Dear Shareholder

Early in 2011, global financial market action was dominated by political revolutions in the Middle East and North Africa, soaring prices of oil and other commodities, and natural disasters in Japan resulting in global supply chain disruptions. But corporate earnings were strong and the global economic recovery appeared to be on track. Investors demonstrated steadfast confidence as risk assets, including equities, commodities and high yield bonds, charged forward. Markets reversed sharply in May, however, when escalating political strife in Greece rekindled fears about sovereign debt problems spreading across Europe. Concurrently, global economic indicators signaled that the recovery had slowed. Confidence was further shaken by the prolonged debt ceiling debate in Washington, DC. On August 5th, Standard & Poor's downgraded the US government's credit rating and turmoil erupted in financial markets around the world. Extraordinary levels of volatility persisted in the months that followed as Greece teetered on the brink of default, debt problems escalated in Italy and Spain, and exposure to European sovereign bonds stressed banks globally. Financial markets whipsawed on hopes and fears. Macro news flow became a greater influence on trading decisions than the fundamentals of the securities traded, resulting in highly correlated asset prices. By the end of the third quarter, equity markets had fallen nearly 20% from their April peak while safe-haven assets such as US Treasuries and gold had rallied to historic highs.

October brought enough positive economic data to assuage fears of a global double-dip recession. Additionally, European leaders began to show progress toward stemming the region's debt crisis. Investors came back from the sidelines and risk assets rallied through the month. Eventually, a lack of definitive details about Europe's rescue plan raised doubts among investors and thwarted the rally at the end of October. The last two months of 2011 saw political instability in Greece, unsustainable yields on Italian bonds, and US policymakers in gridlock over budget issues. Global central bank actions and improving economic data invigorated investors, but confidence was easily tempered by sobering news flow. Sentiment improved in the New Year as investors saw bright spots in global economic data, particularly from the United States, China and Germany. International and emerging markets rebounded strongly through January. US stocks rallied on solid improvement in the domestic labor market and indications from the Federal Reserve that interest rates would remain low through 2014. Nonetheless, investors maintained caution as US corporate earnings began to weaken and a European recession appeared inevitable.

US equities and high yield bonds recovered their late-summer losses and posted positive returns for both the 6- and 12-month periods ended January 31, 2012. International markets, however, experienced some significant downturns in 2011 and remained in negative territory despite a strong rebound at the end of the period. Fixed income securities benefited from declining yields and delivered positive returns for the 6- and 12-month periods. US Treasury bonds outperformed other fixed income classes despite their quality rating downgrade, while municipal bonds also delivered superior results. Continued low short-term interest rates kept yields on money market securities near their all-time lows.

Many of the themes that caused uncertainty in 2011 remain unresolved. For investors, the risks are daunting. BlackRock remains committed to helping you keep your financial goals on track in this challenging environment.

Sincerely,

Rob Kapito
President, BlackRock Advisors, LLC

Municipal Market Overview

For the 12-Month Period Ended January 31, 2012

One year ago, the municipal bond market was steadily recovering from a difficult fourth quarter of 2010 that brought severe losses amid a steepening US Treasury yield curve and a flood of inflated headlines about municipal finance troubles. Retail investors had lost confidence in municipals and retreated from the market. Political uncertainty surrounding the midterm elections and tax policies exacerbated the situation. These conditions combined with seasonal illiquidity weakened willful market participation from the trading community. December 2010 brought declining demand with no comparable reduction in supply as issuers rushed their deals to market before the Build America Bond program was retired. This supply-demand imbalance led to wider quality spreads and higher yields for municipal bonds heading into 2011.

Demand is usually strong at the beginning of a new year, but retail investors continued to move away from municipal mutual funds in the first half of 2011. From the middle of November 2010, outflows persisted for 29 consecutive weeks, totaling \$35.1 billion before the trend finally broke in June 2011. However, weak demand was counterbalanced by lower supply in 2011. According to Thomson Reuters, new issuance was down 32% in 2011 as compared to the prior year. While these technical factors were improving, municipalities were struggling to balance their budgets, although the late-2010 predictions for widespread municipal defaults did not materialize. Other concerns that resonated at the beginning of the year, such as rising interest rates, weakening credits and higher rates of inflation, abated as these scenarios also did not come to fruition.

On August 5th, 2011, Standard & Poor's (S&P) downgraded the US government's credit rating from AAA to AA+. While this led to the downgrade of approximately 11,000 municipal issues directly tied to the US debt rating, this represented a very small fraction of the municipal market and said nothing about the individual municipal credits themselves. In fact, demand for municipal bonds increased as severe volatility in US equities drove investors to more stable asset classes. The municipal market benefited from an exuberant Treasury market and continued muted new issuance. As supply remained constrained, demand from both traditional and non-traditional buyers was strong, pushing long-term municipal bond yields lower and sparking a curve-flattening trend that continued through year end. Ultimately, 2011 was one of the strongest performance years in municipal market history. The S&P Municipal Bond Index returned 10.62% in 2011, making municipal bonds a top-performing fixed income asset class for the year.

Supply and demand technicals continued to be favorable in January 2012. Overall, the municipal yield curve flattened during the period from January 31, 2011 to January 31, 2012. As measured by Thomson Municipal Market Data, yields declined by 161 basis points (bps) to 3.17% on AAA-rated 30-year municipal bonds and by 163 bps to 1.68% on 10-year bonds, while yields on 5-year issues fell 117 bps to 0.68%. While the entire municipal curve flattened over the 12-month time period, the spread between 2- and 30-year maturities tightened by 120 bps, and in the 2- to 10-year range, the spread tightened by 124 bps.

The fundamental picture for municipalities continues to improve. Austerity has been the general theme across the country, while a small number of states continue to rely on a "kick-the-can" approach to close their budget shortfalls, with aggressive revenue projections and accounting gimmicks. The market's technical factors are also improving as demand outpaces supply in what is historically a light issuance period. It has been over a year since the first highly publicized interview about the fiscal problems plaguing state and local governments. Thus far, the prophecy of widespread defaults across the municipal market has not materialized. In 2011, there were fewer municipal defaults than seen in 2010. Throughout 2011 monetary defaults in the S&P Municipal Bond Index totaled roughly \$805 million, representing less than 0.48% of the index. BlackRock maintains the view that municipal bond defaults will remain in the periphery and the overall market is fundamentally sound. We continue to recognize that careful credit research and security selection remain imperative amid uncertainty in this economic environment.

Past performance is no guarantee of future results. Index performance is shown for illustrative purposes only. You cannot invest directly in an index.

Trust Summary as of January 31, 2012

BlackRock California Municipal Income Trust**Trust Overview**

BlackRock California Municipal Income Trust s (BFZ) (the Trust) investment objective is to provide current income exempt from regular US federal income and California income taxes. The Trust seeks to achieve its investment objective by investing primarily in municipal obligations exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and California income taxes. The Trust invests, under normal market conditions, at least 80% of its assets in municipal obligations that are investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the six months ended January 31, 2012, the Trust returned 21.17% based on market price and 17.19% based on net asset value (NAV). For the same period, the closed-end Lipper California Municipal Debt Funds category posted an average return of 21.02% based on market price and 14.53% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. The Trust s slightly long duration (sensitivity to interest rate movements) had a positive impact on performance as interest rates generally declined amid the investor flight-to-quality in the US Treasury market. Increased exposure to inverse floating rate instruments (tender option bonds) while the municipal yield curve was historically steep boosted the Trust s income accrual. The Trust s holdings of higher quality essential service revenue bonds contributed positively, as did holdings of select general obligation bonds and school district credits with stronger underlying fundamentals. Additionally, purchases of zero-coupon bonds deemed undervalued added to the Trust s total return.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of January 31, 2012

BlackRock Florida Municipal 2020 Term Trust**Trust Overview**

BlackRock Florida Municipal 2020 Term Trust s (BFO) (the Trust) investment objectives are to provide current income exempt from regular federal income tax and Florida intangible personal property tax and to return \$15.00 per common share (the initial offering price per share) to holders of common shares on or about December 31, 2020. The Trust seeks to achieve its investment objectives by investing at least 80% of its assets in municipal bonds exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and Florida intangible personal property tax. The Trust invests at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust actively manages the maturity of its bonds to seek to have a dollar weighted average effective maturity approximately equal to the Trust s maturity date. The Trust may invest directly in such securities or synthetically through the use of derivatives. Effective January 1, 2007, the Florida intangible personal property tax was repealed.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the six months ended January 31, 2012, the Trust returned 13.28% based on market price and 7.94% based on NAV. For the same period, the closed-end Lipper Other States Municipal Debt Funds category posted an average return of 16.44% based on market price and 11.33% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. During the period, municipal bond prices generally rose as the yield curve flattened and credit spreads tightened. Given these market conditions, the Trust s exposure to intermediate and longer maturity bonds and lower-quality investment grade bonds had a significant positive impact on the Trust s performance for the period. The Trust is scheduled to mature on or about December 31, 2020 and thus holds securities that will mature close to that date. The Trust s shorter maturity profile was a disadvantage as compared to its Lipper category peers that typically hold longer-dated issues, which exhibited greater price appreciation in the declining interest rate environment.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

As of January 31, 2012 and July 31, 2011, the market value of these securities was \$6,284,191, representing 5%, and \$10,771,005, representing 8%, respectively, of the Trust's long-term investments.

Trust Summary as of January 31, 2012

BlackRock Investment Quality Municipal Income Trust

Trust Overview

BlackRock Investment Quality Municipal Income Trust s (RFA) (the Trust) investment objective is to provide high current income exempt from regular federal income tax and to provide an exemption from Florida intangible personal property taxes consistent with preservation of capital. The Trust seeks to achieve its investment objective by investing at least 80% of its assets in municipal obligations exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and Florida intangible personal property tax. Under normal market conditions, the Trust invests at least 80% of its assets in municipal bonds rated investment grade at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives. Due to the repeal of the Florida intangible personal property tax, the Board approved an amended policy in September 2008 allowing the Trust the flexibility to invest in municipal obligations regardless of geographical location.

No assurance can be given that the Trust s investment objective will be achieved.

On February 10, 2012, the Board of Trustees of the Trust approved a plan of liquidation and dissolution. If approved by shareholders, the liquidation and distribution of substantially all of the Trust s assets is expected to occur by the end of the third quarter of 2012.

Performance

For the six months ended January 31, 2012, the Trust returned 24.27% based on market price and 16.68% based on NAV. For the same period, the closed-end Lipper General & Insured Municipal Debt Funds (Leveraged) category posted an average return of 21.10% based on market price and 13.67% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. As the yield curve flattened during the period (longer-term interest rates fell more than shorter rates), rising bond prices in the long end of the municipal curve contributed positively to the Trust s performance. The Trust s longer-dated holdings in the health care, transportation and education sectors experienced the best price appreciation.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of January 31, 2012

BlackRock New Jersey Investment Quality Municipal Trust Inc.**Trust Overview**

BlackRock New Jersey Investment Quality Municipal Trust Inc. s (RNJ) (the Trust) investment objective is to provide high current income exempt from regular federal income tax and New Jersey gross income tax consistent with preservation of capital. The Trust seeks to achieve its investment objective by investing at least 80% of its assets in a portfolio of investment grade New Jersey municipal obligations exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and New Jersey gross income taxes. Under normal market conditions, the Trust invests at least 80% of its assets in securities rated investment grade at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

On February 10, 2012, the Board of Trustees of the Trust approved a plan of liquidation and dissolution. If approved by shareholders, the liquidation and distribution of substantially all of the Trust s assets is expected to occur by the end of the third quarter of 2012.

Performance

For the six months ended January 31, 2012, the Trust returned 19.86% based on market price and 16.19% based on NAV. For the same period, the closed-end Lipper New Jersey Municipal Debt Funds category posted an average return of 20.36% based on market price and 13.24% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a discount to NAV to a premium by period-end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. As the yield curve flattened during the period (longer-term interest rates fell more than shorter rates), rising bond prices in the long end of the municipal curve contributed positively to the Trust s performance. The Trust s longer-dated holdings in the health care, transportation and education sectors experienced the best price appreciation.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of January 31, 2012

BlackRock New York Investment Quality Municipal Trust Inc.**Trust Overview**

BlackRock New York Investment Quality Municipal Trust Inc. s (RNY) (the Trust) investment objective is to provide high current income exempt from regular federal, New York State and New York City income tax consistent with the preservation of capital. The Trust seeks to achieve its investment objective by investing at least 80% of its assets in municipal obligations exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and New York State and New York City income taxes. Under normal market conditions, the Trust invests at least 80% of its assets in securities rated investment grade at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

On February 10, 2012, the Board of Trustees of the Trust approved a plan of liquidation and dissolution. If approved by shareholders, the liquidation and distribution of substantially all of the Trust s assets is expected to occur by the end of the third quarter of 2012.

Performance

For the six months ended January 31, 2012, the Trust returned 16.73% based on market price and 13.47% based on NAV. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return 17.53% based on market price and 11.32% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a discount to NAV to a premium by period-end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. As the yield curve flattened during the period (longer-term interest rates fell more than shorter rates), rising bond prices in the long end of the municipal curve contributed positively to the Trust s performance. Additionally, the Trust benefited from its long duration bias (greater sensitivity to interest rate movements) as overall interest rates declined. The Trust s heavy exposures to health care and education, which were among the better performing sectors for the period, had a positive impact on performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

As of January 31, 2012 and July 31, 2011, the market value of these securities was \$2,501,000, representing 1%, and \$11,121,550 representing 4%, respectively, of the Trust's long-term investments.

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

To obtain leverage, the Trusts issue Auction Market Preferred Securities (AMPS), Variable Rate Demand Preferred Shares (VRDP Shares) or Variable Rate Muni Term Preferred Shares (VMTP Shares) (collectively, Preferred Shares). Preferred Shares pay dividends at prevailing short-term interest rates, and the Trusts invest the proceeds in long-term municipal bonds. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust's shareholders will benefit from the incremental net income.

To illustrate these concepts, assume a Trust's Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the Preferred Shares issuance earn income based on long-term interest rates. In this case, the dividends paid to holders of Preferred Shares (Preferred Shareholders) are significantly lower than the income earned on the Trust's long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Trust pays higher short-term interest rates whereas the Trust's total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trusts' portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trusts' Preferred Shares does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trusts' NAVs positively or negatively in addition to the impact on Trust performance from leverage from Preferred Shares discussed above.

The Trusts may also leverage their assets through the use of tender option bond trusts (TOBs), as described in Note 1 of the Notes to Financial Statements. TOB investments generally will provide the Trusts with economic benefits in periods of declining short-term interest rates, but expose the Trusts to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Trusts, as described above. Additionally, fluctuations in the market value of municipal bonds deposited into the TOB trust may adversely affect each Trust's NAV per share.

The use of leverage may enhance opportunities for increased income to the Trusts and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts' NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts' net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust's net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust's ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by rating agencies that rate the Preferred Shares issued by the Trusts. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by Common Shareholders and may reduce income to the Common Shares.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Trusts are permitted to issue senior securities in the form of equity securities (e.g., Preferred Shares) up to 50% of their total managed assets. In addition, each Trust voluntarily limits its economic leverage to 50% of its total managed assets for Trusts with AMPS or 45% for Trusts with VRDPs. As of January 31, 2012, the Trusts had economic leverage from Preferred Shares and/or TOBs as a percentage of their total managed assets as follows:

| | Percent of Economic Leverage |
|-----|---|
| BFZ | 39% |
| BFO | 33% |
| RFA | 39% |
| BBF | 39% |
| RNJ | 35% |
| BNJ | 36% |
| RNY | 37% |
| BNY | 38% |

Derivative Financial Instruments

The Trusts may invest in various derivative financial instruments, including financial futures contracts as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Trusts' ability to use a derivative financial instrument successfully depends on the investment advisor's ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders or may cause a Trust to hold an investment that it might otherwise sell. The Trusts' investments in these instruments are discussed in detail in the Notes to Financial Statements.

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

- (a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (b) US government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.

See Notes to Financial Statements.

Schedule of Investments (concluded)

BlackRock California Municipal Income Trust (BFZ)

- (c) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (d) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity.
- (e) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.
- (f) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

| Affiliate | Shares Held at July 31, 2011 | Net Activity | Shares Held at January 31, 2012 | Income |
|--|---|-------------------------|--|---------------|
| BIF California Municipal Money Fund | 2,720,243 | 2,827,515 | 5,547,758 | \$ 163 |

- (g) Represents the current yield as of report date.

For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or rating group indexes and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

Financial futures contracts sold as of January 31, 2012 were as follows:

| Contracts | Issue | Exchange | Expiration | Notional Value | Unrealized Depreciation |
|------------------|--------------------------------|------------------------------|-------------------|---------------------------|------------------------------------|
| 60 | 10-Year US Treasury Note | Chicago Board of Trade | March 2012 | \$ 7,935,000 | \$ (105,114) |

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust's perceived risk of investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of January 31, 2012 in determining the fair valuation of the Trust's investments and derivative financial instruments:

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|------------------------------------|--------------|----------------|---------|----------------|
| Assets: | | | | |
| Investments: | | | | |
| Long-Term Investments ¹ | | \$ 813,330,475 | | \$ 813,330,475 |
| Short-Term Securities | \$ 5,547,758 | | | 5,547,758 |
| Total | \$ 5,547,758 | \$ 813,330,475 | | \$ 818,878,233 |

¹ See above Schedule of Investments for values in each sector.

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|---|--------------|---------|---------|--------------|
| Derivative Financial Instruments ² | | | | |
| Liabilities: | | | | |
| Interest rate contracts | \$ (105,114) | | | \$ (105,114) |

² Derivative financial instruments are financial futures contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

- (a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (b) US government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

- (d) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

| Affiliate | Shares Held at July 31, 2011 | Net Activity | Shares Held at January 31, 2012 | Income |
|-------------------------------------|------------------------------------|-----------------|--|--------|
| BIF Florida Municipal Money Fund | 1,843,816 | (1,069,674) | 774,142 | |

- (e) Represents the current yield as of report date.

For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or rating group indexes and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments is based on the pricing transparency of the investment and does not necessarily correspond to the Trust's perceived risk of investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of January 31, 2012 in determining the fair valuation of the Trust's investments:

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|---------------------------------------|------------|----------------|---------|----------------|
| Assets: | | | | |
| Investments: | | | | |
| Long-Term Investments ¹ | | \$ 129,315,653 | | \$ 129,315,653 |
| Short-Term Securities | \$ 774,142 | | | 774,142 |
| Total | \$ 774,142 | \$ 129,315,653 | | \$ 130,089,795 |

¹ See above Schedule of Investments for values in each sector.

| Other Assets Less Liabilities 0.3% | | 47,801 |
| Liability for TOB Trust Certificates, Including Interest Expense and Fees Payable (32.9)% | | (4,930,802) |
| AMPS, at Redemption Value (30.5)% | | (4,575,076) |
| Net Assets Applicable to Common Stocks 100.0% | | \$ 14,985,219 |

(a) When-issued security. Unsettled when-issued transactions were as follows:

| Counterparty | Value | Unrealized Appreciation |
|--------------------------------|------------|----------------------------|
| JPMorgan Chase Bank NA | \$ 26,860 | \$ 270 |
| Citigroup Global Markets, Inc. | \$ 131,427 | \$ 1,427 |

(b) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

- (c) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

| Affiliate | Shares Held at July 31, 2011 | Net Activity | Shares Held at January 31, 2011 | Income |
|--------------------------------------|------------------------------------|-----------------|---------------------------------------|--------|
| FFI Institutional Tax-Exempt Fund | 302,911 | 87,354 | 390,265 | \$ 17 |

- (d) Represents the current yield as of report date.

Financial futures contracts sold as of January 31, 2012 were as follows:

| Contracts | Issue | Exchange | Expiration | Notional Value | Unrealized Depreciation |
|-----------|--------------------------------|------------------------------|------------|-------------------|----------------------------|
| 5 | 10-Year US Treasury Note | Chicago Board of Trade | March 2012 | \$ 661,250 | \$ (8,760) |

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust's perceived risk of investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of January 31, 2012 in determining the fair valuation of the Trust's investments and derivative financial instruments:

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|---------------------------------------|------------|---------------|---------|---------------|
| Assets: | | | | |
| Investments: | | | | |
| Long-Term Investments ¹ | \$ 390,265 | \$ 24,053,031 | | \$ 24,053,031 |
| | \$ 390,265 | | | 390,265 |

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

Short-Term
Securities

| | | | | | | |
|--------------|----|---------|----|------------|----|------------|
| Total | \$ | 390,265 | \$ | 24,053,031 | \$ | 24,443,296 |
|--------------|----|---------|----|------------|----|------------|

¹ See above Schedule of Investments for values in each sector.

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|--|----------------|----------------|----------------|--------------|
| Derivative Financial Instruments ² | | | | |
| Liabilities: | | | | |
| Interest rate contracts | \$ | (8,760) | | \$ (8,760) |

² Derivative financial instruments are financial futures contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

(a) When-issued security. Unsettled when-issued transactions were as follows:

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

| Counterparty | Value | Unrealized Appreciation |
|--------------------------|------------|-------------------------|
| JPMorgan Securities | \$ 182,650 | \$ 1,838 |
| Citigroup Global Markets | \$ 904,827 | \$ 9,827 |

- (b) US government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.
- (d) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

| Affiliate | Shares Held at July 31, 2011 | Net Activity | Shares Held at January 31, 2011 | Income |
|-----------------------------------|------------------------------|--------------|---------------------------------|--------|
| FII Institutional Tax-Exempt Fund | 2,119,108 | 1,200,070 | 3,319,178 | \$ 431 |

- (e) Represents the current yield as of report date.

For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or rating group indexes and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

Financial futures contracts sold as of January 31, 2012 were as follows:

| Contracts | Issue | Exchange | Expiration | Notional Value | Unrealized Depreciation |
|-----------|--------------------------|------------------------|------------|----------------|-------------------------|
| 34 | 10-Year US Treasury Note | Chicago Board of Trade | March 2012 | \$ 4,496,500 | \$ (59,565) |

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust's perceived risk of investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

Schedule of Investments (concluded)

BlackRock Municipal Income Investment Trust (BBF)

The following tables summarize the inputs used as of January 31, 2012 in determining the fair valuation of the Trust's investments and derivative financial instruments:

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|------------------------------------|--------------|----------------|---------|----------------|
| Assets: | | | | |
| Investments: | | | | |
| Long-Term Investments ¹ | | \$ 161,175,565 | | \$ 161,175,565 |
| Short-Term Securities | \$ 3,319,178 | | | 3,319,178 |
| Total | \$ 3,319,178 | \$ 161,175,565 | | \$ 164,494,743 |

¹ See above Schedule of Investments for values in each state or political subdivision.

