NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Note 1. Accounting Policies

The interim unaudited condensed consolidated financial statements of the Federal Agricultural Mortgage Corporation ("Farmer Mac" or the "Corporation") and subsidiaries have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). These interim unaudited condensed consolidated financial statements reflect all normal and recurring adjustments that are, in the opinion of management, necessary to present a fair statement of the financial position and the results of operations and cash flows of Farmer Mac for the interim periods presented. Certain information and footnote disclosures normally included in the annual consolidated financial statements have been condensed or omitted as permitted by SEC rules and regulations. The December 31, 2009 condensed consolidated balance sheet presented in this report has been derived from the Corporation's audited 2009 consolidated financial statements. Management believes that the disclosures are adequate to present fairly the condensed consolidated financial statements as of the dates and for the periods presented. These interim unaudited condensed consolidated financial statements should be read in conjunction with the audited 2009 consolidated financial statements of Farmer Mac included in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2009 filed with the SEC on March 16, 2010 (as updated by the Current Report on Form 8-K filed with the SEC on August 4, 2010). Results for interim periods are not necessarily indicative of those that may be expected for the fiscal year. Below is a summary of Farmer Mac's significant accounting policies.

-7-

(a) Cash and Cash Equivalents and Statements of Cash Flows

Farmer Mac considers highly liquid investment securities with maturities at the time of purchase of three months or less to be cash equivalents. The carrying value of cash and cash equivalents is a reasonable estimate of their fair value. Changes in the balance of cash and cash equivalents are reported in the condensed consolidated statements of cash flows. The following table sets forth information regarding certain cash and non-cash transactions for the six months ended June 30, 2010 and 2009.

For the Six Months Ended June 30, 2010 June 30, 2009 (in thousands)

		(in the	ousan	ids)
Cash paid during the period for:				
Interest	\$	37,989	\$	42,465
Income taxes		12,000		10,000
Non-cash activity:				
Real estate owned acquired through foreclosure		3,580		40,955
Loans acquired and securitized as Farmer Mac Guaranteed Securities		1,288		17,224
Consolidation of Farmer Mac I Guaranteed Securities from off-balance sheet to loans				
held for investment in consolidated trusts	1	,401,659		-

Transfers of trading Farmer Mac Guaranteed Securities - Rural Utilities to loans held				
for investment in consolidated trusts, upon the adoption of new consolidation guidance		451,448		_
Deconsolidation of loans held for investment in consolidated trusts - transferred to off-				
balance sheet Farmer Mac I Guaranteed Securities		414,462		-
Deconsolidation of debt securities of consolidated trusts held by third parties -				
transferred to off- balance sheet Farmer Mac I Guaranteed Securities		414,462		-
Transfers of Farmer Mac I Guaranteed Securities to loans held for sale		-		288,012
Transfers of loans held for investment to loans held for sale		-		617,072

(b) Allowance for Losses

As of June 30, 2010, Farmer Mac maintained an allowance for losses to cover estimated probable losses on loans held and loans underlying LTSPCs, Farmer Mac I Guaranteed Securities and Farmer Mac Guaranteed Securities – Rural Utilities.

The allowance for losses is increased through periodic provisions for loan losses that are charged against net interest income and provisions for losses that are charged to non-interest expense and is reduced by charge-offs for actual losses, net of recoveries. Negative provisions, or releases of allowance for losses, are recorded in the event that the estimate of probable losses as of the end of a period is lower than the estimate at the beginning of the period.

-8-

Farmer Mac's methodology for determining its allowance for losses incorporates the Corporation's automated loan classification system. That system scores loans based on criteria such as historical repayment performance, indicators of current financial condition, loan seasoning, loan size and loan-to-value ratio. For the purposes of the loss allowance methodology, the loans in Farmer Mac's portfolio of loans and loans underlying Farmer Mac I Guaranteed Securities and LTSPCs have been scored and classified for each calendar quarter since first quarter 2000. The allowance methodology captures the migration of loan scores across concurrent and overlapping three-year time horizons and calculates loss rates separately within each loan classification for (1) loans underlying LTSPCs and (2) loans held and loans underlying Farmer Mac I Guaranteed Securities. The calculated loss rates are applied to the current classification distribution of unimpaired loans in Farmer Mac's portfolio to estimate inherent losses, on the assumption that the historical credit losses and trends used to calculate loss rates will continue in the future. Management evaluates this assumption by taking into consideration factors, including:

• economic conditions;

- geographic and agricultural commodity/product concentrations in the portfolio;
 - the credit profile of the portfolio;
 delinquency trends of the portfolio;
 - historical charge-off and recovery activities of the portfolio; and
- other factors to capture current portfolio trends and characteristics that differ from historical experience.

Management believes that its use of this methodology produces a reliable estimate of probable losses, as of the balance sheet date, for all loans held and loans underlying Farmer Mac I Guaranteed Securities and LTSPCs, in accordance with the standard on accounting for contingencies issued by the Financial Accounting Standards Board ("FASB").

Farmer Mac separately evaluates the rural utilities loans it owns, as well as the lender obligations and loans underlying or securing its Farmer Mac Guaranteed Securities – Rural Utilities, to determine if there are probable losses inherent in those assets.

Farmer Mac also analyzes assets in its portfolio for impairment in accordance with the FASB standard on measuring individual impairment of a loan. Farmer Mac's impaired assets include:

- non-performing assets (loans 90 days or more past due, in foreclosure, restructured, in bankruptcy including loans performing under either their original loan terms or a court-approved bankruptcy plan and real estate owned ("REO");
- loans for which Farmer Mac has adjusted the timing of borrowers' payment schedules, but still expects to collect all amounts due and has not made economic concessions; and
- additional performing loans that have previously been delinquent or are secured by real estate that produces agricultural commodities or products currently under stress.

For loans with an updated appraised value, other updated collateral valuation or management's estimate of discounted collateral value, this analysis includes the measurement of the fair value of the underlying collateral for individual loans relative to the total recorded investment, including principal, interest and advances. In the event that the collateral value does not support the total recorded investment, Farmer Mac provides a specific allowance for the difference between the recorded investment and its fair value, less estimated costs to liquidate the collateral. For the remaining impaired assets without updated valuations, this analysis is performed in the aggregate in consideration of the similar risk characteristics of the assets and historical statistics.

The table below summarizes the components of Farmer Mac's allowance for losses as of June 30, 2010 and December 31, 2009:

	ane 30, 2010		ember 31, 2009
	(in tho	usands)	
Allowance for loan losses	\$ 9,495	\$	6,292
Reserve for losses:			
Off-balance sheet Farmer Mac I Guaranteed Securities	560		2,033
LTSPCs	8,910		5,862
Total allowance for losses	\$ 18,965	\$	14,187

The following table summarizes the changes in the components of Farmer Mac's allowance for losses for the three and six months ended June 30, 2010 and 2009:

			Jun	e 30, 2010					June	e 30, 2009

Upon the adoption of the new consolidation guidance on January 1, 2010, Farmer Mac reclassified \$2.0 million from the reserve for losses to the allowance for loan losses as a result of Farmer Mac being determined the primary beneficiary of certain VIEs with beneficial interests owned by third party investors. In June 2010, Farmer Mac deconsolidated certain VIEs with beneficial interests owned by third party investors because Farmer Mac was no longer determined to be the primary beneficiary. This deconsolidation did not result in a material reclassification from the allowance for loan losses to the reserve for losses during second quarter 2010. Consolidated interests in VIEs with beneficial interests owned by third party investors are presented as "loans held for investment in consolidated trusts" on Farmer Mac's condensed consolidated balance sheets. Upon deconsolidation, Farmer Mac classifies these interests as off-balance sheet Farmer Mac Guaranteed Securities.

