Table of Contents

NEW YORK COMMUNITY BANCORP, INC.

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Basis of Presentation

The accompanying unaudited consolidated financial statements include the accounts of New York Community Bancorp, Inc. and subsidiaries (the Company), including its two principal banking subsidiaries: New York Community Bank (the Community Bank) and New York Commercial Bank (the Commercial Bank). The unaudited consolidated financial statements reflect all normal recurring adjustments that, in the opinion of management, are necessary to present a fair statement of the results for the periods presented. There are no other adjustments reflected in the accompanying consolidated financial statements. The results of operations for the three and six months ended June 30, 2006 are not necessarily indicative of the results of operations that may be expected for all of 2006.

Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC).

The unaudited consolidated financial statements include accounts of the Company and other entities in which the Company has a controlling financial interest. All inter-company balances and transactions have been eliminated. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's 2005 Annual Report on Form 10-K.

Certain reclassifications have been made to the prior-year consolidated financial statements to conform to the 2006 presentation, including a reclassification of the amounts of Treasury stock and paid-in capital in excess of par to appropriately reflect the cost of the Treasury shares issued in the acquisition of Long Island Financial Corp.

Note 2. Stock-based Compensation

The Company had nine stock option plans at June 30, 2006: the 1993 and 1997 New York Community Bancorp, Inc. Stock Option Plans; the 1993 and 1996 Haven Bancorp, Inc. Stock Option Plans; the 1998 Richmond County Financial Corp. Stock Compensation Plan; the T R Financial Corp. 1993 Incentive Stock Option Plan; the Roslyn Bancorp, Inc. 1997 and 2001 Stock-based Incentive Plans; and the 1998 Long Island Financial Corp. Stock Option Plan (collectively, the Stock Option Plans). The number of shares reserved for future issuance under the Stock Option Plans was 559,030 at June 30, 2006.

Under the Stock Option Plans, each granted stock option entitles the holder to purchase shares of the Company's common stock at an exercise price equal to 100% of the fair market value of the stock on the date of grant. All stock options expire ten years from the date on which they were granted.

At the time of grant, all options were to have vested in whole or in part over two to five years from the date of issuance, with all options becoming 100% exercisable in the event that employment were terminated due to death, disability, normal retirement, or in the event of a change in control. However, on December 30, 2005, the Board of Directors of the Company accelerated the vesting of, and vested, all unvested options to acquire the Company's common stock that were outstanding at that date (the Acceleration). A total of 1.4 million stock options were impacted by the Acceleration. All other terms and conditions of the accelerated options remained unchanged.

The Company did not grant any stock options during the six months ended June 30, 2006; accordingly, there were no unvested stock options as of that date. In accordance with Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), Share-based Payment (SFAS No. 123R), which the Company adopted on January 1, 2006 using the modified prospective approach, the Company did not record any compensation expense relating to stock options for the six-month period ended June 30, 2006. The adoption of SFAS No. 123R had no impact on the Company's basic or diluted earnings per share for the three or six months ended June 30, 2006.

Table of Contents

Prior to the adoption of SFAS No. 123R on January 1, 2006, the Company applied Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations in accounting for the Stock Option Plans and, therefore, no compensation cost for such options had been recognized. Had compensation cost for the Stock Option Plans been determined, using a Black-Scholes option-pricing model, based on the fair value at the date of grant for awards made under those plans, consistent with the method set forth in SFAS No. 123, Accounting for Stock-based Compensation, as amended by SFAS No. 148, Accounting for Stock-based Compensation Transition and Disclosure, the Company's pro forma net income in the second quarter of 2005 would have amounted to \$85.0 million and been equivalent to basic earnings per share of \$0.33 and diluted earnings per share of \$0.32. For the six months ended June 30, 2005, pro forma net income would have amounted to \$174.5 million and been equivalent to both basic and diluted earnings per share of \$0.67. The weighted average assumptions used for the valuation of options granted during the first six months of 2005 were: a dividend yield of 3.8%; expected volatility of 29.6%; a risk-free interest rate of 4.4%; and an expected life of ten years.

The status of the Company's Stock Option Plans at June 30, 2006 and the changes that occurred during the three and six months ended at that date are summarized in the following table:

	Three Months Ended		Six Months Ended	
	June 30, 2006		June 30, 2006	
	Number of Stock Options	Weighted Average Exercise Price	Number of Stock Options	Weighted Average Exercise Price
Stock options outstanding and exercisable, beginning of period	19,581,852	\$15.06	20,313,114	\$14.95
Granted		N/A		N/A
Exercised	(172,665)	12.25	(902,876)	12.06
Forfeited		N/A	(1,051)	15.00
Stock options outstanding and exercisable, end of period	19,409,187	\$15.08	19,409,187	\$15.08

Total options outstanding and exercisable at June 30, 2006 had a weighted average remaining contractual life of 5.04 years, a weighted average exercise price of \$15.08, and an aggregate intrinsic value of \$36.7 million. The intrinsic value of options exercised during the six months ended June 30, 2006 and 2005 was \$4.8 million and \$4.0 million, respectively.

At June 30, 2006, the Company also had 9,000,000 shares available for grant as options or restricted stock under the New York Community Bancorp, Inc. 2006 Stock Incentive Plan (the 2006 Stock Incentive Plan), which was approved by the Company's shareholders at its Annual Meeting on June 7, 2006. As of June 30, 2006, no options or shares had been granted under the 2006 Stock Incentive Plan.

Table of Contents**Note 3. Available-for-Sale Securities**

The following table summarizes the amortized cost and estimated market values of the Company's available-for-sale securities at the dates indicated:

(1) Government-sponsored Enterprises

(2) Collateralized mortgage obligations

The Company has determined that the unrealized losses on securities at June 30, 2006 were temporary impairments due to changes in market interest rates and not to significant credit deterioration or other factors. Management believes that the unrealized losses on securities are expected to be recovered within a reasonable time through a typical interest rate cycle, and that the Company has the ability and intent to retain these securities until recovery of market value.

Note 4. Loans, net

The following table provides a summary of the Company's loan portfolio at the dates indicated:

(dollars in thousands)	June 30, 2006		December 31, 2005	
	Amount	Percent of Total	Amount	Percent of Total
Mortgage loans:				
Multi-family	\$ 14,523,870	74.68%	\$ 12,854,188	75.49%

Table of Contents**Note 5. Borrowed Funds**

The following table provides a summary of the Company's borrowed funds at the dates indicated:

(in thousands)	June 30, 2006	December 31, 2005
FHLB-NY advances	\$ 6,494,857	\$ 5,409,458
Repurchase agreements	3,763,117	4,307,934
Junior subordinated debentures	456,898	454,197
Senior debt	193,370	195,069
Preferred stock of subsidiaries	162,000	162,000
 Total borrowed funds	 \$ 11,070,242	 \$10,528,658

At June 30, 2006, the Company had \$456.9 million of outstanding junior subordinated deferrable interest debentures (junior subordinated debentures) held by ten statutory business trusts that issued guaranteed capital securities. The capital securities qualified as Tier 1 capital of the Company at that date. The proceeds of each issuance were invested in a series of junior subordinated debentures of the Company. The underlying asset of each statutory business trust is the relevant debenture. The Company has fully and unconditionally guaranteed each of the obligations under each trust's capital securities to the extent set forth in the guarantee. Each trust's capital securities are subject to mandatory redemption, in whole or in part, upon repayment of the debentures at their stated maturity or earlier redemption.

The following table provides a summary of the outstanding capital securities issued by each trust and the junior subordinated debentures issued by the Company to each trust as of June 30, 2006:

Issuer	Interest Rate of Capital Securities and Debentures ⁽¹⁾	Junior Subordinated Debenture Amount Outstanding (dollars in thousands)	Capital Securities Amount Outstanding (dollars in thousands)	Date of Original Issue	Stated Maturity	Optional Redemption Date
Haven Capital Trust I	10.460%	\$ 18,174	\$ 17,400	February 12, 1997	February 1, 2027	February 1, 2007

		\$456,898	\$440,130			

(1) Excludes the effect of purchase accounting adjustments.

In 2003, the Company entered into four interest rate swap agreements to hedge the interest rate risk inherent in certain of these junior subordinated debentures. In accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, the Company concluded in the first quarter of 2006 that its interest rate swap transactions did not qualify for the short-cut accounting method. Accordingly, during said quarter, the Company re-designated three of the swaps associated with these transactions as fair value hedges under the long-haul accounting method, in order to qualify them for fair value hedge accounting under SFAS No. 133, effective March 31, 2006. In the second quarter of 2006, in connection with the repositioning of its liabilities following the acquisition of Atlantic Bank of New York (Atlantic Bank) on the 28th of April, the Company terminated its interest rate swap agreements. The termination resulted in a pre-tax charge of \$1.1 million which is recorded in non-interest expense in the Consolidated Statements of Income for the three and six months ended June 30, 2006.

Table of Contents**Note 6. Pension and Other Post-retirement Benefits**

The following table sets forth the disclosures required under SFAS No. 132 (Revised 2003), Employers' Disclosures about Pensions and Other Post-retirement Benefits for the Company's pension and post-retirement plans for the periods indicated:

(in thousands)	For the Three Months Ended June 30,			
	2006	2005	2006	2005
	Pension Benefits	Post-retirement Benefits	Pension Benefits	Post-retirement Benefits
Components of net periodic (credit) expense:				
Interest cost	\$1,189	\$241	\$1,230	\$237
Service cost		2		2
Expected return on plan assets	(2,028)		(1,920)	
Unrecognized past service liability	50	11	51	11
Amortization of unrecognized loss	381	17	262	
Net periodic (credit) expense	\$(408)	\$271	\$(377)	\$250

(in thousands)	For the Six Months Ended June 30,			
	2006	2005	2006	2005
	Pension Benefits	Post-retirement Benefits	Pension Benefits	Post-retirement Benefits
Components of net periodic (credit) expense:				
Interest cost	\$2,378	\$482	\$2,460	\$474
Service cost		4		4
Expected return on plan assets	(4,056)		(3,840)	
Unrecognized past service liability	100	22	102	22
Amortization of unrecognized loss	762	34	524	
Net periodic (credit) expense	\$(816)	\$542	\$(754)	\$500

As discussed in the notes to the consolidated financial statements presented in the Company's 2005 Annual Report on Form 10-K, the Company expects to contribute \$1.3 million to its post-retirement plan in 2006.

Note 7. Computation of Earnings per Share

Note 8. Impact of Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (the FASB) issued Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes – An Interpretation of FASB Statement No. 109. FIN 48 prescribes a recognition threshold and measurement attribute for how a company should recognize, measure, present, and disclose in its financial statements uncertain tax positions that the company has taken or expects to take on a tax return. FIN 48 will require that the financial statements reflect expected future tax consequences of such positions presuming the taxing authorities' full knowledge of the position and all relevant facts. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company has not completed its evaluation of the impact of adopting FIN 48.

In June 2006, the Emerging Issues Task Force (EITF) of the FASB reached tentative conclusions on accounting for life insurance in Issue Nos. 06-4, Accounting for Deferred Compensation and Post-retirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements (EITF No. 06-4) and 06-5, Accounting for Purchases of Life Insurance – Determining the Amount That Could Be Realized in Accordance With FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance (FTB 85-4) (EITF No. 06-5).

EITF Issue No. 06-4 concluded that an employer, entering into an endorsement split-dollar life insurance arrangement that provides an employee with a post-retirement benefit, has not effectively settled the obligation by purchasing the life insurance. Therefore, a liability for the future benefits should be recognized in accordance with SFAS No. 106, Employers' Accounting for Post-retirement Benefits Other Than Pensions or APB Opinion No. 12, Omnibus Opinion 1967. A consensus on this Issue would be effective for fiscal years beginning after December 15, 2006 and would be recognized as a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption. The Company has not completed its evaluation of the impact of adopting EITF No. 06-4.

EITF Issue No. 06-5 concluded that a policyholder should consider other amounts included in the contractual terms of an insurance policy, in addition to cash surrender value, when determining the asset value that could be realized under the terms of the insurance contract in accordance with FTB 85-4. These other amounts include: non-discretionary amounts (those items that are not contingent as of the balance sheet date) and time-based amounts (i.e., Deferred Acquisition Costs Tax) which would be accounted for on a present-value basis. Items that are probable to be received and/or subject to the insurance company's intent to pay would not be included in asset value. In addition, the amount that could be realized should be determined on an individual policy or certificate level. Amounts that would be realized upon surrender of all policies or certificates would not be included when measuring assets. A consensus on this Issue would be effective for fiscal years beginning after December 15, 2006 and would be recognized through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption for all life insurance contracts currently held. The Company has not completed its evaluation of the impact of adopting EITF No. 06-5.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets – an amendment of FASB Statement No. 140 which is effective for fiscal years beginning after September 15, 2006. SFAS No. 156 was issued to simplify the accounting for servicing rights and to reduce the volatility that results from using different measurement attributes. The Company does not expect the adoption of SFAS No. 156 to have a material impact on its consolidated statements of financial condition or results of operations.

