þ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2007

OR

¨ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 000-50831

REGIONS FINANCIAL CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of

incorporation or organization)

1900 Fifth Avenue North, Birmingham, Alabama 35203

(Address of principal executive offices)

63-0589368
(I.R.S. Employer

Identification No.)

Registrant's telephone number, including area code: (205) 944-1300

Securities registered pursuant to Section 12(b) of the Act:

Edgar Filing: REGIONS FINANCIAL CORP - Form 10-K

Title of each class	Name of each exchange on which registered
Common Stock, \$.01 par value	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer <input checked="" type="checkbox"/>	Accelerated filer <input type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter.

Common Stock, \$.01 par value \$22,669,702,117 as of June 30, 2007.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

Common Stock, \$.01 par value 693,601,138 shares issued and outstanding as of February 19, 2008.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the proxy statement for the Annual Meeting to be held on April 17, 2008 are incorporated by reference into Part III.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, other periodic reports filed by Regions Financial Corporation (Regions) under the Securities Exchange Act of 1934, as amended, and any other written or oral statements made by or on behalf of Regions may include forward-looking statements. The Private Securities Litigation Reform Act of 1995 (the Act) provides a safe harbor for forward-looking statements which are identified as such and are accompanied by the identification of important factors that could cause actual results to differ materially from the forward-looking statements. For these statements, we, together with our subsidiaries, unless the context implies otherwise, claim the protection afforded by the safe harbor in the Act. Forward-looking statements are not based on historical information, but rather are related to future operations, strategies, financial results or other developments. Forward-looking statements are based on management s expectations as well as certain assumptions and estimates made by, and information available to, management at the time the statements are made. Those statements are based on general assumptions and are subject to various risks, uncertainties and other factors that may cause actual results to differ materially from the views, beliefs and projections expressed in such statements. These risks, uncertainties and other factors include, but are not limited to, those described below:

Regions ability to achieve the earnings expectations related to businesses that have been acquired, including its merger with AmSouth Bancorporation (AmSouth), or that may be acquired in the future, which in turn depends on a variety of factors, including:

Regions ability to achieve the anticipated cost savings and revenue enhancements with respect to the acquired operations, or lower than expected revenues from continuing operations;

the assimilation of the combined companies corporate cultures;

the continued growth of the markets that the acquired entities serve, consistent with recent historical experience;

difficulties related to the integration of the businesses.

Regions ability to expand into new markets and to maintain profit margins in the face of competitive pressures.

Regions ability to keep pace with technological changes.

Regions ability to develop competitive new products and services in a timely manner and the acceptance of such products and services by Regions customers and potential customers.

Regions ability to effectively manage interest rate risk, market risk, credit risk, operational risk, legal risk, and regulatory and compliance risk.

Regions ability to manage fluctuations in the value of assets and liabilities and off-balance sheet exposure so as to maintain sufficient capital and liquidity to support Regions business.

The current stresses in the financial markets.

Edgar Filing: REGIONS FINANCIAL CORP - Form 10-K

The cost and other effects of material contingencies, including litigation contingencies.

The effects of increased competition from both banks and non-banks.

Possible changes in interest rates may increase funding costs and reduce earning asset yields, thus reducing margins.

Possible changes in general economic and business conditions in the United States in general and in the communities Regions serves in particular.

Possible changes in the creditworthiness of customers and the possible impairment of collectibility of loans.

The effects of geopolitical instability and risks such as terrorist attacks.

Possible changes in trade, monetary and fiscal policies, laws and regulations, and other activities of governments, agencies and similar organizations, including changes in accounting standards, may have an adverse effect on business.

Possible changes in consumer and business spending and saving habits could affect Regions' ability to increase assets and to attract deposits.

The effects of weather and natural disasters such as droughts and hurricanes.

The words believe, expect, anticipate, project and similar expressions often signify forward-looking statements. You should not place undue reliance on any forward-looking statements, which speak only as of the date made. We assume no obligation to update or revise any forward-looking statements that are made from time to time.

