Enclosures: Q1 New Business Figures

Embargo: 7.00am 20 April 2006

PRUDENTIAL PLC FIRST QUARTER 2006 NEW BUSINESS RESULTS

- Group APE sales of GBP637 million, up 27 per cent
- UK APE sales of GBP244 million, up 17 per cent
- Jackson National Life (JNL) APE sales of GBP167 million, up 22 per cent
- Prudential Corporation Asia APE sales of GBP226 million, up 47 per cent

Edgar Filing: PRUDENTIAL PLC - Form 6-K

- M&G net fund flows of GBP1.7 billion, up 38 per cent
- Asia net fund flows of GBP0.5 billion, up 147 per cent

All comparisons above and narrative below are quoted at constant exchange rates (CER) unless otherwise stated. See Notes to Editor for further details.

Commenting, Mark Tucker, Group Chief Executive, said:

"Our life businesses have made a good start to the year, building on the strong momentum we established in the second half of 2005.

"In the UK, new business sales were up 17 per cent as we continued to build our shareholder-backed business. We expect the UK market to remain competitive through 2006, and our emphasis will continue to be on margins and return on capital, not APE volume growth.

"In the US, retail sales in the quarter were up 31 per cent, driven by record sales of variable annuities. With our advantaged position in the variable annuity market we expect to continue to grow our market share through the year.

"Growth was particularly strong in Asia, up 47 per cent compared with a slow first quarter in 2005. All our major markets performed well. We have unrivalled sales and profit growth potential in Asia and we will continue to develop our distribution capability to strengthen this position further.

"Our asset management businesses also had an excellent first quarter.

"M&G delivered gross fund inflows of GBP2.9 billion, an increase of 39 per cent, and growth in net inflows was 38 per cent compared to the same period last year. These figures reflect the strength of M&G's diversified product offering and include record levels of retail sales on the back of outstanding investment performance.

"In Asia, third party net inflows of GBP0.5 billion were up 147 per cent on the first quarter of 2005, due to continued strong inflows in Korea and improved performance in Taiwan and India.

"The Group continues to have excellent prospects for profitable growth, and there is tremendous scope to deliver increasing value to shareholders."

Commentary on First Quarter 2006 New Business Results

UK Insurance Operations

Prudential UK APE sales of GBP244 million were up 17 per cent on the first quarter of 2005 driven by strong sales of offshore bonds, bulk annuities and

Edgar Filing: PRUDENTIAL PLC - Form 6-K

with-profit bonds. On a PVNBP basis this equates to first quarter 2006 sales of GBP2.1 billion.

Some segments of the UK market have been challenging in the first quarter of 2006, particularly bulk and individual annuities and unit-linked bonds. Our emphasis during this period has been on maintaining margins and return on capital, focusing on value not volume.

APE sales of offshore and unit-linked bonds increased 17 per cent on the first quarter of 2005. This reflects a 250 per cent increase in offshore bond sales due to strong investment bond sales through new and existing distributors. This in turn was offset by a 28 per cent fall in unit-linked bond sales reflecting continuing price competition to which Prudential chose not to respond.

Bulk annuity APE sales were up 175 per cent reflecting the previously announced GBP66 million Royal London transaction. However, the market for bulk annuities contracted in the quarter as potential buyers deferred decisions pending an improvement in long-term bond yields.

The individual annuity market, particularly through the intermediaries channel, remains competitive reflecting the decline in long-term bond yields, with sales down 8 per cent on last year. However, APE sales of individual annuities through the Partnerships channel were up 125 per cent reflecting increased sales through the additional partnership agreements signed during the course of last year.

APE sales of with-profit annuities have increased 150 per cent in the first quarter. Unlike conventional annuities, with-profit annuities link the level of income to the performance of the Prudential's with-profits fund which has a mix of assets that gives the prospect of income growth over the expected life of an annuity contract.

With-profit bonds also saw good growth of 25 per cent reflecting consumers' positive response to the bonus declaration made earlier this year.

APE sales of individual and corporate pensions were in line with 2005, reflecting the uncertainty in the market ahead of the simplification in pensions legislation that took effect earlier this month.

In 2005, Prudential wrote to 440,000 of its customers contracted out of the second state pension and provided updated information and views to enable them to make an informed decision about whether to contract back in for the 2005/6 tax year onwards. As a result of this mailing, approximately 132,000 customers elected to contract back into the State scheme resulting in a decline in DWP rebate business of 29 per cent in the first quarter of 2006.