In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments – an amendment of FASB Statements No. 133 and 140 which is effective for fiscal years beginning after September 15, 2006. SFAS No. 155 was issued to require more consistent accounting that eliminates exemptions and provides a means to simplify the accounting for these instruments. The Company does not expect the adoption of SFAS No. 155 to have a material impact on its consolidated statements of financial condition or results of operations.

Table of Contents**Note 9. Business Combinations**

On April 28, 2006, pursuant to the Purchase Agreement announced on October 11, 2005, the Company acquired Atlantic Bank, a commercial bank headquartered in Manhattan, for \$400.0 million. At the acquisition date, Atlantic Bank had total assets of \$2.8 billion (including loans of \$1.2 billion and securities of \$1.1 billion); deposits of \$1.8 billion (including core deposits of \$1.4 billion); and borrowed funds of \$516.7 million. The Company's second quarter 2006 results include two months of combined operations with Atlantic Bank.

To fund the all-cash transaction, the Company issued 24.5 million shares of its common stock in a secondary offering on April 18, 2006, generating net proceeds of \$400.2 million.

The acquisition added 17 branches to the Company's commercial bank franchise, expanding its presence in Brooklyn and Long Island, and extending its presence into Manhattan, Queens, and Westchester County. In addition to diversifying the Company's asset mix and increasing its low-cost core and non-interest-bearing deposits, the acquisition enabled the Company to reduce its higher-cost funding sources and thus enhance its net interest margin in a challenging interest rate environment.

The purchase price was allocated to the acquired assets and liabilities of Atlantic Bank based on their fair value as of April 28, 2006. As the Company is still in the process of finalizing these values, the allocation of the purchase price is subject to revision.

(in thousands)

Assets:	
Cash and cash equivalents	\$ 70,715
Securities	1,121,725
Loans, net	1,202,648
Premises and equipment	59,834
Goodwill	167,521
Core deposit intangible	38,332
Other assets	90,374
Total assets	\$ 2,751,149
Liabilities:	
Deposits	\$ 1,796,677
Borrowed funds	516,711
Other liabilities	41,281
Total liabilities	\$ 2,354,669

A core deposit intangible asset (CDI) of \$38.3 million was recognized in connection with the Atlantic Bank acquisition and is being amortized on an accelerated basis over an estimated useful life of ten years. The Company retained the services of an independent valuation firm to determine the amount of CDI recorded. Operating results for Atlantic Bank were not significant to the consolidated operating results of the Company and, consequently, pro forma operating results have not been presented herein. Included in the purchase price were accrued acquisition costs of approximately \$20.6 million. At June 30, 2006, accrued merger-related costs of \$12.8 million remained in other liabilities in the Consolidated Statement of Condition and consisted primarily of employment benefits, professional fees, and costs associated with the cancellation of certain data processing contracts. None of the goodwill associated with the Atlantic Bank transaction will be deductible for income tax purposes.

NEW YORK COMMUNITY BANCORP, INC.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS

OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the purpose of this Quarterly Report on Form 10-Q, the words we, us, our, and the Company are used to refer to New York Community Bancorp, Inc. and our consolidated subsidiaries, including New York Community Bank and New York Commercial Bank (the Community Bank and the Commercial Bank, respectively, and collectively, the Banks.)

Forward-looking Statements and Associated Risk Factors

This report, like many written and oral communications presented by New York Community Bancorp, Inc. and our authorized officers, may contain certain forward-looking statements regarding our prospective performance and strategies within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and are including this statement for purposes of said safe harbor provisions.

Forward-looking statements, which are based on certain assumptions and describe future plans, strategies, and expectations of the Company, are generally identified by use of the words anticipate, believe, estimate, expect, intend, plan, project, seek, strive, try, or future or such as will, would, should, could, may, or similar expressions. Our ability to predict results or the actual effects of our plans or strategies is inherently uncertain. Accordingly, actual results may differ materially from anticipated results.

There are a number of factors, many of which are beyond our control, that could cause actual conditions, events, or results to differ significantly from those described in our forward-looking statements. These factors include, but are not limited to:

General economic conditions and trends, either nationally or locally in some or all of the areas in which we and our customers conduct our respective businesses;

Conditions in the securities markets or the banking industry;

Changes in interest rates, which may affect our net income, future cash flows, or the market value of our assets;

Changes in deposit flows, and in the demand for deposit, loan, and investment products and other financial services in the markets we serve;

Changes in the financial or operating performance of our customers' businesses;

Changes in real estate values, which could impact the quality of the assets securing the loans in our portfolio;

Changes in the quality or composition of our loan or investment portfolios;

Changes in competitive pressures among financial institutions or from non-financial institutions;

Edgar Filing: NEW YORK COMMUNITY BANCORP INC - Form 10-Q

Changes in our customer base;

Our ability to successfully integrate any assets, liabilities, customers, systems, and management personnel we may acquire into our operations, and our ability to realize related revenue synergies and cost savings within expected time frames;

Potential exposure to unknown or contingent liabilities of companies targeted for acquisition;

Our ability to retain key members of management;

Our timely development of new lines of business and competitive products or services within existing lines of business in a changing environment, and the acceptance of such products or services by our customers;

Any interruption or breach of security resulting in failures or disruptions in customer account management, general ledger, deposit, loan, or other systems;

The outcome of pending or threatened litigation, or of other matters before regulatory agencies, or of matters resulting from regulatory exams, whether currently existing or commencing in the future;

Environmental conditions that exist or may exist on properties owned by, leased by, or mortgaged to the Company;

Table of Contents

Changes in estimates of future reserve requirements based upon the periodic review thereof under relevant regulatory and accounting requirements;

Changes in banking, securities, tax, environmental, and insurance laws, regulations, and policies, and the ability to comply with such changes in a timely manner;

Changes in accounting principles, policies, practices, or guidelines;

Changes in legislation and regulation;

Operational issues stemming from, and/or capital spending necessitated by, the potential need to adapt to industry changes in information technology systems, on which we are highly dependent;

The ability to keep pace with, and implement on a timely basis, technological changes;

Changes in the monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board;

War or terrorist activities; and

Other economic, competitive, governmental, regulatory, and geopolitical factors affecting our operations, pricing, and services. Furthermore, the timing and occurrence or non-occurrence of events may be subject to circumstances beyond our control.

In addition, it should be noted that we routinely evaluate opportunities to expand through acquisition and frequently conduct due diligence activities in connection with such opportunities. As a result, acquisition discussions and, in some cases, negotiations, may take place in the future, and acquisitions involving cash, debt, or equity securities may occur.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this report. Except as required by applicable law or regulation, we undertake no obligation to update these forward-looking statements to reflect events or circumstances that occur after the date on which such statements were made.

Reconciliation of Stockholders' Equity and Tangible Stockholders' Equity, Total Assets and Tangible Assets, and the Related Measures

Although tangible stockholders' equity is not a measure of capital calculated in accordance with GAAP, we believe that it is an important indication of our ability to grow both organically and through business combinations, as well as our ability to pay dividends and to engage in various capital management strategies, including the repurchase of Company shares.

We calculate tangible stockholders' equity by subtracting from stockholders' equity the sum of our goodwill and core deposit intangibles (CDI), and calculate tangible assets by subtracting the same sum from our total assets. To calculate our ratio of tangible stockholders' equity to tangible assets, we divide our tangible stockholders' equity by our tangible assets, both of which include after-tax net unrealized losses on securities. We also calculate our ratio of tangible stockholders' equity to tangible assets excluding our after-tax net unrealized losses on securities, as such losses are impacted by changes in market interest rates and therefore tend to change from day to day. This ratio is referred to below and in this report as the ratio of adjusted tangible stockholders' equity to adjusted tangible assets.

Edgar Filing: NEW YORK COMMUNITY BANCORP INC - Form 10-Q

Tangible stockholders' equity and the related tangible capital measures should not be considered in isolation or as a substitute for stockholders' equity or any other capital measure prepared in accordance with GAAP. Moreover, the manner in which we calculate our tangible stockholders' equity and our ratio to tangible assets may differ from that of other companies reporting measures of capital with similar names.

Table of Contents

A reconciliation of our stockholders' equity and tangible stockholders' equity, our total assets and tangible assets, and the related ratios at June 30, 2006 and December 31, 2005 follows:

(dollars in thousands)	June 30, 2006	December 31, 2005
Total stockholders' equity	\$3,697,170	\$3,324,877
Less: Goodwill	(2,149,824)	(1,980,689)
Core deposit intangibles	(116,478)	(86,533)
Tangible stockholders' equity	\$1,430,868	\$1,257,655
Total assets	\$28,728,824	\$26,283,705
Less: Goodwill	(2,149,824)	(1,980,689)
Core deposit intangibles	(116,478)	(86,533)
Tangible assets	\$26,462,522	\$24,216,483
Stockholders' equity to total assets	12.87%	12.65%
Tangible stockholders' equity to tangible assets	5.41%	5.19%
Tangible stockholders' equity	\$1,430,868	\$1,257,655
Add back: After-tax net unrealized losses on securities	78,619	55,857
Adjusted tangible stockholders' equity	\$1,509,487	\$1,313,512
Tangible assets	\$26,462,522	\$24,216,483
Add back: After-tax net unrealized losses on securities	78,619	55,857
Adjusted tangible assets	\$26,541,141	\$24,272,340
Adjusted tangible stockholders' equity to adjusted tangible assets	5.69%	5.41%

Critical Accounting Policies

We have identified the accounting policies below as being critical to understanding our financial condition and results of operations. Certain accounting policies are considered to be important to the portrayal of our financial condition, since they require management to make complex or subjective judgments, some of which may relate to matters that are inherently uncertain. The inherent sensitivity of our consolidated financial statements to these critical accounting policies, and the judgments, estimates, and assumptions used therein, could have a material impact on our financial condition or results of operations.

Allowance for Loan Losses

The allowance for loan losses is increased by the provisions for loan losses charged to operations and reduced by net charge-offs or reversals. A separate loan loss allowance is established for each of the Community Bank and the Commercial Bank and, except as otherwise noted, the process for establishing the allowance for loan losses is the same for each.

Management establishes the allowances for loan losses through an assessment of probable losses in each of the respective loan portfolios. Several factors are considered in this process, including historical and projected default rates and loss severities; internal risk ratings; loan size; economic, geographic, industry, and environmental factors; and loan impairment, as defined under Statement of Financial Accounting Standards (SFAS) No. 114, Accounting by Creditors for Impairment of a Loan, as amended by SFAS No. 118, Accounting by Creditors for Impairment of

Edgar Filing: NEW YORK COMMUNITY BANCORP INC - Form 10-Q

a Loan/Income Recognition and Disclosures. Under SFAS Nos. 114 and 118, a loan is classified as impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due under the contractual terms of the loan. We apply SFAS Nos. 114 and 118 to all loans except smaller balance homogenous loans and loans carried at fair value or the lower of cost or fair value.

Table of Contents

In establishing the loan loss allowances, management also considers the Banks' current business strategies and credit processes, including compliance with stringent guidelines established by the respective Boards of Directors with regard to credit limitations, loan approvals, underwriting criteria, and loan workout procedures.

In accordance with the pertinent policies, the allowances for loan losses are segmented to correspond to the various types of loans in the loan portfolios. These loan categories are assessed with specific emphasis on the internal risk ratings, underlying collateral, credit underwriting, loan size, and geographic area. These factors correspond to the respective levels of quantified and inherent risk.

The assessments take into consideration loans that have been adversely rated, primarily through the valuation of the collateral supporting each loan. Adversely rated loans are loans that are either non-performing or that exhibit certain weaknesses that could jeopardize payment in accordance with the original terms. Larger loans are assigned risk ratings based upon a routine review of the credit files, while smaller loans exceeding 90 days in arrears are assigned risk ratings based upon an aging schedule. Quantified risk factors are assigned for each risk-rating category to provide an allocation to the overall loan loss allowance.

The remainder of each loan portfolio is then assessed, by loan type, with similar risk factors being considered, including the borrower's ability to pay and our past loan loss experience with each type of loan. These loans are also assigned quantified risk factors, which result in allocations to the allowances for loan losses for each particular loan or loan type in the portfolio.

In order to determine their overall adequacy, each of the respective loan loss allowances is reviewed quarterly by management and by the Mortgage and Real Estate Committee of the Community Bank's Board of Directors or the Credit Committee of the Board of Directors of the Commercial Bank, as applicable.

