**Table of Contents****THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

- The accompanying condensed consolidated interim financial statements have been prepared in accordance with accounting principles and SEC rules applicable to interim financial statements. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, these unaudited condensed consolidated financial statements contain all adjustments (consisting only of normal recurring adjustments and accruals) necessary for a fair presentation of the Company's financial position as of June 30, 2006 and the results of its operations and cash flows for the three and six month periods ended June 30, 2006 and 2005. The accounting policies followed by the Company are set forth in Note A to the Company's consolidated financial statements contained in its Annual Report on Form 10-K for its fiscal year ended December 31, 2005.
- The Company's business is seasonal and its results of operations for the three and six month periods ended June 30, 2006 and 2005 are not necessarily indicative of the results to be expected in any other interim period during, or for the full year ending, December 31, 2006. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Seasonality and Inflation in Item 2 of Part I of this Report.
- Basic earnings per share for each period are computed using the weighted average number of common shares outstanding during such period. Diluted earnings per share are computed using the weighted average number of common shares and potentially dilutive securities outstanding during the period. Potentially dilutive securities consist of the incremental common shares issuable upon the exercise of stock options (using the treasury stock method). Potentially dilutive securities are excluded from the computation if their effect is anti-dilutive. For the three and six months ended June 30, 2006 none of the shares of common stock issuable on exercise of stock options were excluded from the computation of diluted earnings per shares; whereas for the three and six months ended June 30, 2005 a total of 93,000 and 54,000 common shares, respectively, that were issuable on exercise of stock options were excluded from the computation of diluted earnings per share because their exercise prices were greater than the average market price of the Company's common stock during these periods and, hence, their inclusion in the computation of diluted earnings per share would have been anti-dilutive.

Denominator for diluted net income per share	4,585	4,798	4,599	4,842

- The Company leases its corporate offices, warehouse facilities and data processing equipment. Those leases are classified as operating leases as they do not meet the capitalization criteria of SFAS No. 13. The office and warehouse leases expire over the next ten years. Minimum future rental commitments under non-cancelable operating leases are as follows:

	2006	2005	2006	2005
	(In thousands)			
Net earnings	\$ 3,009	\$ 2,151	\$ 4,118	\$ 3,129
Change in accumulated foreign currency translation adjustment:	290	(70)	265	(118)
Comprehensive earnings	\$ 3,299	\$ 2,081	\$ 4,383	\$ 3,011

7. Stock Based Compensation. On January 1, 2006, the Company adopted the provisions of Financial Accounting Standards Board Statement 123R, Share-Based Payment ( SFAS 123R ), which requires the recognition of the fair value of stock-based compensation awarded to employees, as compensation expense for financial statement purposes, such as the employee stock options granted by the Company under its Stock Incentive Plans. As permitted by SFAS 123R, the Company has elected to implement SFAS 123R using the modified prospective method. Under this method, stock-based compensation cost recognized in our financial statements for periods from and after January 1, 2006, includes: (a) compensation cost for all share-based awards granted and not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of SFAS 123 for pro forma disclosures, and (b) compensation cost for all share-based awards granted subsequent to January 1, 2006 based on the grant-date fair value estimated in accordance with the provisions of SFAS 123R. The Company's stock option compensation expense was \$26,000 and \$44,000, respectively, for the three and six month periods ended June 30, 2006. Operating results for periods ended prior to January 1, 2006, including the three month period ended June 30, 2005, have not been restated to give effect to SFAS 123R.

Prior to January 1, 2006, the Company accounted for its stock-based compensation using the intrinsic value method prescribed by Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations. Therefore, no stock-based compensation cost was reflected in net income, as all options granted under those plans had an exercise price equal to the market value of our underlying common stock on their respective dates of grant.

**Table of Contents****THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS (Continued)**

The application of SFAS 123R had the following effect on the reported amounts of our net income and diluted income per share for the three and six month periods ended June 30, 2006 as compared to amounts that would have been reported using the intrinsic value method under previous accounting:

	Using Previous Accounting	SFAS 123R Adjustment	As Reported
<b>Three Months ended June 30, 2006:</b>			
Operating income	\$ 5,396	\$ 26	\$ 5,370
Earnings before income tax	4,862	26	4,836
Net earnings	3,035	26	3,009
Basic earnings per share:	\$ 0.69	\$ 0.00	\$ 0.68
Diluted earnings per share:	\$ 0.66	\$ 0.00	\$ 0.66
<b>Six Months ended June 30, 2006:</b>			
Operating income	\$ 7,671	\$ 44	\$ 7,627
Earnings before income tax	6,698	44	6,654
Net earnings	4,162	44	4,118
Basic earnings per share:	\$ 0.94	\$ 0.00	\$ 0.93
Diluted earnings per share:	\$ 0.90	\$ 0.00	\$ 0.90

Stock-based compensation for the three and six month periods ended June 30, 2005 was determined using the intrinsic value method. The following table provides supplemental information for those periods that sets forth, on a pro forma basis, what our net earnings and earnings per share would have been had stock-based compensation been computed in accordance with SFAS 123R:

	Three Months Ended June 30, 2005	Six Months Ended June 30, 2005
Net income, as reported	\$ 2,151	\$ 3,129
Value of stock-based compensation expense, determined under fair based method, net of related tax effects	(15)	(30)
Pro forma net earning	\$ 2,136	\$ 3,099
Earnings per share:		
Basic - as reported	\$ 0.46	\$ 0.67
Basic - pro forma	\$ 0.46	\$ 0.67
Diluted as reported	\$ 0.45	\$ 0.65
Diluted pro forma	\$ 0.45	\$ 0.64

