FORM 10-Q
QUARTER ENDED March 31, 2009

The Quarterly Report on Form 10-Q contains historical information and forward-looking statements. Statements looking forward in time are included in this Form 10-Q pursuant to the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. They involve known and unknown risks and uncertainties that may cause the Company’s actual results in the future to differ from performance suggested herein. In the context of forward-looking information provided in this Form 10-Q and in other reports, please refer to the discussion of risk factors detailed in, as well as the other information contained in the Company’s filings with the Securities and Exchange Commission.

PART I – CONDENSED CONSOLIDATED FINANCIAL INFORMATION

Item 1. Condensed Consolidated Financial Statements

INTRODUCTION TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The unaudited interim condensed consolidated financial statements included herein have been prepared by Calgon Carbon Corporation and subsidiaries (the Company), without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. Management of the Company believes that the disclosures are adequate to make the information presented not misleading when read in conjunction with the Company's audited consolidated financial statements and the notes included therein for the year ended December 31, 2008, as filed with the Securities and Exchange Commission by the Company in Form 10-K.

In management's opinion, the unaudited interim condensed consolidated financial statements reflect all adjustments, which are of a normal and recurring nature, and which are necessary for a fair presentation, in all material respects, of financial results for the interim periods presented. Operating results for the first three months of 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009.

CALGON CARBON CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in Thousands)
(Unaudited)

1. Inventories

	March 31, 2009	December 31, 2008
Raw materials	\$ 26,971	\$ 27,241
Finished goods	71,760	66,484
	\$ 98,731	\$ 93,725

2. Supplemental Cash Flow Information

Cash paid for interest during the three months ended March 31, 2009 and 2008 was \$0.3 million and \$2.1 million, respectively. Income taxes paid, net of refunds, were \$ 0.7 million and \$2.7 million, for the three months ended March 31, 2009 and 2008, respectively.

The Company has reflected \$1.8 million of its capital expenditures as a non-cash increase in accounts payable and accrued liabilities for the three months ended March 31, 2009.

3. Dividends

The Company's Board of Directors did not declare or pay a dividend for the quarters ended March 31, 2009 and 2008.

4. Comprehensive Income

	Three Months Ended March 31,	
	2009	2008
Net income	\$ 5,974	\$ 10,373
Other comprehensive income (loss), net of taxes	(3,631)	3,900
Comprehensive income	\$ 2,343	\$ 14,273

The only matters contributing to the other comprehensive (loss) during the three months ended March 31, 2009 was the foreign currency translation adjustment of \$(3.4) million, the changes in employee benefit accounts of \$0.4 million, and the change in the fair value of the derivative instruments of \$(0.6) million. The only matters contributing to the other comprehensive income during the three months ended March 31, 2008 was the foreign currency translation adjustment of \$3.4 million, the changes in employee benefit accounts of \$0.1 million, and the change in the fair value of the derivative instruments of \$0.4 million.

5. Segment Information

The Company's management has identified three segments based on product line and associated services. Those segments include Activated Carbon and Service, Equipment, and Consumer. The Company's chief operating decision maker, its chief executive officer, receives and reviews financial information in this format. The Activated Carbon and Service segment manufactures granular activated carbon for use in applications to remove organic compounds from liquids, gases, water, and air. This segment also consists of services related to activated carbon including reactivation of spent carbon and the leasing, monitoring, and maintenance of carbon fills at customer sites. The service portion of this segment also includes services related to the Company's ion exchange technologies for treatment of groundwater and process streams. The Equipment segment provides solutions to customers' air and liquid process problems through the design, fabrication, and operation of systems that utilize the Company's enabling technologies: carbon adsorption, ultraviolet light, and advanced ion exchange separation. The Consumer segment brings the Company's purification technologies directly to the consumer in the form of products and services including carbon cloth and activated carbon for household odors. The following segment information represents the results of the Company's continuing operations:

	Three Months Ended March 31,	
	2009	2008
Net sales		
Activated Carbon and Service	\$ 77,763	\$ 76,898
Equipment	10,899	9,697
Consumer	1,971	3,736
	\$ 90,633	\$ 90,331
Income (loss) from operations before depreciation and amortization		
Activated Carbon and Service	\$ 11,882	\$ 17,376
Equipment	975	3,443
Consumer	(145)	706
	12,712	21,525
Depreciation and amortization		
Activated Carbon and Service	3,360	3,483
Equipment	302	318
Consumer	114	125
	3,776	3,926
Income from operations	8,936	17,599
Reconciling items:		
Interest income	127	432
Interest expense	(21)	(2,087)
Other expense – net	(428)	(90)
Income from operations before income tax and equity in income from equity investments	\$ 8,614	\$ 15,854

	March 31, 2009	December 31, 2008
Total Assets		
Activated Carbon and Service	\$ 334,281	\$ 334,675
Equipment	43,326	38,867
Consumer	13,794	13,720
Consolidated total assets	\$ 391,401	\$ 387,262

6. Derivative Instruments

The Company's corporate and foreign subsidiaries use foreign currency forward contracts and foreign exchange option contracts to limit the exposure of exchange rate fluctuations on certain foreign currency receivables, payables, and other known and forecasted transactional exposures for periods consistent with the expected cash flow of the underlying transactions. The foreign currency forward and foreign exchange option contracts generally mature within eighteen months and are designed to limit exposure to exchange rate fluctuations. The Company uses cash flow hedges to limit the exposure to changes in natural gas prices. The natural gas forward contracts generally mature within one to thirty-six months. The Company also has a ten-year foreign currency swap agreement to fix the foreign exchange rate on a \$6.5 million intercompany loan between the Company and its foreign subsidiary, Chemviron Carbon Ltd. Since its inception, the foreign currency swap has been treated as a foreign exchange cash flow hedge.

The Company accounts for its derivative instruments under Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended ("SFAS No. 133"). This standard requires recognition of all derivatives as either assets or liabilities at fair value and may result in additional volatility in both current period earnings and other comprehensive income as a result of recording recognized and unrecognized gains and losses from changes in the fair value of derivative instruments.

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities – an amendment of FASB Statement No. 133" ("SFAS No. 161"). SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133 to provide qualitative and quantitative information on how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. The Company adopted SFAS No. 161 on January 1, 2009, as required.

Edgar Filing: CALGON CARBON CORPORATION - Form 10-Q

The fair value of outstanding derivative contracts recorded as assets in the accompanying Consolidated Balance Sheets were as follows:

Asset Derivatives	Balance Sheet Locations	March 31, 2009	December 31, 2008
Derivatives designated as hedging instruments under SFAS No. 133:			
Foreign Exchange Contracts	Other current assets	\$ 2,154	\$ 1,153
Currency Swap	Other assets	667	662
Natural Gas Contracts	Other assets	2	0
Total derivatives designated as hedging instruments under SFAS No. 133			
		2,823	1,815
Derivatives not designated as hedging instruments under SFAS No. 133:			
Foreign Exchange Contracts	Other current assets	\$ 10	\$ 14
Total derivatives not designated as hedging instruments under SFAS No. 133			
		10	14
Total Asset derivatives		\$ 2,833	\$ 1,829

The fair value of outstanding derivative contracts recorded as liabilities in the accompanying Consolidated Balance Sheets were as follows:

Liability Derivatives	Balance Sheet Locations	March 31, 2009	December 31, 2008
Derivatives designated as hedging instruments under SFAS No. 133:			
Foreign Exchange Contracts	Accounts payable and accrued liabilities	\$ 186	\$ 63
Natural Gas Contracts	Accounts payable and accrued liabilities	2,312	1,323
Natural Gas Contracts	Accrued Pension and other liabilities	1,552	1,048
Total derivatives designated as hedging instruments under SFAS No. 133			
		4,050	2,434
Derivatives not designated as hedging instruments under SFAS No. 133:			
Foreign Exchange Contracts	Accounts payable and accrued liabilities	\$ 8	\$ 39
Total derivatives not designated as hedging instruments under SFAS No. 133			
		8	39
Total Liability derivatives		\$ 4,058	\$ 2,473

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
 - Level 3 – Unobservable inputs that reflect the reporting entity's own assumptions.

In accordance with SFAS No. 157, "Fair Value Measurements," the fair value of the Company's foreign exchange forward contracts, foreign exchange option contracts, currency swap, and natural gas forward contracts is determined using Level 2 inputs, which are defined as observable inputs. The inputs used are from market sources that aggregate data based upon market transactions.

Cash Flow Hedges

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income (OCI) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings, and were not material for the three month periods ended March 31, 2009 and 2008, respectively.

	Amount of Gain or (Loss) Recognized in OCI on Derivatives (Effective Portion) Three Months Ended March 31,	
Derivatives in SFAS No. 133 Cash Flow Hedging Relationships:	2009	2008
Foreign Exchange Contracts	\$ 1,968	\$ (948)
Currency Swap	667	(615)
Natural Gas Contracts	(3,863)	1,159
Total	\$ (1,228)	\$ (404)

Derivatives in SFAS No. 133 Cash Flow Hedging Relationships:	Location of Gain or (Loss) Recognized in Income on Derivatives	Amount of Gain or (Loss) Reclassified from Accumulated OCI in Income (Effective Portion) *	
		Three Months Ended March 31,	
		2009	2008
Foreign Exchange Contracts	Cost of products sold	\$ 301	\$ -
Currency Swap	Interest expense	10	(50)
Natural Gas Contracts	Cost of products sold	(162)	(162)
Total		\$ 149	\$ (212)

Derivatives in SFAS No. 133 Cash Flow Hedging Relationships:	Location of Gain or (Loss) Recognized in Income on Derivatives	Amount of Gain or (Loss) Recognized in Income on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing) **	
		Three Months Ended March 31,	
		2009	2008
Foreign Exchange Contracts	Other expense – net	\$ (4)	\$ -
Currency Swap	Other expense – net	-	-
Natural Gas Contracts	Other expense – net	-	-
Total		\$ (4)	\$ -

* Assuming market rates remain constant with the rates at March 31, 2009, a loss of \$0.6 million is expected to be recognized in earnings over the next 12 months.

** For the three months ended March 31, 2009 and 2008, the amount of loss recognized in income represents \$4 thousand and zero, respectively, related to the ineffective portion of the hedging relationships.

The Company had the following outstanding derivative contracts that were entered into to hedge forecasted transactions:

(in thousands except for mmbtu)	March 31, 2009	December 31, 2008
Natural gas contracts (mmbtu)	1,270,000	1,290,000
Foreign exchange contracts	\$ 23,428	\$ 21,386
Currency swap	\$ 4,136	\$ 4,293

Other

The Company has also entered into certain derivatives to minimize its exposure of exchange rate fluctuations on certain foreign currency receivables, payables, and other known and forecasted transactional exposures. The Company has not qualified these contracts for hedge accounting treatment and therefore, the fair value gains and losses on these contracts are recorded in earnings as follows:

Derivatives Not Designated as Hedging Instruments Under SFAS No. 133:	Location of Gain or (Loss) Recognized in Income on Derivatives	Amount of Gain or (Loss) Recognized in Income on Derivatives Three Months Ended March 31,	
		2009	2008
Foreign Exchange Contracts *	Other expense – net	\$ (157)	\$ (29)
Total		\$ (157)	\$ (29)

* As of March 31, 2009 and 2008, these foreign exchange contracts were entered into and settled during the respective periods.

