that could significantly affect internal controls subsequent to the date of this evaluation.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

On July 1, 2004, the Company filed a lawsuit against Mobile Magic Superscreen, Ltd. (breach of contract and civil conversion), Capitol City Trailers, Inc. (civil conversion) and another party (civil fraud) in the Court of Common Pleas of Franklin County, Ohio, Case Number 04 CVH 6884. This lawsuit relates to the 2001 contract with Mobile Magic Superscreen, Ltd. for the fabrication of a mobile LED superscreen that Mobile Magic failed to complete and deliver. The case against Capitol City Trailers, Inc. has been settled favorably for the Company and the jury trial against Mobile Magic Superscreen, Ltd. was continued to a trial date not yet set.

19

Item 2. Changes in Securities.

Common Stock Issued

The company relied on Section 4(2) of the Securities Act of 1933 as the basis for an exemption from registration for this issuance. During the third quarter of 2005, the Company issued 7,500 shares of its common stock to acquire a website name. These shares were valued at \$3,000.

The company relied on Section 4(2) of the Securities Act of 1933 as the basis for an exemption from registration for this issuance. During the third quarter of 2005, the Company issued 20,000 shares of its common stock for the exercise of a warrant. The warrant was exercised for proceeds of \$15,000.

The company relied on Section 4(2) of the Securities Act of 1933 as the basis for an exemption from registration for this issuance. During the third quarter of 2005, certain Series A Preferred Stock holders converted 25,000 shares of Series A Preferred Stock to 100,000 shares of the Company's common stock.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Submission of Matters to a Vote of Security Holders.

None

Item 5. Other Information.

None

Item 6. Exhibits

(a) Exhibits

Exhibit Number

Description

- 31.1 Certification of Chief Executive Officer pursuant to Exchange Act Rules 13a-15(e) and 15d-15(e), as adopted pursuant to Section 203 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer pursuant to Exchange Act Rules 13a-15(e) and 15d-15(e), as adopted pursuant to Section 203 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer pursuant to 18U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer pursuant to 18U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