Other factors and processes considered in determining the appropriate level of the allowances for loan losses include, but are not limited to:

1. End-of-period levels and observable trends in non-performing loans;
2. Charge-offs experienced over prior periods, including an analysis of the underlying factors leading to the delinquencies and subsequent charge-offs (if any);
3. Periodic inspections of the loan collateral by qualified in-house property appraisers/inspectors, as applicable;
4. Regular meetings of executive management with the pertinent Board committee, during which observable trends in the local economy and/or the real estate market are discussed;
5. Full assessment by the pertinent Board of Directors of the aforementioned factors when making a business judgment regarding the impact of anticipated changes on the future level of the allowance for loan losses; and
6. Analysis of the portfolio in the aggregate, as well as on an individual loan basis, taking into consideration payment history, underwriting analyses, and internal risk ratings.

While management uses available information to recognize losses on loans, future additions to the respective loan loss allowances may be necessary, based on changes in economic and local market conditions beyond management's control. In addition, the Community Bank and/or the Commercial Bank may be required to take certain charge-offs and/or recognize additions to their loan loss allowances, based on the judgment of regulatory agencies with regard to information provided to them during their examinations.

Investment Securities

Edgar Filing: NEW YORK COMMUNITY BANCORP INC - Form 10-Q

The securities portfolio consists of mortgage-related securities and debt and equity (other) securities. Securities that are classified as available for sale are carried at estimated fair value, with any unrealized gains and losses, net of taxes, reported as accumulated other comprehensive income or loss in stockholders equity. Securities that we have the positive intent and ability to hold to maturity are classified as held to maturity and are carried at amortized cost.

Table of Contents

The market values of our securities, particularly fixed-rate mortgage-related securities, are affected by changes in market interest rates. In general, as interest rates rise, the market value of fixed-rate securities will decline; as interest rates fall, the market value of fixed-rate securities will increase. We conduct a periodic review and evaluation of the securities portfolio to determine if the decline in the fair value of any security below its carrying value is other than temporary. Estimated fair values for securities are based on published or securities dealers' market values. If we deem any decline in value to be other than temporary, the security is written down to a new cost basis and the resulting loss is charged against earnings.

Goodwill Impairment

Goodwill is presumed to have an indefinite useful life and is tested for impairment, rather than amortized, at the reporting unit level, at least once a year. Impairment exists when the carrying amount of goodwill exceeds its implied fair value. If the fair value of a reporting unit exceeds its carrying amount at the time of testing, the goodwill of the reporting unit is not considered impaired. According to SFAS No. 142, Goodwill and Other Intangible Assets, quoted market prices in active markets are the best evidence of fair value and are to be used as the basis for measurement, when available. Other acceptable valuation methods include present-value measurements based on multiples of earnings or revenues, or similar performance measures. Differences in the identification of reporting units and the use of valuation techniques could result in materially different evaluations of impairment.

For the purpose of goodwill impairment testing, we have identified one reporting unit. We performed our annual goodwill impairment test as of January 1, 2006, and determined that the fair value of the reporting unit was in excess of its carrying value, using the quoted market price of our common stock on the impairment testing date as the basis for determining fair value. As of the annual impairment test date, there was no indication of goodwill impairment.

Income Taxes

We estimate income taxes payable based on the amount we expect to owe the various tax authorities (i.e., federal, state, and local). Income taxes represent the net estimated amount due to, or to be received from, such tax authorities. In estimating income taxes, management assesses the relative merits and risks of the appropriate tax treatment of transactions, taking into account statutory, judicial, and regulatory guidance in the context of our tax position. In this process, management also relies on tax opinions, recent audits, and historical experience. Although we use available information to record income taxes, underlying estimates and assumptions can change over time as a result of unanticipated events or circumstances such as changes in tax laws and judicial guidance influencing our overall tax position.

Recent Events

Dividend Payment

On July 25, 2006, our Board of Directors declared a quarterly cash dividend of \$0.25 per share, payable on August 15, 2006 to shareholders of record at August 4, 2006.

Executive Summary

A leading financial institution in the New York metropolitan region, New York Community Bancorp, Inc. is organized under Delaware Law as a multi-bank holding company and has two primary subsidiaries: New York Community Bank and New York Commercial Bank.

Established in April 1859, the Community Bank is a New York State-chartered savings bank with 137 locations, including 46 in-store branches, serving New York City, Long Island, Westchester County, and northern New Jersey. The Community Bank branches operate through seven divisions, each one serving a specific county or community. The three largest divisions are Roslyn Savings Bank, with 57 locations on Long Island, a suburban market east of New York City comprised of Nassau and Suffolk counties; Queens County Savings Bank, with 34

Table of Contents

locations in the New York City borough of Queens; and Richmond County Savings Bank, with 23 locations on Staten Island, which is the fastest growing borough of New York City. In the adjacent markets, the Community Bank operates through Roosevelt Savings Bank, with eight branches serving the borough of Brooklyn; CFS Bank, with one branch in the Bronx, one in Manhattan, and four in Westchester County; First Savings Bank of New Jersey, with four branches in Bayonne (Hudson County), New Jersey; and Ironbound Bank, which serves Union and Essex Counties in New Jersey with two branches each. In addition, we operate a single branch in the Bronx under the name New York Community Bank.

The Commercial Bank is a full-service, New York State-chartered commercial bank with 29 branches serving the New York City boroughs of Manhattan, Queens, and Brooklyn, as well as Westchester County and Long Island. The first twelve branches were established in connection with our acquisition of Long Island Financial Corp. (Long Island Financial), the parent company of Long Island Commercial Bank, on December 30, 2005. At the close of business on that date, Long Island Financial merged with and into the Company, and Long Island Commercial Bank commenced operations under the name New York Commercial Bank. With the acquisition of Atlantic Bank on April 28, 2006, the Commercial Bank grew to 29 branches; the 17 branches of Atlantic Bank now operate as the Atlantic Bank Division of New York Commercial Bank.

To finance the all-cash transaction of Atlantic Bank, we issued 24.5 million shares of our common stock in a secondary offering that was announced on April 11th and completed on April 18th. The offering generated net proceeds of \$400.2 million.

At June 30, 2006, the Company had total assets of \$28.7 billion, a \$2.4 billion, or 9.3%, increase from the balance recorded at December 31, 2005. In addition to the acquisition of Atlantic Bank, which had total loans of \$1.2 billion on the 28th of April, the growth of our assets reflects organic loan production, with six-month originations totaling \$2.9 billion, including \$1.0 billion in the second quarter of the year. As a result, loans outstanding rose \$2.4 billion, or 14.2%, from the year-end 2005 balance to \$19.4 billion at June 30, 2006. Multi-family mortgage loans represented 74.7% of total loans at the end of the second quarter, having grown \$1.7 billion, or 13.0%, to \$14.5 billion over the six-month period.

Just as loan production has long been a key component of our business model, so too has been our record of solid asset quality. At June 30, 2006, non-performing assets represented 0.11% of total assets and non-performing loans represented 0.16% of total loans, consistent with the measures recorded at December 31, 2005. The allowance for loan losses totaled \$85.7 million at the end of the second quarter, and represented 0.44% of total loans and 282.05% of non-performing loans.

Another notable feature of our second quarter 2006 performance was the continuing reduction of our securities portfolio. At June 30, 2006, securities totaled \$5.3 billion and represented 18.5% of total assets, down from \$5.6 billion, representing 21.4% of total assets, at December 31, 2005. In the second quarter of 2006, we sold \$1.2 billion of securities acquired in the Atlantic Bank and Long Island Financial transactions to reduce our higher-cost funding sources, prepaying \$886.1 million of wholesale borrowings and reducing our brokered deposits by \$260.6 million. At June 30, 2006, wholesale borrowings totaled \$10.3 billion, a \$540.6 million increase from the year-end 2005 balance, but a decline of \$54.3 million from the balance recorded at March 31, 2006.

Deposits totaled \$13.6 billion at June 30, 2006, and were up \$1.3 billion and \$1.5 billion from the respective balances at March 31, 2006 and December 31, 2005. The increase in deposits was largely due to the Atlantic Bank transaction, which contributed total deposits of \$1.8 billion on April 28th. Included in the latter amount were core deposits (defined as NOW and money market accounts, savings accounts, and non-interest-bearing accounts) of \$1.4 billion and certificates of deposit (CDs) of \$396.5 million. The increase in deposits was partly offset by the aforementioned reduction in higher-cost brokered deposits.

Largely reflecting the aforementioned issuance of shares, stockholders' equity rose to \$3.7 billion at June 30, 2006 from \$3.3 billion at December 31, 2005. Excluding combined goodwill and CDI of \$2.3 billion and \$2.1 billion from the respective balances, tangible stockholders' equity rose \$173.2 million to \$1.4 billion over the six-month period. The latter amount was equivalent to 5.41% of tangible assets; excluding after-tax unrealized net losses on securities, the ratio of tangible stockholders' equity to tangible assets was 5.69%. (Please see the reconciliation of stockholders' equity and tangible stockholders' equity, total assets and tangible assets, and the related measures earlier in this report.)

Table of Contents

While our balance sheet reflects the benefit of the Atlantic Bank transaction and the consistency of our business model, our income statement continues to reflect the adverse impact of the interest rate environment, which was somewhat mitigated by the six-month benefit of the Long Island Financial transaction and the two-month benefit of the acquisition of Atlantic Bank. In the three months ended June 30, 2006, the yield curve moved from flat to inverted, as short-term rates of interest continued their steady ascent and exceeded a far more modest rise in the five-year Constant Maturity Treasury rate (the five-year CMT). Largely reflecting the disparity between movements in short- and intermediate-term rates of interest, our net interest income declined \$9.7 million year-over-year to \$139.4 million, while our net interest margin declined 51 basis points to 2.22%.

The impact of the yield curve on our net interest income was somewhat offset in the current second quarter by the lower-cost core and non-interest-bearing deposits acquired in the Atlantic Bank transaction and by the post-merger repositioning of our liabilities. The acquisition of Atlantic Bank provided us with \$496.3 million of non-interest-bearing deposits, tempering the adverse impact of the rise in short-term interest rates. In addition, the transaction provided us with an opportunity to reduce our higher-cost sources of funding, as previously stated, with the proceeds from the sale of acquired securities. We also extended \$1.2 billion of wholesale borrowings to an average call date of 2.4 years during the quarter, further reducing our cost of funds.

While the post-merger prepayment of wholesale borrowings resulted in an after-tax charge of \$18.0 million, the benefit of this action is reflected in the linked-quarter increase in our net interest income and the first linked-quarter improvement in our net interest margin since the first quarter of 2004. In the second quarter of 2006, our net interest income rose \$10.7 million from the trailing-quarter level, while our net interest margin rose eight basis points.

In connection with the post-merger repositioning of our liabilities, we also terminated our interest rate swap agreements in the current second quarter, generating an after-tax charge of \$760,000. The combined after-tax post-merger repositioning charge equaled \$18.8 million and was equivalent to \$0.06 per diluted share. Reflecting this charge, our earnings amounted to \$50.6 million, or \$0.18 per diluted share, in the three months ended June 30, 2006. In the trailing and year-earlier quarters, we recorded earnings of \$66.4 million and \$86.5 million, equivalent to \$0.25 and \$0.33 per diluted share, respectively. For the six months ended June 30, 2006 and 2005, we recorded earnings of \$117.0 million and \$177.6 million, equivalent to \$0.42 and \$0.68 per diluted share.

Summary of Financial Condition at June 30, 2006**Loans**

Loans totaled \$19.4 billion at the close of the second quarter, representing 67.7% of total assets and a \$2.4 billion, or 14.2%, increase from the balance recorded at December 31, 2005. In addition to originations of \$2.9 billion, including \$1.0 billion in the second quarter, the increase in the loan portfolio reflects loans acquired with Atlantic Bank. At the date of the acquisition, Atlantic Bank had total loans of \$1.2 billion, including multi-family loans of \$440.7 million; commercial real estate loans of \$237.4 million; construction loans of \$62.1 million; one-to-four family loans of \$31.8 million; and other loans of \$436.8 million, including \$406.4 million of business loans. The growth of the loan portfolio was partially tempered by loan repayments of \$1.7 billion, including \$952.0 million in the second quarter of the year.

Multi-family Loans

Multi-family loans accounted for \$1.9 billion, or 64.6%, of year-to-date originations, and for \$508.3 million, or 48.5%, of loans produced in the second quarter of the year. Reflecting the volume of loans produced, as well as those acquired in the Atlantic Bank transaction, the portfolio of multi-family loans rose \$1.7 billion, or 13.0%, from the year-end 2005 balance to \$14.5 billion, and represented 74.7% of total loans at June 30, 2006. Excluding the loans acquired in the Atlantic Bank transaction, the multi-family loan portfolio grew at an annualized rate of 19.1% in the first six months of 2006. At the end of June, the multi-family loan portfolio had an average principal balance of \$3.6 million and an average loan-to-value ratio of 63.9%.