For purposes of SFAS 123R, the fair value of each option was estimated as of the date of grant using a binomial model. This model incorporates certain assumptions including a risk-free market interest rate, expected dividend yield of the underlying common stock, expected option life and expected volatility in the market value of the underlying common stock. We used the following assumptions in estimating the fair value of the options issued in the periods indicated below:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
<b>Stock Option Plans:</b>				
Expected volatility	52%	47%	52%	52%
Risk free interest rates	4.6%	3.8%	4.6%	3.8%

Edgar Filing: COAST DISTRIBUTION SYSTEM INC - Form 10-Q

Expected dividend yields	2.7%	2.1%	2.7%	2.1%
Expected lives	4 years	4 years	4 years	4 years
Stock Purchase Plan:				
Expected volatility	47%	47%	47%	47%
Risk free interest rates	4.8%	4.2%	4.8%	4.2%
Expected dividend yields	2.7%	2.1%	2.7%	2.1%
Expected lives	1 year	1 year	1 year	1 year

**Table of Contents****THE COAST DISTRIBUTION SYSTEM, INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS (Continued)**

Expected volatilities are based on the historical volatility of the Company's common stock. The risk free interest rate is based upon market yields for United States Treasury debt securities. The expected dividend yield is based on the Company's dividend policy in effect during the six months ended June 30, 2006 and the fair market value of the Company's shares at December 31, 2005. Expected lives are based on several factors including the average holding period of outstanding options, their remaining terms and the cycle of our long range business plan.

The following table summarizes stock option activity during the six month period ended June 30, 2006:

			<b>Weighted</b>
			<b>Average</b>
			<b>Remaining</b>
			<b>Contractual</b>
	<b>Shares</b>	<b>Prices</b>	<b>Term</b>
Outstanding at December 31, 2005	453,066	\$ 3.92	
Granted	74,000	7.25	
Exercised	(77,833)	3.41	
Forfeited			
Outstanding at June 30, 2006	449,233	\$ 4.55	4.5 years
Exercisable at June 30, 2006	253,233	\$ 3.22	2.8 years

The weighted-average grant-date values of options granted during the six month periods ended June 30, 2006 and 2005 were \$7.25 and \$7.29, respectively.

A summary of the status of the Company's nonvested options as of June 30, 2006, and of the changes during the six month period ended June 30, 2006, is presented below:

			<b>Weighted</b>
			<b>Average</b>
			<b>Grant-Date</b>
	<b>Shares</b>	<b>Fair Value</b>	
Nonvested at December 31, 2005	122,000	\$ 5.68	
Granted	74,000	7.25	
Vested			
Forfeited			
Nonvested at June 30, 2006	196,000	\$ 6.27	

As of June 30, 2006, there was \$252,346 of total unrecognized compensation cost related to nonvested options granted under both of the Company's stock incentive plans. That cost is expected to be recognized over a weighted average period of 2.4 years.

8. Recent Accounting Pronouncements.

In May 2005, the Financial Accounting Standards Board ( FASB ) issued Statement of Financial Accounting Standards ( SFAS ) No. 154, *Accounting Changes and Error Corrections*. SFAS No 154 replaces APB Opinion No. 20, *Accounting Changes* and FASB Statement No. 3, *Reporting Accounting Changes in Interim Financial Statements*, which required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. SFAS No. 154 will require retrospective application to prior periods financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. This statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 and, therefore, in the case of the Company, SFAS No. 154 became effective as of January 1, 2006. We believe that adoption of SFAS No. 154 will not have a material effect on our financial position or results of operation.

In March 2006, the FASB issued SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments* (an amendment of FASB Statements Nos. 133 and 140) and SFAS No. 156, *Accounting for Servicing of Financial Assets* (an amendment of FASB Statement No. 140). We do not expect the adoption of SFAS No. 155 and SFAS No. 156 to have a material impact on our financial position or results of operation.

In June 2006, the Financial Accounting Standards Board ( FASB ) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of SFAS No. 109. The Interpretation clarifies the accounting for uncertainties in income statements in accordance with SFAS No. 109. The Interpretation prescribes a recognition threshold and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation is effective for fiscal years beginning after December 15, 2006. We believe that the adoption of FIN 48 will not have a material impact on our financial position or results of operations.

**Table of Contents****ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Management Overview***Our Business*

We believe that we are one of the largest wholesale distributors of replacement parts, accessories and supplies for recreational vehicles (RVs), and boats in North America. We supply more than 14,000 products and serve more than 12,000 customers throughout the United States and Canada, from 13 regional distribution centers in the United States and 4 regional distribution centers in Canada. Our sales are made primarily to retail parts and supplies stores, service and repair establishments and new and used RV and boat dealers (After-Market Customers). Our sales are affected primarily by (i) usage of RVs and boats by the consumers to whom After-Market Customers sell our products, because such usage affects the consumers' needs for and purchases of replacement parts, repair services and supplies, and (ii) sales of new RVs and boats, because consumers often accessorize their RVs and boats at the time of purchase.

