Dividend policy

When determining the amount of any cash dividend, Nomura will first consider the maintenance of capital sufficient to capture business opportunities as they may develop. Nomura will then decide the target dividend amounts, taking into account the firm's dividend-on-equity ratio (DOE). When Nomura achieves a sufficient level of profit, it will decide the amount of the cash dividend taking into consideration the pay-out ratio. As for retained profits, Nomura intends to invest in business areas where high profitability and growth may reasonably be expected, including development and expansion of infrastructure, to maximize value for shareholders.
