ITEM 1. REPORT TO SHAREHOLDERS.

John Hancock

Income Securities Trust

Ticker: JHS Semiannual report 4/30/15

A message to shareholders

Dear fellow shareholder,

U.S. economic growth continued, despite recent weakness caused largely by the harsh winter weather. The market expansion that began in 2009 so far remains intact. Positive economic and business news has translated into good news for U.S. investors, with continued solid results for a range of U.S. equity indexes in recent months. Many fixed-income indexes have also seen positive returns in this environment.

Outside of the United States, economies are struggling to replicate the kind of success we have enjoyed at home. Central banks across Europe and Asia have announced dramatic monetary policy measures to promote economic activity similar to the monetary policy activity of the U.S. Federal Reserve in recent years. As was the case in the United States beginning in 2009, many international markets have rallied in advance of sustained economic progress. China's stock market in particular has delivered extraordinary gains. In fact, our network of asset managers and research firms believes that government and central bank stimulus may prove to be the biggest driver of international market returns in 2015.

While maintaining adequate portfolio diversification is vital in any market environment, we believe it is especially important today given the unprecedented central bank interventions of the past few years and the very real geopolitical risk around the world. The uncertainty of today's global financial markets is one of the reasons we at John Hancock Investments believe it is important for long-term portfolios to have exposure to a diverse range of investments. Now may be a good time to discuss the resilience of your portfolio with your financial advisor.

On behalf of everyone at John Hancock Investments, I'd like to take this opportunity to welcome new shareholders and to thank existing shareholders for the continued trust you've placed in us.

Sincerely,

Andrew G. Arnott
President and Chief Executive Officer
John Hancock Investments

Your fund at a glance

INVESTMENT OBJECTIVE

The fund seeks to generate a high level of current income consistent with prudent investment risk.

AVERAGE ANNUAL TOTAL RETURNS AS OF 4/30/15 (%)

The Barclays U.S. Government/Credit Bond Index is an unmanaged index of U.S. government bonds, U.S. corporate bonds, and Yankee bonds.

It is not possible to invest directly in an index.

The fund's most recent performance and annualized distribution rate can be found at www.jhinvestments.com.

The performance data contained within this material represents past performance, which does not guarantee future results.

PERFORMANCE HIGHLIGHTS OVER THE LAST SIX MONTHS

Modest gains for the bond market

An environment of modest growth and low inflation helped offset concerns about the potential timing of the U.S. Federal Reserve's first interest-rate increase.

Positions in higher-yielding investment-grade bonds helped

Our decision to favor corporate bonds over U.S. Treasuries and agency mortgage-backed securities was a positive for performance.

Allocation to high-yield bonds detracted

While high-yield bonds finished the period with a gain, they lagged investment-grade bonds.

PORTFOLIO COMPOSITION AS OF 4/30/15 (%)

A note about risks

As is the case with all closed-end funds, shares of this fund may trade at a discount or a premium to the fund's net asset value (NAV). An investment in the fund is subject to investment and market risks, including the possible loss of the entire principal invested. There is no guarantee prior distribution levels will be maintained, and distributions may include a substantial return of capital, which may increase the potential tax gain or reduce the potential tax loss of a subsequent sale of shares of the fund. Fixed-income investments are subject to interest-rate and credit risk; their value will normally decline as interest rates rise or if a creditor, grantor, or counterparty is unable or unwilling to make principal, interest, or settlement payments. Investments in higher-yielding, lower-rated securities include a higher risk of default. An issuer of securities held by the fund may default, have its credit rating downgraded, or otherwise perform poorly, which may affect fund performance. Certain market conditions, including reduced trading volume, heightened volatility, and rising interest rates, may impair liquidity, the ability of the fund to sell securities or close derivative positions at advantageous prices. The fund's use of leverage creates additional risks, including greater volatility of the fund's NAV, market price, and returns. There is no assurance that the fund's leverage strategy will be successful.

Discussion of fund performance

An interview with Portfolio Manager Jeffrey N. Given, CFA, John Hancock Asset Management a division of Manulife Asset Management (US) LLC

Jeffrey N. Given, CFA

Portfolio Manager

John Hancock Asset Management

Can you describe the market environment of the past six months?