*Factors Generally Affecting Sales of RV and Boating Products*

The usage and the purchase, by consumers, of RVs and boats depend, in large measure, upon the extent of discretionary income available to consumers and their confidence about economic conditions. As a result, recessionary conditions and increases in interest rates often lead to declines in the purchase and, to a lesser extent, in the usage, of RVs and boats. Additionally, increases in the prices and shortages in the supply of gasoline can lead to declines in the usage and purchases of RVs and boats, because these conditions increase the consumers' costs and the difficulties of using their RVs and boats. Weather conditions also can affect our operating results, because unusually severe or extended winter weather conditions can reduce the usage of RV and boats for periods extending beyond the ordinary winter months or to regions that ordinarily encounter milder winter weather conditions and can cause period-to-period fluctuations in our sales and financial performance. Moreover, we have found, at least since September 11, 2001, that the usage of RVs also can be affected by geopolitical conditions. As a result, our sales and operating results can be, and in the past have been, affected by recessionary economic conditions, increases in interest rates, shortages in the supply and increases in the prices of gasoline and unusually adverse weather conditions and, in some cases, geopolitical events as well.

*Overview of Operating Results Three and Six Months Ended June 30, 2006 vs. Three and Six Months Ended June 30, 2005*

	Three Months Ended June 30, 2006 vs. 2005			Six Months Ended June 30, 2006 vs. 2005

Earnings before income taxes	4,836	3,601	34.3%	6,654	5,193	28.1%
Net earnings	\$ 3,009	\$ 2,151	39.9%	\$ 4,118	\$ 3,129	31.6%
Net earnings per diluted share	\$ 0.66	\$ 0.45	46.7%	\$ 0.90	\$ 0.65	38.5%

As indicated above, net sales and gross profits increased by 9.7% and 20.7%, respectively, in the three months ended June 30, 2006, as compared to the same three months of 2005, and more than offset an increase of 12% in general, selling and administrative expenses. As a result, operating income, earnings before income taxes and net earnings increased by 33.7%, 34.3% and 39.9%, respectively, while earnings per diluted share increased by 46.7% in the three months ended June 30, 2006, as compared to the corresponding three months of 2005.

In the six months ended June 30, 2006, net sales and gross profits increased by 6.6% and 15.1%, respectively, as compared to the same six months of 2005 and more than offset an increase of 9.5% in selling,

## **Table of Contents**

general, and administrative expenses. As a result, operating income, earnings before income taxes and net earnings increased by 28.2%, 28.1% and 31.6%, respectively, while earnings per diluted share increased by 38.5%, in the six months ended June 30, 2006, as compared to the same six months of 2005.

The increases in net sales and gross profits in both the three and six month periods ended June 30, 2006 were primarily attributable to sales of a new line of portable and standby generators, which we introduced in to our markets in the fourth quarter of 2005. Sales of those generators more than offset the effects on our net sales of an industry-wide slowdown in purchases and in the usage of RVs and boats that we believe was primarily attributable to increases in gasoline prices and interest rates during the first six months of 2006.

## **Accounting Policies and Estimates**

### *General*

In accordance with accounting principles generally accepted in the United States of America ( GAAP ), we record most of our assets at the lower of cost or fair value. In the case of some of our assets, principally accounts receivable, inventories and deferred income taxes, we make adjustments to their cost or fair values to arrive at what we expect to be able to collect on outstanding accounts receivables, the amounts for which we expect to be able to sell our inventories and the amount of available tax deductions that we will be able to use to reduce our future income tax liability. Those adjustments are made on the basis of a number of different factors, including judgments or assumptions we make regarding economic and market conditions and trends and their impact on our financial performance, and those judgments and assumptions are, in turn, based on current information available to us. If those conditions or trends were to change in ways that we did not expect, then, based on our assessment of how those changes will affect the prospects for realizing the values at which we have recorded these assets, we may be required, pursuant to GAAP, to further adjust the carrying values at which we record these assets for financial reporting purposes. Any resulting downward adjustments are commonly referred to as write-downs of the asset values affected by the changed conditions.

It is our practice to establish reserves or allowances against which we are able to charge any downward adjustments or write-downs to those assets. Examples include an allowance established for uncollectible accounts receivable (sometimes referred to as bad debt reserves ) and an allowance for inventory obsolescence. The amounts at which those allowances are established and maintained are based on our historical experience and also on our assumptions and judgments about economic or market conditions or trends or any other factors that could affect the values at which we had recorded such assets. Those allowances are periodically increased to replenish the allowances following write-downs in the carrying value of those assets or to take account of increased risks due to changes in economic or market conditions or trends. Increases in the allowances are effectuated by charges to income or increases in expense in our statements of income in the periods when those allowances are increased. As a result, our judgments or assumptions about market or economic conditions or trends and about their effects on our financial performance can and will affect not only the amounts at which we record these assets on our balance sheet, but also our results of operations.

The decisions as to the timing of (i) adjustments or write-downs of this nature, and (ii) the increases we make to these allowances, also require subjective evaluations or assessments about the effects and duration of changes in economic or market conditions or trends. For example, it is difficult to predict whether events or changes in economic or market conditions, such as increasing gasoline prices or interest rates or economic slowdowns, will be of short or long-term duration, and it is not uncommon for it to take some time after the onset of such changes for their full effects on our business to be recognized. Therefore, management makes such estimates based upon the information available at that time and reevaluates and adjusts these allowances for potential write-downs on a quarterly basis.

Under GAAP, most businesses also must make estimates or judgments regarding the periods during which sales are recorded and also the amounts at which they are recorded. Those estimates and judgments will depend on such factors as the steps or actions that a business must take to complete a sale of products or to perform services for a customer and the circumstances under which a customer would be entitled to return the products or reject or adjust the payment for services rendered to it. Additionally, in the case of a business that grants its customers contractual rights to return products sold to them, GAAP requires that a reserve or allowance be established for product returns

## **Table of Contents**

by means of a reduction in the amount at which its sales are recorded, based primarily on the nature, extensiveness and duration of those rights and its historical return experience.