Although recently launched, Prudential UK's new lifetime mortgage product, the Prudential Property Release Plan, has had a good response. PruHealth had a record quarter with total individuals insured at the end of March 2006 standing at over 40,000 lives.

Prudential UK will continue to pursue profitable opportunities in its chosen product areas and distribution channels in 2006 maintaining its focus on return

Edgar Filing: PRUDENTIAL PLC - Form 6-K

on capital.

Jackson National Life

Jackson National Life's (JNL) APE sales of GBP167 million in the first quarter represented a 22 per cent increase on the same period in 2005, driven by a strong increase in sales of variable annuities. On a PVNBP basis this equates to first quarter 2006 sales of GBP1.6 billion. Retail APE sales for the quarter of GBP122 million were up 31 per cent on 2005.

JNL delivered record variable annuity APE sales of GBP89 million during the first quarter, up 51 per cent on the same period in the prior year, reflecting its continuing focus on relationship-driven distribution and product innovation. Quarterly variable annuity premiums exceeded \$1.5 billion for the first time, and represented the sixth consecutive quarter of variable annuity sales growth. This result was achieved in a market that had grown 17 per cent year-on-year during the first two months of the year.

In the first quarter, approximately 27 per cent of the variable annuity premiums received related to two new products launched during 2005, 'Perspective Advisors II' and 'Perspective L Series', a result that clearly demonstrates JNL's ability to deliver products and product features that the market wants. For the full year 2005, JNL increased its variable annuity market share to 3.6 per cent, up from 2.8 per cent in the prior year, and improved its ranking in variable annuity sales from 14th at year end 2004 to 12th at year end 2005. In terms of net flows, JNL improved its position to 3rd at year end 2005 from 8th a year earlier.

The persisting low interest rate environment and flat yield curve in the US has resulted in a continuation of the weak customer demand for fixed annuities. As a result fixed annuity APE sales for the quarter of GBP15 million were down 17 per cent on 2005. JNL was ranked the eleventh largest provider of fixed annuities for the full year 2005.

Fixed index annuity APE sales of GBP13 million were down 7 per cent on the same period of 2005. The fixed index annuity market declined in the second half of 2005 by 4 per cent. This decline is due primarily to continued uncertainty in the US regulatory environment, leading to lower demand for FIA products. JNL was ranked the seventh largest provider of fixed index annuities for the full year 2005, improving from ninth for the full year 2004.

Life APE sales of GBP4 million were up 33 per cent on 2005.

Curian Capital, which provides innovative fee-based separately managed accounts, had a strong start to the year increasing assets under management to GBP1.1 billion, up 55 per cent from the end of the first quarter last year.

Institutional APE sales in the first quarter of GBP44 million were consistent with the prior year. JNL will continue to participate in this market on an opportunistic basis, although it is expected that the majority of institutional sales will occur in the first half of 2006.

Edgar Filing: PRUDENTIAL PLC - Form 6-K

JNL has made a strong start to the year, focusing on value-driven growth in its key product lines. With continued product innovation, a strong relationship-based distribution model, continuing competitive cost structure, and proven ability in execution, JNL is well positioned to take advantage of opportunities in the US market.

Prudential Corporation Asia

Prudential's Asian life operations had an exceptionally strong first quarter in 2006 with APE sales of GBP226m up 47 per cent, representing a continuation of the momentum seen in the second half of 2005 compared with the relatively slow first quarter last year. On a PVNBP basis this equates to first quarter 2006 sales of GBP1.2 billion.

Strong first quarter performances were delivered by both our Korean and Indian operations, up 77 per cent and 65 per cent respectively. Korea's record APE sales for the quarter of GBP55 million were driven in part by the run up to the financial year end at 31 March, continued growth and high productivity in the financial advisor distribution channel and the addition of new general agencies. Prudential's 26 per cent share of its Indian joint venture with ICICI generated APE sales for the first quarter of 2006 of GBP33 million. Our Indian business also benefited from the tax year end in March, but underlying growth continues to be driven by higher agent numbers and successful partnership distribution, particularly with ICICI Bank. Collectively, Korea and India (at 26 per cent) contributed 39 per cent to Prudential Corporation Asia's APE, compared to 33 per cent in the first quarter of last year.

Sales growth in Taiwan was 73 per cent up on prior year in the first quarter of 2006 driven by continued success with linked products (70 per cent of its sales), increases in agent numbers and an increased contribution from the partnership channel. Lower sales recorded in Taiwan in the first quarter of 2005 reflected Prudential's focus on higher margin linked business whilst competitors launched products that we considered to be unattractive.