Table of Contents

Multi-family loans are typically made to long-term property owners who utilize the funds they borrow to make improvements to the buildings and the apartments therein. The loans in our portfolio generally feature a term of ten years, with a fixed rate of interest for the first five years of the mortgage, and an alternative rate of interest in years six through ten. The rate charged in the first five years is generally based on the five-year CMT plus a margin of 150 basis points; during years six through ten, the borrower has the option of selecting a monthly adjustable rate that is 250 basis points above the prime rate of interest, or a fixed rate that is 275 basis points above the five-year CMT at the time of repricing. The latter option also requires the payment of one percentage point of the then-outstanding loan amount. The minimum rate at repricing is equivalent to the rate in the initial five-year term.

As improvements are made to the collateral property, rent increases are permitted by the regulations, thus creating more cash flows for the owner to borrow against. As the rent roll increases, the property owner has historically opted to refinance the mortgage, even in a rising interest rate environment. This cycle has repeated itself over the course of many decades, with property values increasing, and borrowers typically refinancing before the loan reaches its sixth year. Accordingly, the expected weighted average life of the multi-family loan portfolio was 3.7 years at June 30, 2006.

Multi-family loans that refinance within the first five years are subject to an established prepayment penalty schedule. Depending on the remaining term of the loan at the time of prepayment, the penalties normally range from five percentage points to one percentage point of the original loan balance.

Our emphasis on multi-family loans is driven by several factors, including their structure, which historically has reduced our exposure to interest rate volatility, to some degree. Another factor driving our focus on multi-family loans has been the historically consistent quality of these assets: We have not had a loss of principal on a multi-family loan in this niche for more than twenty-five years. We generally consider multi-family loans to involve a modest degree of credit risk as compared to other types of credits, since the loans we make are typically collateralized by rent-regulated buildings which tend to be stable and fully occupied. Because the buildings securing the loans are generally well maintained, and because the rents are typically below market, occupancy levels remain more or less constant, even during times of economic adversity.

Commercial Real Estate Loans

Commercial real estate loans accounted for \$3.0 billion, or 15.6%, of total loans at the end of the second quarter, and were up \$151.2 million, or 5.2%, from the balance at year-end 2005. In addition to the loans acquired in the Atlantic Bank transaction, the increase reflects six-month originations of \$213.3 million, representing 7.4% of the year-to-date total, including \$118.8 million in the second quarter of the year. At June 30, 2006, the portfolio had an average principal balance of \$2.2 million and an average loan-to-value ratio of 56.9%.

The majority of our commercial real estate loans are secured by retail shopping centers anchored by national credit-rated tenants and office and mixed-use buildings that are typically located in Manhattan, Nassau, and Suffolk counties. Such loans are structured along the same lines as our multi-family credits, i.e., with a fixed rate of interest for the first five years of the loan that is generally tied to the five-year CMT plus a margin of 150 basis points. For years six through ten, the borrower has the option of selecting a monthly adjustable rate that is 250 basis points above the prime rate of interest, or a fixed rate that is 300 basis points above the five-year CMT at the time of repricing. The latter option also requires the payment of one percentage point of the then-outstanding loan amount. The minimum rate at repricing is equivalent to the rate featured in the initial five-year term.

Prepayment penalties also apply, with five percentage points generally being charged on loans that refinance in the first year, scaling down to one percentage point on loans that refinance in year five. Our commercial real estate loans tend to refinance within five years of origination, and the expected weighted average life of the portfolio was 3.3 years at June 30, 2006. We have not incurred a loss on a commercial real estate loan in more than ten years.

Table of Contents

Construction Loans

Construction loans totaled \$1.0 billion at the close of the second quarter, and were up \$154.9 million, or 18.1%, from the balance at December 31, 2005. While the Atlantic Bank transaction contributed to the increase, the growth of the portfolio was largely due to organic loan production, with six-month 2006 originations totaling \$567.8 million, including \$272.3 million in the second quarter of the year.

Our construction loans typically feature shorter terms than our multi-family and commercial real estate credits, and are generally originated for the construction of residential subdivisions and owner-occupied one-to-four family homes under contract.

Residential subdivision loans are typically originated for terms of 18 to 24 months, with a prime-based floating rate of interest. Such loans have had a strong credit history, with no losses recorded for more than a decade; they also generate fee income in the form of percentage points that are amortized over the life of the loan.

Loans originated for the construction of owner-occupied one-to-four family homes under contract, or for the acquisition and development of commercial real estate and multi-family properties, are also comparatively short-term in nature, ranging up to two years for one-to-four family home construction and up to three years for the development of commercial and multi-family properties. Such loans feature a daily floating prime-based index and have a minimum floor.

Other Loans

Reflecting the acquisition of Atlantic Bank, other loans rose \$436.7 million at the end of December to \$612.2 million at June 30, 2006. Business loans accounted for the bulk of the increase, rising \$419.3 million to \$571.9 million over the six-month period. The higher balance of other loans also reflects a \$2.7 million merger-related increase in leases, net of unearned income, to \$9.2 million, and a \$14.7 million merger-related rise in consumer loans to \$31.0 million.

One-to-Four Family Loans

Largely reflecting the loans acquired in the Atlantic Bank transaction, the balance of one-to-four family loans rose \$5.4 million from the end of December to \$259.9 million at June 30, 2006. The growth of the portfolio was partially offset by principal repayments and by our conduit policy. Since December 1, 2000, we have been originating one-to-four family loans on a pass-through basis and selling the loans to a third-party conduit, servicing-released, shortly after the loans are closed.

Asset Quality

Notwithstanding the growth of the loan portfolio since the end of December, our record of asset quality was maintained in the first six months of 2006. At the end of June, non-performing assets totaled \$31.7 million, and represented 0.11% of total assets, as compared to \$26.8 million and \$28.9 million, representing 0.10% and 0.11% of total assets, respectively, at March 31, 2006 and December 31, 2005.

Included in the June 30, 2006 amount were non-performing loans of \$30.4 million, up \$4.9 million and \$2.8 million, respectively, from the balances recorded at the earlier dates. Despite the increase, the ratio of non-performing loans to total loans was 0.16% at the end of the second quarter, as compared to 0.14% and 0.16%, respectively, at March 31, 2006 and December 31, 2005. The linked-quarter increase in non-performing loans and non-performing assets was due to the Atlantic Bank transaction, which contributed \$3.6 million to the respective balances at the second quarter-end.

Included in the balance of non-performing loans at the end of the first and second quarters is a \$10.7 million construction loan that had been 90 days past due but still accruing interest at the end of December, and that

Table of Contents

was placed on non-accrual status in the first quarter of 2006. A loan generally is classified as a non-accrual loan when it is 90 days past due and management has determined that the collectibility of the entire loan is doubtful. When a loan is placed on non-accrual status, we cease the accrual of interest owed, and previously accrued interest is reversed and charged against interest income. A loan is generally returned to accrual status when the loan is less than 90 days past due and we have reasonable assurance that the loan will be fully collectible. In connection with the reclassification of the \$10.7 million credit, we reversed \$1.2 million of previously accrued interest from interest income in the first quarter of 2006.

Properties that are acquired through foreclosure are classified as other real estate owned, and recorded at the lower of the unpaid principal balance or fair value at the date of acquisition, less the estimated cost of selling the property at that time. Other real estate owned totaled \$1.3 million at June 30, 2006, unchanged from the balances recorded at the end of March and December, and consisted of four properties. We are currently in the process of marketing the four properties acquired by foreclosure at prices that exceed their respective carrying values, and therefore do not expect to incur a loss of principal when such properties are sold.

Reflecting year-to-date charge-offs of \$153,000 and the \$6.1 million loan loss allowance acquired in the Atlantic Bank transaction, the consolidated allowance for loan losses totaled \$85.7 million at June 30, 2006, as compared to \$79.7 million at December 31, 2005. The respective amounts were equivalent to 0.44% and 0.47% of total loans and to 282.05% and 289.17% of non-performing loans. All of the loans charged off in the first six months of 2006 consisted of consumer and unsecured credits that had been acquired in two of our earlier merger transactions with savings banks.

The manner in which the allowance for loan losses is established, and the assumptions made in that process, are considered critical to our financial condition and results of operations. Such assumptions are based on judgments that are difficult, complex, and subjective, regarding various matters of inherent uncertainty. Accordingly, the policies that govern management's assessment of the allowance for loan losses are considered Critical Accounting Policies and are discussed under that heading earlier in this report.

The following table presents information regarding our consolidated allowance for loan losses and non-performing assets at June 30, 2006 and December 31, 2005:

(dollars in thousands)	At or For the Six Months Ended June 30, 2006	At or For the Year Ended December 31, 2005
Allowance for Loan Losses:		
Balance at beginning of period	\$79,705	\$78,057
Allowance acquired in merger transactions	6,104	1,669
Charge-offs	(153)	(21)
Balance at end of period	\$85,656	\$79,705
Non-performing Assets:		
Non-accrual mortgage loans	\$26,248	\$15,551
Other non-accrual loans	4,121	1,338
Total non-accrual loans	30,369	16,889
Loans 90 days or more delinquent and still accruing interest		10,674
Total non-performing loans	30,369	27,563
Other real estate owned	1,294	1,294
Total non-performing assets	\$31,663	\$28,857
Ratios:		
Non-performing loans to total loans	0.16%	0.16%
Non-performing assets to total assets	0.11	0.11

Edgar Filing: NEW YORK COMMUNITY BANCORP INC - Form 10-Q

Allowance for loan losses to non-performing loans	282.05	289.17
Allowance for loan losses to total loans	0.44	0.47

Table of Contents

Securities

Securities totaled \$5.3 billion at June 30, 2006, and represented 18.5% of total assets, as compared to \$5.6 billion, representing 21.4% of total assets, at December 31, 2005. While Atlantic Bank had total securities of \$1.1 billion at the date of the acquisition, we sold \$1.0 billion of its securities in the second quarter, together with \$200 million of securities that had been acquired with Long Island Financial on December 30, 2005.

In the six months ended June 30, 2006, securities generated total cash flows of \$1.6 billion, with sales accounting for \$1.2 billion of the total and repayments accounting for the remaining \$357.3 million.

Available-for-sale securities represented \$2.2 billion, or 41.2%, of total securities at the close of the second quarter, and were down \$195.1 million, or 8.2%, from the balance recorded at December 31, 2005. The remainder of the securities portfolio consisted of held-to-maturity securities totaling \$3.1 billion, a decline of \$134.8 million, or 4.1%, from the year-end 2005 amount.

Mortgage-related securities represented \$1.8 billion, or 81.3%, of available-for-sale securities at the close of the second quarter, and \$1.5 billion, or 47.4%, of securities held to maturity. Debt and equity (other) securities accounted for the remaining \$409.3 million of available-for-sale securities and for the remaining \$1.6 billion of held-to-maturity securities.

At June 30, 2006, the respective market values of mortgage-related securities and other securities held to maturity were \$1.3 billion and \$1.6 billion, representing 91.1% and 98.1% of the respective carrying values at that date.

The estimated weighted average life of the available-for-sale securities portfolio was 5.4 years at the close of the second quarter and 4.3 years at December 31, 2005. The estimated weighted average life of available-for-sale mortgage-related securities was 4.1 years and 3.8 years at the corresponding dates.

Reflecting the increase in market interest rates over the last two quarters, the after-tax net unrealized loss on available-for-sale securities rose to \$67.9 million at June 30, 2006 from \$43.4 million at December 31, 2005. During this time, the after-tax net unrealized loss on securities transferred to held to maturity fell \$1.8 million to \$10.7 million.

Sources of Funds

The Company has four primary sources of funds: cash flows generated through the sale and repayment of securities; cash flows generated through the repayment of loans; deposits; and wholesale borrowings. As expected, the acquisition of Atlantic Bank contributed significantly to our sources of funds in the second quarter of 2006.

The sale of securities generated cash flows of \$1.2 billion in the current second quarter and \$66.2 million in the first quarter of the year. Securities repayments generated cash flows of \$201.0 million and \$156.3 million in the corresponding quarters, bringing the total cash flows from securities to \$1.6 billion for the six-month period.

Consistent with the plans we set forth at the time we announced the Atlantic Bank transaction, we utilized the proceeds from the sale of securities we acquired to reduce our higher-cost sources of funds. In the second quarter of 2006, we prepaid \$886.1 million of wholesale borrowings with a weighted average rate of 5.93% and reduced our balance of brokered deposits by \$260.6 million.

In addition, Atlantic Bank had \$1.8 billion of deposits at the date of the acquisition, including core deposits of \$1.4 billion and CDs of \$396.5 million. Non-interest-bearing accounts represented \$496.3 million, or 27.6%, of the total deposits acquired, with NOW and money market accounts and savings accounts representing \$479.6 million and \$424.3 million, respectively. Reflecting this infusion, which was partly offset by the aforementioned decline in brokered deposits, total deposits rose \$1.5 billion from the year-end 2005 balance to \$13.6 billion at June 30, 2006.

