**GOLD FIELDS ACQUIRES CERRO CORONA  
PROJECT IN PERU**

*Johannesburg, 19 December 2003:* Gold Fields Ltd. (JSE, NYSE: GFI), through its subsidiary, Gold Fields Corona BVI., has signed a definitive Share Purchase Agreement to acquire 92 per cent of the voting shares of Sociedad Minera La Cima S.A. from various members of the Gubbins family. Sociedad Minera La Cima owns the Cerro Corona Project and other mineral properties in Cajamarca, Peru. Closing of the agreement is conditional upon the completion of the acquisition of required surface rights, approval of the EIS and the issue of construction permits.

Based upon a Definitive Feasibility Study completed by GRD Minproc with an amendment completed in August 2003, it is believed that the project has the capacity to produce 147,000 ounces of gold and 65 million pounds of copper per year (280,000 ounces of gold-equivalent), with total operating costs of \$212 per ounce of gold equivalent or \$0.48 per pound of copper equivalent (using a gold price of \$360/oz and a copper price of 80c/lb).

The deposit, which lies within a well endowed trend just to the north of the Yanacocha mine in the Cajamarca district of northern Peru, is well studied and has robust economics. Previous feasibility studies of the deposit exploited a larger resource base indicating potential for expansion over the most recent
