**Consolidated Financial Results**

**April 1, 2005    June 30, 2005**

---

July 29, 2005

*In preparing its consolidated financial information, ORIX Corporation and its subsidiaries have complied with accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.*

*U.S. Dollar amounts have been calculated at Yen 110.62 to \$1.00, the approximate exchange rate prevailing at June 30, 2005.*

*These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under "Risk Factors" in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission.*

*The Company expects that it will be a "passive foreign investment company" under the U.S. Internal Revenue Code. A U.S. holder of the shares of the Company is therefore subject to special rules of taxation in respect of certain dividend, gain or other income on such shares. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.*

March 31, 2005	126,467	(408,004)	274,343	145,380

### 2. Forecasts for the Year Ending March 31, 2006 (Unaudited)

<u>Fiscal Year</u>	<u>Total Revenues</u>	<u>Income before Income Taxes</u>	<u>Net Income</u>
March 31, 2006	880,000	162,000	96,000

**Note:** Basic Earnings Per Share is forecasted to be JPY 1,096.22.

**Table of Contents****Summary of Consolidated Financial Results****1. Three Months Ended June 30, 2005****Financial Highlights**

<b>Income before Income Taxes*</b>	<b>58,448 million yen (Up 59% year on year)</b>
<b>Net Income</b>	<b>37,789 million yen (Up 61% year on year)</b>
<b>Earnings Per Share (Basic)</b>	<b>432.08 yen (Up 54% year on year)</b>
<b>Earnings Per Share (Diluted)</b>	<b>409.74 yen (Up 59% year on year)</b>
<b>Shareholders' Equity Per Share</b>	<b>8,731.00 yen (Up 5% on March 31, 2005)</b>
<b>ROE (Annualized)</b>	<b>20.3% (June 30, 2004: 16.2%)</b>
<b>ROA (Annualized)</b>	<b>2.47% (June 30, 2004: 1.67%)</b>

\* Income before income taxes refers to income before discontinued operations and income taxes.

**Revenues: 212,635 million yen (Up 5% year on year)**

Revenues increased 5% to 212,635 million yen compared with the same period of the previous fiscal year. Although real estate sales decreased year on year, revenues from direct financing leases, operating leases, interest on loans and investment securities, brokerage commissions and net gains on investment securities, life insurance premiums and related investment income, gains on sales of real estate under operating leases and other operating revenues were up compared to the same period of the previous fiscal year.

Furthermore, transportation revenues, which were recorded in the previous fiscal year, are recorded as equity in net income of affiliates during this fiscal year as shown in the (Note) on Page 2.

Revenues from direct financing leases increased 5% to 28,722 million yen compared to the same period of the previous fiscal year. In Japan, revenues from direct financing leases were up 5% year on year. The automobile leasing operations performed steadily. In addition, direct financing leases other than those associated with the automobile leasing operations were also up due primarily to the operations of ORIX Kitakanto Corporation, which entered the ORIX Group during the previous fiscal year, and contributed to the increase in revenues from the beginning of this fiscal year. Overseas, revenues were up 4% year on year. Although there were lower revenues as a result of a reduction of assets in The Americas segment compared to the same period of the previous fiscal year, the expansion of the leasing operations in the Asia, Oceania and Europe segment resulted in the higher revenues.

Revenues from operating leases increased 5% to 48,099 million yen compared to the same period of the previous fiscal year. In Japan, although revenues from the precision measuring and other equipment rental operations were down year on year, there was an increase in automobile and real estate operating leases and as a result revenues were flat year on year. Overseas, revenues were up 21% year on year due mainly to the expansion of automobile operating leases.

## Edgar Filing: ORIX CORP - Form 6-K

Revenues from interest on loans and investment securities increased 21% to 36,220 million yen compared to the same period of the previous fiscal year. In Japan, interest on loans and investment securities increased 23% year on year due to an increase in loans to corporate customers, including non-recourse loans, and an expansion of the loan servicing operations. Overseas, revenues were up 15% year on year, with increases in both The Americas segment and Asia, Oceania and Europe segment.