Table of Contents

Core deposits represented \$7.4 billion, or 54.2% of total deposits at the end of the second quarter, as compared to \$6.9 billion, representing 56.7% of total deposits, at December 31, 2005. The increased balance was largely due to a \$485.3 million, or 57.4%, rise in non-interest-bearing accounts to \$1.3 billion, and to a \$228.1 million, or 9.4%, rise in savings accounts to \$2.7 billion. These increases combined to offset a \$198.0 million decline in NOW and money market accounts to \$3.4 billion, primarily reflecting a \$449.7 million reduction in brokered deposits to \$993.0 million.

CDs represented \$6.2 billion, or 45.8%, of total deposits at the close of the second quarter, and were up \$993.7 million, or 18.9%, from the balance recorded at December 31, 2005. The increase was attributable to the CDs acquired in the Atlantic Bank transaction and to a \$592.9 million increase in brokered CDs to \$697.0 million. In addition, CDs have grown in popularity over the past few quarters, in concert with the steady rise in short-term interest rates.

Wholesale borrowings totaled \$10.3 billion at June 30, 2006, up \$540.6 million from the year-end 2005 balance but down \$54.3 million from the balance at March 31, 2006. The six-month increase in wholesale borrowings was the net effect of a \$1.1 billion rise in Federal Home Loan Bank of New York (FHLB-NY) advances to \$6.5 billion, and a \$544.8 million reduction in repurchase agreements to \$3.8 billion. The linked-quarter decline was attributable to the prepayment of wholesale borrowings in connection with the Atlantic Bank transaction, as previously discussed. In keeping with our focus on reducing our higher-cost funding sources, we also extended \$1.2 billion of wholesale borrowings to an average call date of 2.4 years during the quarter. Year-to-date, a total of \$4.1 billion of wholesale borrowings have been repositioned, including \$2.5 billion that were extended to an average call date of 2.6 years and \$1.6 billion that were modified to extend the maturity.

Total borrowed funds amounted to \$11.1 billion at the close of the second quarter, and included junior subordinated debentures of \$456.9 million, senior debt of \$193.3 million, and preferred stock of subsidiaries of \$162.0 million.

Loans generated cash flows of \$1.7 billion in the first six months of the year, including \$952.0 million in the three months ended June 30, 2006.

Asset and Liability Management and the Management of Interest Rate Risk

We manage our assets and liabilities to reduce our exposure to changes in market interest rates. The asset and liability management process has three primary objectives: to evaluate the interest rate risk inherent in certain balance sheet accounts; to determine the appropriate level of risk, given our business strategy, operating environment, capital and liquidity requirements, and performance objectives; and to manage that risk in a manner consistent with the Board's approved guidelines.

Market Risk

As a financial institution, we are focused on reducing our exposure to interest rate volatility, which represents our primary market risk. Changes in market interest rates represent the greatest challenge to our financial performance, as such changes can have a significant impact on the level of income and expense recorded on a large portion of our interest-earning assets and interest-bearing liabilities, and on the market value of all interest-earning assets, other than those possessing a short term to maturity. To reduce our exposure to changing rates, the Board of Directors and management monitor interest rate sensitivity on a regular or as needed basis so that adjustments in the asset and liability mix can be made when deemed appropriate.

The actual duration of mortgage loans and mortgage-related securities can be significantly impacted by changes in prepayment levels and market interest rates. The level of prepayments may be impacted by a variety of factors, including the economy in the region where the underlying mortgages were originated; seasonal factors; demographic variables; and the assumability of the underlying mortgages. However, the largest determinants of prepayments are market interest rates and the availability of refinancing opportunities.

Table of Contents

To manage our interest rate risk, we have been pursuing the following strategies: (1) emphasizing the origination and retention of intermediate-term assets, including multi-family, commercial real estate, and construction loans; (2) originating one-to-four family loans on a pass-through basis and selling them without recourse; (3) utilizing the cash flows from securities sales and repayments to fund loan production or to reduce our higher-cost funding sources; (4) increasing the prevalence of deposits within our mix of funding sources; (5) repositioning our wholesale borrowings to reduce the interest rate and extend the call date or maturity; and (6) engaging in merger transactions with other financial institutions in order to replace our higher-cost wholesale funding sources with lower-cost core deposits, including non-interest-bearing accounts.

Interest Rate Sensitivity Analysis

The matching of assets and liabilities may be analyzed by examining the extent to which such assets and liabilities are interest rate sensitive and by monitoring a bank's interest rate sensitivity gap. An asset or liability is said to be interest rate sensitive within a specific time frame if it will mature or reprice within that period of time. The interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets maturing or repricing within a specific time frame and the amount of interest-bearing liabilities maturing or repricing within that same period of time. In a rising interest rate environment, an institution with a negative gap would generally be expected, absent the effects of other factors, to experience a greater increase in the cost of its interest-bearing liabilities than it would in the yield on its interest-earning assets, thus producing a decline in its net interest income. Conversely, in a declining rate environment, an institution with a negative gap would generally be expected to experience a lesser reduction in the yield on its interest-earning assets than it would in the cost of its interest-bearing liabilities, thus producing an increase in its net interest income.

At June 30, 2006, our one-year gap was a negative 8.03%, as compared to a negative 7.76% at March 31, 2006 and a negative 10.19% at December 31, 2005. The improvement from the year-end 2005 measure was partly attributable to our efforts to reposition our liabilities in the first six months of 2006. A total of \$2.5 billion of wholesale borrowings were extended to a later call date during this time, and another \$1.6 billion were modified to extend the maturity. In addition, the six-month improvement in our one-year gap reflects a slowdown in prepayments on mortgage loans and mortgage-related securities. These contributing factors were tempered by an increase in the balance of shorter-term CDs. At June 30, 2006, CDs maturing in one year or less represented 88.6% of total CDs, as compared to 76.4% of the total at December 31, 2005. The increase in shorter-term CDs was also accountable for the 27-basis point rise in the one-year gap from the measure recorded at March 31, 2006.

The following table sets forth the amounts of interest-earning assets and interest-bearing liabilities outstanding at June 30, 2006 which, based on certain assumptions stemming from our historical experience, are expected to reprice or mature in each of the future time periods shown. Except as stated below, the amounts of assets and liabilities shown as repricing or maturing during a particular time period were determined in accordance with the earlier of (1) the term to repricing, or (2) the contractual terms of the asset or liability. The table provides an approximation of the projected repricing of assets and liabilities at June 30, 2006 on the basis of contractual maturities, anticipated prepayments, and scheduled rate adjustments within a three-month period and subsequent selected time intervals. For loans and mortgage-related securities, prepayment rates were assumed to range up to 20% annually. Savings accounts, Super NOW accounts, and NOW accounts were assumed to decay at an annual rate of 5% for the first five years and 15% for the years thereafter. Money market accounts, with the exception of accounts with specified repricing dates, were assumed to decay at an annual rate of 20% for the first five years and 50% in the years thereafter.

Prepayment and deposit decay rates can have a significant impact on our estimated gap. While we believe our assumptions to be reasonable, there can be no assurance that assumed prepayment and decay rates will approximate actual future loan prepayments and deposit withdrawal activity.

Table of Contents**Interest Rate Sensitivity Analysis**

(dollars in thousands)	At June 30, 2006						
	Three Months Or Less	Four to Twelve Months	More Than One Year to Three Years	More Than Three Years To Five Years	More than Five Years to Ten Years	More than Ten Years	Total

Interest rate sensitivity gap per period ⁽⁴⁾	\$ (136,076)	\$(2,172,020)	\$3,030,281	\$3,765,778	\$(1,532,762)	\$(1,198,452)	\$ 1,756,749
Cumulative interest sensitivity gap	\$(136,076)	\$(2,308,096)	\$722,185	\$4,487,963	\$2,955,201	\$1,756,749	
Cumulative interest sensitivity gap as a percentage of total assets	(0.47)%	(8.03)%	2.51%	15.62%	10.29%	6.11%	
Cumulative net interest-earning assets as a percentage of net interest-bearing liabilities	96.51%	78.82%	104.44%	124.86%	113.61%	107.52%	

(1) For purposes of the gap analysis, non-performing loans and the allowance for loan losses have been excluded.

(2) Mortgage-related and other securities, including FHLB-NY stock, are shown at their respective carrying values.

(3) Expected amounts, based, in part, on historical experience.

(4) The interest rate sensitivity gap per period represents the difference between interest-earning assets and interest-bearing liabilities.

Table of Contents

Certain shortcomings are inherent in the method of analysis presented in the preceding Interest Rate Sensitivity Analysis. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. The interest rates on certain types of assets and liabilities may fluctuate in advance of the market, while interest rates on other types may lag behind changes in market interest rates. Additionally, certain assets, such as adjustable-rate loans, have features that restrict changes in interest rates both on a short-term basis and over the life of the asset. Furthermore, in the event of a change in interest rates, prepayment and early withdrawal levels would likely deviate from those assumed in calculating the table. Finally, the ability of some borrowers to repay their adjustable-rate loans may be adversely impacted by an increase in market interest rates.

Management also monitors our interest rate sensitivity through the use of a model that generates estimates of the change in our net portfolio value (NPV) over a range of interest rate scenarios. NPV is defined as the net present value of expected cash flows from assets, liabilities, and off-balance sheet contracts. The model assumes estimated loan prepayment rates, reinvestment rates, and deposit decay rates.

To monitor our overall sensitivity to changes in interest rates, we model the effect of instantaneous increases and decreases in interest rates on our assets and liabilities. At June 30, 2006, a 200-basis point increase in interest rates would have reduced the NPV approximately 12.38%, as compared to 16.60% at March 31, 2006 and 16.39% at December 31, 2005. While the NPV analysis provides an indication of our interest rate risk exposure at a particular point in time, such measurements are not intended to, and do not, provide a precise forecast of the effect of changes in market interest rates on our net interest income, and may very well differ from actual results.

In addition to the analyses of gap and NPV, we utilize an internal net interest income simulation to manage our sensitivity to interest rate risk. The simulation incorporates various market-based assumptions regarding the impact of changing interest rates on future levels of our financial assets and liabilities. The assumptions used in the net interest income simulation are inherently uncertain. Actual results may differ significantly from those presented in the table below, due to the frequency, timing, and magnitude of changes in interest rates; changes in spreads between maturity and repricing categories; and prepayments, among other factors, coupled with any actions taken to counter the effects of any such changes.

The following table reflects, based on the information and assumptions in effect at June 30, 2006, the estimated percentage change in future net interest income for the next twelve months, assuming a gradual increase or decrease in interest rates during such time:

Changes in Interest Rates (in basis points) ⁽¹⁾	Estimated Percentage Change in Future Net Interest Income
+ 200 over one year	(7.21)%
+ 100 over one year	(3.05)
- 100 over one year	1.87
- 200 over one year	4.28

(1) In general, short- and long-term rates are assumed to increase or decrease in parallel fashion across all four quarters and then remain unchanged.

Management notes that no assurances can be given that future changes in the Company's mix of assets and liabilities will not result in greater changes to the gap, NPV, or net interest income simulation.

Table of Contents

Liquidity, Off-balance Sheet Arrangements and Contractual Commitments, and Capital Position

Liquidity

We manage liquidity to ensure that our cash flows are sufficient to support our operations and to compensate for any temporary mismatches with regard to sources and uses of funds caused by erratic deposit and loan demand.

As discussed under Sources of Funds, we have several funding sources, including cash flows from securities sales and repayments; principal repayments on loans; deposits; and borrowed funds, primarily in the form of wholesale borrowings. While borrowed funds and the scheduled amortization of loans and securities are predictable funding sources, deposit flows and mortgage-related securities prepayments are subject to such external factors as market interest rates, competition, and economic conditions, and, accordingly, are less predictable.

Our principal investing activity is mortgage loan production, with a primary focus on the origination of multi-family loans. In the six months ended June 30, 2006, the net cash used in investing activities totaled \$149.3 million, largely reflecting the volume of loans originated, which was partly offset by the aforementioned cash flows from securities and loans.

Our investing activities were also supported by internal cash flows generated by our operating and financing activities. In the first six months of 2006, the net cash provided by operating activities totaled \$156.7 million; the net cash provided by financing activities totaled \$3.4 million, primarily reflecting the increase in deposits.

We monitor our liquidity on a daily basis to ensure that sufficient funds are available to meet our financial obligations, including withdrawals from depository accounts, outstanding loan commitments, contractual long-term debt payments, and operating leases. Our most liquid assets are cash and cash equivalents, which totaled \$242.6 million at June 30, 2006, as compared to \$231.8 million at December 31, 2005. Additional liquidity stems from our approved line of credit with the FHLB-NY and our portfolio of available-for-sale securities.

CDs due to mature in one year or less from June 30, 2006 totaled \$5.5 billion. Our ability to retain our deposit base and to attract new deposits depends on numerous factors, such as customer satisfaction levels, the types of deposit products we offer, and the competitiveness of our interest rates.

To enhance our capacity to attract deposits in an increasingly competitive market, we are currently in the process of upgrading our data processing systems and refining our product menu in order to expedite customer service and facilitate cross-sales of products and services. In addition, we have recently combined the Premier Banking Groups of our community and commercial bank franchises, and are also in the process of developing a performance-based incentive program for our branch personnel.

