Company Press Release

**Nova Measuring Instruments
Announces 2003 Second Quarter Results**

Rehovoth, Israel, August 13, 2003 Nova Measuring Instruments, Ltd. (Nasdaq: NVMI), today reported results for the second quarter of 2003.

2003 Second Quarter Results

Total revenues for the second quarter of 2003 were \$6.4 million, a 20% increase over revenues of \$5.4 million reported for the second quarter of 2002, and a 35% sequential increase over revenues of \$4.8 million for the first quarter of 2003.

The Company reported gross profit of \$2.4 million (38% of revenues) compared with gross profit of \$1.9 million (36% of revenues) for the second quarter of 2002 and gross profit of \$1.5 million (32% of revenues) sequentially.

Net loss for the quarter was \$(1.4) million, or \$(0.09) per share, compared with a net loss in the second quarter of 2002 of \$(2.9) million, or \$(0.20) per share and a net loss of \$(2.6) million, or \$(0.17) per share sequentially. Second quarter 2003 results include stock-based compensation expenses of \$0.1 million. Excluding these expenses, net loss was \$(0.08) per share.

Research and development expenses were \$1.6 million (25% of revenues) compared with \$2.5 million (46% of revenues) in the second quarter of 2002 and \$2.2 million (45% of revenues) sequentially. Sales and marketing expenses were \$1.8 million (28% of revenues) compared with \$1.8 million (33% of revenues) in the second quarter of 2002 and \$1.5 million (32% of revenues) sequentially.

The second quarter results reflect several positive trends. These include a 35% sequential revenue growth; approaching the breakeven point and the start of sales of the new NovaScan CD (in Stand-alone and integrated configurations) and visibility of increasing sales of the NovaScan CD in the next 12 months. In addition, we saw some important gains of multiple sales in several major accounts in Japan and Asia Pacific and we maintain our leading integrated metrology market share of over 70%. Dr. Giora Dishon, President & CEO of Nova commented, "This has been a good quarter with increased revenues, improved margins and reduction of losses. We continue to grow in Asia Pacific, Taiwan and Japan and expect that these territories will continue to lead in the coming quarters. The formal introduction during Semicon West of the NovaScan CD system—a process control equipment segment, which Dataquest expects to grow by 25 times in the next 4 years (from \$4M in 2002 to about \$100M in 2006), with orders for stand-alone and integrated systems, is very encouraging. We have also seen an increase in upgrade activity, which we believe may demonstrate an initial sign of a recovery in the sector."

Dr. Dishon concluded, "We are encouraged by the results and the trends in the industry. However, while the visibility is still limited, we continue to manage our business looking forward with a high sense of caution—controlling the costs of operations and continuing to reduce losses, to return the business to profitability."

About Nova

Nova Measuring Instruments Ltd. develops, designs and produces integrated process control systems in the semiconductor manufacturing industry. Nova provides a broad range of integrated process control solutions that link between different semiconductor processes and process equipment. The Company's website is www.nova.co.il.

This press release may contain forward-looking statements, including statements related to anticipated growth rates, manufacturing capacity and tax rate. Actual results may differ materially from those projected due to a number of risks, including changes in customer demands for our products, new product offerings from our competitors, changes in or an inability to execute our business strategy, unanticipated manufacturing or supply problems, or changes in tax requirements. Nova cannot guarantee future results, levels of activity, performance or achievements. The matters discussed in this press release also involve risks and uncertainties summarized under the heading "Risk Factors" in Nova's Form F-1

Edgar Filing: NOVA MEASURING INSTRUMENTS LTD - Form 6-K

filed with the Securities and Exchange Commission on April 9, 2000. These factors are updated from time to time through the filing of reports and registration statements with the Securities and Exchange Commission. Nova Measuring Instruments Ltd. does not assume any obligation to update the forward-looking information contained in this press release.
