Benefits and claims and movement in unallocated surplus of with-profits funds, net of reinsurance		(18,618)	(25,549)	(50,169)	
Acquisition costs and other expenditure	B3	(4,505)	(3,336)	(6,752)	
Finance costs: interest on core structural borrowings of shareholder-financed operations		(148)	(170)	(341)	
Disposal of Japan Life business:					
Cumulative exchange loss recycled from other comprehensive income	D1	(46)	-	-	
Remeasurement adjustments	D1	-	(11)	(13)	
Total charges, net of reinsurance		(23,317)	(29,066)	(57,275)	
Share of profits from joint ventures and associates, net of related tax		122	147	303	
Profit before tax (being tax attributable to shareholders' and policyholders' returns)*		2,084	1,708	3,154	
Less tax charge attributable to policyholders' returns		(202)	(284)	(540)	
Profit before tax attributable to shareholders	B1.1	1,882	1,424	2,614	
Total tax charge attributable to policyholders and shareholders	B5	(646)	(563)	(938)	
Adjustment to remove tax charge attributable to policyholders' returns		202	284	540	
Tax charge attributable to shareholders' returns	B5	(444)	(279)	(398)	
Profit for the period attributable to equity holders of the Company		1,438	1,145	2,216	
Earnings per share (in pence)		2015	2014		
Based on profit attributable to the equity holders of the Company:	B6	Half year	Half year	Full year	
Basic		56.3p	45.0p	86.9p	
Diluted		56.2p	44.9p	86.8p	
Dividends per share (in pence)	Note	2015	2014		
Dividends relating to reporting period:	B7	Half year	Half year	Full year	
Interim dividend (2015 and 2014)		12.31p	11.19p	11.19p	
Final dividend (2014)		-	-	25.74p	
Total		12.31p	11.19p	36.93p	
Dividends declared and paid in reporting period:	B7				
Current year interim dividend		-	-	11.19p	
Final dividend for prior year		25.74p	23.84p	23.84p	

Total 25.74p 23.84p 35.03p

\* This measure is the formal profit before tax measure under IFRS but it is not the result attributable to shareholders.

This is because the corporate taxes of the Group include those on the income of consolidated with-profits and unit-linked funds that, through adjustments to benefits, are borne by policyholders. These amounts are required to be included in the tax charge of the Company under IAS 12. Consequently, the profit before all taxes measure (which is determined after deducting the cost of policyholder benefits and movements in the liability for unallocated surplus of the PAC with-profits fund after adjusting for taxes borne by policyholders) is not representative of pre-tax profits attributable to shareholders.

Notes

- (i) This measure is the formal profit before tax measure under IFRS but it is not the result attributable to shareholders.
- (ii) The adjusting items to profit before tax included within non-cash movements in operating assets and liabilities reflected in profit before tax are as follows:

	2015 £m	2014 £m	
	Half year	Half year	Full year
Other non-investment and non-cash assets	(2,004)	(2,461)	(1,521)
Investments	(8,431)	(15,866)	(30,746)
Policyholder liabilities (including unallocated surplus)	6,795	15,110	27,292
Other liabilities (including operational borrowings)	4,344	2,055	3,797
Non-cash movements in operating assets and liabilities reflected in profit before tax	704	(1,162)	(1,178)

- (iii) The adjusting items to profit before tax included within other items are adjustments in respect of non-cash items together with operational interest receipts and payments, dividend receipts and tax paid.
- (iv) Net cash flows for corporate transactions are for distribution rights and the acquisition and disposal of businesses.
- (v) Structural borrowings of shareholder-financed operations exclude borrowings to support short-term fixed income securities programmes, non-recourse borrowings of investment subsidiaries of shareholder-financed operations and other borrowings of shareholder-financed operations. Cash flows in respect of these borrowings are included within cash flows from operating activities.
- (vi) Interest paid on structural borrowings of with-profits operations relate solely to the £100 million 8.5 per cent undated subordinated guaranteed bonds, which contribute to the solvency base of the Scottish Amicable Insurance Fund (SAIF), a ring-fenced sub-fund of the PAC with-profits fund. Cash flows in respect of other borrowings of with-profits funds, which principally relate to consolidated investment funds, are included within cash flows from operating activities.

## International Financial Reporting Standards (IFRS) Basis Results

## NOTES

## A BACKGROUND

## A1 Basis of preparation, audit status and exchange rates

These condensed consolidated interim financial statements for the six months ended 30 June 2015 have been prepared in accordance with IAS 34 'Interim Financial Reporting' as issued by the International Accounting Standards Board (IASB) and as endorsed by the European Union (EU). The Group's policy for preparing this interim financial information is to use the accounting policies adopted by the Group in its last consolidated financial statements, as updated by any changes in accounting policies it intends to make in its next consolidated financial statements as a result of new or amended IFRS that are applicable or available for early adoption for the next annual financial statements and other policy improvements. EU-endorsed IFRS may differ from IFRSs issued by the IASB if, at any point in time, new or amended IFRS have not been endorsed by the EU. At 30 June 2015, there were no unendorsed standards effective for the period ended 30 June 2015 affecting the condensed consolidated financial statements of the Group, and there were no differences between IFRS endorsed by the EU and IFRS issued by the IASB in terms of their application to the Group.

The IFRS basis results for the 2015 and 2014 half years are unaudited. The 2014 full year IFRS basis results have been derived from the 2014 statutory accounts. The auditors have reported on the 2014 statutory accounts which have been delivered to the Registrar of Companies. The auditors' report was: (i) unqualified; (ii) did not include a reference to any matters to which the auditors drew attention by way of emphasis without qualifying their report; and (iii) did not contain a statement under section 498(2) or (3) of the Companies Act 2006.

The exchange rates applied for balances and transactions in currencies other than the presentational currency of the Group, pounds sterling (GBP) were:

	Closing rate at 30 Jun 2015	Average for the 6 months to 30 Jun 2015	Closing rate at 30 Jun 2014	Average for the 6 months to 30 Jun 2014	Closing rate at 31 Dec 2014	Average for 12 months to 31 Dec 2014
Local currency: £						
Hong Kong	12.19	11.81	13.25	12.95	12.09	12.78
Indonesia	20,968.02	19,760.02	20,270.27	19,573.46	19,311.31	19,538.56
Malaysia	5.93	5.55	5.49	5.45	5.45	5.39
Singapore	2.12	2.06	2.13	2.10	2.07	2.09
India	100.15	95.76	102.84	101.45	98.42	100.53
Vietnam	34,345.42	32,832.81	36,471.11	35,266.15	33,348.46	34,924.62
Thailand	53.12	50.21	55.49	54.34	51.30	53.51
US	1.57	1.52	1.71	1.67	1.56	1.65

Certain notes to the financial statements present half year 2014 comparative information at Constant Exchange Rates (CER), in addition to the reporting at Actual Exchange Rates (AER) used throughout the condensed consolidated financial statements. AER are actual historical exchange rates for the specific accounting period, being the average

rates over the period for the income statement and the closing rates at the balance sheet date for the balance sheet. CER results are calculated by translating prior period results using the current period foreign exchange rate ie current period average rates for the income statement and current period closing rates for the balance sheet.

The accounting policies applied by the Group in determining the IFRS basis results in this report are the same as those previously applied in the Group's consolidated financial statements for the year ended 31 December 2014, except for the adoption of the new and amended accounting pronouncements for Group IFRS reporting as described below.

## A2 Adoption of new accounting pronouncements in 2015

The Group has adopted the Annual improvements to IFRSs 2010 - 2012 cycle and 2011 - 2013 cycle which were effective in 2015.

Except for a change to the presentation of the Prudential Capital business as a separate reporting segment, as described in the note B1.3, consideration of these improvements has had no impact on the financial statements of the Group.

## B EARNINGS PERFORMANCE

### B1 Analysis of performance by segment

#### B1.1 Segment results - profit before tax

For memorandum disclosure purposes, the table below presents the half year 2015 results on both actual exchange rates (AER) and constant exchange rates (CER) bases so as to eliminate the impact of exchange translation.

Notes

(i) The Group's UK insurance operations transferred its general insurance business to Churchill in 2002. General insurance commission represents the commission receivable net of expenses for Prudential-branded general insurance products as part of this arrangement which terminates in 2016.

(ii) Corporate expenditure as shown above is for Group Head Office and Asia Regional Head Office.

(iii) Restructuring costs are incurred in the UK and represent one-off business development expenses.

(iv) In November 2014, PAC completed the sale of its 25 per cent equity stake in PruHealth and PruProtect businesses to Discovery Group Europe Limited for £155 million in cash giving rise to a gain on disposal of £86

million.

(v) For definitions of actual exchange rates (AER) and constant exchange rates (CER) refer to note A1.

(vi) Amortisation of acquisition accounting adjustments principally relate to the acquired REALIC business of Jackson.

(vii) On 1 January 2014, the Hong Kong branch of the Prudential Assurance Company Limited was transferred to separate subsidiaries established in Hong Kong.

#### B1.2 Short-term fluctuations in investment returns on shareholder-backed business

	2015 £m	2014 £m	
	Half year	Half year	Full year
Insurance operations:			
Asia note (i)	(57)	119	178
US note (ii)	228	(226)	(1,103)
UK note (iii)	(96)	93	464
Other operationsnote (iv)	11	(31)	(113)
Total	86	(45)	(574)

#### Notes

##### (i) Asia insurance operations

In Asia, the negative short-term fluctuations of £(57) million (half year 2014: positive £119 million; full year 2014: positive £178 million) primarily reflect net unrealised movements on bond holdings following rises in bond yields across most countries in the region during the period.

##### (ii) US insurance operations

The short-term fluctuations in investment returns for US insurance operations comprise amounts, net of related amortisation of deferred acquisition costs, in respect of the following items:

	2015 £m	2014 £m	
	Half year	Half year	Full year
Net equity hedge resultnote (a)	214	(478)	(1,574)
Other than equity-related derivativesnote (b)	(71)	208	391
Debt securities note (c)	66	16	47
Equity-type investments: actual less longer-term return	7	21	16
Other items	12	7	17
Total	228	(226)	(1,103)

The short-term fluctuations in investment returns shown in the table above are stated net of a charge for the related amortisation of deferred acquisition costs of £188 million (half year 2014: credit of £107 million; full year 2014: credit of £653 million). See note C5.1(b).

#### Notes

##### (a) Net equity hedge result

This result comprises the net effect of:

- The accounting value movements on the variable annuity guarantee and fixed index annuity embedded option liabilities;
  - Fair value movements on free-standing equity derivatives;
- A portion of the fee assessments as well as claim payments, in respect of guarantee liabilities; and
  - Related amortisation of DAC.

Movements in the accounting values of the variable annuity guarantee liabilities include those for:

- The Guaranteed Minimum Death Benefit (GMDB) and the "for life" portion of Guaranteed Minimum Withdrawal Benefit (GMWB) guarantees which are valued under the US GAAP insurance measurement basis applied for IFRS in a way that substantially does not recognise the effect of equity market and interest rate changes.  
These represent the majority of the guarantees offered by Jackson; and
- The "not for life" portion of GMWB embedded derivative liabilities which are required to be fair valued. Fair value movements on these liabilities include the effects of changes to levels of equity markets, implied volatility and interest rates.

The free-standing equity derivatives are held to manage equity exposures of the variable annuity guarantees and fixed index annuity embedded options.

The net equity hedge result therefore includes significant accounting mismatches and other factors that detract from the presentation of an economic result. These other factors include:

- The variable annuity guarantees and fixed index annuity embedded options are only partially fair valued under grandfathered GAAP;
- The interest rate exposure being managed through the other than equity related derivative programme explained in note (b) below; and
- Jackson's management of its economic exposures for a number of other factors that are treated differently in the accounting frameworks such as future fees and assumed volatility levels.

(b) Other than equity-related derivatives

The fluctuations for this item comprise the net effect of:

- Fair value movements on free-standing, other than equity-related derivatives;
- Accounting effects of the Guaranteed Minimum Income Benefit (GMIB) reinsurance; and
  - Related amortisation of DAC.

The free-standing, other than equity-related derivatives, are held to manage interest rate exposures and durations within the general account and the variable annuity guarantees and fixed index annuity embedded options described in note (a) above.

The direct Guaranteed Minimum Income Benefit (GMIB) liability is valued using the US GAAP measurement basis applied for IFRS reporting in a way that substantially does not recognise the effects of market movements. Reinsurance arrangements are in place so as to essentially fully insulate Jackson from the GMIB exposure. Notwithstanding that the liability is essentially fully reinsured, as the reinsurance asset is net settled it is deemed a derivative under IAS 39 which requires fair valuation.

The fluctuations for this item therefore include significant accounting mismatches caused by:

- The fair value movements recorded in the income statement on the derivative programme being in respect of the management of interest rate exposures of the variable and fixed index annuity business, as well as the fixed annuity business guarantees and durations within the general account;
- Fair value movements on Jackson's debt securities of the general account which are recorded in other comprehensive income rather than the income statement; and
  - The mixed measurement model that applies for the GMIB and its reinsurance.

(c) Short-term fluctuations related to debt securities

Edgar Filing: PRUDENTIAL PLC - Form 6-K

	2015 £m	2014 £m	
	Half year	Half year	Full year
Short-term fluctuations relating to debt securities

	34	(23)	(24)
Related amortisation of deferred acquisition costs	(8)	(7)	(17)
Total short-term fluctuations related to debt securities	66	16	47

The debt securities of Jackson are held in the general account of the business. Realised gains and losses are recorded in the income statement with normalised returns included in operating profit and variations from year to year are included in the short-term fluctuations category. The risk margin reserve charge for longer-term credit-related losses included in operating profit based on longer-term investment returns of Jackson for half year 2015 is based on an average annual risk margin reserve of 23 basis points (half year 2014: 23 basis points; full year 2014: 24 basis points) on average book values of US\$54.3 billion (half year 2014: US\$54.7 billion; full year 2014: US\$54.5 billion) as shown below:

Moody's rating category (or equivalent under NAIC ratings of mortgage-backed securities)	Half year 2015				Half year 2014				Full year 2014

Risk margin reserve charge to operating profit for longer-term			(103)	(67)			(105)	(62)			(104)	(63)

credit related losses

Consistent with the basis of measurement of insurance assets and liabilities for Jackson's IFRS results, the charges and credits to operating profits based on longer-term investment returns are partially offset by related amortisation of deferred acquisition costs.

In addition to the accounting for realised gains and losses described above for Jackson general account debt securities, included within the statement of other comprehensive income is a pre-tax charge for unrealised loss on debt securities classified as available-for-sale net of related amortisation of deferred acquisition costs of £(597) million (half year 2014: net unrealised gains of £811 million; full year 2014: net unrealised gains of £869 million). Temporary market value movements do not reflect defaults or impairments. Additional details of the movement in the value of the Jackson portfolio are included in note C3.3(b).

(iii) UK insurance operations

The negative short-term fluctuations in investment returns for UK insurance operations of £(96) million (half year 2014: positive £93 million; full year 2014 positive £464 million) include net unrealised movements on fixed income assets supporting the capital of the shareholder-backed annuity business, reflecting a rise in bond yields since the end of 2014.

