**Item 2.02. Results of Operations and Financial Condition**

On July 26, 2011, Eastman Kodak Company issued a press release describing its financial results for its second fiscal quarter ended June 30, 2011. A copy of the press release is attached as Exhibit (99.1) to this report.

Within the Company's second quarter 2011 press release, the Company makes reference to the following non-GAAP financial measures, which have directly comparable GAAP financial measures, including:

- “Digital revenue”;
- “Cash usage before restructuring payments”; and
- “Segment (loss) earnings.”

The Company believes that these measures represent important internal measures of performance. Accordingly, where these non-GAAP measures are provided, it is done so that investors have the same financial data that management uses with the belief that it will assist the investment community in properly assessing the underlying performance of the Company on a year-over-year and quarter-sequential basis. Whenever such information is presented, the Company has complied with the provisions of the rules under Regulation G and Item 2.02 of Form 8-K. In addition to the reasons described above, the specific reasons why the Company's management believes that the presentation of the non-GAAP financial measures provides useful information to investors regarding Kodak's financial condition, results of operations and cash flows are as follows.

**Digital revenue / Segment (loss) earnings**

The Company's digital businesses consist of the Consumer Digital Imaging Group (CDG) segment and the Graphic Communications Group (GCG) segment. Due to the Company's ongoing digital transformation, management views the Company's performance based on digital revenue and segment earnings. These measures form the basis of internal management performance expectations and may impact certain incentive compensation. Accordingly, the Company believes that the presentation of this information is useful to investors as it provides them with the same financial data that management uses to assess the Company's growth on a year-over-year and quarter-sequential basis.

**Cash usage before restructuring payments**

The Company believes that the presentation of cash usage before restructuring payments is useful information to investors as it facilitates the comparison of cash flows between reporting periods. In addition, management utilizes this measure as a tool to assess the Company's ability to repay debt, and fund acquisitions and investments, after it has satisfied its capital expenditures and working capital needs. The cash usage before restructuring payments measure equals net cash used in continuing operations from operating activities, as determined under Generally Accepted Accounting Principles in the United States of America (U.S. GAAP), minus capital expenditures, plus proceeds from the sale of assets and certain businesses and other settlements / agreements not otherwise included in U.S. GAAP cash used in operating activities, plus net cash flow generated by divested businesses through the date of divestiture to the extent such business divestitures would be categorized as discontinued operations, minus cash flow from the operations of significant acquisitions or strategic alliances completed during the year, plus cash restructuring payments. Finally, cash generation before restructuring payments forms the basis of internal management performance expectations and certain incentive compensation. Accordingly, the Company believes that the presentation of this information is useful to investors as it provides them with the same data that management uses to facilitate their assessment of the Company's cash and working capital management.
