Table of Contents**OceanFirst Financial Corp.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****Note 1. Summary of Significant Accounting Policies**

The accompanying unaudited consolidated financial statements include the accounts of OceanFirst Financial Corp. (the Company) and its wholly-owned subsidiary, OceanFirst Bank (the Bank) and its wholly-owned subsidiaries, Columbia Home Loans, LLC, OceanFirst REIT Holdings, Inc. and OceanFirst Services, LLC.

The interim consolidated financial statements reflect all normal and recurring adjustments which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three and nine months ended September 30, 2005 are not necessarily indicative of the results of operations that may be expected for all of 2005.

Certain information and note disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC).

These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report to Stockholders on Form 10-K for the year ended December 31, 2004.

Stock-Based Compensation

The Company accounts for stock-based compensation using the intrinsic value method under Accounting Principles Board Opinion No. 25 and accordingly has recognized no compensation expense under this method. Statement of Financial Accounting Standard No. 123, Accounting for Stock-based Compensation as amended by Statement of Financial Accounting Standard No. 148, Accounting for Stock-based Compensation-Transition and Disclosure, permits the use of the intrinsic value method; however, the amended statement requires the Company to disclose the pro forma net income and earnings per share as if the stock-based compensation had been accounted for using the fair value method. Had the compensation costs for the Company's stock option plan been determined based on the fair value method, the Company's net income and earnings per share would have been reduced to the pro forma amounts indicated below (in thousands, except per share data):

Note 4. Recent Accounting Pronouncements

On April 14, 2005 the Securities and Exchange Commission amended the compliance dates for the Financial Accounting Standard Board's Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment (Statement No. 123R). The Commission's new rule allows companies to implement Statement No. 123R at the beginning of the next fiscal year, instead of the reporting period that begins after June 15, 2005, or December 15, 2005 for small business issuers. The Commission's new rule does not change the accounting required by Statement No. 123R; it changes only the dates for compliance with the standard. The Company is currently evaluating the transition provisions of Statement 123R and does not know the impact on the consolidated financial statements at this time.

In May 2005, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (SFAS) No. 154, Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20 and FASB Statement No. 3. SFAS No. 154 requires retroactive application to prior periods financial statements of a voluntary change in accounting principle unless it is impracticable. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005, with earlier application permitted for accounting changes and corrections of errors made in fiscal years beginning after May 31, 2005.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**Critical Accounting Policies**

Note 1 to the Company's Audited Consolidated Financial Statements for the year ended December 31, 2004 included in the Company's Annual Report on Form 10-K for the year ended December 31, 2004, as supplemented by this report, contains a summary of significant accounting policies. Various elements of these accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

and other subjective assessments. Certain assets are carried in the consolidated statements of financial condition at fair value or the lower of cost or fair value. Policies with respect to the methodologies used to determine the allowance for loan losses, the valuation of Mortgage Servicing Rights and judgments regarding securities impairment are the most critical accounting policies because they are important to the presentation of the Company's financial condition and results of operations, involve a higher degree of complexity and require management to make difficult and subjective judgments which often require assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions and estimates could result in material differences in the results of operations or financial condition. These critical accounting policies and their application are reviewed periodically and, at least annually, with the Audit Committee of the Board of Directors.

Summary

The Company's results of operations are dependent primarily on net interest income, which is the difference between the interest income earned on the Company's interest-earning assets, such as loans and investments, and the interest expense on its interest-bearing liabilities, such as deposits and borrowings. The Company also generates non-interest income such as income from loan sales, loan

Table of Contents

servicing, loan originations, merchant credit card services, deposit accounts, the sale of alternative investments, trust and asset management services and other fees. The Company's operating expenses primarily consist of compensation and employee benefits, occupancy and equipment, marketing, data processing and other general and administrative expenses. The Company's results of operations are also significantly affected by general economic and competitive conditions, particularly changes in market interest rates, government policies and actions of regulatory agencies.