The U.S. bond market experienced a modest gain during the six-month reporting period, as gauged by the 2.12% return of the fund's benchmark, the Barclays U.S. Government/Credit Bond Index. On balance, the investment backdrop proved favorable for the bond market. Sluggish growth in the European economy, together with the European Central Bank's announcement of an expanded quantitative easing policy, caused yields to fall significantly across the region (as prices rose). The strength in the European debt markets fed through to the United States, where the relatively high yields on U.S. Treasuries attracted buying interest from global investors. The U.S. market was also helped by the backdrop of modest economic growth and low inflation, which gradually boosted investor confidence that the U.S. Federal Reserve (Fed) could avoid raising interest rates until late in 2015. In this environment, the yield on the 10-year U.S. Treasury note declined from 2.35% on October 31, 2014, to 2.05% on April 30, 2015.

Falling government bond yields, in conjunction with the continued strength in corporate balance sheets, fueled positive performance for investment-grade corporate bonds during the six-month period. High-yield bonds (those rated below investment grade) also finished with a gain, but they lagged their higher-rated counterparts due to the impact of falling oil prices on many energy issuers in the asset class during late 2014. While energy prices subsequently recovered fueling a concurrent improvement in the high-yield market the rebound was not enough to make up for the downturn of November and December.

What factors aided the fund's performance results?

The fund finished the semiannual period with a positive total return and outperformed its benchmark.

The fund's performance was helped by its substantial overweight position in investment-grade corporate bonds. We favored this sector on the belief that it offered a solid yield advantage and was positioned to benefit from the favorable credit backdrop. Within the corporate space, the fund was overweight in the financials sector. Unlike companies in the industrials and utilities sectors, regulations prevent financial companies from taking on excessive debt. In many cases, financial firms can't even raise the dividends on their stocks without permission from the Fed. In our view,

"The fund's performance was helped by its substantial overweight position in investment-grade corporate bonds."

these factors mean that there is little risk that companies in the financials sector will take actions that are unfavorable for debt investors.

The investment-grade portion of the fund also holds an allocation to securitized debt, a category that includes mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. In general, we believed these investments offered a better risk/return profile than either U.S. Treasuries or agency mortgage-backed securities. This aspect of the fund's positioning made a positive contribution to the fund's six-month results.

The fund's modest allocation to common stocks also contributed to performance, as U.S. large-cap stocks experienced positive returns during the period. The fund's equity portfolio was aided by its position in Kraft Foods Group, Inc., which gained nearly 50% on news that the company was

QUALITY COMPOSITION AS OF 4/30/15 (%)

"The fund's allocation to high-yield bonds, while a positive for absolute returns, detracted from relative performance..."

merging with H.J. Heinz Company. Positions in Stanley Black & Decker, Inc. and the French pharmaceutical giant Sanofi SA further helped performance within the fund's equity allocation.

The fund's yield curve positioning was an additional positive. We added value by tilting toward longer-term bonds over intermediate-term debt, which enabled the fund to capitalize on the flattening of the yield curve.

What factors detracted from performance?

The fund's allocation to high-yield bonds, while a positive for absolute returns, detracted from relative performance at a time in which the asset class lagged investment-grade debt. We continue to see opportunities in high yield, however, as we believe its yield advantage provides a foundation for above-average total returns in a low-yield environment.

In terms of positioning within high yield, the largest change was our decision to reduce the fund's exposure to the energy sector in order to reduce the potential impact of volatility in oil prices. We continued to hold a positive view on the specific securities held in the fund, however, since the portfolio's energy exposure is tilted toward companies that aren't dependent on prices, such as pipeline operators. Revenues for these companies are determined not by the price of oil, but the overall volume of oil and natural gas being moved around the country. Given that production is remaining stable, we believe pipelines can maintain steady earnings despite the volatility in energy prices.

As a percentage of total investments.

How would you characterize your portfolio activity during the past six months?

