*1. The Company restated its consolidated financial statements for the years ended December 31, 2004 and 2003. Please refer to note 3 to the restated consolidated financial statements as at and for the years ended December 31, 2004 and 2003 for further explanation.

*2. The Company adopted the fair value based method of accounting for stock-based compensation effective January 1, 2004 retroactive with restatement of prior years to January 1, 2002. Refer to note 2(a)(i) of the restated consolidated financial statements for the years ended December 31, 2004 and 2003 for further explanation.

Bennett Environmental recorded a loss of \$1.8 million in the quarter compared to a loss of \$1.4 million for the same period in 2005. Sales for the quarter of 2006 were \$2.7 million compared to \$6.2 million a year earlier. Approximately 4,600 tonnes of soil were processed at the Company's Quebec facility, approximately 233,000 kilograms was processed at the Cornwall facility and approximately 700 tonnes were processed as part of the test burn at the Company's Belledune facility. Sales for the Quebec facility were approximately \$1.9 million, sales for the Cornwall facility were approximately \$0.7 million and revenue from the Belledune facility were approximately \$0.1 million.

For the quarter ended June 30, 2006 contribution margins (defined as sales less operating expenses) were \$0.4 million compared to \$1.3 million in the same period a year earlier. On a per tonne basis contribution margins declined to approximately \$90 per tonne from \$125 per tonne in the same period last year.

Administration and Business Development costs were \$1.9 million in the second quarter of 2006. Professional fees accounted for a large percentage of the administrative and business development costs, which in the second quarter of 2006 was \$0.5 million lower than the second quarter of 2005. In addition, insurance and marketing and public relations costs were down \$0.5 million from the same period in 2005.

The slightly higher net loss for the second quarter of 2006 compared to the second quarter of 2005 is a result of decreased volumes of soil being processed quarter over quarter (2006 4,600 tonnes; 2005 8,800 tonnes), lower transportation costs being incurred, and the Belledune facility test burn.

For the quarter ended June 30, 2006, cash used for operating activities before changes in operating working capital amounted to \$1.1 million. Cash provided by operating working capital was approximately \$0.3 million for a net cash used for operations of approximately \$0.8 million for the quarter. The principal generation of cash from operating working capital was from the collection of accounts receivable of \$2.6 million. The main use of cash in the second quarter of 2006 was the acquisition of Trans-Cycle's net assets for approximately \$2.2 million and a deposit provided to the Ontario Ministry of Environment for approximately \$1.7 million for the Trans-Cycle operating permits.

At the end of the second quarter of 2006 the Company had cash and equivalents of \$4.8 million and working capital of \$12.6 million including cash.

Earlier in the year the Company said that it expected to receive approximately 30,000 to 40,000 tonnes of material in the second half of the year. With slower than expected market conditions the Company now expects lower volumes of soil to be delivered and now expects to process approximately 28,000 to 33,000 tonnes for the year. However, as demonstrated by the reduction in Administrative and Business Development costs in the second quarter of 2006, the Company will continue its cost cutting efforts and expects to reduce the cash burn rate by the end of the year.

Notes to Interim Consolidated Financial Statements

(Expressed in Canadian dollars)

Three months and six months ended June 30, 2006 and 2005

(Unaudited)

1. Basis of presentation:

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles for interim financial statements and accordingly, do not include all disclosures required for annual financial statements. These consolidated financial statements follow the same accounting policies and methods of their application as the most recent annual financial statements except as disclosed herein. In the opinion of management, all adjustments, including reclassifications and normal recurring adjustments necessary to present fairly the financial position, results of operations and retained earnings and cash flows at June 30, 2006 and for all periods presented, have been made. Interim results are not necessarily indicative of the results for a full year.

These interim consolidated financial statements should be read in conjunction with the December 31, 2005 annual financial statements and notes thereto included in the 2005 Annual Report.

