FASTENAL COMPANY AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands except per share information)

September 30, 2007 and 2006

(Unaudited)

(1) Basis of Presentation

The accompanying unaudited consolidated financial statements of Fastenal Company and subsidiaries (collectively referred to as the Company, Fastenal, or by terms such as we, our, or us) have been prepared in accordance with United States generally accepted accounting principles for interim financial information. They do not include all information and footnotes required by United States generally accepted accounting principles for complete financial statements. However, there has been no material change in the information disclosed in the notes to consolidated financial statements included in our consolidated financial statements as of and for the year ended December 31, 2006. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

(2) Stockholders' Equity and Stock-Based Compensation

Effective January 1, 2006, we began recording compensation expense associated with stock-based awards in accordance with Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), *Share-Based Payment* (SFAS No.123R) as interpreted by SEC Staff Accounting Bulletin No. 107.

On April 15, 2003, our shareholders approved the Fastenal Company Stock Option Plan (Fastenal Option Plan). The aggregate number of shares of our common stock that were made available for issuance upon the exercise of options under the Fastenal Option Plan, on a split adjusted basis, was 7,588. During the first nine months of 2007 and 2006, we had no stock-based employee compensation plans other than the Fastenal Option Plan.

Our Board of Directors granted options to purchase 930 shares of our common stock under the Fastenal Option Plan in May 2003. Any unexercised options from the May 2003 grant expired on November 30, 2006. On April 17, 2007, the Compensation Committee of our Board of Directors approved the grant, effective at the close of business that day, of options to purchase approximately 2,200 shares of our common stock at a strike price of \$45 per share. These options have a contractual term of either five, seven, or eight years. No options under this grant were vested as of September 30, 2007. Compensation expense equal to the grant date fair value is recognized for these awards over the vesting period. The stock-based compensation expense for the nine month periods ended September 30, 2007 and 2006 was \$1,234 and \$279, respectively. The stock-based compensation expense for the three month period ended

(Continued)

Table of Contents**FASTENAL COMPANY AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Amounts in thousands except per share information)

September 30, 2007 and 2006

(Unaudited)

September 30, 2007 was \$851. There was no stock-based compensation expense for the three month period ended September 30, 2006 as these outstanding options, which were granted in January 2003, were fully vested. Unrecognized compensation expense related to outstanding stock options as of September 30, 2007 was \$16,889, pre-tax, and is expected to be recognized over a weighted average period of 8.07 years. Any future changes in estimated forfeitures will impact this amount.

The fair value of each share-based option is estimated on the date of grant using a Black-Scholes valuation method that uses the assumptions noted in the following table. The expected life is the most significant assumption as it determines the period for which the risk-free interest rate, volatility, and dividend yield must be applied. The expected life is the average length of time over which the employee groups will exercise their options, which is based on historical experience with similar grants. Expected volatilities are based on the movement of the Company's stock over the most recent historical period equivalent to the expected life of the option. The risk-free interest rate is based on the U.S. Treasury rate over the expected life at the time of grant. The dividend yield is estimated over the expected life based on our current dividend payout, historical dividends paid, and expected future cash dividends. The following table illustrates the assumptions for the options granted this year and for the options granted in 2003 which were outstanding in 2006.

	Options Granted	
	April	May
	2007	2003
Weighted-average expected life of option in years	4.9	3.4
Weighted-average volatility	31.6%	30.3%
Risk-free interest rate	4.6%	4.5%
Expected dividend yield	1.0%	0.2%
Weighted-average grant date fair value of stock option	\$ 11.36	\$ 3.55

(Continued)

Table of Contents**FASTENAL COMPANY AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands except per share information)

September 30, 2007 and 2006

(Unaudited)

The following table presents a reconciliation of the denominators used in the computation of basic and diluted earnings per share related to the Fastenal Option Plan:

	Nine months ended September 30,		Three months ended September 30,	
	2007	2006	2007	2006
Basic - weighted shares outstanding	150,878	151,005	150,462	150,907
Weighted shares assumed upon exercise of stock options		167		100
Diluted - weighted shares outstanding	150,878	151,172	150,462	151,007

The dilutive impact summarized above relates to periods when the average market price of our stock exceeded the exercise price of the potentially dilutive option securities then outstanding.