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|---|---------|-------------|---------|-------------|
| Derivative Financial Instruments ² | | | | |
| Liabilities: | | | | |
| Interest rate contracts | | \$ (59,565) | | \$ (59,565) |

² Derivative financial instruments are financial futures contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

| Net Assets Applicable to Common Shares 100.0% | | \$ 14,112,088 |

- (a) Variable rate security. Rate shown is as of report date.
- (b) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (c) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (d) Issuer filed for bankruptcy and/or is in default of interest payments.
- (e) Non-income producing security.
- (f) Security is collateralized by Municipal or US Treasury obligations.
- (g) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.
- (h) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

| Affiliate | Shares Held at July 31, 2011 | Net Activity | Shares Held at January 31, 2012 | Income |
|--|------------------------------------|-----------------|---------------------------------------|--------|
| BIF New Jersey Municipal Money Fund | 209,983 | 94,482 | 304,465 | \$ 15 |

- (i) Represents the current yield as of report date.

For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or rating group indexes and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

See Notes to Financial Statements.

Schedule of Investments (concluded)

BlackRock New Jersey Investment Quality Municipal Trust Inc. (RNJ)

Financial futures contracts sold as of January 31, 2012 were as follows:

| Contracts | Issue | Exchange | Expiration | Notional Value | Unrealized Depreciation |
|-----------|--------------------------|------------------------|------------|----------------|-------------------------|
| 5 | 10-Year US Treasury Note | Chicago Board of Trade | March 2012 | \$ 661,250 | \$ (8,760) |

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to Trust's perceived risk of investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of January 31, 2012 in determining the fair valuation of Trust's investments and derivative financial instruments:

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|------------------------------------|------------|---------------|---------|---------------|
| Assets: | | | | |
| Investments: | | | | |
| Long-Term Investments ¹ | | \$ 21,049,596 | | \$ 21,049,596 |
| Short-Term Securities | \$ 304,465 | | | 304,465 |
| Total | \$ 304,465 | \$ 21,049,596 | | \$ 21,354,061 |

¹ See above Schedule of Investments for values in each sector.

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|---|------------|---------|---------|------------|
| Derivative Financial Instruments ² | | | | |
| Liabilities: | | | | |
| Interest rate contracts | \$ (8,760) | | | \$ (8,760) |

² Derivative financial instruments are financial futures contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

JANUARY 31, 2012

31

Schedule of Investments (concluded)

BlackRock New Jersey Municipal Income Trust (BNJ)
(Percentages shown are based on Net Assets)

| Short-Term Securities | Shares | Value |
|--|-----------|----------------|
| BIF New Jersey Municipal Money Fund, 0.00% (h)(i) | 1,878,917 | \$ 1,878,917 |
| Total Short-Term Securities | | 1,878,917 |
| (Cost \$1,878,917) 1.6% | | 1,878,917 |
| Total Investments (Cost \$172,639,296) 154.4% | | 185,447,038 |
| Other Assets Less Liabilities 2.8% | | 3,397,611 |
| Liability for TOB Trust Certificates, Including | | |
| Interest Expense and Fees Payable (8.0)% | | (9,636,065) |
| AMPS, at Redemption Value (49.2)% | | (59,100,988) |
| Net Assets Applicable to Common Shares 100.0% | | \$ 120,107,596 |

- (a) Variable rate security. Rate shown is as of report date.
- (b) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (c) Non-income producing security.
- (d) Issuer filed for bankruptcy and/or is in default of interest payments.
- (e) US government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (f) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (g) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.
- (h) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

| Affiliate | Shares Held at July 31, 2011 | Net Activity | Shares Held at January 31, 2012 | Income |
|--|------------------------------------|-----------------|---------------------------------------|--------|
| BIF New Jersey Municipal Money Fund | 5,114,806 | (3,235,889) | 1,878,917 | |

- (i) Represents the current yield as of report date.

For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

Financial futures contracts sold as of January 31, 2012 were as follows:

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

| Contracts | Issue | Exchange | Expiration | Notional Value | Unrealized Depreciation |
|-----------|--------------------------|------------------------|------------|----------------|-------------------------|
| 40 | 10-Year US Treasury Note | Chicago Board of Trade | March 2012 | \$ 5,290,000 | \$ (70,076) |

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust's perceived risk of investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of January 31, 2012 in determining the fair valuation of the Trust's investments and derivative financial instruments:

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|------------------------------------|--------------|----------------|---------|----------------|
| Assets: | | | | |
| Investments: | | | | |
| Long-Term Investments ¹ | | \$ 183,568,121 | | \$ 183,568,121 |
| Short-Term Securities | \$ 1,878,917 | | | 1,878,917 |
| Total | \$ 1,878,917 | \$ 183,568,121 | | \$ 185,447,038 |

¹ See above Schedule of Investments for values in each sector.

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|---|---------|-------------|---------|-------------|
| Derivative Financial Instruments² | | | | |
| Interest rate contracts | | \$ (70,076) | | \$ (70,076) |

² Derivative financial instruments are financial futures contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

- (a) Variable rate security. Rate shown is as of report date.
- (b) Issuer filed for bankruptcy and/or is in default of interest payments.
- (c) Non-income producing security.
- (d) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (e) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (f) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.
- (g) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

| Affiliate | Shares Held at July 31, 2011 | Net Activity | Shares Held at January 31, 2012 | Income |
|--------------------------------------|------------------------------------|-----------------|--|--------|
| BIF New York Municipal Money Fund | 88,605 | 298,075 | 386,680 | |

- (h) Represents the current yield as of report date.

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or rating group indexes and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

Financial futures contracts sold as of January 31, 2012 were as follows:

| Contracts | Issue | Exchange | Expiration | Notional Value | Unrealized Depreciation |
|-----------|--------------------------|------------------------|------------|----------------|-------------------------|
| 6 | 10-Year US Treasury Note | Chicago Board of Trade | March 2012 | \$ 793,500 | \$ (10,511) |

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust's perceived risk of investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of January 31, 2012 in determining the fair valuation of the Trust's investments and derivative financial instruments:

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|------------------------------------|------------|---------------|---------|---------------|
| Assets: | | | | |
| Investments | | | | |
| Long-Term Investments ¹ | | \$ 31,118,221 | | \$ 31,118,221 |
| Short-Term Investments | \$ 386,680 | | | 386,680 |
| Total | \$ 386,680 | \$ 31,118,221 | | \$ 31,504,901 |

¹ See above Schedule of Investments for values in each sector.

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|---|-------------|---------|---------|-------------|
| Derivative Financial Instruments ² | | | | |
| Assets: | | | | |
| Interest rate contracts | \$ (10,511) | | | \$ (10,511) |

- ² Derivative financial instruments are financial futures contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

See Notes to Financial Statements.

- (a) Variable rate security. Rate shown is as of report date.
- (b) Issuer filed for bankruptcy and/or is in default of interest payments.
- (c) Non-income producing security.

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

- (d) US government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (e) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (f) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (g) Securities represent bonds transferred to a TOB in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.

See Notes to Financial Statements.

Schedule of Investments (concluded)

BlackRock New York Municipal Income Trust (BNY)

- (h) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

| Affiliate | Shares Held at July 31, 2011 | Net Activity | Shares Held at January 31, 2012 | Income |
|--------------------------------------|------------------------------------|-----------------|---------------------------------------|--------|
| BIF New York Municipal Money Fund | 10,549,049 | (5,101,758) | 5,447,291 | |

- (i) Represents the current yield as of report date.

For Trust compliance purposes, the Trust's sector classifications refer to any one or more of the sector sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.

Financial futures contracts sold as of January 31, 2012 were as follows:

| Contracts | Issue | Exchange | Expiration | Notional Value | Unrealized Depreciation |
|-----------|--------------------------------|------------------------------|---------------|-------------------|----------------------------|
| 56 | 10-Year US Treasury Note | Chicago Board of Trade | March 2012 | \$ 7,406,000 | \$ (98,106) |

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust's perceived risk of investing in those securities. For information about the Trust's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of January 31, 2012 in determining the fair valuation of the Trust's investments and derivative financial instruments:

| Valuation Inputs | Level 1 | Level 2 | Level 3 | Total |
|------------------|---------|---------|---------|-------|
| Assets: | | | | |

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

²

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

Total investment returns based on market value, which can be significantly greater or lesser than the net asset value, may result in substantially different returns. Where applicable, total investment returns exclude the effects of any sales charges and include the reinvestment of dividends and distributions.

- ³ Aggregate total investment return.
- ⁴ Do not reflect the effect of dividends to AMPS Shareholders.
- ⁵ Annualized.
- ⁶ Interest expense and fees relate to TOBs. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to TOBs.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT

JANUARY 31, 2012

Notes to Financial Statements (Unaudited)

1. Organization and Significant Accounting Policies:

BlackRock New Jersey Investment Quality Municipal Trust Inc. (RNJ) and BlackRock New York Investment Quality Municipal Trust Inc. (RNY) are organized as Maryland corporations. BlackRock Investment Quality Municipal Income Trust (RFA) is organized as a Massachusetts business trust. RNJ, RNY and RFA are herein referred to as the Investment Quality Trusts. BlackRock California Municipal Income Trust (BFZ), BlackRock Municipal Income Investment Trust (BBF), BlackRock New Jersey Municipal Income Trust (BNJ), BlackRock New York Municipal Income Trust (BNY) (collectively, the Income Trusts) and BlackRock Florida Municipal 2020 Term Trust (BFO) are organized as Delaware statutory trusts. The Investment Quality Trusts, Income Trusts and BFO are referred to herein collectively as the Trusts. The Trusts are registered under the 1940 Act as non-diversified, closed-end management investment companies. The Trusts' financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (US GAAP), which may require management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. The Board of Directors and the Board of Trustees of the Trusts are collectively referred to throughout this report as the Board of Trustees or the Board, and the directors/trustees thereof are collectively referred to throughout this report as Trustees. The Trusts determine and make available for publication the NAV of their Common Shares on a daily basis.

The following is a summary of significant accounting policies followed by the Trusts:

Valuation: US GAAP defines fair value as the price the Trusts would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The Trusts fair value their financial instruments at market value using independent dealers or pricing services under policies approved by each Trust's Board. Municipal investments (including commitments to purchase such investments on a when-issued basis) are valued on the basis of prices provided by dealers or pricing services. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments and information with respect to various relationships between investments. Financial futures contracts traded on exchanges are valued at their last sale price. Short-term securities with remaining maturities of 60 days or less may be valued at amortized cost, which approximates fair value. Investments in open-end registered investment companies are valued at NAV each business day.

In the event that application of these methods of valuation results in a price for an investment which is deemed not to be representative of the market value of such investment or if a price is not available, the investment will be valued in accordance with a policy approved by the Board as reflecting fair value (Fair Value Assets). When determining the price for Fair Value Assets, the investment advisor and/or the sub-advisor seeks to determine the price that each Trust might reasonably expect to receive from the current sale of that asset in an arm's-length transaction. Fair value determinations shall be based upon all available factors that the investment advisor and/or sub-advisor deems relevant. The pricing of all Fair Value Assets is subsequently reported to the Board or a committee thereof.

Zero-Coupon Bonds: The Trusts may invest in zero-coupon bonds, which are normally issued at a significant discount from face value and do not provide for periodic interest payments. Zero-coupon bonds may experience greater volatility in market value than similar maturity debt obligations which provide for regular interest payments.

Forward Commitments and When-Issued Delayed Delivery Securities: The Trusts may purchase securities on a when-issued basis and may purchase or sell securities on a forward commitment basis. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Trusts may purchase securities under such conditions with the intention of actually acquiring them, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Trusts may be required to pay more at settlement than the security is worth. In addition, the Trusts are not entitled to any of the interest earned prior to settlement. When purchasing a security on a delayed delivery basis, the Trusts assume the rights and risks of ownership of the security, including the risk of price and yield fluctuations. In the event of default by the counterparty, the Trusts' maximum amount of loss is the unrealized appreciation of unsettled when-issued transactions, which is shown in the Schedules of Investments.

Municipal Bonds Transferred to TOBs: The Trusts leverage their assets through the use of TOBs. A TOB is established by a third party sponsor forming a special purpose entity, into which one or more funds, or an agent on behalf of the funds, transfers municipal bonds. Other funds managed by the investment advisor may also contribute municipal bonds to a TOB into which a Trust has contributed bonds. A TOB typically issues two classes of beneficial interests: short-term floating rate certificates, which are sold to third party investors, and residual certificates (TOB Residuals), which are generally issued to the participating funds that made the transfer. The TOB Residuals held by a Trust include the right of a Trust (1) to cause the holders of a proportional share of the short-term floating rate certificates to tender their certificates at par, including during instances of a rise in short-term interest rates, and (2) to transfer, within seven days, a corresponding share of the municipal bonds from the TOB to a Trust. The TOB may also be terminated without the consent of a Trust upon the occurrence of certain events as defined

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

in the TOB agreements. Such termination events may include the bankruptcy or default of the municipal bond, a substantial downgrade in credit quality of the municipal bond, the inability of the TOB to obtain quarterly or annual renewal of the liquidity support agreement, a substantial decline in market value of the municipal bond or the inability to remarket the short-term floating rate certificates to third party investors. During the six months ended January 31, 2012, no TOBs that the Trusts participated in were terminated without the consent of the Trusts.

SEMI-ANNUAL REPORT

JANUARY 31, 2012

55

Notes to Financial Statements (continued)

The cash received by the TOB from the sale of the short-term floating rate certificates, less transaction expenses, is paid to a Trust, in exchange for TOB trust certificates. The Trusts typically invests the cash in additional municipal bonds. Each Trust's transfer of the municipal bonds to a TOB is accounted for as a secured borrowing; therefore the municipal bonds deposited into a TOB are presented in the Trusts' Schedules of Investments and the TOB trust certificates are shown in other liabilities in the Statements of Assets and Liabilities.

Interest income, including amortization and accretion of premiums and discounts, from the underlying municipal bonds is recorded by the Trusts on an accrual basis. Interest expense incurred on the secured borrowing and other expenses related to remarketing, administration and trustee services to a TOB are shown as interest expense fees and amortization of offering costs in the Statements of Operations. The short-term floating rate certificates have interest rates that generally reset weekly and their holders have the option to tender certificates to the TOB for redemption at par at each reset date. At January 31, 2012, the aggregate value of the underlying municipal bonds transferred to TOBs, the related liability for TOB trust certificates and the range of interest rates on the liability for trust certificates were as follows:

| | Underlying Municipal Bonds Transferred to TOBs | Liability for TOB Trust Certificates | Range of Interest Rates | |
|-----|--|--|----------------------------|-------|
| BFZ | \$ 321,251,650 | \$ 153,386,087 | 0.05% | 0.23% |
| BFO | \$ 769,586 | \$ 480,000 | 0.16% | |
| RFA | \$ 9,833,421 | \$ 4,928,720 | 0.07% | 0.18% |
| BBF | \$ 60,069,566 | \$ 30,117,038 | 0.07% | 0.18% |
| RNJ | \$ 1,421,230 | \$ 734,917 | 0.09% | 0.14% |
| BNJ | \$ 19,136,557 | \$ 9,634,296 | 0.09% | 0.14% |
| RNY | \$ 4,084,026 | \$ 2,080,297 | 0.05% | 0.18% |
| BNY | \$ 40,435,679 | \$ 21,226,715 | 0.05% | 0.18% |

For the six months ended January 31, 2012, the Trusts' average TOB trust certificates outstanding and the daily weighted average interest rate, including fees, were as follows:

| | Average TOB Trust Certificates Outstanding | Daily Weighted Average Interest Rate |
|-----|--|--|
| BFZ | \$ 147,475,736 | 0.69% |
| BFO | \$ 482,283 | 0.59% |
| RFA | \$ 4,606,301 | 0.71% |
| BBF | \$ 29,962,010 | 0.71% |
| RNJ | \$ 292,227 | 0.65% |
| BNJ | \$ 4,937,584 | 0.69% |
| RNY | \$ 931,745 | 0.86% |
| BNY | \$ 13,346,471 | 0.64% |

Should short-term interest rates rise, the Trusts' investments in TOBs may adversely affect the Trusts' net investment income and dividends to Common Shareholders. Also, fluctuations in the market values of municipal bonds deposited into the TOB may adversely affect the Trusts' NAVs per share.

Segregation and Collateralization: In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission (SEC) require that the Trusts either deliver collateral or segregate assets in connection with certain investments (e.g., financial futures contracts), the Trusts will, consistent with SEC rules and/or certain interpretive letters issued by the SEC, segregate collateral or designate on their books and records cash or liquid securities having a market value at least equal to the amount that would otherwise be required to be physically segregated. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party to such transactions has requirements to deliver/deposit securities as collateral for certain investments.

Investment Transactions and Investment Income: For financial reporting purposes, investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on investment transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income, including amortization and accretion of premiums and discounts on debt securities, is recognized on the accrual basis.

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

Dividends and Distributions: Dividends from net investment income are declared and paid monthly. Distributions of capital gains, if any, are recorded on the ex-dividend dates. The amount and timing of dividends and distributions are determined in accordance with federal income tax regulations, which may differ from US GAAP. Dividends and distributions to Preferred Shareholders are accrued and determined as described in Note 7.

Income Taxes: It is each Trust's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Each Trust files US federal and various state and local tax returns. No income tax returns are currently under examination. The statutes of limitations on Investment Quality Trusts, Income Trusts and BFO's US federal tax returns remains open for each of the following periods:

| | Year Ended | Period |
|-----|---------------|---------------------|

Notes to Financial Statements (continued)

The statutes of limitations on each Trust's state and local tax returns may remain open for an additional year depending upon the jurisdiction. Management does not believe there are any uncertain tax positions that require recognition of a tax liability.

Recent Accounting Standards: In May 2011, the Financial Accounting Standards Board (the FASB) issued amended guidance to improve disclosure about fair value measurements which will require the following disclosures for fair value measurements categorized as Level 3: quantitative information about the unobservable inputs and assumptions used in the fair value measurement, a description of the valuation policies and procedures and a narrative description of the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs. In addition, the amounts and reasons for all transfers in and out of Level 1 and Level 2 will be required to be disclosed. The amended guidance is effective for financial statements for fiscal years beginning after December 15, 2011, and interim periods within those fiscal years. Management is evaluating the impact of this guidance on the Trusts' financial statement disclosures.

In December 2011, the FASB issued guidance that will expand current disclosure requirements on the offsetting of certain assets and liabilities. The new disclosures will be required for investments and derivative financial instruments subject to master netting or similar agreements which are eligible for offset in the Statements of Assets and Liabilities and will require an entity to disclose both gross and net information about such investments and transactions in the financial statements. The guidance is effective for financial statement with fiscal years beginning on or after January 1, 2013, and interim periods within those fiscal years. Management is evaluating the impact of this guidance on the Trusts' financial statement disclosures.

Deferred Compensation and BlackRock Closed-End Share Equivalent Investment Plan: Under the deferred compensation plan approved by each Trust's Board, independent Trustees (Independent Trustees) may defer a portion of their annual complex-wide compensation. Deferred amounts earn an approximate return as though equivalent dollar amounts had been invested in common shares of certain other BlackRock Closed-End Funds selected by the Independent Trustees. This has approximately the same economic effect for the Independent Trustees as if the Independent Trustees had invested the deferred amounts directly in certain other BlackRock Closed-End Funds.

The deferred compensation plan is not funded and obligations thereunder represent general unsecured claims against the general assets of each Trust. Each Trust may, however, elect to invest in common shares of certain other BlackRock Closed-End Funds selected by the Independent Trustees in order to match its deferred compensation obligations. Investments to cover each Trust's deferred compensation liability, if any, are included in other assets in the Statements of Assets and Liabilities. Dividends and distributions from the BlackRock Closed-End Fund investments under the plan are included in income affiliated in the Statements of Operations.

Offering Costs: BBF incurred costs in connection with its issuance of VRDP Shares, which were recorded as a deferred charge and will be amortized over the 30-year life of the VRDP Shares with the exception of upfront fees paid to the liquidity provider which are amortized over the life of the liquidity agreement. Amortization of these costs is included in interest expense, fees and amortization of offering costs in the Statements of Operations.

Other: Expenses directly related to a Trust are charged to that Trust. Other operating expenses shared by several funds are pro rated among those funds on the basis of relative net assets or other appropriate methods.

The Trusts have an arrangement with the custodians whereby fees may be reduced by credits earned on uninvested cash balances, which, if applicable, are shown as fees paid indirectly in the Statements of Operations. The custodian imposes fees on overdrawn cash balances, which can be offset by accumulated credits earned or may result in additional custody charges.

2. Derivative Financial Instruments:

The Trusts engage in various portfolio investment strategies using derivative contracts both to increase the returns of the Trusts and to economically hedge, or protect, their exposure to certain risks such as interest rate risk. These contracts may be transacted on an exchange.

Losses may arise if the value of the contract decreases due to an unfavorable change in the market rates or values of the underlying instrument or if the counterparty does not perform under the contract. Counterparty risk related to exchange-traded financial futures contracts is deemed to be minimal due to the protection against defaults provided by the exchange on which these contracts trade.

Financial Futures Contracts: The Trusts purchase or sell financial futures contracts and options on financial futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk). Financial futures contracts are agreements between the Trusts and counterparty to buy or sell a specific quantity of an underlying instrument at a specified price and at a specified date. Depending on the terms of

Edgar Filing: BLACKROCK NEW YORK MUNICIPAL INCOME TRUST - Form N-CSRS

the particular contract, futures contracts are settled either through physical delivery of the underlying instrument on the settlement date or by payment of a cash settlement amount on the settlement date. Pursuant to the contract, the Trusts agree to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as margin variation and are recorded by the Trusts as unrealized appreciation or depreciation. When the contract is closed, the Trusts record a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The use of financial futures contracts involves the risk of an imperfect correlation in the movements in the price of financial futures contracts, interest rates and the underlying assets.

Table of Contents

(13) Derivative Financial Instruments

The Company primarily enters into derivative financial instruments as part of its strategy to manage its exposure to interest rate risk. Derivative instruments represent contracts between parties that result in one party delivering cash to the other based on a notional amount and an underlying term (such as a rate, security price or price index) specified in the contract. The net cash delivered from one party to the other is determined based on the interaction of the notional amount of the contract and the underlying term. Derivatives are also implicit in certain contracts and commitments.

The derivative financial instruments currently used by the Company to manage its exposure to interest rate risk include interest rate swaps and caps to manage the interest rate risk of certain fixed and variable rate assets and variable rate liabilities; (2) forward commitments provided to customers to fund certain mortgage loans to be sold into the secondary market; (3) forward contracts for the future delivery of such mortgage loans to protect the Company from adverse changes in interest rates and changes in the value of mortgage loans held-for-sale; and (4) covered call options to economically hedge specific investments. The Company also enters into derivatives (typically interest rate swaps) with certain qualified borrowers to facilitate the borrowing of funds and strategies and concurrently enters into mirror-image derivatives with a third party counterparty, effectively making the Company a net provider of derivatives for such borrowers. Additionally, the Company enters into foreign currency contracts to manage foreign exchange risk associated with certain foreign currency denominated assets.