Management's policy for managing foreign currency risk is to use derivatives to hedge up to 75% of the forecasted intercompany sales to its European subsidiaries. The hedges involving foreign currency derivative instruments do not span a period greater than eighteen months from the contract inception date. Management uses various hedging instruments including, but not limited to foreign currency forward contracts, foreign currency option contracts and foreign currency swaps. Management's policy for managing natural gas exposure is to use derivatives to hedge from 25% to 100% of the forecasted natural gas requirements. These cash flow hedges span up to thirty-six months from the contract inception date. Hedge effectiveness is measured on a quarterly basis and any portion of ineffectiveness is recorded directly to the Company's earnings.

7. Contingencies

The Company purchased the common stock of Advanced Separation Technologies Incorporated (“AST”) from Progress Capital Holdings, Inc. and Potomac Capital Investment Corporation on December 31, 1996. On January 12, 1998, the Company filed a claim for unspecified damages in the United States District Court for the Western District of Pennsylvania alleging among other things that Progress Capital Holdings and Potomac Capital Investment Corporation materially breached various AST financial and operational representations and warranties included in the Stock Purchase Agreement and had defrauded the Company. A jury returned a verdict in favor of the Company and against the defendants in the amount of \$10.0 million on January 26, 2007. After the Court denied all post-trial motions, including the defendants’ motion for a new trial and the Company’s motion for the award of prejudgment interest, all parties appealed to the United States Circuit Court of Appeals for the Third Circuit. The parties settled the case in January 2008 when the defendants agreed to pay the Company \$9.25 million. This sum was received and recorded into operations during February 2008. Of the settlement amount recorded into operations, approximately \$5.3 million was recorded in the Activated Carbon and Service segment and \$4.0 million was recorded in the Equipment segment.

In conjunction with the February 2004 purchase of substantially all of Waterlink’s operating assets and the stock of Waterlink’s U.K. subsidiary, several environmental studies were performed on Waterlink’s Columbus, Ohio property by environmental consulting firms which identified and characterized areas of contamination. In addition, these firms identified alternative methods of remediating the property, identified feasible alternatives and prepared cost evaluations of the various alternatives. The Company concluded from the information in the studies that a loss at this property is probable and recorded the liability as a component of noncurrent other liabilities in the Company’s consolidated balance sheet. At March 31, 2009 and December 31, 2008, the balance recorded was \$4.0 million. Liability estimates are based on an evaluation of, among other factors, currently available facts, existing technology, presently enacted laws and regulations, and the remediation experience of other companies. The Company has not incurred any environmental remediation expense for the periods ended March 31, 2009 and 2008. It is reasonably possible that a change in the estimate of this obligation will occur as remediation preparation and remediation activity commences in the future. The ultimate remediation costs are dependent upon, among other things, the requirements of any state or federal environmental agencies, the remediation methods employed, the final scope of work being determined, and the extent and types of contamination which will not be fully determined until experience is gained through remediation and related activities. The accrued amounts are expected to be paid out over the course of several years once work has commenced. The Company has yet to make a determination as to when it will proceed with remediation efforts.

On March 8, 2006, the Company and another U.S. producer of activated carbon formally requested that the United States Department of Commerce investigate unfair pricing of certain activated carbon imported from the People’s Republic of China. The Commerce Department investigated imports of activated carbon from China that is thermally activated using a combination of heat, steam and/or carbon dioxide. Certain types of activated carbon from China, most notably chemically-activated carbon, were not investigated.

On March 2, 2007, the Commerce Department published its final determination (subsequently amended) that all of the subject merchandise from China was being unfairly priced, or dumped, and thus that special additional duties should be imposed to offset the amount of the unfair pricing. The final tariff rates ranged from 61.95 percent ad valorem (i.e., of the entered value of the goods) to 228.11 percent ad valorem. A formal order imposing final tariffs was published on April 27, 2007. All imports from China remain subject to the order and antidumping tariffs. Importers of subject activated carbon from China are required to make cash deposits of estimated antidumping tariffs at the time the goods are entered into the United States customs territory. Deposits of tariffs are subject to future revision based on retrospective reviews conducted by the Commerce Department. With one limited exception, the amount of tariffs owed for the period of review can decrease or increase retroactively based on the government's subsequent review of the actual prices at which the entries were sold.

The Company is both a domestic producer and one of the largest U.S. importers (from our wholly-owned subsidiary Calgon Carbon (Tianjin) Co., Ltd.) of the activated carbon that is subject to this proceeding. As such, the Company is involved in the Commerce Department's proceedings both as a domestic producer (a "petitioner") and as a foreign exporter (a "respondent").

As one of two U.S. producers involved as petitioners in the case, the Company is actively involved in ensuring the Commerce Department obtains the most accurate information from the foreign producers and exporters involved in the review, in order to calculate the most accurate results and margins of dumping for the sales at issue.

As an importer of activated carbon from China and in light of the successful antidumping tariff case, the Company was required to pay deposits of estimated antidumping tariffs at the rate of 84.45 percent ad valorem to the Bureau of Customs and Border Protection ("Customs") on entries made on or after October 11, 2006 through April 9, 2007. Thereafter, deposits have been paid at 69.54 percent. Because of limits on the government's legal authority to impose provisional tariffs prior to issuance of a final determination, entries made between April 9, 2007 and April 19, 2007 were not subject to tariffs.

The Company's role as an importer that is required to pay tariffs results in a contingent liability related to the final amount of tariffs that will be paid. The Company has made deposits of estimated tariffs in two ways. First, estimated tariffs on entries in the period from October 11, 2006 through April 9, 2007 were covered by a bond. The total amount of tariffs that can be paid on entries in this period is capped as a matter of law, though the Company may receive a refund with interest of any difference due to a reduction in the actual margin of dumping found in the first review. The Company's estimated liability for tariffs during this period of \$0.8 million is reflected in accounts payable and accrued liabilities on the consolidated balance sheets at March 31, 2009 and December 31, 2008, respectively. Second, the Company has been required to post cash deposits of estimated tariffs owed on entries of subject merchandise since April 19, 2007. The final amount of tariffs owed on these entries may change, and can either increase or decrease depending on the final results of relevant administrative inquiries. This process is briefly described below.

The amount of estimated antidumping tariffs payable on goods imported into the United States is subject to review and retroactive adjustment based on the actual amount of dumping that is found. To do this, the Commerce Department conducts periodic reviews of sales made to the first unaffiliated U.S. customer, typically over the prior 12 month period. These reviews will be possible for at least five years, and can result in changes to the antidumping tariff rate (either increasing or reducing the rate) applicable to any given foreign exporter. Revision of tariff rates has two effects. First, it will alter the actual amount of tariffs that Customs will seek to collect for the period reviewed, by either increasing or decreasing the amount to reflect the actual amount of dumping that was found. Where the actual amount of tariffs owed increases, the government will require payment of the difference plus interest. Conversely, when the tariff rate decreases, any difference is refunded with interest. Second, the revised rate becomes the cash deposit rate applied to future entries, and can either increase or decrease the amount of deposits an importer will be required to pay.

The Company currently is in the midst of the first such review. Because it is the first review conducted under the antidumping tariff order, the review covers the period from October 11, 2006 through March 31, 2008 instead of the typical 12 month period. The preliminary results of the review were announced on May 1, 2009 and indicated that Calgon Carbon (Tianjin) Co., Ltd.'s tariff rate could increase from 69.54% to 188.57%. However, other respondents' preliminary review results indicated a decline to their tariff rates for the review period. The announced preliminary review results are based on information provided by respondents that has not yet been verified. Errors may have been made in the review and the important decisions that affect the tariff are subject to reconsideration before the final results of the review are announced. The respondents, including Calgon Carbon (Tianjin) Co., Ltd., are subject to additional requests for information and on-site verification by the Commerce Department of the accuracy of the information that has been presented. The review must be completed no later than early November 2009. Any increase in the tariff assessment rate for this review period would not likely result in an additional payment until 2010, if at all. In addition, until the tariff rate is finalized in early November 2009, the tariff deposit rate will not change. Should the final tariff rate for Calgon Carbon (Tianjin) Co., Ltd. be at 188.57% for the period October 11, 2006 through March 31, 2008, the Company estimates that additional amounts it could owe, net of amounts it may receive under the Continued Dumping and Subsidy Offset Act of 2000 (see discussion below) could be substantial. Because there are multiple factors that will influence the final results of the review, the Company is unable to reasonably estimate the amount of any adjustment that may be made to the current tariff deposit rate or the amount of additional deposits or refunds that the Company may owe or receive, respectively.

On April 1, 2009, the Commerce Department published a formal notice allowing parties to request a second annual administrative review of the antidumping tariff order covering the period April 1, 2008 through March 31, 2009. Requests for review were due no later than April 30, 2009. In its capacity as a U.S. producer, the Company requested reviews of multiple Chinese exporters. In its capacity as a Chinese exporter, Calgon Carbon (Tianjin) Co., Ltd. requested its own review. A notice formally initiating the review will be published in the Federal Register in the coming weeks.

The contingent liability relating to tariffs paid on imports is somewhat mitigated by two factors. First and foremost, the antidumping tariff order's disciplinary effect on the market encourages the elimination of dumping through fair pricing. Separately, pursuant to the Continued Dumping and Subsidy Offset Act of 2000 (repealed effective Feb. 8, 2006), as an affected domestic producer, the Company is eligible to apply for a distribution of a share of certain tariffs collected on entries of subject merchandise from China from October 11, 2006 to September 30, 2007. In July 2008, the Company applied for such a distribution. In December 2008, the Company received a distribution of approximately \$0.2 million, which reflected 59.57 percent of the total amount available. The Company anticipates receiving additional amounts in 2009 and future years related to tariffs paid for the period October 11, 2006 through September 30, 2007, though the exact amount is impossible to determine.

By letter dated January 22, 2007, the Company received from the United States Environmental Protection Agency, Region 4 (“EPA”) a report of a hazardous waste facility inspection performed by the EPA and the Kentucky Department of Environmental Protection (“KYDEP”) as part of a Multi Media Compliance Evaluation of the Company’s Big Sandy Plant in Catlettsburg, Kentucky that was conducted on September 20 and 21, 2005. Accompanying the report was a Notice of Violation (“NOV”) alleging multiple violations of the Federal Resource Conservation and Recovery Act (“RCRA”) and corresponding EPA and KYDEP hazardous waste regulations. The alleged violations mainly concern the hazardous waste spent activated carbon regeneration facility. The Company met with the EPA on April 17, 2007 to discuss the inspection report and alleged violations, and submitted written responses in May and June 2007. In August 2007, the EPA notified the Company that it believes there were still significant violations of RCRA that are unresolved by the information in the Company’s responses, without specifying the particular violations. During a meeting with the EPA on December 10, 2007, the EPA indicated that the agency would not pursue certain other alleged violations. Based on discussions during the December 10, 2007 meeting, subsequent communications with EPA, and in connection with the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) Notice referred to below, the Company has taken actions to address and remediate a number of the unresolved alleged violations. The Company believes that the number of unresolved issues as to alleged continuing violations cited in the January 22, 2007 NOV has been reduced substantially. The EPA can take formal enforcement action to require the Company to remediate any or all of the unresolved alleged continuing violations which could require the Company to incur substantial additional costs. The EPA can also take formal enforcement action to impose substantial civil penalties with respect to violations cited in the NOV, including those which have been admitted or resolved. The Company is awaiting further response from the EPA and cannot predict with any certainty the probable outcome of this matter or range of potential loss, if any.