We continued to manage fund turnover, as we have in recent years. While lower portfolio activity is partially the result of our comfort with the fund's current positioning, it also reflects the generally declining volatility in the credit markets. Our search for opportunities created by short-term market disruptions is a key aspect of our approach, but there is less latitude to put this strategy to work when volatility is low. As a result, we did not make major shifts among asset classes. However, we did continue to employ our opportunistic approach at the individual security level.

In the fund's investment-grade segment, we continued to favor assets such as nonagency mortgage-backed securities, asset-backed securities, and commercial mortgage-backed securities, all of which offer a yield advantage relative to U.S. Treasuries and agency mortgages. We also retained a significant weighting in investment-grade corporate bonds, with an emphasis on bonds that offer attractive yields for the associated risks. We believe both aspects of our approach will help augment the fund's income over time, a potentially important consideration at a time of low prevailing yields.

What are some of the reasons behind the fund's current positioning?

While investors have been focusing a great deal of attention on the timing of the Fed's first interest-rate increase, we don't expect that Fed policy will be a significant issue for the market aside from its potential impact on short-term volatility. The backdrop of low inflation and measured growth should enable the Fed to employ a gradual, well-telegraphed approach, similar to its cycle of rate increases in 2004-2006. We expect that this will contribute to a continuation of the current low-return environment and we continue to seek the most compelling total return opportunities in the higher-yielding segments of the market.

¹ Six months ended 4-30-15. Unaudited.

Based on average
² daily shares outstanding.

Total returns would have been lower had
³ certain expenses not been reduced during the applicable periods.

⁴ Total return based on net asset value reflects changes in the fund's net asset value during each period. Total return based on market value reflects changes in market value. Each figure assumes that dividend and capital

gain distributions, if any, were reinvested. These figures will differ depending upon the level of any discount from or premium to net asset value at which the fund's shares traded during the period.

5 Not annualized.

6 Annualized.

Expenses including reductions excluding interest expense were 0.95%, 1.00%, 1.01%, 1.06%, 1.04% and

7 1.12% for the periods ended 4-30-15, 10-31-14, 10-31-13, 10-31-12, 10-31-11 and 10-31-10, respectively.

Asset coverage equals the total net assets plus borrowings divided by the borrowings of the fund outstanding at period end (Note 8). As debt outstanding amount changes, level of invested assets may change accordingly.

Asset coverage ratio provides a measure of leverage.

32 SEE NOTES TO FINANCIAL STATEMENTS

Notes to financial statements (unaudited)

Note 1 Organization

John Hancock Income Securities Trust (the fund) is a closed-end management investment company organized as a Massachusetts business trust and registered under the Investment Company Act of 1940, as amended (the 1940 Act).

Note 2 Significant accounting policies

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (US GAAP), which require management to make certain estimates and assumptions as of the date of the financial statements. Actual results could differ from those estimates and those differences could be significant. The fund qualifies as an investment company under Topic 946 of Accounting Standards Codification of US GAAP.

Events or transactions occurring after the end of the fiscal period through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the fund:

Security valuation. Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. In order to value the securities, the fund uses the following valuation techniques: Equity securities held by the fund are valued at the last sale price or official closing price on the exchange where the security was acquired or most likely will be sold. In the event there were no sales during the day or closing prices are not available, the securities are valued using the last available bid price. Debt obligations are valued based on the evaluated prices provided by an independent pricing vendor or from broker-dealers. Independent pricing vendors utilize matrix pricing which takes into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data, as well as broker supplied prices. Swaps are valued using evaluated prices obtained from an independent pricing vendor. Foreign securities are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing vendor. Securities that trade only in the over-the-counter (OTC) market are valued using bid prices. Other portfolio securities and assets, for which reliable market quotations are not readily available, are valued at fair value as determined in good faith by the fund's Pricing Committee following procedures established by the Board of Trustees. The frequency with which these fair valuation procedures are used cannot be predicted and fair value of securities may differ significantly from the value that would have been used had a ready market for such securities existed.

The fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using other significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the fund's investments as of April 30, 2015, by major security category or type:

	Total market value at 4-30-15	Level 1 quoted price	Level 2 significant observable inputs	Level 3 significant unobservable inputs
Corporate bonds	\$133,174,878		\$133,174,878	
Term loans	923,951		923,951	
Capital preferred securities	3,596,526		3,596,526	
U.S. Government and Agency obligations	61,398,024		61,398,024	

33

	Total market value at 4-30-15	Level 1 quoted price	Level 2 significant observable inputs	Level 3 significant unobservable inputs

Other financial instruments				
Interest rate swaps	(\$515,143)		(\$515,143)	

Repurchase agreements. The fund may enter into repurchase agreements. When the fund enters into a repurchase agreement, it receives collateral that is held in a segregated account by the fund's custodian. The collateral amount is marked-to-market and monitored on a daily basis to ensure that the collateral held is in an amount not less than the principal amount of the repurchase agreement plus any accrued interest. Collateral received by the fund for repurchase agreements is disclosed in the Fund's investments as part of the caption related to the repurchase agreement.

Repurchase agreements are typically governed by the terms and conditions of the Master Repurchase Agreement and/or Global Master Repurchase Agreement (collectively, MRA). Upon an event of default, the non-defaulting party may close out all transactions traded under the MRA and net amounts owed. Absent an event of default, assets and liabilities resulting from repurchase agreements are not offset in the Statement of assets and liabilities. In the event of a default by the counterparty, realization of the collateral proceeds could be delayed, during which time the collateral value may decline or the counterparty may have insufficient assets to pay back claims resulting from close-out of the transactions.

Security transactions and related investment income. Investment security transactions are accounted for on a trade date plus one basis for daily net asset value calculations. However, for financial reporting purposes, investment transactions are reported on trade date. Interest income is accrued as earned. Interest income includes coupon interest and amortization/accretion of premiums/discounts on debt securities. Debt obligations may be placed in a non-accrual status and related interest income may be reduced by stopping current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful. Dividend income is recorded on the ex-date, except for dividends of foreign securities where the dividend may not be known until after the ex-date. In those cases, dividend income, net of withholding taxes, is recorded when the fund becomes aware of the dividends. Distributions received on securities that represent a return of capital or capital gain are recorded as a reduction of cost of investments and/or as a realized gain if amounts are estimable. Foreign taxes are provided for based on the fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Gains and losses on securities sold are determined on the basis of identified cost and may include proceeds from litigation.

Foreign taxes. The fund may be subject to withholding tax on income and/or capital gains or repatriation taxes imposed by certain countries in which the fund invests. Taxes are accrued based upon investment income, realized gains or unrealized appreciation.

Stripped securities. Stripped securities are financial instruments structured to separate principal and interest cash flows so that one class receives principal payments from the underlying assets (PO or principal only), while the other class receives the interest cash flows (IO or interest only). Both PO and IO investments represent an interest in the cash flows of an underlying stripped security. If the underlying assets experience greater than anticipated prepayments of principal, the fund may fail to fully recover its initial investment in an IO security. The market value of these

securities can be extremely volatile in response to changes in interest rates or prepayments on the underlying securities. In addition, these securities present

additional credit risk such that the fund may not receive all or part of its principal or interest payments because the borrower or issuer has defaulted on its obligation.

Overdrafts. Pursuant to the custodian agreement, the fund's custodian may, in its discretion, advance funds to the fund to make properly authorized payments. When such payments result in an overdraft, the fund is obligated to repay the custodian for any overdraft, including any costs or expenses associated with the overdraft. The custodian may have a lien, security interest or security entitlement in any fund property that is not otherwise segregated or pledged, to the maximum extent permitted by law, to the extent of any overdraft.

Expenses. Within the John Hancock group of funds complex, expenses that are directly attributable to an individual fund are allocated to such fund. Expenses that are not readily attributable to a specific fund are allocated among all funds in an equitable manner, taking into consideration, among other things, the nature and type of expense and the fund's relative net assets. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

Federal income taxes. The fund intends to continue to qualify as a regulated investment company by complying with the applicable provisions of the Internal Revenue Code and will not be subject to federal income tax on taxable income that is distributed to shareholders. Therefore, no federal income tax provision is required.

Under the Regulated Investment Company Modernization Act of 2010, the fund is permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an unlimited period. Any losses incurred during those taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law.