The Company has purchased interest rate cap derivatives to hedge or manage its own risk exposures. Certain interest rate caps have been designated as cash flow hedge derivatives of the variable cash outflows associated with interest expense on certain junior subordinated debentures and certain deposits. Other cap derivatives are not designated for hedge accounting. As a result, hedges of the Company's overall portfolio, therefore any mark to market changes in the value of these caps are recorded in earnings.

Below is a summary of the interest rate cap derivatives held by the Company as of September 30, 2016: (Dollars in thousands)

| Effective Date | Maturity Date | Notional Accounting Amount Treatment | Fair Value as of September 30, 2016 |
|--------------------|--------------------|---|--|
| March 21, 2013 | March 21, 2017 | \$100,000 Non-Hedge Designated | \$ 1 |
| May 16, 2013 | November 16, 2016 | 75,000 Non-Hedge Designated | — |
| September 15, 2013 | September 15, 2017 | 50,000 Cash Flow Hedging | 9 |
| September 30, 2013 | September 30, 2017 | 40,000 Cash Flow Hedging | 8 |
| | | \$265,000 | \$ 18 |

The Company recognizes derivative financial instruments in the consolidated financial statements at fair value if it is probable that the instrument will be sold or settled within the reporting period or intent for holding the instrument. The Company records derivative assets and derivative liabilities on the Consolidated Balance Sheet within accrued interest receivable and other assets and accrued interest payable and other liabilities, respectively. If the fair value of derivative financial instruments are either recognized in income or in shareholders' equity as a component of comprehensive income depending on whether the derivative financial instrument qualifies for hedge accounting. If the instrument qualifies as a fair value hedge or cash flow hedge. Generally, changes in fair values of derivatives accounted for as fair value hedges are recorded in income in the same period and in the same income statement line as changes in the fair values of the hedged risk(s). Changes in fair values of derivative financial instruments accounted for as cash flow hedges, including effective hedges, are recorded as a component of other comprehensive income, net of deferred taxes, and reclassified to earnings when the hedged transaction affects earnings. Changes in fair values of derivative financial instruments not designated as fair value hedges pursuant to ASC 815, including changes in fair value related to the ineffective portion of cash flow hedges, are recorded in other comprehensive income during the period of the change. Derivative financial instruments are valued by a third party and are compared to the Company's comparison with valuations provided by the respective counterparties. Fair values of certain mortgage banking

lock commitments and forward commitments to sell mortgage loans) are estimated based on changes in mortgage rates at the measurement date of the loan commitment. The fair value of foreign currency derivatives is computed based on changes in forward rates at the measurement date compared to those prevailing at the measurement date.

Table of Contents

The table below presents the fair value of the Company's derivative financial instruments as of September 30, 2016, and September 30, 2015:

| (Dollars in thousands) | Derivative Assets | | Derivative Liabilities | |
|---|--------------------|-------------------|------------------------|--------------------|
| | September 30, 2016 | December 31, 2015 | September 30, 2015 | September 30, 2016 |
| Derivatives designated as hedging instruments under ASC 815: | | | | |
| Interest rate derivatives designated as Cash Flow Hedges | \$549 | \$ 242 | \$ 216 | \$7 |
| Interest rate derivatives designated as Fair Value Hedges | 177 | 27 | 5 | 907 |
| Total derivatives designated as hedging instruments under ASC 815 | \$726 | \$ 269 | \$ 221 | \$914 |
| Derivatives not designated as hedging instruments under ASC 815: | | | | |
| Interest rate derivatives | \$79,477 | \$ 42,510 | \$ 56,717 | \$79,199 |
| Interest rate lock commitments | 8,352 | 7,401 | 11,836 | 4,060 |
| Forward commitments to sell mortgage loans | — | 745 | — | 3,505 |
| Foreign exchange contracts | 273 | 373 | 260 | 270 |
| Total derivatives not designated as hedging instruments under ASC 815 | \$88,102 | \$ 51,029 | \$ 68,813 | \$87,034 |
| Total Derivatives | \$88,828 | \$ 51,298 | \$ 69,034 | \$87,948 |

Cash Flow Hedges of Interest Rate Risk

The Company's objectives in using interest rate derivatives are to add stability to net interest income and to manage interest rate movements. To accomplish these objectives, the Company primarily uses interest rate swaps and interest rate caps in its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of interest from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements with respect to the underlying notional amount. Interest rate caps designated as cash flow hedges involve the receipt of payments over a period in which the interest rate specified in the contract exceeds the agreed upon strike price.

As of September 30, 2016, the Company had two interest rate swap derivatives designated as cash flow hedges. The interest rate swap derivatives had notional amounts of \$250.0 million and \$275.0 million, and mature in June 2017 and July 2017, respectively. Additionally, as of September 30, 2016, the Company had one interest rate swap and two interest rate cap derivatives. The interest rate swap derivatives and one of the interest rate cap derivatives were designated as cash flow hedges of the variable cash outflows associated with interest expense on the Company's junior subordinated debentures. The derivative associated with the Company's junior subordinated debentures had a notional amount of \$25.0 million as of September 30, 2016. The cap derivatives associated with the Company's junior subordinated debentures had notional amounts of \$25.0 million and \$40.0 million, respectively, both maturing in September 2017. The effective portion of changes in the fair value of these derivatives is recorded in accumulated other comprehensive income and is subsequently reclassified to interest expense as the Company makes payments on the Company's variable rate junior subordinated debentures. The changes in fair value (net of tax) are recorded in the Consolidated Statements of Comprehensive Income. The ineffective portion of the change in fair value of these derivatives is recorded directly in earnings; however, no hedge ineffectiveness was recognized during the nine months ended September 30, 2016. The Company uses the hypothetical derivative method to assess and measure hedge effectiveness.

Table of Contents

The table below provides details on each of these cash flow hedges as of September 30, 2016:

| | September 30, 2016 | |
|---------------------------|--------------------|-------------------|
| (Dollars in thousands) | Notional | Fair Value |
| Maturity Date | Amount | Asset (Liability) |
| Interest Rate Swaps: | | |
| October 2016 | \$25,000 | \$ (7) |
| July 2019 | 250,000 | 106 |
| August 2019 | 275,000 | 426 |
| Total Interest Rate Swaps | \$550,000 | \$ 525 |
| Interest Rate Caps: | | |
| September 2017 | \$50,000 | \$ 9 |
| September 2017 | 40,000 | 8 |
| Total Interest Rate Caps | \$90,000 | \$ 17 |
| Total Cash Flow Hedges | \$640,000 | \$ 542 |

A rollforward of the amounts in accumulated other comprehensive loss related to interest rate derivatives designated as follows:

| (Dollars in thousands) | Three months ended | |
|--|--------------------|--------------------|
| | September 30, 2016 | September 30, 2015 |
| Unrealized loss at beginning of period | \$(3,574) | \$(4,408) |
| Amount reclassified from accumulated other comprehensive loss to interest expense on deposits and junior subordinated debentures | 1,065 | 571 |
| Amount of gain (loss) recognized in other comprehensive income | 1,708 | (503) |
| Unrealized loss at end of period | \$(801) | \$(4,340) |

As of September 30, 2016, the Company estimates that during the next twelve months, \$1.7 million will be reclassified from accumulated other comprehensive loss as an increase to interest expense.

Fair Value Hedges of Interest Rate Risk

Interest rate swaps designated as fair value hedges involve the payment of fixed amounts to a counterparty in exchange for receiving variable payments over the life of the agreements without the exchange of the underlying notional amount. As of September 30, 2016, the Company has seven interest rate swaps with an aggregate notional amount of \$71.3 million that were designated as fair value hedges associated with fixed rate commercial and industrial and commercial franchise loans as well as life insurance receivables.

For derivatives designated as fair value hedges, the gain or loss on the derivative as well as the gain or loss on the hedged item attributable to the hedged risk are recognized in earnings. The Company includes the gain or loss on the hedged item on the same line item as the offsetting loss or gain on the related derivatives. The Company recognized a net gain of \$13,000 related to hedge ineffectiveness for the three months ended September 30, 2016 and a \$21,000 net loss for the three months ended September 30, 2015. On a year-to-date basis, the Company recognized a net gain of \$13,000 and a net loss of \$21,000 for the three months ending September 30, 2016 and 2015, respectively.

On June 1, 2013, the Company de-designated a \$96.5 million notional amount cap which was previously designated as a fair value hedge of interest rate risk associated with an embedded cap in one of the Company's floating rate loans. The hedged loan no longer resulted in the interest rate cap no longer qualifying as an effective fair value hedge. As such, the interest rate cap is now accounted for under hedge accounting and all changes in the interest rate cap derivative value subsequent to June 1, 2013 are recognized in earnings.

Table of Contents

The following table presents the gain/(loss) and hedge ineffectiveness recognized on derivative instruments and that are designated as a fair value hedge accounting relationship as of September 30, 2016 and 2015:

| (Dollars in thousands) | | Amount of Gain/(Loss) Recognized in Income on Derivative Three Months Ended | | Amount of (Loss)/Gain Recognized in Income on Hedged Item Three Months Ended | |
|---------------------------|--|---|--------------------|--|--------------------|
| Derivatives in Fair Value | Location of Gain/(Loss) Recognized in Income on Derivative | September 30, 2016 | September 30, 2015 | September 30, 2016 | September 30, 2015 |
| Hedging Relationships | | | | | |
| Interest rate swaps | Trading losses, net | \$ 269 | \$ (323) | \$ (234) | \$ 302 |
| (Dollars in thousands) | | Amount of Gain/(Loss) Recognized in Income on Derivative Nine Months Ended | | Amount of (Loss)/Gain Recognized in Income on Hedged Item Nine Months Ended | |
| Derivatives in Fair Value | Location of Gain/(Loss) Recognized in Income on Derivative | September 30, 2016 | September 30, 2015 | September 30, 2016 | September 30, 2015 |
| Hedging Relationships | | | | | |
| Interest rate swaps | Trading losses, net | \$ (614) | \$ (338) | \$ 627 | \$ 315 |

Non-Designated Hedges

The Company does not use derivatives for speculative purposes. Derivatives not designated as accounting hedges are used to manage the Company's economic exposure to interest rate movements and other identified risks but do not meet the strict hedge accounting requirements of ASC 815. Changes in the fair value of derivatives not designated in hedging relationships are included in earnings.

Interest Rate Derivatives—The Company has interest rate derivatives, including swaps and option products, which are provided to certain qualified borrowers. The Company's banking subsidiaries execute certain derivatives (including interest rate swaps) directly with qualified commercial borrowers to facilitate their respective risk management. In these arrangements allow the Company's commercial borrowers to effectively convert a variable rate loan to a fixed rate loan, to minimize the Company's exposure on these transactions, the Company simultaneously executes offsetting derivatives. In most cases, the offsetting derivatives have mirror-image terms, which result in the positions' changes in fair value offsetting each other through earnings each period. However, to the extent that the derivatives are not a mirror-image and because of counterparty credit risk, changes in fair value will not completely offset resulting in some earnings impact each period. Changes in fair value of these derivatives are included in non-interest income. At September 30, 2016, the Company had interest rate derivatives transactions with an aggregate notional amount of approximately \$4.1 billion (all interest rate swaps and caps with qualified borrowers) related to this program. These interest rate derivatives had maturity dates ranging from October 2016 to October 2017.

Mortgage Banking Derivatives—These derivatives include interest rate lock commitments provided to customers for mortgage loans to be sold into the secondary market and forward commitments for the future delivery of such loans. It is common for the Company to enter into forward commitments for the future delivery of a portion of our residential mortgage loan production. These commitments are entered into in order to economically hedge the effect of future changes in interest rates on its mortgage loans as well as on its portfolio of mortgage loans held-for-sale. The Company's mortgage banking derivatives are not designated as being in accounting hedge relationships. At September 30, 2016, the Company had forward commitments to deliver mortgage loans with an aggregate notional amount of approximately \$1.3 billion and interest rate lock commitments with an aggregate notional amount of approximately \$683.6 million. The fair values of these derivatives were estimated based on changes in mortgage rates on the commitments. Changes in the fair value of these mortgage banking derivatives are included in mortgage banking income.

Foreign Currency Derivatives—These derivatives include foreign currency contracts used to manage the foreign currency risk associated with foreign currency denominated assets and to facilitate the respective risk management strategies of certain foreign currency transactions. Foreign currency contracts, which include spot and forward contracts, represent agreements to exchange the currency of one country for the currency of another country at an agreed-upon price on an agreed-upon settlement date. To the extent of fluctuations in foreign currencies, the U.S. dollar-equivalent value of the foreign currency denominated assets will increase or decrease. Gains or losses on the derivative instruments related to these foreign currency denominated assets are expected to substantially offset this variability. For certain foreign currency contracts with customized terms, the trust simultaneously executes offsetting derivatives with third parties. These offsetting

Table of Contents

derivatives have mirror-image terms, which result in the positions' changes in fair value substantially offsetting period. As of September 30, 2016 the Company held foreign currency derivatives with an aggregate notional amount of \$63.6 million.

Other Derivatives—Periodically, the Company will sell options to a bank or dealer for the right to purchase certain banks' investment portfolios (covered call options). These option transactions are designed primarily to mitigate volatility and to increase the total return associated with the investment securities portfolio. These options do not qualify for treatment pursuant to ASC 815, and, accordingly, changes in fair value of these contracts are recognized as other non-interest income. As of September 30, 2016, December 31, 2015 or September 30, 2015, there were no covered call options outstanding.

As discussed above, the Company has entered into interest rate cap derivatives to protect the Company in a rising interest rate environment against increased margin compression due to the repricing of variable rate liabilities and lack of repricing of fixed rate securities. As of September 30, 2016, the Company held two interest rate cap derivative contracts, which are not part of hedge relationships, with an aggregate notional value of \$175.0 million.

Amounts included in the Consolidated Statements of Income related to derivative instruments not designated in hedge relationships were as follows:

| (Dollars in thousands) | | Three Months Ended | | Nine Months Ended | |
|------------------------------|--------------------------------|--------------------|--------------------|--------------------|--------------------|
| Derivative | Location in income statement | September 30, 2016 | September 30, 2015 | September 30, 2016 | September 30, 2015 |
| Interest rate swaps and caps | Trading (losses) gains, net | \$(395) | \$ (275) | \$(751) | \$ (592) |
| Mortgage banking derivatives | Mortgage banking revenue | (2,215) | (4,062) | (3,058) | (1,669) |
| Covered call options | Fees from covered call options | 3,633 | 2,810 | 9,994 | 11,735 |
| Foreign exchange contracts | Trading (losses) gains, net | (26) | 113 | (262) | 133 |

Credit Risk

Derivative instruments have inherent risks, primarily market risk and credit risk. Market risk is associated with changes in interest rates and credit risk relates to the risk that the counterparty will fail to perform according to the terms of the agreement. The derivative instruments potentially subject to market and credit risks are the streams of interest payments under the contracts and the notional amounts of the derivative instrument and not the notional principal amounts used to express the volume of the transactions. Market risk is managed and monitored as part of the Company's overall asset-liability management process, except that the credit risk of derivatives entered into with certain qualified borrowers is managed through the Company's standard loan underwriting process. These derivatives are secured through collateral provided by the loan agreements. Actual exposures are monitored against credit limits established to contain risk within parameters. When deemed necessary, appropriate types and amounts of collateral are obtained to minimize credit exposure.

The Company has agreements with certain of its interest rate derivative counterparties that contain cross-default provisions that provide that if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness is accelerated by the lender, then the Company could also be declared in default on its derivative obligations. The Company has agreements with certain of its derivative counterparties that contain a provision allowing the counterparty to terminate the derivative positions if the Company fails to maintain its status as a well or adequately capitalized institution, which would require the Company to settle its obligations under the agreements. As of September 30, 2016, the fair value of interest rate derivatives that were subject to such agreements, which includes accrued interest related to these agreements, was \$80.6 million. As of September 30, 2016 the Company had breached any of these provisions and the derivative positions were terminated as a result of the Company's failure to maintain its status as a well or adequately capitalized institution. The Company would have been required to settle its obligations under the agreements at the termination value and would have been required to provide additional amounts due in excess of amounts previously posted as collateral with the respective counterparty.

The Company is also exposed to the credit risk of its commercial borrowers who are counterparties to interest rate derivatives with banks. This counterparty risk related to the commercial borrowers is managed and monitored through the bank selection process applicable to loans since these derivatives are secured through collateral provided by the loan agreements. The counterparty risk associated with the mirror-image swaps executed with third parties is monitored and managed in connection with the asset liability management process.

Table of Contents

The Company records interest rate derivatives subject to master netting agreements at their gross value and does not net assets and liabilities on the Consolidated Statements of Condition. The tables below summarize the Company's gross and offsetting positions as of the dates shown.

| (Dollars in thousands) | Derivative Assets | | | Derivative Liabilities | |
|---|--------------------|-------------------|--------------------|------------------------|-------------------|
| | Fair Value | | Fair Value | Fair Value | |
| | September 30, 2016 | December 31, 2015 | September 30, 2015 | September 30, 2016 | December 31, 2015 |

| Less: Amounts offset in the Statements of Financial Condition | — | — | — | — | — |
| Net amount presented in the Statements of Financial Condition | \$80,203 | \$ 42,779 | \$ 56,938 | \$80,113 | \$ 42,779 |
| Gross amounts not offset in the Statements of Financial Condition | | | | | |
| Offsetting Derivative Positions | (958) | (753) | (614) | (958) | (753) |
| Collateral Posted ⁽¹⁾ | — | — | — | (79,155) | (79,155) |
| Net Credit Exposure | \$79,245 | \$ 42,026 | \$ 56,324 | \$— | \$— |

As of September 30, 2016 and December 31, 2015, the Company posted collateral of \$86.0 million and \$45.0 million, respectively, to its counterparties. Collateral is measured at fair value. Collateral posted to counterparties (1) which resulted in excess collateral with its counterparties. For purposes of this disclosure, the amount of posted collateral is the amount offsetting the derivative liability.

(14) Fair Values of Assets and Liabilities

The Company measures, monitors and discloses certain of its assets and liabilities on a fair value basis. These financial liabilities are measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the observability of the assumptions used to determine fair value. These levels are:

Level 1—unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2—inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability or inputs that are not directly or indirectly observable but are corroborated by observable market data by correlation or other means.

Level 3—significant unobservable inputs that reflect the Company's own assumptions that market participants would use to value assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

A financial instrument's categorization within the above valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement of an asset or liability entirely requires judgment, and considers factors specific to the assets or liabilities. Following is a description of the methodologies used for the Company's assets and liabilities measured at fair value on a recurring basis.

Available-for-sale and trading account securities—Fair values for available-for-sale and trading securities are determined based on independent pricing vendors. Securities measured with these valuation techniques are generally categorized in Level 2 of the fair value hierarchy. Typically, standard inputs such as benchmark yields, reported trades for similar securities, issuer financials, securities, bids, offers and reference data including market research publications are used to fair value a security.

not available, broker/dealer quotes may be obtained by the vendor to determine the fair value of the security. When pricing methodologies to determine if observable market information is being used, versus unobservable inputs using significant inputs that are unobservable in the market due to limited activity or a less liquid market are classified in the fair value hierarchy.

The Company's Investment Operations Department is responsible for the valuation of Level 3 available-for-sale securities. The methodology and variables used as inputs in pricing Level 3 securities are derived from a combination of observable and unobservable inputs.

41

Table of Contents

unobservable inputs. The unobservable inputs are determined through internal assumptions that may vary from external factors, such as market movement and credit rating adjustments.

At September 30, 2016, the Company classified \$67.2 million of municipal securities as Level 3. These municipal issues for various municipal government entities primarily located in the Chicago metropolitan area and southern California, including privately placed, non-rated bonds without CUSIP numbers. The Company's methodology for pricing the non-rated municipal securities uses distinct inputs: equivalent rating, yield and other pricing terms. To determine the rating for a given non-rated municipal security, the Investment Operations Department references a publicly issued bond by the same issuer if available. A reduction in rating obtained from the comparable bond, as the Company believes if liquidated, a non-rated bond would be valued as a bond with a verifiable rating. The reduction applied by the Company is one complete rating grade (i.e. a "AA" rating would be reduced to "A" for the Company's valuation). In the third quarter of 2016, all of the ratings derived in the Investment Operations were BBB or better, for both bonds with and without comparable bond proxies. The fair value of municipal bonds is sensitive to the rating input, as a higher rating typically results in an increased valuation. The inputs used in the bond valuation are observable. Based on the rating determined in the above process, Investment Operations uses the corresponding current market yield curve available to market participants. Other terms including coupon, maturity, and number of coupon payments per year, and accrual method are obtained from the individual bond term sheets. Certain bonds held by the Company at September 30, 2016 have a call date that has passed, and are now continuously callable. For callable bonds, the fair value is capped at par value as the Company assumes a market participant would not pay more than par for a callable bond.

At September 30, 2016, the Company held no equity securities classified as Level 3 compared to \$25.2 million at September 30, 2015. In the prior periods, the securities in Level 3 were primarily comprised of auction rate securities. The Company's valuation methodology at that time included modeling the contractual cash flows of the securities and applying a discount to these cash flows by a market spread derived from the market price of the securities. In the third quarter of 2016, the Company exchanged these auction rate securities for the underlying preferred securities, resulting in a \$2.4 million gain on the nonmonetary sale. The Company classified the preferred securities received as Level 2 at the time of the transaction due to observable inputs other than quoted prices existing for the preferred securities.

Mortgage loans held-for-sale—The fair value of mortgage loans held-for-sale is determined by reference to valuations of similar products with similar characteristics.

Mortgage servicing rights ("MSRs")—Fair value for MSRs is determined utilizing a valuation model which calculates the fair value of servicing rights based on the present value of estimated future cash flows. The Company uses a discount rate commensurate with the risk associated with each servicing rights, given current market conditions. At September 30, 2016, the Company classified MSRs as Level 3. The weighted average discount rate used as an input to value the MSRs at September 30, 2016 was 5.5%. The discount rates applied ranging from 3%-7%. The higher the rate utilized to discount estimated future cash flows, the lower the measurement. Additionally, fair value estimates include assumptions about prepayment speeds which ranged from 10% to 15%. An average prepayment speed of 14.73% used as an input to value the MSRs at September 30, 2016. Prepayment speeds in excess of the assumed prepayment speed to the fair value of MSRs as an increase in prepayment speeds results in a decreased valuation.

Derivative instruments—The Company's derivative instruments include interest rate swaps and caps, commodity contracts, foreign currency sale into the secondary market (interest rate locks), forward commitments to end investors for the sale of mortgage-related securities, and currency contracts. Interest rate swaps and caps are valued by a third party, using models that primarily use market data such as yield curves, and are corroborated by comparison with valuations provided by the respective counterparties. The fair value associated with derivative financial instruments that are subject to master netting agreements is measured on a net basis. The fair value for mortgage-related derivatives is based on changes in mortgage rates from the date of measurement. The fair value of foreign currency derivatives is computed based on change in foreign currency rates stated in the contract as of the prevailing rate at the measurement date.