On July 3, 2008, the EPA verbally informed the Company that there are a number of unresolved RCRA violations at the Big Sandy Plant which may render the facility unacceptable to receive spent carbon for reactivation from sites regulated under the CERCLA pursuant to the CERCLA Off-Site Rule. The Company received written notice of the unacceptability determination on July 14, 2008 (the “CERCLA Notice”). The CERCLA Notice alleged multiple violations of RCRA and four releases of hazardous waste. The alleged violations and releases were cited in the September 2005 multi-media compliance inspections, and were among those cited in the January 2007 NOV described in the preceding paragraph as well. The CERCLA Notice gave the Company until September 1, 2008 to demonstrate to the EPA that the alleged violations and releases are not continuing, or else the Big Sandy Plant would not be able to receive spent carbon from CERCLA sites until the EPA determined that the facility is again acceptable to receive such CERCLA wastes. This deadline subsequently was extended several times. The Company met with the EPA in August 2008 regarding the CERCLA Notice and submitted a written response to the CERCLA Notice prior to the meeting. By letter dated February 13, 2009, the EPA informed the Company that based on information submitted by the Company indicating that the Big Sandy Plant has returned to physical compliance for the alleged violations and releases, the EPA had made an affirmative determination of acceptability for receipt of CERCLA wastes at the Big Sandy Plant. The EPA’s determination is conditioned upon the Company treating certain residues resulting from the treatment of the carbon reactivation furnace off-gas as hazardous waste and not sending material dredged from the onsite wastewater treatment lagoons offsite other than to a permitted hazardous waste treatment, storage or disposal facility. The Company has requested clarification from the EPA regarding these two conditions. The Company is also in discussions with the EPA and the KYDEP regarding the classification of these materials. If the Company is required to treat and/or dispose of the material dredged from the lagoon as hazardous waste, the costs for doing so could be substantial.

By letter dated August 18, 2008, the Company was notified by the EPA Suspension and Debarment Division (“SDD”) that because of the alleged violations described in the CERCLA Notice, the SDD was making an assessment of the Company’s present responsibility to conduct business with Federal Executive Agencies. Representatives of the SDD attended the August 2008 EPA meeting. On August 28, 2008, the Company received a letter from the Division requesting additional information from the Company in connection with the SDD’s evaluation of the Company’s potential “business risk to the Federal Government,” noting that the Company engages in procurement transactions with or funded by the Federal Government. The Company provided the SDD with all information requested by the letter in September 2008. The SDD can suspend or debar a Company from sales to the federal government directly or indirectly through government contractors or with respect to projects funded by the federal government. In October 2008, the SDD indicated that it was still reviewing the matter but that another meeting with the Company was not warranted at that time. The Company believes that there is no basis for suspension or debarment on the basis of the matters asserted by the EPA in the Notice or otherwise. The Company has had no further communication with the SDD since October 2008.

In June 2007, the Company received a Notice Letter from the New York State Department of Environmental Conservation (“NYSDEC”) stating that the NYSDEC had determined that the Company is a Potentially Responsible Party (“PRP”) at the Frontier Chemical Processing Royal Avenue Site in Niagara Falls, New York (the “Site”). The Notice Letter requests that the Company and other PRP’s develop, implement and finance a remedial program for Operable Unit #1 at the Site. Operable Unit #1 consists of overburden soils and overburden and upper bedrock groundwater. The selected remedy is removal of above grade structures and contaminated soil source areas, installation of a cover system, and ground water control and treatment, estimated to cost between approximately \$11 million and \$14 million, which would be shared among the PRP’s. The Company has not determined what portion of the costs associated with the remedial program it would be obligated to bear and the Company cannot predict with any certainty the outcome of this matter or range of potential loss. The Company has joined a PRP group and has executed a Joint Defense Agreement with the group members. In August 2008, the Company and over 100 PRP’s entered into a Consent Order with NYSDEC for additional site investigation directed toward characterization of the Site to better define the scope of the remedial project. The Company contributed monies to the PRP group to help fund the work required under the Consent Order. The field work was initiated in 2008 but suspended due to the onset of winter. The group plans to complete the work in the spring of 2009.

By letter dated July 3, 2007, the Company received an NOV from the KYDEP alleging that the Company has violated the KYDEP's hazardous waste management regulations in connection with the Company's hazardous waste spent activated carbon regeneration facility located at the Big Sandy Plant in Catlettsburg, Kentucky. The NOV alleges that the Company has failed to correct deficiencies identified by the KYDEP in the Company's Part B hazardous waste management facility permit application and related documents and directed the Company to submit a complete and accurate Part B application and related documents and to respond to the KYDEP's comments which were appended to the NOV. The Company submitted a response to the NOV and the KYDEP's comments in December 2007 by providing a complete revised permit application. The KYDEP has not indicated whether or not it will take formal enforcement action, and has not specified a monetary amount of civil penalties it might pursue in any such action, if any. The KYDEP can also deny the Part B operating permit. On October 18, 2007, the Company received an NOV from the EPA related to this permit application and submitted a revised application to both the KYDEP and the EPA within the mandated timeframe. The EPA has not indicated whether or not it will take formal enforcement action, and has not specified a monetary amount of civil penalties it might pursue in any such action. The EPA can also deny the Part B operating permit. At this time the Company cannot predict with any certainty the outcome of this matter or range of loss, if any.

On March 20, 2007, the Company and ADA-ES entered into a Memorandum of Understanding ("MOU") providing for cooperation between the companies to attempt to jointly market powdered activated carbon ("PAC") to the electric power industry for the removal of mercury from coal fired power plant flue gas. The MOU provided for commissions to be paid to ADA-ES in respect of product sales. The Company terminated the MOU effective as of August 24, 2007 for convenience. Neither party had entered into sales or supply agreements with prospective customers as of that date. On March 3, 2008, the Company entered into a supply agreement with a major U.S. power generator for the sale of powdered activated carbon products with a minimum purchase obligation of approximately \$55 million over a 5 year period. ADA-ES claimed that it is entitled to commissions of an amount of at least \$8.25 million over the course of the 5 year contract, which the Company denies. On September 29, 2008, the Company filed suit in the United States District Court for the Western District of Pennsylvania for a declaratory judgment from the Court that the Company has no obligation to pay ADA-ES commissions related to this contract or for any future sales made after August 24, 2007.

The Company owns a 49% interest in a joint venture, Calgon Mitsubishi Chemical Corporation, which was formed on October 1, 2002. At March 31, 2009, Calgon Mitsubishi Chemical Corporation had \$22.5 million in borrowings from an affiliate of the majority owner of the joint venture. The Company has agreed with the joint venture and the lender that, upon request by the lender, the Company will execute a guarantee for up to 49% of such borrowings. At March 31, 2009, the lender had not requested, and the Company has not provided, such guarantee.

In addition to the matters described above, the Company is involved in various other legal proceedings, lawsuits and claims, including employment, product warranty and environmental matters of a nature considered normal to its business. It is the Company's policy to accrue for amounts related to these legal matters when it is probable that a liability has been incurred and the loss amount is reasonably estimable. Management believes that the ultimate liabilities, if any, resulting from such lawsuits and claims will not materially affect the consolidated financial position or liquidity of the Company, but an adverse outcome could be material to the results of operations in a particular period in which a liability is recognized.

8. Goodwill & Other Identifiable Intangible Assets

The Company has elected to perform the annual impairment test of its goodwill, as required by SFAS No. 142, on December 31 of each year. For purposes of the test, the Company has identified reporting units, as defined within SFAS No. 142, at a regional level for the Activated Carbon and Service segment and at the technology level for the Equipment segment and has allocated goodwill to these reporting units accordingly. The goodwill associated with the Consumer segment is not material and has not been allocated below the segment level.

The changes in the carrying amounts of goodwill by segment for the three months ended March 31, 2009 are as follows:

	Activated Carbon & Service Segment	Equipment Segment	Consumer Segment	Total
Balance as of January 1, 2009	\$ 19,963	\$ 6,317	\$ 60	\$ 26,340
Foreign exchange	(61)	(59)	-	(120)
Balance as of March 31, 2009	\$ 19,902	\$ 6,258	\$ 60	\$ 26,220

The following is a summary of the Company's identifiable intangible assets as of March 31, 2009 and December 31, 2008 respectively:

Amortized Intangible Assets:	Weighted Average Amortization Period	March 31, 2009			Net Carrying Amount
		Gross Carrying Amount	Foreign Exchange	Accumulated Amortization	
Patents	15.4 Years	\$ 1,369	\$ -	\$ (982)	\$ 387
Customer Relationships	17.0 Years	9,323	(272)	(5,864)	3,187
Product Certification	7.9 Years	1,682	-	(975)	707
Unpatented Technology	20.0 Years	2,875	-	(1,562)	1,313
Total	16.0 Years	\$ 15,249	\$ (272)	\$ (9,383)	\$ 5,594

Amortized Intangible Assets:	Weighted Average Amortization Period	December 31, 2008			Net Carrying Amount
		Gross Carrying Amount	Foreign Exchange	Accumulated Amortization	
Patents	15.4 Years	\$ 1,369	\$ -	\$ (961)	\$ 408
Customer Relationships	17.0 Years	9,323	(256)	(5,678)	3,389
Product Certification	7.9 Years	1,682	-	(903)	779
Unpatented Technology	20.0 Years	2,875	-	(1,521)	1,354
Total	16.0 Years	\$ 15,249	\$ (256)	\$ (9,063)	\$ 5,930

For the three months ended March 31, 2009 and 2008, the Company recognized \$0.3 million and \$0.4 million, respectively, of amortization expense related to intangible assets. The Company estimates amortization expense to be recognized during the next five years as follows:

For the year ending December 31:

2009	\$	1,299
2010		1,155
2011		847
2012		657
2013		582

9. Borrowing Arrangements

	March 31, 2009	December 31, 2008
Long-Term Debt		
Convertible Senior Notes	\$ 6,000	\$ 6,000
Industrial revenue bonds	2,925	2,925
Total	8,925	8,925
Less current portion of long-term debt (net of debt discount)	(7,994)	(7,903)
Less discount on Senior Convertible Notes	(931)	(1,022)
Net	\$ -	\$ -

5.00% Convertible Senior Notes due 2036

On August 18, 2006, the Company issued \$75.0 million in aggregate principal amount of 5.00% Notes due in 2036 (the "Notes"). The Notes accrue interest at the rate of 5.00% per annum which is payable in cash semi-annually in arrears on each February 15 and August 15, which commenced February 15, 2007. The Notes will mature on August 15, 2036.