(3) Comprehensive Income

Comprehensive income and the components of other comprehensive income were as follows:

	Nine months ended		Three months ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
Net earnings	\$ 176,431	\$ 153,468	\$ 62,142	\$ 54,101
Translation adjustment	11,164	2,875	4,772	(333)
Change in marketable securities	(15)	(206)	32	65
Total comprehensive income	\$ 187,580	\$ 156,137	\$ 66,946	\$ 53,833

Table of Contents

FASTENAL COMPANY AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands except per share information)

September 30, 2007 and 2006

(Unaudited)

As was disclosed in our 2006 Annual Report to Shareholders, we classify these securities as available-for-sale. Available-for-sale securities are recorded at fair value based on current market value. Unrealized holding gains and losses on available-for-sale securities are excluded from earnings, but are included in comprehensive income, and are reported as a separate component of stockholders' equity until realized.

The unrealized losses on our investments at the end of the periods were caused by interest rate increases. Because the decline in market value is attributable to changes in interest rates and not credit quality and because we have the ability and intent to hold these investments until recovery of the fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at September 30, 2007 and 2006.

(5) Operating Leases with Guarantees

We lease certain pick-up trucks under operating leases. These leases typically have a 72-month term and include an early buy out clause we generally exercise, thereby giving the leases an effective term of 12-15 months. Certain operating leases for vehicles contain residual value guarantee provisions, which could become due at the expiration of the operating lease agreement if the fair value of the leased vehicles is less than the guaranteed residual value. The aggregate residual value at lease expiration, of the leases that contain residual value guarantees, is approximately \$10,770 at September 30, 2007. We believe the likelihood of funding the guarantee obligation under any provision of the operating lease agreements is remote, except for a \$2,284 loss on disposal reserve provided at September 30, 2007.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands except per share information)

September 30, 2007 and 2006

(Unaudited)

(6) Income Taxes

In July 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN No. 48). This interpretation, which we adopted on January 1, 2007, clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109, *Accounting for Income Taxes*. It prescribes a recognition threshold and measurement attribute for financial statement disclosure of tax positions taken or expected to be taken on a tax return. Implementation of FIN No. 48 on January 1, 2007 resulted in no adjustment to our recorded liability for unrecognized tax benefits. On the date of adoption, our total amount of unrecognized tax benefits was \$3,041. Included in this liability for unrecognized tax benefits is an estimate for interest and penalties totaling \$703, both of which we classify as a component of income tax expense.

During the nine months ended September 30, 2007, we reduced the \$3,041 liability discussed above by \$1,766 (\$395 of this was for interest and penalties). This reduction was due to the settlement of certain state jurisdiction tax positions.

Fastenal Company, or one of its subsidiaries, files income tax returns in the United States Federal jurisdiction, all states, and various foreign jurisdictions. With limited exceptions, we are no longer subject to income tax examinations by taxing authorities for taxable years before 2004, in the case of United States Federal and non-United States examinations, and 2001 in the case of state and local examinations.

(7) Subsequent Event

On October 18, 2007, a complaint was filed in the United States District Court for the Northern District of California against Fastenal Company on behalf of two former employees claiming to represent all employees employed in the store position of Assistant General Manager in the United States within three years prior to the filing date (four years for California employees). The suit alleges Fastenal misclassified its Assistant General Managers as exempt for purposes of the overtime provisions of the Fair Labor Standards Act (FLSA) and California and Pennsylvania state statutes. This suit also alleges that Assistant General Managers in California did not receive sufficient meal breaks and paid rest periods under the California Labor Code. The plaintiffs seek class action status. This action is in a preliminary stage. We are not currently able to predict the outcome of this action or reasonably estimate a range of potential loss. We intend to vigorously defend this action.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following is management's discussion and analysis of certain significant factors that have affected our financial position and operating results during the periods included in the accompanying consolidated financial statements. (Dollar amounts are in thousands except for per share amounts and where otherwise noted.)

The following discussion refers to the term daily sales. Daily sales are defined as net sales for a period of time divided by the number of business days in that period of time.

Business Overview Fastenal is a North American leader in the wholesale distribution of industrial and construction supplies. We distribute these supplies through a network of over 2,100 company owned stores. Most of our customers are in the construction and manufacturing markets. The construction market includes general, electrical, plumbing, sheet metal, and road contractors. The manufacturing market includes both original equipment manufacturers (OEM) and maintenance and repair operations (MRO). Other users of our product include farmers, truckers, railroads, mining companies, federal, state, and local governmental entities, schools, and certain retail trades. Geographically, our stores and customers are primarily located in North America.