Nonqualified deferred compensation assets—The underlying assets relating to the nonqualified deferred compensation of the trust and primarily consist of non-exchange traded institutional funds which are priced based by an independent

Also, the Company may be required, from time to time, to measure certain other financial assets at fair value in accordance with GAAP. These adjustments to fair value usually result from impairment charges on individual assets at fair value on a nonrecurring basis that were still held in the balance sheet at the end of the period, the following carrying value of the related individual assets or portfolios at September 30, 2016.

September 30, 2016

| (Dollars in thousands) | Total | Level 1 | Level 2 | Level 3 |
|---|-----------|---------|---------|------------|
| Impaired loans—collateral based | \$64,614 | \$ — | — | —\$64,614 |
| Other real estate owned, including covered other real estate owned ⁽¹⁾ | 45,449 | — | — | 45,449 |
| Total | \$110,063 | \$ — | — | —\$110,063 |

(1) Fair value losses recognized, net on other real estate owned include valuation adjustments and charge period.

Impaired loans—A loan is considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due pursuant to the contractual terms of the loan agreement. A loan modified in accordance with applicable accounting guidance. Impairment is measured by estimating the fair value of the loan based on expected cash flows, the market price of the loan, or the fair value of the underlying collateral. Impaired loans are measured at fair value where an allowance is established based on the fair value of collateral. Appraised values, with adjustments to market-based valuation inputs, are generally used on real estate collateral-dependent impaired loans.

The Company's Managed Assets Division is primarily responsible for the valuation of Level 3 inputs of impaired loans. Information on the Managed Assets Division review of impaired loans refer to Note 7 – Allowance for Loan Losses on Lending-Related Commitments and Impaired Loans. At September 30, 2016, the Company had \$90.5 million of impaired loans classified as Level 3. Of the \$90.5 million of impaired loans, \$64.6 million were measured at fair value based on the fair value of the loan as shown in the table above. The remaining \$25.9 million were valued based on discounted cash flows in accordance with ASC 310.

Other real estate owned (including covered other real estate owned)—Other real estate owned is comprised of real estate owned for or full satisfaction of loans and is included in other assets. Other real estate owned is recorded at its estimated fair value less selling costs at the date of transfer, with any excess of the related loan balance over the fair value less expected selling costs being recorded as the allowance for loan losses. Subsequent changes in value are reported as adjustments to the carrying amount of other real estate owned and non-interest expense. Gains and losses upon sale, if any, are also charged to other non-interest expense. Fair value is determined from third party appraisals and internal estimates that are adjusted by a discount representing the estimated cost of sale. Other real estate owned is considered a Level 3 valuation.

The Company's Managed Assets Division is primarily responsible for the valuation of Level 3 inputs for non-covered other real estate owned and covered other real estate owned. At September 30, 2016, the Company had \$45.4 million of other real estate owned as Level 3. The unobservable input applied to other real estate owned relates to the 10% reduction to the appraisal value.

45

Table of Contents

value representing the estimated cost of sale of the foreclosed property. A higher discount for the estimated cost of sale would result in a decreased carrying value.

The valuation techniques and significant unobservable inputs used to measure both recurring and non-recurring measurements at September 30, 2016 were as follows:

| (Dollars in thousands) | Fair Value | Valuation Methodology | Significant Unobservable Input | Range of Inputs | Weighted Average of Inputs |
|--|------------|-----------------------|-------------------------------------|-----------------|----------------------------|
| Measured at fair value on a recurring basis: | | | | | |
| Municipal Securities | \$ 67,208 | Bond pricing | Equivalent rating | BBB-AA+ | N/A |
| MSRs | 13,901 | Discounted cash flows | Discount rate | 3%-7% | 5.52% |
| | | | Constant prepayment rate (CPR) | 2%-85% | 14.7% |
| Measured at fair value on a non-recurring basis: | | | | | |
| Impaired loans—collateral based | \$164,614 | Appraisal value | Appraisal adjustment - cost of sale | 10% | 10.0% |
| Other real estate owned, including covered other real estate owned | 45,449 | Appraisal value | Appraisal adjustment - cost of sale | 10% | 10.0% |

| Total financial liabilities | \$22,315,062 | \$22,321,648 | \$20,224,790 | \$20,229,220 | \$19,426,770 |

Not all the financial instruments listed in the table above are subject to the disclosure provisions of ASC Topic 820. Some financial liabilities result in their carrying value approximating fair value. These include cash and cash equivalents, interest-bearing deposits with banks, brokerage customer receivables, FHLB and FRB stock, FDIC indemnification asset and liability, accrued interest receivable and accrued interest payable and non-maturity deposits.

The following methods and assumptions were used by the Company in estimating fair values of financial instruments that are not previously disclosed.

Held-to-maturity securities. Held-to-maturity securities include U.S. Government-sponsored agency securities issued by various municipal government entities primarily located in the Chicago metropolitan area and southern Illinois. Fair values for held-to-maturity securities are typically based on prices obtained from independent pricing vendors. In accordance with ASC 320, the Company has categorized held-to-maturity securities as a Level 2 fair value measurement.

Loans. Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are analyzed by type (commercial, residential real estate, etc). Each category is further segmented by interest rate type (fixed and variable). For fixed-rate loans that reprice frequently, estimated fair values are based on carrying values. The fair value of

on secondary market sources for securities backed by similar loans, adjusted for differences in loan characteristics. The value of other fixed rate loans is estimated by discounting scheduled cash flows through the estimated maturity using estimated rates that reflect credit and interest rate risks inherent in the loan. The primary impact of credit risk on the present value of the portfolio, however, was assessed through the use of the allowance for loan losses, which is believed to represent

47

Table of Contents

the current fair value of probable incurred losses for purposes of the fair value calculation. In accordance with ASC 820, the Company has categorized loans as a Level 3 fair value measurement.

Deposits with stated maturities. The fair value of certificates of deposit is based on the discounted value of cash flows. The discount rate is estimated using the rates currently in effect for deposits of similar remaining maturities. In accordance with ASC 820, the Company has categorized deposits with stated maturities as a Level 3 fair value measurement.

FHLB advances. The fair value of FHLB advances is obtained from the FHLB which uses a discounted cash flow model. The discount rate is based on current market rates of similar maturity debt securities to discount cash flows. In accordance with ASC 820, the Company has categorized FHLB advances as a Level 3 fair value measurement.

Subordinated notes. The fair value of the subordinated notes is based on a market price obtained from an independent pricing source. In accordance with ASC 820, the Company has categorized subordinated notes as a Level 2 fair value measurement.

Junior subordinated debentures. The fair value of the junior subordinated debentures is based on the discounted cash flows. In accordance with ASC 820, the Company has categorized junior subordinated debentures as a Level 3 fair value measurement.

(15) Stock-Based Compensation Plans

In May 2015, the Company's shareholders approved the 2015 Stock Incentive Plan ("the 2015 Plan") which provides for the issuance of up to 5,485,000 shares of common stock. The 2015 Plan replaced the 2007 Stock Incentive Plan ("the 2007 Plan") and the 1997 Stock Incentive Plan ("the 1997 Plan"). The 2015 Plan, the 2007 Plan and the 1997 Plan are collectively referred to as the "Plans." The 2015 Plan has substantially similar terms to the 2007 Plan and the 1997 Plan. Outstanding awards under the Plans for which the award is not issued by reason of cancellation, forfeiture, lapse of such award or settlement of such award in cash, are governed by the 2015 Plan. All grants made after the approval of the 2015 Plan will be made pursuant to the 2015 Plan. The Plans apply to all employees of Wintrust. The Compensation Committee of the Board of Directors administers all stock-based compensation awards. The Compensation Committee authorizes all awards granted pursuant to the Plans.

The Plans permit the grant of incentive stock options, non-qualified stock options, stock appreciation rights, restricted stock awards or unit awards, performance awards and other incentive awards valued in whole or in part by reference to the Company's stock price, all on a stand alone, combination or tandem basis. The Company historically awarded stock-based compensation awards in the form of time-vested non-qualified stock options and time-vested restricted share unit awards ("restricted shares"). The fair value of the restricted shares is the purchase of shares of the Company's common stock at the fair market value of the stock on the date the option is exercised. Options under the 2015 Plan and the 2007 Plan generally vest ratably over periods of three to five years and have a maximum term of seven years from the date of grant. Stock options granted under the 1997 Plan provided for a maximum term of ten years from the date of grant. Restricted shares entitle the holders to receive, at no cost, shares of the Company's common stock. Restricted shares generally vest over a period of one to five years from the date of grant.

Beginning in 2011, the Company has awarded annual grants under the Long-Term Incentive Program ("LTIP") in addition to awards under the Plans. The LTIP is designed in part to align the interests of management with the interests of shareholders and to create a long-term focus based on sustainable results and provide participants with a target long-term incentive award. The Company anticipated that LTIP awards will continue to be granted annually. LTIP grants to date have consisted of time-vested non-qualified stock options and performance-based stock and cash awards. Performance-based stock and cash awards granted under the LTIP are based upon the achievement of pre-established long-term performance goals set in advance by the Compensation Committee. The performance period starting at the beginning of each calendar year. These performance awards are granted at a target level, and the actual payout is based on the Company's achievement of the pre-established long-term goals, the actual payouts can range from 0% to a maximum of 200% (granted in 2015 and 2016) or 200% (for awards granted prior to 2015) of the target award. The awards vest in full at the end of the performance period upon certification of the payout by the Compensation Committee of the Board of Directors.

Holders of restricted share awards and performance-based stock awards received under the Plans are not entitled to dividends (or cash payments equal to the cash dividends) on the underlying common shares until the awards are issued. In limited circumstances, these awards are canceled upon termination of employment without any payment of cash or other consideration by the Company. Shares that are vested but not issuable pursuant to deferred compensation arrangements accrue additional dividends of the same value of dividends otherwise paid.

Table of Contents

Stock-based compensation is measured as the fair value of an award on the date of grant, and the measured cost over the period which the recipient is required to provide service in exchange for the award. The fair values of restricted stock awards and performance-based stock awards are determined based on the average of the high and low trading prices on the date of grant. The value of stock options is estimated using a Black-Scholes option-pricing model that utilizes the assumptions outlined in the following table. Option-pricing models require the input of highly subjective assumptions and are sensitive to changes in the assumptions and the price volatility of the underlying stock, which can materially affect the fair value estimate. Expected life of the LTIP awards from the inception of the LTIP awards has been based on the safe harbor rule of the SEC Staff Accounting Bulletin 105, "Measurement of Compensation Payment" as the Company believes historical exercise data may not provide a reasonable basis to estimate the expected life of the options. Expected stock price volatility is based on historical volatility of the Company's common stock, which is used to estimate the expected life of the options, and the risk-free interest rate is based on comparable U.S. Treasury rates. Management periodically reviews the assumptions used to calculate the fair value of an option on a periodic basis to better reflect expected trends. The following table presents the weighted average assumptions used to determine the fair value of options granted during the periods ending September 30, 2016 and 2015.

| | Nine Months Ended September | | September | |
|---------------------------------|-----------------------------------|-------------|-------------|-------------|
| | 30, 2016 | 30, 2015 | 30, 2016 | 30, 2015 |
| Expected dividend yield | 0.9 % | 0.9 % | 0.9 % | 0.9 % |
| Expected volatility | 25.2 % | 26.5 % | 25.2 % | 26.5 % |
| Risk-free rate | 1.3 % | 1.3 % | 1.3 % | 1.3 % |
| Expected option life (in years) | 4.5 | 4.5 | 4.5 | 4.5 |

Stock based compensation is recognized based upon the number of awards that are ultimately expected to vest, less expected forfeitures. In addition, for performance-based awards, an estimate is made of the number of shares earned based on actual performance against the performance criteria in the award to determine the amount of compensation expense. This estimate is reevaluated periodically and total compensation expense is adjusted for any change in estimate in the period. Stock-based compensation expense recognized in the Consolidated Statements of Income was \$2.0 million in the third quarter of 2016, and \$2.5 million in the third quarter of 2015, and \$6.8 million and \$7.8 million for the year-to-date periods, respectively.

Table of Contents

A summary of the Company's stock option activity for the nine months ended September 30, 2016 and September 30, 2015 is set forth below:

| Stock Options | Common Shares | Weighted Average Strike Price | Remaining Contractual Term ⁽¹⁾ | Intrinsic Value ⁽²⁾ (\$000) |
|-----------------------------------|---------------|-------------------------------|---|--|
| Outstanding at January 1, 2016 | 1,551,734 | \$ 41.32 | | |
| Granted | 562,166 | 41.04 | | |
| Exercised | (184,366) | 37.43 | | |
| Forfeited or canceled | (86,039) | 48.93 | | |
| Outstanding at September 30, 2016 | 1,843,495 | \$ 41.27 | 4.8 | \$ 26,363 |
| Exercisable at September 30, 2016 | 813,666 | \$ 39.27 | 3.5 | \$ 13,265 |

| Stock Options | Common Shares | Weighted Average Strike Price | Remaining Contractual Term ⁽¹⁾ | Intrinsic Value ⁽²⁾ (\$000) |
|---|---------------|-------------------------------|---|--|
| Outstanding at January 1, 2015 | 1,618,426 | \$ 43.00 | | |
| Conversion of options of acquired company | 16,364 | 21.18 | | |
| Granted | 502,517 | 44.36 | | |
| Exercised | (258,836) | 43.14 | | |
| Forfeited or canceled | (277,150) | 53.64 | | |
| Outstanding at September 30, 2015 | 1,601,321 | \$ 41.34 | 4.7 | \$ 19,738 |
| Exercisable at September 30, 2015 | 715,101 | \$ 37.52 | 3.2 | \$ 11,376 |

(1) Represents the remaining weighted average contractual life in years.

Aggregate intrinsic value represents the total pre-tax intrinsic value (i.e., the difference between the Company's closing stock price on the last trading day of the quarter and the option exercise price, multiplied by the number of shares) that would have been realized if the options had been exercised on the last trading day of the quarter.

(2) option holders if they had exercised their options on the last day of the quarter. Options with exercise prices greater than the closing stock price on the last trading day of the quarter are excluded from the calculation of intrinsic value. The intrinsic value is calculated based on the closing stock price on the last trading day of the quarter and the market value of the Company's stock.

The weighted average grant date fair value per share of options granted during the nine months ended September 30, 2016 and September 30, 2015 was \$8.61 and \$9.72, respectively. The aggregate intrinsic value of options exercised during the nine months ended September 30, 2016 and 2015, was \$2.7 million and \$2.3 million, respectively.

A summary of the Plans' restricted share activity for the nine months ended September 30, 2016 and September 30, 2015 is set forth below:

| Restricted Shares | Nine months ended September 30, 2016 | | Nine months ended September 30, 2015 | |
|--|--------------------------------------|--|--------------------------------------|--|
| | Common Shares | Weighted Average Grant-Date Fair Value | Common Shares | Weighted Average Grant-Date Fair Value |
| Outstanding at January 1 | 137,593 | \$ 49.63 | 146,112 | \$ 47.45 |
| Granted | 15,764 | 44.72 | 15,657 | 45.81 |
| Vested and issued | (10,041) | 43.78 | (20,409) | 39.07 |
| Forfeited or canceled | (598) | 44.26 | (2,400) | 36.81 |
| Outstanding at September 30 | 142,718 | \$ 49.52 | 138,960 | \$ 48.68 |
| Vested, but not issuable at September 30 | 88,889 | \$ 51.44 | 85,000 | \$ 51.88 |

Table of Contents

A summary of the Plans' performance-based stock award activity, based on the target level of the awards, for the September 30, 2016 and September 30, 2015 is presented below:

| Performance-based Stock | Nine months ended September 30, 2016 | | Nine months ended September 30, 2015 | |
|--------------------------------------|---|-------------------------------------|---|-------------------------------------|
| | Common Shares | Average Grant-Date Fair Value | Common Shares | Average Grant-Date Fair Value |
| Outstanding at January 1 | 276,533 | \$ 43.01 | 295,679 | \$ 38.18 |
| Granted | 118,072 | 41.02 | 106,017 | 44.35 |
| Vested and issued | (78,410) | 37.90 | (78,590) | 31.10 |
| Forfeited | (13,229) | 41.12 | (33,854) | 32.74 |
| Outstanding at September 30 | 302,966 | \$ 43.64 | 289,252 | \$ 43.00 |
| Vested, but deferred at September 30 | 6,660 | \$ 37.93 | — | \$ — |

The Company issues new shares to satisfy its obligation to issue shares granted pursuant to the Plans.

(16) Shareholders' Equity and Earnings Per Share

Common Stock Offering

In June 2016, the Company issued through a public offering a total of 3,000,000 shares of its common stock. Net proceeds to the Company totaled approximately \$152.8 million.

Series D Preferred Stock

In June 2015, the Company issued and sold 5,000,000 shares of fixed-to-floating non-cumulative perpetual preferred stock with a liquidation preference \$25 per share (the "Series D Preferred Stock") for \$125.0 million in a public offering. Dividends on the Series D Preferred Stock are payable quarterly in arrears at a fixed rate of 6.50% per annum from the date to, but excluding, July 15, 2025, and from (and including) that date at a floating rate equal to three-month LIBOR plus 4.06% per annum.

Series C Preferred Stock

In March 2012, the Company issued and sold 126,500 shares of non-cumulative perpetual convertible preferred stock with a liquidation preference \$1,000 per share (the "Series C Preferred Stock") for \$126.5 million in a public offering. Dividends on the Series C Preferred Stock are payable quarterly in arrears at a rate of 5.00% per annum. The Series C Preferred Stock is convertible into common stock at the option of the holder at a current conversion rate of 24.5569 shares of common stock per share of Series C Preferred Stock subject to customary anti-dilution adjustments. In the first nine months of 2016, pursuant to such terms, 729 shares of the Series C Preferred Stock were converted at the option of the respective holders into 729 shares of common stock. In 2015, pursuant to such terms, 180 shares of the Series C Preferred Stock were converted at the option of the respective holders into 4,374 shares of the Company's common stock. On and after April 15, 2017, the Company will have the right, in certain circumstances, to cause the Series C Preferred Stock to be converted into common stock if the closing price of the common stock exceeds a certain amount.

Common Stock Warrant

Pursuant to the U.S. Department of the Treasury's (the "U.S. Treasury") Capital Purchase Program, on December 14, 2009, the Company issued to the U.S. Treasury a warrant to exercise 1,643,295 warrant shares of Wintrust common stock at a per share price of \$1.00.

\$22.82, subject to customary anti-dilution adjustments, and with a term of 10 years. In February 2011, the U.S. interest in the warrant issued to it in a secondary underwritten public offering. During the first nine months of 2011, 944 warrants were exercised, which resulted in 944 shares of common stock issued. At September 30, 2016, all remaining warrants were able to exercise 365,829 warrant shares.

Other

In July 2015, the Company issued 388,573 shares of its common stock in the acquisition of CFIS. In January 2016, the Company issued 422,122 shares of its common stock in the acquisition of Delavan.

51

Table of Contents

At the January 2016 Board of Directors meeting, a quarterly cash dividend of \$0.12 per share (\$0.48 on an annualized basis) was declared. It was paid on February 25, 2016 to shareholders of record as of February 11, 2016. At the April 2016 Board of Directors meeting, a quarterly cash dividend of \$0.12 per share (\$0.48 on an annualized basis) was declared. It was paid on May 12, 2016 to shareholders of record as of May 12, 2016. At the July 2016 Board of Directors meeting, a quarterly cash dividend of \$0.12 per share (\$0.48 on an annualized basis) was declared. It was paid on August 25, 2016 to shareholders of record as of August 11, 2016.

Accumulated Other Comprehensive Income (Loss)

The following tables summarize the components of other comprehensive income (loss), including the related income tax expense (benefit) and the related amount reclassified to net income for the periods presented (in thousands).

| | Accumulated Unrealized Gains (Losses) on Securities | Accumulated Unrealized Losses on Derivative Instruments | Accumulated Foreign Currency Translation Adjustment |
|--|---|---|---|
| Balance at July 1, 2016 | \$ 3,971 | \$ (2,220) | \$ — |

Table of Contents

Earnings per Share

The following table shows the computation of basic and diluted earnings per share for the periods indicated:

| (In thousands, except per share data) | Three Months Ended | |
|---|--------------------|--------------------|
| | September 30, 2016 | September 30, 2015 |
| Net income | \$53,115 | \$ 38,355 |
| Less: Preferred stock dividends and discount accretion | 3,628 | 4,079 |
| Net income applicable to common shares—Basic | (A) 49,487 | 34,276 |
| Add: Dividends on convertible preferred stock, if dilutive | 1,578 | 1,579 |
| Net income applicable to common shares—Diluted | (B) 51,065 | 35,855 |
| Weighted average common shares outstanding | (C) 51,679 | 48,158 |
| Effect of dilutive potential common shares | | |
| Common stock equivalents | 938 | 978 |
| Convertible preferred stock, if dilutive | 3,109 | 3,071 |
| Total dilutive potential common shares | 4,047 | 4,049 |
| Weighted average common shares and effect of dilutive potential common shares | (D) 55,726 | 52,207 |
| Net income per common share: | | |
| Basic | (A/C) \$0.96 | \$ 0.71 |
| Diluted | (B/D) \$0.92 | \$ 0.69 |

Potentially dilutive common shares can result from stock options, restricted stock unit awards, stock warrants, convertible preferred stock and shares to be issued under the Employee Stock Purchase Plan and the Directors Deferred Fee Plan. These shares are treated as if they had been either exercised or issued, computed by application of the treasury stock method. When convertible common shares are typically included in the computation of diluted earnings per share, potentially dilutive common shares are included from this computation in periods in which the effect would reduce the loss per share or increase the income per share. Where the effect of this conversion would reduce the loss per share or increase the income per share, net income applicable to common shares can be affected by the conversion of the Company's convertible preferred stock. Where the effect of this conversion would reduce the loss per share or increase the income per share, net income applicable to common shares is not adjusted by the associated preferred dividends.

ITEM 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of financial condition as of September 30, 2016 compared with December 31, 2015, and the results of operations for the three and nine month periods ended September 30, 2016, should be read in conjunction with the unaudited consolidated financial statements and notes contained in this report and the consolidated financial statements and notes contained in the Company's 2015 Annual Report on Form 10-K. This discussion contains forward-looking statements that involve risks and uncertainties and, as such, future results could differ significantly from management's current expectations. See the section of this discussion for further information on forward-looking statements.

Introduction

Wintrust is a financial holding company that provides traditional community banking services, primarily in the northern and southern Wisconsin, and operates other financing businesses on a national basis and in Canada through several subsidiaries. Additionally, Wintrust offers a full array of wealth management services primarily to customers in the Chicago metropolitan area and southern Wisconsin.