In making our estimates and assumptions we follow GAAP and accounting practices applicable to our business that we believe will enable us to make fair and consistent estimates of the carrying values of those assets and to establish adequate reserves or allowances for downward adjustments in those values that we may have to make in future periods.

### *Critical Accounting Policies*

Set forth below is a summary of the accounting policies that we believe are material to an understanding of our financial condition and the results of operations that are discussed below.

*Revenue Recognition and the Allowance for Product Returns.* We recognize revenue from the sale of a product upon its shipment to the customer. We provide our customers with limited rights to return products that we sell to them. We establish an allowance for potential returns which reduces the amounts of our reported sales. We estimate the allowance based on historical experience with returns of like products and current economic and market conditions and trends, which can affect the level at which customers submit product returns.

*Accounts Receivable and the Allowance for Doubtful Accounts.* In the normal course of business we extend 30 day payment terms to our customers and, due to the seasonality of our business, during late fall and winter we grant payment terms of longer duration to those of our customers that have good credit records. We regularly review our customers' accounts and estimate the amount of, and establish an allowance for, uncollectible accounts receivables in each reporting period. The amount of the allowance is based on several factors, including the age of unpaid amounts, a review of significant past due accounts, and current economic and market trends that can affect the ability of our customers to keep their accounts current. Estimates of uncollectible amounts are reviewed periodically to determine if the allowance should be increased, and any increases are recorded in the accounting period in which the events or circumstances that require such increases become known. For example, if the financial condition of customers or economic or market conditions were to deteriorate, adversely affecting their ability to make payments to us on a timely basis, increases in the allowance may be required. Since the allowance is increased or replenished by recording a charge which is included in, and has the effect of increasing, selling, general and administrative expenses, an increase in the allowance will reduce income in the period when the increase is recorded.

*Reserve for Excess and Obsolete Inventory.* Inventories are valued at the lower of cost (first-in, first-out) or net realizable value and that value is reduced by an allowance for excess and slowing-moving or obsolete inventories. The amount of the allowance is determined on the basis of historical experience with different product lines, estimates or assumptions concerning future economic and market conditions and estimates of future sales. If there is an economic downturn or a decline in sales, causing inventories of some product lines to accumulate, it may become necessary to increase the allowance. Other factors that can require increases in the allowance or inventory write downs are reductions in pricing or introduction of new or competitive products by manufacturers; however, due to the relative maturity of the markets in which the company operates, usually these are not significant factors. Increases in this allowance also will cause a decline in operating results as such increases are effectuated by charges against income.

*Allowance for Deferred Income Taxes.* We record as a deferred tax asset on our balance sheet the tax loss and tax credit carryforwards that can be applied in future periods to offset or reduce our future income tax liability. At June 30, 2006, the aggregate amount of that deferred tax asset was approximately \$2.1 million. Under applicable federal and state income tax laws and regulations, these tax loss and tax credit carryforwards will expire if not used within specified periods of time. Accordingly, the ability to use this deferred tax asset depends on the taxable income that we are able to generate during those time periods. We have made a judgment, based on historical experience and current and anticipated market and economic conditions and trends, that it is more likely than not that we will be able to generate taxable income in future years sufficient to fully use the deferred tax asset that is recorded in our financial statements. However, if due to future events or circumstances, such as an economic downturn, that might adversely affect our operating results, we subsequently come to a different conclusion regarding our ability to fully utilize this asset, we would create a valuation allowance in order to reduce the amount at which we record the deferred tax asset. The

**Table of Contents**

creation of such an allowance would be effectuated by an increase in the provision (or a reduction in the credit) for income taxes in our statement of income, which would have the effect of reducing our income in the fiscal period in which such provision is recorded.

*Long-lived Assts and Goodwill.* Long-lived assets, such as property and equipment and goodwill and certain types of intangible assets, are reviewed for possible impairment at least annually or if and when events or changes in circumstances indicate that the carrying value of those assets may not be recoverable in full, based on standards established by SFAS No. 142, by comparing the fair value of the long-lived asset to its carrying amount.

*Foreign Currency Translation.* The financial position and results of operations of our foreign subsidiaries are measured using local currency as the functional currency. Assets and liabilities of each foreign subsidiary are translated into U.S. dollars at the rate of exchange in effect at then end of each reporting period. Revenues and expenses are translated into U.S. dollars at the average exchange rate for the reporting period. Foreign currency translation gains and losses not impacting cash flows are credited to or charged against other comprehensive earnings. Foreign currency translation gains and losses arising from cash transactions are credited to or charged against current earnings.

**Results of Operations***Net Sales*

The following table sets forth our net sales, in thousands of dollars, in the three and six months ended June 30, 2006 and in the corresponding periods of 2005.

Three Months Ended June 30,			Six Months Ended June 30,		
Amounts		% Change	Amounts		% Change
2006	2005	2006 vs. 2005	2006	2005	2005 vs. 2004
(Unaudited)					
\$56,777	\$ 51,737	9.7%	\$ 108,313	\$ 101,614	6.6%

The increases in net sales during the three and six months ended June 30, 2006 were due primarily to sales of a new line of portable and standby generators, which we introduced in to our markets in the fourth quarter of 2005. Accordingly, there were no sales of such generators during the same three and six month periods of 2005. Sales of those generators more than offset the effects on our net sales of an industry-wide slowdown in purchases and in the usage of RVs and boats that we believe was primarily attributable to increases in gasoline prices and interest rates during the first six months of 2006.