Financial Overview In the first several years of this decade, the global manufacturing recession negatively impacted our performance, and that of the industry as a whole. This negative impact of the economy reversed itself starting in July 2003. However, the economy we sell into has weakened since the middle of 2006. The impact of the economy is best reflected in the growth performance of our stores greater than five years old. (Store sites opened as follows: 2007 group opened 2002 and earlier, and 2006 group opened 2001 and earlier). These stores are more cyclical due to the increased market share they enjoy in their local markets. The daily sales growth rate of stores more than five years old was as follows:

	Nine months ended		Three months ended	
	September 30,		September 30,	
	2007	2006	2007	2006
Growth percentage	5.4%	10.5%	5.8%	9.8%

Our stores that are two to five years old are also impacted by the economy, but to a lesser degree. The daily sales growth rate of our stores that are two to five years old was as follows (Store sites opened as follows: 2007 group opened in 2003, 2004, and 2005, and 2006 group opened in 2002, 2003, and 2004):

	Nine months ended		Three months ended	
	September 30,		September 30,	
	2007	2006	2007	2006
Growth percentage	13.4%	26.0%	8.4%	20.7%

(Continued)

Table of Contents

ITEM 2. (Continued)

Combined these two groups represent a consistent same store view of our business (Store sites opened as follows: 2007 group opened 2005 and earlier, and 2006 group opened 2004 and earlier). These stores, which are more than two years old, had daily sales growth rates as follows:

	Nine months ended		Three months ended	
	September 30, 2007	2006	September 30, 2007	2006
Growth percentage	7.0%	13.5%	6.3%	11.9%

Note: The age groups above are measured as of the last day of each respective year.

Sales Growth Net sales were as follows:

	Nine months ended		Three months ended	
	September 30, 2007	2006	September 30, 2007	2006
Net sales	\$ 1,542,613	1,360,608	533,750	470,088
Percentage change	13.4%	19.4%	13.5%	16.9%

The increase in net sales in the nine and three month periods in 2007 came primarily from higher unit sales, and to a lesser degree, increases in prices. The higher unit sales resulted from increases in sales at older store sites (discussed earlier) and the opening of new store sites in 2006 and 2007.

The mix of sales from the original fastener product line and from the newer product lines was as follows:

Product line	Nine months ended		Three months ended	
	September 30, 2007	2006	September 30, 2007	2006
Fastener product line	50.9%	51.7%	50.5%	51.2%
Newer product lines	49.1%	48.3%	49.5%	48.8%

(Continued)

Table of Contents

ITEM 2. (Continued)

Daily sales growth rates for the twelve months of 2005 and 2006, and the first nine months of 2007, were as follows (compared to the comparable month in the preceding year):

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
2005	26.2%	25.1%	22.5%	26.6%	22.9%	21.2%	21.8%	21.7%	26.8%	22.7%	21.7%	17.0%
2006	23.9%	21.3%	21.1%	19.1%	19.2%	20.6%	19.7%	20.7%	16.1%	15.9%	16.3%	17.7%
2007	12.6%	11.8%	15.5%	12.0%	13.2%	14.8%	13.9%	13.4%	13.7%			

The January 2005 to November 2005 time frame generally represents improvement followed by stabilization in our daily sales trends. The January 2005 to November 2005 general improvement and stabilization reflects a continuation of the improvements we saw beginning in 2003 in the economy as it relates to the customers we sell to in North America and the impact of the Fastenal standard inventory stocking model (see reference below regarding the Customer Service Project, or CSP). The December 2005 daily sales growth rate was weaker than we expected; however, we believe this was an abnormality due to the following reasons (1) historically we have seen fluctuations in December's daily sales growth rates due to the presence of the various holidays and their impact on our customers' buying patterns and (2) December 2004 experienced strong growth, which creates a more difficult comparison in the next year. In 2005, item (2) is also noticeable in months such as May, June, July, and, to a lesser degree, October. The noticeable exception to item (2) is the month of September, which experienced stronger growth due to the demand generated by Hurricane Katrina. The continued strong growth in the January 2006 to March 2006 time frame generally represents a continuation of the strong environments experienced in 2004 and 2005. The first two months of the second quarter of 2006 experienced weaker sales growth than we expected. The April 2006 growth was negatively impacted by Easter (which occurred in March during 2005), but was still weaker than we expected. The June to August 2006 time frame represents stronger sales activity than the preceding two to three month period. The daily sales growth amount in September 2006 appears weaker due to the difficult comparison with Hurricane Katrina's added sales in September 2005 (approximately \$4,000 impact); however, the increase in our daily sales number from August 2006 to September 2006, of 4.1%, is consistent with historical norms. The final three months of 2006 continued in the same variable fashion as the previous six months. The October growth number was negatively impacted by the difficult comparison with Hurricane Katrina's added sales in October 2005 (approximately \$1,500 impact). The months of November and December, like the months of April and May, were weaker than expected. The first five months of 2007 continued the trend of a weak economic environment as experienced during parts of 2006 (as described above). The month of March 2007 improved relative to January and February 2007. The month of June 2007 improved relative to April and May 2007. The June improvement was meaningful as it came in a month with fairly challenging comparisons from 2006. Unfortunately, the strength in June moderated in the third quarter. This pulled our daily sales growth rate from the 14.8% in June to 13.5% in the third quarter of 2007. This moderation reflected a continuation of the weaker economic environment experienced in four of the first five months of the year.