Overview

Third Quarter Highlights

The Company recorded net income of \$53.1 million for the third quarter of 2016 compared to \$38.4 million in the third quarter of 2015. The results for the third quarter of 2016 demonstrate continued momentum on our operating strengths including organic growth driving higher net interest income, higher mortgage banking and wealth management revenue, increased fee income and improving credit quality metrics.

The Company increased its loan portfolio, excluding covered loans and mortgage loans held-for-sale, from \$16.1 billion at December 31, 2015 and \$17.1 billion at December 31, 2015 to \$19.1 billion at September 30, 2016. The increase in the current quarter compared to prior quarters was primarily a result of the Company's commercial banking initiative, growth in the commercial and life insurance premium finance receivables portfolios and the acquisition of Generations and performing loans acquired from an affiliate of GE Capital Franchise Finance. The Company is focused on making new loans, including residential mortgage and commercial real estate sector, where opportunities that meet our underwriting standards exist. For more information on changes in the Company's loan portfolio, see "Financial Condition – Interest Earning Assets" and Note 6 "Loans" in the Consolidated Financial Statements in Item 1 of this report.

Management considers the maintenance of adequate liquidity to be important to the management of risk. During the third quarter of 2016, the Company continued its practice of maintaining appropriate funding capacity to provide the Company with adequate liquidity for ongoing operations. In this regard, the Company benefited from its strong deposit base, a liquid short-term investment portfolio, and access to funding from a variety of external funding sources. At September 30, 2016, the Company had approximately \$1.5 billion of overnight liquid funds and interest-bearing deposits with banks.

The Company recorded net interest income of \$184.6 million in the third quarter of 2016 compared to \$165.5 million in the third quarter of 2015. The higher level of net interest income recorded in the third quarter of 2016 compared to the third quarter of 2015 was primarily from a \$2.6 billion increase in average loans, excluding covered loans. The increase in average loans was partially offset by a eight basis point decline in the yield on earning assets, on a fully tax-equivalent basis and a 10 basis point increase in the rate on interest bearing liabilities (see "Net Interest Income" for further detail).

Non-interest income totaled \$86.6 million in the third quarter of 2016, an increase of \$21.7 million, or 33%, compared to the third quarter of 2015. The increase in the third quarter of 2016 compared to the third quarter of 2015 was primarily attributable to higher revenue from banking and wealth management revenue, higher gains on sales of investment securities, increased operating lease revenue, higher service charges on deposits and fees from covered call options and higher BOLI income (see “Non-Interest Income” for further detail).

Non-interest expense totaled \$176.6 million in the third quarter of 2016, increasing \$16.6 million, or 10%, compared to the third quarter of 2015. The increase compared to the third quarter of 2015 was primarily attributable to higher salary and employee benefits expense by the addition of employees from the various acquisitions, and higher staffing levels as the Company grows, increased depreciation expense, including operating lease equipment depreciation, higher OREO expenses and professional fees (see “Non-Interest Expense” for further detail).

Table of Contents

Announced Acquisitions

On July 6, 2016, the Company announced the signing of a definitive agreement to acquire First Community Financial ("FCFC"). FCFC is the parent company of First Community Bank, an Illinois state-chartered bank, which operates in Elgin, Illinois. As of September 30, 2016, First Community Bank had approximately \$172 million in assets, \$147 million in loans and approximately \$147 million in deposits.

RESULTS OF OPERATIONS

Earnings Summary

The Company's key operating measures for the three and nine months ended September 30, 2016, as compared to the same periods of the prior year, are shown below:

| (Dollars in thousands, except per share data) | Three months ended | | Percentage (%) or Basis Point (bp) Change | |

(1) Net revenue is net interest income plus non-interest income.

(2) See following section titled, "Supplementary Financial Measures/Ratios" for additional information on this

(3) The net overhead ratio is calculated by netting total non-interest expense and total non-interest income, annualizing the net overhead ratio, and then dividing by that period's total average assets. A lower ratio indicates a higher degree of efficiency.

(4) The allowance for credit losses includes both the allowance for loan losses and the allowance for lending-related losses.

Certain returns, yields, performance ratios, and quarterly growth rates are "annualized" in this presentation and represent an annual time period. This is done for analytical purposes to better discern for decision-making purposes.

Table of Contents

underlying performance trends when compared to full-year or year-over-year amounts. For example, balance sheet growth is often expressed in terms of an annual rate. As such, 5% growth during a quarter would represent an annualized growth rate of 20%.

SUPPLEMENTAL FINANCIAL MEASURES/RATIOS

The accounting and reporting policies of Wintrust conform to generally accepted accounting principles (“GAAP”) and prevailing practices in the banking industry. However, certain non-GAAP performance measures and ratios are used to evaluate and measure the Company’s performance. These include taxable-equivalent net interest income (including its individual components), net interest margin (including its individual components), the efficiency ratio, tangible common equity ratio, tangible common book value per share and return on average tangible common equity. Management believes that these measures provide users of the Company’s financial information a more meaningful view of the performance of the interest-bearing liabilities and of the Company’s operating efficiency. Other financial holding companies may use different measures and ratios differently.

Management reviews yields on certain asset categories and the net interest margin of the Company and its bank subsidiaries on a taxable-equivalent (“FTE”) basis. In this non-GAAP presentation, net interest income is adjusted to reflect tax-equivalent before-tax basis. This measure ensures comparability of net interest income arising from both tax-exempt and taxable sources. Net interest income on a FTE basis is also used in the calculation of the Company’s efficiency ratio. The efficiency ratio is calculated by dividing non-interest expense by total taxable-equivalent net revenue (less securities gains or losses) to produce one dollar of revenue. Securities gains or losses are excluded from this calculation to better measure operating costs to operational expenses. Management considers the tangible common equity ratio and tangible book value per share as useful measurements of the Company’s equity. The Company references the return on average tangible common equity as a measurement of profitability.

Table of Contents

A reconciliation of certain non-GAAP performance measures and ratios used by the Company to evaluate and performance to the most directly comparable GAAP financial measures is shown below:

Critical Accounting Policies

The Company's Consolidated Financial Statements are prepared in accordance with GAAP in the United States and the banking industry. Application of these principles requires management to make estimates, assumptions, and amounts reported in the financial statements and accompanying notes. Certain policies and accounting principles require greater reliance on the use of estimates, assumptions and judgments, and as such have a greater possibility that estimates and assumptions could produce financial results that are materially different than originally reported. Estimates and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in value is carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, when an asset or liability needs to be recorded contingent upon a future event, are based on information available as of the date of the financial statements; accordingly, as information changes, the financial statements could reflect different estimates and assumptions. Management currently views critical accounting policies to be those which are highly dependent on subjective or complex judgments, assumptions, and where changes in those estimates and assumptions could have a significant impact on the financial statements. Management currently views critical accounting policies to include the determination of the allowance for loan losses, covered loan losses and the allowance for losses on lending-related commitments, loans acquired with evidence of deterioration since origination, estimations of fair value, the valuations required for impairment testing of good will, accounting for derivative instruments and income taxes as the accounting areas that require the most subjective judgments and as such could be most subject to revision as new information becomes available. For a more detailed discussion of critical accounting policies, see "Summary of Critical Accounting Policies" beginning on page 55 of the Company's 2016 Annual Report.

Net Income

Net income for the quarter ended September 30, 2016 totaled \$53.1 million, an increase of \$14.8 million, or 38% from the quarter of 2015. On a per share basis, net income for the third quarter of 2016 totaled \$0.92 per diluted common share, an increase from \$0.67 per diluted common share in the third quarter of 2015.

The most significant factors impacting net income for the third quarter of 2016 as compared to the same period of 2015 were an increase in net interest income as a result of growth in earning assets, gains on sales of investment securities, mortgage banking income, and an increase in mortgage banking revenue. These improvements were offset by an increase in non-interest expense attributable to higher salary and employee benefit costs caused by the addition of employees from the various divisions to staffing levels as the Company grows and increased equipment expense, including operating lease equipment depreciation.

Net Interest Income

The primary source of the Company's revenue is net interest income. Net interest income is the difference between interest income on earnings assets, such as loans and securities, and interest expense on the liabilities to fund those assets, including deposits and other borrowings. The amount of net interest income is affected by both changes in the level of interest income and composition of earning assets and interest bearing liabilities.

Table of Contents

Quarter Ended September 30, 2016 compared to the Quarters Ended June 30, 2016 and September 30, 2015

The following table presents a summary of the Company's net interest income and related net interest margin, on a fully taxable equivalent basis, for the third quarter of 2016 as compared to the second quarter of 2016 (sequential) and the third quarter of 2015 (linked quarters):

| (Dollars in thousands) | Average Balance for three months ended, | | September 30, 2015 | Interest for three months ended, | | | Yield for three months ended, September 30, 2015 |

| Less: Fully tax-equivalent adjustment | | | | (1,556) | (1,463) | (1,197) | (0.0) |
| Net free funds/contribution ⁽⁶⁾ | \$6,656,545 | \$6,104,184 | \$5,294,876 | | | | 0.1 |
| Net interest income/margin ⁽⁷⁾ (GAAP) | | | | \$184,636 | \$175,270 | \$165,540 | 3.2 |
| Fully tax-equivalent adjustment | | | | 1,556 | \$1,463 | \$1,197 | 0.0 |
| Net interest income/margin - FTE ⁽⁷⁾ | | | | \$186,192 | \$176,733 | \$166,737 | 3.2 |

(1)

Liquidity management assets include available-for-sale and held-to-maturity securities, interest earning deposits, funds sold and securities purchased under resale agreements.

- Interest income on tax-advantaged loans, trading securities and securities reflects a tax-equivalent adjustment for a (1) federal corporate tax rate of 35%. The total adjustments for the three months ended September 30, 2016, June 30, 2016 and September 30, 2015 were \$1.6 million, \$1.5 million and \$1.2 million respectively.
- (2) Other earning assets include brokerage customer receivables and trading account securities.
 - (3) Loans, net of unearned income, include loans held-for-sale and non-accrual loans.
 - (4) Interest rate spread is the difference between the yield earned on earning assets and the rate paid on interest-bearing liabilities.
 - (5) Net free funds are the difference between total average earning assets and total average interest-bearing liabilities.
 - (6) Contribution to net interest margin from net free funds is calculated using the rate paid for total interest-bearing assets.
 - (7) See “Supplemental Financial Measures/Ratios” for additional information on this performance ratio.

For the third quarter of 2016, net interest income totaled \$184.6 million, an increase of \$9.4 million as compared to the second quarter of 2016 and an increase of \$19.1 million as compared to the third quarter of 2015. Net interest margin was 3.21% (3.24% on a tax-equivalent basis) during the third quarter of 2016 compared to 3.24% (3.27% on a fully tax-equivalent basis) during the second quarter of 2016 and 3.31% (3.33% on a fully tax-equivalent basis) during the third quarter of 2015. The reduction in net interest margin compared to the second quarter of 2016 is primarily the result of a decline in yields on mortgage-backed securities and an increase in premium amortization. In the third quarter of 2016, \$1.8 million of premium amortization was accelerated due to the maturity of underlying security, compared to \$751,000 in the second quarter of 2016.

Table of Contents

Nine months ended September 30, 2016 compared to nine months ended September 30, 2015

The following table presents a summary of the Company's net interest income and related net interest margin, on a fully taxable equivalent basis, for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015.

| (Dollars in thousands) | Average Balance | | Interest | | Yield/R |
|--|--|--|--|--|--|

| Junior subordinated notes | 254,935 | 254,710 | 6,973 | 6,034 | 3.59 |
| Total interest-bearing liabilities | \$15,691,014 | \$14,132,955 | \$66,029 | \$ 56,654 | 0.56 % |
| Non-interest bearing deposits | 5,244,552 | 3,931,194 | | | |
| Other liabilities | 410,906 | 328,391 | | | |
| Equity | 2,502,940 | 2,194,384 | | | |
| Total liabilities and shareholders' equity | \$23,849,412 | \$ 20,586,924 | | | |
| Interest rate spread ⁽⁵⁾⁽⁷⁾ | | | | | 3.12 % |
| Less: Fully tax-equivalent adjustment | | | (4,454) | (3,400) | (0.02) |
| Net free funds/contribution ⁽⁶⁾ | \$6,182,790 | \$4,731,693 | | | 0.15 |
| Net interest income/ margin ⁽⁷⁾ (GAAP) | | | \$531,415 | \$ 474,323 | 3.25 % |
| Fully tax-equivalent adjustment | | | 4,454 | 3,400 | 0.02 |
| Net interest income/ margin - FTE ⁽⁷⁾ | | | \$535,869 | \$ 477,723 | 3.27 % |

(1) Liquidity management assets include available-for-sale and held-to-maturity securities, interest earning deposits, and securities sold and securities purchased under resale agreements.

Interest income on tax-advantaged loans, trading securities and securities reflects a tax-equivalent adjustment.

(2) federal corporate tax rate of 35%. The total adjustments for the nine months ended September 30, 2016 and 2015 were \$4.5 million and \$3.4 million respectively.

(3) Other earning assets include brokerage customer receivables and trading account securities.

(4) Loans, net of unearned income, include loans held-for-sale and non-accrual loans.

(5) Interest rate spread is the difference between the yield earned on earning assets and the rate paid on interest-bearing liabilities.

(6) Net free funds are the difference between total average earning assets and total average interest-bearing liabilities. Contribution to net interest margin from net free funds is calculated using the rate paid for total interest-bearing liabilities.

(7) See "Supplemental Financial Measures/Ratios" for additional information on this performance ratio.

For the first nine months of 2016, net interest income totaled \$531.4 million, an increase of \$57.1 million as compared to the first nine months of 2015. Net interest margin was 3.25% (3.27% on a fully tax-equivalent basis) for the first nine months of 2016, compared to 3.36% (3.39% on a fully tax-equivalent basis) for the same period of 2015. The reduction in net interest margin for the first nine months of 2016 is primarily the result of a decline in loan yields, including less accretion recognized on purchases of securities, and an increase in the rate of interest bearing liabilities.

Table of Contents

Analysis of Changes in Net Interest Income (GAAP)

The following table presents an analysis of the changes in the Company's net interest income comparing the third quarter ended September 30, 2016 to June 30, 2016 and September 30, 2015, and the nine month periods ended September 30, 2016 and September 30, 2015. The reconciliations set forth the changes in the GAAP-derived net interest income as a result of changes in interest rates and differing number of days in each period:

| (Dollars in thousands) | Third Quarter of 2016 Compared to Second Quarter of 2016 | Third Quarter of 2016 Compared to Third Quarter of 2015 |
|--|---|--|
| Net interest income (GAAP) for comparative period | \$175,270 | \$165,540 |

NM - Not Meaningful

Notable contributions to the change in non-interest income are as follows:

The increase in wealth management revenue during the current periods as compared to the same periods of 2015 is primarily due to growth in assets under management due to new customers. Wealth management revenue is comprised of the management revenue of The Chicago Trust Company and Great Lakes Advisors and the brokerage commission and insurance product commissions at Wayne Hummer Investments Investments, LLC ("WHI").

The increase in mortgage banking revenue in the current periods compared to the prior year periods is primarily due to higher volumes during the current year. Mortgage loans originated or purchased for sale totaled \$1.3 billion in the current period compared to \$973.7 million in the third quarter of 2015. On a year-to-date basis, mortgage loans originated or purchased for sale totaled \$3.1 billion in the first nine months of 2016 compared to \$3.1 billion for the same period of 2015. This increase in revenue in the current period was partly offset by a \$2.5 million negative fair value adjustment on MSR as a result of actual prepayments in the current period higher than higher projected prepayment speeds. Mortgage banking revenue includes revenue from activities related to originating and servicing residential real estate loans for the secondary market. Mortgage revenue is also impacted by changes in the fair value of MSR as the Company does not hedge this change in fair value. The Company typically originates mortgage loans held for sale and MSR either retained or released. The Company records MSR at fair value on a recurring basis.

Table of Contents

The table below presents additional selected information regarding mortgage banking revenue for the respective

| (Dollars in thousands) | Three months ended | | Nine Months Ended | |

| (B) Production revenue ⁽¹⁾ | \$ 32,889 | \$ 27,211 | \$ 85,040 | \$ 90,640 |
| Production margin (B/A) | 2.61 | % 2.79 | % 2.65 | % 2.93 |
| (C) Loans serviced for others | \$ 1,508,469 | \$ 853,286 | | |
| (D) MSRs, at fair value | 13,901 | 7,875 | | |
| Percentage of MSRs to loans serviced for others (D/C) | 0.92 | % 0.92 | % | |

(1) Production revenue represents revenue earned from the origination and subsequent sale of mortgages sold and fees from originations, processing and other related activities, and excludes servicing fees, cost of servicing rights and changes to the mortgage recourse obligation.

The increase in service charges on deposit accounts in the current quarter is mostly a result of higher account activity on deposit accounts which have increased as a result of the Company's commercial banking initiative as well as additional deposit accounts from acquired institutions.

The increase in net gains on investment securities in the current quarter primarily relate to the sales and calls of investment securities that were held in the Company's investment securities portfolio.

The Company has typically written call options with terms of less than three months against certain U.S. Treasury securities held in its portfolio for liquidity and other purposes. Management has effectively entered into these transactional call options economically hedging security positions and enhancing its overall return on its investment portfolio by using covered call options to compensate for net interest margin compression. These option transactions are designed to mitigate credit risk and do not qualify as hedges pursuant to accounting guidance. Fees from covered call options decreased in the current quarter compared to the same period of 2015 primarily as a result of selling call options against a smaller value of underlying securities. The premiums received by the Company. There were no outstanding call option contracts at September 30, 2016 and September 30, 2015.

The increase in operating lease income in the current quarter compared to the prior year quarters is primarily due to income from the Company's leasing divisions.

The increase in other non-interest income during the first nine months of 2016 as compared to the same period of 2015 is primarily due to the gain on extinguishment of junior subordinated debentures, higher swap fee revenues resulting from interest rate swaps related to both customer-based trades and the related matched trades with inter-bank dealer counterparties, gain on the purchase and sale of certain assets and income from investments in partnerships and other investments, partially offset by a decrease in income on BOLI.

Notable contributions to the change in non-interest expense are as follows:

Salaries and employee benefits expense increased in the current periods compared to the same periods of 2015 addition of employees from acquisitions, increased staffing as the Company grows, higher commissions and in

65

Table of Contents

compensation on variable pay based arrangements and an increase in employee benefits (primarily health plan

Operating lease equipment depreciation increased in the current quarter and year-to-date periods compared to t
a result of growth in business from the Company's leasing divisions.

Income Taxes

The Company recorded income tax expense of \$31.9 million for the three months ended September 30, 2016, c
for same period of 2015. Income tax expense was \$91.3 million and \$74.1 million for the nine months ended S
2015, respectively. The effective tax rates were 37.6% and 38.3% for the third quarters of 2016 and 2015, respo
37.9% for the 2016 and 2015 year-to-date periods, respectively.

Operating Segment Results

As described in Note 12 to the Consolidated Financial Statements in Item 1, the Company's operations consist
community banking, specialty finance and wealth management. The Company's profitability is primarily depe
income, provision for credit losses, non-interest income and operating expenses of its community banking segm
internal segment profitability, management allocates certain intersegment and parent company balances. Mana
of revenues to the specialty finance segment related to loans and leases originated by the specialty finance segm
to the community banking segment. Similarly, for purposes of analyzing the contribution from the wealth mana
management allocates a portion of the net interest income earned by the community banking segment on depos
the wealth management segment to the wealth management segment. Finally, expenses incurred at the Wintrus
allocated to each segment based on each segment's risk-weighted assets.

The community banking segment's net interest income for the quarter ended September 30, 2016 totaled \$150.
\$132.5 million for the same period in 2015, an increase of \$17.6 million, or 13%. On a year-to-date basis, net i
segment increased by \$51.9 million from \$382.2 million for the first nine months of 2015 to \$434.1 million for
2016. The increase in both the three and nine month periods is primarily attributable to growth in earning asset
in acquisitions. The community banking segment's non-interest income totaled \$62.7 million in the third quarte
\$17.2 million, or 38%, when compared to the third quarter of 2015 total of \$45.6 million. On a year-to-date bas
totaled \$169.2 million for the first nine months of 2016, an increase of \$22.5 million, or 15%, compared to \$14
months ended September 30, 2015. The increase in non-interest income in the quarter and year-to-date periods
to higher service charges on deposit accounts and increased realized gains on investment securities as well as a
extinguishment of debt and higher mortgage banking revenue on a year-to-date basis. The community banking
the quarter ended September 30, 2016 totaled \$37.5 million, an increase of \$14.8 million as compared to net in
of 2015 of \$22.7 million. On a year-to-date basis, the community banking segment's net income was \$106.9 mi
months of 2016 as compared to \$76.8 million for the first nine months of 2015.

The specialty finance segment's net interest income totaled \$25.5 million for the quarter ended September 30, 2
million for the same period in 2015, an increase of \$886,000, or 4%. On a year-to-date basis, net interest incom
million in the first nine months of 2016 as compared to the first nine months of 2015. The increase during both
attributable to growth in earning assets. The specialty finance segment's non-interest income totaled \$12.2 mill
three month periods ending September 30, 2016 and 2015, respectively. On a year-to-date basis, non-interest in
million in the first nine months of 2016 as compared to the first nine months of 2015. The increase in non-inter
year periods is primarily the result of higher originations and increased balances related to the life insurance pr
well as increased leasing activity since the prior year periods. Our commercial premium finance operations, life
operations, lease financing operations and accounts receivable finance operations accounted for 47%, 33%, 13%
the total revenues of our specialty finance business for the nine month period ending September 30, 2016. The
finance segment for the quarter ended September 30, 2016 totaled \$12.8 million as compared to \$12.5 million

September 30, 2015. On a year-to-date basis, the net income of the specialty finance segment for the nine months ended September 30, 2016 totaled \$36.3 million as compared to \$34.9 million for the nine months ended September 30, 2015.

The wealth management segment reported net interest income of \$4.8 million for the third quarter of 2016 compared to the same quarter of 2015. On a year-to-date basis, net interest income totaled \$13.7 million for the first nine months of 2016 compared to \$12.8 million for the first nine months of 2015. Net interest income for this segment is primarily comprised

Table of Contents

of an allocation of the net interest income earned by the community banking segment on non-interest bearing a management customer account balances on deposit at the banks. Wealth management customer account balance averaged \$987.8 million and \$892.4 million in the first nine months of 2016 and 2015, respectively. This segment's net interest income of \$20.0 million for the third quarter of 2016 compared to \$18.4 million for the third quarter of 2015. The wealth management segment's non-interest income totaled \$58.7 million during the first nine months of 2016 and \$57.5 million in the first nine months of 2015. Distribution of wealth management services through each bank continues to increase for the Company as the number of financial advisors in its banks continues to increase. The Company is committed to the wealth management segment in order to better service its customers and create a more diversified revenue stream. The wealth management segment's net income totaled \$2.8 million for the third quarter of 2016 compared to \$3.1 million for the third quarter of 2015. On a year-to-date basis, the wealth management segment's net income totaled \$9.1 million and \$9.5 million for the nine months ended September 30, 2016 and 2015, respectively. The reduction in net income in the current periods compared to the prior periods is primarily due to a \$1.5 million adverse arbitration award relating to a previously disclosed claim arising out of the hiring of a financial advisor by WHI.