No allowance for losses has been provided for AgVantage securities, securities issued under the Farmer Mac II program ("Farmer Mac II Guaranteed Securities"), or USDA Guaranteed Securities. Each AgVantage security is a general obligation of an issuing institution approved by Farmer Mac and is collateralized by eligible loans in an amount at least equal to the outstanding principal amount of the security. Farmer Mac excludes the loans that secure AgVantage securities from the credit risk metrics it discloses because of the credit quality of the issuing institutions, the collateralization level for the securities, and because delinquent loans are required to be removed from the pool of pledged loans and replaced with current eligible loans. As of June 30, 2010, there were no probable losses inherent in Farmer Mac's AgVantage securities due to the credit quality of the obligors, as well as the underlying collateral. As of June 30, 2010, Farmer Mac had not experienced any credit losses on any AgVantage securities. The guaranteed portions ("USDA-guaranteed portions") of certain agricultural, rural development, business & industry and community facilities loans presented as "USDA Guaranteed Securities," as well as those USDA-guaranteed portions that collateralize Farmer Mac II Guaranteed Securities, are guaranteed by the United States Department of Agriculture ("USDA"). Each USDA guarantee is an obligation backed by the full faith and credit of the United States. As of June 30, 2010, neither Farmer Mac nor Farmer Mac II LLC had experienced any credit losses on any USDA Guaranteed Securities held or on any Farmer Mac II Guaranteed Securities.

As of June 30, 2010, Farmer Mac individually analyzed \$49.2 million of its \$147.4 million of impaired assets for collateral shortfalls against updated appraised values, other updated collateral valuations or discounted values. Farmer Mac evaluated the remaining \$98.2 million of impaired assets for which updated valuations were not available in the aggregate in consideration of their similar risk characteristics and historical statistics. Farmer Mac's specific allowance for under-collateralized assets was \$3.0 million as of June 30, 2010 and \$0.6 million as of December 31, 2009. Farmer Mac's non-specific or general allowances were \$16.0 million as of June 30, 2010 and \$13.6 million as of December 31, 2009.

Farmer Mac recognized interest income of approximately \$0.4 million and \$0.9 million on impaired loans during the three and six months ended June 30, 2010, respectively, compared to \$0.6 million and \$1.7 million, respectively, during the same periods in 2009. During the three and six months ended June 30, 2010, Farmer Mac's average investment in impaired loans was \$115.7 million and \$124.3 million, respectively, compared to \$142.4 million and \$136.2 million, respectively, for the same periods in 2009.

(c) Financial Derivatives

Farmer Mac enters into transactions involving financial derivatives principally to protect against risk from the effects of market price or interest rate movements on the value of certain assets, future cash flows or debt issuance, not for trading or speculative purposes. Farmer Mac enters into interest rate swap contracts to adjust the characteristics of its short-term debt to match more closely the cash flow and duration characteristics of its longer-term loans and other assets, and also to adjust the characteristics of its long-term debt to match more closely the cash flow and duration characteristics of its short-term assets, thereby reducing interest rate risk and often times deriving an overall lower effective cost of borrowing than would otherwise be available to Farmer Mac in the conventional debt market. Farmer Mac also recognizes certain contracts and commitments as derivatives when the characteristics of those contracts and commitments meet the definition of a derivative.

-11-

Farmer Mac manages the interest rate risk related to loans it has committed to acquire, but has not yet purchased and permanently funded, through the use of forward sale contracts on the debt of other government-sponsored enterprises ("GSEs"), futures contracts involving U.S. Treasury securities and interest rate swap contracts. Farmer Mac uses forward sale contracts on GSE securities to reduce its interest rate exposure to changes in both U.S. Treasury rates and spreads on Farmer Mac debt. The notional amounts of these contracts are determined based on a duration-matched hedge ratio between the hedged item and the hedge instrument. Gains or losses generated by these hedge transactions should offset changes in funding costs.

All financial derivatives are recorded on the balance sheet at fair value as a freestanding asset or liability. Farmer Mac does not designate its financial derivatives as fair value hedges or cash flow hedges; therefore, the changes in the fair values of financial derivatives are reported as gains or losses on financial derivatives in the condensed consolidated statements of operations without any corresponding changes in the fair values of the hedged items.

The following tables summarize information related to Farmer Mac's financial derivatives as of June 30, 2010 and December 31, 2009:

In the normal course of business, collateral requirements contained in Farmer Mac's derivative contracts are enforced by Farmer Mac and its counterparties. Upon enforcement of the collateral requirements, the amount of collateral posted is typically based on the net fair value of all derivative contracts with the counterparty, i.e., derivative assets net of derivative liabilities at the counterparty level. If Farmer Mac were to be in violation of certain provisions of the derivative contracts, the related counterparty could request payment or full collateralization on the derivative contracts. As of June 30, 2010, the fair value of Farmer Mac's derivatives in a net liability position at the counterparty level, which includes accrued interest but excludes any adjustment for nonperformance risk, was \$118.5 million. As of June 30, 2010, Farmer Mac posted assets with a fair value of \$37.1 million as collateral for its derivatives in net liability positions. If Farmer Mac had breached certain provisions of the derivative contracts as of June 30, 2010, it could have been required to settle its obligations under the agreements or post additional collateral of \$81.4 million.

The following table summarizes the effects of Farmer Mac's financial derivatives on the condensed consolidated statements of operations for the three and six months ended June 30, 2010 and 2009:

	(Lo	osses)/Gains	on Fi	ınancıal Der	ıvatıv	ves

As of June 30, 2010 and December 31, 2009, respectively, Farmer Mac had approximately \$6,000 of net after-tax unrealized gains and \$0.1 million of net after-tax unrealized losses on financial derivatives included in accumulated other comprehensive income related to the financial derivatives transition adjustment. These amounts will be reclassified into earnings in the same period or periods during which the hedged forecasted transactions (either the payment of interest or the issuance of discount notes) affect earnings or immediately when it becomes probable that the original hedged forecasted transaction will not occur within two months of the originally specified date. Over the next 12 months, Farmer Mac estimates that \$56,000 of unrealized losses currently reported in accumulated other comprehensive income will be reclassified into earnings.

As of June 30, 2010, Farmer Mac had outstanding basis swaps with Zions First National Bank, a related party, with total notional amount of \$96.0 million and a fair value of \$(3.7) million, compared to \$105.2 million and \$(3.7) million, respectively, as of December 31, 2009. Under the terms of those basis swaps, Farmer Mac pays Constant Maturity Treasury-based rates and receives LIBOR. Those swaps economically hedge most of the interest rate basis risk related to loans Farmer Mac purchases that pay a Constant Maturity Treasury based-rate and the discount notes Farmer Mac issues to fund the loan purchases (the pricing of discount notes is closely correlated to LIBOR rates). Farmer Mac recorded unrealized losses on those outstanding basis swaps for three and six months ended June 30, 2010 of \$0.1 million and \$25,000 respectively, compared to unrealized gains of \$0.8 million and \$0.3 million, respectively, for the same periods in 2009.

-14-

(d) Earnings Per Common Share

Basic earnings per common share are based on the weighted-average number of shares of common stock outstanding. Diluted earnings per common share are based on the weighted-average number of shares of common stock outstanding adjusted to include all potentially dilutive common stock options, stock appreciation rights ("SARs") and nonvested restricted stock awards. The following schedule reconciles basic and diluted earnings per common share ("EPS") for the three and six months ended June 30, 2010 and 2009:

			Fo	or th	e Three I	Mo	nths Ende	ed		
		Jυ	ine 30, 2010)			\mathbf{J}_1	une 30, 2009)	
		Net			\$ per		Net		9	S per

Effect of dilutive securities:										
Stock options, SARs and restricted stock (1)			400		(0.01)			38		(0.01)
Diluted EPS	\$	1,824	10,610	\$	0.17	\$	25,385	10,176	\$	2.49

(1) For the three months ended June 30, 2010 and 2009, stock options, SARs and nonvested restricted stock of 1,650,050 and 1,862,829, respectively, were outstanding but not included in the computation of diluted earnings per share of common stock because they were anti-dilutive. For the three months ended June 30, 2010, 126,000 contingent shares of nonvested restricted stock were outstanding but not included in the computation of diluted earnings per share because the performance conditions were not met.