ITEM 2. (Continued)

Statement of Earnings Information (percentage of net sales)

	Nine Months Ended		Three Months Ended	
	September 30, 2007	2006	September 30, 2007	2006
Net sales	100.0%	100.0%	100.0%	100.0%
Gross profit margin	50.8%	50.3%	51.0%	50.5%
Operating and administrative expenses	32.3%	32.1%	32.4%	31.9%
Gain (loss) on sale of property and equipment	0.0%	(0.0)%	0.0%	(0.0)%
Operating income	18.5%	18.1%	18.5%	18.5%
Interest income	0.1%	0.1%	0.1%	0.1%
Earnings before income taxes	18.5%	18.2%	18.6%	18.6%

Note Amounts may not foot due to rounding difference.

Gross profit margins for the first nine months and third quarter of 2007 increased over the same period in 2006. The improvement was driven by our freight initiative (discussed later) and by improvements in our direct sourcing operations.

Operating and administrative expenses grew faster than the net sales growth rate during the first nine months and third quarter of 2007. This was primarily due to increases in payroll and related expenses associated with the additional outside sales personnel for our pathway to profit initiative (discussed later), and to a lesser extent, the initiatives mentioned below (most notably the CSP2 conversions). Similar to the last several years, we experienced negative leverage in occupancy costs (primarily due to store openings and, to a lesser degree, store relocations).

The operating and administrative expenses for the first nine months of 2007 and 2006 include \$1,234 and \$279, respectively, of additional compensation expense related to the adoption of new stock option accounting rules. The 2007 expense relates to options granted in April 2007. We anticipate these options, which vest over five to eight years, will result in compensation expense of approximately \$227 per month for the next five years; and dropping slightly in the remaining period. The 2006 expense occurred in the first five months of 2006, but ceased on June 1, 2006 as those outstanding options, which were granted in January 2003, were fully vested. No other stock based compensation was outstanding during these periods.

(Continued)

Table of Contents

ITEM 2. (Continued)

Income taxes, as a percentage of earnings before income taxes were approximately 38.3% and 38.1% for the first nine months of 2007 and 2006, respectively. During the first quarter of 2007, we implemented FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN No. 48). As defined in FIN No. 48, we had a discrete event in each of the first, second, and third quarters of 2007. The events in the first and second quarter of 2007 resulted in recognition of approximately \$827 and \$124 of additional tax, respectively, and the event in the third quarter of 2007 resulted in a reduction of income tax expense of \$767. Absent these events, our core income tax rate would have been approximately 38.2% for the first nine months of 2007. This rate fluctuates over time based on the income tax rates in the various jurisdictions in which we operate, and based on the level of profits in those jurisdictions.

Net earnings Net earnings and net earnings per share were as follows:

	Nine months ended		Three months ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006
Net earnings	\$ 176,431	153,468	\$ 62,142	54,101
Percentage change	15.0%	20.2%	14.9%	17.7%
Basic and diluted net earnings per share	\$ 1.17	1.02	\$.41	.36
Percentage change	14.7%	21.4%	13.9%	20.0%

We increased our net earnings in the nine and three month periods primarily due to the aforementioned growth in sales and in the gross margin percentage.

Impact of Current Initiatives During the last several years, Fastenal has been actively pursuing several initiatives to improve its operational performance. These include: (1) a new freight model, (2) tactical changes to our working capital model, (3) an expanded store model called CSP2, and (4) a master stocking hub distribution model. Note: See introduction of our pathway to profit initiative discussion later in this report.