In Indonesia, APE sales for the first quarter were the highest ever recorded at GBP14 million and represent a 40 per cent increase on the same period of 2005. This was driven by continued strong agent recruitment and increases in productivity.

The Singapore life operation delivered APE sales growth of 35 per cent compared to a slow first quarter last year, when the market was affected by weaker sentiment towards linked products. However, the market recovered in the second half of 2005 and we launched six new investment linked funds that continue to be popular, particularly as single premium investments. Singapore also has increasing sales from its newer distribution partners, Maybank and Singpost.

In China, APE sales were up 50 per cent. Our joint venture with CITIC now has ten cities operational and was granted a licence for an eleventh (Jinan in the Shandong province) in January this year. Hong Kong and Malaysia also performed strongly in the first quarter, with increases of 13 per cent and 8 percent, respectively, on the same period in 2005.

APE sales in Japan and Vietnam were 50 per cent and 33 per cent below the same quarter last year, respectively. In Japan, we closed the Financial Advisor

Edgar Filing: PRUDENTIAL PLC - Form 6-K

channel in the fourth quarter last year and in Vietnam the market continues to stabilise following the initial post-liberalisation boost. APE sales in Prudential's remaining markets of the Philippines and Thailand, whilst small, doubled over the prior year.

Prudential's life insurance operations in Asia are well-placed to deliver sustained, profitable and capital efficient growth.

Asset Management

M&G

M&G made an excellent start to the year, delivering gross fund inflows of GBP2.9 billion in the first quarter, an increase of 39 per cent on the same period last year, reflecting the strengths of M&G's diversified product offering in the areas of retail fund management, institutional fixed income, pooled life and pension funds, property and private finance. Net fund inflows grew by 38 per cent to GBP1.7 billion. External funds under management, which represent a quarter of M&G's total funds, increased by a third to GBP40 billion compared to the first quarter 2005.

M&G generated record-breaking retail sales during the first quarter, with gross fund inflows of GBP1.6 billion double those of the previous year and already 42 per cent of the total gross retail sales achieved in the whole of 2005. Net retail fund inflows totalled GBP821 million, more than triple those in the first quarter 2005. In the UK, M&G's continued strong fund performance in equities, bonds and property led to a 77 per cent increase in gross fund inflows compared to the first quarter 2005. M&G International, which sells funds in Germany, Austria, Italy, Luxembourg and Switzerland, more than doubled gross fund inflows and successfully launched into the Spanish marketplace during the quarter. M&G's South African business nearly doubled its gross fund inflows compared to the same period last year. Overall retail funds under management have grown by almost 40 per cent since first quarter 2005 due to net sales, outstanding investment performance and rising market levels.

M&G's institutional businesses also had a good start to the year, especially in the areas of segregated fixed income, property and private finance. Gross institutional fund inflows totalled GBP1.3 billion and were similar to the equivalent period last year, while net fund inflows were slightly lower at GBP923 million. However, the 2005 comparative for institutional inflows in first quarter was boosted by a large single transaction of GBP967 million from Prudential Property Investment Managers (PruPIM).

Asian Fund Management Business

The Asian Fund Management Business made a record start to the year, delivering the highest first quarter third party net inflows since the business was launched. Net inflows of GBP0.5 billion were up 147 per cent on the same quarter last year and are 38 per cent of the total for the whole of 2005.

The Asian Fund Management business's geographic diversification and fund performance has seen continued strong net inflows in Korea, and improved performance in India, Taiwan, Singapore and Malaysia as compared to 2005.

Edgar Filing: PRUDENTIAL PLC - Form 6-K

Total third party funds under management were GBP10.9 billion, up 16 per cent on the first quarter 2005. In August last year, ICICI increased its stake in Prudential's Indian asset management joint venture from 45 per cent to 51 per cent. As a result, Prudential no longer consolidates this business at 100 per cent and the 2006 numbers are reported at 49 per cent, resulting in a GBP1.6 billion reduction in funds under management over the same period last year. On a comparable basis, first quarter 2006 funds under management grew 33 per cent on 2005.

Prudential remains confident that its fund management businesses are well positioned to grow strongly and profitably.

*Prudential plc, a company incorporated and with its principal place of business in the United Kingdom, and its affiliated companies constitute one of the world's leading financial services groups. It provides insurance and financial services directly and through its subsidiaries and affiliates throughout the world. It has been in existence for over 150 years and has GBP234 billion in assets under management, (as at 31st December 2005) Prudential plc is not affiliated in any manner with Prudential Financial, Inc, a company whose principal place of business is in the United States of America.