Item 1. Business

Regions Financial Corporation (together with its subsidiaries on a consolidated basis, Regions or Company) is a financial holding company headquartered in Birmingham, Alabama, which operates throughout the South, Midwest and Texas. Regions provides traditional commercial, retail and mortgage banking services, as well as other financial services in the fields of investment banking, asset management, trust, mutual funds, securities brokerage, insurance and other specialty financing. At December 31, 2007, Regions had total consolidated assets of approximately \$141.0 billion, total consolidated deposits of approximately \$94.8 billion and total consolidated stockholders' equity of approximately \$19.8 billion.

Regions is a Delaware corporation that, on July 1, 2004, became the successor by merger to Union Planters Corporation and the former Regions Financial Corporation. Its principal executive offices are located at 1900 Fifth Avenue North, Birmingham, Alabama 35203, and its telephone number at that address is (205) 944-1300.

Banking Operations

Regions conducts its banking operations through Regions Bank, an Alabama chartered commercial bank that is a member of the Federal Reserve System. At December 31, 2007, Regions operated almost 2,000 banking offices in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia.

The following chart reflects the distribution of branch locations in each of the states in which Regions conducts its banking operations.

	Branches
Alabama	255
Arkansas	119
Florida	427
Georgia	158
Illinois	74
Indiana	69
Iowa	18
Kentucky	19
Louisiana	138
Mississippi	165
Missouri	69
North Carolina	9
South Carolina	40
Tennessee	314
Texas	88
Virginia	3
Totals	1,965

Other Financial Services Operations

In addition to its banking operations, Regions provides additional financial services through the following subsidiaries:

Morgan Keegan & Company, Inc. (Morgan Keegan), a subsidiary of Regions Financial Corporation, is a full-service regional brokerage and investment banking firm. Morgan Keegan offers products and services including securities brokerage, asset management, financial planning, mutual funds, securities underwriting, sales and trading, and investment banking. Morgan Keegan also manages the delivery of trust services, which are provided pursuant to the trust powers of Regions Bank. Morgan Keegan, one of the largest investment firms in the South, employs approximately 1,300 financial advisors offering products and services from over 400 offices located in Alabama, Arkansas, Florida, Georgia, Illinois, Kentucky, Louisiana, Massachusetts, Mississippi, New York, North Carolina, South Carolina, Tennessee, Texas and Virginia.

Regions Insurance Group, Inc., a subsidiary of Regions Financial Corporation, offers insurance products through the following subsidiaries: Regions Insurance, Inc. (formerly Rebsamen Insurance, Inc.), headquartered in Little Rock, Arkansas, and Regions Insurance Services, Inc., headquartered in Memphis, Tennessee. Through its insurance brokerage operations in Alabama, Arkansas, Indiana, Louisiana, Missouri, Mississippi, Tennessee and Texas, Regions Insurance Group offers all lines of personal and commercial insurance, including property, casualty, life, health and accident. Regions Insurance Services offers credit-related insurance products (title, term life, credit life, debt cancellation, environmental, crop and mortgage insurance) to customers of Regions. With \$111 million in annual revenues and 30 offices in eight states, Regions Insurance Group, Inc. is one of the largest bank-owned insurance brokers in the United States.

Regions Agency, Inc., a subsidiary of Regions Financial Corporation, acts as an insurance agent or broker with respect to credit life insurance, accident and health insurance and other types of insurance relating to extensions of credit by Regions Bank or Regions' banking-related subsidiaries.

Regions Life Insurance Company, a subsidiary of Regions Financial Corporation, acts as a re-insurer of credit life insurance and accident and health insurance in connection with the activities of certain affiliates of Regions.

Regions Interstate Billing Service, Inc., a subsidiary of Regions Bank, factors commercial accounts receivable and performs billing and collection services, focusing on clients in the heavy-duty truck and automotive business, but also serving other businesses that meet certain criteria.