Diluted EPS	\$	3,591	10,531	\$	0.34	\$	58,903	10,155	\$	5.80

(1) For the six months ended June 30, 2010 and 2009, stock options, SARs and nonvested restricted stock of 1,616,008 and 1,881,885, respectively, were outstanding but not included in the computation of diluted earnings per share of common stock because they were anti-dilutive. For the six months ended June 30, 2010, 104,250 contingent shares of nonvested restricted stock were outstanding but not included in the computation of diluted earnings per share because the performance conditions were not met.

(e) Stock-Based Compensation

During 2008, Farmer Mac's stockholders approved the 2008 Omnibus Incentive Compensation Plan that authorizes the grants of restricted stock, stock options and SARs, among other alternative forms of equity-based compensation, to directors, officers and other employees. SARs awarded to officers and employees vest annually in thirds and SARs awarded to directors vest fully after approximately one year. If not exercised or terminated earlier due to the termination of employment or service on the Board, SARs granted to officers or employees expire after ten years and those granted to directors expire after seven years. For all SARs granted, the exercise price is equal to the closing price of the Class C Non-Voting Common Stock on the date of grant. SARs granted during second quarter 2010 have exercise prices of \$12.20 per share. Restricted stock was awarded to directors during second quarter 2010 and vests fully after approximately one year. Restricted stock awarded to officers during second quarter 2010 vests after approximately three years and only vests if certain performance conditions are met. Restricted stock awards granted to both directors and officers are not issued until full vesting occurs.

For the three and six months ended June 30, 2010, Farmer Mac recognized \$0.8 million and \$1.5 million, respectively, of compensation expense related to stock options, SARs and restricted stock, compared to \$0.9 million and \$1.6 million, respectively, for the same periods in 2009.

-16-

The following tables summarize activity related to stock options, SARs and nonvested restricted stock awards for the three and six months ended June 30, 2010 and 2009:

The cancellations of stock options, SARs and nonvested restricted stock during the first six months of 2010 were due to unvested SARs and nonvested restricted stock terminating in accordance with the provisions of the applicable plans upon directors' or officers' departures from Farmer Mac and vested options terminating unexercised on their expiration date. The cancellations of stock options and SARs during the first six months of 2009 were due to unvested options or SARS terminating and the cancellation of a portion of vested options upon employees' and officers' departures from

Farmer Mac.

-17-

For the three and six months ended June 30, 2010, the additional paid-in capital received from exercises of stock options and SARs and the vesting of restricted stock was \$0.3 million. The reduction of income taxes to be paid as a result of the deduction for exercises of stock options and SARs and the vesting or accelerated tax elections of restricted stock was \$0.9 million for the three and six months ended June 30, 2010. There were no exercises of stock options or SARS during the comparable periods in 2009.

The following tables summarize information regarding stock options, SARs and nonvested restricted stock outstanding as of June 30, 2010:

	Outsta	nding	Exercis	able	Vested or Exp	pected to Vest

10.00 - 14.99	104,287	1.7 years	93,859	1.7 years
15.00 - 19.99	2,699	0.8 years	2,426	0.8 years
	181,986		163,785	

The weighted-average grant date fair value of options and SARs granted during the six months ended June 30, 2010 and 2009 were \$8.31 and \$4.12 per share, respectively. The weighted-average grant date fair value of nonvested shares granted during the six months ended June 30, 2010 and 2009 were \$12.28 and \$5.93 per share, respectively. The fair values for SARs and stock options were estimated using the Black-Scholes option pricing model based on the following assumptions:

	2010	2009
Risk-free interest rate	3.3%	1.5%

Expected years until exercise	7 years	7 years
Expected stock volatility	88.3%	104.3%
Dividend yield	1.8%	3.4%

(f) Fair Value Measurement

Effective January 1, 2008, Farmer Mac adopted new accounting guidance for fair value measurements. The guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and establishes a fair value hierarchy that ranks the quality and reliability of the inputs to valuation techniques used to measure fair value. The hierarchy gives highest rank to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest rank to unobservable inputs (level 3 measurements).

Farmer Mac's assessment of the significance of the input to the fair value measurement requires judgment, and considers factors specific to the financial instrument. Both observable and unobservable inputs may be used to determine the fair value of positions that Farmer Mac has classified within the level 3 category. As a result, the unrealized gains and losses for assets and liabilities within the level 3 category may include changes in fair value that were attributable to both observable inputs (e.g., changes in market interest rates) and unobservable inputs (e.g., changes in long-dated volatilities).

See Note 7 for more information regarding fair value measurement.

(g) Consolidation of Variable Interest Entities

Farmer Mac has interests in various entities that are considered to be variable interest entities ("VIEs"). These interests include investments in securities issued by VIEs, such as Farmer Mac agricultural mortgage-backed securities created pursuant to Farmer Mac's securitization transactions and mortgage and asset-backed trusts that Farmer Mac did not create. Effective January 1, 2010, Farmer Mac adopted two new accounting standards that eliminated the concept of qualifying special purpose entities ("QSPEs") and amended the accounting for transfers of financial assets and the consolidation model for variable interest entities ("VIEs"). All formerly designated QSPEs were evaluated for consolidation in accordance with the new consolidation model, which changed the method of analyzing which party to a VIE should consolidate the VIE. The new consolidation model uses a qualitative evaluation that requires consolidation of an entity when the reporting enterprise both (1) has the power to direct matters which significantly impact the activities and success of the entity, and (2) has exposure to benefits and/or losses that could potentially be significant to the entity. The reporting enterprise that meets both these conditions is deemed the primary beneficiary of the VIE.

The new consolidation standard requires the incremental assets and liabilities consolidated upon adoption to initially be reported at their carrying amounts. Carrying amount refers to the amount at which the assets and liabilities would have been carried in the consolidated financial statements if the new guidance had been effective when Farmer Mac first met the conditions to be the primary beneficiary of the VIE. If determining the carrying amounts is not practicable, the assets and liabilities of the VIE shall be measured at fair value at the date the new standards first apply. For the outstanding trusts consolidated effective January 1, 2010, Farmer Mac initially recorded the assets and liabilities on the consolidated balance sheet at their carrying amounts, adjusted, where applicable, for fair value option elections that had been made previously. Accrued interest and allowance for losses have also been recognized as appropriate.

-19-

Although these new accounting standards did not change the economic risk to Farmer Mac's business, specifically Farmer Mac's liquidity, credit and interest rate risks, the adoption of these new accounting standards has a significant impact on the presentation of Farmer Mac's consolidated financial statements beginning in 2010. On the consolidated balance sheet, there was an increase in loans held for investment, interest receivable, debt and accrued interest payable, and a decrease in available-for-sale and trading Farmer Mac Guaranteed Securities, the reclassification of a portion of the reserve for losses to allowance for loan losses, and the elimination of the guarantee and commitment fees receivable and guarantee and commitment obligations related to the consolidated trusts. On the income statement, there was an increase in interest income and interest expense attributable to the assets and liabilities of the consolidated trusts and a reclassification of a portion of guarantee fee income to interest income.

The VIEs in which Farmer Mac has a variable interest are limited to securitization trusts. The major judgment in determining if Farmer Mac is the primary beneficiary was whether Farmer Mac had the power to direct the activities of the trust that potentially had the most significant impact on the economic performance of the trust. Generally, the ability to make decisions regarding default mitigation was evidence of that power. Farmer Mac determined that it was the primary beneficiary for the securitization trusts related to most Farmer Mac I and all Rural Utilities securitization transactions because of its rights as guarantor under both programs to control the default mitigation activities of the trusts. For certain securitization trusts created when loans subject to LTSPCs were converted to Farmer Mac I Guaranteed Securities, Farmer Mac determined that it was not the primary beneficiary since the power to make decisions regarding default mitigation was shared among unrelated parties. For similar securitization transactions where the power to make decisions regarding default mitigation was shared with a related party, Farmer Mac determined that it was the primary beneficiary because the applicable accounting guidance does not permit parties within a related party group to conclude that the power is shared.