(iv) Other

The positive short-term fluctuations in investment returns for other operations of £11 million (half year 2014: negative £(31) million; full year 2014 negative £(113) million) include unrealised value movements on investments and foreign exchange items.

(v) Default losses

The Group did not experience any default losses on its shareholder-backed debt securities portfolio in half year 2015 or 2014.

### B1.3 Determining operating segments and performance measure of operating segments

#### Operating segments

The Group's operating segments, determined in accordance with IFRS 8 'Operating Segments', are as follows:

Insurance operations:

- Asia
- US (Jackson)
- UK

Asset management operations:

- Eastspring Investments
- US broker-dealer and asset management (including Curian)
- M&G
- Prudential Capital

The Group's operating segments are also its reportable segments for the purposes of internal management reporting. Prior to 2015, the Group incorporated Prudential Capital into the M&G operating segment for the purposes of segment reporting. To better reflect the economic characteristics of the two businesses, the Group has in 2015 made a change to present Prudential Capital as a separate reportable segment rather than aggregating this segment within M&G.

#### Performance measure

The performance measure of operating segments utilised by the Company is IFRS operating profit attributable to shareholders based on longer-term investment returns, as described below. This measurement basis distinguishes operating profit based on long-term investment returns from other constituents of the total profit as follows:

- Short-term fluctuations in investment returns;
- Gain on the sale of the Group's stake in the PruHealth and PruProtect businesses in 2014;
- Amortisation of acquisition accounting adjustments arising on the purchase of business. This comprises principally the charge for the adjustments arising on the purchase of REALIC in 2012;
- The recycling of the cumulative exchange translation loss on the sold Japan Life business from other comprehensive income to the income statement in 2015. See note D1 for further details; and
- The costs associated with the domestication of the Hong Kong branch which became effective on 1 January 2014.

Segment results that are reported to the Group Executive Committee include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items are mainly in relation to the Group Head Office and the Asia Regional Head Office.

Determination of operating profit based on longer-term investment return for investment and liability movements

(a) General principles

(i) UK style with-profits business

The operating profit based on longer-term returns reflects the statutory transfer gross of attributable tax. Value movements in the underlying assets of the with-profits funds do not affect directly the determination of operating profit.

(ii) Unit linked business

The policyholder unit liabilities are directly reflective of the asset value movements. Accordingly, the operating results based on longer-term investment returns reflect the current period value movements in both the unit liabilities and the backing assets.

(iii) US variable annuity and fixed index annuity business

This business has guarantee liabilities which are measured on a combination of fair value and other, US GAAP derived, principles. These liabilities are subject to an extensive derivative programme to manage equity and, with those of the general account, interest rate exposures. The principles for determination of the operating profit and short-term fluctuations are necessarily bespoke, as discussed in section (c) below.

(iv) Business where policyholder liabilities are sensitive to market conditions

Under IFRS, the degree to which the carrying values of liabilities to policyholders are sensitive to current market conditions varies between territories depending upon the nature of the 'grandfathered' measurement basis. In general, in those instances where the liabilities are particularly sensitive to routine changes in market conditions, the accounting basis is such that the impact of market movements on the assets and liabilities is broadly equivalent in the income statement, and operating profit based on longer-term investments returns is not distorted. In these circumstances, there is no need for the movement in the liability to be bifurcated between the elements that relate to longer-term market conditions and short-term effects.

However, some types of business movements in liabilities do require bifurcation to ensure that at the net level (ie after allocated investment return and change for policyholder benefits) the operating result reflects longer-term market returns.

Examples of where such bifurcation is necessary are in Hong Kong and for UK shareholder-backed annuity business, as explained in sections b(i) and d(i), respectively.

(v) Other shareholder-financed business

The measurement of operating profit based on longer-term investment returns reflects the particular features of long-term insurance business where assets and liabilities are held for the long-term and for which the accounting basis

for insurance liabilities under current IFRS is not generally conducive to demonstrating trends in underlying performance of life businesses exclusive of the effects of short-term fluctuations in market conditions. In determining the profit on this basis, the following key elements are applied to the results of the Group's shareholder-financed operations.

Except in the case of assets backing liabilities which are directly matched (such as linked business) or closely correlated with value movements (as discussed below) operating profit based on longer-term investment returns for shareholder-financed business is determined on the basis of expected longer-term investment returns.

#### Debt, equity-type securities and loans

Longer-term investment returns comprise actual income receivable for the period (interest/dividend income) and for both debt and equity-type securities longer-term capital returns.

In principle, for debt securities and loans, the longer-term capital returns comprise two elements:

- Risk margin reserve based charge for the expected level of defaults for the period, which is determined by reference to the credit quality of the portfolio. The difference between impairment losses in the reporting period and the risk margin reserve charge to the operating result is reflected in short-term fluctuations in investment returns; and
- The amortisation of interest-related realised gains and losses to operating results based on longer-term investment returns to the date when sold bonds would have otherwise matured.

At 30 June 2015, the level of unamortised interest-related realised gains and losses related to previously sold bonds for the Group was a net gain of £478 million (half year 2014: net gain of £427 million; full year 2014: net gain of £467 million).

#### Equity-type securities

For equity-type securities, the longer-term rates of return are estimates of the long-term trend investment returns for income and capital having regard to past performance, current trends and future expectations. Equity-type securities held for shareholder-financed operations other than the UK annuity business, unit-linked and US variable annuity are of significance for the US and Asia insurance operations. Different rates apply to different categories of equity-type securities.

#### Derivative value movements

Generally, derivative value movements are excluded from operating results based on longer-term investment returns (unless those derivative value movements broadly offset changes in the accounting value of other assets and liabilities included in operating profit). The principal example of non-equity based derivatives (for example interest rate swaps and swaptions) whose value movements are excluded from operating profit arises in Jackson, as discussed below in section (c).

#### (b) Asia insurance operations

##### (i) Business where policyholder liabilities are sensitive to market conditions

For certain Asia non-participating business, for example in Hong Kong, the economic features are more akin to asset management products with policyholder liabilities reflecting asset shares over the contract term. For these products, the charge for policyholder benefits in the operating results should reflect the asset share feature rather than volatile movements that would otherwise be reflected if the local regulatory basis (also included in IFRS total profit) was used.

For certain other types of non-participating business, longer-term interest rates are used to determine the movement in policyholder liabilities for determining operating results.

##### (ii) Other Asia shareholder-financed business

#### Debt securities

For this business the realised gains and losses are principally interest related. Accordingly, all realised gains and losses to date for these operations are being amortised over the period to the date those securities would otherwise have matured, with no explicit risk margin reserve charge.

#### Equity-type securities

For Asia insurance operations, investments in equity securities held for non-linked shareholder-financed operations amounted to £831 million as at 30 June 2015 (half year 2014: £664 million; full year 2014: £932 million). The expected long-term rates of return applied in the periods 2015 and 2014 ranged from 2.26 per cent to 13.00 per cent with the rates applied varying by territory. These rates reflect expectations of long-term real government bond returns, equity risk premium and long-term inflation. These rates are broadly stable from period to period but may be different between countries reflecting, for example, differing expectations of inflation in each territory. The assumptions are for returns expected to apply in equilibrium conditions. The assumed rates of return do not reflect any cyclical variability in economic performance and are not set by reference to prevailing asset valuations.

The longer-term investment returns for the Asia insurance joint ventures accounted for using the equity method are determined on a basis similar to that used for the other Asia insurance operations described above.

#### (c) US insurance operations

##### (i) Separate account business

For such business the policyholder unit liabilities are directly reflective of the asset value movements. Accordingly, the operating results based on longer-term investment returns reflect the current period value movements in unit liabilities and the backing assets.

##### (ii) US variable and fixed index annuity business

The following value movements for Jackson's variable and fixed index annuity business are excluded from operating profit based on longer-term investment returns. See note B1.2 note (ii):

- Fair value movements for equity-based derivatives;
- Fair value movements for embedded derivatives for the 'not for life' portion of Guaranteed Minimum Withdrawal Benefit and fixed index annuity business, and Guaranteed Minimum Income Benefit reinsurance (see below);
- Movements in accounts carrying value of Guaranteed Minimum Death Benefit and the 'for life' portion of Guaranteed Minimum Withdrawal Benefits and Guaranteed Minimum Income Benefit liabilities, for which, under the 'grandfathered' US GAAP applied under IFRS for Jackson's insurance assets and liabilities, the measurement basis gives rise to a muted impact of current period market movements;
  - A portion of the fee assessments as well as claim payments, in respect of guarantee liabilities; and
  - Related amortisation of deferred acquisition costs for each of the above items.

#### Embedded derivatives for variable annuity guarantee features

The Guaranteed Minimum Income Benefit liability, which is essentially fully reinsured, subject to a deductible and annual claim limits, is accounted for in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Subtopic 944-80 Financial Services - Insurance - Separate Accounts (formerly SOP 03-1) under IFRS using 'grandfathered' US GAAP. As the corresponding reinsurance asset is net settled, it is considered to be a derivative under IAS 39, 'Financial Instruments: Recognition and measurement', and the asset is therefore recognised at fair value. As the Guaranteed Minimum Income Benefit is economically reinsured the mark to market element of the reinsurance asset is included as a component of short-term fluctuations in investment returns.

##### (iii) Other derivative value movements

The principal example of non-equity based derivatives (for example interest rate swaps and swaptions) whose value movements are excluded from operating profit arises in Jackson. Non-equity based derivatives are primarily held by Jackson as part of a broadly-based hedging programme for features of Jackson's bond portfolio (for which value movements are booked in the statement of comprehensive income rather than the income statement), product liabilities (for which US GAAP accounting as 'grandfathered' under IFRS 4 does not fully reflect the economic features being hedged), and the interest rate exposure attaching to equity-based embedded derivatives.

(iv) Other US shareholder-financed business

Debt securities

Jackson is the shareholder-backed operation for which the distinction between impairment losses and interest-related realised gains and losses is in practice relevant to a significant extent. Jackson has used the ratings by Nationally Recognised Statistical Ratings Organisations (NRSRO) or ratings resulting from the regulatory ratings detail issued by the National Association of Insurance Commissioners (NAIC) developed by external third parties such as PIMCO or BlackRock Solutions to determine the average risk margin reserve to apply to debt securities held to back general account business. Debt securities held to back reinsurance funds withheld are not subject to risk margin reserve charge. Further details of the risk margin reserve charge, as well as the amortisation of interest-related realised gains and losses, for Jackson are shown in note B1.2.

Equity-type securities

As at 30 June 2015, the equity-type securities for US insurance non-separate account operations amounted to £1,087 million (half year 2014: £1,071 million; full year 2014: £1,094 million). For these operations, the longer-term rates of return for income and capital applied in 2015 and 2014, which reflect the combination of the average risk-free rates over the period and appropriate risk premiums are as follows:

	2015 Half year	2014 Half year	2014 Full year
Equity-type securities such as common and preferred stock and portfolio holdings in mutual funds	5.7% to 6.4%	6.5% to 6.7%	6.2% to 6.7%
Other equity-type securities such as investments in limited partnerships and private equity funds	7.7% to 8.4%	8.5% to 8.7%	8.2% to 8.7%

(d) UK Insurance operations

(i) Shareholder-backed annuity business

For this business, policyholder liabilities are determined by reference to current interest rates. The value movements of the assets covering liabilities are closely correlated with the related change in liabilities. Accordingly, asset value movements are recorded within the 'operating results based on longer-term investment returns'. Policyholder liabilities include a margin for credit risk. Variations between actual and best estimate expected impairments are recorded as a component of short-term fluctuations in investment returns.

The operating result based on longer-term investment returns reflects the impact of value movements on policyholder liabilities for annuity business in Prudential Retirement Income Limited (PRIL) and the Prudential Assurance Company Limited (PAC) non-profit sub-fund after adjustments to allocate the following elements of the movement to the category of 'short-term fluctuations in investment returns':

- The impact on credit risk provisioning of actual upgrades and downgrades during the period;
  - Credit experience compared to assumptions; and
- Short-term value movements on assets backing the capital of the business.

Credit experience reflects the impact of defaults and other similar experience, such as asset exchanges arising from debt restructuring by issuers that include effectively an element of permanent impairment of the security held. Positive or negative experience compared to assumptions is included within short-term fluctuations in investment returns without further adjustment. The effects of other changes to credit risk provisioning are included in the operating result, as is the net effect of changes to the valuation rate of interest due to portfolio rebalancing to align more closely with management benchmark.

(ii) Non-linked shareholder-financed business

For debt securities backing non-linked shareholder-financed business of the UK insurance operations (other than the annuity business) the realised gains and losses are principally interest related. Accordingly, all realised gains and losses to date for these operations are being amortised over the period to the date those securities would otherwise have matured, with no explicit risk margin reserve charge.

(e) Fund management and other non-insurance businesses

For these businesses, the particular features applicable for life assurance noted above do not apply. For these businesses it is inappropriate to include returns in the operating result on the basis described above. Instead, it is appropriate to generally include realised gains and losses in the operating result with temporary unrealised gains and losses being included in short-term fluctuations. In some instances, it may also be appropriate to amortise realised gains and losses on derivatives and other financial instruments to operating results over a time period that reflects the underlying economic substance of the arrangements.

B1.4 Additional segmental analysis of revenue

The additional segmental analyses of revenue from external customers excluding investment return and net of outward reinsurance premiums are as follows:

	Half year 2015 £m				Total
	Asia	US	UK	Intra-group	
Revenue from external customers:

Earned premiums, net of reinsurance	17,884	16,189	32,033
Fee income and investment contract business and asset management (presented as 'Other income')	1,285	1,059	2,306
Total revenue from external customers	19,169	17,248	34,339

In their capacity as fund managers to fellow Prudential Group subsidiaries, M&G, Prudential Capital, Eastspring Investments and the US asset management businesses generate fees for investment management and related services. These services are charged at appropriate arm's length prices, typically priced as a percentage of funds under management. Intra-group fees included within asset management revenue were earned by the following asset management segment:

	2015 £m Half year	2014 £m Half year	2014 £m Full year
Intra-group revenue generated by:			
M&G	93	85	208
Prudential Capital	9	-	11
Eastspring Investments	94	67	146
US broker-dealer and asset management (including Curian)	45	42	84
Total intra-group fees included within asset management segment	241	194	449

Revenue from external customers of Asia, US and UK insurance operations shown above are net of outwards reinsurance premiums of £228 million, £142 million and £152 million respectively (half year 2014: £134 million, £115 million and £103 million respectively; full year 2014: £311 million, £265 million and £223 million respectively).

**B2 Profit before tax - asset management operations**

The profit included in the income statement in respect of asset management operations for the year is as follows:

	2015 £m				2014 £m		
	Prudential M&G	Prudential Capital	US Investments	Eastspring Investments	Half year Total	Half year Total	Full year Total
Revenue (excluding NPH broker-dealer fees)	639	35	175	180	1,029	963	2,008
NPH broker-dealer feesnote (i)	-	-	272	-	272	248	503
Gross revenue	639	35	447	180	1,301	1,211	2,511
Charges (excluding NPH broker-dealer fees)	(389)	(40)	(163)	(142)	(734)	(691)	(1,477)

Edgar Filing: PRUDENTIAL PLC - Form 6-K

NPH broker-dealer feesnote (i)	-	-	(272)	-	(272)	(248)	(503)
Gross charges	(389)	(40)	(435)	(142)	(1,006)	(939)	(1,980)
Share of profits from joint ventures and associates, net of related tax	7	-	-	20	27	20	42
Profit before tax	257	(5)	12	58	322	292	573
Comprising:							
Operating profit based on longer-term investment returnsnote (ii)	251	7	12	58	328	286	590
Short-term fluctuations in investment returns	6	(12)	-	-	(6)	6	(17)
Profit before tax	257	(5)	12	58	322	292	573

Notes

(i) NPH broker-dealer fees represent commissions received that are then paid on to the writing brokers on sales of investment products

To reflect their commercial nature, the amounts are also wholly reflected as charges within the income statement.