Financial Condition

Total assets were \$25.3 billion at September 30, 2016, representing an increase of \$3.3 billion, or 15%, when compared to June 30, 2015 and an increase of approximately \$901.1 million, or 15% on an annualized basis, when compared to June 30, 2016, which includes deposits, all notes and advances, including secured borrowings and the junior subordinated debt. Total liabilities were \$14.0 billion at September 30, 2016, \$21.3 billion at June 30, 2016, and \$19.3 billion at September 30, 2015. See Notes 5, 6, and 7 to the Consolidated Financial Statements presented under Item 1 of this report for additional period-end detail on the assets and funding liabilities.

Interest-Earning Assets

| Total average earning assets to total average assets | | 92 % | | 92 % |

(1) Includes mortgage loans held-for-sale

(2) Includes loans held-for-sale and non-accrual loans

(3) Liquidity management assets include investment securities, other securities, interest earning deposits with banks and securities purchased under resale agreements

(4) Other earning assets include brokerage customer receivables and trading account securities

Loans. Average total loans, net of unearned income, totaled \$19.2 billion in the third quarter of 2016, increasing from the third quarter of 2015 and \$859.1 million, or 19% on an annualized basis, from the second quarter of 2016. Commercial and commercial real estate loan categories comprised 59% and 57% of the average loan portfolio in the third quarter of 2016 and 2015, respectively. Growth realized in these categories for the third quarter of 2016 as compared to the

67

Table of Contents

sequential and prior year periods is primarily attributable to the various bank acquisitions and increased business

Home equity loan portfolio averaged \$751.8 million in the third quarter of 2016, and decreased \$28.1 million, or 3.7%, from a balance of \$779.9 million in same period of 2015. The Company has been actively managing its home equity portfolio through diligent pricing, appraisal and other underwriting activities continue to exist. The Company has not sacrificed underwriting standards when originating new home equity loans.

Residential real estate loans averaged \$1.2 billion in the third quarter of 2016, and increased \$212.5 million, or 18.1%, from a balance of \$952.5 million in same period of 2015. Additionally, compared to the quarter ended June 30, 2016, residential real estate loans increased \$140.6 million, or 55% on an annualized basis. The residential real estate loan category includes mortgage loans. By selling residential mortgage loans into the secondary market, the Company eliminates the interest-rate risk associated with these loans as they are predominantly long-term fixed rate loans, and provides a source of non-interest revenue.

Average premium finance receivables totaled \$5.7 billion in the third quarter of 2016, and accounted for 30% of the total loans. The increase during 2016 compared to both the second quarter of 2016 and the third quarter of 2015 was due to continued originations within the portfolio due to the effective marketing and customer servicing. Approximately \$1.6 billion of premium finance receivables were originated in the third quarter of 2016 compared to \$1.6 billion during the same period of 2015. Premium finance receivables consist of a commercial portfolio and a life portfolio comprising approximately 44% and 56%, respectively, of the average total balance of premium finance receivables for the third quarter of 2016, and 49% and 51%, respectively, of 2015.

Other loans represent a wide variety of personal and consumer loans to individuals as well as high-yielding short-term receivable financing to clients in the temporary staffing industry located throughout the United States. Consumer loans have shorter terms and higher interest rates than mortgage loans but generally involve more credit risk due to the typically less collateral. Additionally, short-term accounts receivable financing may also involve greater credit risks than general loan portfolios of more traditional community banks depending on the marketability of the collateral.

Covered loans represent loans acquired through the nine FDIC-assisted transactions, all of which occurred prior to 2015 and are subject to loss sharing agreements with the FDIC. The FDIC has agreed to reimburse the Company for 80% of the cost of purchased loans, foreclosed real estate, and certain other assets. The Company expects the covered loan portfolio to increase as these acquired loans are paid off and as loss sharing agreements expire. See Note 3 of the Consolidated Financial Statements under Item 1 of this report for a discussion of these acquisitions, including the aggregation of these loans by risk category and determining the initial and subsequent fair value.

Liquidity management assets. Funds that are not utilized for loan originations are used to purchase investment grade securities, money market investments, to sell as federal funds and to maintain in interest bearing deposits with banks. The amount of liquidity can fluctuate based on management's ongoing effort to manage liquidity and for asset liability management purposes.

Other earning assets. Other earning assets include brokerage customer receivables and trading account securities. In the securities business, WHI activities involve the execution, settlement, and financing of various securities transactions. WHI activities are transacted on either a cash or margin basis. In margin transactions, WHI, under an agreement with an outsourced firm, extends credit to its customers, subject to various regulatory and internal margin requirements, collateralized by securities in customer's accounts. In connection with these activities, WHI executes and the out-sourced firm clears customer orders for the sale of securities not yet purchased, substantially all of which are transacted on a margin basis subject to internal margin requirements. Such transactions may expose WHI to off-balance-sheet risk, particularly in volatile trading markets where margin requirements are not sufficient to fully cover losses that customers may incur. In the event a customer fails to settle its obligations under the agreement with the outsourced securities firm, WHI may be required to purchase or sell financial instruments at market prices to fulfill the customer's obligations. WHI seeks to control the risks associated with its customers' activities by maintaining margin collateral in compliance with various regulatory and internal guidelines. WHI monitors requirements

and, pursuant to such guidelines, requires customers to deposit additional collateral or to reduce positions when

| Total average assets | \$23,849,412 | | \$20,586,924 | |
| Total average earning assets to total average assets | | 92 % | | 92 % |

(1) Includes mortgage loans held-for-sale

(2) Includes loans held-for-sale and non-accrual loans

(3) Liquidity management assets include investment securities, other securities, interest earning deposits with banks and securities purchased under resale agreements

(4) Other earning assets include brokerage customer receivables and trading account securities

Total average loans for the first nine months ended 2016 increased \$2.5 billion or 15% over the previous year period. As discussed in the quarterly discussion above, approximately \$872.4 million of this increase relates to the commercial portfolio, \$1.1 billion of this increase relates to the commercial real estate portfolio and \$600.2 million of this increase relates to the premium finance portfolio. The increase is partially offset by a decrease of \$79.6 million in covered loans.

⁽¹⁾ PCI loans represent loans acquired with evidence of credit quality deterioration since origination, in accordance with regulatory requirements. Loan agings are based upon contractually required payments.

We make commercial loans for many purposes, including working capital lines, which are generally renewable by business assets, personal guarantees and additional collateral. Commercial business lending is generally considered to have a slightly higher degree of risk than traditional consumer bank lending. Primarily as a result of growth in the commercial loan portfolio, the allowance for loan losses in our commercial loan portfolio is \$43.0 million as of September 30, 2016 compared to \$43.0 million as of September 30, 2015.

Table of Contents

Our commercial real estate loans are generally secured by a first mortgage lien and assignment of rents on the property. Bank branches are located in the Chicago metropolitan area and southern Wisconsin, 89.7% of our commercial real estate loans are located in this region as of September 30, 2016. While commercial real estate market conditions have improved in some specific markets continue to be under stress. We have been able to effectively manage our total non-performing commercial real estate loans. As of September 30, 2016, our allowance for loan losses related to this portfolio is \$48.3 million compared to \$48.3 million as of September 30, 2015.

The Company also participates in mortgage warehouse lending by providing interim funding to unaffiliated mortgage bankers for residential mortgages originated by such bankers for sale into the secondary market. The Company's loans to mortgage bankers are secured by the business assets of the mortgage companies as well as the specific mortgage loans funded by the mortgage bankers. All loans have been pre-approved for purchase by third party end lenders. The Company may also provide interim financing for mortgage bankers' loans on a bulk basis in circumstances where the mortgage bankers desire to competitively bid on a number of mortgage loans as a package in the secondary market. Amounts advanced with respect to any particular mortgage loan are usually repaid within 21 days. In the current period, mortgage warehouse lines increased to \$309.6 million as of September 30, 2016 compared to \$298.1 million as of September 30, 2015.

Home equity loans. Our home equity loans and lines of credit are originated by each of our banks in their local markets. Our banks have a strong understanding of the underlying real estate value. Our banks monitor and manage these loans, and we conduct a periodic review of all home equity loans and lines of credit at least twice per year. This review collects current credit information from the equity borrower and identifies situations where the credit strength of the borrower is declining, or where there are other factors that may influence repayment, such as tax liens or judgments. Our banks use this information to manage loans that may be at risk and determine whether to obtain additional credit information or updated property valuations.

The rates we offer on new home equity lending are based on several factors, including appraisals and valuation of the underlying property, which reflect inherent risk, and we place additional scrutiny on larger home equity requests. In a limited number of cases, we may offer credit together with first mortgage financing, and requests for such financing are evaluated on a combined basis. Our home equity loans advance more than 85% of the appraised value of the underlying asset, which ratio we refer to as the loan-to-value ratio. The majority of the credit we previously extended, when issued, had an LTV ratio of less than 80%.

Our home equity loan portfolio has performed well in light of the ongoing volatility in the overall residential real estate market.

Residential real estate mortgages. Our residential real estate portfolio predominantly includes one- to four-family residential mortgages that have repricing terms generally from one to three years, construction loans to individuals and brick-and-mortar qualifying customers. As of September 30, 2016, our residential loan portfolio totaled \$663.6 million, or 3% of our total loans.

Our adjustable rate mortgages relate to properties located principally in the Chicago metropolitan area and southern Wisconsin, including vacation homes owned by local residents. These adjustable rate mortgages are often non-agency conforming. Adjustable rate mortgages decrease the interest rate risk we face on our mortgage portfolio. However, this risk is not eliminated due to the fact that adjustable rate mortgages generally provide for periodic and lifetime limits on the interest rate adjustments among other features. Additionally, adjustable rate mortgages may pose a higher risk of delinquency and default because they require borrowers to make larger payments in periods of rising interest rates. As of September 30, 2016, \$12.2 million of our residential real estate mortgages, or 1.8% of our residential real estate mortgage portfolio, were classified as nonaccrual, \$1.5 million were 90 or more days past due and still accruing (0.2%), \$3.3 million were 30 to 89 days past due (0.5%) and \$646.6 million were current (97.5%). We believe that since our loan portfolio consists primarily of adjustable rate mortgages, and since the majority of our borrowers are longer-term customers with lower LTV ratios, we face a relatively low risk of default and delinquency.

While we generally do not originate loans for our own portfolio with long-term fixed rates due to interest rate risk, we do accommodate customer requests for fixed rate loans by originating such loans and then selling them into the secondary market where we receive fee income. We may also selectively retain certain of these loans within the banks' own portfolios.

conforming, or where the terms of the loans make them favorable to retain. A portion of the loans we sold into the secondary market were sold with the servicing of those loans retained. The amount of loans serviced for others as of September 30, 2016, was \$1.4 billion and \$853.3 million, respectively. All other mortgage loans sold into the secondary market were sold without servicing rights.

It is not our current practice to underwrite, and we have no plans to underwrite, subprime, Alt A, no or little documentation, or option ARM loans. As of September 30, 2016, approximately \$4.8 million of our mortgage loans consist of interest-only loans.

Premium finance receivables – commercial. FIFC and FIFC Canada originated approximately \$1.4 billion in commercial premium finance receivables during both the third quarter of 2016 and 2015. During both the nine months ended September 30, 2016 and 2015, we originated approximately \$1.4 billion in commercial premium finance receivables.

71

Table of Contents

2016 and 2015, FIFC and FIFC Canada originated approximately \$4.3 billion in commercial insurance premiums and FIFC Canada make loans to businesses to finance the insurance premiums they pay on their commercial insurance. These loans are originated by working through independent medium and large insurance agents and brokers located throughout the United States and Canada. The insurance premiums financed are primarily for commercial customers' purchases of liability, property and casualty commercial insurance.

This lending involves relatively rapid turnover of the loan portfolio and high volume of loan originations. Because of this lending through third party agents and brokers and because the borrowers are located nationwide and in many jurisdictions, it is more susceptible to third party fraud than relationship lending. The Company performs ongoing credit and other due diligence through agents and brokers, and performs various internal audit steps to mitigate against the risk of any fraud. The majority of these loans are originated by the banks in order to more fully utilize their lending capacity as these loans generally provide the banks with alternative investments.

Premium finance receivables—life insurance. FIFC originated approximately \$274.1 million in life insurance premiums in the third quarter of 2016 as compared to \$206.9 million of originations in the third quarter of 2015. For the months ended September 30, 2016 and 2015, FIFC originated approximately \$754.7 million and \$596.2 million, respectively, of premium finance receivables. The Company continues to experience increased competition and pricing pressure within this market. These loans are originated directly with the borrowers with assistance from life insurance carriers, independent insurance brokers, advisors and legal counsel. The life insurance policy is the primary form of collateral. In addition, these loans are secured by a letter of credit, marketable securities or certificates of deposit. In some cases, FIFC may make a loan that has a first lien position.

Consumer and other. Included in the consumer and other loan category is a wide variety of personal and consumer loans, as well as high yielding short-term accounts receivable financing to clients in the temporary staffing industry located throughout the United States. The Banks originate consumer loans in order to provide a wider range of financial services to their customers.

Consumer loans generally have shorter terms and higher interest rates than mortgage loans but generally involve less risk than mortgage loans due to the type and nature of the collateral. Additionally, short-term accounts receivable financing involves greater credit risks than generally associated with the loan portfolios of more traditional community banks due to the nature of the collateral.

Covered loans. Covered loans represent loans acquired through the nine FDIC-assisted transactions, all of which were completed in 2015. These loans are subject to loss sharing agreements with the FDIC. The FDIC has agreed to reimburse the Company for losses incurred on the purchased loans, foreclosed real estate, and certain other assets. The Company expects the covered loans to continue to decrease as these acquired loans are paid off and as loss sharing agreements expire. See Note 3 of the Financial Statements presented under Item 1 of this report for a discussion of these acquisitions, including the aggregation of similar loans when determining the initial and subsequent fair value.

Table of Contents

Maturities and Sensitivities of Loans to Changes in Interest Rates

The following table classifies the commercial loan portfolios at September 30, 2016 by date at which the loans type of rate exposure:

| As of September 30, 2016 (Dollars in thousands) | One year or less | From one to five years | Over five years | Total |
|---|---------------------|------------------------------|--------------------|--------------|
| Commercial | | | | |

| Total premium finance receivables ⁽¹⁾ | \$ 5,623,563 | \$ 89,644 | \$ 385 | \$ 5,713,592 |

Past Due Loans and Non-Performing Assets

Our ability to manage credit risk depends in large part on our ability to properly identify and manage problem loans. Our Company operates a credit risk rating system under which our credit management personnel assign a credit risk rating at the time of origination and review loans on a regular basis to determine each loan's credit risk rating on a scale of 1 to 8, with 1 indicating the lowest risk and 8 indicating the highest risk. The credit risk rating structure used is shown below:

- 1 Rating — Minimal Risk (Loss Potential – none or extremely low) (Superior asset quality, excellent liquidity, strong leverage capacity)
- 2 Rating — Modest Risk (Loss Potential demonstrably low) (Very good asset quality and liquidity, strong leverage capacity)
- 3 Rating — Average Risk (Loss Potential low but no longer refutable) (Mostly satisfactory asset quality and liquidity, moderate leverage capacity)
- 4 Rating — Above Average Risk (Loss Potential variable, but some potential for deterioration) (Acceptable asset quality, moderate liquidity, modest leverage capacity)
- 5 Rating — Management Attention Risk (Loss Potential moderate if corrective action not taken) (Generally acceptable asset quality, somewhat strained liquidity, minimal leverage capacity)
- 6 Rating — Special Mention (Loss Potential moderate if corrective action not taken) (Assets in this category are not well defined, but not to the point of substandard classification)
- 7 Rating — Substandard Accrual (Loss Potential distinct possibility that the bank may sustain some loss, but no well defined weaknesses that jeopardize the liquidation of the debt)
- 8 Rating — Substandard Non-accrual (Loss Potential well documented probability of loss, including potential for complete loss of principal and interest, well defined weaknesses that jeopardize the liquidation of the debt)

Doubtful (Loss Potential extremely high) (These assets have all the weaknesses in those classified ‘
9 Rating —characteristic that the weaknesses make collection or liquidation in full, on the basis of current exist
values, highly improbable)

10 Rating –Loss (fully charged-off) (Loans in this category are considered fully uncollectible.)
Each loan officer is responsible for monitoring his or her loan portfolio, recommending a credit risk rating for c
portfolio and ensuring the credit risk ratings are appropriate. These credit risk ratings are then ratified by the ba
and/or concurrence credit officer. Credit risk ratings are determined by evaluating a number of factors includin
strength, cash flow coverage, collateral protection and guarantees. A third party loan review firm independently

73

Table of Contents

a significant portion of the loan portfolio at each of the Company's subsidiary banks to evaluate the appropriateness of management-assigned credit risk ratings. These ratings are subject to further review at each of our bank subsidiary banks by the appropriate regulatory authority, including the FRB of Chicago, the OCC, the State of Illinois and the State of Wisconsin and by our internal audit staff.

The Company's problem loan reporting system automatically includes all loans with credit risk ratings of 6 through 9. The system is designed to provide an on-going detailed tracking mechanism for each problem loan. Once management determines that a loan has deteriorated to a point where it has a credit risk rating of 6 or worse, the Company's Managed Asset Division performs a collateral and collateral review. As part of this review, all underlying collateral is identified and the valuation methodology is reviewed. As a result of this initial review by the Company's Managed Asset Division, the credit risk rating is reviewed and if necessary, the outstanding loan balance may be deemed uncollectible or an impairment reserve may be established. The Company utilizes an independent re-appraisal of the collateral (unless such a third-party evaluation is not possible due to the nature of the collateral, such as a closely-held business or thinly traded securities). In the case of commercial real estate collateral, a third-party appraisal is ordered by the Company's Real Estate Services Group to determine if there has been any change in the collateral value. These independent appraisals are reviewed by the Real Estate Services Group and sometimes by independent valuation experts and may be adjusted depending upon market conditions. An appraisal is ordered at least once a year and more often if market conditions dictate. In the event that the underlying value of the collateral cannot be easily determined, the valuation methodology is prepared by the Managed Asset Division. A summary of this analysis is provided to the credit committee of the bank which originated the credit for approval of a charge-off, if necessary.

Through the credit risk rating process, loans are reviewed to determine if they are performing in accordance with the original terms. If the borrower has failed to comply with the original contractual terms, further action may be required by the Company, such as a downgrade in the credit risk rating, movement to non-accrual status, a charge-off or the establishment of a specific reserve. In the event a collateral shortfall is identified during the credit review process, the Company will work with the borrower to obtain a reduction and/or a pledge of additional collateral and/or additional guarantees. In the event that these options are not available, the loan may be subject to a downgrade of the credit risk rating. If we determine that a loan amount or portion thereof, is uncollectible, the credit risk rating is immediately downgraded to an 8 or 9 and the uncollectible amount is charged-off. Any loan with a charge-off continues to be assigned a credit risk rating of an 8 or 9 for the duration of time that a balance remains outstanding. The Managed Asset Division undertakes a thorough and ongoing analysis to determine if additional impairment and reserves are appropriate and to begin a workout plan for the credit to minimize actual losses.

The Company's approach to workout plans and restructuring loans is built on the credit-risk rating process. A loan with an existing credit risk rating of 6 or worse or a modification of any other credit, which will result in a credit risk rating of 6 or worse must be reviewed for TDR classification. In that event, our Managed Assets Division conducts an overall credit review. A modification of a loan is considered to be a TDR if both (1) the borrower is experiencing financial difficulty and (2) for economic or legal reasons, the bank grants a concession to a borrower that it would not otherwise consider. The Company, where the credit risk rating is 5 or better both before and after such modification is not considered to be a TDR. Under the credit risk rating system, it considers that borrowers whose credit risk rating is 5 or better are not experiencing financial difficulty and therefore, are not considered TDRs.

TDRs, which are by definition considered impaired loans, are reviewed at the time of modification and on a quarterly basis to determine if a specific reserve is needed. The carrying amount of the loan is compared to the expected payments to be received at the loan's original rate, or for collateral dependent loans, to the fair value of the collateral less the estimated cost to sell the collateral, and recorded as a specific reserve.

For non-TDR loans, if based on current information and events, it is probable that the Company will be unable to collect all amounts due to it according to the contractual terms of the loan agreement, a loan is considered impaired, and a specific impairment reserve is established. If performed and if necessary, a specific reserve is established. In determining the appropriate reserve for collateral dependent loans, the Company considers the results of appraisals for the associated collateral.

Table of Contents

Non-performing Assets, excluding covered assets

The following table sets forth Wintrust's non-performing assets and TDRs performing under the contractual terms of the loan agreement, excluding covered assets and PCI loans, as of the dates shown:

| TDRs performing under the contractual terms of the loan agreement | 29,440 | 33,310 | 42,000 |
| Total non-performing loans by category as a percent of its own respective category's period-end balance: | | | |
| Commercial | 0.28 | % 0.33 | % 0.33 |
| Commercial real estate | 0.38 | 0.42 | 0.42 |
| Home equity | 1.25 | 1.13 | 0.90 |
| Residential real estate | 1.84 | 1.90 | 1.84 |
| Premium finance receivables—commercial | 0.90 | 1.01 | 1.01 |
| Premium finance receivables—life insurance | — | — | — |
| Consumer and other | 0.50 | 0.50 | 0.50 |
| Total non-performing loans | 0.44 | % 0.48 | % 0.48 |
| Total non-performing assets, as a percentage of total assets | 0.47 | % 0.52 | % 0.52 |

Allowance for loan losses as a percentage of total non-performing loans 141.58 % 129.78 % 12

(1) As of the dates shown, no TDRs were past due greater than 90 days and still accruing interest.

(2) Non-accrual loans included TDRs totaling \$14.8 million, \$16.3 million, \$9.1 million and \$10.1 million as of June 30, 2016, December 31, 2015 and September 30, 2015 respectively.

Management is pursuing the resolution of all credits in this category. At this time, management believes reserves absorb inherent losses that are expected upon the ultimate resolution of these credits.

⁽¹⁾ Loan agings are based upon contractually required payments.

Table of Contents

As of September 30, 2016, \$49.1 million of all loans, excluding covered loans, or 0.3%, were 60 to 89 days past due and 0.4%, were 30 to 59 days (or one payment) past due. As of June 30, 2016, \$75.7 million of all loans, excluding covered loans, or 0.4%, were 60 to 89 days past due and \$90.4 million, or 0.5%, were 30 to 59 days (or one payment) past due. Many of the commercial real estate loans shown as 60 to 89 days and 30 to 59 days past due are included on the Company's reporting system. Loans on this system are closely monitored by management on a monthly basis.