For those trusts that Farmer Mac is the primary beneficiary, the assets and liabilities are presented on the condensed consolidated balance sheet as "Loans held for investment in consolidated trusts" and "Debt securities of consolidated trusts held by third parties," respectively. These assets can only be used to satisfy the obligations of the trust.

For those trusts where Farmer Mac has a variable interest but has not been determined to be the primary beneficiary, Farmer Mac's interests are recorded as either Farmer Mac Guaranteed Securities or Investment Securities. Farmer Mac's involvement in on-balance sheet VIEs classified as Farmer Mac Guaranteed Securities include securitization trusts under the Farmer Mac II program and trusts related to the AgVantage program. In the case of Farmer Mac II trusts, Farmer Mac was not determined to be the primary beneficiary because it does not have the decision-making power over default mitigation activities. For the AgVantage trusts, Farmer Mac currently does not have the power to direct the activities that have the most significant economic impact to the trust unless, as guarantor, there is a default by the issuer of the trust securities. Should there be a default, Farmer Mac would reassess whether it is primary beneficiary of those trusts. For VIEs classified as Investment Securities, which include asset-backed securities and GSE-guaranteed mortgage-backed securities, Farmer Mac was determined not to be the primary beneficiary because of the lack of voting rights or other powers to direct the activities of the trust. As of June 30, 2010, the Farmer Mac Guaranteed Securities trusts and Investment Securities trusts have carrying amounts on the condensed consolidated balance sheet totaling \$74.7 million and \$434.4 million, respectively, which is Farmer Mac's maximum exposure to loss. In addition, Farmer Mac has a variable interest in off-balance sheet VIEs, which include a guarantee of timely payment of principal and interest, totaling \$3.3 billion as of June 30, 2010.

-20-

(h) New Accounting Standards

Accounting for Transfers of Financial Assets

On December 23, 2009, the FASB issued an Accounting Standards Update ("ASU"), which codifies recent accounting guidance related to transfers of financial assets. The new guidance eliminates the concept of a QSPE, changes the requirements for derecognizing financial assets and enhances information reported to financial statement users by increasing the transparency or disclosures about transfers of financial assets and an entity's continuing involvement with transferred financial assets. Farmer Mac adopted the ASU on January 1, 2010 and the impact of adoption was not material to Farmer Mac's financial position, results of operations or cash flows.

Variable Interest Entities

On December 23, 2009, the FASB issued an ASU, which codifies recent accounting guidance on consolidation of VIEs. The new guidance replaces the quantitative-based risks-and-rewards calculation for determining which reporting entity, if any, has a controlling financial interest in a VIE with an approach focused on identifying which reporting entity has (1) the power to direct the activities of a VIE that most significantly affect the entity's economic performance and (2) the obligation to absorb losses of, or the right to receive benefits from, the entity. The ASU requires additional disclosures about a reporting entity's involvement with VIEs and about any significant changes in risk exposure as a result of that involvement. Farmer Mac adopted this ASU on January 1, 2010, which resulted in the consolidation of assets and liabilities onto Farmer Mac's balance sheet in connection with trusts that previously qualified for the QSPE exception. Additionally, interest income and interest expense related to the consolidated assets and liabilities of the trusts will be reflected in the statement of operations.

As of December 31, 2009, Farmer Mac disclosed the impact of adopting the new consolidation standard as an increase in consolidated assets of \$292.8 million, requiring incremental regulatory capital of \$5.9 million, and an increase in retained earnings of \$2.6 million. Upon adoption, Farmer Mac reassessed its securitization trusts created when loans subject to LTSPCs were converted to Farmer Mac I Guaranteed Securities in consideration of the related party relationship with certain counterparties to these transactions and concluded that additional trusts required consolidation. The actual impact upon adoption was an increase in consolidated assets of \$1.5 billion, which resulted in an incremental capital requirement of \$30.4 million. The transition adjustment upon adoption did not change significantly from the reported amount, increasing retained earnings by \$2.7 million, which is presented in the Condensed Consolidated Statement of Equity as "Cumulative effect of adoption of new accounting standard, net of tax."

-21-

Accounting Standards Update on Fair Value Measurements and Disclosures

On January 21, 2010, the FASB issued a new accounting standard, which amends FASB guidance on fair value measurements and disclosures to add new requirements for disclosures about transfers into and out of levels 1 and 2 and separate disclosures about purchases, sales, issuance, and settlements relating to level 3 measurements. The new standard also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The ASU is effective for first quarter 2010 reporting except for the level 3 activity disclosures, which are effective in first quarter 2011. Adoption of the new accounting guidance did not have a significant impact on Farmer Mac's fair value disclosures.

Effect of a Loan Modification When the Loan Is Part of a Pool That Is Accounted for as a Single Asset

On April 29, 2010, the FASB issued ASU 2010-18, Effect of a Loan Modification When the Loan is Part of a Pool That Is Accounted for as a Single Asset, which established that modifications of loans that are accounted for within a pool under the guidance for acquisitions of credit-impaired loans do not result in the removal of those loans from the pool, even if the modification of those loans would otherwise be considered a troubled debt restructuring. Loans accounted for individually under the guidance for acquisitions of credit-impaired loans continue to be subject to the accounting provisions for troubled debt restructurings. The ASU is effective for third quarter 2010 reporting. Adoption of ASU 2010-18 will not have a material effect on Farmer Mac's financial position, results of operations or cash flows.

Credit Quality of Financing Receivables and the Allowance for Credit Losses

On July 21, 2010, the FASB issued ASU 2010-20, Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses, which requires more robust and disaggregated disclosures to assist financial statement users in understanding more clearly an entity's credit risk exposures to finance receivables and the related allowance for credit losses. The new and amended disclosure requirements focus on five areas: nonaccrual and past due loans; allowance for credit losses; impaired loans; credit quality information; and modifications. The disclosures that relate to information as of the end of a reporting period will be effective for periods ending on or after December 15, 2010 and information related to activity that occurs during a reporting period will be effective for the first interim or annual period beginning after December 15, 2010. Since ASU 2010-20 only requires additional disclosures, it will not have an impact on Farmer Mac's financial position, results of operations or cash flows.

(i) Reclassifications

Certain reclassifications of prior period information were made to conform to the current period presentation.

-23-			

During the three and six months ended June 20, 2010, Farmer Mac did not recognize in earnings any other-than-temporary impairment charges, compared to charges of \$1.0 million and \$1.1 million for the same periods in 2009. The other-than-temporary impairment charges in 2009 were related to investments in CIT Group, Inc corporate debt securities and Fannie Mae floating rate preferred stock.

During the three months ended June 30, 2010, Farmer Mac did not receive any proceeds from the sale of securities from its available-for-sale investment portfolio, compared to proceeds of \$8.6 million for the same period in 2009, resulting in gross realized losses of \$0.3 million. During the six months ended June 30, 2010, Farmer Mac received proceeds of \$69.2 million from the sale of securities from its available-for-sale investment portfolio, resulting in gross realized gains of \$0.4 million and gross realized losses of \$0.2 million, compared to proceeds of \$153.1 million for the same period in 2009, resulting in gross realized gains of \$3.2 million and gross realized losses of \$0.3 million.