Off-balance Sheet Arrangements and Contractual Commitments

At June 30, 2006, we had outstanding mortgage loan commitments of \$858.5 million, including \$308.3 million of multi-family loans. Reflecting the acquisition of Atlantic Bank, we also had outstanding letters of credit totaling \$88.9 million at the end of the second quarter, an increase from \$12.5 million at December 31, 2005. In addition, we continue to be obligated under numerous non-cancelable operating lease and license agreements, including leases for nine of the branch offices acquired with Atlantic Bank. As the impact of these leases is not material, the amounts involved in our operating lease and license agreements at the end of the second quarter were comparable to the amounts disclosed at December 31, 2005.

Capital Position

Stockholders' equity totaled \$3.7 billion at June 30, 2006, an increase of \$372.3 million from the balance recorded at December 31, 2005. The June 30, 2006 amount was equivalent to 12.87% of total assets and a book value of \$12.62 per share, based on 293,062,701 shares; the December 31, 2005 amount was equivalent to 12.65% of total assets and a book value of \$12.43 per share, based on 267,594,393 shares.

Table of Contents

We calculate book value by subtracting the number of unallocated ESOP shares at the end of a period from the number of shares outstanding at the same date. The number of unallocated ESOP shares at June 30, 2006 and December 31, 2005 was 1,994,118 and 2,182,398, respectively. We calculate book value in this manner to be consistent with our calculations of basic and diluted earnings per share, both of which exclude unallocated ESOP shares from the number of shares outstanding in accordance with SFAS No. 128, Earnings per Share.

The increase in stockholders' equity was attributable to the Company's issuance of 24.5 million shares of common stock in a secondary offering on April 18, 2006. The offering generated net proceeds of \$400.2 million, which were utilized to finance the all-cash acquisition of Atlantic Bank on April 28, 2006.

Excluding goodwill of \$2.1 billion and CDI of \$116.5 million, we reported tangible stockholders' equity of \$1.4 billion at June 30, 2006, equivalent to 5.41% of tangible assets and a tangible book value of \$4.88 per share. At December 31, 2005, we reported tangible stockholders' equity of \$1.3 billion, equivalent to 5.19% of tangible assets and a tangible book value of \$4.70 per share. Excluding after-tax net unrealized losses on securities of \$78.6 million and \$55.9 million from the respective totals, our adjusted tangible stockholders' equity was equivalent to 5.69% and 5.41% of adjusted tangible assets at June 30, 2006 and December 31, 2005, respectively. (Please see the reconciliation of stockholders' equity and tangible stockholders' equity, total assets and tangible assets, and the related measures earlier in this report.)

In addition to the aforementioned issuance of shares, our tangible stockholders' equity was supported by six-month 2006 net income of \$117.0 million and additional cash contributions to tangible stockholders' equity of \$12.2 million. These contributing factors were partially offset by the aforementioned increase in after-tax net unrealized losses on securities. In addition, during the first six months of the year, we used \$140.2 million of our tangible stockholders' equity to pay two quarterly cash dividends of \$0.25 per share, and allocated \$2.1 million toward the repurchase of 124,681 shares. Shares are repurchased, at the discretion of management, on the open market or through privately negotiated transactions. Of the shares repurchased in the first six months of the year, 4,681 were repurchased in connection with stock-based benefit plan-related transactions. At June 30, 2006, there were 1,494,043 shares still available for repurchase under the Board of Directors' five million-share repurchase authorization on April 20, 2004.

Consistent with our historic performance, our capital levels exceeded the minimum federal requirements for a bank holding company at June 30, 2006. Our leverage capital totaled \$2.2 billion, representing 8.15% of adjusted average assets; and our Tier 1 and total risk-based capital amounted to \$2.2 billion and \$2.3 billion, representing 14.19% and 15.11%, respectively, of risk-weighted assets. At December 31, 2005, our leverage capital, Tier 1 risk-based capital, and total risk-based capital amounted to \$1.9 billion, \$1.9 billion, and \$2.1 billion, representing 8.34% of adjusted average assets, 14.26% of risk-weighted assets, and 15.23% of risk-weighted assets, respectively.

In addition, as of June 30, 2006, both the Community Bank and the Commercial Bank were categorized as well capitalized under the FDIC's regulatory framework for prompt corrective action. To be categorized as well capitalized, a bank must maintain a minimum leverage capital ratio of 5.00%, a minimum Tier 1 risk-based capital ratio of 6.00%, and a minimum total risk-based capital ratio of 10.00%.

The following regulatory capital analyses set forth the Company's and the Community Bank's leverage, Tier 1 risk-based, and total risk-based capital levels at June 30, 2006, in comparison with the minimum federal requirements.

Table of Contents**Regulatory Capital Analysis (Company)**

(dollars in thousands)	At June 30, 2006

Earnings Summary for the Three Months Ended June 30, 2006**Net Interest Income**

Net interest income is our primary source of income. Its level is a function of the average balance of our interest-earning assets, the average balance of our interest-bearing liabilities, and the spread between the yield on such assets and the cost of such liabilities. These factors are influenced by the pricing and mix of our interest-earning assets and interest-bearing liabilities which, in turn, may be impacted by such external factors as economic conditions, competition for loans and deposits, market interest rates, and the monetary policy of the Federal Open Market Committee of the Federal Reserve Board of Governors (the FOMC).

The FOMC reduces, maintains, or increases the target federal funds rate (the rate at which banks borrow funds from one another), as it deems necessary. Over the course of 2005, the FOMC raised the federal funds rate eight times in 25-basis point increments; by the end of the year, the federal funds rate had been raised to 4.25%. In the first six months of 2006, four more rate increases followed; as a result, the federal funds rate was 4.75% at March 31, 2006 and 5.25% at June 30, 2006.

While the federal funds rate drives the cost of our short-term borrowings and deposits, the yields earned on our loans and other interest-earning assets are typically driven by intermediate-term interest rates. As previously indicated, the pricing of our multi-family and commercial real estate loans is based upon the five-year CMT. The five-year CMT increased from 3.61% at December 31, 2004 to 4.35% at December 31, 2005, and to 4.82% and 5.10%, respectively, at March 31 and June 30, 2006. As a result of these movements in interest rates, the yield curve transitioned from flat to inverted over the course of the second quarter, boosting our cost of funds and limiting the growth of our asset yields.

The flat-to-inverted yield curve also contributed to a decline in refinancing activity, which reduced the volume of prepayment penalties recorded as interest income on both a linked-quarter basis and year-over-year. Prepayment penalties contributed \$717,000 to interest income in the current second quarter, as compared to \$2.0 million and \$2.1 million, respectively, in the trailing and year-earlier three-month periods.

Edgar Filing: NEW YORK COMMUNITY BANCORP INC - Form 10-Q

The adverse impact of the yield curve was, to some extent, mitigated in the second quarter of 2006 by the acquisition of Atlantic Bank. In addition to providing us with an infusion of low-cost and non-interest-bearing deposits at the end of April, the acquisition enabled us to prepay \$886.1 million of our higher-cost wholesale borrowings and to reduce our balance of brokered deposits, utilizing the cash flows from the sale of acquired securities. In addition, we extended \$1.2 billion of wholesale borrowings over the course of the quarter, bringing the total amount that was extended in the first six months of this year to \$2.5 billion. On the asset side of the balance sheet, the benefit of the transaction is reflected in the increase in average loans and average interest-earning assets, largely reflecting the addition of Atlantic Bank's \$1.2 billion loan portfolio.

Table of Contents

Reflecting the factors described above, the Company recorded second quarter 2006 net interest income of \$139.4 million, down \$9.7 million from the year-earlier level, but up \$10.7 million from the level recorded in the first quarter of 2006. The year-over-year decline was the net effect of a \$56.4 million increase in interest income to \$347.6 million and a \$66.1 million increase in interest expense to \$208.1 million. The linked-quarter increase was the net effect of a \$28.1 million, or 8.8%, rise in interest income and a \$17.4 million, or 9.1%, rise in interest expense.

Year-over-Year Comparison

The year-over-year increase in interest income was fueled by a \$3.2 billion rise in average interest-earning assets to \$25.1 billion and a 22-basis point rise in the average yield to 5.54%. These increases were largely attributable to the significant level of loans produced over the past four quarters, the full-quarter benefit of the Long Island Financial transaction, and the two-month benefit of the acquisition of Atlantic Bank.

The interest income produced by loans rose \$64.6 million year-over-year to \$272.5 million, as the average balance rose \$3.8 billion to \$18.9 billion and the average yield rose 28 basis points to 5.76%. The increase in interest income generated by loans was partly offset by a \$12.9 million reduction in the interest income generated by mortgage-related securities, to \$38.2 million, the result of a \$995.9 million decline in the average balance to \$3.6 billion and a 19-basis point decline in the average yield to 4.29%.

While the average balance of mortgage-related securities declined year-over-year, the average balance of other securities increased, largely reflecting the other securities acquired in the transactions with Long Island Financial and Atlantic Bank. Reflecting a \$396.9 million rise in the average balance to \$2.5 billion, the interest income produced by other securities rose \$4.3 million year-over-year to \$36.4 million. The increase in the average balance of other securities was somewhat tempered by a 25-basis point drop in the average yield to 5.74%.

The year-over-year increase in interest expense stemmed from a \$2.6 billion rise in the average balance of interest-bearing liabilities to \$23.4 billion and an 83-basis point rise in the average cost of funds to 3.56%. These increases were attributable to a combination of factors, including the impact of the Atlantic Bank and Long Island Financial transactions, and a reduction in the mark-to-market accretion on the CDs and borrowed funds acquired in our merger with Roslyn Bancorp, Inc. (Roslyn) on October 31, 2003.

Interest-bearing deposits accounted for \$47.3 million of the increase in interest expense over the past four quarters, as the average balance rose \$2.0 billion to \$12.4 billion and the average cost rose 124 basis points to 3.06%. The bulk of the increase was produced by CDs, which averaged \$5.9 billion in the current second quarter, as compared to \$3.9 billion in the year-earlier three months. Reflecting the higher average balance and a 159-basis point increase in the average cost of such funds to 4.07%, CDs generated second quarter 2006 interest expense of \$59.5 million, up \$35.4 million from the year-earlier amount.

NOW and money market accounts contributed \$10.8 million to the year-over-year increase in interest expense, the result of an \$87.0 million rise in the average balance to \$3.8 billion and a 110-basis point rise in the average cost to 3.25%. Both increases were primarily due to the increased use of brokered deposits to fund our loan production in anticipation of the acquisitions of Long Island Financial and Atlantic Bank. Savings accounts produced second quarter 2006 interest expense of \$4.4 million, up \$1.1 million, the net effect of a \$128.4 million decline in the average balance to \$2.6 billion and a 20-basis point increase in the average cost to 0.69%.

Borrowed funds generated second quarter 2006 interest expense of \$113.3 million, up \$18.8 million from the level recorded in the second quarter of 2005. The year-over-year increase was the result of a \$613.1 million rise in the average balance to \$11.0 billion and a 49-basis point rise in the average cost of such funds to 4.13%.

The year-over-year increase in interest expense was partly tempered by an increase in the average balance of non-interest-bearing deposits, to \$1.3 billion from \$736.4 million. The latter increase was largely attributable to the acquisitions of Long Island Financial and Atlantic Bank.

Table of Contents*Net Interest Margin and Interest Rate Spread*

The preceding factors also contributed to a year-over-year decline in our interest rate spread and net interest margin, which equaled 1.98% and 2.22%, respectively, in the current second quarter, as compared to 2.59% and 2.73% in the second quarter of 2005. However, reflecting the acquisition of Atlantic Bank and the repositioning of wholesale borrowings that followed, our net interest margin rose eight basis points on a linked-quarter basis, the first linked-quarter increase since the first quarter of 2004. During this time, our interest rate spread also rose, by one basis point.

Linked-Quarter Comparison

The linked-quarter rise in interest income was driven by a \$1.5 billion increase in the average balance of interest-earning assets and a 12-basis point increase in the average yield. The average balance of loans rose \$1.3 billion from the trailing-quarter level, while the average yield rose 14 basis points. As a result, the interest income produced by loans rose \$25.0 million in the current second quarter from the level recorded in the first quarter of the year. In addition to the two-month benefit of the Atlantic Bank transaction, the increase in interest income on loans reflects the volume of loans originated, and the modest rise in the five-year CMT over the three-month period.

The Atlantic Bank transaction also contributed to an \$803,000 increase in the interest income produced by mortgage-related securities and to a \$2.0 million increase in the interest income produced by other securities. The increase attributed to mortgage-related securities was the net effect of an \$806,000 reduction in the average balance and a ten-basis point rise in the average yield. The increase attributed to other securities was the result of a \$133.7 million rise in the average balance and a one-basis point rise in the average yield.