Revenues from brokerage commissions and net gains on investment securities increased 64% to 8,443 million yen compared to the same period of the previous fiscal year. Brokerage commissions were flat year on year due to a similar level of trading volume on the stock market in Japan. Net gains on investment securities were up 83% year on year due to the sale of securities mainly associated with our venture capital operations in Japan and securities investments in The Americas segment.

- 1 -

## **Table of Contents**

Life insurance premiums and related investment income were flat year on year at 30,229 million yen. Life insurance premiums were up due to an increase in the number of outstanding contracts and an increase in the proportion of more profitable life insurance products, while life insurance-related investment income was down year on year.

Real estate sales decreased 12% year on year to 19,214 million yen. Although there was an increase in the number of condominiums sold to buyers, there was no revenue associated with the sale of office buildings and other real estate developments in the first quarter of this fiscal year. Furthermore, residential condominiums developed through certain joint ventures were accounted for by the equity method, and are included as a net of revenues and selling costs in equity in net income of affiliates. The revenues from the aforementioned joint ventures were 345 million yen.

Gains on sales of real estate under operating leases were up 386% year on year to 5,820 million yen due to the higher revenues associated with the sales of rental purpose office buildings and other real estate.

Other operating revenues increased 26% to 35,888 million yen due to contributions, which were included from the beginning of this fiscal year, from companies in which we invested as part of our corporate rehabilitation business in the previous fiscal year. In addition, the increase in revenues associated with our integrated facilities management operations expanded compared to the same period of the previous fiscal year.

(Note)

Transportation revenues and costs of transportation revenues associated with the operations of Footwork Express Co. Ltd., in which we invested as part of our corporate rehabilitation operations, were included in the same period of the previous fiscal year based on a three-month lag basis as permitted under U.S. GAAP. However, ORIX's share in Footwork Express was reduced in December 2004 due to an increase in capital whereby the substantive participating right of a minority shareholder was increased. As a result, ORIX no longer has a controlling financial interest in the company and accounted for this company as an equity method affiliate at the end of the fiscal year ended March 31, 2005. ORIX has started recording its proportionate share of net income or loss of the company by the equity method from the fiscal year ending March 31, 2006 instead of recording transportation revenues and costs of transportation revenues.

### **Expenses: 162,909 million yen (Down 5% year on year)**

Expenses were down 5% to 162,909 million yen compared with the same period of the previous fiscal year. Although interest expense, costs of operating leases, other operating expenses, selling, general and administrative expenses and write-downs of securities increased, life insurance costs, costs of real estate sales and provision for doubtful receivables and probable loan losses were down year on year. For details on costs of transportation revenues please see the (Note) shown above.

Interest expense was up 5% year on year to 14,718 million yen. In Japan, interest expense was flat year on year as lower interest rates offset higher average debt levels. The interest expense overseas increased due to higher interest rates, despite lower average debt levels.

## Edgar Filing: ORIX CORP - Form 6-K

Costs of operating leases were flat year on year despite the increase in revenues from operating leases due primarily to a lower cost to revenues ratio of operating leases overseas.

Life insurance costs decreased 3% year on year to 27,239 million yen despite the higher life insurance premiums as insurance payments decreased.

Costs of real estate sales were down 19% year on year to 16,664 million yen in line with the decrease in real estate sales. Furthermore, 1,402 million yen in selling costs associated with residential condominiums developed through certain joint ventures were accounted for by the equity method.

- 2 -

## **Table of Contents**

Other operating expenses were up 41% year on year to 21,386 million yen in line with the increase in other operating revenues.

Selling, general and administrative expenses were up 11% year on year to 43,359 million yen due to an expansion of business activities and costs, which were included from the beginning of this fiscal year, associated with an increase in consolidated companies in the previous fiscal year.