Forward-Looking Statements

This statement may contain certain "forward-looking statements" with respect to certain of Prudential's plans and its current goals and expectations relating to its future financial condition, performance, results, strategy and objectives. Statements containing the words "believes", "intends", "expects", "plans", "seeks" and "anticipates", and words of similar meaning, are forward-looking. By their nature, all forward-looking statements involve risk and uncertainty because they relate to future events and circumstances which are beyond Prudential's control including among other things, UK domestic and global economic and business conditions, market related risks such as fluctuations in interest rates and exchange rates, and the performance of financial markets generally; the policies and actions of regulatory authorities, the impact of competition, inflation, and deflation; experience in particular with regard to mortality and morbidity trends, lapse rates and policy renewal rates; the timing, impact and other uncertainties of future acquisitions or combinations within relevant industries; and the impact of changes in capital, solvency or accounting standards, and tax and other legislation and regulations in the jurisdictions in which Prudential and its affiliates operate. This may for example result in changes to assumptions used for determining results of operations or re-estimations of reserves for future policy benefits. As a result, Prudential's actual future financial condition, performance and results may differ materially from the plans, goals, and expectations set forth in

Edgar Filing: PRUDENTIAL PLC - Form 6-K

Prudential's forward-looking statements. Prudential undertakes no obligation to update the forward-looking statements contained in this statement or any other forward-looking statements it may make.

Notes to Schedules :

The format of the tables shown is consistent with the distinction between insurance and investment products as applied for previous financial reporting periods. With the exception of US institutional business, products categorised as "insurance" refer to those classified as contracts of long-term insurance business for regulatory reporting purposes, namely falling within one of the classes of insurance specified in part II of Schedule 1 to the Regulated Activities Order under FSA regulations.

The details shown for insurance products include contributions for contracts that are classified under IFRS 4 (Insurance Contracts) as not containing significant insurance risk. These products are described as investment contracts or other financial instruments under IFRS. Contracts included in this category are primarily certain unit-linked and similar contracts written in UK Insurance Operations, and Guaranteed Investment Contracts and similar funding agreements written in US operations.

UK and Asian investment products referred to in the tables above are unit trusts, mutual funds and similar types of fund management arrangements. US investment products relate to assets under administration in Curian. These are unrelated to insurance products that are classified as "investment contracts" under IFRS 4, as described above, although similar IFRS recognition principles apply to the acquisition costs and fees attaching to this type of business.

(1a) Insurance and investment new business for overseas operations has been calculated using constant exchange rates. The applicable rate for Jackson National Life is 1.75. A comparison between the results at actual exchange rates and at constant exchange rates is given in the press release.

(1b) Insurance and investment new business for overseas operations has been calculated using average exchange rates. The applicable rate for Jackson National Life is 1.75 (2005: 1.82).

(2) Represents cash received from sale of investment products.

(3) Annual Equivalents, calculated as regular new business contributions plus 10% single new business contributions, are subject to roundings.

(4) In Asia, 'Other' insurance operations include Thailand, the Philippines and Vietnam.

(5) Balance includes segregated and pooled pension funds, private finance assets and other institutional clients. Other movements reflect the net flows arising from the cash component of a tactical asset allocation fund managed by PPM South Africa.

(6) New business in India is included at Prudential's 26% interest in the India life operation. Mandatory Provident Fund (MPF) product sales in Hong Kong are included at Prudential's 36% interest in the Hong Kong MPF operation.

Edgar Filing: PRUDENTIAL PLC - Form 6-K

(7) Balance sheet figures have been calculated at the closing exchange rate. The 2005 balance is shown on a constant exchange rate.

(8) Sales are converted using the year to date average exchange rate applicable at the time. The sterling results for individual quarters represent the difference between the year to date reported sterling results at successive quarters and will include foreign exchange movements from earlier periods

(9) On 26 August 2005, Prudential's joint venture partner in the Prudential ICICI Asset Management Company purchased an additional 6% share ownership. As a result, Prudential no longer consolidates the company as a subsidiary. 2005 Q1 results are reported at 100%.

(10) GBP95m of FUM reported under Prudential Asian funds operations relates to M& G's products distributed through those Asian operations and this amount is also included in M&G's FUM.

(11) In 2006 sales generated from certain bank relationships are being reported within the 'Partnership' category instead of 'Intermediaries', therefore bringing the management of all retail banks under one channel. The 2005 comparative of GBP5 million has not been restated and remains within 'Intermediaries'.

(12) In Korea other movements relate to equity fund dividend payments