For federal income tax purposes, as of October 31, 2014, the fund had a capital loss carryforward of \$9,792,647 available to offset future net realized capital gains. The following table details the capital loss carryforward available:

**Capital loss carryforward expiring at
October 31**

2015	2016	2017	2018
\$1,203,825	\$1,367,076	\$6,785,450	\$436,296

As of October 31, 2014, the fund had no uncertain tax positions that would require financial statement recognition, derecognition or disclosure. The fund's federal tax returns are subject to examination by the Internal Revenue Service for a period of three years.

Distribution of income and gains. Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-date. The fund generally declares and pays dividends quarterly and capital gain distributions, if any, annually.

Such distributions, on a tax basis, are determined in conformity with income tax regulations, which may differ from US GAAP. The final determination of tax characteristics of the fund's distribution will occur at the end of the fiscal year and will subsequently be reported to shareholders.

Capital accounts within the financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Temporary book-tax differences, if any, will reverse in a subsequent period. Book-tax differences are primarily attributable to derivative transactions and amortization and accretion on debt securities.

Statement of cash flows. Information on financial transactions that have been settled through the receipt and disbursement of cash is presented in the Statement of cash flows. The cash amount shown in the Statement of cash flows is the amount included in the fund's Statement of assets and liabilities and represents the cash on hand at the fund's custodian and does not include any short-term investments or cash segregated at the custodian for swap contracts.

Note 3 Derivative instruments

The fund may invest in derivatives in order to meet its investment objective. Derivatives include a variety of different instruments that may be traded in the OTC market, on a regulated exchange or through a clearing facility. The risks in using derivatives vary depending upon the structure of the instruments, including the use of leverage, optionality, the liquidity or lack of liquidity of the contract, the creditworthiness of the counterparty or clearing organization and the volatility of the position. Some derivatives involve risks that are potentially greater than the risks associated with investing directly in the referenced securities or other referenced underlying instrument. Specifically, the fund is exposed to the risk that the counterparty to an OTC derivatives contract will be unable or unwilling to make timely settlement payments or otherwise honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction.

Certain swaps are traded through the OTC market and may be regulated by the Commodity Futures Trading Commission (the CFTC). Derivative counterparty risk is managed through an ongoing evaluation of the creditworthiness of all potential counterparties and, if applicable, designated clearing organizations. The fund attempts to reduce its exposure to counterparty risk for derivatives traded in the OTC market, whenever possible, by entering into an International Swaps and Derivatives Association (ISDA) Master Agreement with each of its OTC counterparties. The ISDA gives each party to the agreement the right to terminate all transactions traded under the agreement if there is certain deterioration in the credit quality or contractual default of the other party, as defined in the ISDA. Upon an event of default or a termination of the ISDA, the non-defaulting party has the right to close out all transactions and to net amounts owed.

As defined by the ISDA, the fund may have collateral agreements with certain counterparties to mitigate counterparty risk on OTC derivatives. Subject to established minimum levels, collateral for OTC transactions is generally determined based on the net aggregate unrealized gain or loss on contracts with a particular counterparty. Collateral pledged to the fund is held in a segregated account by a third-party agent or held by the custodian bank for the benefit of the fund and can be in the form of cash or debt securities issued by the U.S. government or related agencies; collateral posted by the fund for OTC transactions is held in a segregated account at the fund's custodian and is noted in the accompanying Fund's investments, or if cash is posted, on the Statement of assets and liabilities. The fund's maximum risk of loss due to counterparty risk is equal to the asset value of outstanding contracts offset by collateral received.

Interest rate swaps. Interest rate swaps represent an agreement between the fund and a counterparty to exchange cash flows based on the difference between two interest rates applied to a notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The fund settles accrued net interest receivable or payable under the swap contracts at specified, future intervals. Swap agreements are privately negotiated in the OTC market or may be executed on a registered commodities exchange (centrally cleared swaps). Swaps are marked-to-market daily and the change in value is recorded as unrealized appreciation/depreciation of swap contracts. A termination payment by the counterparty or the fund is recorded as realized gain or loss, as well as the net periodic payments received or paid by the fund. The value of the swap will typically impose collateral posting obligations on the party that is considered out-of-the-money on the swap.