Despite an increase in operating assets, provision for doubtful receivables and probable loan losses was down 46% year on year to 4,732 million yen due to a lower level of non-performing assets.

There were no write-downs of long-lived assets in the first quarter of this fiscal year.

Write-downs of securities were up 23% year on year to 1,800 million yen as we recorded write-downs associated mainly with equity investments made by our venture capital operations in Japan.

## **Net Income: 37,789 million yen (Up 61% year on year)**

Operating income was up 60% year on year to 49,726 million yen.

Equity in net income of affiliates was up 53% to 7,263 million yen compared to the same period of the previous fiscal year due mainly to the contribution from overseas equity method affiliates. Included in equity in net income of affiliates are earnings on investments in operating companies accounted for by the equity method and earnings on investments in residential condominiums developed through certain joint ventures, which are also accounted for by the equity method. The equity in net income of affiliates associated with residential condominium joint ventures was a loss of 1,057 million yen, which is primarily attributable to the upfront recognition of advertising expenses, associated with some large-scale condominium development projects, preceding the revenue recognition of completed sales upon title transfer to buyers.

Gains on sales of subsidiaries and affiliates were up 74% year on year to 1,459 million yen.

Income before discontinued operations and income taxes increased 59% year on year to 58,448 million yen.

Discontinued operations, net of applicable tax effect were 3,306 million yen, an increase of 333 million yen compared to the same period of the previous fiscal year.

As a result, net income increased 61% year on year to 37,789 million yen.

**Operating Assets: 5,171,569 million yen (Up 1% on March 31, 2005)**

Operating assets were up 1% on March 31, 2005 to 5,171,569 million yen. Although investment in operating leases was down on March 31, 2005 due to the sale of some office buildings and a reclassification of some office buildings to office facilities upon a change in their use, investment in direct financing leases, installment loans, investment in securities and other operating assets were up.

**Segment Information ( Profits refer to income before income taxes)**

Segment profits decreased year on year for the Rental Operations and Life Insurance segments and increased for the Corporate Financial Services, Automobile Operations, Real Estate-Related Finance, Real Estate, Other, The Americas and Asia, Oceania and Europe segments.

The results of the reported segments from April 1, 2005 reflect the revised operating structure following the reorganization of the Company. Accordingly, the real estate-related equity investment operations and the REIT asset management operations, which had been included in the Real Estate-Related Finance segment, were included in the Real Estate segment from the first quarter of this fiscal year (Please refer to the note on the Segment Information on page 11).

## **Table of Contents**

### **Operations in Japan**

#### **Corporate Financial Services Segment:**

Segment revenues were up 16% year on year to 22,456 million yen as loans to corporate customers expanded and direct financing leases made a larger contribution compared to the same period of the previous fiscal year.

Segment profits increased 44% to 11,379 million yen compared to 7,909 million yen in the same period of the previous fiscal year due to the increase in segment revenues and the lower provision for doubtful receivables and probable loan losses as a result of a reduction in the level of non-performing assets.

Segment assets increased 3% on March 31, 2005 to 1,544,319 million yen due mainly to an increase in loans to corporate customers and direct financing leases.

#### **Automobile Operations Segment:**

Segment revenues increased 14% year on year to 24,462 million yen. Although the automobile rental operations were down year on year, the automobile leasing operations performed strongly.

Segment profits increased 25% to 6,280 million yen in line with the increase in segment revenues compared to 5,022 million yen in the same period of the previous fiscal year.

Segment assets increased 2% on March 31, 2005 to 461,148 million yen due to the expansion of the automobile leasing operations.

#### **Rental Operations Segment:**

Segment revenues were down 20% year on year to 15,765 million yen as the precision measuring and other equipment rental operations had fewer orders from electronics and communications equipment manufacturers and due to an increase in the proportion of transactions being accounted for as direct financing leases. (Direct financing lease transactions record revenues and expenses as a net amount, while gross revenues and expenses for operating lease transactions are recorded separately).