Regions Equipment Finance Corporation, a subsidiary of Regions Bank, provides domestic and international equipment financing products, focusing on commercial clients.

Acquisition Program

A substantial portion of the growth of Regions from its inception as a bank holding company in 1971 through the November 2006 merger with AmSouth Bancorporation has been through the acquisition of other financial institutions, including commercial banks and thrift institutions, and the assets and deposits thereof. As part of its ongoing strategic plan, Regions continually evaluates business combination opportunities. Any future business combination or series of business combinations that Regions might undertake may be material, in terms of assets acquired or liabilities assumed, to Regions' financial condition. Recent business combinations in the financial services industry have typically involved the payment of a premium over book and market values. This practice could result in dilution of book value and net income per share for the acquirer.

Segment Information

Reference is made to Note 22 Business Segment Information to the consolidated financial statements included under Item 8 of this Form 10-K for information required by this item.

Supervision and Regulation

Regions and its subsidiaries are subject to the extensive regulatory framework applicable to bank holding companies and their subsidiaries. Regulation of financial institutions such as Regions and its subsidiaries is intended primarily for the protection of depositors, the deposit insurance fund of the Federal Deposit Insurance Corporation (FDIC) and the banking system as a whole, and generally is not intended for the protection of stockholders or other investors. Described below are the material elements of selected laws and regulations applicable to Regions and its subsidiaries. The descriptions are not intended to be complete and are qualified in their entirety by reference to the full text of the statutes and regulations described. Changes in applicable law or regulation, and in their application by regulatory agencies, cannot be predicted, but they may have a material effect on the business and results of Regions and its subsidiaries.

General. Regions is a bank holding company, registered with the Board of Governors of the Federal Reserve System (the Federal Reserve) and a financial holding company under the Bank Holding Company Act of 1956, as amended (BHC Act). As such, Regions and its subsidiaries are subject to the supervision, examination and reporting requirements of the BHC Act and the regulations of the Federal Reserve.

The Gramm-Leach-Bliley Act, adopted in 1999 (GLB Act), significantly relaxed previously existing restrictions on the activities of banks and bank holding companies. Under such legislation, an eligible bank holding company may elect to be a financial holding company and thereafter may engage in a range of activities that are financial in nature and that were not previously permissible for banks and bank holding companies. A financial holding company may engage directly or through a subsidiary in the statutorily authorized activities of securities dealing, underwriting and market making, insurance underwriting and agency activities, merchant banking and insurance company portfolio investments. A financial holding company also may engage in any activity that the Federal Reserve determines by rule or order to be financial in nature, incidental to such financial activity, or complementary to a financial activity and that does not pose a substantial risk to the safety and soundness of an institution or to the financial system generally.

In addition to these activities, a financial holding company may engage in those activities permissible for a bank holding company that has not elected to be treated as a financial holding company, including factoring accounts receivable, acquiring and servicing loans, leasing personal property, performing certain data processing

services, acting as agent or broker in selling credit life insurance and certain other types of insurance in connection with credit transactions and conducting certain insurance underwriting activities. The BHC Act does not place territorial limitations on permissible non-banking activities of bank holding companies. Despite prior approval, the Federal Reserve has the power to order any bank holding company or its subsidiaries to terminate any activity or to terminate its ownership or control of any subsidiary when the Federal Reserve has reasonable grounds to believe that continuation of such activity or such ownership or control constitutes a serious risk to the financial soundness, safety or stability of any bank subsidiary of the bank holding company.

The GLB Act provides generally for umbrella regulation of financial holding companies by the Federal Reserve, and for functional regulation of banking activities by bank regulators, securities activities by securities regulators, and insurance activities by insurance regulators.