The Notes can be converted under the following circumstances: (1) during any calendar quarter (and only during such calendar quarter) commencing after September 30, 2006, if the last reported sale price of the Company's common stock is greater than or equal to 120% of the conversion price of the Notes for at least 20 trading days in the period of 30 consecutive trading days ending on the last trading day of the preceding calendar quarter; (2) during the five business day period after any 10 consecutive trading-day period (the "measurement period") in which the trading price per Note for each day in the measurement period was less than 103% of the product of the last reported sale price of the Company's common stock and the conversion rate on such day; or (3) upon the occurrence of specified corporate transactions described in the Offering Memorandum. On or after June 15, 2011, holders may convert their Notes at any time prior to the maturity date. Upon conversion, the Company will pay cash and shares of its common stock, if any, based on a daily conversion value (as described herein) calculated on a proportionate basis for each day of the 25 trading-day observation period.

For the periods ended March 31, 2009 and December 31, 2008, the last reported sale price of the Company's common stock was greater than 120% of the conversion price of the Notes for at least 20 trading days in the period of 30 consecutive trading days ending on the last trading day of each of the aforementioned quarterly periods. As a result, the holders of the Notes have had the right to convert the Notes into cash and shares of common stock.

During the period of August 20, 2008 through November 10, 2008, the Company converted and exchanged \$69.0 million of the Notes for cash of \$11.0 million and approximately 13.0 million shares of its common stock.

Due to the conversion rights of the holders of the Notes, the Company has classified the remaining principal amount of outstanding Notes as a current liability as of March 31, 2009 and December 31, 2008.

The initial conversion rate is 196.0784 shares of the Company's common stock per \$1,000 principal amount of Notes, equivalent to an initial conversion price of approximately \$5.10 per share of common stock. The conversion rate is subject to adjustment in some events, including the payment of a dividend on the Company's common stock, but will not be adjusted for accrued interest, including any additional interest. In addition, following certain fundamental changes (principally related to changes in control) that occur prior to August 15, 2011, the Company will increase the conversion rate for holders who elect to convert Notes in connection with such fundamental changes in certain circumstances. The Company considered EITF 00-27 issue 7 which indicates that if a reset of the conversion rate due to a contingent event occurs, the Company would need to calculate if there is a beneficial conversion and record if applicable. Through March 31, 2009, no contingent events occurred.

The Company may not redeem the Notes before August 20, 2011. On or after that date, the Company may redeem all or a portion of the Notes at any time. Any redemption of the Notes will be for cash at 100% of the principal amount of the Notes to be redeemed, plus accrued and unpaid interest, including any additional interest, to, but excluding, the redemption date.

Holders may require the Company to purchase all or a portion of their Notes on each of August 15, 2011, August 15, 2016, and August 15, 2026. In addition, if the Company experiences specified types of fundamental changes, holders may require it to purchase the Notes. Any repurchase of the Notes pursuant to these provisions will be for cash at a price equal to 100% of the principal amount of the Notes to be purchased plus any accrued and unpaid interest, including any additional interest, to, but excluding, the purchase date.

The Notes are the Company's senior unsecured obligations, and rank equally in right of payment with all of its other existing and future senior indebtedness. The Notes are guaranteed by certain of the Company's domestic subsidiaries on a senior unsecured basis. The subsidiary guarantees are general unsecured senior obligations of the subsidiary guarantors and rank equally in right of payment with all of the existing and future senior indebtedness of the subsidiary guarantors. If the Company fails to make payment on the Notes, the subsidiary guarantors must make them instead. The Notes are effectively subordinated to any indebtedness of the Company's non-guarantor subsidiaries. The Notes are effectively junior to all of the Company's existing and future secured indebtedness to the extent of the value of the assets securing such indebtedness.

Effective January 1, 2009, the Company implemented FASB Staff Position APB 14-1, "Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)" ("FSP APB 14-1"). FSP APB 14-1 requires the issuer to separately account for the liability and equity components of convertible debt instruments in a manner that reflects the issuer's nonconvertible debt borrowing rate. This new accounting method has been applied retrospectively to all periods presented with an impact to retained earnings of \$9.2 million as of January 1, 2009. Under FSP APB 14-1, the Company's \$75.0 million principal amount of Notes has an initial measurement that consists of a liability component of \$53.1 million and an equity component of \$18.6 million (\$11.5 million after the associated deferred tax liability). The carrying amount of the equity component is \$0.6 million (after tax) at March 31, 2009 and December 31, 2008, respectively. At March 31, 2009, the if-converted value of the Notes exceeded its principal amount by approximately \$10.6 million.

In accordance with FSP APB 14-1, the debt discount of \$21.9 million is being amortized over the period from August 18, 2006 (the issuance date) to June 15, 2011 (the first put date on the Notes). The effective interest rate for all periods on the liability component is approximately 13.8%. The Company also incurred original issuance costs of \$0.4 million which have been deferred and are being amortized over the same period as the discount. For the three months ended March 31, 2009, the Company recorded interest expense of \$0.2 million related to the Notes, of which \$0.1 million related to the amortization of the discount and \$0.1 million related to contractual coupon interest. Similarly, for the three months ended March 31, 2008, the Company recorded interest expense of \$1.9 million related to the Notes, of which \$1.0 million related to the amortization of the discount and \$0.9 million related to contractual coupon interest. The effect of the retrospective adjustment for the adoption of FSP APB 14-1 for the three month period ended March 31, 2008 was to decrease previously reported net income by \$0.5 million or \$0.01 per diluted common share.

Credit Facility

On August 14, 2008, the Company entered into a third amendment to its Credit Facility (the "Third Amendment"). The Third Amendment permits borrowings in an amount up to \$60.0 million and includes a separate U.K. sub-facility and a separate Belgian sub-facility. The Credit Facility permits the total revolving credit commitment to be increased up to \$75.0 million. The facility matures on May 15, 2011. Availability for domestic borrowings under the Credit Facility is based upon the value of eligible inventory, accounts receivable and property, plant and equipment, with separate borrowing bases to be established for foreign borrowings under a separate U.K. sub-facility and a separate Belgian sub-facility. Availability under the Credit Facility is conditioned upon various customary conditions.

The Credit Facility is secured by a first perfected security interest in substantially all of the Company's assets, with limitations under certain circumstances in the case of capital stock of foreign subsidiaries. Certain of the Company's domestic subsidiaries unconditionally guarantee all indebtedness and obligations related to domestic borrowings under the Credit Facility. The Company and certain of its domestic subsidiaries also unconditionally guarantee all indebtedness and obligations under the U.K. sub-facility.

As of March 31, 2009, the collateral value of assets pledged was \$56.5 million. The collateral value as of March 31, 2009 for domestic, U.K., and Belgian borrowers were \$47.5 million, \$5.3 million, and \$3.7 million, respectively. The Credit Facility contains a fixed charge coverage ratio covenant which becomes effective when total domestic availability falls below \$11.0 million. As of March 31, 2009, total availability was \$44.9 million. Availability as of March 31, 2009 for domestic, U.K., and Belgian borrowers was \$38.9 million, \$4.2 million, and \$1.8 million, respectively. The Company can issue letters of credit up to \$20 million of the available commitment amount under the Credit Facility. Sub-limits for letters of credit under the U.K. sub-facility and the Belgian sub-facility are \$2.0 million and \$6.0 million, respectively. Letters of credit outstanding at March 31, 2009 totaled \$11.6 million.

The Credit Facility interest rate is based upon Euro-based (“LIBOR”) rates with other interest rate options available. The applicable Euro Dollar margin in effect when the Company is in compliance with the terms of the facility ranges from 1.50% to 2.50% and is based upon the Company’s overall availability under the Credit Facility. The unused commitment fee is equal to 0.375% per annum, which can increase to 0.50%, and is based upon the unused portion of the revolving commitment.

The Credit Facility contains a number of affirmative and negative covenants. The negative covenants provide for certain restrictions on possible acts by the Company related to matters such as additional indebtedness, certain liens, fundamental changes in the business, certain investments or loans, asset sales and other customary requirements. The Company was in compliance with all such negative covenants as of March 31, 2009. The Credit Facility also includes a provision for up to \$3.0 million of letters of credit in aggregate under the Company’s U.S., Belgium, and UK sub-limits that can be issued having expiration dates that are more than one year but not more than three years after the date of issuance.

Industrial Revenue Bonds

The Mississippi Industrial Revenue Bonds totaling \$2.9 million at March 31, 2009 and December 31, 2008, respectively, bear interest at a variable rate and matured in April 2009. The interest rate as of March 31, 2009 was 1.33%. These bonds were issued to finance certain equipment acquisitions at the Company’s Pearlington, Mississippi plant.

Belgian Credit Facility

The Company maintains a Belgian credit facility totaling 1.5 million euros which is secured by a U.S. letter of credit. There are no financial covenants, and the Company had no outstanding borrowings under the Belgian credit facility as of March 31, 2009 and 2008. Bank guarantees of 0.9 million euros were issued as of March 31, 2009. The maturity date of this facility is September 30, 2009. Availability under this facility was 0.6 million euros at March 31, 2009.

Chinese Credit Facility

The Company maintains a Chinese credit facility totaling 11.0 million RMB or \$1.6 million which is secured by a U.S. letter of credit provided under the Credit Facility. There are no financial covenants. The maturity date of this facility is December 25, 2009. The facility was fully utilized at March 31, 2009.

Fair Value of Debt

At March 31, 2009, the Company had \$6.0 million of fixed rate Senior Convertible Notes outstanding. The fair value of these Notes at March 31, 2009 was \$16.6 million. The increase in value is mainly due to the increase in the Company’s common stock price and its impact on the conversion features of the Notes. The remaining \$2.9 million of current portion of long-term debt is based on the prime rates, and accordingly, the carrying value of this obligation approximates its fair value.

Maturities of Debt

The Company is obligated to make principal payments on debt outstanding at March 31, 2009 of \$4.5 million in 2009 and \$6.0 million in 2011. See also the section entitled 5.00% Convertible Senior Notes due in 2036 related to the holders' optional conversion as of March 31, 2009 and December 31, 2008.

Interest Expense

The Company's interest expense for the quarters ended March 31, 2009 and 2008 totaled \$21 thousand and \$2.1 million, respectively. These amounts are net of interest costs capitalized of \$0.2 million and \$0.1 million for the periods ended March 31, 2009 and 2008, respectively.

10. Pensions

U.S. Plans:

For U.S. plans, the following table provides the components of net periodic pension costs of the plans for the periods ended March 31, 2009 and 2008:

Pension Benefits	Three Months Ended March 31	
	2009	2008
Service cost	\$ 197	\$ 256
Interest cost	1,213	1,172
Expected return on plan assets	(913)	(1,354)
Amortization of prior service cost	51	61
Net actuarial loss amortization	512	74
Net periodic pension cost	\$ 1,060	\$ 209

The expected long-term rate of return on plan assets is 8.00% in 2009.