Floating rate asset-backed securities Floating rate auction-rate certificates backed by Government guaranteed student loans Floating rate Government/GSE guaranteed mortgage-backed securities Floating rate GSE subordinated debt	Fa	realized lo less than air Value 116,754	ss po 12 m Ui	ilable-for-Sosition for nonths nrealized Loss (in thou	Fusar \$	e Securities Jurealized I more than fair Value nds) 182,745 17,319 72,884 121,877	loss 12 1 U	(1,420) (40) (1,216) (774)

The temporary unrealized losses presented above are principally due to a general widening of credit spreads from the dates of acquisition to June 30, 2010 and December 31, 2009, as applicable. The resulting decreases in fair values reflect an increase in the perceived risk by the financial markets related to those securities. As of June 30, 2010, all of the investment securities in an unrealized loss position were rated at least "A" by a nationally recognized statistical rating organization. As of December 31, 2009, all of the investment securities in an unrealized loss position were rated at least "A," except one that was not rated. The unrealized losses were on 51 and 86 individual investment securities as of June 30, 2010 and December 31, 2009, respectively.

As of June 30, 2010, 41 of the securities in loss positions had been in loss positions for more than 12 months and had a total unrealized loss of \$28.0 million. As of December 31, 2009, 73 of the securities in loss positions had been in loss positions for more than 12 months and had a total unrealized loss of \$25.9 million. Securities in unrealized loss positions 12 months or more have a fair value as of June 30, 2010 that is, on average, approximately 90 percent of their amortized cost basis. Farmer Mac believes that all these unrealized losses are recoverable within a reasonable period of time through changes in credit spreads or maturity and expects to recover the amortized cost basis of these securities. Accordingly, Farmer Mac has concluded that none of the unrealized losses on these available-for-sale investment securities represent other-than-temporary impairment as of June 30, 2010. Farmer Mac does not intend to sell these securities and it is not more likely than not that Farmer Mac will be required to sell the securities before recovery of the amortized cost basis.

Farmer Mac did not own any held-to-maturity investments as of June 30, 2010 and 2009. As of June 30, 2010, Farmer Mac owned trading investments with an amortized cost of \$90.5 million, a fair value of \$82.0 million, and a weighted-average yield of 8.10 percent. The amortized cost, fair value and weighted-average yield of investments by remaining contractual maturity for available-for-sale investment securities as of June 30, 2010 are set forth below. Asset-backed and mortgage-backed securities are included based on their final maturities, although the actual maturities may differ due to prepayments of the underlying assets or mortgages.

Upon the adoption of the new consolidation guidance on January 1, 2010, Farmer Mac was determined to be the primary beneficiary of certain VIEs where Farmer Mac held beneficial interests in trusts used as vehicles for the securitization of agricultural real estate mortgage loans or rural utilities loans. Prior to 2010, Farmer Mac presented these beneficial interests as "Farmer Mac Guaranteed Securities" on the condensed consolidated balance sheets. Upon consolidation, Farmer Mac transferred these assets from Farmer Mac Guaranteed Securities to loans held for investment in consolidated trusts. The transferred assets on January 1, 2010 included Farmer Mac Guaranteed Securities — Rural Utilities with an unpaid principal balance of \$412.9 million and a fair value of \$455.6 million and Farmer Mac I Guaranteed Securities with an unpaid principal balance of \$5.3 million and a fair value of \$5.6 million.

On January 25, 2010, Farmer Mac contributed substantially all of the assets, in excess of \$1.1 billion, comprising the Farmer Mac II program to Farmer Mac's subsidiary, Farmer Mac II LLC. The assets that Farmer Mac contributed to Farmer Mac II LLC consisted primarily of USDA-guaranteed portions that had not been securitized by Farmer Mac (i.e., transferred to a trust whereby Farmer Mac II Guaranteed Securities were issued) but also included \$35.0 million of Farmer Mac II Guaranteed Securities. Farmer Mac did not guarantee the timely payment of principal and interest on the \$1.1 billion of contributed USDA-guaranteed portions and will provide a guarantee in connection with the issuance of Farmer Mac II Guaranteed Securities only to the extent that either Farmer Mac or Farmer Mac II LLC is approached or referred by an investor. Farmer Mac will not issue Farmer Mac II Guaranteed Securities to Farmer Mac II LLC in the future. The contributed USDA-guaranteed portions had previously been presented as Farmer Mac II Guaranteed Securities on the condensed consolidated financial statements of Farmer Mac and are now presented as USDA Guaranteed Securities on the condensed consolidated balance sheets. The assets of Farmer Mac II LLC would be available to creditors of Farmer Mac only after all obligations owed to creditors of and equity holders in Farmer Mac II LLC had been satisfied.

The temporary unrealized losses presented above are principally due to changes in interest rates from the date of acquisition to June 30, 2010 and December 31, 2009, as applicable. As of June 30, 2010 and December 31, 2009, the unrealized losses presented above are related to Farmer Mac II and USDA Guaranteed Securities, which are backed by the full faith and credit of the United States. Therefore, Farmer Mac has concluded that none of the unrealized losses on its available-for-sale Farmer Mac Guaranteed Securities represents an other-than-temporary impairment as of June 30, 2010 and December 31, 2009. Farmer Mac does not intend to sell these securities and it is not more likely than not that Farmer Mac will be required to sell the securities before recovery of the amortized cost basis.

Farmer Mac realized no gains or losses from the sale of Farmer Mac and USDA Guaranteed Securities for the three and six months ended June 30, 2010 and 2009.

The table below presents a sensitivity analysis for the Corporation's on-balance sheet Farmer Mac and USDA Guaranteed Securities as of June 30, 2010 and December 31, 2009.

	June 30, 2010 (dollars in t	eember 31, 2009 (s)	
Fair value of beneficial interests retained in Farmer			,
Mac and USDA Guaranteed Securities	\$ 2,985,060	\$	3,398,996
Weighted-average remaining life (in years)	3.2		3.7
Weighted-average prepayment speed (annual rate)	6.0%		3.8%
Effect on fair value of a 10% adverse change	\$ (1,188)	\$	(18)
Effect on fair value of a 20% adverse change	\$ (2,295)	\$	(36)
Weighted-average discount rate	2.7%		2.8%
Effect on fair value of a 10% adverse change	\$ (15,735)	\$	(22,081)
Effect on fair value of a 20% adverse change	\$ (31,756)	\$	(44,531)

These sensitivities are hypothetical. Changes in fair value based on 10 percent or 20 percent variations in assumptions generally cannot be extrapolated because the relationship of the change in assumptions to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated without changing any other assumption. In fact, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which might amplify or counteract the sensitivities.

The table below presents the outstanding principal balances for Farmer Mac loans, LTSPCs and Farmer Mac and USDA Guaranteed Securities as of June 30, 2010 and December 31, 2009.

When particular criteria are met, such as the default of the borrower, Farmer Mac becomes entitled to purchase the defaulted loans underlying Farmer Mac Guaranteed Securities (commonly referred to as "removal-of-account" provisions). Farmer Mac records all such defaulted loans at their unpaid principal balance during the period in which Farmer Mac becomes entitled to purchase the loans and therefore regains effective control over the transferred loans. Considering the low loan-to-value ratios in its portfolio, Farmer Mac believes that it is probable at the acquisition of these loans that it will be able to collect all contractually required payments receivable. Subsequent to the purchase, such defaulted loans are treated as nonaccrual loans and, therefore, interest is accounted for on the cash basis. Any decreases in expected cash flows are recognized as impairment. The following table presents information related to Farmer Mac's acquisition of defaulted loans for the three and six months ended June 30, 2010 and 2009 and the outstanding balances and carrying amounts of all such loans as of June 30, 2010 and December 31, 2009, respectively.