After declining to relatively low levels in early 2004, interest rates have steadily risen over the past year, especially at the shorter end of the yield curve. The previously low interest rate environment generally had an adverse effect on the Company's operating results. Prepayments on loans and mortgage-backed securities caused asset yields to decline at a faster rate than the cost of liabilities, causing the Company's net interest margin to contract. The more recent rising rate environment reduced prepayment activity and caused the Company's net interest margin to expand. However, recent increases in short-term interest rates have outpaced increases in longer-term rates resulting in a continued flattening of the interest rate yield curve. The continuation of a flat yield curve through the remainder of 2005 and into 2006 is expected to have a negative impact on the Company's results of operations and net interest margin as interest-earning assets, both loans and securities, are priced against longer-term indices, while interest-bearing liabilities, primarily deposits and borrowings, are priced against shorter-term indices. The Company has generally not repriced all core deposits (defined as all deposits other than time deposits) in line with the market increases in short-term interest rates. The likely upward repricing of core deposits is also expected to have a negative impact on the Company's results of operations and net interest margin.

The Company continues to focus on growing loans receivable, while limiting credit and interest rate risk exposure. The Company opened a joint residential/commercial loan production office in Monmouth County in late 2004. In the third quarter of 2004, the Company expanded its loan production platform through the acquisition of a consumer direct lending operation by Columbia Home Loans, LLC, the Company's mortgage banking subsidiary. The acquisition increased the volume of loans sold by the Company and the related gain on sale and was also partially responsible for the increase in operating expenses.

While the Company continues to focus on growing core deposits the rise in interest rates and the muted reaction of competitors to those interest rate changes provided the Company with an opportunity to be more competitive in the market for time deposits within established pricing guidelines. Both core and time deposit balances increased during 2005. Deposit growth also benefited from the opening of the Company's eighteenth branch office in Freehold late in the first quarter of 2005. The Company has committed to the opening of new branch offices in Little Egg Harbor, expected to open in mid 2006, and Wall, expected to open in mid 2007. Additionally, in early 2006 the Whiting branch is expected to be relocated to a more convenient and prominent location.

Analysis of Net Interest Income

Net interest income represents the difference between income on interest-earning assets and expense on interest-bearing liabilities. Net interest income also depends upon the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rate earned or paid on them.

The following table sets forth certain information relating to the Company for the three and nine months ended September 30, 2005 and 2004. The yields and costs are derived by dividing income or expense by the average balance of assets or liabilities, respectively, for the periods shown except where noted otherwise. Average balances are derived from average daily balances. The yields and costs include certain fees which are considered adjustments to yields.

Liquidity and Capital Resources

The Company's primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities, proceeds from the sale of loans, Federal Home Loan Bank (FHLB) and other borrowings and, to a lesser extent, investment maturities. While scheduled amortization of loans is a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions and competition. The Company has other sources of liquidity if a need for additional funds arises, including an overnight line of credit and advances from the FHLB.

At September 30, 2005 the Company had outstanding overnight borrowings from the FHLB of \$25.0 million as compared to no outstanding overnight borrowings at December 31, 2004. The Company utilizes the overnight line from time to time to fund short-term liquidity needs. The Company had total FHLB borrowings, including overnight borrowings, of \$389.0 million at September 30, 2005, a decrease from \$418.0 million at December 31, 2004. The decrease in borrowings was funded by a reduction in cash and due from banks and increased deposits.

The Company's cash needs for the nine months ended September 30, 2005, were primarily satisfied by principal payments on loans and mortgage-backed securities, increased deposits and proceeds from the sale of mortgage loans held for sale. The cash was principally utilized for loan originations and the repurchase of common stock. For the nine months ended September 30, 2004, the cash needs of the Company were primarily satisfied by principal payments on loans and mortgage-backed securities, increased deposits, increased total borrowings and proceeds from the sale of mortgage loans held for sale. The cash provided was principally used for the origination of loans, the purchase of mortgage-backed securities and the repurchase of common stock.