After allowing for these charges, there is no effect on profit from this item. The presentation in the table above shows the amounts attributable to this item so that the underlying revenue and charges can be seen.

(ii) M&G operating profit based on longer-term investment returns:

	2015 £m		2014 £m	
	Half year	Full year	Half year	Full year
Asset management fee income	489	953	462	953
Other income	2	1	1	1
Staff costs	(154)	(351)	(160)	(351)
Other costs	(94)	(203)	(89)	(203)
Underlying profit before performance-related fees	243	400	214	400
Share of associate's results	7	13	6	13
Performance-related fees	1	33	7	33
M&G operating profit based on longer-term investment returns	251	446	227	446

The revenue for M&G of £492 million (half year 2014: £470 million; full year 2014: £987 million), comprises the amounts for asset management fee income, other income and performance-related fees shown above, is different to the amount of £639 million shown in the main table of this note. This is because, the £492 million (half year 2014: £470 million; full year 2014: £987 million) is after deducting commissions which would have been included as charges in the main table. The difference in the presentation of commission is aligned with how management reviews the business.

B3 Acquisition costs and other expenditure

	2015 £m		2014 £m	
	Half year	Full year	Half year	Full year
Acquisition costs incurred for insurance policies	(1,580)	(2,668)	(1,307)	(2,668)
Acquisition costs deferred less amortisation of acquisition costs	(15)	916	272	916
Administration costs and other expenditure	(2,314)	(4,486)	(2,097)	(4,486)
Movements in amounts attributable to external unit holders of consolidated investment funds	(596)	(514)	(204)	(514)
Total acquisition costs and other expenditure	(4,505)	(6,752)	(3,336)	(6,752)

Included in total acquisition costs and other expenditure is depreciation of property, plant and equipment of £(55) million (half year 2014: £(45) million; full year 2014: £(90) million).

B4 Effect of changes and other accounting features on insurance assets and liabilities

The following features are of relevance to the determination of the half year 2015 results:

(a) Asia insurance operations

In half year 2015, the IFRS operating profit based on longer-term investment returns for Asia insurance operations included a net credit of £29 million (half year 2014: £19 million; full year 2014: £49 million) representing a small number of non-recurring items, none of which are individually significant.

(b) US insurance operations

Amortisation of deferred acquisition costs

Jackson applies a mean reversion technique for amortisation of deferred acquisition costs on variable annuity business which dampens the effects of short-term market movements on expected gross profits against which deferred acquisition costs are amortised. To the extent that the mean reversion methodology does not fully dampen the effects of market returns, there is a charge or credit for accelerated or decelerated amortisation. For half year 2015, reflecting the effect of releasing higher 2012 returns in the mean reversion calculation, there was a credit for decelerated amortisation of £20 million (half year 2014: credit for decelerated amortisation of £10 million; full year 2014: charge for accelerated amortisation of £13 million) to the operating profit based on longer-term investment returns. See note C5.1(b) for further details.

(c) UK insurance operations

Annuity business: allowance for credit risk

For IFRS reporting, the results for UK shareholder-backed annuity business are particularly sensitive to the allowances made for credit risk. The allowance is reflected in the deduction from the valuation rate of interest for discounting projected future annuity payments to policyholders that would have otherwise applied. Credit risk allowance comprises: (i) an amount for long-term best estimate defaults; and (ii) additional provisions for credit risk premium, downgrade resilience and short-term defaults.

The weighted components of the bond spread over swap rates for shareholder-backed fixed and linked annuity business for (PRIL), the principal company which writes the UK's shareholder backed business, based on the asset mix at these dates are shown below.

	30 Jun 2015 (bps)			30 Jun 2014 (bps)			31 Dec 2014 (bps)		
	Pillar 1			Pillar 1			Pillar 1		
	regulatory	basis	Adjustment IFRS	regulatory	basis	Adjustment IFRS	regulatory	basis	Adjustment IFRS
Bond spread over swap rates note (i)	150	-	150	119	-	119	143	-	143
Credit risk allowance:									
Long-term expected defaults note (ii)	15	-	15	14	-	14	14	-	14
Additional provisionsnote (iii)	44	(13)	31	47	(19)	28	44	(12)	32
Total credit risk allowance	59	(13)	46	61	(19)	42	58	(12)	46
Liquidity premium	91	13	104	58	19	77	85	12	97

Notes

- (i) Bond spread over swap rates reflect market observed data.
- (ii) Long-term expected defaults are derived by applying Moody's data from 1970 to 2009 and the definition of the credit rating used is the second highest credit rating published by Moody's, Standard & Poor's and Fitch.
- (iii) Additional provisions comprise credit risk premium, which is derived from Moody's data from 1970 to 2009, an allowance for a one-notch downgrade of the portfolio subject to credit risk and an additional allowance for short-term defaults.

The prudent Pillar 1 regulatory basis reflects the overriding objective of maintaining sufficient provisions and capital to ensure payments to policyholders can be made. The approach for IFRS aims to establish liabilities that are closer to 'best estimate'.

The movements during the first half of 2015 of the average basis points allowance for PRIL on Pillar 1 regulatory and IFRS bases are analysed as follows:

	Pillar 1 Regulatory basis (bps)	IFRS (bps)
Total allowance for credit risk at 31 December 2014	58	46
Credit rating changes	1	1
Other effects (including for new business)	-	(1)
Total allowance for credit risk at 30 June 2015	59	46

Overall the movement has led to the credit allowance for Pillar 1 purposes to be 39 per cent (half year 2014: 51 per cent; full year 2014: 41 per cent) of the bond spread over swap rates. For IFRS purposes it represents 31 per cent (half year 2014: 35 per cent; full year 2014: 32 per cent) of the bond spread over swap rates.

The reserves for credit risk allowance at 30 June 2015 for the UK shareholder annuity fund were as follows:

	Pillar 1 Regulatory basis Total £bn	IFRS Total £bn
PRIL	2.0	1.5
PAC non-profit sub-fund	0.2	0.2
Total 30 June 2015	2.2	1.7
Total 30 June 2014	1.9	1.3
Total 31 December 2014	2.2	1.7

Annuity business: longevity reinsurance transaction

In the first half of 2015, the UK insurance operations result includes a benefit of £61 million arising from a longevity reinsurance transaction entered into in respect of £1.7 billion of annuity liabilities (half year 2014: £nil; full year 2014: a benefit of £30 million in respect of £0.8 billion of annuity liabilities).

## B5 Tax charge

(a) Total tax charge by nature of expense

The total tax charge in the income statement is as follows:

2015 £m

2014 £m

Edgar Filing: PRUDENTIAL PLC - Form 6-K

	Current tax	Deferred tax	Half year Total	Half year Total	Full year Total
Tax charge					
UK tax	(152)	(7)	(159)	(262)	(578)
Overseas tax	(273)	(214)	(487)	(301)	(360)
Total tax charge	(425)	(221)	(646)	(563)	(938)

The current tax charge of £425 million includes £16 million (half year 2014: £23 million; full year 2014: £37 million) in respect of the tax charge for the Hong Kong operation. The Hong Kong current tax charge is calculated as 16.5 per cent for all periods on either: (i) 5 per cent of the net insurance premium; or (ii) the estimated assessable profits, depending on the nature of the business written.

The total tax charge comprises tax attributable to policyholders and unallocated surplus of with-profits funds, unit-linked policies and shareholders as shown below:

	2015 £m		2014 £m		
	Current tax	Deferred tax	Half year Total	Half year Total	Full year Total
Tax charge					
Tax charge to policyholders' returns	(142)	(60)	(202)	(284)	(540)
Tax charge attributable to shareholders	(283)	(161)	(444)	(279)	(398)
Total tax charge	(425)	(221)	(646)	(563)	(938)

The principal reason for the decrease in the tax charge attributable to policyholders' returns compared to half year 2014 is a decrease in the current tax due to the taxable market value movements on bond assets. An explanation of the tax charge attributable to shareholders is shown in note (b) below.

(b) Reconciliation of effective tax rate

Reconciliation of tax charge on profit attributable to shareholders

	Half year 2015 £m (Except for tax rates)					
	Asia insurance operations	US insurance operations	UK insurance operations	Other operations		Total

Total profit	14%	3%	21%	40%	15%

\* The expected tax rates (rounded to the nearest whole percentage) reflect the corporation tax rates generally applied to taxable profits of the relevant country jurisdictions. For Asia operations the expected tax rates reflect the corporation tax rates weighted by reference to the source of profits of operations contributing to the aggregate business

result. The expected tax rate for other operations reflects the mix of business between UK and overseas non-insurance operations, which are taxed at a variety of rates. The rates will fluctuate from year to year dependent on the mix of profits.

† In order to show the UK insurance business on a comparable basis, the half year and full year 2014 comparatives exclude the contribution from the sold PruHealth and PruProtect businesses from the UK insurance operations and show it in the column for Other operations.

Total	25.74p	659	23.84p	610	35.03p	895

Dividend per share

Interim dividends are recorded in the period in which they are paid. Final dividends are recorded in the period in which they are approved by shareholders. The final dividend for the year ended 31 December 2014 of 25.74 pence per ordinary share was paid to eligible shareholders on 21 May 2015 and the 2014 interim dividend of 11.19 pence per ordinary share was paid to eligible shareholders on 25 September 2014.

The 2015 interim dividend of 12.31 pence per ordinary share will be paid on 24 September 2015 in sterling to shareholders on the principal register and the Irish branch register at 6.00pm BST on 21 August 2015 (Record Date), and in Hong Kong dollars to shareholders on the Hong Kong branch register at 4.30pm Hong Kong time on the Record Date (HK Shareholders). Holders of US American Depositary Receipts (US Shareholders) will be paid their dividends in US dollars on or about 1 October 2015. The interim dividend will be paid on or about 1 October 2015 in Singapore dollars to shareholders with shares standing to the credit of their securities accounts with The Central Depository (Pte.) Limited (CDP) at 5.00pm Singapore time on the Record Date (SG Shareholders). The dividend payable to the HK Shareholders will be translated using the exchange rate quoted by the WM Company at the close of business on 10 August 2015. The exchange rate at which the dividend payable to the SG Shareholders will be translated into Singapore Dollars, will be determined by CDP.

Shareholders on the principal register and Irish branch register will be able to participate in a Dividend Reinvestment Plan.

C BALANCE SHEET NOTES

C1 Analysis of Group position by segment and business type

To explain the assets, liabilities and capital of the Group's businesses more comprehensively, it is appropriate to provide analyses of the Group's statement of financial position by operating segment and type of business.

## Notes

(i) The largest component of the other non-investment and non-cash assets of £14,664 million (30 June 2014: £13,867 million; 31 December 2014: £12,781 million) is the reinsurers' share of contract liabilities of £7,259 million (30 June 2014: £6,743 million; 31 December 2014: £7,167 million). As set out in note C2.2 these amounts relate primarily to the reinsurance ceded in respect of the acquired REALIC business by the Group's US insurance operations.

Within other non-investment and non-cash assets are premiums receivable of £884 million (30 June 2014: £317 million; 31 December 2014: £416 million) of which 86 per cent are due within one year. The remaining 14 per cent, due after one year, relates to products where charges are levied against premiums in future years.

Also included within other non-investment and non-cash assets are property, plant and equipment of £984 million (30 June 2014: £910 million; 31 December 2014: £978 million) of which £659 million (30 June 2014: £611 million; 31 December 2014: £660 million) was held by the Group's with-profits operations, primarily by the consolidated subsidiaries for venture funds and other investment purposes of the PAC with-profits fund. The Group made additions to property, plant and equipment of £105 million (30 June 2014: £58 million; 31 December 2014: £172 million).

(ii) Within other non-insurance liabilities are other creditors of £5,515 million (30 June 2014: £4,999 million; 31 December 2014: £4,262 million) of which £5,193 million (30 June 2014: £4,720 million; 31 December 2014: £3,935 million) is due within one year.

\* Participating funds business in the table above is presented after the elimination on consolidation of the balances relating to an intra-group reinsurance contract entered into during the period between the UK with-profits and Asia with-profits operations. In the segmental analysis presented in note C1.1, the balances are presented before elimination in the individual insurance operations segment, with the adjustment presented separately under intra-group eliminations.

## C2 Analysis of segment position by business type

To show the statement of financial position by reference to the differing degrees of policyholder and shareholder economic interest of the different types of business, the analysis below is structured to show the assets and liabilities of each segment by business type.

Notes

(i) These amounts are for separate account assets and liabilities for all variable annuity products comprising those with and without guarantees. Assets and liabilities attaching to variable annuity business that are not held in the separate account, eg. in respect of guarantees are shown within other business.

(ii) Other investments comprise:

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
Derivative assets*	765	600	916
Partnerships in investment pools and other**	750	749	754
	1,515	1,349	1,670

\* After taking account of the derivative liabilities of £258 million (30 June 2014: £284 million; 31 December 2014: £251 million), which are included in other non-insurance liabilities, the derivative position for US operations is a net asset of £507 million (30 June 2014: net asset of £316 million; 31 December 2014: net asset of £665 million).

\*\* Partnerships in investment pools and other comprise primarily investments in limited partnerships. These include interests in the PPM America Private Equity Fund and diversified investments in other partnerships by independent money managers that generally invest in various equities and fixed income loans and securities.

(iii) Equity securities and portfolio holdings in unit trusts include investments in mutual funds, the majority of which are equity-based.

(iv) Included within other non-investment and non-cash assets of £6,562 million (30 June 2014: £6,440 million; 31 December 2014: £6,617 million) were balances of £5,817 million (30 June 2014: £5,842 million; 31 December 2014: £5,979 million) for reinsurers' share of insurance contract liabilities. Of the £5,817 million as at 30 June 2015, £5,057 million related to the reinsurance ceded in respect of the acquired REALIC business (30 June 2014: £5,179 million; 31 December 2014: £5,174 million). Jackson holds collateral for certain of these reinsurance arrangements with a corresponding funds withheld liability. As of 30 June 2015, the funds withheld liability of £2,204 million (30 June 2014: £2,019 million; 31 December 2014: £2,201 million) was recorded within other non-insurance liabilities.