For a bank holding company to be eligible for financial holding company status, all of its subsidiary insured depository institutions must be well capitalized and well managed. A bank holding company may become a financial holding company by filing a declaration with the Federal Reserve that it elects to become a financial holding company. The Federal Reserve must deny expanded authority to any bank holding company with a subsidiary insured depository institution that received less than a satisfactory rating on its most recent Community Reinvestment Act of 1977 (the CRA) review as of the time it submits its declaration. If, after becoming a financial holding company and undertaking activities not permissible for a bank holding company, the company fails to continue to meet any of the prerequisites for financial holding company status, the company must enter into an agreement with the Federal Reserve to comply with all applicable capital and management requirements. If the company does not return to compliance within 180 days, the Federal Reserve may order the company to divest its subsidiary banks or the company may discontinue or divest investments in companies engaged in, activities permissible only for a bank holding company that has elected to be treated as a financial holding company.

The BHC Act requires every bank holding company to obtain the prior approval of the Federal Reserve before: (1) it may acquire direct or indirect ownership or control of any voting shares of any bank or savings and loan association, if after such acquisition, the bank holding company will directly or indirectly own or control more than 5.0% of the voting shares of the institution; (2) it or any of its subsidiaries, other than a bank, may acquire all or substantially all of the assets of any bank or savings and loan association; or (3) it may merge or consolidate with any other bank holding company.

The BHC Act further provides that the Federal Reserve may not approve any transaction that would result in a monopoly or would be in furtherance of any combination or conspiracy to monopolize or attempt to monopolize the business of banking in any section of the United States, or the effect of which may be substantially to lessen competition or to tend to create a monopoly in any section of the country, or that in any other manner would be in restraint of trade, unless the anticompetitive effects of the proposed transaction are clearly outweighed by the public interest in meeting the convenience and needs of the community to be served. The Federal Reserve is also required to consider the financial and managerial resources and future prospects of the bank holding companies and banks concerned and the convenience and needs of the community to be served. Consideration of financial resources generally focuses on capital adequacy, and consideration of convenience and needs issues includes the parties' performance under the CRA, both of which are discussed below. In addition, the Federal Reserve must take into account the institutions' effectiveness in combating money laundering.

Regions Bank is a member of the FDIC, and, as such, its deposits are insured by the FDIC to the extent provided by law. It is also subject to numerous statutes and regulations that affect its business activities and operations, and is supervised and examined by one or more state or federal bank regulatory agencies.

Regions Bank is a state bank, chartered in Alabama and is a member of the Federal Reserve System. Regions Bank is generally subject to supervision and examination by both the Federal Reserve and the Alabama Department of Banking. The Federal Reserve and the Alabama Department of Banking regularly examine the operations of Regions Bank and are given authority to approve or disapprove mergers, consolidations, the

establishment of branches and similar corporate actions. The federal and state banking regulators also have the power to prevent the continuance or development of unsafe or unsound banking practices or other violations of law. Various consumer laws and regulations also affect the operations of Regions Bank. In addition, commercial banks are affected significantly by the actions of the Federal Reserve as it attempts to control money and credit availability in order to influence the economy.

Community Reinvestment Act. Regions Bank is subject to the provisions of the CRA. Under the terms of the CRA, Regions Bank has a continuing and affirmative obligation consistent with safe and sound operation to help meet the credit needs of its communities, including providing credit to individuals residing in low- and moderate-income neighborhoods. The CRA does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the CRA. The CRA requires each appropriate federal bank regulatory agency, in connection with its examination of a depository institution, to assess such institution's record in assessing and meeting the credit needs of the community served by that institution, including low- and moderate-income neighborhoods. The regulatory agency's assessment of the institution's record is made available to the public. The assessment also is part of the Federal Reserve's consideration of applications to acquire, merge or consolidate with another banking institution or its holding company, to establish a new branch office that will accept deposits or to relocate an office. In the case of a bank holding company applying for approval to acquire a bank or other bank holding company, the Federal Reserve will assess the records of each subsidiary depository institution of the applicant bank holding company, and such records may be the basis for denying the application. Regions Bank received a satisfactory CRA rating in its most recent examination.