The freight model represents a focused effort to haul a higher percentage of our products utilizing the Fastenal trucking network (which operates at a substantial savings to external service providers because of our ability to leverage our existing routes) and to charge freight more consistently in our various operating units. This initiative positively impacted the latter two-thirds of 2005, all of 2006, and the first nine months of 2007 despite the fact we experienced year-over-year increases of approximately 31.7% and 5.3%, respectively, in per gallon diesel fuel costs during the first two periods. The diesel fuel cost per gallon did soften in the last four months of 2006 as our average price per gallon dropped below \$2.90. The average price per gallon dropped to \$2.59 in the first three months of 2007, increased to an average of \$2.85 per gallon during the second quarter of 2007 and increased again to an average of \$2.94 per gallon during the third quarter of 2007. Given the nature of our distribution business, the lower fuel

(Continued)

Table of Contents

ITEM 2. *(Continued)*

prices did translate into cost savings in our business during the first quarter of 2007 but started to have a negative impact during the latter part of the second quarter and during all of the third quarter of 2007.

The tactical changes to our working capital model include the establishment of a central call center for accounts receivable collection, the establishment of financial business rules for the purchasing of products outside the standard stocking model (formerly referred to as CSP) at the store level, and the continuous rebalancing of store inventory based on our expected short-term needs. The latter is accomplished through a process we call "inventory re-distribution". The balance sheet impacts of these changes are described below in the working capital discussion.

The CSP2 store model represented an expansion of the core stocking items and sales personnel in an existing store with the goal of driving additional product sales to existing customers, target customers, and specific geographic areas within established markets. During the first nine months of 2007, 81 stores were converted to the CSP2 format. This resulted in 274 stores converted to the CSP2 format since the third quarter of 2005, plus six new stores opened with the CSP2 format. During the third quarter of 2007 we chose to modify the CSP2 expansion from a "one size fits all" approach to an "a la carte" approach. This will emphasize inventory expansion based on local customer demographics and based on local product knowledge within our sales force. We believe this is a logical compliment to our "pathway to profit" initiative discussed later.

The "master stocking hub" distribution model represents our "everything in the catalog" location. Historically, we have stocked a core selection of products (approximately 6,500 stock keeping units, or SKU's) plus customer specific products at each of our store locations. Our distribution centers would stock the core selection, plus other products with sufficient sales history to warrant stocking in a distribution center. Our stores would utilize their local or distribution center inventory to satisfy most of their customers' needs and would then directly purchase additional items to satisfy the rest of their customers' needs. When analyzing this local (or store) spending we noted the following: (1) this is an inefficient transaction for our store, (2) we don't always benefit from good price negotiation because it is a "one off" purchase, (3) our freight costs on these transactions are meaningfully higher than our average transaction, and (4) in many cases, we have sufficient volume at the company-wide level to warrant stocking it somewhere. These and other factors convinced us to turn our Indianapolis, IN distribution center (DC) from a regional DC into both a regional DC and a North American "master stocking hub". This will allow all of our locations easy access to a wide variety of product already in the network. This will also allow us to turn the four points noted above into a competitive advantage at the store level. In the future, as volume justifies it, we anticipate our Modesto, CA distribution center will assume a similar role for our stores west of the Rocky Mountains.

Table of Contents

ITEM 2. (Continued)

Impact of Fuel Prices During the Quarter Rising fuel prices did take a toll on the year ended December 31, 2006, but there was some relief in the final four months that continued into the first quarter of 2007. During the second and third quarters of 2007, we began to see significant increases in per gallon fuel costs again. During the first, second, and third quarters of 2006, our total vehicle fuel costs averaged approximately \$1.9 million, \$2.1 million, and \$2.2 million per month, respectively. During the first, second, and third quarters of 2007, total vehicle fuel costs averaged approximately \$2.1 million, \$2.5 million, and \$2.4 million per month, respectively. The increase resulted from variations in fuel costs, the freight initiative discussed earlier, and the increase in sales and store locations. These fuel costs include the fuel utilized in our distribution vehicles (semi-tractors, straight trucks, and sprinter trucks) which is recorded in cost of goods and the fuel utilized in our store delivery vehicles which is included in operating and administrative expenses.

Working Capital The year-over-year and the year-to-date dollar and percentage growth related to accounts receivable and inventories were as follows:

Year-over-year change	Balance at		Twelve Month		Twelve Month	
	September 30, 2007	September 30, 2006	Dollar Change September 30, 2007	Dollar Change September 30, 2006	Percentage Change September 30, 2007	Percentage Change September 30, 2006
Accounts receivable, net	\$ 258,738	232,091	\$ 26,647	27,751	11.5%	13.6%
Inventories	\$ 488,824	418,695	\$ 70,129	66,609	16.7%	18.9%
Year-to-date change			Nine Month		Nine Month	
			Dollar Change September 30, 2007	Dollar Change September 30, 2006	Change September 30, 2007	Change September 30, 2006
Accounts receivable, net			\$ 49,206	48,535	23.5%	26.4%
Inventories			\$ 32,827	57,134	7.2%	15.8%