(v) Changes in shareholders' equity

## Notes

- (i) The PAC with-profits sub-fund (WPSF) mainly contains with-profits business but it also contains some non-profit business (unit-linked, term assurances and annuities). Included in the PAC with-profits fund is £11.3 billion (30 June 2014: £11.2 billion; 31 December 2014: £11.7 billion) of non-profits annuities liabilities. The WPSF's profits are apportioned 90 per cent to its policyholders and 10 per cent to shareholders as surplus for distribution is determined via the annual actuarial valuation. For the purposes of this table and subsequent explanation, references to the WPSF also include, for convenience, the amounts attaching to the Defined Charges Participating Sub-fund which comprises 3.84 per cent of the total assets of the WPSF and includes the with-profits annuity business transferred to Prudential from the Equitable Life Assurance Society on 1 December 2007 (with assets of approximately £1.7 billion). Profits to shareholders on this with-profits annuity business emerge on a 'charges less expenses' basis and policyholders are entitled to 100 per cent of the investment earnings.
- (ii) The fund is solely for the benefit of policyholders of SAIF. Shareholders have no interest in the profits of this fund although they are entitled to asset management fees on this business. SAIF is a separate sub-fund within the PAC long-term business fund.

(iii) Other investments comprise:

	2015 £m		2014 £m	
	30 Jun	31 Dec	30 Jun	31 Dec
Derivative assets*	2,555	2,344	1,262	2,344
Partnerships in investment pools and other**	3,451	3,438	3,171	3,438
	6,006	5,782	4,433	5,782

\* After including derivative liabilities of £841 million (30 June 2014: £751 million; 31 December 2014: £1,381 million), which are also included in the statement of financial position, the overall derivative position was a net asset of £1,714 million (30 June 2014: net asset of £511 million; 31 December 2014: net asset of £963 million).

Edgar Filing: PRUDENTIAL PLC - Form 6-K

\*\* Partnerships in investment pools and other comprise mainly investments held by the PAC with-profits fund. These investments are primarily investments in limited partnerships and additionally, investments in property funds.

### C3 Assets and Liabilities - Classification and Measurement

#### C3.1 Group assets and liabilities - Classification

The classification of the Group's assets and liabilities, and its corresponding accounting carrying values reflect the requirements of IFRS. For financial investments the basis of valuation reflects the Group's application of IAS 39 'Financial Instruments: Recognition and Measurement' as described further below. Where assets and liabilities have been valued at fair value or measured on a different basis but fair value is disclosed, the Group has followed the principles under IFRS 13 'Fair value measurement'. The basis applied is summarised below:

	30 Jun 2015 £m		Fair value, where applicable
	At fair value	Through profit or loss	
		Available-for-sale

### Notes

(i) Assets carried at cost or amortised cost are subject to impairment testing where appropriate under IFRS requirements. This category also includes assets which are valued by reference to specific IFRS standards such as reinsurers' share of insurance contract liabilities, deferred tax assets and investments accounted for under the equity method.

(ii) Realised gains and losses on the Group's investments for half year 2015 recognised in the income statement amounted to a net gain of £1.8 billion (30 June 2014: £1.8 billion; 31 December 2014: £2.9 billion).

(iii) The carrying value of investment contracts with discretionary participation features is determined on an IFRS 4 basis. It is impractical to determine the fair value of these contracts due to the lack of a reliable basis to measure the participation features.

### C3.2 Group assets and liabilities - Measurement

#### (a) Determination of fair value

The fair values of the assets and liabilities of the Group have been determined on the following bases.

The fair values of the financial instruments for which fair valuation is required under IFRS are determined by the use of current market bid prices for exchange-quoted investments, or by using quotations from independent third parties, such as brokers and pricing services or by using appropriate valuation techniques.

The estimated fair value of derivative financial instruments reflects the estimated amount the Group would receive or pay in an arm's length transaction. This amount is determined using quoted prices if exchange listed, quotations from independent third parties or valued internally using standard market practices.

The loans and receivables have been shown net of provisions for impairment. The fair value of loans has been estimated from discounted cash flows expected to be received. The rate of discount used was the market rate of interest where applicable.

The fair value of investment properties is based on market values as assessed by professionally qualified external valuers or by the Group's qualified surveyors.

The fair value of the subordinated and senior debt issued by the parent company is determined using the quoted prices from independent third parties.

The fair value of financial liabilities (other than derivative financial instruments) is determined using discounted cash flows of the amounts expected to be paid.

#### (b) Fair value hierarchy of financial instruments measured at fair value on recurring basis

The table below shows the financial instruments carried at fair value analysed by level of the IFRS 13 'Fair Value Measurement' defined fair value hierarchy. This hierarchy is based on the inputs to the fair value measurement and reflects the lowest level input that is significant to that measurement.

\* Loans in the table above are those classified as fair value through profit and loss in note C3.1.

In addition to the financial instruments shown above, the assets and liabilities held for sale on the consolidated statement of financial position at 31 December and 30 June 2014 in respect of Japan Life business included net

financial instruments balances of £844 million and £917 million respectively, primarily for equity securities and debt securities. Of this amount, £814 million and £888 million had been classified as level 1 and £30 million and £29 million as level 2 respectively.

(c) Valuation approach for level 2 fair valued financial instruments

A significant proportion of the Group's level 2 assets are corporate bonds, structured securities and other non-national government debt securities. These assets, in line with market practice, are generally valued using independent pricing services or third-party broker quotes. These valuations are determined using independent external quotations from multiple sources and are subject to a number of monitoring controls, such as monthly price variances, stale price reviews and variance analysis on prices achieved on subsequent trades.

Pricing services, where available, are used to obtain the third-party broker quotes. Where pricing services providers are used, a single valuation is obtained and applied.

When prices are not available from pricing services, quotes are sourced directly from brokers. Prudential seeks to obtain a number of quotes from different brokers so as to obtain the most comprehensive information available on their executability. Where quotes are sourced directly from brokers, the price used in the valuation is normally selected from one of the quotes based on a number of factors, including the timeliness and regularity of the quotes and the accuracy of the quotes considering the spreads provided. The selected quote is the one which best represents an executable quote for the security at the measurement date.

Generally, no adjustment is made to the prices obtained from independent third parties. Adjustment is made in only limited circumstances, where it is determined that the third party valuations obtained do not reflect fair value (e.g. either because the value is stale and/or the values are extremely diverse in range). These are usually securities which are distressed or that could be subject to a debt restructure or where reliable market prices are no longer available due to an inactive market or market dislocation. In these instances, prices are derived using internal valuation techniques including those as described above in this note with the objective of arriving at a fair value measurement which reflects the price at which an orderly transaction would take place between market participants on the measurement date. The techniques used require a number of assumptions relating to variables such as credit risk and interest rates. Examples of such variables include an average credit spread based on the corporate bond universe and the relevant duration of the asset being valued. Prudential determines the input assumptions based on the best available information at the measurement dates. Securities valued in such manner are classified as level 3 where these significant inputs are not based on observable market data.

Of the total level 2 debt securities of £105,292 million at 30 June 2015 (30 June 2014: £99,922 million; 31 December 2014: £107,731 million), £10,190 million are valued internally (30 June 2014: £8,813 million; 31 December 2014: £10,093 million). The majority of such securities are valued using matrix pricing, which is based on assessing the credit quality of the underlying borrower to derive a suitable discount rate relative to government securities of a comparable duration. Under matrix pricing, the debt securities are priced taking the credit spreads on comparable quoted public debt securities and applying these to the equivalent debt instruments factoring in a specified liquidity premium. The majority of the parameters used in this valuation technique are readily observable in the market and, therefore, are not subject to interpretation.

(d) Fair value measurements for level 3 fair valued financial instruments

Reconciliation of movements in level 3 financial instruments measured at fair value

The following table reconciles the value of level 3 fair valued financial instruments at 1 January 2015 to that presented at 30 June 2015.

Total investment return recorded in the income statement represents interest and dividend income, realised gains and losses, unrealised gains and losses on the assets classified at fair value through profit and loss and foreign exchange movements on an individual entity's overseas investments.

Edgar Filing: PRUDENTIAL PLC - Form 6-K

Total gains and losses recorded in other comprehensive income includes unrealised gains and losses on debt securities held as available-for-sale within Jackson and foreign exchange movements arising from the retranslation of the Group's overseas subsidiaries and branches.

Total	131	163	344

Valuation approach for level 3 fair valued financial instruments

Investments valued using valuation techniques include financial investments which by their nature do not have an externally quoted price based on regular trades, and financial investments for which markets are no longer active as a result of market conditions e.g. market illiquidity. The valuation techniques used include comparison to recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis,

option adjusted spread models and, if applicable, enterprise valuation. These techniques may include a number of assumptions relating to variables such as credit risk and interest rates. Changes in assumptions relating to these variables could positively or negatively impact the reported fair value of these instruments. When determining the inputs into the valuation techniques used priority is given to publicly available prices from independent sources when available, but overall the source of pricing is chosen with the objective of arriving at a fair value measurement which reflects the price at which an orderly transaction would take place between market participants on the measurement date.

The fair value estimates are made at a specific point in time, based upon available market information and judgments about the financial instruments, including estimates of the timing and amount of expected future cash flows and the credit standing of counterparties. Such estimates do not reflect any premium or discount that could result from offering for sale at one time the Group's entire holdings of a particular financial instrument, nor do they consider the tax impact of the realisation of unrealised gains or losses from selling the financial instrument being fair valued. In some cases the disclosed value cannot be realised in immediate settlement of the financial instrument.

In accordance with the Group's risk management framework, the estimated fair value of derivative financial instruments valued internally using standard market practices are subject to assessment against external counterparties' valuations.

At 30 June 2015 the Group held £3,371 million (30 June 2014: £3,456 million; 31 December 2014: £3,760 million), 1 per cent of the total fair valued financial assets net of fair valued financial liabilities (30 June 2014: 1 per cent; 31 December 2014: 1 per cent), within level 3.

Included within these amounts were loans of £2,039 million at 30 June 2015 (30 June 2014: £1,864 million; 31 December 2014: £2,025 million), measured as the loan outstanding balance attached to REALIC and held to back the liabilities for funds withheld under reinsurance arrangements. The funds withheld liability of £2,204 million at 30 June 2015 (30 June 2014: £2,019 million; 31 December 2014: £2,201 million) was also classified within level 3, accounted for on a fair value basis being equivalent to the carrying value of the underlying assets.

Excluding the loans and funds withheld liability under REALIC's reinsurance arrangements as described above, which amounted to a net liability of £(165) million (30 June 2014: £(155) million; 31 December 2014: £(176) million), the level 3 fair valued financial assets net of financial liabilities were £3,536 million (30 June 2014: £3,611 million; 31 December 2014: £3,936 million). Of this amount, a net liability of £(378) million (30 June 2014: net liability of £(228) million; 31 December 2014: net asset of £11 million) were internally valued, representing 0.1 per cent of the total fair valued financial assets net of financial liabilities (30 June 2014: 0.1 per cent; 31 December 2014: 0.1 per cent). Internal valuations are inherently more subjective than external valuations. Included within these internally valued net liabilities were:

- (a) Debt securities of £251 million (30 June 2014: £80 million; 31 December 2014: £298 million), which were either valued on a discounted cash flow method with an internally developed discount rate or on external prices adjusted to reflect the specific known conditions relating to these securities (e.g. distressed securities or securities which were being restructured).
- (b) Private equity and venture investments of £715 million (30 June 2014: £897 million; 31 December 2014: £1,002 million) which were valued internally based on management information available for these investments. These investments, in the form of debt and equity securities, were principally held by consolidated investment funds which are managed on behalf of third parties.
- (c) Liabilities of £(1,379) million (30 June 2014: £(1,206) million; 31 December 2014: £(1,269) million) for the net asset value attributable to external unit holders respect of the consolidated investment funds, which are non-recourse to the Group. These liabilities are valued by reference to the underlying assets.

(d) Derivative liabilities of £(28) million (30 June 2014: £ nil; 31 December 2014: £(23) million) which are valued internally using standard market practices but are subject to independent assessment against counterparties' valuations.

(e) Other sundry individual financial investments of £63 million (30 June 2014: £1 million; 31 December 2014: £3 million).

Of the internally valued net liability referred to above of £(378) million (30 June 2014: £(228) million; 31 December 2014: net asset of £11 million):

(a) A net liability of £(525) million (30 June 2014: net liability of £(267) million; 31 December 2014: net liability of £(133) million) was held by the Group's participating funds and therefore shareholders' profit and equity are not impacted by movements in the valuation of these financial instruments.

(b) A net asset of £147 million (30 June 2014: £39 million; 31 December 2014: £144 million) was held to support non-linked shareholder-backed business. If the value of all the level 3 instruments held to support non-linked shareholder-backed business valued internally was varied downwards by 10 per cent, the change in valuation would be £15 million (30 June 2014: £4 million; 31 December 2014: £14 million), which would reduce shareholders' equity by this amount before tax. Of this amount, a decrease of £14 million (30 June 2014: a decrease of £3 million; 31 December 2014: a decrease of £13 million) would pass through the income statement substantially as part of short-term fluctuations in investment returns outside of operating profit and a £1 million decrease (30 June 2014: a decrease of £1 million; 31 December 2014: a decrease of £1 million) would be included as part of other comprehensive income, being unrealised movements on assets classified as available-for-sale.

(e) Transfers into and transfers out of levels

The Group's policy is to recognise transfers into and transfers out of levels as of the end of each half year reporting period except for material transfers which are recognised as of the date of the event or change in circumstances that caused the transfer.

During half year 2015, the transfers between levels within the Group's portfolio were primarily transfers from level 1 to 2 of £662 million and transfers from level 2 to level 1 of £207 million. These transfers which primarily relate to debt securities arose to reflect the change in the observability of the inputs used in valuing these securities.

In addition, the transfers into and out of level 3 in half year 2015 were £47 million and £1 million, respectively. These transfers were primarily between levels 3 and 2 for debt securities.

(f) Valuation processes applied by the Group

The Group's valuation policies, procedures and analyses for instruments categorised as level 3 are overseen by Business Unit committees as part of the Group's wider financial reporting governance processes. The procedures undertaken include approval of valuation methodologies, verification processes, and resolution of significant or complex valuation issues. In undertaking these activities the Group makes use of the extensive expertise of its asset management functions.

### C3.3 Debt securities

This note provides analysis of the Group's debt securities, including asset-backed securities and sovereign debt securities, by segment.

Edgar Filing: PRUDENTIAL PLC - Form 6-K

Debt securities are carried at fair value. The amounts included in the statement of financial position are analysed as follows, with further information relating to the credit quality of the Group's debt securities at 30 June 2015 provided in the notes below.

Total US debt securities†	32,117	30,586	32,980

\* A 1990 SEC rule that facilitates the resale of privately placed securities under Rule 144A that are without SEC registration to qualified institutional investors. The rule was designed to develop a more liquid and efficient institutional resale market for unregistered securities.

† Debt securities for US operations included in the statement of financial position comprise:

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
Available-for-sale	32,034	30,511	32,897
Fair value through profit and loss:			
Securities held to back liabilities for funds withheld under reinsurance arrangement	83	75	83
	32,117	30,586	32,980

(ii) Valuation basis, presentation of gains and losses and securities in an unrealised loss position

Under IAS 39, unless categorised as 'held to maturity' or 'loans and receivables' debt securities are required to be fair valued. Where available, quoted market prices are used. However, where securities do not have an externally quoted price based on regular trades or where markets for the securities are no longer active as a result of market conditions, IAS 39 requires that valuation techniques be applied. IFRS 13 requires classification of the fair values applied by the Group into a three level hierarchy. At 30 June 2015, 0.1 per cent of Jackson's debt securities were classified as level 3 (30 June 2014: 0.1 per cent; 31 December 2014: 0.1 per cent) comprising of fair values where there are significant inputs which are not based on observable market data.