The linked-quarter rise in interest expense stemmed from a \$992.3 million increase in the average balance of interest-bearing liabilities and an 11-basis point increase in the average cost of funds. The growth in the average balance was primarily due to the deposits acquired in the Atlantic Bank transaction, while the higher average cost was primarily due to the steady rise in short-term interest rates.

Reflecting these factors, the interest expense produced by deposits rose \$17.2 million on a linked-quarter basis, the result of a \$1.1 billion rise in the average balance and a 29-basis point rise in the average cost. CDs accounted for \$11.0 million of the increase in interest expense, the combined effect of a \$583.1 million rise in the average balance and a 35-basis point rise in the average cost. The interest expense produced by NOW and money market accounts rose \$4.5 million, the result of a \$242.2 million increase in the average balance and a 25-basis point increase in the average cost. The latter rise in interest expense was partly mitigated by the aforementioned reduction in brokered deposits. Savings accounts contributed \$1.8 million to the linked-quarter increase in interest expense, the result of a \$193.3 million rise in the average balance and a 24-basis point rise in the average cost.

The interest expense produced by borrowed funds rose a modest \$146,000 linked-quarter, as the average balance of such funds declined \$88.2 million and the average cost dropped one basis point. The lower balance primarily reflects the aforementioned prepayment of higher-cost borrowings; the lower cost primarily reflects the prepayment and the aforementioned extension of wholesale borrowings.

The linked-quarter increase in interest expense was partly offset by a \$422.8 million rise in the average balance of non-interest-bearing deposits stemming from the acquisition of Atlantic Bank.

The following tables set forth certain information regarding our average balance sheet for the periods indicated, including the average yields on our interest-earning assets and the average costs of our interest-bearing liabilities. Average yields are calculated by dividing the interest income produced by the average balance of interest-earning assets. Average costs are calculated by dividing the interest expense produced by the average balance of interest-bearing liabilities. The average balances for the period are derived from average balances that are calculated daily. The average yields and costs include fees that are considered adjustments to such average yields and costs.

Provision for Loan Losses

The provision for loan losses is based on management's assessment of the adequacy of the loan loss allowance. This assessment, made periodically, considers several factors, including the current and historic performance of the loan portfolio and its inherent risk characteristics; the level of non-performing loans and charge-offs; current trends in regulatory supervision; local economic conditions; and the direction of real estate values.

Reflecting said assessment, no provision for loan losses was recorded in the three months ended June 30, 2006 or 2005. While non-performing loans rose \$2.8 million to \$30.4 million in the first six months of the year, the ratio of non-performing loans to total loans remained stable, amounting to 0.16% at both June 30, 2006 and December 31, 2005. The increase in non-performing loans was primarily attributable to the Atlantic Bank transaction, which also added \$6.1 million to our allowance for loan losses at the acquisition date.

Table of Contents

Charge-offs amounted to \$153,000 in the first six months of the year, including \$54,000 in the second quarter, and consisted entirely of acquired consumer and unsecured loans. The net effect of the charge-offs and the acquired loan loss allowance was a \$6.0 million increase in the allowance for loan losses to \$85.7 million, representing 0.44% of total loans and 282.05% of non-performing loans at June 30, 2006.

Please see Critical Accounting Policies earlier in this report for a detailed discussion of the factors considered by management in determining the allowance for loan losses, together with our earlier discussion of asset quality.

Non-interest Income

Non-interest income largely consists of fee income (generally comprised of retail deposit fees and loan fees, including prepayment penalties on loans that have not refinanced with the Company); and other income, which primarily includes the revenues produced through the sale of third-party investment products; the income generated by our investment in Bank-owned Life Insurance (BOLI); and the revenues generated by our subsidiary investment advisory firm, Peter B. Cannell & Co., Inc. (PBC).

In the second quarter of 2006, we recorded non-interest income of \$28.2 million, as compared to \$27.3 million in the trailing quarter and to \$30.0 million in the three months ended June 30, 2005. Included in the trailing quarter and second quarter 2005 amounts were net securities gains of \$2.8 million and \$2.9 million, respectively; no net securities gains were recorded in the second quarter of 2006.

In addition, the level of non-interest income in the trailing quarter was reduced by a pre-tax mark-to-market loss of \$6.1 million on the interest rate swap agreements that were subsequently terminated in the second quarter of the year. The termination of these agreements resulted in a pre-tax charge of \$1.1 million which was recorded in second quarter 2006 non-interest expense.

Fee income totaled \$14.4 million in the current second quarter, down \$2.1 million from the trailing-quarter level, but up \$3.3 million from the level recorded in the second quarter of 2005. The year-over-year increase was primarily due to a \$1.5 million rise in prepayment penalties to \$4.6 million; on a linked-quarter basis, prepayment penalties declined by \$3.6 million. While our second quarter 2006 fee income was otherwise boosted by the addition of depository accounts in the Atlantic Bank acquisition, the linked-quarter increase was offset by the reduction in prepayment penalties.

Other income totaled \$14.0 million in the current second quarter, down \$207,000 from the trailing-quarter level and \$2.1 million from the level recorded in the second quarter of 2005. In the latter quarter, we recorded a pre-tax net gain of \$2.8 million on the bulk sale of one-to-four family loans from our portfolio; the year-over-year reduction in other income was largely attributable to this one-time net gain. The more modest linked-quarter reduction was the net effect of an increase in BOLI income and revenues from the sale of third-party investment products and declines in various other sources of revenues.

Table of Contents

The following table summarizes the components of non-interest income for the three months ended June 30, 2006, March 31, 2006, and June 30, 2005:

(in thousands)	For the Three Months Ended		
	June 30, 2006	March 31, 2006	June 30, 2005
Fee income	\$ 14,356	\$ 16,484	\$ 11,049
Net securities gains		2,823	2,868
Loss on mark-to-market of interest rate swaps		(6,071)	
Other income:			
BOLI	5,775	5,465	6,174
PBC	3,354	3,442	2,503
Third-party investment product sales	1,749	1,671	2,114
Gain on sale of 1-4 family and other loans	158	276	2,892
Other	2,855	3,244	2,286
Total other income	13,891	14,098	15,969
Total non-interest income	\$ 28,247	\$ 27,334	\$ 29,886

Non-interest Expense

Non-interest expense consists of operating expenses, which include compensation and benefits, occupancy and equipment, general and administrative (G&A), and other expenses; and the amortization of the CDI stemming from our merger transactions.

In the second quarter of 2006, and in addition to our ongoing non-interest expenses, we recorded a pre-tax charge of \$26.5 million for the aforementioned prepayment of wholesale borrowings and a pre-tax charge of \$1.1 million for the aforementioned termination of our interest rate swap agreements. Reflecting the combined post-merger repositioning charge of \$27.6 million (which was equivalent to \$18.8 million, or \$0.06 per diluted share, on an after-tax basis), we recorded non-interest expense of \$93.2 million in the three months ended June 30, 2006, as compared to \$58.6 million and \$52.2 million in the three months ended March 31, 2006 and June 30, 2005, respectively.

Operating expenses accounted for \$61.1 million of non-interest expense in the current second quarter, as compared to \$55.3 million and \$49.3 million, respectively, in the trailing and year-earlier three months. The year-over-year increase was largely attributable to a \$7.4 million rise in compensation and benefits expense to \$32.5 million, primarily reflecting the impact of the Atlantic Bank and Long Island Financial acquisitions, as well as normal salary increases and increased medical costs. At June 30, 2006, the number of full-time equivalent employees was 2,470, as compared to 2,188 and 2,048 at March 31, 2006 and June 30, 2005, respectively.

Reflecting the establishment of our commercial bank at the end of 2005, and its expansion at the end of April, occupancy and equipment expense rose \$2.9 million year-over-year to \$14.0 million, while G&A expense rose \$2.0 million to \$13.1 million. The higher levels of compensation and benefits, occupancy and equipment, and G&A expenses were partly offset by a \$437,000 reduction in other expenses to \$1.5 million.

The linked-quarter increase in operating expenses stemmed from all four categories, with compensation and benefits expense rising \$3.0 million, occupancy and equipment expense rising \$1.9 million, and G&A and other expenses rising \$614,000 and \$308,000, respectively. The linked-quarter increases largely reflect the addition of Atlantic Bank's 17 branches and the associated increases in staff, supplies, and marketing.

CDI amortization totaled \$4.5 million in the second quarter of 2006, up \$1.2 million on a linked-quarter basis and up \$1.5 million year-over-year. The linked-quarter increase reflects the two-month impact of the CDI recorded in the Atlantic Bank transaction, which is being amortized on an accelerated basis over a period of ten years. The year-over-year increase reflects the three-month impact of the CDI recorded in connection with the Long Island Financial acquisition as well as the two-month impact of the CDI recorded in connection with the acquisition of Atlantic Bank.

Table of Contents**Income Tax Expense**

The Company recorded second quarter 2006 income tax expense of \$23.9 million, down from \$31.1 million in the trailing quarter and from \$40.3 million in the second quarter of 2005. The year-over-year decline was primarily attributable to a \$52.3 million reduction in pre-tax income to \$74.5 million; on a linked-quarter basis, the Company's pre-tax income was down \$23.0 million, primarily reflecting the impact of the aforementioned post-merger repositioning charge. The reductions in pre-tax income were partly offset by a modest rise in the effective tax rate, which was 32.05% in the current second quarter, as compared to 31.89% and 31.79% in the three months ended March 31, 2006 and June 30, 2005, respectively.

Earnings Summary for the Six Months Ended June 30, 2006**Net Interest Income**

Net interest income totaled \$268.2 million in the current six-month period, as compared to \$307.9 million in the six months ended June 30, 2005. While interest income rose \$93.5 million year-over-year to \$667.0 million, this increase was exceeded by a \$133.2 million rise in interest expense to \$398.9 million.

The disparity between our net interest income in the current and year-earlier six-month periods was largely attributable to the steady flattening of the yield curve over the past four quarters, including its movement from flat to inverted in the second quarter of this year. Although the five-year CMT averaged 4.77% in the first six months of 2006, as compared to 3.88% in the year-earlier six-month period, the increase was substantially exceeded by the steady and more significant rise in short-term interest rates. In addition, the decline in net interest income reflects a reduction in the mark-to-market adjustments on the interest-earning assets and interest-bearing liabilities acquired in the Roslyn merger on October 31, 2003.

These adverse factors were somewhat offset by the six-month benefit of the Long Island Financial transaction and the two-month benefit of the acquisition of Atlantic Bank. As a result of these transactions, we increased the concentration of lower-cost core and non-interest-bearing deposits within our mix of deposits, and reduced a portion of our higher-cost funding sources in the second quarter of the year. In addition, the transactions contributed to the growth of our interest-earning assets, which were also boosted by the significant volume of loans produced over the past twelve months.

The year-over-year rise in interest income was attributable to a \$2.9 billion increase in the average balance of interest-earning assets to \$24.4 billion and a 13-basis point increase in the average yield to 5.48%. The growth of the loan portfolio accounted for most of the increase in the average balance, while the higher yield was largely due to the rise in the five-year CMT. Average loans rose \$3.8 billion year-over-year to \$18.3 billion in the current six-month period, accompanied by a 21-basis point rise in the average yield to 5.69%. As a result, the interest income produced by loans rose \$123.8 million to \$519.9 million, offsetting a \$35.5 million reduction in the interest income produced by mortgage-related securities to \$75.7 million. Largely reflecting the post-merger sale of securities in the second quarter, the average balance of mortgage-related securities fell \$1.2 billion year-over-year to \$3.6 billion, coupled with a 43-basis point drop in the average yield to 4.24%.

At the same time, the interest income produced by other securities rose \$4.8 million to \$70.8 million, the net effect of a \$298.0 million rise in the average balance to \$2.5 billion and a 34-basis point decline in the average yield to 5.73%. The average balance of other securities was boosted by the Long Island Financial and Atlantic Bank acquisitions, while the lower yield on both mortgage-related and other securities largely reflects the run-off of higher-yielding investments over the twelve-month period.

The year-over-year rise in interest expense was attributable to a \$2.5 billion increase in the average balance of interest-bearing liabilities to \$22.9 billion and a 91-basis point increase in the average cost of funds to 3.51%. Although the average balance was partially boosted by the deposits acquired with Atlantic Bank and Long Island Financial, the increase also reflects our increased use of borrowed funds and brokered deposits in the quarters preceding these transactions. The higher cost reflects the steady rise in short-term interest rates over the past twelve months.

