 Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Item 1.01. Entry into a Material Definitive Agreement.

On March 27, 2015, BioCryst Pharmaceuticals, Inc. (the "Company") entered into an advanced development contract with the Biomedical Advanced Research and Development Authority within the U.S. Department of Health and Human Services' Office of the Assistant Secretary for Preparedness and Response ("ASPR/BARDA") for the continued development of BCX4430 as a potential treatment for diseases caused by RNA pathogens, including filoviruses. This ASPR/BARDA contract includes a base contract of \$12.1 million to support BCX4430 drug manufacturing, as well as \$22.9 million in additional development options that can be exercised by ASPR/BARDA, bringing the potential value of the contract to \$35.0 million. The effective date of the contract is March 31, 2015.

The scope of work under the base contract mainly focuses on drug manufacturing, including process improvement, scale up and manufacture of BCX4430 in the U.S over an 18 month period. The BCX4430 produced under this contract is expected to be used in clinical studies and non-clinical toxicology studies supporting the filing of a New Drug Application (NDA) with the U.S. Food and Drug Administration (FDA) for both intravenous (i.v.) and intramuscular (i.m.) formulations of BCX4430.

The contract contains a number of terms and conditions that are customary for government contracts of this nature, including provisions giving the government the right to terminate the contract or order BioCryst to stop all or any part of the work under the contract at the government's discretion.

Forward-Looking Statements

This Current Report on Form 8-K contains forward-looking statements, including statements regarding future results, performance or achievements. These statements involve known and unknown risks, uncertainties and other factors which may cause BioCryst's actual results, performance or achievements to be materially different from any future results, performances or achievements expressed or implied by the forward-looking statements. These statements reflect our current views with respect to future events and are based on assumptions and are subject to risks and uncertainties. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Some of the factors that could affect the forward-looking statements contained herein include: that the Company or its licensees may not commence as expected additional pre-clinical studies or human clinical trials; that the planned studies may not be successful or may not be successfully completed; that the FDA may require additional studies beyond those planned for BCX4430, or may not provide regulatory clearances which may result in delay of planned clinical trials, or may impose a clinical hold on BCX4430, or withhold market approval for BCX4430; that the Company may not be able to obtain additional funding for BCX4430 development; that government funding or other contracts for BCX4430 may have certain terms and conditions, including termination provisions, that subject the Company to additional risks; that the Company may lose current funding for the program. Please refer to the documents BioCryst files periodically with the Securities and Exchange Commission, specifically BioCryst's most recent Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, all of which identify important factors that could cause the actual results to differ materially from those contained in BioCryst's projections and forward-looking statements.

Item 8.01. Other Events.

On March 31, 2015, the Company issued a news release announcing the events described in Item 1.01. A copy of the news release is filed as Exhibit 99.1 hereto and is incorporated herein by reference.

Item 9.01. Financial Statements and Exhibits.