Except for certain assets covering liabilities that are measured at fair value, the debt securities of the US insurance operations are classified as 'available-for-sale'. Unless impaired, fair value movements are recognised in other comprehensive income. Realised gains and losses, including impairments, recorded in the income statement are as shown in note B1.2 of this report.

Movements in unrealised gains and losses

Edgar Filing: PRUDENTIAL PLC - Form 6-K

There was a movement in the statement of financial position value for debt securities classified as available-for-sale from a net unrealised gain of £1,840 million to a net unrealised gain of £1,086 million as analysed in the table below. This decrease reflects the effects of higher long-term interest rates.

	30 Jun 2015 £m	Changes in unrealised appreciation	Foreign exchange translation**	31 Dec 2014 £m
		Reflected as part of movement in other comprehensive income		
Assets fair valued at below book value				
Book value*	10,279			5,899

More than 6 months	22	(10)	22	(11)	25	(11)
	61	(21)	22	(11)	45	(19)

(iii) Ratings

The following table summarises the ratings of securities detailed above by using S&P, Moody's, Fitch and implicit ratings of mortgage-backed securities based on National Association of Insurance Commissioners (NAIC) valuations:

2015 £m                      2014 £m

Edgar Filing: PRUDENTIAL PLC - Form 6-K

	30 Jun	30 Jun	31 Dec
S&P - AAA	145	131	164
S&P - AA+ to AA-	5,216	5,352	6,067
S&P - A+ to A-	8,462	7,776	8,640
S&P - BBB+ to BBB-	10,345	10,065	10,308
S&P - Other	876	1,027	1,016
	25,044	24,351	26,195
Moody's - Aaa	218	175	84
Moody's - Aa1 to Aa3	30	6	29
Moody's - A1 to A3	35	86	27
Moody's - Baa1 to Baa3	72	85	72
Moody's - Other	7	10	8
	362	362	220
Implicit ratings of MBS based on NAIC* valuations (see below)			
NAIC 1	2,416	2,558	2,786
NAIC 2	57	116	85
NAIC 3-6	46	75	58
	2,519	2,749	2,929
Fitch	300	161	300
Other **	3,892	2,963	3,336
Total debt securities	32,117	30,586	32,980

\* The Securities Valuation Office of the NAIC classifies debt securities into six quality categories range from Class 1 (the highest) to Class 6 (the lowest). Performing securities are designated as Classes 1 to 5 and securities in or near default are designated Class 6.

\*\*The amounts within 'Other' which are not rated by S&P, Moody's nor Fitch, nor are MBS securities using the revised regulatory ratings, have the following NAIC classifications:

	2015 £m		2014 £m	
	30 Jun	30 Jun	30 Jun	31 Dec
NAIC 1	2,177	1,140	1,322	
NAIC 2	1,601	1,756	1,890	
NAIC 3-6	114	67	124	
	3,892	2,963	3,336	

For some mortgage-backed securities within Jackson, the table above includes these securities using the regulatory ratings detail issued by the NAIC. These regulatory ratings levels were established by external third parties (PIMCO for residential mortgage-backed securities and BlackRock Solutions for commercial mortgage-backed securities).

(c) UK insurance operations

	£m						UK insurance operations		
	Other funds and subsidiaries			Other annuity and long-term business			30 Jun	30 Jun	31 Dec

	2,034	30,630	5,459	18,889	2,368	59,380	58,858	61,724
Moody's - Aaa	44	1,502	191	386	46	2,169	2,145	2,063
Moody's - Aa1 to Aa3	59	2,320	1,050	2,660	500	6,589	7,045	7,129
Moody's - A1 to A3	50	1,015	87	1,367	179	2,698	2,400	2,686
Moody's - Baa1 to Baa3	29	882	93	312	40	1,356	1,443	1,376
Moody's - Other	4	540	23	82	1	650	173	436
	186	6,259	1,444	4,807	766	13,462	13,206	13,690
Fitch	14	408	79	222	21	744	744	848
Other	231	5,901	143	3,696	319	10,290	8,872	10,087
Total debt securities	2,465	43,198	7,125	27,614	3,474	83,876	81,680	86,349

Where no external ratings are available, internal ratings produced by the Group's asset management operation, which are prepared on the Company's assessment of a comparable basis to external ratings, are used where possible. The £10,290 million total debt securities held at 30 June 2015 (30 June 2014: £8,872 million; 31 December 2014: £10,087 million) which are not externally rated are either internally rated or unrated. These are analysed as follows:

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
Internal ratings or unrated:			
AAA to A-	5,306	4,082	4,917
BBB to B-	3,592	3,403	3,755
Below B- or unrated	1,392	1,387	1,415
Total	10,290	8,872	10,087

The majority of unrated debt security investments were held in SAIF and the PAC with-profits fund and relate to convertible debt and other investments which are not covered by ratings analysts nor have an internal rating attributed to them. Of the £4,015 million for PRIL and other annuity and long-term business investments for non-linked shareholder-backed business which are not externally rated, £1,156 million were internally rated AA+ to AA-, £1,627 million A+ to A-, £1,085 million BBB+ to BBB-, £59 million BB+ to BB- and £88 million were internally rated B+ and below or unrated.

(d) Asset management operations

The debt securities are principally held by Prudential Capital.

	2015 £m	2014 £m

Prime including agency (2015: 76% AA, 2% A)	953	1,108	1,088
CMBS (2015: 51% AAA, 25% AA, 19% A)	2,212	2,224	2,343
CDO funds (2015: 24% AAA, 11% A), including £nil exposure to sub-prime	45	38	53
Other ABS (2015: 21% AAA, 15% AA, 52% A), including £70 million exposure to sub-prime	546	490	555
Total	4,173	4,336	4,518

(iii) UK insurance operations

The holdings of the UK shareholder-backed operations include £694 million (30 June 2014: £626 million; 31 December 2014: £597 million) relating to asset-backed securities held in the unit-linked funds. The remaining amount relates to investments held by PRIL with a primary exposure to the UK market.

Of the holdings of the with-profits operations, £1,358 million (30 June 2014: £1,266 million; 31 December 2013: £1,333 million) relates to exposure to the US markets with the remaining exposure being primarily to the UK market.

(iv) Asset management operations

Asset management operations' exposure to asset-backed securities is held by Prudential Capital with no sub-prime exposure. Of the £712 million, 90 per cent (30 June 2014: 86 per cent; 31 December 2014: 89 per cent) are graded AAA.

(f) Group sovereign debt and bank debt exposure

The Group exposures held by the shareholder-backed business and with-profits funds in sovereign debts and bank debt securities at 30 June 2015:

Total	1,125	3,523	4,648	309	1,013	1,322	5,970	5,432	5,827

The table above excludes assets held to cover linked liabilities and those of the consolidated unit trusts and similar funds. In addition, the table above excludes the proportionate share of sovereign debt holdings of the Group's joint venture operations.

C3.4 Loans portfolio

Loans are accounted for at amortised cost net of impairment except for:

- certain mortgage loans which have been designated at fair value through profit and loss of the UK insurance operations as this loan portfolio is managed and evaluated on a fair value basis; and
- certain policy loans of the US insurance operations which are held to back liabilities for funds withheld under reinsurance arrangement and are also accounted on a fair value basis.

The amounts included in the statement of financial position are analysed as follows:

		2015 £m	2014 £m	
		30 Jun	30 Jun	31 Dec
Insurance operations:				
	Asianote (a)	1,009	916	1,014
	USnote (b)	6,798	6,130	6,719
	UKnote (c)	3,845	4,389	4,254
Asset management operations	note (d)	926	1,022	854
Total		12,578	12,457	12,841

(a) Asia insurance operations

The loans of the Group's Asia insurance operations comprise:

	2015 £m		2014 £m	
	30 Jun	30 Jun	31 Dec	
Mortgage loans‡	105	65	88	
Policy loans‡	676	615	672	
Other loans‡‡	228	236	254	
Total	1,009	916	1,014	

‡ The mortgage and policy loans are secured by properties and life insurance policies respectively.

‡‡ The majority of the other loans are commercial loans held by the Malaysia operation and which are all rated as investment grade by two local rating agencies.

(b) US insurance operations

The loans of the Group's US insurance operations comprise:

	30 Jun 2015 £m			30 Jun 2014 £m			31 Dec 2014 £m		
	Loans backing liabilities for funds withheld		Other loans	Loans backing liabilities for funds withheld		Other loans	Loans backing liabilities for funds withheld		Other loans
	withheld	loans	Total	withheld	loans	Total	withheld	loans	Total
Mortgage loans†	-	3,933	3,933	-	3,490	3,490	-	3,847	3,847

Edgar Filing: PRUDENTIAL PLC - Form 6-K

Policy loans††	2,039	826	2,865	1,864	776	2,640	2,025	847	2,872
Total	2,039	4,759	6,798	1,864	4,266	6,130	2,025	4,694	6,719

† All of the mortgage loans are commercial mortgage loans which are collateralised by properties. The property types are industrial, multi-family residential, suburban office, retail and hotel.

†† The policy loans are secured by individual life insurance policies or annuity policies. Included within the policy loans are those accounted for at fair value through profit and loss to back liabilities for funds withheld under reinsurance. All other policy loans are accounted for at amortised cost, less any impairment.

The US insurance operations' commercial mortgage loan portfolio does not include any single-family residential mortgage loans and is therefore not exposed to the risk of defaults associated with residential sub-prime mortgage loans. The average loan size is £7.7 million (30 June 2014: £6.5 million; 31 December 2014: £7.2 million). The portfolio has a current estimated average loan to value of 57 per cent (30 June 2014: 60 per cent; 31 December 2014: 59 per cent).

At 30 June 2015, Jackson had mortgage loans with a carrying value of £nil (30 June 2014: £34 million; 31 December 2014: £13 million) where the contractual terms of the agreements had been restructured.

(c) UK insurance operations

The loans of the Group's UK insurance operations comprise:

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
SAIF and PAC WPSF			
Mortgage loans†	807	1,391	1,145
Policy loans	9	12	10
Other loans‡	1,467	1,503	1,510
Total SAIF and PAC WPSF loans	2,283	2,906	2,665
Shareholder-backed operations			
Mortgage loans†	1,558	1,478	1,585
Other loans	4	5	4
Total loans of shareholder-backed operations	1,562	1,483	1,589
Total	3,845	4,389	4,254

† The mortgage loans are collateralised by properties. By carrying value, 76 per cent of the £1,558 million (30 June 2014: 78 per cent of £1,478 million; 31 December 2014: 74 per cent of £1,585 million) held for shareholder-backed business relates to lifetime (equity release) mortgage business which has an average loan to property value of 30 per cent (30 June 2014: 30 per cent; 31 December 2014: 29 per cent).

‡ Other loans held by the PAC with-profits fund are all commercial loans and comprise mainly syndicated loans.

(d) Asset management operations

The loans of the asset management operations relate to loans and receivables managed by Prudential Capital. These assets are generally secured but most have no external credit ratings. Internal ratings prepared by the Group's asset management operations, as part of the risk management process, are:

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
Loans and receivables internal ratings:			
AAA	92	104	101
AA+ to AA-	32	-	-
A+ to A-	222	120	161

Average policyholder liability balances†				
Half year 2015	43,634	128,207	144,260	316,101
Half year 2014	36,328	109,710	136,126	282,164

\* On 1 January 2014, following consultation with the policyholders of PAC and regulators and court approval, the Hong Kong branch of PAC was transferred to separate subsidiaries established in Hong Kong. From this date the unallocated surplus of the Hong Kong with-profits business is reported within the Asia insurance operations segment.

† Averages have been based on opening and closing balances and adjusted for acquisitions, disposals and corporate transactions in the period and exclude unallocated surplus of with-profits funds.

‡ The Group's investment in joint ventures are accounted for on the equity method in the Group's statement of financial position. The Group's share of the policyholder liabilities as shown above relate to the joint venture life business in China, India and of the Takaful business in Malaysia.

§ The policyholder liabilities of the Asia insurance operations of £39,522 million as shown in the table above is after deducting the intragroup reinsurance liabilities ceded by the UK insurance operations of £1,310 million to the Hong Kong with-profits business. Including this amount total Asia policyholder liabilities are £40,832 million.

The items above represent the amount attributable to changes in policyholder liabilities and unallocated surplus of with-profits funds as a result of each of the components listed. The policyholder liabilities shown include investment contracts without discretionary participation features (as defined in IFRS 4) and their full movement in the period. The items above are shown gross of external reinsurance.

The analysis includes the impact of premiums, claims and investment movements on policyholders' liabilities. The impact does not represent premiums, claims and investment movements as reported in the income statement. For example, the premiums shown above are after any deductions for fees/charges and claims represent the policyholder liabilities provision released rather than the claim amount paid to the policyholder.

Average policyholder liability balances †				
Half year 2015	16,778	16,342	10,514	43,634
Half year 2014	13,653	14,204	8,472	36,328

\* The policyholder liabilities of the with-profits business of £17,046 million, shown in the table above, is after deducting the intra-group reinsurance liabilities ceded by the UK insurance operations of £1,310 million to the Hong Kong with-profits business. Including this amount the Asia with-profits policyholder liabilities are £18,356 million.

† Averages have been based on opening and closing balances and adjusted for acquisitions, disposals and corporate transactions in the period and exclude unallocated surplus of with-profits funds.

‡ The Group's investment in joint ventures are accounted for on an equity method and the Group's share of the policyholder liabilities as shown above relate to the joint venture life business in China, India and of the Takaful business in Malaysia.

Notes

(a) Movements in the period have been translated at the average exchange rates for the period ended 30 June 2015. The closing balance has been translated at the closing spot rates as at 30 June 2015. Differences upon retranslation are included in foreign exchange translation differences.

(b) On 1 January 2014, following consultation with the policyholders of PAC and regulators and court approval, the Hong Kong branch of PAC was transferred to separate subsidiaries established in Hong Kong. From this date the unallocated surplus of the Hong Kong with-profits business is reported within the Asia insurance operations segment.

(c) Net flows increased by 22 per cent from £1,514 million in half year 2014 to £1,848 million in half year 2015 predominantly reflecting increased flows from new business and continued growth of the in-force book.

(d) Surrenders and maturities/deaths have increased from £1,681 million in the first half of 2014 to £2,062 million in the first half of 2015. This is principally driven by higher maturities in the with-profits business, where higher maturities of a 10-year endowment bond arose in Hong Kong, and higher surrenders within the shareholder-backed business. The rate of surrenders for shareholder-backed business (expressed as a percentage of opening liabilities) was 5.0 per cent in the first half of 2015 (half year 2014: 4.7 per cent) as policyholders took advantage of equity market gains in the early part of 2015.

(e) Investment-related items and other movements in the first half of 2015 primarily represent gains from equity markets. These gains have been partially offset by losses on bonds held in the with-profits fund in particular, following rises in yields in the period.

