PIK Payment in Kind

- (a) Represents issuer in default on interest payment; non-income producing security.
- (b) Non-income producing security.
- (c) US\$ denominated foreign securities.
- (d) Standard & Poor's Rating.
- (e) Percentage quoted represents yield-to-maturity as of purchase date.
- (f) Indicates a security that has been deemed illiquid.
- (g) Indicates a restricted security; the aggregate cost of such securities is \$989,500. The aggregate value of \$1,035,827 is approximately 1.6% of net assets.
- (h) Security was purchased pursuant to Rule 144A under the Securities Act of 1993 and may not be resold subject to that rule except to qualified institutional buyers. Unless otherwise noted, 144A securities are deemed to be liquid.
- (i) Indicates a variable rate security. The interest rate shown reflects the rate in effect at May 31, 2007.
- (j) As of May 31, 2007, one security representing \$1 and 0.0% of the total market value was fair valued in accordance with the policies adopted by the Board of Directors.
- (k) The United States federal income tax basis of the Fund's investments and the net unrealized appreciation as of May 31, 2007 were as follows:

| Tax Basis of Investments | Appreciation | Depreciation | Net Unrealized Appreciation |
|---------------------------------|---------------------|---------------------|------------------------------------|
| \$ 84,379,751 | \$ 3,001,247 | \$ 1,105,361 | \$ 1,895,886 |

The difference between the book basis and tax basis is primarily attributable to deferred losses on wash sales and differences in the treatment of premium and market discount amortization for book and tax purposes.

Notes to Schedule of Investments (Unaudited)

Securities Valuation: Securities for which market quotations are readily available including securities listed on national securities exchanges and those traded over-the-counter are valued at the last quoted sales price on the valuation date on which the security is traded. If such securities were not traded on the valuation date, but market quotations are readily available, they are valued at the most recently quoted bid price provided by an independent pricing service or by a principal market maker. Securities for which market quotations are not readily available or for which the pricing agent or market maker does not provide a valuation or methodology, or provides a valuation or methodology that, in the judgment of the adviser, does not represent fair value, are valued by a Valuation Committee appointed by the Board of Directors, in consultation with the adviser. When determining the fair valuation of securities some of the factors influencing the valuation include, the nature of any restrictions on disposition of the securities; assessment of the general liquidity of the securities; the issuer's financial condition and the markets in which it does business; the cost of the investment; the size of the holding and the capitalization of issuer; the prices of any recent transactions or bids/offers for such securities or any comparable securities; any available analyst media or other reports or information deemed reliable by the investment adviser regarding the issuer or the markets or industry in which it operates. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the price used by other mutual funds to calculate their net asset values.

Short-term securities, which mature in sixty days or less, are valued at amortized cost, which approximates market value. The amortized cost method involves valuing a security at its cost on the date of purchase and thereafter assuming a constant amortization to maturity of the difference between the principal amount due at maturity and cost. Short-term securities, which mature in more than sixty days, are valued at current market quotations.