Net credit losses and 90-day delinquencies as of and for the periods indicated for Farmer Mac Guaranteed Securities, loans and LTSPCs are presented in the table below. Information is not presented for loans underlying AgVantage securities, USDA Guaranteed Securities, Farmer Mac II Guaranteed Securities, or rural utilities loans held or underlying Farmer Mac Guaranteed Securities - Rural Utilities. Each AgVantage security is a general obligation of an issuing institution approved by Farmer Mac and is secured by eligible loans in an amount at least equal to the outstanding principal amount of the security. Farmer Mac excludes the loans that secure AgVantage securities from the credit risk metrics it discloses because of the credit quality of the issuing institutions, the collateralization level for the securities, and because delinquent loans are required to be removed from the pool of pledged loans and replaced with current eligible loans. As of June 30, 2010, there were no probable losses inherent in Farmer Mac's AgVantage securities due to the credit quality of the obligors, as well as the underlying collateral. As of June 30, 2010, Farmer Mac had not experienced any credit losses on any AgVantage securities. The USDA-guaranteed portions presented as USDA Guaranteed Securities, as well as those that collateralize Farmer Mac II Guaranteed Securities, are guaranteed by the United States Department of Agriculture. Each USDA guarantee is an obligation backed by the full faith and credit of the United States. As of June 30, 2010, neither Farmer Mac nor Farmer Mac II LLC had experienced any credit losses on any USDA Guaranteed Securities or Farmer Mac II Guaranteed Securities. As of June 30, 2010, there were no delinquencies and no probable losses inherent in Farmer Mac's rural utilities loans held or in any Farmer Mac Guaranteed Securities - Rural Utilities. As of June 30, 2010, Farmer Mac had not experienced any credit losses on any of those loans or securities.

⁽²⁾ Includes loans and loans underlying Farmer Mac I Guaranteed Securities, LTSPCs and REO.

Note 4.

Comprehensive Income

Comprehensive income represents all changes in stockholders' equity except those resulting from investments by or distributions to stockholders, and is comprised primarily of net income and unrealized gains and losses on securities available-for-sale, net of related taxes. The following table sets forth Farmer Mac's comprehensive income for the three and six months ended June 30, 2010 and 2009:

For		June 30, 2009		Months Ended June 30, 2009
Net income	\$ 8,090	\$ 29,515	\$21,679	\$ 66,969
Available-for-sale securities, net of tax:

Accumulated other comprehensive income, net of tax	\$	31,469	\$	3,254

Note 5. Off-Balance Sheet Guarantees and Long Term Standby Purchase Commitments

Farmer Mac offers approved lenders two credit enhancement alternatives to increase their liquidity or lending capacity while retaining the cash flow benefits of their loans: (1) Farmer Mac Guaranteed Securities, which are available through the Farmer Mac I program, the Farmer Mac II program or the Rural Utilities program, and (2) Long Term Standby Purchase Commitments ("LTSPCs"), which are available through the Farmer Mac I program or Rural Utilities program. For securitization trusts where Farmer Mac is the primary beneficiary, as described in Note 1(g), the trust assets and liabilities are included on Farmer Mac's condensed consolidated balance sheet. Upon consolidation, Farmer Mac eliminates the portion of the guarantee and commitment fees receivable and guarantee and commitment obligations related to the consolidated trusts. For the remainder of these transactions, or in the event of deconsolidation, both of these alternatives result in the creation of off-balance sheet obligations for Farmer Mac. Farmer Mac accounts for these transactions and other financial guarantees in accordance with FASB guidance on accounting for guarantees. Farmer Mac records, at the inception of a guarantee, a liability for the fair value of its obligation to stand ready to perform under the terms of each guarantee and an asset that is equal to the fair value of the fees that will be received over the life of each guarantee. The fair values of the guarantee obligation and asset at inception are based on the present value of expected cash flows using management's best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discount rates commensurate with the risks involved. Because the cash flows of these instruments may be interest rate path dependent, these values and projected discount rates are derived using a Monte Carlo simulation model. The guarantee obligation and corresponding asset are subsequently amortized into guarantee and commitment fee income in relation to the decline in the unpaid principal balance on the underlying agricultural real estate mortgage and rural utilities loans.

Off-Balance Sheet Farmer Mac Guaranteed Securities

Eligible loans and other eligible assets may be placed into trusts that are used as vehicles for the securitization of the transferred assets and the Farmer Mac-guaranteed beneficial interests in the trusts are sold to investors. Proceeds from new securitizations during the six months ended June 30, 2010 and 2009 were \$12.9 million and \$17.2 million, respectively. The following table summarizes cash flows received from and paid to trusts used for securitizations:

	For the Six Months Ended					
	June 30, 2010			2009		
		ısands)				
Proceeds from new securitizations	\$	12,906	\$	17,224		
Guarantee fees received		2,620		5,858		
Purchases of assets from the trusts		(2,323)		-		
Servicing advances		(343)		7		
Repayments of servicing advances		174		2		

The following table presents the maximum principal amount of potential undiscounted future payments that Farmer Mac could be required to make under all off-balance sheet Farmer Mac Guaranteed Securities as of June 30, 2010 and December 31, 2009, not including offsets provided by any recourse provisions, recoveries from third parties or collateral for the underlying loans.

Outstanding Balance of Off-Balance Sheet									
Farmer Mac Guaranteed Securities									
	June 30,			cember 31,					
	2010			2009					
		(in tho	ousands)						
Farmer Mac I:									
AgVantage	\$	2,945,000	\$	2,945,000					
Farmer Mac Guaranteed Securities		826,910		1,492,239					
Farmer Mac II Guaranteed Securities		40,860		34,802					
Rural Utilities AgVantage		14,393		14,240					
Total off-balance sheet Farmer Mac									
Guaranteed Securities	\$	3,827,163	\$	4,486,281					

For those securities issued or modified on or after January 1, 2003, Farmer Mac has recorded a liability for its obligation to stand ready under the guarantee in the guarantee and commitment obligation on the condensed consolidated balance sheet. This liability approximated \$20.2 million as of June 30, 2010 and \$33.9 million as of December 31, 2009. Upon adoption of the new consolidation guidance on January 1, 2010, Farmer Mac eliminated \$15.5 million of the guarantee and commitment obligation related to the consolidated trusts. During second quarter 2010, Farmer Mac deconsolidated \$414.5 million of certain securitization trusts created when loans subject to LTSPCs were converted to Farmer Mac I Guaranteed Securities because Farmer Mac was no longer determined to be the primary beneficiary when the counterparty to the transaction ceased being a related party as a result of changes to the membership of Farmer Mac's board of directors. This deconsolidation resulted in an increase to the guarantee and commitment obligation of \$2.7 million as of June 30, 2010. See Note 1(g) for more information. As of June 30, 2010, the weighted-average remaining maturity of all loans underlying off-balance sheet Farmer Mac Guaranteed Securities, excluding AgVantage securities, was 14.1 years. For information on Farmer Mac's methodology for determining the reserve for losses on off-balance sheet Farmer Mac Guaranteed Securities, see Note 1(b).

In the future, Farmer Mac will provide a guarantee in connection with the issuance of Farmer Mac II Guaranteed Securities only to the extent that Farmer Mac or Farmer Mac II LLC is approached or referred by an investor. Farmer Mac will not issue Farmer Mac II Guaranteed Securities to Farmer Mac II LLC in the future.

LTSPCs

An LTSPC is a commitment by Farmer Mac to purchase eligible loans from a segregated pool of loans under enumerated circumstances, either for cash or in exchange for Farmer Mac Guaranteed Securities, on one or more undetermined future dates. As consideration for its assumption of the credit risk on loans underlying an LTSPC, Farmer Mac receives a commitment fee payable monthly in arrears in an amount approximating what would have been the guarantee fee if the transaction were structured as Farmer Mac Guaranteed Securities.

The maximum principal amount of potential undiscounted future payments that Farmer Mac could be requested to make under all LTSPCs, not including offsets provided by any recourse provisions, recoveries from third parties or collateral for the underlying loans, was \$1.7 billion as of June 30, 2010 and \$2.2 billion as of December 31, 2009.

As of June 30, 2010, the weighted-average remaining maturity of all loans underlying LTSPCs was 14.4 years. For those LTSPCs issued or modified on or after January 1, 2003, Farmer Mac has recorded a liability for its obligation to stand ready under the commitment in the guarantee and commitment obligation on the condensed consolidated balance sheet. This liability approximated \$12.5 million as of June 30, 2010 and \$14.7 million as of December 31, 2009.