These two assets were impacted by our initiatives to improve working capital. These initiatives include (1) the establishment of a centralized call center to facilitate accounts receivable management (this facility became operational early in 2005) and (2) the tight management of all inventory amounts not identified as either expected store inventory (see reference below regarding CSP), new expanded inventory, inventory necessary for upcoming store openings, or inventory necessary for our master stocking hub. The accounts receivable increase of 13.6% from September 30, 2005 to September 30, 2006 represents a lag behind the 16.1% daily sales increase in September 2006. The accounts receivable increase of 11.5% from September 30, 2006 to September 30, 2007 represents a lag behind the 13.7% daily sales increase in September 2007. We continue to be pleased with the improvements in accounts receivable during 2006 and 2007, and with the related reduction in bad debt expense when compared to historical amounts.

(Continued)

Table of Contents

ITEM 2. *(Continued)*

The inventory increase from September 30, 2006 to September 30, 2007 of 16.7% is greater than sales growth from the first nine months of 2006 to the first nine months of 2007 of 13.4%. The year-to-date inventory increase of 7.2% since December 2006 represents a meaningful improvement from the 15.8% increase in the first nine months of 2006. This improvement relates to our conscious decision to limit the growth of inventory in the future, to halt growth or decrease inventory in the short-term, and to get everybody on the same page related to execution of this decision. We were pleased with the progress in inventory, but still have much work ahead of us.

As we indicated in earlier communications, our goals center on our ability to move the ratio of annual sales to accounts receivable and inventory (Annual Sales: AR&I) back to better than a 3.0:1 ratio (on December 31, 2006 and 2005, we had a ratio of 2.7:1 and 2.8:1, respectively). Historically, we have been able to achieve a 20% after tax return on total assets (our historical internal goal) when our Annual Sales: AR&I ratio is at or above 3.0:1. While the incremental investments in 2006 did not allow us to improve our ratio (these investments include CSP2 conversions and our master stocking hub model); we believe our initiatives are having a positive impact on accounts receivable and inventory. In the first nine months of 2007, we have made considerable improvement as detailed above.

Store Openings and Format In June 2002, we began our customer service project (or CSP). This project centered on stocking all of our stores with a consistent base of product and with a consistent merchandising scheme. Since this CSP format represents the stocking model in substantially all of our locations, during the first quarter of 2005 we began to refer to these converted locations simply as stores with our expected inventory stocking model, versus the CSP designation. Consistent with our operating philosophy, we intend to continue identifying products and store display themes to position our stores to the Fastenal goal of being the best industrial and construction supplier in each local market in which we operate. In June 2005 we disclosed our intention to convert locations to the CSP2 format. The CSP2 format represented a further expansion of the Fastenal standard inventory stocking model at the store level. As of September 30, 2007, 280 stores were operating under the CSP2 format. Of these stores, 81 were converted during the first nine months of 2007, 163 were converted during 2006, 30 were converted in the latter half of 2005, and another six were opened with the CSP2 format (one in 2005 and five in 2006). In our 2006 Annual Report, we discussed our CSP3 format. The CSP3 format represents a test expansion of the store format. At September 30, 2007 we have eight stores with this format. Seven were converted in the first nine months of 2007 and one was converted in 2006. As indicated earlier in this report, we have modified our CSP2 expansion from a one size fits all to an a la carte approach. In the future, we will discontinue our practice of disclosing CSP2 and CSP3 store conversions and/or openings information. We feel the pathway to profit process of disclosing store FTE personnel is a better indicator of the progress of this initiative.

(Continued)

Table of Contents

ITEM 2. (Continued)

Pathway to Profit and Shareholder Wealth During April 2007 we disclosed our intention to alter the growth drivers of our business. For most of the last decade, we have used store openings as the primary growth driver of our business (opening approximately 14% new stores each year). In the future, we intend to add outside sales personnel into existing stores at a faster rate than historical patterns. We intend to fund this sales force expansion with the occupancy savings generated by opening stores at the rate of 7% to 10% per year (we expect to open approximately 8% new stores in 2007 or approximately 160 stores) versus the historical rate of approximately 14%. Our goal is four-fold: (1) to continue growing our business at a similar rate with the new sales investment model, (2) to grow the sales of our average store from \$80 thousand per month (Spring 2007) to \$130 thousand per month (five years or 2012), (3) to enhance the profitability of the overall business by capturing the natural expense leverage that has historically occurred in our existing stores as their sales grow, and (4) to increase the returns of our business due to the enhanced profitability described in (3) above and due to the more efficient use of working capital (primarily inventory) as our average store size increases.