Employer Contributions

In its 2008 financial statements, the Company disclosed that it expected to contribute \$1.1 million to its U.S. pension plans in 2009. As of March 31, 2009, the Company has not made any contributions. The Company expects to contribute the \$1.1 million over the remainder of the year.

European Plans:

For European plans, the following table provides the components of net periodic pension costs of the plans for the periods ended March 31, 2009 and 2008:

Pension Benefits	Three Months Ended March 31	
	2009	2008
Service cost	\$ 122	\$ 203
Interest cost	407	514
Expected return on plan assets	(269)	(387)
Amortization of net transition amount	10	12
Net actuarial loss amortization	27	8
Net periodic pension cost	\$ 297	\$ 350

The expected long-term rate of return on plan assets ranges from 5.00% to 6.90% in 2009.

Employer Contributions

In its 2008 financial statements, the Company disclosed that it expected to contribute \$1.7 million to its European pension plans in 2009. As of March 31, 2009, the Company contributed \$0.5 million. The Company expects to contribute the remaining \$1.2 million over the remainder of the year.

Defined Contribution Plans:

The Company also sponsors a defined contribution pension plan for certain U.S. employees that permits employee contributions of up to 50% of eligible compensation in accordance with Internal Revenue Service guidance. Under this defined contribution plan, the Company makes a fixed contribution of 2% of eligible employee compensation on a quarterly basis and matches contributions made by each participant in an amount equal to 100% of the employee contribution up to a maximum of 2% of employee compensation. In addition, each of these employees is eligible for an additional discretionary Company contribution of up to 4% of employee compensation based upon annual Company performance at the discretion of the Company's Board of Directors. Employer matching contributions for non-represented employees vest after two years of service. For bargaining unit employees at the Catlettsburg, Kentucky facility, the Company contributes a maximum of \$25.00 per month to the plan. For bargaining unit employees at the Columbus, Ohio facility, the Company makes contributions to the USW 401(k) Plan of \$1.15 per actual hour worked for eligible employees. For bargaining unit employees at the Neville Island facility, the Company, effective January 1, 2009, began making contributions of \$1.40 per actual hour worked to the defined contribution pension plan (Thrift/Savings Plan) for eligible employees when their defined benefit pension plan was frozen. Employer matching contributions for bargaining unit employees vest immediately. The Company realized a \$0.5 million curtailment gain in 2008 as a result of freezing the aforementioned plan. Total expenses related to the defined contribution plans were \$0.6 million and \$0.6 million for the periods ended March 31, 2009 and 2008, respectively.

11. Earnings Per Share

Computation of basic and diluted net income per common share from operations is performed as follows:

(Dollars in thousands, except per share amounts)	Three Months Ended March 31,	
	2009	2008
Income from operations available to common shareholders	\$ 5,974	\$ 10,373
Weighted Average Shares Outstanding		
Basic	54,117,118	40,240,397
Effect of Dilutive Securities	1,961,921	11,515,723
Diluted	56,079,039	51,756,120
Net income		
Basic	\$ 0.11	\$ 0.26
Diluted	\$ 0.11	\$ 0.20

For the three months ended March 31, 2009 and 2008, there were 162,850 and 80,625 of stock options that were excluded from the dilutive calculations as the effect would have been antidilutive.

The Company's obligation under its Notes is to settle the par value of the Notes in cash and to settle the amount in excess of par value with its common shares. Therefore, the Company is not required to include any shares underlying the Notes in its diluted weighted average shares outstanding until the average stock price per share for the quarter exceeds the \$5.10 conversion price. At such time, only the number of shares that would be issuable (under the "treasury stock" method of accounting for share dilution) will be included, which is based upon the amount by which the average stock price exceeds the conversion price. The dilutive effect of the Notes was calculated based on the weighted average number of incremental shares included in each quarterly diluted earnings per share computation. During the last half of 2008, all but \$6.0 million of the Notes was either exchanged or converted (See Note 9). The potential dilution at various stock prices for the remaining \$6.0 million of principal Notes outstanding is not material.

12. Other Financial Information

As described in Note 9, the Company has issued \$75.0 million in aggregate principal amount of 5.00% Convertible Senior Notes due in 2036. The Notes are fully and unconditionally guaranteed by certain of our domestic subsidiaries on a senior unsecured basis. All of the subsidiary guarantors are 100% owned by the parent company and the guarantees are joint and several. The Subsidiary Guarantees are general unsecured senior obligations of the Subsidiary Guarantors and rank equally in right of payment with all of the existing and future senior indebtedness of the Subsidiary Guarantors. If the Company fails to make payment on the Notes, the Subsidiary Guarantors must make them instead. The Notes are effectively subordinated to any indebtedness of the Company's non-guarantor subsidiaries. The Notes are effectively junior to all of the Company's existing and future secured indebtedness to the extent of the value of the assets securing such indebtedness.

Condensed consolidating unaudited financial information for Calgon Carbon Corporation (issuer); Calgon Carbon Investments Inc., Chemviron Carbon Ltd., Waterlink (UK) Holdings Ltd., Sutcliffe Speakman Ltd., Lakeland Processing Ltd., Charcoal Cloth (International) Ltd., BSC Columbus LLC, and CCC Columbus LLC (guarantor subsidiaries); and the non-guarantor subsidiaries are as follows:

13. Related Party Transactions

Net sales to related parties and receivables from related parties primarily reflect sales of activated carbon products to equity investees. Generally, transactions are conducted under long-term contractual arrangements. Related party sales transactions were \$4.7 million and \$2.9 million for the three months ended March 31, 2009 and 2008, respectively. Receivables from equity investees amounted to \$3.8 million and \$2.2 million at March 31, 2009 and December 31, 2008, respectively. The Company's equity investees are included in the Activated Carbon and Service segment.

14. Income Taxes

Unrecognized Income Tax Benefits

As of March 31, 2009 and December 31, 2008, the Company's gross unrecognized income tax benefits were \$12.1 million and \$12.2 million, respectively. If recognized, \$9.8 million and \$10.0 million of the gross unrecognized tax benefits would affect the effective tax rate at March 31, 2009 and December 31, 2008, respectively. The Company estimates that approximately \$1.3 million of unrecognized tax benefits will be realized in the next twelve months as a result of the expiration of statute limitations in various tax jurisdictions as well as the settlement of tax audits.

15. New Accounting Pronouncements

In December 2008, the FASB issued FSP No. 132(R)-1, "Employers' Disclosures about Postretirement Benefit Plan Assets," (FSP No. 132(R)-1). FSP No. 132(R)-1 amends FAS No. 132 to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The additional required disclosures focus on fair value by category of plan assets. This FSP is effective for fiscal years ending after December 15, 2009. The Company will adopt the disclosure provisions in the December 31, 2009 financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 applies to other accounting pronouncements that require or permit fair value measurements and, accordingly, does not require any new fair value measurements. SFAS No. 157 was initially effective as of January 1, 2008, but in February 2008, the FASB delayed the effective date for applying this standard to nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis until periods beginning after November 15, 2008. The Company adopted SFAS No. 157 as of January 1, 2008 for assets and liabilities within its scope and the impact was immaterial to our financial statements. As of January 1, 2009, nonfinancial assets and nonfinancial liabilities were also required to be measured at fair value. The adoption of these additional provisions did not have a material impact on our financial statements. On October 10, 2008, the FASB issued FSP No. 157-3 (FSP No. 157-3), "Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active." FSP No. 157-3 clarifies the application of SFAS No. 157 in a market that is not active and provides factors to take into consideration when determining the fair value of an asset in an inactive market. FSP No. 157-3 was effective upon issuance, including prior periods for which financial statements have not been issued. This FSP did not have a material impact on our financial statements. On April 9, 2009 the FASB issued FSP FAS No. 157-4 (FSP No. 157-4), "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly." This FSP relates to determining fair values when there is no active market or where the price inputs being used represent distressed sales. Specifically, it reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. This FSP is effective for interim and annual periods ending after June 15, 2009 and should be applied prospectively. The Company does not expect any material financial statement implications relating to the adoption of this FSP.

16. Subsequent Events

On May 1, 2009, the United States Department of Commerce announced the preliminary results of its first review of antidumping tariffs for the period October 11, 2006 through March 31, 2008. See Note 7.

The labor agreement for the Company's workforce at its Catlettsburg, Kentucky facility expired on April 2, 2009. The parties are working under an extension of the expired agreement as they continue to negotiate the terms and conditions of a multi-year replacement agreement.

On April 1, 2009, the Company paid \$2.9 million to retire its Mississippi Industrial Revenue Bonds. See Note 9.

Item 2. Management's Discussion and Analysis of Results of Operations and Financial Condition

This discussion should be read in connection with the information contained in the Unaudited Condensed Consolidated Financial Statements and Notes to the Unaudited Condensed Financial Statements.

Results of Operations

Consolidated net sales increased by \$0.3 million or 0.3% for the quarter ended March 31, 2009 versus the quarter ended March 31, 2008. Net sales for the quarter ended March 31, 2009 for the Activated Carbon and Service segment increased \$0.9 million or 1.1% versus the similar 2008 period. The increase was primarily due to higher pricing for certain carbon products and services in the food and municipal drinking water markets which was partially offset by lower demand in the home water filter and specialty carbon markets and foreign currency translation which had a negative impact of \$4.7 million due to the stronger U.S. dollar. Net sales for the Equipment segment increased \$1.2 million or 12.4% in the first quarter 2009 versus the comparable 2008 period. The increase was primarily due to higher revenue for ultra violet light and ion exchange systems, which was partially offset by a decrease in revenue for carbon adsorption and odor control systems. Foreign currency translation had a negative impact of \$0.1 million. Net sales for the quarter ended March 31, 2009 for the Consumer segment decreased by \$1.8 million or 47.2% versus the quarter ended March 31, 2008. The decrease was primarily attributable to the lower demand for PreZerve® products and activated carbon cloth as well as the negative impact of foreign currency translation of \$0.5 million. The total negative impact of foreign currency translation on consolidated net sales for the quarter ended March 31, 2009 was \$5.3 million.

Net sales less cost of products sold, as a percentage of net sales, was 32.5% for the quarter ended March 31, 2009 compared to 31.6% for the similar 2008 period, a 0.8% increase or \$0.8 million. The Activated Carbon and Service segment increased by 0.6% or \$0.6 million which was primarily related to higher pricing for certain carbon and service products which more than offset increased activated carbon product costs that the Company experienced. The Equipment segment increased 1.1% or \$1.1 million principally related to the favorable mix of equipment revenue recognized as higher margin ultra violet light and ion exchange systems made up a larger proportion of 2009 sales. The Consumer segment decreased by 0.9% or \$0.9 million due to higher costs associated with production issues with carbon cloth raw material quality. The Company's cost of products sold excludes depreciation; therefore it may not be comparable to that of other companies.

The depreciation and amortization decrease of \$0.2 million during the quarter ended March 31, 2009 versus the quarter ended March 31, 2008 was primarily due to decreased depreciation due to an increase in fully depreciated fixed assets. The Company expects that future depreciation will be higher due to the significant capital improvements related to the April 2009 re-start of the Company's previously idled production line at its Catlettsburg, Kentucky plant.