Segment profits decreased 32% to 1,634 million yen in line with the decrease in segment revenues compared to 2,411 million yen in the same period of the previous fiscal year.

Segment assets were down 2% on March 31, 2005 to 115,660 million yen due primarily to a decrease in new equipment acquisitions of operating leases.

**Real Estate-Related Finance Segment:**

Segment revenues increased 36% year on year to 15,493 million yen as revenues associated with corporate loans, including non-recourse loans, and the loan servicing operations, which include servicing fees, contributed. In addition, the housing loan operations performed steadily.

Segment profits increased 167% to 6,892 million yen compared to 2,584 million yen in the same period of the previous fiscal year due to the increase in segment revenues and reduction in non-performing assets, which resulted in a lower provision for doubtful receivables and probable loan losses.

Segment assets increased 2% on March 31, 2005 to 977,407 million yen due to the increase in corporate loans and housing loans.

**Real Estate Segment:**

Segment revenues increased 16% year on year to 51,495 million yen. While there were no revenues associated with the sale from real-estate developments, such as office buildings, in the first quarter of this fiscal year, sales of residential condominiums increased year on year due to the larger number of condominiums sold to buyers and gains on sales of real estate under operating leases were also up. In addition, revenues associated with our integrated facilities management operations also expanded.

## **Table of Contents**

Segment profits increased 45% to 12,781 million yen in line with the higher segment revenues compared to 8,837 million yen in the same period of the previous fiscal year.

Segment assets decreased 4% on March 31, 2005 to 478,389 million yen due to the sale of some office buildings and a reclassification of some office buildings to office facilities upon a change in their use.

### **Life Insurance Segment:**

Segment revenues were flat year on year at 30,093 million yen. The steady performance of life insurance premiums as a result of an increase in the number of outstanding contracts and an increase in the proportion of more profitable life insurance products countered the lower life insurance-related investment income.

Segment profits decreased 13% year on year to 1,632 million yen compared to 1,879 million yen in the same period of the previous fiscal year as the first quarter of the previous fiscal year included the recognition of certain gains on sales of subsidiaries and affiliates.

Segment assets were down 3% on March 31, 2005 to 548,898 million yen due to a reclassification of some assets as a result of a change in their use to office facilities and a decrease in the investment portfolio associated with the maturity of some endowment insurance policies.

### **Other Segment:**

Segment revenues decreased 25% year on year to 24,589 million yen due in part to the change in the accounting treatment of transportation revenues to equity in net income of affiliates as previously described on the (Note) on page 2. The card loan operations also had lower revenues due to the lower average loan balance. On the other hand, revenues from companies that we invested in the previous fiscal year, as part of our corporate rehabilitation business, contributed from the beginning of this fiscal year.

Segment profits increased 29% to 8,198 million yen compared to 6,374 million yen in the same period of the previous fiscal year due in part to the contribution from gains on sales of subsidiaries and affiliates.

Segment assets were up 1% on March 31, 2005 to 495,998 million yen.

### **Overseas Operations:**

### **The Americas Segment:**

Segment revenues were up 14% year on year to 12,773 million yen due to the increase in revenues from interest on loans to corporate customers and sales on real estate, despite the reduction in investment in direct financing leases and the subsequent lower revenues from direct financing leases.

Segment profits were up approximately six-fold to 7,152 million yen compared to 1,210 million yen in the same period of the previous fiscal year due to the increase in segment revenues and increase in profits associated with an equity method affiliate.

Segment assets were up 1% on March 31, 2005 to 406,247 million yen due mainly to an increase in securities and a depreciation of the yen against the dollar, despite the reduction in investment in operating leases as a result of the sales of real estate under operating leases.

**Asia, Oceania and Europe Segment:**

Segment revenues were up 19% year on year to 20,220 million yen as corporate lending and automobile leasing of a number of companies in the region performed steadily, while the ship-related operations also expanded.

Segment profits increased 28% to 7,569 million yen compared to 5,934 million yen in the same period of the previous fiscal year due to an increase in segment revenues and the steady performance of equity in net income of affiliates.