C4.1(c) US insurance operations

(i) Analysis of movements in policyholder liabilities

A reconciliation of the total policyholder liabilities of US insurance operations from the beginning of the period to 30 June is as follows:

US insurance operations

Edgar Filing: PRUDENTIAL PLC - Form 6-K

Investment-related items and other movements	2,718	463	3,181
Foreign exchange translation differences note (a)	(2,249)	(1,311)	(3,560)
At 30 June 2014	71,453	40,556	112,009
Average policyholder liability balances*			
Half year 2015	83,844	44,363	128,207
Half year 2014	68,567	41,143	109,710

\* Averages have been based on opening and closing balances, and adjusted for any acquisitions, disposals and corporate transactions in the period.

Notes

- (a) Movements in the period have been translated at an average rate of \$1.52/£1.00 (30 June 2014: \$1.67/£1.00). The closing balance has been translated at closing rate of \$1.57/£1.00 (30 June 2014: \$1.71/£1.00). Differences upon retranslation are included in foreign exchange translation differences.
- (b) Net flows in the first half of 2015 were £4,351 million compared with £4,977 million in the first half of 2014 with surrenders, deaths and maturities growing broadly in line with the in-force book and premiums remaining in line with prior period given our disciplined approach to writing new business.
- (c) Positive investment-related items and other movements in variable annuity separate account liabilities of £383 million for the first six months in 2015 represents positive separate account return mainly following the increase in the US equity market in the period. Fixed annuity, GIC and other business investment and other movements include the interest credited to policyholders in the period. The negative £604 million movement in half year 2015 primarily related to the offsetting effect arising from a decrease in the guarantee reserves following the increase in interest rates in the period.

C4.1(d) UK insurance operations

- (i) Analysis of movements in policyholder liabilities and unallocated surplus of with-profits funds  
A reconciliation of the total policyholder liabilities and unallocated surplus of with-profits funds of UK insurance operations from the beginning of the period to 30 June is as follows:

Average policyholder liability balances*				
Half year 2015	89,427	22,972	31,861	144,260
Half year 2014	84,393	23,671	28,062	136,126

\* Averages have been based on opening and closing balances, and adjusted for any acquisitions, disposals and corporate transactions in the period, and exclude unallocated surplus of with-profits funds.

## Notes

- (a) On 1 January 2014, following consultation with the policyholders of PAC and regulators and court approval, the Hong Kong branch of PAC was transferred to separate subsidiaries established in Hong Kong. From this date the unallocated surplus of the Hong Kong with-profits business is reported within the Asia insurance operations segment.
- (b) Net outflows have improved from £1,818 million in the first half of 2014 to £1,365 million in the same period in 2015 primarily as a result of higher premium flows (up by £926 million to £4,895 million) into single premium bonds and pension products principally in the with-profits fund. This has been offset by higher surrenders in our unit-linked business. The levels of inflows/outflows for unit-linked business remains subject to annual variation as it is driven by corporate pension schemes with transfers in or out from a small number of schemes influencing the level of flows in the period.
- (c) Investment-related items and other movements of £2,316 million includes investment return and realised gains attributable to policyholders in the period. Offsetting these positive returns are unrealised losses on bonds within the with-profits funds and unit-linked funds as well as lower annuity liabilities following a rise in long-term bond yields in the first half of 2015.

## C5 Intangible assets

## C5.1 Intangible assets attributable to shareholders

## (a) Goodwill attributable to shareholders

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
Cost			
At beginning of period	1,583	1,581	1,581
Disposal of Japan Life business	(120)	-	-
Additional consideration paid on previously acquired business	2	-	-
Exchange differences	(4)	(3)	2
At end of period	1,461	1,578	1,583
Aggregate impairment	-	(120)	(120)
Net book amount at end of period	1,461	1,458	1,463

Goodwill attributable to shareholders comprises:

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
M&G	1,153	1,153	1,153
Other	308	305	310
	1,461	1,458	1,463

Other goodwill represents amounts arising from the purchase of entities by the Asia and the US operations. These goodwill amounts by acquired operations are not individually material.

The aggregate impairment of £120 million at 30 June 2014 and 31 December 2014 related to the goodwill held by the Japan Life business. The half year 2015 analysis shown above reflects the fact that this business was sold in February 2015 (see note D1).

## (b) Deferred acquisition costs and other intangible assets attributable to shareholders

The deferred acquisition costs and other intangible assets attributable to shareholders comprise:

Edgar Filing: PRUDENTIAL PLC - Form 6-K

	2015 £m 30 Jun	2014 £m 30 Jun	31 Dec

Balance at end of period	699	5,221	83	14	1,293	7,310	5,944	7,261

† PVIF and other intangibles includes amounts in relation to software rights with additions of £13 million, amortisation of £15 million and exchange losses of £1 million and a balance at 30 June 2015 of £63 million.

Note

PVIF and other intangibles comprise PVIF, distribution rights and other intangibles such as software rights. Distribution rights relate to amounts that have been paid or have become unconditionally due for payment as a result

of past events in respect of bancassurance partnership arrangements in Asia. These agreements allow for bank distribution of Prudential's insurance products for a fixed period of time.

US insurance operations  
Summary balances

The DAC amount in respect of US insurance operations comprises amounts in respect of:

	2015 £m		2014 £m	
	30 Jun		30 Jun	31 Dec
Variable annuity business	4,931		3,930	5,002
Other business	710		747	759
Cumulative shadow DAC (for unrealised gains/losses booked in Other Comprehensive Income)*	(420)		(656)	(584)
Total DAC for US operations	5,221		4,021	5,177

\* Consequent upon the negative unrealised valuation movement at half year 2015 of £762 million (30 June 2014: positive unrealised valuation movement of £1,023 million; 31 December 2014: positive unrealised valuation movement of £956 million), there is a gain of £165 million (30 June 2014: a charge of £212 million; 31 December 2014: a charge of £87 million) for altered 'shadow' DAC amortisation booked within other comprehensive income. These adjustments reflect movement from period to period, in the changes to the pattern of reported gross profits that would have happened if the assets reflected in the statement of financial position had been sold, crystallising the unrealised gains and losses, and the proceeds reinvested at the yields currently available in the market. At 30 June 2015, the cumulative shadow DAC balance as shown in the table above was negative £420 million (30 June 2014: negative £656 million; 31 December 2014: negative £584 million).

Overview of the deferral and amortisation of acquisition costs for Jackson

Under IFRS 4, the Group applies 'grandfathered' US GAAP for measuring the insurance assets and liabilities of Jackson. In the case of Jackson term business, acquisition costs are deferred and amortised in line with expected premiums. For annuity and interest-sensitive life business, acquisition costs are deferred and amortised in line with a combination of historical and future expected gross profits on the relevant contracts. For fixed and fixed index annuity and interest-sensitive life business, the key assumption is the long-term spread between the earned rate on investments and the rate credited to policyholders, which is based on an annual spread analysis. Expected gross profits also depend on mortality assumptions, assumed unit costs and terminations other than deaths (including the related charges), all of which are based on a combination of actual experience of Jackson, industry experience and future expectations. A detailed analysis of actual mortality, lapse and expense experience is performed using internally developed experience studies.

Acquisition costs for Jackson's variable annuity products are also amortised in line with the emergence of profits. The measurement of amortisation depends on historical and expected future gross profits which include fees (including those for guaranteed minimum death, income, or withdrawal benefits) as well as components related to mortality, lapse and expense.

Mean reversion technique

For variable annuity products, under US GAAP (as 'grandfathered' under IFRS 4) Jackson applies a mean reversion technique for its amortisation of deferred acquisition costs against projected gross profits. This technique is applied with the objective of adjusting the amortisation of deferred acquisition costs that would otherwise be highly volatile due to fluctuations in the level of future gross profits arising from changes in equity market levels. The mean reversion technique achieves this objective by applying a dynamic adjustment to the assumption for short-term future investment returns. Under the mean reversion technique applied by Jackson, the projected level of return for each of the next five years is adjusted from period to period so that in combination with the actual rates of return for the preceding three years, including the current period, the 7.4 per cent long-term annual return (gross of asset

management fees and other charges to policyholders, but net of external fund management fees) is realised on average over the entire eight-year period. Projected returns after the mean reversion period revert back to the 7.4 per cent assumption.

However, to ensure that the methodology does not over anticipate a reversion to the long-term level of returns following adverse markets, the mean reversion technique has a cap and floor feature whereby the projected returns in each of the next five years can be no more than 15 per cent per annum and no less than 0 per cent per annum (both gross of asset management fees and other charges to policyholders, but net of external fund management fees) in each year.

#### Sensitivity of amortisation charge

The amortisation charge to the income statement is reflected in both operating profit and short-term fluctuations in investment returns. The amortisation charge to the operating profit in a reporting period comprises:

- (i) A core amount that reflects a relatively stable proportion of underlying premiums or profit; and
- (ii) An element of acceleration or deceleration arising from market movements differing from expectations.

In periods where the cap and floor feature of the mean reversion technique are not relevant, the technique operates to dampen the second element above. Nevertheless, extreme market movements can cause material acceleration or deceleration of amortisation in spite of this dampening effect.

Furthermore, in those periods where the cap or floor is relevant, the mean reversion technique provides no further dampening and additional volatility may result.

In the first half of 2015, the DAC amortisation charge for operating profit was determined after including a credit for decelerated amortisation of £20 million (half year 2014: credit for decelerated amortisation of £10 million; full year 2014: charge for accelerated amortisation of £13 million). The first half of 2015 amount reflects the separate account performance of 2 per cent, which is lower than the assumed level for the year.

As noted above, the application of the mean reversion formula has the effect of dampening the impact of equity market movements on DAC amortisation while the mean reversion assumption lies within the corridor. It would take a significant movement in equity markets for the mean reversion assumption to move outside the corridor. Based on a pro-forma instantaneous movement at 1 July 2015, it would need to be outside the approximate range of negative 40 per cent to positive 30 per cent for this to apply.

## C6 Borrowings

### C6.1 Core structural borrowings of shareholder-financed operations

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
Holding company operations:			
Perpetual subordinated capital securitiesnote (i)	1,775	2,067	1,789
Subordinated notesnote (v)	2,122	1,530	1,531
Subordinated debt total	3,897	3,597	3,320
Senior debt:note (ii)

£250m 5.875% Bonds 2029	249	249	249
Holding company total	4,446	4,146	3,869

Edgar Filing: PRUDENTIAL PLC - Form 6-K

Prudential Capital bank loannote (iii)	275	275	275
Jackson US\$250m 8.15% Surplus Notes 2027	159	146	160
Total (per condensed consolidated statement of financial position)note (iv)	4,880	4,567	4,304

Notes

- (i) The perpetual subordinated capital securities are entirely US\$ denominated. The Group has designated all US\$2.80 billion (30 Jun 2014: US\$3.55 billion; 31 December 2014: US\$ 2.80 billion) of its perpetual subordinated debt as a net investment hedge under IAS 39 to hedge the currency risks related to the investment in Jackson.
- (ii) The senior debt ranks above subordinated debt in the event of liquidation.
- (iii) The Prudential Capital bank loan of £275 million has been made in two tranches: a £160 million loan drawn at a cost of 12 month £LIBOR plus 0.4 per cent maturing on 20 December 2017 and a £115 million loan drawn at a cost of 11 month £LIBOR plus 0.4 per cent also maturing on 20 December 2017.
- (iv) The maturity profile, currency and interest rates applicable to all other core structural borrowings of shareholder-financed operations of the Group are as detailed in note C6.1 of the Group's consolidated financial statements for the year ended 31 December 2014.
- (v) In June 2015, the Company issued core structural borrowings of £600 million 5.00 per cent Tier 2 subordinated notes due 2055. The proceeds, net of discount adjustment and costs, were £590 million.

C6.2 Other borrowings

(a) Operational borrowings attributable to shareholder-financed operations

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
Borrowings in respect of short-term fixed income securities programmesnote (ii)	2,176	1,950	2,004
Non-recourse borrowings of US operations note (iv)	10	17	19
Other borrowings note (iii)	318	276	240
Totalnote (i)	2,504	2,243	2,263

Notes

- (i) In addition to the debt listed above, £200 million Floating Rate Notes were issued by Prudential plc in October 2014 which will mature in October 2015. These Notes have been wholly subscribed by a Group subsidiary and accordingly have been eliminated on consolidation in the Group financial statements. These Notes were originally issued in October 2008 and have been reissued upon their maturity.
- (ii) In January 2015, the Company issued £300 million Medium Term Notes which will mature in January 2018. The proceeds, net of costs, were £299 million.
- (iii) Other borrowings mainly include senior debt issued through the Federal Home Loan Bank of Indianapolis (FHLB), secured by collateral posted with the FHLB by Jackson.
- In addition, other borrowings include amounts whose repayment to the lender is contingent upon future surplus emerging from certain contracts specified under the arrangement. If insufficient surplus emerges on those contracts, there is no recourse to other assets of the Group and the liability is not payable to the degree of shortfall.
- (iv) In all instances the holders of the debt instruments issued by these subsidiaries and funds do not have recourse beyond the assets of those subsidiaries and funds.

(b) Borrowings attributable to with-profits operations

	2015 £m	2014 £m	
	30 Jun	30 Jun	31 Dec
Non-recourse borrowings of consolidated investment funds*	911	667	924
£100m 8.5% undated subordinated guaranteed bonds of Scottish Amicable Finance plc**	100	100	100

Other borrowings (predominantly obligations under finance leases)	78	97	69
Total	1,089	864	1,093

\* In all instances the holders of the debt instruments issued by these subsidiaries and funds do not have recourse beyond the assets of those subsidiaries and funds.

\*\* The interests of the holders of the bonds issued by Scottish Amicable Finance plc, a subsidiary of the Scottish Amicable Insurance Fund, are subordinated to the entitlements of the policyholders of that fund.

#### C7 Deferred tax

The statement of financial position contains the following deferred tax assets and liabilities in relation to:

	Deferred tax assets			Deferred tax liabilities		
	30 Jun 2015 £m	30 Jun 2014 £m	31 Dec 2014 £m	30 Jun 2015 £m	30 Jun 2014 £m	31 Dec 2014 £m
Unrealised losses or gains on investments	331	116	83	(1,673)	(1,611)	(1,697)
Balances relating to investment and insurance contracts	8	5	4	(544)	(469)	(499)
Short-term temporary differences	2,407	2,001	2,607	(2,076)	(1,748)	(2,065)
Capital allowances	9	9	9	(32)	(27)	(30)
Unused deferred tax losses	65	42	62	-	-	-
Total	2,820	2,173	2,765	(4,325)	(3,855)	(4,291)

Deferred tax assets are recognised to the extent that they are regarded as recoverable, that is to the extent that, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying temporary differences can be deducted.

The taxation regimes applicable across the Group often apply separate rules to trading and capital profits and losses. The distinction between temporary differences that arise from items of either a trading or capital nature may affect the recognition of deferred tax assets. Accordingly, for the 2015 half year results and financial position at 30 June 2015 the possible tax benefit of approximately £106 million (30 June 2014: £123 million; 31 December 2014: £110 million), which may arise from capital losses valued at approximately £0.5 billion (30 June 2014: £0.6 billion; 31 December 2014: £0.5 billion), is sufficiently uncertain that it has not been recognised. In addition, a potential deferred tax asset of £42 million (30 June 2014: £47 million; 31 December 2014: £47 million), which may arise from trading tax losses and other potential temporary differences totalling £0.2 billion (30 June 2014: £0.3 billion; 31 December 2014 £0.2 billion) is sufficiently uncertain that it has not been recognised. Of these, losses of £28 million will expire within the next seven years. Of the remaining losses £1 million will expire within 20 years and the rest have no expiry date.