Selling, general and administrative expenses increased \$0.5 million for the quarter ended March 31, 2009 versus the comparable 2008 quarter. The increase was primarily due to increased pension expense as well as increased legal expense related to the first period of review for the Commerce Department's April 2007 anti-dumping order on certain activated carbon products from China partially offset by positive foreign exchange translation.

Research and development expenses for the quarter ended March 31, 2009 were comparable to the similar 2008 period.

The \$9.3 million gain on AST settlement for the quarter ended March 31, 2008 relates to the resolution of a lawsuit involving the Company's purchase of the common stock of Advanced Separation Technologies Inc. ("AST") in 1996. Of the settlement amount, approximately \$5.3 million was recorded in the Activated Carbon and Service segment and \$4.0 million was recorded in the Equipment segment (See Note 7).

Other expense for the quarter ended March 31, 2009 increased \$0.3 million as compared to March 31, 2008. The increase is primarily due to the negative impact of foreign exchange on unhedged positions.

Interest income for the quarter ended March 31, 2009 decreased \$0.3 million primarily due to the lower average cash balances carried in 2009 as compared to 2008.

Interest expense for the quarter ended March 31, 2009 decreased \$2.1 million versus the quarter ended March 31, 2008. The decrease is primarily a result of the conversion of a substantial portion of the Company's Senior Convertible Notes ("Notes") that occurred in the last half of 2008 as well as the adoption of FSP APB 14-1 which had a retrospective increase of \$0.8 million on the quarter ended March 31, 2008.

The income tax provision decreased \$2.8 million for the quarter ended March 31, 2009 versus the quarter ended March 31, 2008. The decrease was primarily due to a decrease in income from operations before income tax and equity in income from equity investments of \$8.1 million primarily as a result of the 2008 AST settlement gain (See Note 7).

The effective tax rate for the quarter ended March 31, 2009 was 35.8% compared to 37.4% for the quarter ended March 31, 2008. The quarters ended March 31, 2009 and 2008 tax rates were higher than the statutory Federal income tax rate mainly due to permanent items and state income taxes.

During the preparation of its effective tax rate, the Company uses an annualized estimate of pre-tax earnings. Throughout the year this annualized estimate may change based on actual results and annual earnings estimate revisions in various tax jurisdictions. Because the Company's permanent tax benefits are relatively constant, changes in the annualized estimate may have a significant impact on the effective tax rate in future periods.

The Company provides an estimate for income taxes based on an evaluation of the underlying accounts, its tax filing positions and interpretations of existing law. Changes in estimates are reflected in the year of settlement or expiration of the statute of limitations. Under FIN 48, the Company must recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate resolution.

Equity in income from equity investments for the quarter ended March 31, 2009 was comparable to the similar 2008 period.

Financial Condition

Working Capital and Liquidity

Cash flows provided by operating activities were \$8.7 million for the period ended March 31, 2009 compared to \$9.8 million for the comparable 2008 period. The \$1.1 million decrease is primarily due to the decline in earnings due to the AST settlement gain partially offset by decreased pension contributions.

Common stock dividends were not paid during the quarters ended March 31, 2009 and 2008, respectively.

Total debt at March 31, 2009 was \$9.6 million which was comparable to December 31, 2008.

5.00% Convertible Senior Notes due 2036

On August 18, 2006, the Company issued \$75.0 million in aggregate principal amount of 5.00% Notes due in 2036 (the "Notes"). The Notes accrue interest at the rate of 5.00% per annum which is payable in cash semi-annually in arrears on each February 15 and August 15, which commenced February 15, 2007. The Notes will mature on August 15, 2036.

The Notes can be converted under the following circumstances: (1) during any calendar quarter (and only during such calendar quarter) commencing after September 30, 2006, if the last reported sale price of the Company's common stock is greater than or equal to 120% of the conversion price of the Notes for at least 20 trading days in the period of 30 consecutive trading days ending on the last trading day of the preceding calendar quarter; (2) during the five business day period after any 10 consecutive trading-day period (the "measurement period") in which the trading price per Note for each day in the measurement period was less than 103% of the product of the last reported sale price of the Company's common stock and the conversion rate on such day; or (3) upon the occurrence of specified corporate transactions described in the Offering Memorandum. On or after June 15, 2011, holders may convert their Notes at any time prior to the maturity date. Upon conversion, the Company will pay cash and shares of its common stock, if any, based on a daily conversion value (as described herein) calculated on a proportionate basis for each day of the 25 trading-day observation period.

For the periods ended March 31, 2009 and December 31, 2008, the last reported sale price of the Company's common stock was greater than 120% of the conversion price of the Notes for at least 20 trading days in the period of 30 consecutive trading days ending on the last trading day of each of the aforementioned quarterly periods. As a result, the holders of the Notes have had the right to convert the Notes into cash and shares of common stock.

During the period of August 20, 2008 through November 10, 2008, the Company converted and exchanged \$69.0 million of the Notes for cash of \$11.0 million and approximately 13.0 million shares of its common stock.

Due to the conversion rights of the holders of the Notes, the Company has classified the remaining principal amount of outstanding Notes as a current liability as of March 31, 2009 and December 31, 2008.

The initial conversion rate is 196.0784 shares of the Company's common stock per \$1,000 principal amount of Notes, equivalent to an initial conversion price of approximately \$5.10 per share of common stock. The conversion rate is subject to adjustment in some events, including the payment of a dividend on the Company's common stock, but will not be adjusted for accrued interest, including any additional interest. In addition, following certain fundamental changes (principally related to changes in control) that occur prior to August 15, 2011, the Company will increase the conversion rate for holders who elect to convert Notes in connection with such fundamental changes in certain circumstances. The Company considered EITF 00-27 issue 7 which indicates that if a reset of the conversion rate due to a contingent event occurs, the Company would need to calculate if there is a beneficial conversion and record if applicable. Through March 31, 2009, no contingent events occurred.

The Company may not redeem the Notes before August 20, 2011. On or after that date, the Company may redeem all or a portion of the Notes at any time. Any redemption of the Notes will be for cash at 100% of the principal amount of the Notes to be redeemed, plus accrued and unpaid interest, including any additional interest, to, but excluding, the redemption date.

Holders may require the Company to purchase all or a portion of their Notes on each of August 15, 2011, August 15, 2016, and August 15, 2026. In addition, if the Company experiences specified types of fundamental changes, holders may require it to purchase the Notes. Any repurchase of the Notes pursuant to these provisions will be for cash at a price equal to 100% of the principal amount of the Notes to be purchased plus any accrued and unpaid interest, including any additional interest, to, but excluding, the purchase date.

The Notes are the Company's senior unsecured obligations, and rank equally in right of payment with all of its other existing and future senior indebtedness. The Notes are guaranteed by certain of the Company's domestic subsidiaries on a senior unsecured basis. The subsidiary guarantees are general unsecured senior obligations of the subsidiary guarantors and rank equally in right of payment with all of the existing and future senior indebtedness of the subsidiary guarantors. If the Company fails to make payment on the Notes, the subsidiary guarantors must make them instead. The Notes are effectively subordinated to any indebtedness of the Company's non-guarantor subsidiaries. The Notes are effectively junior to all of the Company's existing and future secured indebtedness to the extent of the value of the assets securing such indebtedness.

Effective January 1, 2009, the Company implemented FASB Staff Position APB 14-1, "Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)" ("FSP APB 14-1"). FSP APB 14-1 requires the issuer to separately account for the liability and equity components of convertible debt instruments in a manner that reflects the issuer's nonconvertible debt borrowing rate. This new accounting method has been applied retrospectively to all periods presented with an impact to retained earnings of \$9.2 million as of January 1, 2009. Under FSP APB 14-1, the Company's \$75.0 million principal amount of Notes has an initial measurement that consists of a liability component of \$53.1 million and an equity component of \$18.6 million (\$11.5 million after the associated deferred tax liability). The carrying amount of the equity component is \$0.6 million (after tax) at March 31, 2009 and December 31, 2008, respectively. At March 31, 2009, the if-converted value of the Notes exceeded its principal amount by approximately \$10.6 million.

In accordance with FSP APB 14-1, the debt discount of \$21.9 million is being amortized over the period from August 18, 2006 (the issuance date) to June 15, 2011 (the first put date on the Notes). The effective interest rate for all periods on the liability component is approximately 13.8%. The Company also incurred original issuance costs of \$0.4 million which have been deferred and are being amortized over the same period as the discount. For the three months ended March 31, 2009, the Company recorded interest expense of \$0.2 million related to the Notes, of which \$0.1 million related to the amortization of the discount and \$0.1 million related to contractual coupon interest. The effect on net income and earnings per share was not material for the three month period ended March 31, 2009. Similarly, for the three months ended March 31, 2008, the Company recorded interest expense of \$1.9 million related to the Notes, of which \$1.0 million related to the amortization of the discount and \$0.9 million related to contractual coupon interest. The effect of the retrospective adjustment for the adoption of FSP APB 14-1 for the three month period ended March 31, 2008 was to decrease previously reported net income by \$0.5 million or \$0.01 per diluted common share.

Credit Facility

On August 14, 2008, the Company entered into a third amendment to its Credit Facility (the "Third Amendment"). The Third Amendment permits borrowings in an amount up to \$60.0 million and includes a separate U.K. sub-facility and a separate Belgian sub-facility. The Credit Facility permits the total revolving credit commitment to be increased up to \$75.0 million. The facility matures on May 15, 2011. Availability for domestic borrowings under the Credit Facility is based upon the value of eligible inventory, accounts receivable and property, plant and equipment, with separate borrowing bases to be established for foreign borrowings under a separate U.K. sub-facility and a separate Belgian sub-facility. Availability under the Credit Facility is conditioned upon various customary conditions.

The Credit Facility is secured by a first perfected security interest in substantially all of the Company's assets, with limitations under certain circumstances in the case of capital stock of foreign subsidiaries. Certain of the Company's domestic subsidiaries unconditionally guarantee all indebtedness and obligations related to domestic borrowings under the Credit Facility. The Company and certain of its domestic subsidiaries also unconditionally guarantee all indebtedness and obligations under the U.K. sub-facility.

As of March 31, 2009, the collateral value of assets pledged was \$56.5 million. The collateral value as of March 31, 2009 for domestic, U.K., and Belgian borrowers were \$47.5 million, \$5.3 million, and \$3.7 million, respectively. The Credit Facility contains a fixed charge coverage ratio covenant which becomes effective when total domestic availability falls below \$11.0 million. As of March 31, 2009, total availability was \$44.9 million. Availability as of March 31, 2009 for domestic, U.K., and Belgian borrowers was \$38.9 million, \$4.2 million, and \$1.8 million, respectively. The Company can issue letters of credit up to \$20 million of the available commitment amount under the Credit Facility. Sub-limits for letters of credit under the U.K. sub-facility and the Belgian sub-facility are \$2.0 million and \$6.0 million, respectively. Letters of credit outstanding at March 31, 2009 totaled \$11.6 million.