*Gross Margin*

Set forth below is unaudited information regarding our gross profit, in thousands of dollars, and our gross margin in the three and six months ended June 30, 2006 as compared to the same respective periods of 2005.

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2006	2005	2006	2005
Gross profit	\$ 12,114	\$ 10,038	\$ 22,722	\$ 19,737
Gross Margin	21.3%	19.4%	21.0%	19.4%

Gross profit is calculated by subtracting the cost of products sold from net sales. Cost of products sold consists primarily of the amounts paid to manufacturers and suppliers for the products that we purchase for resale, and warehouse and distribution costs, including freight charges. Gross margin is gross profits stated as a percentage of net sales.

**Table of Contents**

The increases in our gross margin in the three and six month periods ended June 30, 2006, as compared to the same periods in 2005, were attributable primarily to our sales of portable and standby generators, on which we realize higher margins than on most of the other products that we sell. The increases in gross profits attributable to generator sales more than offset (i) increases in warehouse expenses, such as rent, resulting from the move of our Visalia warehouse to a larger facility, and (ii) an increase in freight and shipping costs, in both the three and six month periods ended June 30, 2006.

*Selling, General and Administrative Expenses*

Set forth below is unaudited information regarding selling, general and administrative expenses, expressed in thousands of dollars and as a percentage of net sales, in the three and six months ended June 30, 2006, as compared to the corresponding periods of 2005.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Selling, general & administrative expenses	\$ 6,744	\$ 6,022	\$ 15,095	\$ 13,788
As a percentage of net sales	11.9%	11.6%	13.9%	13.6%

Selling, general and administrative ( SG&A ) expenses increased by \$722,000 or 12.0% in the three months ended June 30, 2006 and by \$1,307,000, or 9.5%, in the six months ended June 30, 2006, as compared to the corresponding periods of 2005. These increases were primarily attributable to increases in labor costs, both selling and administrative. The increase in labor costs was due to (i) increased sales and administrative personnel employed to promote, manage and test our new line of portable and standby generators, and (ii) the strengthening of the Canadian dollar in the first six months of 2006 as compared to the same period last year.

*Other Expense*

Set forth below is unaudited information regarding other expense, expressed in thousands of dollars and as a percentage of net sales, in the three and six months ended June 30, 2006, as compared to the corresponding periods of 2005.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Other Expense				
Interest expense	\$ 540	\$ 420	\$ 921	\$ 755
Other	(6)	(5)	52	1
Total	\$ 534	\$ 415	\$ 973	\$ 756
As a percentage of net sales	0.9%	0.8%	0.9%	0.7%

The increases in other expense in the three and six months ended June 30, 2006, as compared to the same periods of 2005, were primarily the result of increases, during the first six months of this year, in the rate of interest charged on borrowings under on our bank line of credit, because that interest rate is tied to and adjusts with changes in the prime rate of interest that has been increasing as a result of Federal Reserve Board actions.

**Table of Contents***Income Taxes*

Set forth below is unaudited information regarding the provision for income taxes, expressed in thousands of dollars and as a percentage of net sales, in the three and six months ended June 30, 2006, as compared to the corresponding periods of 2005.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Income tax provision	\$ 1,827	\$ 1,450	\$ 2,536	\$ 2,064
Effective tax rate	37.8%	40.3%	38.1%	39.7%

Our effective tax rate is affected by the amount of our expenses that are not deductible for income tax purposes and by varying tax rates on income generated by our foreign subsidiaries. Our effective tax rate declined to 37.8% and 38.1% of pre-tax earnings in the three and six months ended June 30, 2006, respectively, as compared to 40.3% and 39.7% of pre-tax earnings for the comparable periods in 2005. This decline was due in large part to the increase in pre-tax earnings at our Canadian subsidiary, the effective tax rate of which is lower than that which is applicable to the taxable income we generate in the United States.

**Financial Condition, Liquidity and Capital Resources**

We finance our working capital requirements for our operations primarily with borrowings under a long-term revolving bank credit facility and internally generated funds. Under the terms of that revolving credit facility, which expires in May 2009, we may borrow up to the lesser of (i) \$50,000,000 during the period from March through July, and from \$40,000,000 during the period from August through February, of each year, or (ii) an amount equal to 80% of eligible accounts receivable and between 50% to 55% of eligible inventory. Interest on the revolving credit facility is payable at the bank's prime rate or, at the Company's option but subject to certain limitations, at the bank's LIBOR rate, plus 1.5 percent.

At July 31, 2006, outstanding bank borrowings totaled \$21,750,000. Our bank borrowings are secured by substantially all of our assets, and rank senior in priority to other indebtedness of the Company.

The revolving credit agreement with the bank contains certain restrictive covenants, including covenants regarding profitability, minimum liquidity ratios, restrictions on investments, and limitations on indebtedness, on payment of dividends, and on certain mergers and consolidations. The Company was in compliance with all the covenants as of June 30, 2006.

We generally use cash for, rather than generate cash from, operations in the first half of the year, because we build inventories, and accounts receivables increase, as our customers begin increasing their product purchases for the spring and summer months when product sales increase due to seasonal increases in the usage and purchases of RVs and boats. See "Seasonality and Inflation" below.

During the six months ended June 30, 2006, our accounts receivable increased by \$10,881,000 as compared to an increase of \$11,141,000 in the same period of 2005. These increases were due primarily to the seasonality of our business as customers purchased products from us for the summer selling months.

