**International Vending Alliance Selects Sierra Wireless IoT Services to Revolutionize Vending Experience**

***Sierra Wireless Smart SIM and AirVantage® IoT Platform to enable digital transformation of the world's largest vending network***

VANCOUVER, British Columbia--(BUSINESS WIRE)--March 22, 2018--Sierra Wireless (NASDAQ:SWIR) (TSX:SW), the leading provider of fully integrated device-to-cloud solutions for the Internet of Things (IoT), today announced that International Vending Alliance (IVA), the largest global network with 1.9 million vending machines in more than 70 countries, has selected Sierra Wireless' Smart SIM and AirVantage® IoT Platform to revolutionize vending service delivery.

One hundred million customers interact with IVA vending machines daily, but the vending experience has remained largely unchanged for the last 25 years. IVA's smart "black box" solution, powered by Sierra Wireless IoT Services, is transforming the vending industry by enabling new business models and customer experiences, including cashless payment, touch screens, targeted advertising, online monitoring and more efficient management.

"To compete with consumers' ever-increasing digital expectations, the vending industry needs to reimagine how we interact with our customers," said Martijn van den Hazenkamp, CEO of IVA. "IVA's global network has been actively involved in the creation of a new smart vending solution that will change how vending machines operate so that data can be used to drive sales and customer satisfaction. We teamed up with Sierra Wireless, a global leader in IoT, to develop the vital connectivity and data collection requirements in the solution. Working together, we will modernize the vending experience."

Sierra Wireless' Smart SIMs offer global coverage, allowing IVA to use a single SIM across its worldwide network. The SIMs are integrated with the AirVantage IoT platform to manage subscriptions and connectivity and to monitor connectivity services. By connecting and collecting data from its retail assets, IVA can now provide transformative services, such as preventative maintenance, restocking optimization, automated merchandising, advertising, loyalty programs and more.

---

“IVA’s solution is a wonderful example of how IoT technology can breathe new life into industries that are facing new competitors and shifting consumer preferences,” said Marc Overton, Senior Vice President and General Manager, IoT Services, Sierra Wireless. “This data-driven vending experience, designed around Sierra Wireless connectivity services, allows IVA to innovate and deliver a completely new experience for customers and more efficient management for operators.”

IVA’s solution integrates Sierra Wireless IoT services with Smart Retail Solutions B.V.’s platform for the Retail, Hospitality, Beverage, and CPG industries.

“Combining our platform with Sierra Wireless’ IoT services allows us to provide a 24/7, flexible connectivity solution to the IVA network,” said Adrian Whelan, Director & Co-Founder, Smart Retail Solutions B.V. “We chose the Sierra Wireless solutions due to its ease of use and robustness, and the team involved has been extremely helpful with designing the solution.”

## Forward Looking Statements

This press release contains forward-looking statements that involve risks and uncertainties. These forward-looking statements relate to, among other things, plans and timing for the introduction or enhancement of our services and products, statements about future market conditions, supply conditions, channel and end customer demand conditions, revenues, gross margins, operating expenses, profits, and other expectations, intentions, and plans contained in this press release that are not historical fact. Our expectations regarding future revenues and earnings depend in part upon our ability to successfully develop, manufacture, and supply products that we do not produce today and that meet defined specifications. When used in this press release, the words "plan", "expect", "believe", and similar expressions generally identify forward-looking statements. These statements reflect our current expectations. They are subject to a number of risks and uncertainties, including, but not limited to, changes in technology and changes in the wireless data communications market. In light of the many risks and uncertainties surrounding the wireless data communications market, you should understand that we cannot assure you that the forward-looking statements contained in this press release will be realized.