The Credit Facility interest rate is based upon Euro-based (“LIBOR”) rates with other interest rate options available. The applicable Euro Dollar margin in effect when the Company is in compliance with the terms of the facility ranges from 1.50% to 2.50% and is based upon the Company’s overall availability under the Credit Facility. The unused commitment fee is equal to 0.375% per annum, which can increase to 0.50%, and is based upon the unused portion of the revolving commitment.

The Credit Facility contains a number of affirmative and negative covenants. The negative covenants provide for certain restrictions on possible acts by the Company related to matters such as additional indebtedness, certain liens, fundamental changes in the business, certain investments or loans, asset sales and other customary requirements. The Company was in compliance with all such negative covenants as of March 31, 2009. The Credit Facility also includes a provision for up to \$3.0 million of letters of credit in aggregate under the Company’s U.S., Belgium, and UK sub-limits that can be issued having expiration dates that are more than one year but not more than three years after the date of issuance.

Contractual Obligations

The Company is obligated to make future payments under various contracts such as debt agreements, lease agreements, and unconditional purchase obligations. As of March 31, 2009, there have been no changes in the payment terms of debt, lease agreements, and unconditional purchase obligations since December 31, 2008.

The cash needs of each of the Company’s reporting segments are principally covered by the segment’s operating cash flow on a stand alone basis. Any additional needs will be funded by cash on hand or borrowings under the Company’s credit facility. Specifically, the Equipment and Consumer segments historically have not required extensive capital expenditures; therefore, the Company believes that cash on hand and borrowings will adequately support each of the segments cash needs.

Capital Expenditures and Investments

Capital expenditures for property, plant and equipment totaled \$12.9 million for the three months ended March 31, 2009 (with \$1.8 million of this amount reflected as a non-cash increase in accounts payable and accrued liabilities) compared to expenditures of \$6.6 million for the same period in 2008. The expenditures for the period ended March 31, 2009 consisted primarily of improvements to the Company’s manufacturing facilities of \$10.4 million, of which \$5.4 million was directly related to the April 2009 re-start of a previously idled production line at the Company’s Catlettsburg, Kentucky facility, and \$1.3 million for customer capital. The comparable 2008 period consisted primarily of improvements to the Company’s manufacturing facilities of \$5.0 million, of which \$3.5 million was directly related to the aforementioned production line, \$0.7 million related to improvements of information systems, and \$0.8 million for customer capital. Capital expenditures for 2009 are projected to be approximately \$55.0 million to \$60.0 million. The aforementioned expenditures are expected to be funded by operating cash flows, cash on hand, and borrowings.

Regulatory Matters:

Each of the Company's U.S. production facilities has permits and licenses regulating air emissions and water discharges. All of the Company's U.S. production facilities are controlled under permits issued by local, state and federal air pollution control entities. The Company is presently in compliance with these permits. Continued compliance will require administrative control and will be subject to any new or additional standards. In May 2003, the Company partially discontinued operation of one of its three activated carbon lines at its Catlettsburg, Kentucky facility known as B-line. The Company needed to install pollution abatement equipment in order to remain in compliance with state requirements regulating air emissions before resuming full operation of this line. During 2008, the Company installed state of the art wet scrubbers and made process improvements to B-line. The Company invested approximately \$20 million to upgrade and abate B-line. B-line was put into production in April 2009.

In conjunction with the February 2004 purchase of substantially all of Waterlink's operating assets and the stock of Waterlink's U.K. subsidiary, several environmental studies were performed on Waterlink's Columbus, Ohio property by environmental consulting firms which identified and characterized areas of contamination. In addition, these firms identified alternative methods of remediating the property, identified feasible alternatives and prepared cost evaluations of the various alternatives. The Company concluded from the information in the studies that a loss at this property is probable and recorded the liability as a component of noncurrent other liabilities in the Company's consolidated balance sheet. At March 31, 2009 and December 31, 2008, the balance recorded was \$4.0 million. Liability estimates are based on an evaluation of, among other factors, currently available facts, existing technology, presently enacted laws and regulations, and the remediation experience of other companies. The Company has not incurred any environmental remediation expense for the periods ended March 31, 2009 and 2008. It is reasonably possible that a change in the estimate of this obligation will occur as remediation preparation and remediation activity commences in the future. The ultimate remediation costs are dependent upon, among other things, the requirements of any state or federal environmental agencies, the remediation methods employed, the final scope of work being determined, and the extent and types of contamination which will not be fully determined until experience is gained through remediation and related activities. The accrued amounts are expected to be paid out over the course of several years once work has commenced. The Company has yet to make a determination as to when it will proceed with remediation efforts.

By letter dated January 22, 2007, the Company received from the United States Environmental Protection Agency, Region 4 (“EPA”) a report of a hazardous waste facility inspection performed by the EPA and the Kentucky Department of Environmental Protection (“KYDEP”) as part of a Multi Media Compliance Evaluation of the Company’s Big Sandy Plant in Catlettsburg, Kentucky that was conducted on September 20 and 21, 2005. Accompanying the report was a Notice of Violation (“NOV”) alleging multiple violations of the Federal Resource Conservation and Recovery Act (“RCRA”) and corresponding EPA and KYDEP hazardous waste regulations. The alleged violations mainly concern the hazardous waste spent activated carbon regeneration facility. The Company met with the EPA on April 17, 2007 to discuss the inspection report and alleged violations, and submitted written responses in May and June 2007. In August 2007, the EPA notified the Company that it believes there were still significant violations of RCRA that are unresolved by the information in the Company’s responses, without specifying the particular violations. During a meeting with the EPA on December 10, 2007, the EPA indicated that the agency would not pursue certain other alleged violations. Based on discussions during the December 10, 2007 meeting, subsequent communications with the EPA, and in connection with the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) Notice referred to below, the Company has taken actions to address and remediate a number of the unresolved alleged violations. The Company believes that the number of unresolved issues as to alleged continuing violations cited in the January 22, 2007 NOV has been reduced substantially. The EPA can take formal enforcement action to require the Company to remediate any or all of the unresolved alleged continuing violations which could require the Company to incur substantial additional costs. The EPA can also take formal enforcement action to impose substantial civil penalties with respect to violations cited in the NOV, including those which have been admitted or resolved. The Company is awaiting further response from the EPA and cannot predict with any certainty the probable outcome of this matter or range of potential loss, if any.

On July 3, 2008, the EPA verbally informed the Company that there are a number of unresolved RCRA violations at the Big Sandy Plant which may render the facility unacceptable to receive spent carbon for reactivation from sites regulated under the CERCLA pursuant to the CERCLA Off-Site Rule. The Company received written notice of the unacceptability determination on July 14, 2008 (the “CERCLA Notice”). The CERCLA Notice alleged multiple violations of RCRA and four releases of hazardous waste. The alleged violations and releases were cited in the September 2005 multi-media compliance inspections, and were among those cited in the January 2007 NOV described in the preceding paragraph as well. The CERCLA Notice gave the Company until September 1, 2008 to demonstrate to the EPA that the alleged violations and releases are not continuing, or else the Big Sandy Plant would not be able to receive spent carbon from CERCLA sites until the EPA determined that the facility is again acceptable to receive such CERCLA wastes. This deadline subsequently was extended several times. The Company met with the EPA in August 2008 regarding the CERCLA Notice and submitted a written response to the CERCLA Notice prior to the meeting. By letter dated February 13, 2009, the EPA informed the Company that based on information submitted by the Company indicating that the Big Sandy Plant has returned to physical compliance for the alleged violations and releases, the EPA had made an affirmative determination of acceptability for receipt of CERCLA wastes at the Big Sandy Plant. The EPA’s determination is conditioned upon the Company treating certain residues resulting from the treatment of the carbon reactivation furnace off-gas as hazardous waste and not sending material dredged from the onsite wastewater treatment lagoons offsite other than to a permitted hazardous waste treatment, storage or disposal facility. The Company has requested clarification from the EPA regarding these two conditions. The Company is also in discussions with the EPA and the KYDEP regarding the classification of these materials. If the Company is required to treat and/or dispose of the material dredged from the lagoon as hazardous waste, the costs for doing so could be substantial.

By letter dated August 18, 2008, the Company was notified by the EPA Suspension and Debarment Division (“SDD”) that because of the alleged violations described in the CERCLA Notice, the SDD was making an assessment of the Company’s present responsibility to conduct business with Federal Executive Agencies. Representatives of the SDD attended the August 2008 EPA meeting. On August 28, 2008, the Company received a letter from the Division requesting additional information from the Company in connection with the SDD’s evaluation of the Company’s potential “business risk to the Federal Government,” noting that the Company engages in procurement transactions with or funded by the Federal Government. The Company provided the SDD with all information requested by the letter in September 2008. The SDD can suspend or debar a Company from sales to the federal government directly or indirectly through government contractors or with respect to projects funded by the federal government. In October 2008, the SDD indicated that it was still reviewing the matter but that another meeting with the Company was not warranted at that time. The Company believes that there is no basis for suspension or debarment on the basis of the matters asserted by the EPA in the Notice or otherwise. The Company has had no further communication with the SDD since October 2008.

In June 2007, the Company received a Notice Letter from the New York State Department of Environmental Conservation (“NYSDEC”) stating that the NYSDEC had determined that the Company is a Potentially Responsible Party (“PRP”) at the Frontier Chemical Processing Royal Avenue Site in Niagara Falls, New York (the “Site”). The Notice Letter requests that the Company and other PRP’s develop, implement and finance a remedial program for Operable Unit #1 at the Site. Operable Unit #1 consists of overburden soils and overburden and upper bedrock groundwater. The selected remedy is removal of above grade structures and contaminated soil source areas, installation of a cover system, and ground water control and treatment, estimated to cost between approximately \$11 million and \$14 million, which would be shared among the PRP’s. The Company has not determined what portion of the costs associated with the remedial program it would be obligated to bear and the Company cannot predict with any certainty the outcome of this matter or range of potential loss. The Company has joined a PRP group and has executed a Joint Defense Agreement with the group members. In August 2008, the Company and over 100 PRP’s entered into a Consent Order with NYSDEC for additional site investigation directed toward characterization of the Site to better define the scope of the remedial project. The Company contributed monies to the PRP group to help fund the work required under the Consent Order. The field work was initiated in 2008 but suspended due to the onset of winter. The group plans to complete the work in the spring of 2009.

By letter dated July 3, 2007, the Company received an NOV from the KYDEP alleging that the Company has violated the KYDEP’s hazardous waste management regulations in connection with the Company’s hazardous waste spent activated carbon regeneration facility located at the Big Sandy Plant in Catlettsburg, Kentucky. The NOV alleges that the Company has failed to correct deficiencies identified by the KYDEP in the Company’s Part B hazardous waste management facility permit application and related documents and directed the Company to submit a complete and accurate Part B application and related documents and to respond to the KYDEP’s comments which were appended to the NOV. The Company submitted a response to the NOV and the KYDEP’s comments in December 2007 by providing a complete revised permit application. The KYDEP has not indicated whether or not it will take formal enforcement action, and has not specified a monetary amount of civil penalties it might pursue in any such action, if any. The KYDEP can also deny the Part B operating permit. On October 18, 2007, the Company received an NOV from the EPA related to this permit application and submitted a revised application to both the KYDEP and the EPA within the mandated timeframe. The EPA has not indicated whether or not it will take formal enforcement action, and has not specified a monetary amount of civil penalties it might pursue in any such action. The EPA can also deny the Part B operating permit. At this time the Company cannot predict with any certainty the outcome of this matter or range of loss, if any.