The volume of the products we purchase from suppliers in Asia increased during the 12 months ended June 30, 2006. We have not been able to negotiate extended payment terms with foreign product suppliers to the same extent that we have with U.S. suppliers. As a result, our accounts payable increased \$977,000 during the six months ended June 30, 2006, as compared to the same six months of 2005.

We were able to significantly reduce our inventories at December 31, 2005 as compared to December 31, 2004. Because of that reduction and the increase in sales during the subsequent six months ended June 30, 2006, we increased our inventories by \$5 million in the first six

**Table of Contents**

months of 2006, as compared to a reduction in inventories of \$2.6 million in the same six months of 2005. Due largely to that increase in inventories, during the six months ended June 30, 2006 we increased our borrowings under our bank credit facility by \$6,805,000, as compared to \$4,392,000 in the same six months of 2005.

We made capital expenditures of \$130,000 in the six months ended June 30, 2006 and \$232,000 in the comparable period in 2005. These expenditures were primarily for computer enhancements and purchases of telephone and warehouse equipment. In 2006, we expect to make capital expenditures, which we estimate will range between \$300,000 and \$500,000, in connection with a planned expansion of our distribution center in St. Bruno, Quebec.

*Contractual Obligations.* We lease the majority of our facilities and certain of our equipment under non-cancelable operating leases. Our future lease commitments are described in Note 4 of the Notes to our Interim Condensed Consolidated Financial Statements included elsewhere in this report. The following table sets forth the total amounts, in thousands of dollars, and the maturities, of our contractual obligations, at December 31, 2005:

	Less				
	Than 1			More than	
Contractual Obligations at December 31, 2005:	Total	Year	1-3 Years	4-5 Years	5 years
Long-Term debt Obligations	\$ 19,239	\$	\$	\$ 19,239	\$
Capital Lease Obligations	662	155	262	245	
Operating Lease Obligations	18,343	3,897	6,009	3,791	4,646
Purchase Obligations					0
<b>Total</b>	<b>\$ 38,244</b>	<b>\$ 4,052</b>	<b>\$ 6,271</b>	<b>\$ 23,275</b>	<b>\$ 4,646</b>

*Dividend Policy.* In the first quarter of 2005, our Board of Directors adopted a dividend policy that provided for the payment of quarterly cash dividends of \$0.04 per share to our stockholders. Pursuant to that policy we paid total cash dividends of \$727,000 in 2005. In the first quarter of 2006, our Board of Directors approved an increase in the quarterly cash dividend to \$0.05 per share. On August 10, 2006, our Board of Directors approved a further increase in the amount of the quarterly cash dividend to \$0.07 per share. We expect, therefore, that cash dividends in 2006 will total approximately \$1,060,000.

*Share Repurchases.* In 2005, our Board of Directors adopted share repurchase programs authorizing repurchases by us of up to an aggregate of \$2,700,000 of our shares of common stock in open market or private transactions. During 2005, we made share repurchases totaling \$1,200,000 pursuant to that program. Information regarding our share repurchases that we made pursuant to this program during the quarter ended June 30, 2006 is set forth in Item 2 of Part II of this Report.

*Expected Uses and Sources of Funds.* We expect our principal uses for cash in the year ending December 31, 2006 will be to fund operations and our capital expenditures, to pay cash dividends and to make share repurchases, as described above, and we anticipate that we will be able to fund those cash requirements in 2006 with borrowings under our revolving credit facility and internally generated funds. We currently do not anticipate any material changes in the cash requirements of our business or in the sources of funds for our operations.

We will continue to explore opportunities to increase our sales and our market shares and to improve our profit margins. We will be seeking to establish new product supply relationships, including relationships that enable us to increase the products that we source from lower cost, but high quality, overseas suppliers, including product suppliers in China and other countries in the Far East, and in Canada, Europe and the United States, and to invest in tooling needed for such products. We also may seek to take advantage of other growth opportunities if and when they may arise. As a result, we may have occasion in the future to use internally generated funds or bank borrowings for these purposes.

**Seasonality and Inflation**

*Seasonality.* Sales of recreational vehicle and boating parts, supplies and accessories are seasonal. We have significantly higher sales during the six-month period from March through August than we do during the remainder of the year. Because a substantial portion of our expenses are fixed, operating income declines and we

---

## **Table of Contents**

sometimes incurs losses and must rely more heavily on borrowings to fund operating requirements in the months when sales are lower.

*Inflation.* Generally, we have been able to pass inflationary price increases on to our customers. However, inflation also may cause or may be accompanied by increases in interest rates and gasoline prices. Such increases, or even the prospect of increases in the price or shortages in the supply of gasoline, can adversely affect the purchase and usage of RVs and boats, which can result in a decline in the demand for the products that we sell.

### **Recent Accounting Pronouncements**

In May 2005, the Financial Accounting Standards Board ( FASB ) issued Statement of Financial Accounting Standards ( SFAS ) No. 154, *Accounting Changes and Error Corrections*. SFAS No. 154 replaces APB Opinion No. 20, *Accounting Changes* and FASB Statement No. 3, *Reporting Accounting Changes in Interim Financial Statements* which required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. SFAS No. 154 will require retrospective application to prior periods financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. This statement is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 and, therefore, in the case of the Company, SFAS No. 154 became effective as of January 1, 2006. We believe that adoption of SFAS No. 154 will not have a material effect on our financial position or results of operation.