The Company's home equity and residential loan portfolios continue to exhibit low delinquency ratios. Home equity loans at September 30, 2016 that were current with regard to the contractual terms of the loan agreement represent 98.0% of the total home equity loan portfolio. Residential real estate loans at September 30, 2016 that were current with regards to the contractual terms of the agreements comprise 97.5% of total residential real estate loans outstanding.

Nonperforming Loans Rollforward

The table below presents a summary of non-performing loans, excluding covered loans and PCI loans, for the periods indicated.

| | Three Months Ended | | Nine Months Ended | |
|---|--------------------|-----------|-------------------|-----------|
| | September | September | September | September |
| | 30, | 30, | 30, | 30, |
| (Dollars in thousands) | 2016 | 2015 | 2016 | 2015 |
| Balance at beginning of period | \$88,119 | \$76,554 | \$84,057 | \$78,677 |
| Additions, net | 9,522 | 24,333 | 32,039 | 42,141 |
| Return to performing status | (231) | (1,028) | (3,110) | (2,591) |
| Payments received | (5,235) | (5,468) | (13,353) | (16,417) |
| Transfer to OREO and other repossessed assets | (2,270) | (1,773) | (6,168) | (8,678) |
| Charge-offs | (3,353) | (4,081) | (6,829) | (8,637) |
| Net change for niche loans ⁽¹⁾ | (3,424) | (2,561) | (3,508) | 1,481 |
| Balance at end of period | \$83,128 | \$85,976 | \$83,128 | \$85,976 |

(1) This includes activity for premium finance receivables and indirect consumer loans.

PCI loans are excluded from non-performing loans as they continue to earn interest income from the related assets and are not subject to the same level of performance with contractual terms of the loan. See Note 7 of the Consolidated Financial Statements in Item 19 of the prospectus for more information on non-performing loans and the loan aging during the respective periods.

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of the probable and reasonably estimable loan losses that the Company's loan portfolio is expected to incur. The allowance for loan losses is determined quarterly using a methodology that is based on the characteristics of each loan, as described below under "How We Determine the Allowance for Credit Losses" in Item 19 of the prospectus. The allowance for loan losses is subject to review at each of our bank subsidiaries by the applicable regulatory authority, including the FRB of Chicago, the State of Illinois and the State of Wisconsin.

Management determined that the allowance for loan losses was appropriate at September 30, 2016, and that the Company's loan portfolio is diversified and well secured, without undue concentration in any specific risk area. While this process involves management judgment, the allowance for credit losses is based on a comprehensive, well documented, and consistent methodology applied to all loans of the Company's loan portfolio. This analysis takes into consideration all available information existing as of September 30, 2016, including environmental factors such as economic, industry, geographical and political factors. The relative level of nonperforming loans and losses is reviewed and compared to industry peers. This review encompasses levels of total nonperforming loans, nonperforming loan concentrations, current geographic risks and overall levels of net charge-offs. Historical trending of both the Company and industry peers is also reviewed to analyze comparative significance.

| Commercial | 0.24 | % 0.05 |
| Commercial real estate | 0.00 | 0.13 |
| Home equity | 0.27 | 0.55 |
| Residential real estate | 0.03 | 0.42 |
| Premium finance receivables—commercial | 0.24 | 0.21 |
| Premium finance receivables—life insurance | 0.00 | 0.00 |
| Consumer and other | 0.92 | 0.17 |
| Total loans, net of unearned income, excluding covered loans | 0.12 | % 0.14 |
| Net charge-offs as a percentage of the provision for credit losses | 58.65 | % 65.53 |
| Loans at period-end, excluding covered loans | \$ 19,101,261 | \$ 16,316,211 |
| Allowance for loan losses as a percentage of loans at period end | 0.62 | % 0.63 |
| Allowance for credit losses as a percentage of loans at period end | 0.62 | % 0.64 |

The allowance for credit losses, excluding the allowance for covered loan losses, is comprised of an allowance determined with respect to loans that we have originated, and an allowance for lending-related commitments. The allowance for lending-related commitments is determined with respect to funds that we have committed to lend but for which we have not yet disbursed and is computed using a methodology similar to that used to determine the allowance for loan losses. Unfunded lending-related commitments totaled \$1.6 million and \$926,000 as of September 30, 2016 and September 30, 2015, respectively.

Table of Contents

Additions to the allowance for loan losses are charged to earnings through the provision for credit losses. Charged off amounts represent the amount of loans that have been determined to be uncollectible during a given period, and are deducted from the allowance for loan losses. Recoveries represent the amount of collections received from loans that had previously been charged off, and are added back to the allowance for loan losses. See Note 7 of the Consolidated Financial Statements presented under Item 1 of this report for a discussion of activity within the allowance for loan losses during the period and the relationship with respect to each loan category and the total loan portfolio, excluding covered loans.

How We Determine the Allowance for Credit Losses

The allowance for loan losses includes an element for estimated probable but undetected losses and for imprecisions in the models used to calculate the allowance. If the loan is impaired, the Company analyzes the loan for purposes of determining impairment reserves as part of the Problem Loan Reporting system review. A general reserve is separately determined for loans considered impaired. See Note 7 of the Consolidated Financial Statements presented under Item 1 of this report for a discussion of the specific impairment reserve and general reserve as it relates to the allowance for credit losses for each loan category and the total portfolio, excluding covered loans.

Specific Impairment Reserves:

Loans with a credit risk rating of a 6 through 9 are reviewed on a monthly basis to determine if (a) an amount is charged-off or (b) it is probable that the Company will be unable to collect amounts due in accordance with the terms of the loan (impaired loan). If a loan is impaired, the carrying amount of the loan is compared to the expected present value of the loan, discounted at the loan's original rate, or for collateral dependent loans, to the fair value of the collateral less the cost to sell. The shortfall is recorded as a specific impairment reserve.

At September 30, 2016, the Company had \$90.5 million of impaired loans with \$39.0 million of this balance recorded as specific impairment reserves. At June 30, 2016, the Company had \$96.0 million of impaired loans with \$43.0 million of this balance recorded as specific impairment reserves, requiring \$6.6 million of specific impairment reserves. The most significant fluctuations in the recorded investment with specific impairment from June 30, 2016 to September 30, 2016 occurred within the commercial, industrial and infrastructure recorded investment and specific impairment reserves in this portfolio decreased \$4.8 million and \$1.4 million, primarily the result of three loans being charged off in the amount of \$2.0 million during the third quarter of 2016. See Note 7 of the Consolidated Financial Statements presented under Item 1 of this report for further discussion of impaired loans and specific impairment reserve.

General Reserves:

For loans with a credit risk rating of 1 through 7 that are not considered impaired loans, reserves are established based on the carrying amount of the loan, the collateral, if any, and the assigned credit risk rating. Determination of the allowance is inherently subjective as it requires estimates, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on non-impaired loans based on the average historical loss experience over a six-year period, and consideration of current and expected economic trends, all of which may be susceptible to significant change.

We determine this component of the allowance for loan losses by classifying each loan into (i) categories based on the type of collateral that secures the loan (if any), and (ii) one of ten categories based on the credit risk rating of the loan, as described in "Loans and Non-Performing Assets" in this Item 2. Each combination of collateral and credit risk rating is then assigned a reserve factor that incorporates the following factors:

• historical loss experience;

•

changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses;

• changes in national, regional, and local economic and business conditions and developments that affect the collection and recovery of loans;

• changes in the nature and volume of the portfolio and in the terms of the loans;

• changes in the experience, ability, and depth of lending management and other relevant staff;

80

Table of Contents

- changes in the volume and severity of past due loans, the volume of non-accrual loans, and the volume and severity of classified or graded loans;

- changes in the quality of the bank's loan review system;

- changes in the underlying collateral for collateral dependent loans;

- the existence and effect of any concentrations of credit, and changes in the level of such concentrations; and

- the effect of other external factors such as competition and legal and regulatory requirements on the level of reserves on the bank's existing portfolio.

In the second quarter of 2012, the Company modified its historical loss experience analysis from incorporating three-year average loss rate assumptions to incorporating three-year average loss rate assumptions. The reason for the migration at that time from earlier years in the five-year period were no longer relevant as that period was characterized by historically low credit losses then built up to a peak in credit losses as a result of the stressed economic environment and depressed real estate markets both the U.S. economy, generally, and the Company's local markets.

In the third quarter of 2015 and 2016, the Company modified its historical loss experience analysis by incorporating six-year average loss rate assumptions, respectively, for its historical loss experience to capture an extended credit cycle. A six-year average loss rate assumption analysis is computed for each of the Company's collateral codes. The historical loss rates are combined with the specific loss factor for each combination of collateral and credit risk rating which is then applied to the loan balance to determine an appropriate general reserve. The historical loss rates are updated on a quarterly basis based on the performance of the portfolio and any changes to the specific loss factors are driven by management judgment as described above. The Company also analyzes the three-, four- and five-year average historical loss rates on a quarterly basis for comparison.

Home Equity and Residential Real Estate Loans:

The determination of the appropriate allowance for loan losses for residential real estate and home equity loans is based on the same process used for commercial and commercial real estate loans. The same credit risk rating system, Problem Loans, collateral coding methodology and loss factor assignment are used. The only significant difference is in how the loss factors are assigned to these loans.

The home equity loan portfolio is reviewed on a loan by loan basis by analyzing current FICO scores of the borrower, recent line usage, an approaching maturity and the aging status of the loan. Certain of these factors, or combination of factors, can cause a portion of the credit risk ratings of home equity loans across all banks to be downgraded. Similar to commercial real estate loans, once a home equity loan's credit risk rating is downgraded to a 6 through 9, the Company's Management reviews and advises the subsidiary banks as to collateral valuations and as to the ultimate resolution of the credit risk. The Company also monitors the non-accrual status to minimize losses.

Residential real estate loans that are downgraded to a credit risk rating of 6 through 9 also enter the problem loans category and have the underlying collateral evaluated by the Managed Assets Division.

Premium Finance Receivables:

The determination of the appropriate allowance for loan losses for premium finance receivables is based on the historical loss experience of loans in the portfolio. Loss factors are assigned to each risk rating in order to calculate an allowance for credit losses. The allowance for loan losses for these categories is entirely a general reserve.

Methodology in Assessing Impairment and Charge-off Amounts

In determining the amount of impairment or charge-offs associated with collateral dependent loans, the Company generally by starting with a valuation obtained from an appraisal of the underlying collateral and then deducting the amount of debt to arrive at a net appraised value. We obtain the appraisals of the underlying collateral typically on an annual basis from a pre-approved list of independent, third party appraisal firms. Types of appraisal valuations include “as-is,” “as-is, less fair market, liquidation and “retail sellout” values.

Table of Contents

In many cases, the Company simultaneously values the underlying collateral by marketing the property to market in purchasing properties of the same type. If the Company receives offers or indications of interest, we will analyze market conditions to assess whether in light of such information the appraised value overstates the likely price. An appraisal would be a better assessment of the market value of the property and would enable us to liquidate the collateral. The Company takes into account the strength of any guarantees and the ability of the borrower to provide value relative to determining the ultimate charge-off or reserve associated with any impaired loans. Accordingly, the Company may value below the net appraised value if it believes that an expeditious liquidation is desirable in the circumstances. The Company may accept offers or other indications of interest to support a value that is less than the net appraised value. Alternatively, the Company may value a loan at a value that is in excess of the appraised value if the Company has a guarantee from a borrower that the loan is worth the realizable value. In evaluating the strength of any guarantee, the Company evaluates the financial wherewithal of the guarantor, the guarantor's reputation, and the guarantor's willingness and desire to honor the Company. The Company then conducts a review of the strength of a guarantee on a frequency established as appropriate under the conditions of the borrower warrant.

In circumstances where the Company has received an appraisal but has no third party offers or indications of interest, the Company may enlist the input of realtors in the local market as to the highest valuation that the realtor believes would result from the sale of the property given a reasonable marketing period of approximately 90 days. To the extent that the realtors' indications of value under such scenario is less than the net appraised valuation, the Company may take a charge-off on the loan to bring the carrying value to the net appraised valuation.

The Company may also charge-off a loan below the net appraised valuation if the Company holds a junior mortgage on the collateral whereby the risk of acquiring control of the property through the purchase of the senior mortgage position may potentially increase the risk of loss upon liquidation due to the amount of time to ultimately market the property under current market conditions. In such cases, the Company may abandon its junior mortgage and charge-off the loan balance in full.

In other cases, the Company may allow the borrower to conduct a "short sale," which is a sale where the borrower sells the property at a value less than the amount of the loan. Many times, it is possible for the current owner to sell the property if the property is marketed by a financial institution which the market place perceives to have a greater desire to purchase at a lower price. To the extent that we allow a short sale at a price below the value indicated by an appraisal, we may charge-off the value that an appraisal would have indicated.

Other market conditions may require a reserve to bring the carrying value of the loan below the net appraised value due to conditions surrounding the borrower and/or property securing our loan or other market conditions impacting the value of the collateral.

Having determined the net value based on the factors such as those noted above and compared that value to the carrying value, the Company arrives at a charge-off amount or a specific reserve included in the allowance for loan losses. In some cases, for collateral dependent loans, appraisals are used as the fair value starting point in the estimate of net value. Estimated costs are deducted from the appraised value to arrive at the net appraised value. Although an external appraisal is the primary source of value for collateral dependent loans, alternative sources of valuation may become available between appraisals. The Company may utilize values obtained through these alternating sources, which include purchase and sale agreements, legal proceedings, interest, negotiated short sales, realtor price opinions, sale of the note or support from guarantors, as the basis for valuation. Alternative sources of value are used only if deemed to be more representative of value based on updated information. In addition, if an appraisal is not deemed current, a discount to appraised value may be utilized. Any adjustments from appraised value to net value are detailed and justified in an impairment analysis, which is reviewed and approved by the Company's Managed Assets Division.

Table of Contents

TDRs

At September 30, 2016, the Company had \$44.3 million in loans modified in TDRs. The \$44.3 million in TDRs, which economic concessions were granted to certain borrowers to better align the terms of their loans with their ability to pay, decreased from \$49.6 million representing 97 credits at June 30, 2016 and decreased from \$59.3 million representing 100 credits at September 30, 2015.

Concessions were granted on a case-by-case basis working with these borrowers to find modified terms that would allow them to retain their businesses or their homes and attempt to keep these loans in an accruing status for the Company. Concessions include reduction of the interest rate on the loan to a rate considered lower than market and other modifications such as forgiveness of a portion of the loan balance, extension of the maturity date, and/or modifications from principal to interest-only payments for a certain period. See Note 7 of the Consolidated Financial Statements in Item 1 of this prospectus for a discussion regarding the effectiveness of these modifications in keeping the modified loans current based upon their ability to pay.

Subsequent to its restructuring, any TDR that becomes nonaccrual or more than 90 days past-due and still accruing is included in the Company's nonperforming loans. Each TDR was reviewed for impairment at September 30, 2016. \$14.8 million of impairment was present and appropriately reserved for through the Company's normal reserving methodology for allowance for loan losses. Additionally, at September 30, 2016, the Company was not committed to lend additional amounts under the contractual terms of TDRs.

The table below presents a summary of restructured loans for the respective periods, presented by loan category.

| | September 30, 2016 | June 30, 2016 | September 30, 2015 | |
|--|--------------------------|------------------|--------------------------|---|
| (Dollars in thousands) | | | | |
| Accruing TDRs: | | | | |
| Commercial | \$2,285 | \$3,931 | \$5,717 | |
| Commercial real estate | 22,261 | 24,450 | 39,867 | |
| Residential real estate and other | 4,894 | 4,929 | 3,589 | |

(1)

Loan was previously classified as a TDR and subsequently performed in compliance with the loan's modified interest rate policy for 12 consecutive months (including over a calendar year-end) at a modified interest rate which represented a market rate at the time of the modification. In accordance with our TDR policy, the TDR classification is removed.

Table of Contents

Other Real Estate Owned

In certain circumstances, the Company is required to take action against the real estate collateral of specific loans in the event of foreclosure only as a last resort for dealing with borrowers experiencing financial hardships. The Company employs various workout and restructuring procedures to attempt to find other solutions for our borrowers. The tables below present a summary of other real estate owned, excluding covered other real estate owned, and shows the activity for the respective periods and the balance at the end of the period:

| (Dollars in thousands) | Three Months Ended | | Nine Months Ended | |
|--|--------------------|--------------------|--------------------|--------------------|
| | September 30, 2016 | September 30, 2015 | September 30, 2016 | September 30, 2015 |

Deposits

Total deposits at September 30, 2016 were \$21.1 billion, an increase of \$2.9 billion, or 16%, compared to total deposits of \$18.2 billion at September 30, 2015. See Note 9 to the Consolidated Financial Statements in Item 1 of this report for a summary of period end deposits.

The following table sets forth, by category, the maturity of time certificates of deposit as of September 30, 2016.

| Time Certificates of Deposit Maturity/Re-pricing Analysis As of September 30, 2016 | CDARs & Brokered Certificates of Deposit ⁽¹⁾ | MaxSafe Certificates of Deposit ⁽¹⁾ | Variable Rate Certificates of Deposit ⁽²⁾ | Other Fixed Rate Certificates of Deposit ⁽¹⁾ | Total Time Certificates of Deposits | Weighted-Average Rate ⁽³⁾ |

| Total | \$ 51,115 | \$ 171,035 | \$ 138,228 | \$ 3,841,099 | \$ 4,201,477 | 0.8% |

(1) This category of certificates of deposit is shown by contractual maturity date.

(2) This category includes variable rate certificates of deposit and savings certificates with the majority repricing on a monthly basis.

(3) Weighted-average rate excludes the impact of purchase accounting fair value adjustments.

Table of Contents

The following table sets forth, by category, the composition of average deposit balances and the relative percent deposits for the periods presented:

| (Dollars in thousands) | Three Months Ended | | | | | |
|--|--------------------|---------|---------------|---------|--------------------|---------|
| | September 30, 2016 | | June 30, 2016 | | September 30, 2015 | |
| | Balance | Percent | Balance | Percent | Balance | Percent |
| Non-interest bearing | \$5,566,983 | 27 % | \$5,223,384 | 28 % | \$4,473,632 | 25 % |
| NOW and interest bearing demand deposits | 2,502,388 | 12 | 2,383,125 | 12 | 2,219,654 | 12 |
| Wealth management deposits | 2,092,115 | 10 | 1,585,607 | 8 | 1,532,766 | 9 |
| Money market | 4,471,399 | 22 | 4,308,657 | 22 | 3,955,568 | 22 |
| Savings | 1,914,408 | 9 | 1,803,421 | 9 | 1,676,084 | 9 |
| Time certificates of deposit | 4,136,792 | 20 | 3,985,185 | 21 | 4,105,579 | 23 |
| Total average deposits | \$20,684,085 | 100 % | \$19,289,379 | 100 % | \$17,963,283 | 100 % |

Total average deposits for the third quarter of 2016 were \$20.7 billion, an increase of \$2.7 billion, or 15%, from the third quarter of 2015. The increase in average deposits is primarily attributable to additional deposits associated with the Company's increased commercial lending relationships. The Company continues to see a beneficial shift in its deposit mix. Non-interest bearing deposits increased \$1.1 billion, or 24%, in the third quarter of 2016 compared to the third quarter of 2015.

Wealth management deposits are funds from the brokerage customers of WHI, the trust and asset management and brokerage customers from unaffiliated companies which have been placed into deposit accounts of the banks (referred to as "wealth management deposits" in the table above). Wealth Management deposits consist primarily of money market accounts. Considering interest rate risk parameters, these funds have generally been invested in loan production of the banks as well as other investments suitable for banks.

Brokered Deposits

While the Company obtains a portion of its total deposits through brokered deposits, the Company does so primarily as a risk management tool to assist in the management of interest rate risk. The Company does not consider brokered deposits a significant component of its current liquidity resources. Historically, brokered deposits have represented a small component of the Company's total deposits outstanding, as set forth in the table below:

| (Dollars in thousands) | September 30, | | December 31, | |
|---|---------------|--------------|--------------|--------------|
| | 2016 | 2015 | 2015 | 2014 |
| Total deposits | \$21,147,655 | \$18,228,469 | \$18,639,634 | \$16,281,800 |
| Brokered deposits | 1,142,679 | 763,110 | 862,026 | 718,986 |
| Brokered deposits as a percentage of total deposits | 5.4 | % 4.2 | % 4.6 | % 4.4 |

Brokered deposits include certificates of deposit obtained through deposit brokers, deposits received through the Account Registry Program ("CDARS"), and wealth management deposits of brokerage customers from unaffiliated companies which have been placed into deposit accounts of the banks.

Other Funding Sources

Although deposits are the Company's primary source of funding its interest-earning assets, the Company's ability to raise capital in the form of deposits is somewhat limited by customer preferences and market competition. As a result, in addition to the issuance of equity securities and the retention of earnings, the Company uses several other funding sources to supplement its deposits. Other funding sources include short-term borrowings, notes payable, FHLB advances, subordinated debt, secured borrowings, and debentures. The Company evaluates the terms and unique characteristics of each source, as well as its asset-liability position, in determining the use of such funding sources.

Table of Contents

The following table sets forth, by category, the composition of the average balances of other funding sources for the periods presented:

| | Three Months Ended | | |
|--------------------------------|--------------------------|------------------|--------------------------|
| | September 30, 2016 | June 30, 2016 | September 30, 2015 |
| (Dollars in thousands) | | | |
| FHLB advances | \$459,198 | \$946,081 | \$394,666 |
| Other borrowings: | | | |
| Notes payable | 59,896 | 63,642 | 74,959 |
| Short-term borrowings | 36,615 | 41,597 | 63,111 |
| Secured borrowings | 134,331 | 124,317 | 116,136 |
| Other | 18,465 | 18,677 | 18,343 |
| Total other borrowings | \$249,307 | \$248,233 | \$272,549 |
| Subordinated notes | 138,925 | 138,898 | 138,825 |
| Junior subordinated debentures | 253,566 | 253,566 | 264,974 |
| Total other funding sources | \$1,100,996 | \$1,586,778 | \$1,071,014 |

FHLB advances provide the banks with access to fixed rate funds which are useful in mitigating interest rate risk by providing an acceptable interest rate spread on fixed rate loans or securities. Additionally, the banks have the ability to borrow funding from the FHLB for other general purposes. FHLB advances to the banks totaled \$419.6 million at September 30, 2016, to \$588.1 million at June 30, 2016 and \$444.0 million at September 30, 2015.

