ChipMOS RECEIVES EXCELLENT ENTERPRISE INNOVATION AWARD FROM MOEA OF TAIWAN, R.O.C.

Hsinchu, Taiwan, Sep. 7, 2006 ChipMOS TECHNOLOGIES (Bermuda) LTD. (ChipMOS or the Company) (Nasdaq: IMOS) announced today that its majority owned subsidiary, ChipMOS TECHNOLOGIES INC. (ChipMOS Taiwan), was honored with the Excellent Enterprise Innovation Award from the Ministry of Economic Affairs (MOEA) of Taiwan, the Republic of China. This prestigious award was given to ChipMOS Taiwan in recognition of its excellent contribution and outstanding achievements in technology development and strategic innovation.

The Industrial Technology Advancement Award is recognized as the premier award for the technology industry in Taiwan, which is the benchmark for evaluating the effectiveness of the five aspects of innovation: technology/know-how, product/system, workflow/process, organization, and strategy.

ChipMOS is dedicated to expanding its capabilities in new technology development, especially in testing and assembly of DDR II DRAM, flash memory, and LCD driver IC. ChipMOS has achieved some breakthrough accomplishments such as Printable B-Stage Epoxy, which is primarily used in FBGA (Fine-pitch Ball Grid Array) packaging for DDR II DRAM, which shortens production time and reduces manufacturing costs. Additionally, ChipMOS Taiwan is the first Taiwan company to successfully develop its own COF technology applied to LCD driver IC assembly and put it into mass production. Moreover, via the execution of government subsidy projects, the Company cooperates closely with research institutes as well as universities and has developed many cutting edge technologies, like stacked CSP (Chip Scale Package) or MCP (Multi-Chip Package), CMOS image sensor CSP, and next generation probe card.

S.J. Cheng, Chairman and Chief Executive Officer of ChipMOS, said, I would like to express my appreciation to MOEA and the award Steering Committee for recognizing ChipMOS R&D accomplishments. As a leading backend testing and assembly service provider, we will continue to focus on upgrading our technology and products and strive to provide the excellent services we have historically committed to our customers.

About ChipMOS TECHNOLOGIES (Bermuda) LTD.:

ChipMOS (<http://www.chipmos.com/>) is a leading independent provider of semiconductor testing and assembly services to customers in Taiwan, Japan, and the U.S. With advanced facilities in Hsinchu and Southern Taiwan Science Parks in Taiwan and Shanghai, ChipMOS and its subsidiaries provide testing and assembly services to a broad range of customers, including leading fabless semiconductor companies, integrated device manufacturers and independent semiconductor foundries.

Forward-Looking Statements

Certain statements contained in this announcement may be viewed as forward-looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933, as amended, and Section 21E of the U.S. Securities Exchange Act of 1934, as amended. Such forward-looking statements involve known and unknown risks,

uncertainties and other factors, which may cause the actual performance, financial condition or results of operations of the Company to be materially different from any future performance, financial condition or results of operations implied by such forward-looking statements. Further information regarding these risks, uncertainties and other factors is included in the Company's most recent Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission (the "SEC") and in the Company's other filings with the SEC.