In March 2006, the Financial Accounting Standards Board ( FASB ) issued Statement of Financial Accounting Standards ( SFAS ) No. 155, *Accounting for Certain Hybrid Financial Instruments* (an amendment of FASB Statements Nos. 133 and 140) and SFAS No. 156, *Accounting for Servicing of Financial Assets* (an amendment of FASB Statement No. 140). We do not expect the adoption of SFAS No. 155 and SFAS No. 156 to have a material impact on our financial position or results of operation.

In June 2006, the Financial Accounting Standards Board ( FASB ) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of SFAS No. 109. The Interpretation clarifies the accounting for uncertainties in income statements in accordance with SFAS No. 109. The Interpretation prescribes a recognition threshold and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation is effective for fiscal years beginning after December 15, 2006. We believe that the adoption of FIN 48 will not have a material impact on our financial position or results of operations.

### **Forward Looking Information and Risk Factors and Uncertainties that Could Affect Our Future Financial Performance**

Statements contained in this Report that are not historical facts or that discuss our expectations, beliefs or views regarding our future operations or future financial performance or trends in our business constitute forward-looking statements. Forward-looking statements often include the words believe, expect, anticipate, intend, plan, estimate, project, or words of similar meaning, or future or conditional verbs such as should, could, or may. Forward-looking statements are estimates or predictions of future financial performance or financial condition, or are statements about financial or market trends that may affect our future results of operations, which are based upon current information and which are subject to a number of risks and uncertainties that could cause our actual operating results or our financial performance or financial condition in future periods to differ significantly from those expect at the current time. Those risks and uncertainties include, although they are not limited to, the following:

*Our Business is Seasonal and is Subject to Various Economic and Climatic Influences.* Our sales are affected directly by the purchase and usage levels of RVs and boats. The purchase and usage of RVs and boats, are affected by consumers level of discretionary income and their confidence about economic conditions; the availability and prices of gasoline; prevailing interest rates; and weather conditions. As a result, our future sales and earnings can be, and in the past have been, adversely affected by the following:

Loss of confidence among consumers regarding economic conditions and the onset of economic recessions, which cause consumers to reduce their purchases and their usage of RVs and boats;

Increases in the prices and shortages in the supply of gasoline, which increase the costs of using, and the willingness of consumers to purchase and use, RVs and boats;

## Edgar Filing: COAST DISTRIBUTION SYSTEM INC - Form 10-Q

Increases in interest rates which affect the availability and affordability of financing for the purchase of RVs and boats and accessories for RVs and boats;

Unusually severe or extended winter weather conditions, which can reduce the usage of RVs and boats for periods extending beyond the ordinary winter months or to regions that ordinarily encounter milder winter weather conditions and which can cause period-to-period fluctuations in our sales and financial performance.

## **Table of Contents**

These conditions also often lead to increased price competition in our markets which could force us to reduce our prices, thereby reducing sales revenue and our gross profit margins and earnings.

*Reliance on Sole Sources of Supply for Certain of our Products.* We sometimes choose to carry only a single manufacturer's products for certain of the brand-name product lines that we sell. In addition, we obtain each of our proprietary products from a single source manufacturer, although in many instances we own the tooling required for their manufacture. Dependence on a single manufacturer for any product or line of related products, however, presents some risks, including the risk that we will be unable to readily obtain alternative product supply sources in the event that a single source supplier (i) encounters quality or other manufacturing problems, or (ii) decides to enter into an exclusive supply arrangement or alliance with a competing distributor, or to vertically integrate its operations to include not only manufacturing, but also distribution, of its products. If any of our single source suppliers were to encounter any manufacturing problems or disruptions or terminate our supply relationship, our sales and earnings could decline, possibly to a significant extent.

*The Effects of Possible Changes in Supply Relationships in Our Markets.* As is the customary practice in our markets, in most instances we do not have long term supply contracts with our product suppliers. As a result, product suppliers are free to change the terms on which they sell us products or to discontinue supplying us with products altogether, because they may choose to distribute their products directly to after-market dealers or because they might choose to establish exclusive supply relationships with other distributors. Additionally, manufacturers of new RVs and boats may choose to incorporate optional equipment on their RVs and boats at the time of manufacture that, historically were provided to their dealers by distributors such as the Company. Any of these occurrences could result in increased competition in our markets or reduce the number of products we are able to offer our customers, which could cause our sales to decline and could result in lower margins and in reduced earnings.

*We rely heavily on bank borrowings in the operation of our business.* We rely heavily on bank borrowings to fund our working capital requirements and capital expenditures. Our outstanding borrowings create additional risks for our business. Among other things, we may find it more difficult to obtain additional financing to fund expansion or take advantage of other business opportunities, and we use a substantial portion of our cash flow from operations to pay the principal of and interest on our debt. Our existing debt also makes us more vulnerable to general economic downturns and competitive pressures, which could cause us to fail to meet financial covenants in our bank loan agreement and, as discussed above in this Item 2, the interest we have to pay on such debt impacts our operating results.

*Risks Related to Product Expansion Strategy.* We have begun sourcing and buying from overseas manufacturers, and marketing and selling, new products into new markets. We do not have experience in marketing and selling products in some of those markets and there is no assurance that these products will gain acceptance among customers in those markets. We also expect to encounter stiff competition from companies that manufacture or market competing products. We expect that many of those companies will be larger and will have greater financial and marketing resources than we have. Also, we will have greater responsibilities in marketing and providing warranty protection and service for these products. There is no assurance that we will be successful in marketing and selling these products, and the costs we incur in doing so may reduce our earnings or possibly even cause us to incur losses and we could encounter liabilities for possible warranty claims relating to these products.