Entering into swap agreements involves, to varying degrees, elements of credit, market and documentation risk that may amount to values that are in excess of the amounts recognized on the Statement of assets and liabilities. Such risks involve the possibility that there will be no liquid market for the swap, or that a counterparty may default on its obligation or delay payment under the swap terms. The counterparty may disagree or contest the terms of the swap. Market risks may also accompany the swap, including interest rate risk. The fund may also suffer losses if it is unable to terminate or assign outstanding swaps or reduce its exposure through offsetting transactions.

During the six months ended April 30, 2015, the fund used interest rate swaps in anticipation of rising interest rates. The following table summarizes the interest rate swap contracts held as of April 30, 2015.

Counterparty	USD notional amount	Payments made by fund	Payments received by fund	Maturity date	Market value
Morgan Stanley Capital Services	\$22,000,000	Fixed 1.442500%	3 Month LIBOR ^(a)	Aug 2016	(\$305,505)

36

Counterparty	USD notional amount	Payments made by fund	Payments received by fund	Maturity date	Market value
Morgan Stanley Capital Services	22,000,000	Fixed 1.093750%	3 Month LIBOR ^(a)	May 2017	(209,638)
Total	\$44,000,000				(\$515,143)

(a) At 4-30-15, the 3-month LIBOR rate was 0.27875%

No interest rate swap positions were entered into or closed during the six months ended April 30, 2015.

Fair value of derivative instruments by risk category

The table below summarizes the fair value of derivatives held by the fund at April 30, 2015 by risk category:

Risk	Statement of assets and liabilities location	Financial instruments location	Asset derivatives fair value	Liabilities derivative fair value
Interest rate contracts	Swap contracts, at value	Interest rate swaps		(\$515,143)

Effect of derivative instruments on the Statement of operations

The table below summarizes the net realized gain (loss) included in the net increase (decrease) in net assets from operations, classified by derivative instrument and risk category, for the six months ended April 30, 2015:

Risk	Statement of operations location	Swap contracts
Interest rate contracts	Net realized gain (loss)	(\$226,273)

The table below summarizes the net change in unrealized appreciation (depreciation) included in the net increase (decrease) in net assets from operations, classified by derivative instrument and risk category, for the six months ended April 30, 2015:

Risk	Statement of operations location	Swap contracts
Interest rate contracts	Change in unrealized appreciation (depreciation)	\$50,020
Note 4	Guarantees and indemnifications	

Under the fund's organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the fund. Additionally, in the normal course of business, the fund enters into contracts with service providers that contain general indemnification clauses. The fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the fund that have not yet occurred. The risk of material loss from such claims is considered remote.

Note 5 Fees and transactions with affiliates

John Hancock Advisers, LLC (the Advisor) serves as investment advisor for the fund. The Advisor is an indirect, wholly owned subsidiary of Manulife Financial Corporation (MFC).

Management fee. The fund has an investment advisory agreement with the Advisor under which the fund pays a daily management fee to the Advisor, on an annual basis, equal to the sum of (a) 0.650% of the first \$150 million of the fund's average daily managed assets (net assets plus borrowings under the Credit Facility Agreement) (see Note 7), (b) 0.375% of the next \$50 million of the fund's average daily managed assets, (c) 0.350% of the next \$100 million of the

fund's average daily managed assets and (d) 0.300% of the fund's average daily managed assets in excess of \$300 million. The Advisor has a subadvisory agreement with John Hancock Asset Management a division of Manulife Asset Management (US) LLC, an indirectly owned subsidiary of MFC and an affiliate of the Advisor. The fund is not responsible for payment of the subadvisory fees.

The Advisor has contractually agreed to waive a portion of its management fee and/or reimburse expenses for certain funds of the John Hancock funds complex, including the fund (the participating portfolios). This waiver is based upon aggregate net assets of all the participating portfolios. The amount of the reimbursement is calculated daily and allocated among all the

participating portfolios in proportion to the daily net assets of each fund. During the six months ended April 30, 2015, this waiver amounted to 0.01% of the fund's average net assets on an annualized basis. This arrangement may be amended or terminated at any time by the Advisor upon notice to the fund and with the approval of the Board of Trustees.

