Notice Concerning Acquisition of the Company's Own Shares through ToSTNeT-2

Honda Motor Co., Ltd. (the Company) determined as follows with respect to the specific method of acquiring its own shares pursuant to Article 156 of the Company Law, which applies pursuant to Article 165, Paragraph 3, of that law.

Particulars

1. Method of acquisition

The Company will purchase the shares over the Tokyo Stock Exchange at 8:45 a.m. on May 21, 2007, at a price of 4,160 yen per share, which is the closing price of the Company shares as of today, May 18, 2007. The Company will make the purchase through ToSTNeT-2 (as a closing-price transaction); it will not use any other trading system or time. The purchase order will be valid only for the time designated for the transactions.

2. Details of acquisition

(1) Type of shares to be acquired:
Shares of Common Stock

(2) Total number of shares the Company plans to acquire:
9,134,000 shares

Note 1: The total number of shares the Company plans to acquire will not be changed. Depending on market conditions and other factors, a part or all of the transaction may not be performed.

Note 2: The purchase will be made based on selling orders corresponding to the number of shares planned to be acquired.

3. Disclosure of acquisition

The results of the acquisition will be disclosed after the completion of the transaction, which will start at 8:45 a.m. on May 21, 2007.

Acura Design Studio Opens; Will Lead to Creation of Future Acura Vehicles

New California Facility Designed as Green Building

TORRANCE, Calif., U.S.A., May 24, 2007 The new \$15 million Acura Design Studio officially opened its doors, assuming a key role in the development of new concepts and designs that will lead directly to future Acura products. With state-of-the-art design technologies and a work layout focused on improving collaboration, the new design studio represents the next step in the advance of the Acura brand.

Acura Design Studio Exterior

Designed to achieve a high level of energy efficiency, the studio also is expected to be certified as a Leadership in Energy and Environmental Design (LEED) building by the U.S. Green Building Council (USGBC). A number of measures were adopted in the design and construction of the studio, with the goal of achieving LEED gold certification.

This Acura Design Studio will help conceive and design the future of Acura, said Toshihiko Nonaka, president of Honda R&D Americas (HRA). Our goal here is to create emotional designs that create a strong and distinct image for Acura products.

A number of Acura models, including the Acura MDX luxury sport utility vehicle and Acura TL luxury performance sedan, have been designed, developed and engineered by HRA. Moving Acura design activities into a state-of-the-art independent studio provides a more clear focus to advance the unique character of the Acura brand.

The effort to distinguish Acura in the marketplace begins with design, said Dick Colliver, executive vice president of American Honda Motor Co., Inc. and the Acura Division. The Acura Design Studio will be critical in our efforts to deliver products at the right times and ahead of the competition.

Key technologies in the Acura Design Studio include a computer-generated virtual simulator that enables design stylists to display virtual vehicles in a one-to-one ratio. Other features in the facility design include the parallel arrangement of the interior and exterior design areas on the styling floor to better enable collaboration of designers involved in a new vehicle.

As the latest expansion of HRA product design and development capabilities in North America, the Acura Design Studio joins the Honda Design Studio in Torrance, Calif. and the Advanced Design Studio in Pasadena, Calif. to further HRA's existing Los Angeles Center for research and design.

A celebratory groundbreaking for the Acura Design Studio was conducted March 27, 2006, marking the 20th anniversary of the creation of the Acura brand. Acura was the world's first Japanese luxury nameplate and the first Japanese luxury automaker to design, develop and manufacture its vehicles in North America. Today, nearly two-thirds of all Acura vehicles sold in America are researched, designed, developed and assembled exclusively in North America.

In the effort to achieve a Gold rating by the USGBC, the Acura Design Studio includes many energy-saving attributes such as an Energy Star reflective roof to reduce heat gain and lower air conditioning requirements; reclaimed water used for landscaping; and an intelligent lighting system that makes greater use of natural light. Honda has other LEED gold certified facilities in Gresham, Oregon and Raymond, Ohio.

HRA began its operations in California in 1976 with local market research activities and has steadily grown its capabilities over the past 30 years to include all aspects of new vehicle design and development.

With the addition of the Acura Design Studio, the company operates 13 major R&D facilities in North America with more than 1,200 designers, engineers and support personnel engaged in the development of automobiles, motorcycles and power equipment products for North America and global markets. HRA's major centers include the Los Angeles Center (Torrance, CA) responsible for market research, concept development and styling design; the Ohio Center (Raymond, OH) responsible for complete product development, testing and support of North American supplier development; and two dynamic test facilities in California and Ohio; and the North Carolina Center (Swepsonville, NC) responsible for power equipment R&D.

Honda Achieves Record Monthly Overseas and Worldwide Auto Production

May 25, 2007 Honda Motor Co., Ltd. today announced its automobile production, domestic sales, and export results for the month of April 2007. Honda achieved a new record for overseas and worldwide production for the month of April.

<Production>

Due to increased production for both the domestic and overseas markets, domestic production experienced a year-on-year increase for the 11th consecutive month (since June 2006).

Due mainly to increased production in North America and Europe, overseas production experienced a year-on-year increase for the 21st consecutive month (since August 2005). Honda achieved new production records in North America, the U.S., Europe, and China for the month of April. Honda also set a new monthly record for overseas production for the month of April.

Due to an increase in both domestic and overseas production, worldwide production experienced a year-on-year increase for the 21st consecutive month (since August 2005). Honda also achieved a new monthly record for the month of April.

<Japan Domestic Sales>

Due to a decrease in new vehicle registrations, total domestic sales experienced a year-on-year decline for the fourth consecutive month (since January 2007).

Due primarily to increased sales of *Fit*, all-new *Crossroad* and *Stream*, new vehicle registrations in April experienced year-on-year increase for the first time in thirteen months (since March 2006).

Though sales of *Vamos* increased, due mainly to a decrease in sales of *Zest* and *Life*, sales of mini-vehicles experienced a year-on-year decline for the second consecutive month (since March 2007).

<Vehicle registrations - excluding mini vehicles>

Fit was the industry's third best selling car among new vehicle registrations, with sales of 7,268 units and ranked as Honda's best selling car for the month of April. The sales result for *Stream* was 4,277 units.

<Mini vehicles - under 660cc>

Life was the industry's sixth best selling car among mini-vehicles for the month of April, with sales of 6,748 units. The sales result for *Zest* was 3,401 units.

<Exports from Japan>

Due mainly to increased exports to the U.S. and Asia, total exports experienced a year-on-year increase for the 11th consecutive month (since June 2006).