USA PATRIOT Act. A major focus of governmental policy relating to financial institutions in recent years has been aimed at combating money laundering and terrorist financing. The USA PATRIOT Act of 2001 (the USA PATRIOT Act) broadened the application of anti-money laundering regulations to apply to additional types of financial institutions such as broker-dealers, investment advisors and insurance companies, and strengthened the ability of the U.S. Government to help prevent, detect and prosecute international money laundering and the financing of terrorism. The principal provisions of Title III of the USA PATRIOT Act require that regulated financial institutions, including state member banks: (i) establish an anti-money laundering program that includes training and audit components; (ii) comply with regulations regarding the verification of identity of any person seeking to open an account; (iii) take additional required precautions with non-U.S. owned accounts; and (iv) perform certain verification and certification of money laundering risk for their foreign correspondent banking relationships. Failure of a financial institution to comply with the USA PATRIOT Act's requirements could have serious legal and reputational consequences for the institution. Regions' banking, broker-dealer and insurance subsidiaries have augmented their systems and procedures to meet the requirements of these regulations and will continue to revise and update their policies, procedures and controls to reflect changes required by the USA PATRIOT Act and implementing regulations.

Payment of Dividends. Regions is a legal entity separate and distinct from its banking and other subsidiaries. The principal source of cash flow of Regions, including cash flow to pay dividends to its stockholders and principal and interest on any debt of Regions, is dividends from Regions Bank. There are statutory and regulatory limitations on the payment of dividends by Regions Bank to Regions, as well as by Regions to its stockholders.

As to the payment of dividends, Regions Bank is subject to the laws and regulations of the state of Alabama and to the regulations of the Federal Reserve.

If, in the opinion of a federal regulatory agency, an institution under its jurisdiction is engaged in or is about to engage in an unsafe or unsound practice (which, depending on the financial condition of the institution, could include the payment of dividends), such agency may require, after notice and hearing, that such institution cease and desist from such practice. The federal banking agencies have indicated that paying dividends that deplete an institution's capital base to an inadequate level would be an unsafe and unsound banking practice. Under the

Federal Deposit Insurance Corporation Act (FDIA), an insured institution may not pay any dividend if payment would cause it to become undercapitalized or if it already is undercapitalized. See Regulatory Remedies under the FDIA below. Moreover, the Federal Reserve and the FDIC have issued policy statements stating that bank holding companies and insured banks should generally pay dividends only out of current operating earnings.

At December 31, 2007, under dividend restrictions imposed under federal and state laws, Regions Bank, without obtaining governmental approvals, could declare aggregate dividends to Regions of approximately \$223.3 million.

The payment of dividends by Regions and Regions Bank may also be affected or limited by other factors, such as the requirement to maintain adequate capital above regulatory guidelines.

Capital Adequacy. Regions and Regions Bank are required to comply with the applicable capital adequacy standards established by the Federal Reserve. There are two basic measures of capital adequacy for bank holding companies that have been promulgated by the Federal Reserve: a risk-based measure and a leverage measure.

The risk-based capital standards are designed to make regulatory capital requirements more sensitive to differences in credit and market risk profiles among banks and financial holding companies, to account for off-balance-sheet exposure, and to minimize disincentives for holding liquid assets. Assets and off-balance-sheet items are assigned to broad risk categories, each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items.

The minimum guideline for the ratio of total capital (Total Capital) to risk-weighted assets (including certain off-balance-sheet items, such as standby letters of credit) is 8.0%. At least half of the Total Capital must be composed of common equity, undivided profits, minority interests in the equity accounts of consolidated subsidiaries (including, for bank holding companies but not banks, trust preferred securities), non-cumulative perpetual preferred stock and for bank holding companies (but not banks) a limited amount of cumulative perpetual preferred stock, less goodwill and certain other intangible assets (Tier 1 Capital). Tier 2 Capital may consist of, among other things, qualifying subordinated debt, mandatorily convertible debt securities, other preferred stock and trust preferred securities and a limited amount of the allowance for loan losses. Non-cumulative perpetual preferred stock, trust preferred securities and other so-called restricted core capital elements are currently limited to 25% of Tier 1 Capital. The minimum guideline for Tier 1 Capital is 4.0%. At December 31, 2007, Regions consolidated Tier 1 Capital ratio was 7.29% and its Total Capital ratio was 11.25%.