The expense reductions described above amounted to \$10,418 for the six months ended April 30, 2015.

The investment management fees, including the impact of the waivers and reimbursements as described above, incurred for the six months ended April 30, 2015 were equivalent to a net annual effective rate of 0.51% of the fund's average daily managed assets.

Accounting and legal services. Pursuant to a service agreement, the fund reimburses the Advisor for all expenses associated with providing the administrative, financial, legal, accounting and recordkeeping services to the fund, including the preparation of all tax returns, periodic reports to shareholders and regulatory reports, among other services. These accounting and legal services fees incurred for the six months ended April 30, 2015 amounted to an annual rate of 0.01% of the fund's average daily managed assets.

Trustee expenses. The fund compensates each Trustee who is not an employee of the Advisor or its affiliates. Each independent Trustee receives from the fund and the other John Hancock closed-end funds an annual retainer. In addition, Trustee out-of-pocket expenses are allocated to each fund based on its net assets relative to other funds within the John Hancock group of funds complex.

Note 6 Fund share transactions

On March 12, 2015, the Board of Trustees approved a share repurchase plan. Under the share repurchase plan, the fund may purchase in the open market up to 10% of its outstanding common shares as of February 28, 2015. The current share repurchase plan will remain in effect between March 13, 2015 and December 31, 2015. During the six months ended April 30, 2015, there was no activity under the share repurchase plan.

Note 7 Leverage risk

The fund utilizes a Credit Facility Agreement (CFA) to increase its assets available for investment. When the fund leverages its assets, common shareholders bear the fees associated with the CFA and have potential to benefit or be disadvantaged from the use of leverage. The Advisor's fee is also increased in dollar terms from the use of leverage. Consequently, the fund and the Advisor may have differing interests in determining whether to leverage the fund's assets. Leverage creates risks that may adversely affect the return for the holders of common shares, including:

- the likelihood of greater volatility of net asset value and market price of common shares;
- fluctuations in the interest rate paid for the use of the credit facility;
- increased operating costs, which may reduce the fund's total return;
- the potential for a decline in the value of an investment acquired through leverage, while the fund's obligations under such leverage remains fixed; and
- the fund is more likely to have to sell securities in a volatile market in order to meet asset coverage or other debt compliance requirements.

To the extent the income or capital appreciation derived from securities purchased with funds received from leverage exceeds the cost of leverage, the fund's return will be greater than if leverage had not been used, conversely, returns would be lower if the cost of the leverage exceeds the income or capital appreciation derived. In addition to the risks created by the fund's use of leverage, the fund is subject to the risk that it would be unable to timely, or at all, obtain replacement financing if the CFA is terminated. Were this to happen, the fund would be required to de-leverage, selling securities at a potentially inopportune time and incurring tax consequences. Further, the fund's ability to

generate income from the use of leverage would be adversely affected.

38

Note 8 Credit facility agreement

The fund has entered into a CFA with Credit Suisse Securities (USA) LLC (CSSU), pursuant to which the fund borrows money to increase its assets available for investment. In accordance with the 1940 Act, the fund's borrowings under the CFA will not exceed 33 1/3% of the fund's managed assets (net assets plus borrowings) at the time of any borrowing.

The fund pledges a portion of its assets as collateral to secure borrowings under the CFA. Such pledged assets are held in a special custody account with the fund's custodian. The amount of assets required to be pledged by the fund is determined in accordance with the CFA. The fund retains the benefits of ownership of assets pledged to secure borrowings under the CFA. Interest charged is at the rate of one month LIBOR (London Interbank Offered Rate) plus 0.70% and is payable monthly. Prior to January 1, 2015, the interest rate charged under CFA was a rate of three month LIBOR plus 0.41% (paid monthly). As of April 30, 2015, the fund had borrowings of \$91,300,000, at an interest rate of 0.88%, which is reflected in the Credit facility agreement payable on the Statement of assets and liabilities. During the six months ended April 30, 2015, the average borrowings under the CFA and the effective average interest rate were \$91,300,000 and 0.81%, respectively.