2. Revenue recognition:

The Company provides high temperature, highly specialized treatment services of contaminated materials. In some cases, the Company is also engaged to remove and transport the contaminated materials to its facilities for processing and disposal. The Company recognizes revenue for these activities using the proportional performance method when all of the following criteria are met:

- (i) remediation activities are completed for each batch of material or waste stream being treated;
- (ii) the Company has confirmed that the contaminants have been destroyed in accordance with the contract terms, and;
- (iii) collection is reasonably assured.

For those contracts whereby the Company is engaged to transport the contaminated material from the customer's site to its facilities, the transportation costs incurred are deferred until the materials have been treated and the Company has determined that the contaminants have been destroyed in accordance with the contract terms. All other processing costs are expensed as incurred.

(Unaudited)

2. Revenue recognition (continued):

Revenue from long-term fixed price soil remediation contracts is recognized using the percentage of completion method, based on the ratio of costs incurred to date over estimated total costs. This method is used because management considers costs to be the best available measure of performance on these contracts. Contract costs include all direct material and wages and related benefits. Revenue related to unpriced change orders under the percentage of completion method is recognized to the extent of the costs incurred, if the amount is probable of collection. If it is probable that the contract will be adjusted by an amount that exceeds the costs attributable to the change order and the amount of the excess can be reliably estimated, revenue in excess of the costs attributable to unpriced change orders is recorded when realization is assured beyond a reasonable doubt.

The Company records revenue relating to claims to the extent of costs incurred and only when it is probable that the claim will result in additional contract revenue and the amount can be reasonably estimated. Claims are amounts in excess of the agreed upon contract price that the Company seeks to collect from its customers for customer-caused delays, errors in specifications and designs, contract terminations, change orders in dispute or unapproved as to both scope and price, or other causes or unanticipated additional costs.

3. Change in accounting policy:

Effective January 1, 2006, the Company adopted The Canadian Institute of Chartered Accountants (CICA) Handbook, Section 3831, Non-monetary Transactions. This standard requires all non-monetary transactions to be measured at fair values unless they meet one of four very specific criteria. Commercial substance replaces culmination of the earnings process as the test for fair value measurement. A transaction has commercial substance if it causes an identifiable and measurable change in the economic circumstances of the entity. The adoption of this standard did not have a significant impact on the consolidated interim financial statements.

8. Segmented information (continued):

(c) Concentration of credit risk:

Financial instruments that potentially subject the Company to concentrations of credit risk are primarily accounts receivable. As at June 30, 2006, two customers represented 50% and 9%, respectively, of accounts receivable (December 31, 2005 - 28% and 27%, respectively). As at June 30, 2006, Saglek receivable represented 50% (December 31, 2005 - 28%) of accounts receivable.

Management is of the opinion that any risk of loss due to bad debts is significantly reduced due to the financial strength of its customers. The Company performs ongoing credit evaluations of its customers' financial condition and requires letters of credit or other guarantees whenever deemed necessary.

10. Contingencies:

No additional significant developments have occurred relating to the contingencies described in note 17 to our 2005 annual audited financial statements except as noted below and note 13 contained herein.

Regulatory investigations:

The Company and certain of the current officers and former officers received a letter dated February 11, 2005 from the Ontario Securities Commission (OSC) giving such officers and directors the opportunity to provide written submissions to the OSC before the OSC determines to commence enforcement proceedings. The OSC stated in the letter to the Company that it was of the view that the Company failed to disclose the change in status of the contract at the Federal Creosote Site, and made allegations of illegal insider trading. Submissions were provided to the OSC by March 17, 2005.

On June 20, 2006, the Company reached a settlement agreement with the Ontario Securities Commission (OSC) relating to this matter. Under the terms of the settlement, an independent third party acceptable to both the Company and the OSC will be engaged to review the Company's disclosure and reporting practices and procedures; and the Company must implement promptly any recommendations made by the independent third party.
