BT Group plc (BT.L) today announces its results for the second quarter and half year to 30 September 2011.

Ian Livingston, Chief Executive, commenting on the results, said:

"We have increased cash flow, profits and underlying revenue² in the quarter. This progress has been supplemented with positive operational performances in most of our businesses. We achieved a market leading 63% share of broadband net additions and another quarter of growth in fixed lines.

Edgar Filing: BT GROUP PLC - Form 6-K

"We expect to continue to offset the economic headwinds through improved customer service and processes, better efficiency, and investment in the future of the business. This strategy and our financial results allow us to invest when others are merely talking about it. We are accelerating our fibre roll-out programme to cover two-thirds of the UK by the end of 2014 - one year earlier than planned and creating 520 new jobs. With the already announced government support, we believe there is the potential for fibre-based services to reach more than 90% of the UK within a few years thereafter.

"We are also investing across the world and have announced a programme to double our business in key Latin American countries in addition to our expansion in the Asia Pacific region announced last year.

"Our performance in the quarter reinforces but does not change our outlook for the year."

Notes:

- 1) Unless otherwise stated, any reference to revenue, earnings before interest, tax, depreciation and amortisation (EBITDA), operating profit, operating costs, profit before tax and earnings per share (EPS) are measured before specific items. The commentary focuses on the trading results on an adjusted basis being before specific items. This is consistent with the way that financial performance is measured by management and is reported to the Board and the Operating Committee and assists in providing a meaningful analysis of the trading results of the group. The directors believe that presentation of the group's results in this way is relevant to the understanding of the group's financial performance as specific items are those that in management's judgement need to be disclosed by virtue of their size, nature or incidence. In determining whether an event or transaction is specific, management considers quantitative as well as qualitative factors such as the frequency or predictability of occurrence. Specific items may not be comparable to similarly titled measures used by other companies. Reported revenue, reported EBITDA, reported operating profit, reported profit before tax and reported EPS are the equivalent unadjusted or statutory measures.
- 2) Underlying revenue is a measure which seeks to reflect the underlying revenue performance of the group that will contribute to long-term profitable growth. As such it excludes any increases or decreases in revenue as a result of acquisitions or disposals, any foreign exchange movements affecting revenue and any specific items. We are focusing on the trends in underlying revenue excluding transit revenue as transit traffic is low-margin and is significantly affected by reductions in mobile termination rates which have no impact on the group's profitability.
- 3) The income statement, cash flow statement, statements of comprehensive income and equity and balance sheet are provided on pages 11 to 15. A reconciliation of group operating profit to EBITDA (as defined above) is provided in Note 7. A reconciliation of reported profit before tax to adjusted profit before tax is provided in Note 8. A reconciliation of reported EPS (as defined above) to adjusted EPS is provided in Note 9. Reconciliations of free

Edgar Filing: BT GROUP PLC - Form 6-K

cash flow and net debt are provided in Notes 5 and 6, respectively.

- 4) Unless otherwise stated, the references 2011 and 2012 are the financial years to 31 March 2011 and 2012, respectively, except in relation to our fibre roll-out plans which are based on calendar years.