In addition, the Federal Reserve has established minimum leverage ratio guidelines for bank holding companies. These guidelines provide for a minimum ratio of Tier 1 Capital to average total assets, less goodwill and certain other intangible assets (the Leverage Ratio), of 3.0% for bank holding companies that meet certain specified criteria, including having the highest regulatory rating. All other bank holding companies generally are required to maintain a Leverage Ratio of at least 3.0%, plus an additional cushion of 100 to 200 basis points. Regions Leverage Ratio at December 31, 2007 was 6.66%. The guidelines also provide that bank holding companies experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels without significant reliance on intangible assets. Furthermore, the Federal Reserve has indicated that it will consider a tangible Tier 1 Capital leverage ratio (deducting all intangibles) and other indicators of capital strength in evaluating proposals for expansion or new activities.

A subsidiary bank is subject to substantially similar risk-based and leverage capital requirements as those applicable to Regions. Regions Bank was in compliance with applicable minimum capital requirements as of December 31, 2007. Neither Regions nor Regions Bank has been advised by any federal banking agency of any specific minimum capital ratio requirement applicable to it as of December 31, 2007.

In 2004, the Basel Committee on Banking Supervision published a new set of risk-based capital standards (Basel II) in order to update the original international capital standards that had been put in place in 1988 (Basel I). Basel II provides two approaches for setting capital standards for credit risk an internal ratings-based approach tailored to individual institutions circumstances and a standardized approach that bases risk weighting on external credit assessments to a much greater extent than permitted in the existing risk-based capital guidelines. Basel II also would set capital requirements for operational risk and refine the existing capital requirements for market risk exposures. The U.S. banking and thrift agencies are developing proposed revisions to their existing capital adequacy regulations and standards based on Basel II. In November 2007, the agencies adopted a definitive final rule for implementing Basel II in the United States that will apply only to internationally active banking organizations, or core banks (defined as those with consolidated total assets of \$250 billion or more or consolidated on-balance sheet foreign exposures of \$10 billion or more). The final rule will be effective as of April 1, 2008. Other U.S. banking organizations may elect to adopt the requirements of this rule (if they meet applicable qualification requirements), but they will not be required to comply. The rule also allows a banking organization s primary Federal supervisor to determine that application of the rule would not be appropriate in light of the bank s asset size, level of complexity, risk profile or scope of operations. In July 2007, the agencies agreed to issue a proposed rule that would provide non-core banks with the option to adopt an approach consistent with the standardized approach of Basel II. This new proposal, which is intended to be finalized before the core banks may start their first transition period year under Basel II, will replace the agencies earlier proposed amendments to existing risk-based capital guidelines to make them more risk sensitive (formerly referred to as the Basel I-A approach). Regions Bank is not required to comply with Basel II.

Failure to meet capital guidelines could subject a bank to a variety of enforcement remedies, including the termination of deposit insurance by the FDIC, and to certain restrictions on its business. See Regulatory Remedies under the FDIA below.

Support of Subsidiary Banks. Under Federal Reserve policy, Regions is expected to act as a source of financial strength to, and to commit resources to support, its subsidiary bank. This support may be required at times when, absent such Federal Reserve policy, Regions may not be inclined to provide it. In addition, any capital loans by a bank holding company to its subsidiary bank are subordinate in right of payment to deposits and to certain other indebtedness of such subsidiary bank. In the event of a bank holding company s bankruptcy, any commitment by the bank holding company to a federal bank regulatory agency to maintain the capital of a subsidiary bank will be assumed by the bankruptcy trustee and entitled to a priority of payment.