The Company is also subject to various environmental health and safety laws and regulations at its facilities in Belgium, Germany, and the United Kingdom. These laws and regulations address substantially the same issues as those applicable to the Company in the United States. The Company believes it is presently in substantial compliance with these laws and regulations.

Other

On March 8, 2006, the Company and another U.S. producer of activated carbon formally requested that the United States Department of Commerce investigate unfair pricing of certain activated carbon imported from the People's Republic of China. The Commerce Department investigated imports of activated carbon from China that is thermally activated using a combination of heat, steam and/or carbon dioxide. Certain types of activated carbon from China, most notably chemically-activated carbon, were not investigated.

On March 2, 2007, the Commerce Department published its final determination (subsequently amended) that all of the subject merchandise from China was being unfairly priced, or dumped, and thus that special additional tariffs should be imposed to offset the amount of the unfair pricing. The final tariff rates ranged from 61.95 percent ad valorem (i.e., of the entered value of the goods) to 228.11 percent ad valorem. A formal order imposing final tariffs was published on April 27, 2007. All imports from China remain subject to the order and antidumping tariffs. Importers of subject activated carbon from China are required to make cash deposits of estimated antidumping tariffs at the time the goods are entered into the United States customs territory. Deposits of tariffs are subject to future revision based on retrospective reviews conducted by the Commerce Department. With one limited exception, the amount of tariffs owed for the period of review can decrease or increase retroactively based on the government's subsequent review of the actual prices at which the entries were sold.

The Company is both a domestic producer and one of the largest U.S. importers (from our wholly-owned subsidiary Calgon Carbon (Tianjin) Co., Ltd.) of the activated carbon that is subject to this proceeding. As such, the Company is involved in the Commerce Department's proceedings both as a domestic producer (a "petitioner") and as a foreign exporter (a "respondent").

As one of two U.S. producers involved as petitioners in the case, the Company is actively involved in ensuring the Commerce Department obtains the most accurate information from the foreign producers and exporters involved in the review, in order to calculate the most accurate results and margins of dumping for the sales at issue.

As an importer of activated carbon from China and in light of the successful antidumping tariff case, the Company was required to pay deposits of estimated antidumping tariffs at the rate of 84.45 percent ad valorem to the Bureau of Customs and Border Protection ("Customs") on entries made on or after October 11, 2006 through April 9, 2007. Thereafter, deposits have been paid at 69.54 percent. Because of limits on the government's legal authority to impose provisional tariffs prior to issuance of a final determination, entries made between April 9, 2007 and April 19, 2007 were not subject to tariffs.

The Company's role as an importer that is required to pay tariffs results in a contingent liability related to the final amount of tariffs that will be paid. The Company has made deposits of estimated tariffs in two ways. First, estimated tariffs on entries in the period from October 11, 2006 through April 9, 2007 were covered by a bond. The total amount of tariffs that can be paid on entries in this period is capped as a matter of law, though the Company may receive a refund with interest of any difference due to a reduction in the actual margin of dumping found in the first review. The Company's estimated liability for tariffs during this period of \$0.8 million is reflected in accounts payable and accrued liabilities on the consolidated balance sheets at March 31, 2009 and December 31, 2008, respectively. Second, the Company has been required to post cash deposits of estimated tariffs owed on entries of subject merchandise since April 19, 2007. The final amount of tariffs owed on these entries may change, and can either increase or decrease depending on the final results of relevant administrative inquiries. This process is briefly described below.

The amount of estimated antidumping tariffs payable on goods imported into the United States is subject to review and retroactive adjustment based on the actual amount of dumping that is found. To do this, the Commerce Department conducts periodic reviews of sales made to the first unaffiliated U.S. customer, typically over the prior 12 month period. These reviews will be possible for at least five years, and can result in changes to the antidumping tariff rate (either increasing or reducing the rate) applicable to any given foreign exporter. Revision of tariff rates has two effects. First, it will alter the actual amount of tariffs that Customs will seek to collect for the period reviewed, by either increasing or decreasing the amount to reflect the actual amount of dumping that was found. Where the actual amount of tariff owed increases, the government will require payment of the difference plus interest. Conversely, when the tariff rate decreases, any difference is refunded with interest. Second, the revised rate becomes the cash deposit rate applied to future entries, and can either increase or decrease the amount of deposits an importer will be required to pay.

The Company currently is in the midst of the first such review. Because it is the first review conducted under the antidumping tariff order, the review covers the period from October 11, 2006 through March 31, 2008 instead of the typical 12 month period. The preliminary results of the review were announced on May 1, 2009 and indicated that Calgon Carbon (Tianjin) Co., Ltd.'s tariff rate could increase from 69.54% to 188.57%. However, other respondents' preliminary review results indicated a decline to their tariff rates for the review period. The announced preliminary review results are based on information provided by respondents that has not yet been verified. Errors may have been made in the review and the important decisions that affect the tariff are subject to reconsideration before the final results of the review are announced. The respondents, including Calgon Carbon (Tianjin) Co., Ltd., are subject to additional requests for information and on-site verification by the Commerce Department of the accuracy of the information that has been presented. The review must be completed no later than early November 2009. Any increase in the tariff assessment rate for this review period would not likely result in an additional payment until 2010, if at all. In addition, until the tariff rate is finalized in early November 2009, the tariff deposit rate will not change. Should the final tariff rate for Calgon Carbon (Tianjin) Co., Ltd. be at 188.57% for the period October 11, 2006 through March 31, 2008, the Company estimates that additional amounts it could owe, net of amounts it may receive under the Continued Dumping and Subsidy Offset Act of 2000 (see discussion below) could be substantial. Because there are multiple factors that will influence the final results of the review, the Company is unable to reasonably estimate the amount of any adjustment that may be made to the current tariff deposit rate or the amount of additional deposits or refunds that the Company may owe or receive, respectively.

On April 1, 2009, the Commerce Department published a formal notice allowing parties to request a second annual administrative review of the antidumping tariff order covering the period April 1, 2008 through March 31, 2009. Requests for review were due no later than April 30, 2009. In its capacity as a U.S. producer, the Company requested reviews of multiple Chinese exporters. In its capacity as a Chinese exporter, Calgon Carbon (Tianjin) Co., Ltd. requested its own review. A notice formally initiating the review will be published in the Federal Register in the coming weeks.

The contingent liability relating to tariffs paid on imports is somewhat mitigated by two factors. First and foremost, the antidumping tariff order's disciplinary effect on the market encourages the elimination of dumping through fair pricing. Separately, pursuant to the Continued Dumping and Subsidy Offset Act of 2000 (repealed effective Feb. 8, 2006), as an affected domestic producer, the Company is eligible to apply for a distribution of a share of certain tariffs collected on entries of subject merchandise from China from October 11, 2006 to September 30, 2007. In July 2008, the Company applied for such a distribution. In December 2008, the Company received a distribution of approximately \$0.2 million, which reflected 59.57 percent of the total amount available. The Company anticipates receiving additional amounts in 2009 and future years related to tariffs paid for the period October 11, 2006 through September 30, 2007, though the exact amount is impossible to determine.

New Accounting Pronouncements

In December 2008, the FASB issued FSP No. 132(R)-1, "Employers' Disclosures about Postretirement Benefit Plan Assets," (FSP No. 132(R)-1). FSP No. 132(R)-1 amends FAS No. 132 to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The additional required disclosures focus on fair value by category of plan assets. This FSP is effective for fiscal years ending after December 15, 2009. The Company will adopt the disclosure provisions in the December 31, 2009 financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 applies to other accounting pronouncements that require or permit fair value measurements and, accordingly, does not require any new fair value measurements. SFAS No. 157 was initially effective as of January 1, 2008, but in February 2008, the FASB delayed the effective date for applying this standard to nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis until periods beginning after November 15, 2008. The Company adopted SFAS No. 157 as of January 1, 2008 for assets and liabilities within its scope and the impact was immaterial to our financial statements. As of January 1, 2009, nonfinancial assets and nonfinancial liabilities were also required to be measured at fair value. The adoption of these additional provisions did not have a material impact on our financial statements. On October 10, 2008, the FASB issued FSP No. 157-3 (FSP No. 157-3), "Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active." FSP No. 157-3 clarifies the application of SFAS No. 157 in a market that is not active and provides factors to take into consideration when determining the fair value of an asset in an inactive market. FSP No. 157-3 was effective upon issuance, including prior periods for which financial statements have not been issued. This FSP did not have a material impact on our financial statements. On April 9, 2009 the FASB issued FSP FAS No. 157-4 (FSP No. 157-4), "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly." This FSP relates to determining fair values when there is no active market or where the price inputs being used represent distressed sales. Specifically, it reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. This FSP is effective for interim and annual periods ending after June 15, 2009 and should be applied prospectively. The Company does not expect any material financial statement implications relating to the adoption of this FSP.

There were no material changes to the Company's critical accounting policies from those disclosed in the Company's Form 10-K for the year ended December 31, 2008.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There were no material changes in the Company's exposure to market risk from December 31, 2008.

Item 4. Controls and Procedures

Disclosure Controls and Procedures:

The Company's principal executive officer and principal financial officer have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), at the end of the period covered by this Quarterly Report on Form 10-Q. Based upon their evaluation, the principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports filed or submitted by it under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and include controls and procedures designed to provide reasonable assurance that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control:

There have not been any changes in the Company's internal controls over financial reporting that occurred during the period ended March 31, 2009, that have significantly affected, or are reasonably likely to significantly affect, the Company's internal controls over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

See Note 7 to the unaudited interim Condensed Consolidated Financial Statements contained herein.

Item 1a. Risk Factors

There were no material changes in the Company's risk factors from the risks disclosed in the Company's Form 10-K for the year ended December 31, 2008.

Item 2c. Unregistered Sales of Equity Securities and Use of Proceeds

Period	Total Number of Shares Purchased (a)	Average Price Paid Per Share (b)	Total Number of Shares Purchased as Part of Publicly Announced Repurchase Plans or Programs (c)	Maximum Number (or Approximate Dollar Value) of Shares that May Yet be Purchased Under the Plans or Programs (d)
January 1 – January 31, 2009	—	—	—	—
February 1 – February 28, 2009	42,894	\$ 13.23	—	—
March 1 – March 31, 2009	21,995	\$ 14.18	—	—

(a) This column includes purchases under Calgon Carbon's Equity Incentive Plan which represented withholding taxes due from employees relating to the restricted share awards issued on February 26, 2009; February 28, 2009; March 27, 2009; and March 31, 2009. Future purchases under this plan will be dependent upon employee elections and forfeitures.

Item 6. Exhibits

Exhibit 31.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

Exhibit 31.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

Exhibit 32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Exhibit 32.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