Note 6.

Stockholders' Equity and Mezzanine Equity

Common Stock

Farmer Mac has three classes of common stock outstanding:

- Class A Voting Common Stock, which may be held only by banks, insurance companies and other financial institutions or similar entities that are not institutions of the Farm Credit System. By federal statute, no holder of Class A Voting Common Stock may directly or indirectly be a beneficial owner of more than 33 percent of the outstanding shares of that class of stock;
- Class B Voting Common Stock, which may be held only by institutions of the Farm Credit System. There are no restrictions on the maximum holdings of Class B Voting Common Stock; and

-35-

• Class C Non-Voting Common Stock, which has no ownership restrictions.

From fourth quarter 2004 through fourth quarter 2008, Farmer Mac paid a quarterly dividend of \$0.10 per share on all classes of the Corporation's common stock. From first quarter 2009 through second quarter 2010, Farmer Mac paid a quarterly dividend of \$0.05 per share on all classes of the Corporation's common stock. On August 5, 2010, Farmer Mac's board of directors declared a quarterly dividend of \$0.05 per share on the Corporation's common stock that is scheduled to be paid on September 30, 2010. Farmer Mac's ability to declare and pay a dividend could be restricted if it failed to comply with regulatory capital requirements.

Preferred Stock

During 2010 and 2009, Farmer Mac had two series of preferred stock outstanding:

- Series B preferred stock, which was newly issued on September 30, 2008 and on December 15, 2008, was temporary equity and is reported as Mezzanine Equity on the condensed consolidated balance sheets because it contained redemption features that, although remote, were not solely within the control of Farmer Mac, was repurchased and retired on January 25, 2010 such that none was outstanding on June 30, 2010; and
- Series C preferred stock, which was newly issued during fourth quarter 2008 and during 2009, is a component of Stockholders' Equity on the condensed consolidated balance sheets.

The Series C preferred stock was issued pursuant to an initiative under which any participant who used Farmer Mac for a credit enhancement or purchase transaction in excess of \$20.0 million was required to purchase an equity interest in Farmer Mac in the form of shares of Series C preferred stock, thereby enabling Farmer Mac to raise additional capital to support its mission of providing liquidity and lending capacity to agricultural and rural utilities lenders. Farmer Mac sold the 57,578 shares of Series C preferred stock without registration under the Securities Act of 1933, as amended, in reliance upon the exemption provided by Section 3(a)(2), for an aggregate purchase price of \$57.6 million or \$1,000 per share. There were 57,578 shares of Series C preferred stock outstanding as of June 30, 2010, all held by the National Rural Utilities Cooperative Finance Corporation ("National Rural"). This initiative that required participants to purchase Series C preferred stock ended in fourth quarter 2009.

Farmer Mac's ability to declare and pay dividends on its outstanding preferred stock could be restricted if it failed to comply with regulatory capital requirements. All series of Farmer Mac's preferred stock are included as components of core capital for regulatory and statutory capital compliance measurements.

Non-Controlling Interest in Subsidiary

On January 25, 2010, Farmer Mac completed a private offering of \$250.0 million aggregate face amount of securities issued by a newly formed Delaware statutory trust. The trust securities represent undivided beneficial ownership interests in 250,000 shares of non-cumulative perpetual preferred stock (the "Company Preferred Stock") of Farmer Mac's subsidiary, Farmer Mac II LLC, a Delaware limited liability company. The Company Preferred Stock has a liquidation preference of \$1,000 per share.

-36-

The \$250.0 million of proceeds from the offering were used by the trust to purchase the Company Preferred Stock from Farmer Mac. Farmer Mac II LLC issued its Company Preferred Stock and its common equity interest to Farmer Mac as consideration for the contribution by Farmer Mac to Farmer Mac II LLC of substantially all of the assets, in excess of \$1.1 billion, comprising the Farmer Mac II program business. Farmer Mac used the proceeds from the sale of the Company Preferred Stock to the Trust to repurchase and retire Farmer Mac's outstanding Series B preferred stock, which had an aggregate liquidation preference of \$150.0 million, and for general corporate purposes. The Company Preferred Stock is permanent equity of Farmer Mac II LLC and presented as "Non-controlling interest – preferred stock" within permanent equity on the consolidated balance sheets of Farmer Mac.

Statutory and Regulatory Capital Requirements

Farmer Mac is subject to, and as of June 30, 2010 was in compliance with, its three statutory and regulatory capital requirements:

- Minimum capital Farmer Mac's minimum capital level is equal to the sum of 2.75 percent of Farmer Mac's aggregate on-balance sheet assets, as calculated for regulatory purposes, plus 0.75 percent of the aggregate off-balance sheet obligations of Farmer Mac, including Farmer Mac Guaranteed Securities and LTSPCs;
- Critical capital Farmer Mac's critical capital level is equal to 50 percent of the minimum capital requirement at that time: and
- Risk-based capital the Farm Credit Administration ("FCA") has established a risk-based capital stress test for Farmer Mac.

As of June 30, 2010, Farmer Mac's minimum and critical capital requirements were \$235.4 million and \$117.7 million, respectively, and Farmer Mac's core capital level (common and preferred stock outstanding plus non-controlling interest – preferred stock, additional paid-in-capital and retained earnings) was \$442.0 million, \$206.6 million above the minimum capital requirement and \$324.3 million above the critical capital requirement. As of December 31, 2009, Farmer Mac's minimum and critical capital requirements were \$217.0 million and \$108.5 million, respectively, and its actual core capital level was \$337.2 million, \$120.2 million above the minimum capital requirement and \$228.7 million above the critical capital requirement.

Based on the risk-based capital stress test, Farmer Mac's risk-based capital requirement as of June 30, 2010 was \$29.9 million and Farmer Mac's regulatory capital (core capital plus the allowance for losses) of \$461.0 million exceeded that requirement by approximately \$431.1 million. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Regulatory Matters" for more information about proposed changes to the risk-based capital stress test applicable to Farmer Mac.

Note 7. Fair Value Disclosure

Fair Value Measurement

Effective January 1, 2008, Farmer Mac adopted FASB guidance on fair value measurements, which defines fair value, establishes a hierarchy for ranking fair value measurements, and expands disclosures about fair value measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (also referred to as an exit price).

In determining fair value, Farmer Mac uses various valuation approaches, including market, income and/or cost approaches. The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. When available, the fair value of Farmer Mac's financial instruments is based on quoted market prices, valuation techniques that use observable market-based inputs or unobservable inputs that are corroborated by market data. Pricing information obtained from third parties is internally validated for reasonableness prior to use in the consolidated financial statements.

-38-

When observable market prices are not readily available, Farmer Mac estimates fair value using techniques that rely on alternate market data or internally-developed models using significant inputs that are generally less readily observable. Market data includes prices of financial instruments with similar maturities and characteristics, interest rate yield curves, measures of volatility and prepayment rates. If market data needed to estimate fair value is not available, Farmer Mac estimates fair value using internally-developed models that employ a discounted cash flow approach. Even when market assumptions are not readily available, Farmer Mac's assumptions reflect those that market participants would likely use in pricing the asset or liability at the measurement date.

The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The standard describes the following three levels used to classify fair value measurements:

Level Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level Quoted prices in markets that are not active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 Prices or valuations that require unobservable inputs that are significant to the fair value measurement.

Farmer Mac performed a detailed analysis of the assets and liabilities carried at fair value to determine the appropriate level based on the transparency of the inputs used in the valuation techniques. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Farmer Mac's assessment of the significance of a particular input to the fair value measurement of an instrument requires judgment and consideration of factors specific to the instrument. While Farmer Mac believes its valuation methods are appropriate and consistent with those of other market participants, using different methodologies or assumptions to determine fair value could result in a materially different estimate of the fair value of some financial instruments.