Table of Contents

Reflecting the deposits acquired and our use of brokered deposits, the average balance of interest-bearing deposits rose \$1.8 billion year-over-year to \$11.9 billion. While the average balance of savings accounts declined \$329.2 million to \$2.5 billion, the average balance of NOW and money market accounts rose \$321.4 million to \$3.7 billion and the average balance of CDs rose \$1.8 billion to \$5.6 billion. Reflecting the steady rise in interest rates over the past four quarters, the average cost of interest-bearing deposits rose 126 basis points to 2.92% in the current six-month period, primarily reflecting a 120-basis point rise in the average cost of NOW and money market accounts to 3.13% and a 158-basis point rise in the average cost of CDs to 3.90%. The impact of these increases was partly offset by a \$313.3 million rise in the average balance of non-interest-bearing deposits to \$1.0 billion, largely reflecting deposits acquired with Atlantic Bank. The average balance of borrowed funds grew \$696.0 million during this time to \$11.0 billion, accompanied by a 63-basis point rise in the average cost of such funds to 4.14%. Reflecting these factors, the interest expense produced by interest-bearing deposits rose \$88.3 million to \$172.4 million in the current six-month period, while the interest expense produced by borrowed funds rose \$44.9 million to \$226.5 million.

Reflecting the same combination of factors that contributed to the year-over-year decline in net interest income, our interest rate spread and net interest margin contracted 78 and 69 basis points, respectively, from the year-earlier measures to 1.97% and 2.18% in the six months ended June 30, 2006.

The following table sets forth certain information regarding our average balance sheet for the periods indicated, including the average yields on our interest-earning assets and the average costs of our interest-bearing liabilities. Average yields are calculated by dividing the interest income produced by the average balance of interest-earning assets. Average costs are calculated by dividing the interest expense produced by the average balance of interest-bearing liabilities. The average balances for the period are derived from average balances that are calculated daily. The average yields and costs include fees that are considered adjustments to such average yields and costs.

Provision for Loan Losses

As previously noted, the provision for loan losses is based on management's assessment of the loan loss allowance and the current and historic performance of the loan portfolio, among other factors. We recorded no provision for loan losses in the six months ended June 30, 2006 or 2005. For additional information, please see the second quarter 2006 discussion of the provision for loan losses, and the discussions of the allowance for loan losses and asset quality earlier in this report.

Non-interest Income

Non-interest income totaled \$55.6 million in the first six months of 2006, down \$6.3 million from the level recorded in the first six months of 2005. The year-over-year reduction was attributable to a combination of factors, including a \$6.1 million pre-tax loss on the mark-to-market of interest rate swaps in the current year's first quarter and a \$93,000 decline in the level of net securities gains to \$2.8 million in the current six-month period. In addition, the level of non-interest income in the first six months of 2005 was boosted by a gain of \$6.1 million on the sale of certain bank-owned properties in the first quarter of the year.

Table of Contents

Fee income totaled \$30.8 million and \$24.0 million, respectively, in the current and year-earlier six-month periods, while other income totaled \$28.0 million and \$28.9 million, respectively. The increase in fee income was primarily due to a \$5.2 million rise in prepayment penalties to \$12.7 million.

The decline in other income was due to a variety of factors. First, in the six months ended June 30, 2005, we recorded a \$2.8 million gain on the bulk sale of certain one-to-four family loans from our portfolio; in the first six months of 2006, the only loans that were sold were conduit loans. Accordingly, the gain on the sale of one-to-four family and other loans declined to \$434,000 in the current six-month period from \$3.0 million in the six months ended June 30, 2005. The reduction in other income also stemmed from a decline in BOLI income and the revenues produced by third-party investment product sales. These reductions were partly offset by a \$1.9 billion increase in the revenues generated by PBC, our investment advisory firm.

The following table summarizes the components of our non-interest income for the six months ended June 30, 2006 and 2005:

(in thousands)	For the Six Months Ended June 30,	
	2006	2005
Fee income	\$30,840	\$23,960
Net securities gains	2,823	2,916
Gain on sale of bank-owned properties		6,110
Loss on mark-to-market of interest rate swaps	(6,071)	
Other income:		
BOLI	11,240	11,577
PBC	6,796	4,894
Third-party investment product sales	3,420	4,390
Gain on sale of 1-4 family and other loans	434	3,036
Other	6,099	5,011
Total other income	27,989	28,908
Total non-interest income	\$55,581	\$61,894

Non-interest Expense

We recorded non-interest expense of \$151.8 million in the current six-month period, as compared to \$105.8 million in the first six months of 2005. In addition to the charges recorded in the second quarter for the prepayment of wholesale borrowings and the termination of our interest rate swap agreements, which together totaled \$27.6 million, the increase reflects the six-month impact of the Long Island Financial transaction and the two-month impact of the acquisition of Atlantic Bank.

Reflecting the addition of a commercial bank franchise with 12 branches at the end of 2005 and 29 branches at the end of April, operating expenses rose \$16.5 million from the year-earlier level to \$116.4 million in the first six months of 2006. The increase stemmed from an \$11.5 million rise in compensation and benefits expense to \$62.1 million; a \$3.5 million rise in occupancy and equipment expense to \$26.0 million; and a \$2.5 million rise in G&A expense to \$25.6 million. These increases were only partly offset by a \$1.1 million reduction in other expenses to \$2.7 million.

The amortization of CDI rose \$1.9 million during this time to \$7.8 million, largely reflecting the CDI acquired in the transactions with Long Island Financial and Atlantic Bank.

Income Tax Expense

We recorded income tax expense of \$54.9 million in the current six-month period, down \$31.5 million from the level recorded in the first six months of 2005. The reduction was the result of a \$92.0 million decline in pre-tax income to \$171.9 million and a decline in the effective tax

rate to 32.0% from 32.7%.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES

ABOUT MARKET RISK

Quantitative and qualitative disclosures about our market risk were presented on pages 71 – 75 of our 2005 Annual Report on Form 10-K, filed with the U.S. Securities and Exchange Commission (the “SEC”) on March 16, 2006. Subsequent changes in the Company’s market risk profile and interest rate sensitivity are detailed in the discussion entitled “Asset and Liability Management and the Management of Interest Rate Risk,” in this quarterly report.

ITEM 4. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company’s management, including the Company’s Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company’s disclosure controls and procedures pursuant to Rule 13a-15(b), as adopted by the SEC under the Securities Exchange Act of 1934 (the “Exchange Act”). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures were effective as of the end of the period covered by this report in ensuring that information required to be disclosed by the Company in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission’s rules and forms.

(b) Internal Control over Financial Reporting

There have not been any changes in the Company’s internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

In the normal course of the Company's business, there are various outstanding legal proceedings. In the opinion of management, based on consultation with legal counsel, the financial position of the Company will not be affected materially as a result of the outcome of such legal proceedings.

In February 1983, a burglary of the contents of safe deposit boxes occurred at a branch office of CFS Bank, now the Queens County Savings Bank division of the Community Bank. The Community Bank has a lawsuit pending, whereby the remaining eight plaintiffs are seeking recovery of approximately \$12.3 million in damages. This amount does not include any statutory prejudgment interest that could be awarded on a judgment amount, if any; such interest accumulates at a rate of 9% per annum from the date of loss. The suit also names as a defendant Wells Fargo. The Company previously settled claims by 21 plaintiffs, alleging damages of \$974,000. The Company's contribution to those settlements totaled \$360,000. The ultimate liability, if any, that might arise from the disposition of the pending claims cannot presently be determined.

In 2004, the Company and various executive officers and directors were named in certain putative securities law class action lawsuits brought in the United States District Court, Eastern District of New York, and one class action lawsuit brought in the Supreme Court of the State of New York, Kings County, that was later removed by the defendants to federal court. On August 9, 2005, the court consolidated the actions and appointed a Lead Plaintiff. On October 6, 2005, the Lead Plaintiff filed a consolidated amended complaint on behalf of a putative class of persons and entities, other than defendants, who purchased or otherwise acquired the Company's securities from June 27, 2003 to July 1, 2004, alleging claims under Sections 11 and 12 of the Securities Act of 1933, Sections 10 and 14 of the Securities Exchange Act of 1934, and Rule 10b-5, promulgated pursuant to Section 10 of the Securities Exchange Act of 1934. Plaintiffs allege, among other things, that the Registration Statement issued in connection with the Company's merger with Roslyn Bancorp, Inc. and other documents and statements made by executive management were inaccurate and misleading, contained untrue statements of material facts, omitted other facts necessary to make the statements made not misleading, and concealed and failed to adequately disclose material facts, pertaining to, among other things, the Company's business plans and its exposure to interest rate risk. The defendants moved to dismiss the action on December 19, 2005. That motion remains pending, during which period discovery is stayed pursuant to the Private Securities Litigation Reform Act of 1995.

Based upon the same facts, on November 9, 2004, an additional suit was filed in the Eastern District of New York alleging that the Company and various of its officers violated the Employee Retirement Income Security Act of 1974, as amended (ERISA). The suit was brought on behalf of a putative class of participants in the New York Community Bank Employee Savings Plan. The defendants moved to dismiss the ERISA action. On February 6, 2006, the Court granted in part and denied in part the Company's motion to dismiss. The Court ruled that one of the two putative class representatives did not have standing under ERISA, but found that there were issues of fact concerning the standing of the other putative class representative. The Court ordered that the parties engage in limited discovery concerning the Plaintiff's standing under ERISA, and the parties made supplemental submissions to the court on the standing issue that are currently pending with the court.

On May 6, 2005, sixteen of the Company's current or former officers and directors were named as defendants in a putative derivative action filed by an alleged shareholder on behalf of the Company in the United States District Court for the Eastern District of New York. The same shareholder previously had sent the Company's Board of Directors a letter reciting many of the allegations made in the putative class actions, and demanding that the Board take a variety of actions allegedly required to address those allegations. The Board appointed a committee of independent directors to evaluate what response, if any, to make to this letter. Nevertheless, the putative derivative plaintiff filed this action repeating the same allegations, and purporting to seek on behalf of the Company money damages, restitution, and equitable relief against the defendants for various alleged breaches of duty and alleged corporate waste. On August 15, 2005, the Plaintiff filed an amended complaint, repeating the same substantive allegations of fact. On September 30, 2005, the defendants filed motions to dismiss this action, which motions remain pending.

Table of Contents

Management believes that the Company has meritorious defenses against each of the preceding actions and will vigorously defend both the substantive and procedural aspects of the litigations.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors, in the Company's Annual Report on Form 10-K for the year ended December 31, 2005, which could materially affect the Company's business, financial condition, or future results. The risks described in the Company's Annual Report on Form 10-K are not the only risks that the Company faces. Additional risks and uncertainties not currently known to the Company, or that the Company currently deems to be immaterial, also may materially adversely affect the Company's business, financial condition, or results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Share Repurchase Program

At June 30, 2006, 1,494,043 shares remained available for repurchase under the Board of Directors' April 20, 2004 authorization. Under said authorization, shares may be repurchased on the open market or in privately negotiated transactions until completion or upon termination of the repurchase authorization by the Board. The Company did not repurchase any shares of its common stock during the three months ended June 30, 2006.

Use of Proceeds from Common Stock Offering

On April 18, 2006, the Company completed an offering of 24.5 million shares of its common stock, generating aggregate proceeds of \$400.6 million. The common stock was issued pursuant to a registration statement on Form S-3 (Registration No. 333-129338) that was initially filed with the Securities and Exchange Commission on October 31, 2005 and declared effective on December 21, 2005.

The underwriter for the offering was Bear, Stearns & Co. Inc., which purchased all of the shares. Total costs for the common stock offering were approximately \$400,000. The common stock offering generated net proceeds to the Company of \$400.2 million, which were used to fund the acquisition of Atlantic Bank.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

- (a) The Company held its Annual Meeting of Shareholders on June 7, 2006. Proxies were solicited with respect to such meeting under Regulation 14A of the Securities Exchange Act of 1934, as amended, pursuant to proxy materials dated May 12, 2006. Of the 270,409,954 shares eligible to vote at the annual meeting, 241,682,189 were represented in person or by proxy.

Table of Contents

- (b) There was no solicitation in opposition to the Board's nominees for director, and all of such nominees were elected to three-year terms of office, as follows:

	No. of Votes For	No. of Votes Withheld	Broker Non-Votes
Maureen E. Clancy	230,535,050	11,147,141	-0-
Robert S. Farrell	230,717,392	10,964,798	-0-
Joseph R. Ficalora	231,993,576	9,688,614	-0-
Michael F. Manzulli	232,277,036	9,405,155	-0-
James J. O. Donovan	232,191,339	9,511,343	-0-

- (c) Three additional proposals were submitted for a vote, with the following results:

	No. of Votes For	No. of Votes Against	No. of Votes Abstaining	Broker Non-Votes
Ratification of the appointment of KPMG LLP as independent registered public accounting firm for the fiscal year ending December 31, 2006	234,285,587	6,571,654	824,949	Not Applicable
Approval of the New York Community Bancorp, Inc. Management Incentive Compensation Plan	219,463,917	19,733,092	2,485,181	Not Applicable
Approval of the New York Community Bancorp, Inc. 2006 Stock Incentive Plan	133,351,193	19,613,979	2,259,845	Not Applicable

Item 5. Other Information

Not applicable.