The fund may terminate the CFA with CSSU at any time. If certain asset coverage and collateral requirements or other covenants are not met, the CFA could be deemed in default and result in termination. Absent a default or facility termination event, CSSU generally is required to provide the fund with 270 calendar days' notice prior to terminating or amending the CFA.

Note 9 Purchase and sale of securities

Purchases and sales of securities, other than short-term investments and U.S. Treasury obligations, amounted to \$41,036,382 and \$51,477,292, respectively, for the six months ended April 30, 2015. Purchases and sales of U.S. Treasury obligations aggregated \$26,365,482 and \$18,379,814, respectively, for the six months ended April 30, 2015.

ADDITIONAL INFORMATION

Unaudited

Investment objective and policy

The fund is a closed-end, diversified management investment company, common shares of which were initially offered to the public on February 14, 1973 and are publicly traded on the New York Stock Exchange (the NYSE). The fund's investment objective is to generate a high level of current income consistent with prudent investment risk. There can be no assurance that the fund will achieve its investment objective. The fund utilizes a credit facility agreement to increase its assets available for investments.

Under normal circumstances, the fund invests at least 80% of its net assets (plus borrowings for investment purposes) in income securities, consisting of the following: (i) marketable corporate debt securities, (ii) governmental obligations and (iii) cash and commercial paper. The fund will notify shareholders at least 60 days prior to any change in this 80% investment policy. The fund may invest up to 20% of its total assets in income-producing preferred securities and common stocks.

Effective March 20, 2013, the Board of Trustees approved a revision to the fund's investment policy regarding the amount of the fund's securities that is rated investment grade. The new investment policy provides that the fund will invest at least 75% of its net assets (plus borrowings for investment purposes) in debt securities that are rated, at the time of acquisition, investment grade (i.e., at least "Baa" by Moody's Investors Service, Inc. (Moody's) or "BBB" by Standard & Poor's Ratings Services (S&P)), or in unrated securities determined by the fund's investment advisor or subadvisor to be of comparable credit quality. Under the new investment policy, the fund can invest up to 25% of its net assets (plus borrowings for investment purposes) in debt securities that are rated, at the time of acquisition, below investment grade (junk bonds) (i.e., rated "Ba" or lower by Moody's or "BB" or lower by S&P), or in unrated securities determined by the fund's advisor or subadvisor to be of comparable quality.

Dividends and distributions

During the six months ended April 30, 2015, dividends from net investment income totaling \$0.4611 per share were paid to shareholders. The dates of payments and the amounts per share were as follows:

Payment date	Income distributions
December 31, 2014	\$0.2411
March 31, 2015	0.2200
Total	\$0.4611

40

Shareholder meeting

The fund held its Annual Meeting of Shareholders on January 26, 2015. The following proposal was considered by the shareholders:

Proposal: Election of twelve (12) Trustees to serve for a three-year term ending at the 2018 Annual Meeting of Shareholders. Each Trustee was re-elected by the fund's shareholders and the votes cast with respect to each Trustee are set forth below.

	Total votes for the nominee	Total votes withheld from the nominee
Independent Trustees		
Charles L. Bardelis	7,582,881.113	291,838.637
Peter S. Burgess	7,580,257.113	294,462.637
William H. Cunningham	7,576,492.113	298,227.637
Grace K. Fey	7,594,233.465	280,486.285
Theron S. Hoffman	7,580,580.465	294,139.285
Deborah C. Jackson	7,586,725.465	287,994.285
Hassell H. McClennan	7,583,635.465	291,084.285
James M. Oates	7,577,232.113	297,487.637
Steven R. Pruchansky	7,578,379.465	296,340.285
Gregory A. Russo	7,584,279.465	290,440.285
Non-Independent Trustee		
Craig Bromley	7,571,029.465	303,690.265
Warren A. Thomson	7,531,815.465	342,904.285

Mr. James R. Boyle was not up for election; the Board appointed Mr. Boyle to serve as a Non-Independent Trustee on March 10, 2015.