*Product liability Risks.* Although we do not manufacture any of the products we sell, it is not uncommon for us to be named as an additional defendant in product liability lawsuits brought against the product manufacturers. To protect ourselves from liability, we have been able in many instances to obtain indemnification agreements from these manufacturers or to be named as additional insureds under their product liability insurance policies. Nevertheless, we also maintain our own product liability insurance. Although we have never incurred any material product liabilities in excess of the insurance coverages that we have obtained under policies of insurance maintained by product manufacturers or by us, there is no assurance that we will not incur, in the future, product liabilities in amounts that materially exceed the insurance coverage and indemnification protections that we have.

## **Table of Contents**

*No Assurance that We Will Be Able to Fund Cash Dividends Pursuant to our Dividend Policy.* Although the Board of Directors has adopted a cash dividend policy that provides for regular quarterly cash dividends of \$0.07 per share, the payment of cash dividends in the future will depend on a number of factors, including, but not limited to, our future financial performance and our available cash resources and the cash requirements of our business and possibly also, the consents of third parties, such as the lender under our revolving credit facility. As a result, there can be no assurance that future quarterly dividends will be equal to the \$0.07 per share called for by the dividend policy or that we will not find it necessary to suspend or even terminate the payment of cash dividends in the future.

Other risks that could affect our future financial performance are described in Item 1A, entitled "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2005, filed with the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended, and readers are urged to review those risks as well.

Due to these and other possible uncertainties and risks, readers are cautioned not to place undue reliance on forward-looking statements contained in this report, which speak only as of the date of this report. We also disclaim any obligation to update forward-looking information contained in this report, whether as a result of new information, future events or otherwise.

### **ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Our exposure to market risk with respect to financial instruments is primarily related to changes in interest rates with respect to borrowing activities, which may adversely affect our financial position, results of operations and cash flows. To a lesser degree, we are exposed to market risk from foreign currency fluctuations associated with our Canadian operations and our Canadian currency denominated debt. We do not use financial instruments for trading or other speculative purposes and are not party to any derivative financial instruments.

In seeking to minimize the risks from interest rate fluctuations, we manage exposures through our regular operating and financing activities. The fair value of borrowings under our revolving credit facility approximates the carrying value of such obligations. As of June 30, 2006, we had outstanding approximately \$26.1 million under our revolving credit facility.

We sometimes enter into forward exchange agreements to reduce the effect of foreign currency fluctuations on a portion of our inventory purchases in Canada for our Canadian operations. The gains and losses on these contracts are reflected in earnings in the period during which the transactions being hedged are recognized. We believe that these agreements do not subject us to significant market risk from exchange rate movements because the agreements offset gains and losses on the balances and transactions being hedged. As of June 30, 2006, there were no such agreements outstanding.

Approximately 24% of our bank debt is denominated in Canadian currency, which also exposes us to market risk associated with exchange rate movements. Historically, we have not used derivative financial instruments to manage our exposure to foreign currency rate fluctuations since the market risk associated with our foreign currency denominated debt has not been considered significant.

### **ITEM 4. CONTROLS AND PROCEDURES**

Our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under Securities Exchange Act of 1934, as amended (the Exchange Act), are designed to provide reasonable assurance that information required to be disclosed in our reports filed under that Act, such as this Quarterly Report on Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the rules of the Securities and Exchange Commission. Our disclosures controls and procedures also are designed to ensure that such information is accumulated and communicated to management to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures.

Our management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures in effect as of June 30,

**Table of Contents**

2006. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2006, our disclosure controls and procedures were effective to provide reasonable assurance that material information relating to the Company, including its consolidated subsidiaries, is made known to management, including Chief Executive Officer and Chief Financial Officer, on a timely basis.

There was no change in our internal control over financial reporting that occurred during the quarter ended June 30, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents****PART II OTHER INFORMATION****ITEM 1A RISK FACTORS**

Except for any updates set forth in Item 2 of Part I of this Report, under the caption Forward Looking Information and Risk Factors and Uncertainties that Could Affect Our Future Financial Performance, there were no material changes in the risk factors that were disclosed in Item 1A, under the caption Risk Factors in Part I of our Annual Report on Form 10-K for our fiscal year ended December 31, 2005.

**ITEM 2 UNREGISTERED SALES OF SECURITIES AND USE OF PROCEEDS****Share Repurchases.**

The following table sets forth information regarding our share repurchases in each of the months during the quarter ended June 30, 2006.

	(a)	(b)	(c)	(d)
	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Programs
April 1 to April 30, 2006	14,000	\$ 7.43	14,000	\$ 1,318,747
May 1 to May 31, 2006	1,175	\$ 7.53	1,175	\$ 1,309,893
June 1 to June 30, 2006	8,132	\$ 8.25	8,132	\$ 1,242,795
Total	23,307	\$ 7.72	23,307	

The above shares were purchased pursuant to a stock repurchase program that was publicly announced on June 3, 2005 and at that time authorized up to \$1.5 million of share repurchases. On December 9, 2005, the Company publicly announced that its Board of Directors had authorized the Company to make up to an additional \$1.2 million of share repurchases under this program. This program does not have an expiration date and it is the Company's current intention to make additional share purchases under this program. However, the Company may elect (i) to suspend share repurchases at any time or from time to time, or (ii) to terminate the program prior to the repurchase of all of the shares authorized for repurchase under this program. Accordingly, there is no assurance that any additional shares will be repurchased under this program.
