Item 7.01. Regulation FD Disclosure.

In the Company's conference call to be held on February 2, 2006 to discuss its fourth quarter and fiscal year ended December 31, 2005 financial results and current outlook, the Company intends to discuss:

System-in-Package or SiP DVB-H Tuner Strategy. Microtune has begun to implement a system in package or SiP strategy (where the tuner and demodulator are coupled in a two die single package) to address the anticipated demand by mobile phone manufacturers for greater miniaturization in mobile TV product components. In the first quarter of 2006, the Company will begin sampling a wafer level chip-scale packaged tuner. This chip-scale packaged tuner will allow for the cost-effective integration of our Mobile MicroTuner with a demodulator in a single small package.

2006 Company Goals.

Customer Satisfaction. Our first goal is to exceed our current customers' expectations by continuing to deliver next generation products that enable our customers to increase the performance and functionality of their own products while simultaneously decreasing their costs. Additionally, we have the goal to increase our market share in our current cable modem and cable set top markets over the next 15 months.

Mobile TV. Our second goal is to obtain a production design win with 2 of the top 4 mobile TV handset manufacturers by the end of 2006, and to secure 3 significant mobile TV production design wins in the non-cell phone portion of the DVB-H market (e.g. PDA, PC, etc.) within the next 12 months.

Digital Television. In the North American digital TV market, we have the goal of retaining Samsung as a customer and of securing 2 more major customers by the end of 2006, with the expanded objective of adding 5 - 6 additional major digital TV customers in 2007. Our long term goal is to achieve greater than 60% market share by 2008.

New Products. During the next 12 months, we plan to introduce a minimum of 5 new tuner products.

Edgar Filing: MICROTUNE INC - Form 8-K

Engineering Talent. During the next 12 - 18 months, we plan to increase our Broadband Radio Frequency (RF) engineering team by over 30%. We plan to achieve a portion of this goal by establishing a remote design center in the first half of the year.

In accordance with General Instruction B.2 of Form 8-K, the information set forth in this Item 7.01 shall be deemed to be furnished and shall not be deemed to be filed for purposes of the Exchange Act.