In response to the pathway to profit, we have increased our year-over-year store count and full-time equivalent (FTE) head count as follows:

	September 2007	June 2007	March 2007
Store count	9.7%	12.5%	13.4%
Store personnel FTE	18.4%	13.7%	13.0%
Distribution and manufacturing personnel FTE	12.8%	9.2%	8.9%
Administrative and sales support personnel FTE	2.1%	4.4%	15.2%
Total - FTE	15.0%	11.5%	12.5%

Stock Repurchase and Dividends On January 18, 2007, we issued a press release announcing our Board of Directors had authorized purchases by us of up to an additional 1,000,000 shares of our common stock (over and above previously authorized amounts). On July 11, 2007, we issued a press release announcing our Board of Directors had authorized us to purchase up to an additional 1,000,000 shares of our common stock (over and above previously authorized amounts). During the first nine months of 2007, we purchased 884,200 shares of our outstanding stock at an average price of approximately \$41.94 per share. With the new authorizations in 2007, we have remaining authority to purchase up to approximately 1,200,000 additional shares of our common stock.

During the first nine months of 2007 and 2006 we paid dividends totaling \$66,216 (or \$0.44 per share) and \$60,548 (or \$0.40 per share), respectively, to our shareholders.

Critical Accounting Policies A discussion of the critical accounting policies related to accounting estimates is contained in our 2006 Annual Report to Shareholders.

Table of Contents

ITEM 2. (Continued)

Liquidity and Capital Resources

Cash flow activity was as follows:

	Nine months ended	
	September 30, 2007	2006
Net cash provided by operating activities	\$ 160,428	81,240
Net cash used in investing activities	\$ 23,282	62,528
Net cash used in financing activities	\$ 103,294	67,562

Cash flow activity as a percentage of net earnings was as follows:

	Nine months ended	
	September 30, 2007	2006
Net cash provided by operating activities	90.9%	52.9%
Net cash used in investing activities	13.2%	40.7%
Net cash used in financing activities	58.5%	44.0%

Net cash provided by operating activities has increased from the prior year as the growth in net earnings was aided by improving trends in working capital management (discussed earlier).

Net cash used in investing activities changed primarily due to changes in marketable securities and property and equipment.

Property and equipment expenditures in the first nine months of 2007 consisted of: (1) the purchase of software and hardware for Fastenal's information processing systems, (2) the addition of certain pickup trucks, (3) the purchase of signage, shelving, and other fixed assets related to store openings and conversion of existing stores to the CSP2 stocking model, (4) the addition of manufacturing and warehouse equipment, (5) the expansion or improvement of certain owned or leased store properties, and (6) the expansion of Fastenal's distribution/trucking fleet. Disposals of property and equipment consisted of the planned disposition of certain pickup trucks, semi-tractors, and trailers in the normal course of business and the disposition of real estate relating to several store locations.

Cash requirements for these expenditures were satisfied from net earnings, cash on hand, and the proceeds of asset disposals. As of September 30, 2007, we had no material outstanding commitments for capital expenditures. We anticipate funding our current expansion plans with cash generated from operations, from available cash and cash equivalents, and, to a lesser degree, from our borrowing capacity.

(Continued)

Table of Contents

ITEM 2. *(Continued)*

Net cash used in financing activities consisted of the payment of dividends and cash outflow needed to fund the stock repurchase discussed earlier.

A discussion of the nature and amount of future cash commitments is contained in our 2006 Annual Report to Shareholders.