Segment assets were up 3% on March 31, 2005 to 514,018 million yen due mainly to the increase in investment in direct financing leases and the depreciation of the yen against the dollar.

**Table of Contents**

**2. Summary of Cash Flows (Three Months Ended June 30, 2005)**

Cash and cash equivalents increased by 1,767 million yen to 147,147 million yen compared to March 31, 2005.

Cash flows from operating activities provided 29,099 million yen in the first quarter of this fiscal year and used 18,840 million yen in the same period of the previous fiscal year due primarily to inflows associated with the increase in net income, decrease (increase) in restricted cash, which was an outflow in the same period of the previous fiscal year, and increase in inventories, which had a lower level of outflow compared with the same period of the previous fiscal year.

Cash flows from investing activities used 100,677 million yen in the first quarter of this fiscal year, compared to 19,185 million yen in the same period of the previous fiscal year. This was due primarily to the outflows associated with the increase in installment loans made to customers as a result of the expansion of loans to corporate customers, including non-recourse loans, and the increase in investment in and dividends received from affiliates, net due to the outflow associated with an increase in loans to certain affiliates.

Cash flows from financing activities provided 73,104 million yen in the first quarter of this fiscal year, compared to 27,140 million yen in the same period of the previous fiscal year, due primarily to the increase in debt accompanying the increase in operating assets.

**3. Outlook and Forecasts for the Year Ending March 31, 2006**

For the fiscal year ending March 31, 2006, we forecast revenues of 880,000 million yen (down 4% compared with the fiscal year ended March 31, 2005), income before income taxes of 162,000 million yen (up 5%) and net income of 96,000 million yen (up 5%), which is unchanged from the forecasts made on April 26, 2005 in our earnings announcement for the fiscal year ended March 31, 2005.

**Note:** 1. Comprehensive Income under FASB Statement No.130 ( Reporting Comprehensive Income ) was a gain of JPY 38,949 million (US\$352 million) for the three months ended June 30, 2005, a gain of JPY 32,593 million for the three months ended June 30, 2004 and a gain of JPY 122,764 million for the year ended March 31, 2005.

2. Net income from real estate under operating leases considered to be discontinued operations were reclassified as Discontinued Operations. Accordingly, certain amounts have been reclassified to conform to the presentation for this fiscal year.

3. In the previous fiscal year, Transportation Revenues and Costs of Transportation Revenues were disclosed separately. However, as the logistics subsidiary became a affiliate, the proportionate share of the net income (loss) was recorded in Equity in Net Income of Affiliates by the equity method.

- \*Note 1:** The results of the reported segments from April 1, 2005 reflect the revised operating structure following the reorganization of the Company. Accordingly, real estate-related equity investment operations and the REIT asset management operations, which had been included in the Real Estate-Related Finance segment, were included in the Real Estate segment from the first quarter of this fiscal year. Accordingly, certain amounts in the previous first quarter and in the previous fiscal year have been reclassified retroactively.
- 2:** Effective January 1, 2005, the Company integrated seven group companies, which were involved in automobile leasing and rental operations, into ORIX Auto Corporation, in order to control and manage the overall automobile operations under one company. The automobile leasing operations, which had been included in the Corporate Financial Services segment and the automobile rental operations that had been included in the Rental Operations segment were included in the Automobile Operations segment from the previous fiscal year. The Rental Operations segment included only the rental operations of precision measuring and other equipment. The Company changed the management of its overseas operations, whereby the Europe segment and the Asia and Oceania segment were combined and from the previous fiscal year the new segment was shown as the Asia, Oceania and Europe segment.
- 3:** Since the Company evaluates the performance for the segments based on profits before income taxes, tax expenses are not included in the segment profits. In addition, results of discontinued operation are included in Segment Revenues and Segment Profits of each segment, if any. Such amounts are eliminated in Difference between Segment totals and Consolidated Amounts.