The following is a description of the fair value techniques used for instruments measured at fair value as well as the general classification of such instruments pursuant to the valuation hierarchy described above. Fair value measurements related to financial instruments that are reported at fair value in the consolidated financial statements each period are referred to as recurring fair value measurements. Fair value measurements related to financial instruments that are not reported at fair value each period but are subject to fair value adjustments in certain circumstances are referred to as non-recurring fair value measurements.

Recurring Fair Value Measurements and Classification

Available-for-Sale and Trading Investment Securities

The fair value of investments in U.S. Treasuries is based on unadjusted quoted prices in active markets. Farmer Mac classifies these fair value measurements as level 1.

-39-

For a significant portion of Farmer Mac's investment portfolio, including most asset-backed securities, corporate debt securities, Government/GSE guaranteed mortgage-backed securities and preferred stock issued by GSEs, fair value is primarily determined using a reputable and nationally recognized third party pricing service. The prices obtained are non-binding and generally representative of recent market trades. The fair value of certain asset-backed and Government guaranteed mortgage-backed securities are estimated based on quotations from brokers or dealers. Farmer Mac corroborates its primary valuation source by obtaining a secondary price from another independent third party pricing service. Farmer Mac classifies these fair value measurements as level 2.

For investment securities that are thinly traded or not quoted, Farmer Mac estimates fair value using internally-developed models that employ a discounted cash flow approach. Farmer Mac maximizes the use of observable market data, including prices of financial instruments with similar maturities and characteristics, duration, interest rate yield curves, measures of volatility and prepayment rates. Farmer Mac generally considers a market to be thinly traded or not quoted if the following conditions exist: (1) there are few transactions for the financial instruments; (2) the prices in the market are not current; (3) the price quotes vary significantly either over time or among independent pricing services or dealers; or (4) there is a limited availability of public market information. Farmer Mac classifies these fair value measurements as level 3.

During first quarter 2010, Farmer Mac transferred its investments in the subordinated debt and preferred stock of CoBank, ACB and its investment in the preferred stock of AgFirst Farm Credit Bank, with par values of \$70.0 million, \$88.5 million and \$88.0 million, respectively, as of December 31, 2009, from level 3 measurements to level 2 measurements. Taking into consideration its own recently executed trades during first quarter 2010, along with an increase in observable trading activity for these securities, Farmer Mac determined that the best estimates of fair value for these securities as of March 31, 2010 and June 30, 2010 were the fair values provided by an independent third party pricing service. Farmer Mac transferred these securities out of level 3 based on their fair values as of the beginning of the first quarter 2010.

Available-for-Sale and Trading Farmer Mac and USDA Guaranteed Securities

Farmer Mac estimates the fair value of its Farmer Mac and USDA Guaranteed Securities by discounting the projected cash flows of these instruments at projected interest rates. The fair values are based on the present value of expected cash flows using management's best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discount rates commensurate with the risks involved. Farmer Mac classifies these measurements as level 3 because there is limited market activity and therefore little or no price transparency. On a sample basis, Farmer Mac corroborates the fair value of it Farmer Mac and USDA Guaranteed Securities by obtaining a secondary valuation from an independent third party service.

Upon the adoption of the new consolidation guidance on January 1, 2010, Farmer Mac was deemed to be the primary beneficiary of certain VIEs where Farmer Mac held beneficial interests in trusts used as vehicles for the securitization of agricultural real estate mortgage loans or rural utilities loans. Prior to 2010, Farmer Mac presented these beneficial interests as "Farmer Mac Guaranteed Securities" on the condensed consolidated balance sheet and reported them at their fair value. Upon consolidation, Farmer Mac transferred these assets from "Farmer Mac Guaranteed Securities" to "Loans held for investment in consolidated trusts." Going forward, these loans will be reported at their amortized cost and will no longer be included in recurring fair value measurements. Farmer Mac transferred these securities out of level 3 based on their fair values as of the beginning of the quarterly reporting period.

-40-

Financial Derivatives

The fair value of exchange-traded U.S. Treasury futures is based on unadjusted quoted prices for identical financial instruments. Farmer Mac classifies these fair value measurements as level 1.

Farmer Mac's derivatives portfolio consists primarily of interest rate swaps, credit default swaps and forward sales contracts on the debt of other GSEs. Farmer Mac estimates the fair value of these financial instruments based upon the counterparty valuations. Farmer Mac internally values its derivative portfolio using a discounted cash flow valuation technique and obtains a secondary valuation for certain interest rate swaps to corroborate the counterparty valuations. Farmer Mac also regularly reviews the counterparty valuations as part of the collateral exchange process. Farmer Mac classifies these fair value measurements as level 2.

Certain basis swaps are nonstandard interest rate swap structures and are therefore internally modeled using significant assumptions and unobservable inputs, resulting in level 3 classification. Farmer Mac uses a discounted cash flow valuation technique, using management's best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discounted rates commensurate with the risks involved.

As of June 30, 2010 and December 31, 2009, the consideration of credit risk related to both Farmer Mac and the counterparties resulted in an adjustment to the valuations of Farmer Mac's derivative portfolio of \$(1.1) million and \$0.7 million, respectively. See Note 1(c) for further information regarding Farmer Mac's derivative portfolio.

Nonrecurring Fair Value Measurements and Classification

Loans Held for Sale

Loans held for sale are reported at the lower of cost or fair value in the consolidated balance sheets. Farmer Mac internally models the fair value of loans by discounting the projected cash flows of these instruments at projected interest rates. The fair values are based on the present value of expected cash flows using management's best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discount rates commensurate with the risks involved. The fair values of these instruments are classified as level 3 measurements. As of June 30, 2010, Farmer Mac recorded an adjustment of \$2.3 million to report loans held for sale at the lower of cost or fair value. As of December 31, 2009, Farmer Mac recorded an adjustment of \$0.1 million to report loans held for sale at the lower of cost or fair value.

-41-

Loans Held for Investment

Certain loans in Farmer Mac's held for investment loan portfolio are measured at fair value when they are determined to be impaired. Impaired loans are reported at fair value less estimated cost to sell. The fair value of the loan is generally based on the fair value of the underlying property, which is determined by third-party appraisals when available. When third-party appraisals are not available, fair value is estimated based on factors such as prices for comparable properties in similar geographical areas and/or assessment through observation of such properties. Farmer Mac classifies these fair values as level 3 measurements.

Real Estate Owned

Farmer Mac initially records REO properties at fair value less costs to sell and subsequently records them at the lower of carrying value or fair value less costs to sell. The fair value of REO is determined by third-party appraisals when available. When third-party appraisals are not available, fair value is estimated based on factors such as prices for comparable properties in similar geographical areas and/or assessment through observation of such properties. Farmer Mac classifies the REO fair values as level 3 measurements.

Fair Value Classification and Transfers

As of June 30, 2010, Farmer Mac's assets and liabilities recorded at fair value include financial instruments valued at \$3.2 billion whose fair values were estimated by management in the absence of readily determinable fair values (i.e., level 3). These financial instruments measured as level 3 represented 45 percent of the total assets and 70 percent of financial instruments measured at fair value as of June 30, 2010. As of December 31, 2009, Farmer Mac's asset and liabilities recorded at fair value included financial instruments valued at \$3.7 billion whose fair values were estimated by management in the absence of readily determinable fair values (i.e., level 3). These financial instruments measured as level 3 represented 61 percent of the total assets and 80 percent of financial instruments measured at fair value as of December 31, 2009.

The following tables present information about Farmer Mac's asset and liabilities measured at fair value on a recurring and nonrecurring basis as of June 30, 2010 and December 31, 2009, respectively, and indicate the fair value hierarchy of the valuation techniques used by Farmer Mac to determine such fair value.

-42-

Assets and Liabilities Measured at Fair Value as of June 30, 2010