In the normal course of business, the Company routinely enters into various commitments, primarily relating to the origination and sale of loans. At September 30, 2005, outstanding commitments to originate loans totaled \$214.9 million; outstanding unused lines of credit totaled \$167.6 million; and outstanding commitments to sell loans totaled \$96.8 million. The Company expects to have sufficient funds available to meet current commitments in the normal course of business.

Time deposits scheduled to mature in one year or less totaled \$306.5 million at September 30, 2005. Based upon historical experience management estimates that a significant portion of such deposits will remain with the Company.

Under the Company's stock repurchase programs, shares of OceanFirst Financial Corp. common stock may be purchased in the open market and through other privately negotiated transactions, from time-to-time, depending on market conditions. The repurchased shares are held as treasury stock for general corporate use. At September 30, 2005, there were 138,489 shares remaining to be repurchased under the existing stock repurchase program. A new repurchase program was announced on October 19, 2005. Under this 5% repurchase program, an additional 636,036 shares are available for repurchase. Cash dividends declared and paid during the first nine months of 2005 were \$7.1 million, a decrease from \$7.3 million from the same prior year period due to the reduction in common shares outstanding. On October 19, 2005, the Board of Directors declared a quarterly cash dividend of twenty cents (\$.20) per common share. The dividend is payable on November 11, 2005 to stockholders of record at the close of business on October 28, 2005.

The primary source of liquidity for OceanFirst Financial Corp., the holding company of OceanFirst Bank, is capital distributions from the banking subsidiary. For the first nine months of 2005, OceanFirst Financial Corp. received \$11.1 million in dividend payments from OceanFirst Bank. The Company also received \$5.0 million from the issuance of subordinated debt. The primary use of these funds is the payment of

Off-Balance-Sheet Arrangements and Contractual Obligations

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in the financial statements. These transactions involve, to varying degrees, elements of credit, interest rate, and liquidity risk. Such transactions are used for general corporate purposes or for customer needs. Corporate purpose transactions are used to help manage credit, interest rate, and liquidity risk or to optimize capital. Customer transactions are used to manage customers' requests for funding. These financial instruments and commitments include unused consumer lines of credit and commitments to extend credit. The Company also has outstanding commitments to sell loans amounting to \$96.8 million.

The following table shows the contractual obligations of the Company by expected payment period as of September 30, 2005 (in thousands):

| Contractual Obligation | Total | Less than | | | More than |
|--|--------------|------------------|------------------|------------------|------------------|
| | | one year | 1-3 years | 3-5 years | 5 years |
| Debt Obligations | \$ 461,727 | \$ 209,727 | \$ 139,000 | \$ 93,000 | \$ 20,000 |
| Commitments to Originate Loans | 214,873 | 214,873 | | | |
| Commitments to Fund Unused Lines of Credit | 167,621 | 167,621 | | | |

Debt obligations include borrowings from the FHLB and Securities Sold under Agreements to Repurchase. The borrowings have defined terms and, under certain circumstances, \$82.0 million of the borrowings are callable at the option of the lender.

Commitments to originate loans and commitments to fund unused lines of credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company's exposure to credit risk is represented by the contractual amount of the instruments.

- (3) Interest sensitivity gap represents the difference between interest-earning assets and interest-bearing liabilities.

Additionally, the table below sets forth the Company's exposure to interest rate risk as measured by the change in net portfolio value (NPV) and net interest income under varying rate shocks as of September 30, 2005 and December 31, 2004. All methods used to measure interest rate sensitivity involve the use of assumptions, which may tend to oversimplify the manner in which actual yields and costs respond to changes in market interest rates. The Company's interest rate sensitivity should be reviewed in conjunction with the financial statements and notes thereto contained in the Company's Annual Report for the year ended December 31, 2004.