Certain Risks and Uncertainties This report contains statements that are not historical in nature and that are intended to be, and are hereby identified as, forward-looking statements under the Private Securities Litigation Reform Act of 1995, including statements regarding working capital goals and expected return on total assets when working capital is appropriately managed, the addition of outside sales personnel at existing stores and the funding of that expansion, the ability to grow average store sales and capture resulting leverage, planned store openings, the expected amount of future compensation expense resulting from existing stock options, the expected future change in Modesto, California regarding its proposed status as a master stocking hub, and the funding of expansion plans. The following factors are among those that could cause the Company's actual results to differ materially from those predicted in such forward-looking statements: (i) an upturn or downturn in the economy could cause store openings to change from that expected, and could impact the rate at which additional outside sales personnel are added and our ability to grow average store sales, (ii) a change, from that projected, in the number of markets able to support future store sites, the success of the additional outside sales people, and our ability to successfully attract and retain qualified personnel to staff our stores could impact the rate of new stores openings, (iii) a change in accounts receivable collections, a change in the economy from that currently being experienced, a change in buying patterns, or a change in vendor production lead times could cause us to fail to attain our goals regarding working capital (including inventory) and rates of return on assets, (iv) a change in our growth west of the Rocky Mountains, or a change in need, could alter our plans regarding Modesto, California, and (v) a change in accounting for stock-based compensation or the assumptions used could change the amount of stock-based compensation recognized. A discussion of other risks and uncertainties which could cause the Company's operating results to vary from anticipated results or which could materially adversely affect the Company's business, financial condition or operating results is included in the Company's most recently filed Annual Report on Form 10-K (Item 1A of Part I) and in the Company's most recent Annual Report to Shareholders (under the section captioned Management's Discussion and Analysis of Financial Condition and Results of Operations). We assume no obligation to update any forward looking statements or any discussions of risks and uncertainties.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to certain market risks from changes in interest rates, foreign currency exchange rates, commodity steel pricing, and commodity fuel prices. Changes in these factors cause fluctuations in our earnings and cash flows. We evaluate and manage exposure to these market risks as follows:

Interest Rates We have a line of credit totaling \$40 million of which \$0 was outstanding at September 30, 2007. The line bears interest at 0.9% over the LIBOR rate. We pay no fee for the unused portion of the line of credit.

Foreign Currency Exchange Rates Foreign currency fluctuations can affect our net investments and earnings denominated in foreign currencies. Our primary exchange rate exposure is with the Canadian dollar against the United States dollar. Our estimated net earnings exposure for foreign currency exchange rates was not material at September 30, 2007.

Commodity Steel Pricing We buy and sell various types of steel products; these products consist primarily of different types of threaded fasteners. During the last decade, there has been nominal movement in overall steel pricing, with some deflation occurring in the wake of the economic crisis of the Far East markets that occurred in the late 1990 s. This trend reversed to inflation in the period from late 2003 to the early part of 2005. We are exposed to the impacts of commodity steel pricing and our related ability to pass through the impacts to our end customers.

Commodity Fuel Prices We have market risk for changes in unleaded gasoline and diesel fuel; however, this risk is largely mitigated by our ability to pass freight cost to our customers and the efficiency of our trucking distribution network.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of the principal executive officer and principal financial officer of Fastenal, of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)). Based on this evaluation, the principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to our management, including the principal executive officer and principal financial officer, to allow for timely decisions regarding disclosure. There was no change in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On October 18, 2007, a complaint was filed in the United States District Court for the Northern District of California against Fastenal Company on behalf of two former employees claiming to represent all employees employed in the store position of Assistant General Manager in the United States within three years prior to the filing date (four years for California employees). The suit alleges Fastenal misclassified its Assistant General Managers as exempt for purposes of the overtime provisions of the Fair Labor Standards Act (FLSA) and California and Pennsylvania state statutes. This suit also alleges that Assistant General Managers in California did not receive sufficient meal breaks and paid rest periods under the California Labor Code. The plaintiffs seek class action status. This action is in a preliminary stage. We are not currently able to predict the outcome of this action or reasonably estimate a range of potential loss. We intend to vigorously defend this action.

ITEM 1A. RISK FACTORS

We are affected by risks specific to us as well as factors that affect all businesses operating in a global market. The significant factors known to us that could materially adversely affect our business, financial condition, or operating results are described in Item 1 of Part II above and in our most recently filed Annual Report on Form 10-K (Item 1A of Part I). There has been no material change in those risk factors.

Table of ContentsITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
ISSUER PURCHASES OF EQUITY SECURITIES¹

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) that May Yet Be Purchased Under the Plans or Programs
July 2007	50,000	\$ 45.34	50,000	1,401,800
August 2007	200,000	\$ 44.87	200,000	1,201,800
September 2007				1,201,800 ²
Total	250,000	\$ 44.96	250,000	

¹ On January 18, 2007, we announced that our Board of Directors had authorized purchases by us of up to 1,000,000 shares of our common stock (over and above previously authorized amounts). On July 11, 2007, we announced that our Board of Directors had authorized purchases up to an additional 1,000,000 shares of our common stock (over and above previously authorized amounts). All of the purchases described in the table were made pursuant to these authorizations on a first-in, first-out (or FIFO) basis.

² Of the remaining 1,201,800 shares, 201,800 are related to the January 2007 authorization and 1,000,000 are related to the July 2007 authorization. We may continue to make repurchases under both of these authorizations. None of the above-described authorizations have an expiration date.