The table that follows provides a breakdown of the recognised deferred tax assets set out in the table above for both the short-term temporary differences and unused tax losses split by business unit. The table also shows the period of estimated recoverability for each respective business unit. For these and each category of deferred tax asset recognised their recoverability against forecast taxable profits is not significantly impacted by any current proposed changes to future accounting standards.

Short-term temporary differences		Unused tax losses	
30 Jun	Expected	30 Jun	Expected

Edgar Filing: PRUDENTIAL PLC - Form 6-K

	2015 £m	period of recoverability	2015 £m	period of recoverability
Asia insurance operations	34	1 to 3 years	51	3 to 5 years
US insurance operations	2,066	With run-off of in-force book	-	-
UK insurance operations	136	1 to 10 years	-	-
Other operations	171	1 to 10 years	14	1 to 3 years
Total	2,407		65	

Under IAS 12, 'Income Taxes', deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability settled, based on the tax rates (and laws) that have been enacted or are substantively enacted at the end of the reporting periods.

As part of the Summer Finance Bill 2015, the UK government proposed phased rate changes in the UK corporation tax rate to 19 per cent from 1 April 2017 and a further reduction to 18 per cent from 1 April 2020. As these changes have not been substantively enacted as at 30 June 2015 they have not been reflected in the balances at that date. The changes, once substantively enacted, are expected to have the effect of reducing the UK with-profits and shareholder-backed business element of the overall net deferred tax liabilities by £17 million.

C8 Defined benefit pension schemes

(a) Background and summary economic and IAS 19 financial positions

The Group's businesses operate a number of pension schemes. The specific features of these plans vary in accordance with the regulations of the country in which the employees are located, although they are, in general, funded by the Group and based either on a cash balance formula or on years of service and salary earned in the last year or years of employment. The largest defined benefit scheme is the principal UK scheme, namely the Prudential Staff Pension Scheme (PSPS). PSPS accounts for 84 per cent (30 June 2014: 84 per cent; 31 December 2014: 84 per cent) of the underlying scheme liabilities of the Group's defined benefit schemes.

The Group also operates two smaller UK defined benefit schemes in respect of Scottish Amicable (SASPS) and M&G (M&GGPS). In addition, there are two small defined benefit schemes in Taiwan which have negligible deficits.

Under the IAS 19 'Employee Benefits' valuation basis, the Group applies the principles of IFRIC 14, 'IAS 19 - The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction', whereby a surplus is only recognised to the extent that the Company is able to access the surplus either through an unconditional right of refund to the surplus or through reduced future contributions relating to ongoing service, which have been substantively enacted or contractually agreed. Further, where the Company does not have access to any funds once they are paid into the scheme, the IFRS financial position recorded reflects the higher of any underlying IAS 19 deficit and any obligation for committed deficit funding where applicable.

The Group asset/liability in respect of defined benefit pension schemes is as follows:

2015 £m		2014 £m		2014 £m					
30 Jun		30 Jun		31 Dec					
	Other		Other		Other

IAS 19 pension asset (liability) on the Group statement of financial position	note (iii) 125	(140)	(32)	(1)	(48)	122	(104)	(71)	(1)	(54)	130	(144)	(72)	(1)

Notes

(i) For PSPS, the Group does not have an unconditional right of refund to any surplus of the scheme. The PSPS IAS 19 pension asset represents the present value of the economic benefit (impact) of the Company from the difference between future ongoing contributions to the scheme and estimated accrued cost of service.

(ii) The underlying position on an economic basis reflects the assets (including investments in Prudential insurance policies that are offset against liabilities to policyholders on the Group consolidation) and the liabilities of the schemes.

(iii) At 30 June 2015, the PSPS pension asset of £125 million (30 June 2014: £122 million; 31 December 2014: £130 million) and the other schemes' pension liabilities of £173 million (30 June 2014: £176 million; 31 December 2014: £217 million) are included within 'Other debtors' and 'Provisions' respectively on the consolidated statement of financial position.

(iv) The amounts for PSPS and SASPS are apportioned between the PAC with-profits fund and the shareholders' fund. The amounts for the M&GGPS and other schemes are wholly attributable to the shareholders' fund. Of the economic surplus of £37 million (30 June 2014: £68 million; 31 December 2014: £45 million), the amounts attributable to the PAC with-profits fund and shareholders fund are as follows:

		30 Jun 2015	30 Jun 2014	31 Dec 2014
Attributable to:				
	PAC with-profits fund	18	33	19
	Shareholder-backed operations	19	35	26
		37	68	45

#### Triennial actuarial valuations

In respect of PSPS, the contributions into the scheme are payable at the minimum level required under the scheme rules. Excluding expenses, the contributions are payable at approximately £6 million per annum for on-going service of active members of the scheme. No deficit or other funding is required. Deficit funding for PSPS, when applicable, is apportioned in the ratio of 70/30 between the PAC with-profits fund and shareholder-backed operations based on the sourcing of previous contributions. Employer contributions for on-going service of current employees are apportioned in the ratio relevant to current activity.

In respect of the SASPS, it has been agreed with the Trustees that the level of deficit funding be increased from the current level of £13.1 million per annum to £21 million per annum from 1 January 2015 until 31 March 2024, or earlier if the scheme's funding level reaches 100 per cent before this date, to eliminate the actuarial deficit. The deficit funding will be reviewed every three years at subsequent valuations.

In respect of the M&GGPS, deficit funding amounts designed to eliminate the actuarial deficit over a three year period are being made from January 2013 of £18.6 million per annum for the first two years and £9.3 million in the third year.

Defined benefit pension schemes in the UK are generally required to be subject to full actuarial valuations every three years in order to assess the appropriate level of funding for schemes in relation to their commitments. These valuations include assessments of the likely rate of return on the assets held within the separate trustee administered funds.

#### (b) Assumptions

The actuarial assumptions used in determining benefit obligations and the net periodic benefit costs for the periods ended 30 June 2015, 30 June 2014 and 31 December 2014 were as follows:

	2015 % 30 Jun	2014 % 30 Jun	2014 % 31 Dec
Discount rate*	3.7	4.2	3.5
Rate of increase in salaries	3.2	3.2	3.0
Rate of inflation**			

Edgar Filing: PRUDENTIAL PLC - Form 6-K

	Retail prices index (RPI)	3.2	3.2	3.0
	Consumer prices index (CPI)	2.2	2.2	2.0
Rate of increase of pensions in payment for inflation:				
PSPS:				
	Guaranteed (maximum 5%)	2.5	2.5	2.5
	Guaranteed (maximum 2.5%)	2.5	2.5	2.5
	Discretionary	2.5	2.5	2.5
Other schemes				
		3.2	3.2	3.0

\* The discount rate has been determined by reference to an 'AA' corporate bond index, adjusted where applicable, to allow for the difference in duration between the index and the pension liabilities.

\*\* The rate of inflation reflects the long-term assumption for the UK RPI or CPI depending on the tranche of the schemes.

The calculations are based on current actuarially calculated mortality estimates with a specific allowance made for future improvements in mortality. The specific allowance made is in line with a custom calibration and was updated in 2014 to reflect the 2012 mortality model from the Continuous Mortality Investigation Bureau of the Institute and Faculty of Actuaries (CMI). The tables used for PSPS immediate annuities in payment for all the periods presented were:

Male: 114.0 per cent PNMA00 with improvements in line with a custom calibration of the CMI's 2012 mortality model, with a long-term mortality improvement rate of 1.75 per cent per annum; and

Female: 108.5 per cent PNFA00 with improvements in line with a custom calibration of the CMI's 2012 mortality model, with a long-term mortality improvement rate of 1.25 per cent per annum.

The most recent full valuations have been updated to 30 June 2015, applying the principles prescribed by IAS 19.

(c) Estimated pension scheme surpluses and deficits

The underlying pension position on an economic basis reflects the assets (including investments in Prudential policies that are offset against liabilities to policyholders on the Group consolidation) and the liabilities of the schemes. The IAS 19 basis excludes the investments in Prudential policies. At 30 June 2015, the investments in Prudential insurance policies comprise £138 million (30 June 2014: £142 million; 31 December 2014: £131 million) for PSPS and £85 million (30 June 2014: £122 million; 31 December 2014: £132 million) for the M&GGPS. In principle, on consolidation the investments are eliminated against policyholder liabilities of UK insurance operations, so that the formal IAS 19 position for the scheme in isolation excludes these items. This treatment applies to the M&GGPS investments. However, as a substantial portion of the Company's interest in the underlying surplus of PSPS is not recognised, the adjustment is not necessary for the PSPS investments.

Movements on the pension scheme deficit determined on the economic basis are as follows, with the effect of the application of IFRIC 14 being shown separately:

		Half year 2015 £m			
		Surplus (deficit) in schemes at	Actuarial gains and losses in other comprehensive income	Contributions paid	Surplus (deficit) in schemes at 30 Jun 2015

(d) Sensitivity of the pension scheme liabilities to key variables

The total underlying Group pension scheme liabilities of £7,072 million (30 June 2014: £6,451 million; 31 December 2014: £7,312 million) comprise £5,905 million (30 June 2014: £5,448 million; 31 December 2014: £6,157 million) for PSPS and £1,167 million (30 June 2014: £1,003 million; 31 December 2014: £1,155 million) for the other schemes.

The table below shows the sensitivity of the underlying PSPS and the other scheme liabilities at 30 June 2015, 30 June 2014 and 31 December 2014 to changes in discount rate, inflation rates and mortality rates. The sensitivity

Edgar Filing: PRUDENTIAL PLC - Form 6-K

information below is based on the core scheme liabilities and assumptions at the balance sheet date. The sensitivity is calculated based on a change in one assumption with all other assumptions being held constant. As such, interdependencies between the assumptions are excluded.

The sensitivity of the underlying pension scheme liabilities as shown below does not directly equate to the impact on the profit or loss attributable to shareholders or shareholders' equity due to the effect of the application of IFRIC 14 on PSPS and the allocation of a share of the interest in financial position of the PSPS and SASPS schemes to the PAC with-profits fund as described above.

	Assumption applied			Sensitivity change in assumption	Impact of sensitivity on scheme liabilities on IAS 19 basis	2015			2014		
	2015	2014				2015	2014		2015	2014

January	2,567,779,950	128	1,908	2,560,381,736	128	1,895	2,560,381,736	128	1,895
Shares issued under share-based schemes	3,284,119	-	2	5,845,737	-	8	7,398,214	-	13
At end of period	2,571,064,069	128	1,910	2,566,227,473	128	1,903	2,567,779,950	128	1,908

Amounts recorded in share capital represent the nominal value of the shares issued. The difference between the proceeds received on issue of shares, net of issue costs, and the nominal value of shares issued is credited to the share premium account.

At 30 June 2015, there were options outstanding under Save As You Earn schemes to subscribe for shares as follows:

	Number of shares to subscribe for	Share price range		Exercisable by year
		from	to	
30 June 2015	8,007,928	288p	1,155p	2019
30 June 2014	7,617,023	288p	901p	2019
31 December 2014	8,624,491	288p	1,155p	2020

Transactions by Prudential plc and its subsidiaries in Prudential plc shares

The Group buys and sells Prudential plc shares ('own shares') either in relation to its employee share schemes or via transactions undertaken by authorised investment funds that the Group is deemed to control. The cost of own shares of £227 million as at 30 June 2015 (30 June 2014: £180 million; 31 December 2014: £195 million) is deducted from retained earnings. The Company has established trusts to facilitate the delivery of shares under employee incentive plans. At 30 June 2015, 10.8 million (30 June 2014: 9.5 million; 31 December 2014: 10.3 million) Prudential plc shares with a market value of £165.0 million (30 June 2014: £127.8 million; 31 December 2014: £153.1 million) were held in such trusts all of which are for employee incentive plans. The maximum number of shares held during the period was 10.8 million which was in May 2015.

The Company purchased the following number of shares in respect of employee incentive plans:

	Number of shares purchased (in millions)	Cost £m
Half year 2015	5.1	86.3
Half year 2014	6.2	81.9
Full year 2014	7.9	106.7

The Group has consolidated a number of authorised investment funds where it is deemed to control these funds under IFRS. Some of these funds hold shares in Prudential plc. The total number of shares held by these funds at 30 June 2015 was 6.8 million (30 June 2014: 7.5 million; 31 December 2014: 7.5 million) and the cost of acquiring these

shares of £59 million (30 June 2014: £67 million; 31 December 2014: £67 million) is included in the cost of own shares. The market value of these shares as at 30 June 2015 was £105 million (30 June 2014: £100 million; 31 December 2014: £112 million). During 2015, these funds made a net reduction of 724,186 Prudential shares (30 June 2014: net additions of 405,978; 31 December 2014: net additions of 405,940) for a net decrease of £8.0 million to book cost (30 June 2014: net increase of £6.5 million; 31 December 2014: net increase of £7.0 million).

All share transactions were made on an exchange other than the Stock Exchange of Hong Kong.

Other than set out above the Group did not purchase, sell or redeem any Prudential plc listed securities during half year 2015 or 2014.

## D OTHER NOTES

### D1 Sale of Japan Life business

On 5 February 2015, the Group announced that it had completed the sale of its closed book life insurance business in Japan, PCA Life Insurance Company Limited to SBI Holdings, Inc. following regulatory approvals. The transaction was announced on 16 July 2013. Of the agreed US\$85 million cash consideration, the Group received US\$68 million on completion of the transaction and a further payment of up to US\$17 million will be received contingent upon the future performance of the Japan Life business.

The Japan Life business had been classified as held for sale on the statement of financial position of the Group since 2013. The held for sale assets and liabilities of the Japan Life business on the statement of financial position as at 30 June 2014 and 31 December 2014 were as follows:

	2014 £m	
	30 Jun	31 Dec
Assets		
Investments	934	898
Other assets	72	45
	1,006	943
Adjustment for remeasurement of the carrying value to fair value less costs to sell	(131)	(124)
Assets held for sale	875	819
Liabilities		
Policyholder liabilities	783	717
Other liabilities	45	53
Liabilities held for sale	828	770
Net assets	47	49

Upon its classification as held for sale in 2013, the IFRS carrying value of the Japan Life business was set to represent the proceeds, net of related expenses. Subsequent remeasurement of the carrying value of the Japan Life business in 2014 resulted in a charge in the income statement of £(11) million in half year 2014 and a charge of £(13) million in full year 2014. These amounts, together with the results of the business including short-term value movements on investments also included in the income statement, netted to an insignificant amount for those periods.

On completion of the sale, the cumulative foreign exchange translation loss of the Japan Life business of £46 million, that had arisen from 2004 (the year of the Group's conversion to IFRS) to disposal was recycled from other comprehensive income through the profit and loss account in half year 2015 as required by IAS 21. This amount is included within 'Cumulative exchange loss on the sold Japan Life business recycled from other comprehensive

income' in the supplementary analysis of profit of the Group as shown in note B1.1. The adjustment has no net effect on shareholders' equity.

