-

*Statements made in this Report that are not historical facts may constitute forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those discussed. Such risks and uncertainties include but are not limited to those discussed in this report and in BioTime's other reports filed with the Securities and Exchange Commission. Words such as "expects," "may," "will," "anticipates," "intends," "plans," "believes," "estimates," and similar expressions identify forward-looking statements.*

## **Section 8 – Other Events**

### **Item 8.01 – Other Events.**

We have been awarded three grants totaling approximately \$733,000 under the U.S. Government's Qualifying Therapeutic Discovery Project ("QTDP") program. The QTDP program was part of the Patient Protection and Affordable Care Act signed into law on March 23, 2010.

The QTDP was created by Congress to support investment in qualified biomedical projects that "show potential to develop new therapies, address unmet medical needs, and reduce the long-term growth of healthcare costs." A qualifying therapeutic discovery project is one designed to diagnose, treat or prevent diseases or conditions by conducting preclinical studies or clinical trials or carrying out research protocols for the purpose of securing approval from the Food and Drug Administration.

The grants awarded to us were for the maximum amount allowed for three of our programs: our orthopedic product development focusing on novel cell progenitors of cartilage, which is being conducted through our subsidiary OrthoCyte Corporation; our ACTCellerate™ platform for generating embryonic progenitor cells, and our ReCyte™ induced pluripotent stem (iPS) cell technology program.