Notes payable balances represent the balances on a \$150 million loan agreement with unaffiliated banks consisting of a revolving credit facility and a \$75.0 million term facility. Both loan facilities are available for corporate purposes to provide capital to fund continued growth at existing bank subsidiaries, possible future acquisitions and for other general purposes. At September 30, 2016, the Company had a balance under the term facility of \$56.2 million compared to \$59.9 million at September 30, 2015. The Company was contractually required to borrow the entire amount of \$150 million on June 15, 2015 and all such borrowings must be repaid by June 15, 2020. At September 30, 2016, June 30, 2016 and September 30, 2015, the Company had no outstanding balance on the \$75.0 million revolving credit facility.

Short-term borrowings include securities sold under repurchase agreements and federal funds purchased. These borrowings totaled \$394.7 million at September 30, 2016 compared to \$38.8 million at June 30, 2016 and \$57.6 million at September 30, 2015. Repurchase agreements represent sweep accounts for certain customers in connection with master repurchase agreements. This funding category typically fluctuates based on customer preferences and daily liquidity needs of the banks and the banks' operating subsidiaries.

The average balance of secured borrowings primarily represents a third party Canadian transaction ("Canadian Secured Borrowing"). Under the Canadian Secured Borrowing, in December 2014, the Company, through its subsidiary, FIFC Canada, entered into a co-ownership interest in all receivables owed to FIFC Canada to an unrelated third party in exchange for a cash payment of approximately C\$150 million pursuant to a receivables purchase agreement ("Receivables Purchase Agreement"). The Receivables Purchase Agreement was amended in December 2015, effectively extending the maturity date from December 31, 2017 to December 31, 2020. Additionally, at that time, the unrelated third party paid an additional C\$10 million, which increased the balance of the Canadian Secured Borrowing to \$121.9 million. The proceeds received from these transactions are reflected on the Company's Consolidated Statement of Financial Position as borrowing owed to the unrelated third party and translated to the Company's reporting currency as of the respective balance sheet dates. The balance of the Canadian Secured Borrowing under the Receivables Purchase Agreement totaled \$121.9 million at September 30, 2016 compared to \$123.7 million at June 30, 2016 and \$112.6 million at September 30, 2015. At September 30, 2016, the Canadian Secured Borrowing was 1.6121%.

Other borrowings include a fixed-rate promissory note entered into in August 2012 related to an office building lease for the Company and non-recourse notes issued by the Company to other banks related to certain capital leases. At September 30, 2016, the

fixed-rate promissory note had a balance of \$17.8 million compared to \$18.0 million at June 30, 2016 and \$18.0 million at June 30, 2015.

At September 30, 2016, the Company had outstanding subordinated notes totaling \$138.9 million compared to \$138.9 million outstanding at June 30, 2016 and September 30, 2015, respectively. The notes have a stated interest rate of 4.00% and mature on June 2024. These notes are stated at par adjusted for unamortized costs paid related to the issuance of this debt.

Table of Contents

The Company had \$253.6 million of junior subordinated debentures outstanding as of September 30, 2016 compared to \$253.6 million outstanding at June 30, 2016 and \$268.6 million outstanding at September 30, 2015. The amounts reflected on the balance sheet represent the junior subordinated debentures issued to eleven trusts by the Company and equal the amount of the preferred securities issued by the trusts. The balance increased \$19.1 million in 2015 as a result of the addition of the Suburban Illinois Community Financial Shares Statutory Trust II acquired as a part of the acquisitions of Suburban and CFIS, respectively. In January 2016, the Company acquired \$15.0 million of the \$40.0 million of trust preferred securities issued by Vantage Capital Trust VIII from a third-party investor. The purchase effectively extinguished \$15.0 million of junior subordinated debentures and resulted in a \$4.3 million gain from the early extinguishment of debt. Prior to January 1, 2016, the junior subordinated debentures, subject to certain limitations, qualified as Tier 1 regulatory capital of the Company and, under those certain limitations could, subject to other restrictions, be included in Tier 2 capital. Starting in 2015, a portion of the junior subordinated debentures qualified as Tier 1 regulatory capital of the Company and the amount in excess of that portion, subject to certain restrictions, was included in Tier 2 capital. At September 30, 2015, \$65.1 million and \$195.4 million of junior subordinated debentures, net of common securities, were included in the Company's Tier 1 and Tier 2 regulatory capital, respectively. Starting in 2016, none of the junior subordinated debentures qualified as Tier 1 regulatory capital of the Company and \$253.6 million of the junior subordinated debentures, net of common securities, being included in the Company's Tier 2 regulatory capital.

See Notes 10 and 11 of the Consolidated Financial Statements presented under Item 1 of this report for details and other information for these various funding sources.

Shareholders' Equity

The following tables reflect various consolidated measures of capital as of the dates presented and the capital requirements of the FRB for a bank holding company:

| | September 30, 2016 | | June 30, 2016 | | September 30, 2015 | |
|---|--------------------|---|---------------|---|--------------------|---|
| | | % | | % | | % |
| Leverage ratio | 9.0 | % | 9.2 | % | 9.2 | % |
| Tier 1 capital to risk-weighted assets | 9.8 | | 10.1 | | 10.3 | |
| Common equity Tier 1 capital to risk-weighted assets | 8.7 | | 8.9 | | 8.6 | |
| Total capital to risk-weighted assets | 12.1 | | 12.4 | | 12.6 | |
| Total average equity-to-total average assets ⁽¹⁾ | 10.7 | | 10.4 | | 10.7 | |

(1)Based on quarterly average balances.

| | Minimum Capital Requirements | | Well Capitalized | |
|--|------------------------------|---|------------------|---|
| | | % | | % |
| Leverage ratio | 4.0 | % | 5.0 | % |
| Tier 1 capital to risk-weighted assets | 6.0 | | 8.0 | |
| Common equity Tier 1 capital to risk-weighted assets | 4.5 | | 6.5 | |
| Total capital to risk-weighted assets | 8.0 | | 10.0 | |

The Company's principal sources of funds at the holding company level are dividends from its subsidiaries, borrowings under an agreement with unaffiliated banks and proceeds from the issuances of subordinated debt and additional equity. See Note 16 of the Consolidated Financial Statements in Item 1 for further information on these various funding sources. The Company is committed to maintaining the Company's capital levels above the "Well Capitalized" levels established by the FRB for bank holding companies.

The Company's Board of Directors approves dividends from time to time, however, the ability to declare a dividend is dependent on the Company's financial condition, the terms of the Company's 5.00% non-cumulative perpetual convertible preferred stock, the terms of the Company's fixed-to-floating rate non-cumulative perpetual preferred stock, Series D, the terms of the Company's Preferred Securities offerings and under certain financial covenants in the Company's revolving and term facilities.

July of 2016, the Company declared a quarterly cash dividend of \$0.12 per common share. In January, April, July and October of 2015, the Company declared a quarterly cash dividend of \$0.11 per common share.

See Note 16 of the Consolidated Financial Statements presented under Item 1 of this report for details on the Company's Series D and Series C preferred stock in June 2015 and March 2012, respectively, as well as details on the Company's

88

Table of Contents

of common stock in June 2016. The Company hereby incorporates by reference Note 16 of the Consolidated Financial Statements presented under Item 1 of this report in its entirety.

LIQUIDITY

Wintrust manages the liquidity position of its banking operations to ensure that sufficient funds are available to meet the demands of loans and deposit withdrawals. The liquidity to meet these demands is provided by maturing assets, liquid assets, cash and the ability to attract funds from external sources. Liquid assets refer to money market assets such as Federal Reserve interest bearing deposits with banks, as well as available-for-sale debt securities which are not pledged to secure

The Company believes that it has sufficient funds and access to funds to meet its working capital and other needs. For more information, see Management's Discussion and Analysis of Financial Condition and Results of Operation - Interest-Earning Assets, Funding Sources and -Shareholders' Equity sections of this report for additional information regarding the Company's liquidity.

INFLATION

A banking organization's assets and liabilities are primarily monetary. Changes in the rate of inflation do not have the same effect on the financial condition of a bank as do changes in interest rates. Moreover, interest rates do not necessarily change in the same direction as inflation. Accordingly, changes in inflation are not expected to have a material impact on the Company. An analysis of the Company's asset and liability structure provides the best indication of how the organization is positioned to respond to changes in inflation. See the "Quantitative and Qualitative Disclosures About Market Risks" section of this report for additional information.

FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements within the meaning of federal securities laws. Forward-looking statements are identified through the use of words such as "intend," "plan," "project," "expect," "anticipate," "believe," "estimate," "may," "should," "would" and "could." Forward-looking statements and information are not historical facts, and are based on assumptions, and represent only management's expectations, estimates and projections regarding future events. Forward-looking statements are not guarantees of future performance and involve certain risks and uncertainties that are difficult to predict, and are not limited to, those listed below and the Risk Factors discussed under Item 1A of the Company's 2015 Annual Report and in any of the Company's subsequent SEC filings. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. This statement is made for purposes of invoking these safe harbor provisions. Such forward-looking statements may be deemed to include, among other things, statements relating to the Company's future financial performance, the performance of its loan portfolio, the amount of future credit reserves and charge-offs, delinquency trends, growth plans, regulatory developments, the amount of future deposits, and may offer from time to time, and management's long-term performance goals, as well as statements relating to the Company's financial condition and results of operations from expected developments or events, the Company's business strategy, and other things, including future acquisitions of banks, specialty finance or wealth management businesses, internal growth and the opening of de novo banks or branch offices. Actual results could differ materially from those addressed in the forward-looking statements due to a number of factors, including the following:

- difficult economic conditions have adversely affected our company and the financial services industry in general, and further economic conditions may materially adversely affect our business, financial condition, results of operations and cash flow, since our business is concentrated in the Chicago metropolitan and southern Wisconsin market areas, further downturn in this region could adversely affect our business;
- if our allowance for loan losses is not sufficient to absorb losses that may occur in our loan portfolio, our financial condition and results of operations could suffer;
- a significant portion of our loan portfolio is comprised of commercial loans, the repayment of which is largely dependent on the financial success and economic viability of the borrower;

a substantial portion of our loan portfolio is secured by real estate, in particular commercial real estate. Deterioration in real estate markets could lead to additional losses, which could have a material adverse effect on our financial condition and operations. Any inaccurate assumptions in our analytical and forecasting models could cause us to miscalculate our projections, which could adversely affect our financial condition;

89

Table of Contents

unanticipated changes in prevailing interest rates and the effects of changing regulation could adversely affect which is our largest source of income;

our liquidity position may be negatively impacted if economic conditions continue to suffer;

the financial services industry is very competitive, and if we are not able to compete effectively, we may lose our business could suffer;

if we are unable to compete effectively, we will lose market share and income from deposits, loans and other products;

This could adversely affect our profitability and have a material adverse effect on our business, financial condition and operations;

if we are unable to continue to identify favorable acquisitions or successfully integrate our acquisitions, our growth and our results of operations could suffer;

our participation in FDIC-assisted acquisitions may present additional risks to our financial condition and results of operations;

an actual or perceived reduction in our financial strength may cause others to reduce or cease doing business with us, which could result in a decrease in our net interest income and fee revenues;

if our growth requires us to raise additional capital, that capital may not be available when it is needed or the cost of capital may be very high;

disruption in the financial markets could result in lower fair values for our investment securities portfolio;

our controls and procedures may fail or be circumvented;

new lines of business and new products and services are essential to our ability to compete but may subject us to additional risks;

failures of our information technology systems may adversely affect our operations;

failures by or of our vendors may adversely affect our operations;

we issue debit cards, and debit card transactions pose a particular cybersecurity risk that is outside of our current controls;

we depend on the accuracy and completeness of information we receive about our customers and counterparties;

if we are unable to attract and retain experienced and qualified personnel, our ability to provide high quality services could be adversely affected, we may lose key customer relationships, and our results of operations may suffer;

we are subject to environmental liability risk associated with lending activities;

we are subject to claims and legal actions which could negatively affect our results of operations or financial condition;

losses incurred in connection with actual or projected repurchases and indemnification payments related to mortgage loans sold into the secondary market may exceed our financial statement reserves and we may be required to increase such reserves;

Increases to our reserves and losses incurred in connection with actual loan repurchases and indemnification payments could have a material adverse effect on our business, financial condition, results of operations or cash flows;

consumers may decide not to use banks to complete their financial transactions, which could adversely affect our results of operations;

we may be adversely impacted by the soundness of other financial institutions;

de novo operations often involve significant expenses and delayed returns and may negatively impact Wintrust's results of operations;

we are subject to examinations and challenges by tax authorities, and changes in federal and state tax laws and interpretations of existing laws can impact our financial results;

changes in accounting policies or accounting standards could materially adversely affect how we report our financial condition;

we are a bank holding company, and our sources of funds, including to pay dividends, are limited;

anti-takeover provisions could negatively impact our shareholders;

if we fail to meet our regulatory capital ratios, we may be forced to raise capital or sell assets;

if our credit rating is lowered, our financing costs could increase;

changes in the United States' monetary policy may restrict our ability to conduct our business in a profitable manner;

legislative and regulatory actions taken now or in the future regarding the financial services industry may significantly increase our costs or limit our ability to conduct our business in a profitable manner;

financial reform legislation and increased regulatory rigor around mortgage-related issues may reduce our ability to originate loans to consumers and may limit our ability to profitably operate our mortgage business;

federal, state and local consumer lending laws may restrict our ability to originate certain mortgage loans or increase our costs with respect to such loans and could increase our cost of doing business;

- regulatory initiatives regarding bank capital requirements may require heightened capital;
- our FDIC insurance premiums may increase, which could negatively impact our results of operations;
- non-compliance with the USA PATRIOT Act, Bank Secrecy Act or other laws and regulations could result in
- our premium finance business may involve a higher risk of delinquency or collection than our other lending op
- us to losses;

90

Table of Contents

widespread financial difficulties or credit downgrades among commercial and life insurance providers could lead to collateral securing our premium finance loans and impair the financial condition and liquidity of FIFC and FIFC; regulatory changes could significantly reduce loan volume and impair the financial condition of FIFC; and our wealth management business in general, and WHI's brokerage operation, in particular, exposes us to certain securities industry.

Therefore, there can be no assurances that future actual results will correspond to these forward-looking statements. We cautioned not to place undue reliance on any forward-looking statement made by the Company. Any such statement is as of the date the statement was made or as of such date that may be referenced within the statement. The Company will update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the statement was made. Persons are advised, however, to consult further disclosures management makes on related matters filed with the Securities and Exchange Commission and in its press releases.

ITEM 3

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

As an ongoing part of its financial strategy, the Company attempts to manage the impact of fluctuations in market interest income. This effort entails providing a reasonable balance between interest rate risk, credit risk, liquidity and yield. Asset-liability management policies are established and monitored by management in conjunction with the banks, subject to general oversight by the Risk Management Committee of the Company's Board of Directors. The guidelines for acceptable limits on the sensitivity of the market value of assets and liabilities to changes in interest rates are as follows:

Interest rate risk arises when the maturity or re-pricing periods and interest rate indices of the interest earning assets and liabilities, and derivative financial instruments are different. It is the risk that changes in the level of market interest rates will result in disproportionate changes in the value of, and the net earnings generated from, the Company's interest earning assets and liabilities and derivative financial instruments. The Company continuously monitors not only the organization's net interest margin, but also the historical trends of these margins. In addition, management attempts to identify potential changes in interest income in future years as a result of interest rate fluctuations by performing simulation analysis of various interest rate environments. If a potential adverse change in net interest margin and/or net income is identified, management takes appropriate actions with its asset-liability structure to mitigate these potentially adverse situations.

Since the Company's primary source of interest bearing liabilities is from customer deposits, the Company's ability to adjust the rates and terms of such deposits is somewhat limited by customer preferences and local competition in the market where the Company operates. The rates, terms and interest rate indices of the Company's interest earning assets result primarily from the Company's investing in loans and securities that permit the Company to limit its exposure to interest rate risk, together with the Company's same time achieving an acceptable interest rate spread.

The Company's exposure to interest rate risk is reviewed on a regular basis by management and the Risk Management Committees and boards of directors of the banks and the Company. The objective of the review is to measure the effect on net interest income of changes in the balance sheet and derivative financial instruments to minimize the inherent risk while at the same time maximizing

The following interest rate scenarios display the percentage change in net interest income over a one-year time period for interest rate increases of 100 and 200 basis points and decreases of 100 basis points. The Static Shock Scenario results incorporate the repricing characteristics for balance sheet instruments following an instantaneous, parallel change in market interest rates (i.e. no growth or constant) balance sheet. Conversely, the Ramp Scenario results incorporate management's pricing and repricing of each of the product lines following a gradual, parallel change in market rates over twelve months. The interest rate sensitivity for both the Static Shock and Ramp Scenarios at September 30, 2016 and September 30, 2015 is as follows:

| | +200 Basis Points | +100 Basis Points | -100 Basis Points |
|------------------------|-------------------------|-------------------------|-------------------------|
| Static Shock Scenarios | | | |
| September 30, 2016 | 19.6% | 10.1% | (10.4)% |
| June 30, 2016 | 16.9% | 8.9% | (8.9)% |
| September 30, 2015 | 15.6% | 8.0% | (11.1)% |

| | +200 Basis Points | +100 Basis Points | -100 Basis Points |
|--------------------|-------------------------|-------------------------|-------------------------|
| Ramp Scenarios | | | |
| September 30, 2016 | 7.8% | 3.9% | (4.1)% |
| June 30, 2016 | 7.0% | 3.5% | (3.7)% |
| September 30, 2015 | 6.7% | 3.6% | (4.0)% |

One method utilized by financial institutions, including the Company, to manage interest rate risk is to enter in instruments. Derivative financial instruments include interest rate swaps, interest rate caps and floors, futures, and other financial instruments with similar characteristics. Additionally, the Company enters into commitment loans (interest rate locks) to be sold into the secondary market and forward commitments for the future delivery

92

Table of Contents

of mortgage loans to third party investors. See Note 13 of the Consolidated Financial Statements in Item 1 of the information on the Company's derivative financial instruments.

During the first nine months of 2016 and 2015, the Company entered into certain covered call option transactions on securities held by the Company. The Company uses these option transactions (rather than entering into other derivative contracts, such as interest rate floors) to economically hedge positions and compensate for net interest margin on the total return associated with the related securities through fees generated from these options. Although the return on the options is recorded as non-interest income rather than interest income, the increased return attributable to the covered call options contributes to the Company's overall profitability. The Company's exposure to interest rate risk may be mitigated through these transactions. To mitigate this risk, the Company may acquire fixed rate term debt or use financial derivative instruments. The amount of covered call options outstanding as of September 30, 2016.

ITEM 4
CONTROLS AND PROCEDURES

As of the end of the period covered by this report, the Company's Chief Executive Officer and Chief Financial Officer conducted an internal control evaluation under their supervision, with the participation of other members of management as they deemed appropriate, to assess the effectiveness of the design and operation of the Company's disclosure controls and procedures as contemplated by the requirements of Rules 13a-15. Based upon, and as of the date of that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective, in all material respects, in timely alerting them to material changes or deficiencies relating to the Company (and its consolidated subsidiaries) required to be included in the periodic reports the Company files with and submit to the SEC under the Exchange Act.

There were no changes in the Company's internal control over financial reporting (as defined in Exchange Act Rule 13a-15) during the period that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

94

PART II —

Item 1: Legal Proceedings

The Company and its subsidiaries, from time to time, are subject to pending and threatened legal action and proceedings in the ordinary course of business.

In accordance with applicable accounting principles, the Company establishes an accrued liability for litigation and proceedings when those actions present loss contingencies which are both probable and estimable. If a loss is reasonably possible in future periods, the Company determines whether it can estimate a loss or range of possible losses. If a possible loss is estimable, the Company reviews and evaluates its material litigation on an ongoing basis with any outside counsel handling the matter, in light of potentially relevant factual and legal developments. This review includes information learned through the discovery process, rulings on substantive or dispositive motions, and settlements.

On January 15, 2015, Lehman Brothers Holdings, Inc. ("Lehman Holdings") sent a demand letter asserting that the Company should indemnify it for losses arising from loans sold by Wintrust Mortgage to Lehman Brothers Bank, FSB under a Loan Purchase Agreement between Wintrust Mortgage, as successor to SGB Corporation, and Lehman Brothers Bank. The demand was to be resolved through the alternative dispute resolution process mandated by the U.S. Bankruptcy Court for the Southern District of New York. Lehman Holdings triggered the mandatory alternative dispute resolution process on October 16, 2015. On February 3, 2016, the federal Court of Appeals for the Tenth Circuit that was adverse to Lehman Holdings on the statute of limitations for similar loan purchase claims, Lehman Holdings filed a complaint against Wintrust Mortgage and 150 other entities that purchased loans in the U.S. Bankruptcy Court for the Southern District of New York. The mandatory mediation process ended in 2016, but did not result in a consensual resolution of the dispute. Wintrust Mortgage will be required to respond to the Court's entry of a scheduling order, which has not yet occurred.

The Company has reserved an amount for the Lehman Holdings action that is immaterial to its results of operations and financial condition. Such litigation and threatened litigation actions necessarily involve substantial uncertainty and it is not possible to predict the ultimate resolution or to determine whether, or to what extent, any loss with respect to these legal proceedings will be incurred. Amounts reserved by the Company.

On August 28, 2015, Wintrust Mortgage received a demand from RFC Liquidating Trust asserting that Wintrust Mortgage is liable for losses arising from loans sold by Wintrust Mortgage or its predecessors to Residential Funding Company L.P. No litigation has been initiated and the range of liability is not reasonably estimable at this time and it is not possible to predict the ultimate resolution or to determine whether, or to what extent, any loss with respect to these legal proceedings will be incurred. Information will become available to provide a basis for recording a reserve, should a reserve ultimately be required.

On August 13, 2015, BMO Harris Financial Advisors ("BHFA") filed an arbitration demand with the FINRA panel seeking a permanent injunction and a complaint with the Circuit Court for Cook County, Illinois seeking a temporary restraining order of its former financial advisors and a current financial advisor with WHI. A narrow and limited temporary injunction was granted. The matter was referred to FINRA for arbitration. In November 2015, BHFA added WHI as a co-defendant in the arbitration matter that WHI tortiously interfered with BHFA's contract with its former financial advisor. A hearing on the merits of the matter was held on October 15, 2016. On October 11, 2016, the FINRA panel issued a damages award against WHI for \$1,537,500.

Based on information currently available and upon consultation with counsel, management believes that the effect of the pending or threatened legal actions and proceedings will not have a material adverse effect on the operations or financial condition of the Company. However, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the operations or financial condition for a particular period.

Item 1A: Risk Factors

There were no material changes from the risk factors set forth under Part I, Item 1A “Risk Factors” in the Com fiscal year ended December 31, 2015.

95

Table of Contents

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

No purchases of the Company's common shares were made by or on behalf of the Company or any "affiliated" person within the meaning of Rule 10b-18(a)(3) under the Securities Exchange Act of 1934, as amended, during the three months ended September 30, 2016. The Company currently has no authorization to repurchase shares of outstanding common stock.