#### D2 Contingencies and related obligations

The Group is involved in various litigation and regulatory issues. While the outcome of such matters cannot be predicted with certainty, Prudential believes that the ultimate outcome of such litigation and regulatory issues will not have a material adverse effect on the Group's financial condition, results of operations or cash flows.

There have been no material changes to the Group's contingencies and related obligations in the six month period ended 30 June 2015.

#### D3 Post balance sheet events

##### Interim dividend

The 2015 interim dividend approved by the Board of Directors after 30 June 2015 is as described in note B7.

#### D4 Related party transactions

There were no transactions with related parties during the six months ended 30 June 2015 which have had a material effect on the results or financial position of the Group.

The nature of the related party transactions of the Group has not changed from those described in the Group's consolidated financial statements for the year ended 31 December 2014.

#### Statement of directors' responsibilities

The directors are responsible for preparing the Half Year Financial Report in accordance with applicable law and regulations.

Accordingly, the directors confirm that to the best of their knowledge:

- the condensed consolidated financial statements have been prepared in accordance with IAS 34, 'Interim Financial Reporting', as adopted by the European Union;
- the Half Year Financial Report includes a fair review of information required by:

(a) DTR 4.2.7R of the Disclosure and Transparency Rules, being an indication of important events that have occurred during the six months ended 30 June 2015, and their impact on the condensed consolidated financial statements, and a description of the principal risks and uncertainties for the remaining six months of the year; and

(b) DTR 4.2.8R of the Disclosure and Transparency Rules, being related party transactions that have taken place during the six months ended 30 June 2015 and that have materially affected the financial position or the performance of the Group during the period and changes in the related party transactions described in the Group's consolidated financial statements for the year ended 31 December 2014.

The directors of Prudential plc as at 10 August are as listed in the Group's 2014 Annual Report except for the resignations of Tidjane Thiam and Pierre-Olivier Bouée and the appointment of Tony Wilkey in the first six months of 2015. In addition, as noted in the 2014 Annual Report, Lord Turnbull did not stand for re-election at the 2015 Annual General Meeting in May.

Independent review report to Prudential plc

## Introduction

We have been engaged by the company to review the International Financial Reporting Standards (IFRS) basis financial information in the Half Year Financial Report for the six months ended 30 June 2015 which comprises the Condensed Consolidated Income Statement, the Condensed Consolidated Statement of Comprehensive Income, the Condensed Consolidated Statement of Changes in Equity, the Condensed Consolidated Statement of Financial Position, the Condensed Consolidated Statement of Cash Flows and the related explanatory notes.

We have also been engaged by the company to review the European Embedded Value (EEV) basis supplementary financial information for the six months ended 30 June 2015 which comprises the Post-tax Operating Profit Based on Longer-Term Investment Returns, the Post-tax Summarised Consolidated Income Statement, the Movement in Shareholders' Equity, the Summary Statement of Financial Position and the related explanatory notes and Total Insurance and Investment Products New Business information.

We have read the other information contained in the Half Year Financial Report and considered whether it contains any apparent misstatements or material inconsistencies with the IFRS basis financial information or the EEV basis supplementary financial information.

This report is made solely to the company in accordance with the terms of our engagement to assist the company in meeting the requirements of the Disclosure and Transparency Rules ("the DTR") of the UK's Financial Conduct Authority ("the UK FCA") and also to provide a review conclusion to the company on the EEV basis supplementary financial information. Our review of the IFRS basis financial information has been undertaken so that we might state to the company those matters we are required to state to it in this report and for no other purpose. Our review of the EEV basis supplementary financial information has been undertaken so that we might state to the company those matters we have been engaged to state in this report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company for our review work, for this report, or for the conclusions we have reached.

## Directors' responsibilities

The Half Year Financial Report, including the IFRS basis financial information contained therein, is the responsibility of, and has been approved by, the directors. The directors are responsible for preparing the Half Year Financial Report in accordance with the DTR of the UK FCA. The directors have accepted responsibility for preparing the EEV basis supplementary financial information in accordance with the European Embedded Value Principles issued in May 2004 by the European CFO Forum ('the EEV Principles') and for determining the methodology and assumptions used in the application of those principles.

The annual IFRS basis financial statements of the Group are prepared in accordance with IFRSs as adopted by the European Union ('EU'). The IFRS basis financial information included in this Half Year Financial Report has been prepared in accordance with IAS 34 Interim Financial Reporting as adopted by the EU.

The EEV basis supplementary financial information has been prepared in accordance with the EEV principles using the methodology and assumptions set out in notes 1 and 13 to the EEV basis supplementary financial information. The EEV basis supplementary financial information should be read in conjunction with the IFRS basis financial information.

## Our responsibility

Our responsibility is to express to the company a conclusion on the IFRS basis financial information in the Half Year Financial Report and the EEV basis supplementary financial information based on our reviews, as set out in our engagement letter with you dated 18 July 2015.

## Scope of review

We conducted our review in accordance with International Standard on Review Engagements (UK and Ireland) 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity issued by the Auditing Practices Board for use in the UK. A review of interim financial information consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (UK and Ireland) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

#### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the IFRS basis financial information in the Half Year Financial Report for the six months ended 30 June 2015 is not prepared, in all material respects, in accordance with IAS 34 as adopted by the EU and the DTR of the UK FCA.

Based on our review, nothing has come to our attention that causes us to believe that the EEV basis supplementary financial information for the six months ended 30 June 2015 is not prepared, in all material respects, in accordance with the EEV Principles, using the methodology and assumptions set out in notes 1 and 13 to the EEV basis supplementary financial information.

#### Additional Financial Information\* (IFRS)

##### I IFRS profit and loss information

I(a) Analysis of long-term insurance business pre-tax IFRS operating profit based on longer-term investment returns by driver

This schedule classifies the Group's pre-tax operating earnings from long-term insurance operations into the underlying drivers of those profits, using the following categories:

- i Spread income represents the difference between net investment income (or premium income in the case of the UK annuities new business) and amounts credited to certain policyholder accounts. It excludes the operating investment returns on shareholder net assets, which has been separately disclosed as expected return on shareholder assets.
- ii Fee income represents profits driven by net investment performance, being asset management fees that vary with the size of the underlying policyholder funds net of investment management expenses.
- iii With-profits business represents the gross of tax shareholders' transfer from the with-profits fund for the period.
- iv Insurance margin primarily represents profits derived from the insurance risks of mortality and morbidity.
- v Margin on revenues primarily represents amounts deducted from premiums to cover acquisition costs and administration expenses.
- vi Acquisition costs and administration expenses represent expenses incurred in the period attributable to shareholders. It excludes items such as restructuring costs and Solvency II costs which are not included in the

Edgar Filing: PRUDENTIAL PLC - Form 6-K

segment profit for insurance as well as items that are more appropriately included in other source of earnings lines (eg investment expenses are netted against investment income as part of spread income or fee income as appropriate).

vii DAC adjustments comprises DAC amortisation for the period, excluding amounts related to short-term fluctuations in investment returns, net of costs deferred in respect of new business.

Analysis of pre-tax IFRS operating profit by source and margin analysis of Group long-term insurance business  
The following analysis expresses certain of the Group's sources of operating profit as a margin of policyholder liabilities or other suitable driver. Details on the calculation of the Group's average policyholder liability balances are given in note (iii) at the end of this section.

Analysis of Asia operating profit drivers

Edgar Filing: PRUDENTIAL PLC - Form 6-K

- On a constant exchange rate basis, spread income has remained in line with the prior year. The margin has declined from 148 basis points in half year 2014 to 124 basis points in half year 2015 due to a change in product and country mix, caused in part by the cessation of sales of Universal Life products in Singapore.
- Fee income has increased by 13 per cent at constant exchange rates (AER 16 per cent), broadly in line with the increase in movement in average unit-linked liabilities.
- On a constant exchange rate basis, insurance margin has increased by 20 per cent to £387 million in half year 2015 (AER 23 per cent) primarily reflecting the continued growth of the in-force book, which contains a relatively high proportion of risk-based products.
- Margin on revenue has increased by £86 million on a constant exchange rate basis from £746 million in half year 2014 to £832 million in half year 2015 primarily reflecting higher premium income recognised in the period.
- Acquisition costs have increased by 17 per cent at constant exchange rates (AER 21 per cent) in half year 2015, compared to the 31 per cent increase in APE sales (AER 37 per cent increase), resulting in a decrease in the acquisition costs ratio. The analysis above uses shareholder acquisition costs as a proportion of total APE. If with-profits sales were excluded from the denominator the acquisition cost ratio would become 66 per cent (half year 2014: 67 per cent at CER), the small decrease being the result of product and country mix.
- Administration expenses have increased by 12 per cent at constant exchange rates (AER 17 per cent increase) in half year 2015 as the business continues to expand. On constant exchange rates, the administration expense ratio has reduced from 273 basis points in half year 2014 to 264 basis points in half year 2015.

See notes at the end of this section.

Analysis of US operating profit drivers:

- Spread income has decreased by 6 per cent at constant exchange rates (AER increased by 2 per cent) to £372 million in the first half of 2015. The reported spread margin decreased to 244 basis points from 258 basis points in the first half of 2014, primarily due to lower investment yields, reflecting the lower interest rate environment. Spread income benefited from swap transactions previously entered into to more closely match the asset and liability

Edgar Filing: PRUDENTIAL PLC - Form 6-K

duration. Excluding this effect, the spread margin would have been 167 basis points (half year 2014 CER: 188 basis points).

- Fee income has increased by 15 per cent at constant exchange rates (AER 26 per cent) to £832 million during the first half of 2015, primarily due to higher average separate account balances resulting from positive net cash flows from variable annuity business and market appreciation. Fee income margin has remained consistent with the prior year at 193 basis points (half year 2014 CER: 193 basis points).
- Insurance margin represents operating profits from insurance risks, including variable annuity guarantees and other sundry items. Insurance margin increased to £383 million in the first half of 2015 compared to £360 million at constant exchange rates at half year 2014, due primarily to higher fee income from variable annuity guarantees following positive net flows in recent periods into variable annuity business with guarantees.
- Acquisition costs, which are commissions and expenses incurred to acquire new business, including those that are not deferrable, have decreased by 8 per cent at constant exchange rates broadly in line with the decline in sales. As a percentage of APE, acquisition costs have remained relatively flat in comparison to the first half of 2014 at 56 per cent.
- Administration expenses increased to £408 million during the first half of 2015, compared to £365 million for the first half of 2014 at a constant exchange rate (AER £333 million), primarily as a result of higher asset-based commissions paid on the larger 2015 separate account balance subject to these trail commissions. These are paid upon policy anniversary dates and are treated as an administration expense in this analysis. Excluding these trail commissions, the resulting administration expense ratio would be slightly lower than in 2014 at 36 basis points (first half of 2014: 37 basis points at CER and AER).
- DAC adjustments decreased to £114 million during the first half of 2015, compared to £147 million at a constant exchange rate (AER £135 million) during the first half of 2014, primarily due to a decline in DAC deferrals due to the reduced sales in 2015.

Operating profit	436			366		

Analysis of UK operating profit drivers:

- The adverse effect on spread income from lower new retail and bulk annuity sales has been offset by profits from the in-force business, so that overall spread income has increased from £131 million in half year 2014 to £137 million in half year 2015.
- Insurance margin has increased from £30 million in half year 2014 to £87 million in half year 2015 due to a £61 million profit from an outward longevity reinsurance transaction entered into in the first half of 2015.
- Margin on revenues represents premium charges for expenses and other sundry net income received by the UK. The half year 2015 margin remained stable at £88 million compared with the £84 million reported for half year 2014.
- Acquisition costs as a percentage of new business sales for half year 2015 decreased to 8 per cent from 12 per cent. The ratio above expresses the percentage of shareholder acquisition costs as a percentage of total APE sales. It is therefore impacted by the level of with-profit sales in the year. Acquisition costs as a percentage of shareholder-backed new business sales and excluding the bulk annuity transactions, were 37 per cent in half year 2015 (half year 2014: 35 per cent).

Notes

- The ratio for acquisition costs is calculated as a percentage of APE sales including with-profits sales. Acquisition costs include only those relating to shareholder-backed business.
- Margin represents the operating return earned in the period as a proportion of the relevant class of policyholder liabilities excluding unallocated surplus. The margin is on an annualised basis in which half year profits are annualised by multiplying by two.
- The half year 2014 comparative information has been presented at Actual Exchange Rate (AER) and Constant Exchange Rates (CER) so as to eliminate the impact of exchange translation. CER results are calculated by translating prior period results using the current period foreign exchange rates. All CER profit figures have been translated at current period average rates. For Asia CER average liability calculations the policyholder liabilities have been translated using current period opening and closing exchange rates. For the US CER average liability

calculations the policyholder liabilities have been translated at the current period month end closing exchange rates. See also note A1.

(iv) For UK and Asia, opening and closing policyholder liabilities have been used to derive an average balance for the period, as a proxy for average balances throughout the period. The calculation of average liabilities for Jackson is derived from month end balances throughout the period as opposed to opening and closing balances only. Average liabilities for spread income are based on the general account liabilities to which spread income attaches. Average liabilities used to calculate the administration expense margin exclude the REALIC liabilities reinsured to third parties prior to the acquisition by Jackson. Average liabilities are adjusted for business acquisitions and disposals in the period.

(v) In order to show the UK long-term business on a comparable basis, the half year 2014 comparative results exclude the contribution from the sold PruHealth and PruProtect businesses.

(vi) The DAC adjustment contains £16 million in respect of joint ventures in half year 2015 (half year 2014: £2 million).

#### I(b) Asia operations - analysis of IFRS operating profit by territory

Operating profit based on longer-term investment returns for Asia operations are analysed below. The table below presents the half year 2014 results on both actual exchange rates (AER) and constant exchange rates (CER) bases so as to eliminate the impact of exchange translation.

	2015 £m		2014 £m		%		2014 £m

#### Notes

- (i) Analysis of operating profit between new and in-force business

Edgar Filing: PRUDENTIAL PLC - Form 6-K

The result for insurance operations comprises amounts in respect of new business and business in-force as follows:

	2015 £m		2014 £m	
	Half year	AER	Half year	CER
New business strain†	(33)	(19)	(20)	(18)
Business in force	580	484	498	1,021
Non-recurrent items note (ii)	29	19	20	49
Total	576	484	498	1,052

† The IFRS new business strain corresponds to approximately 2 per cent of new business APE sales for 2014 (half year 2014: approximately 2 per cent; full year 2014: approximately 1 per cent).

The strain represents the pre-tax regulatory basis strain to net worth after IFRS adjustments; for deferral of acquisition costs and deferred income where appropriate.

(ii) Other non-recurrent items of £29 million in 2015 (half year 2014: £19 million; full year 2014: £49 million) represent a small number of items none of which are individually significant that are not anticipated to re-occur in subsequent years.

Edgar Filing: PRUDENTIAL PLC - Form 6-K

\* Margin represents operating income before performance related fees as a proportion of the related funds under management (FUM). Half year figures have been annualised by multiplying by two. Monthly closing internal and external funds managed by the respective entity have been used to derive the average. Any funds held by the Group's insurance operations which are managed by third parties outside of the Prudential Group are excluded from these amounts.

\*\* Cost/income ratio represents cost as a percentage of operating income before performance related fees.

† Institutional includes internal funds.