Transactions with Affiliates. There are various legal restrictions on the extent to which Regions and its non-bank subsidiaries may borrow or otherwise obtain funding from Regions Bank. Under Sections 23A and 23B of the Federal Reserve Act and the Federal Reserve s Regulation W, Regions Bank (and its subsidiaries) may only engage in lending and other covered transactions with non-bank and non-savings bank affiliates to the following extent: (a) in the case of any single such affiliate, the aggregate amount of covered transactions of Regions Bank and its subsidiaries may not exceed 10% of the capital stock and surplus of Regions Bank; and (b) in the case of all affiliates, the aggregate amount of covered transactions of Regions Bank and its subsidiaries may not exceed 20% of the capital stock and surplus of Regions Bank. Covered transactions also are subject to certain collateralization requirements. Covered transactions are defined by statute to include a loan or extension of credit, as well as a purchase of securities issued by an affiliate, a purchase of assets (unless otherwise exempted by the Federal Reserve) from the affiliate, the acceptance of securities issued by the affiliate as collateral for a loan, and the issuance of a guarantee, acceptance or letter of credit on behalf of an affiliate.

Regulatory Remedies under the FDIA. The FDIA establishes a system of regulatory remedies to resolve the problems of undercapitalized institutions. The federal banking regulators have established five capital categories (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized) and must take certain mandatory supervisory actions, and are authorized to take other discretionary actions, with respect to institutions in the three undercapitalized categories, the severity of which will depend upon the capital category in which the institution is placed. Generally, subject to a narrow

exception, the FDIA requires the banking regulator to appoint a receiver or conservator for an institution that is critically undercapitalized. The federal banking agencies have specified by regulation the relevant capital level for each category.

Under the agencies' rules implementing the FDIA's remedy provisions, an institution that (1) has a Total Capital ratio of 10.0% or greater, a Tier 1 Capital ratio of 6.0% or greater, and a Leverage Ratio of 5.0% or greater and (2) is not subject to any written agreement, order, capital directive or regulatory remedy directive issued by the appropriate federal banking agency is deemed to be well capitalized. An institution with a Total Capital ratio of 8.0% or greater, a Tier 1 Capital ratio of 4.0% or greater, and a Leverage Ratio of 4.0% or greater is considered to be adequately capitalized. A depository institution that has a Total Capital ratio of less than 8.0%, a Tier 1 Capital ratio of less than 4.0%, or a Leverage Ratio of less than 4.0% is considered to be undercapitalized. An institution that has a Total Capital ratio of less than 6.0%, a Tier 1 Capital ratio of less than 3.0%, or a Leverage Ratio of less than 3.0% is considered to be significantly undercapitalized, and an institution that has a tangible equity capital to assets ratio equal to or less than 2.0% is deemed to be critically undercapitalized. For purposes of the regulation, the term tangible equity includes core capital elements counted as Tier 1 Capital for purposes of the risk-based capital standards plus the amount of outstanding cumulative perpetual preferred stock (including related surplus), minus all intangible assets with certain exceptions. A depository institution may be deemed to be in a capitalization category that is lower than is indicated by its actual capital position if it receives an unsatisfactory examination rating.

An institution that is categorized as undercapitalized, significantly undercapitalized or critically undercapitalized is required to submit an acceptable capital restoration plan to its appropriate federal banking agency. Under the FDIA, a bank holding company must guarantee that a subsidiary depository institution meets its capital restoration plan, subject to certain limitations. The obligation of a controlling bank holding company under the FDIA to fund a capital restoration plan is limited to the lesser of 5.0% of an undercapitalized subsidiary's assets or the amount required to meet regulatory capital requirements. An undercapitalized institution is also generally prohibited from increasing its average total assets, making acquisitions, establishing any branches or engaging in any new line of business, except in accordance with an accepted capital restoration plan or with the approval of the FDIC. In addition, the appropriate federal banking agency is given authority with respect to any undercapitalized depository institution to take any of the actions it is required to or may take with respect to a significantly undercapitalized institution as described below if it determines that those actions are necessary to carry out the purpose of the FDIA.

Institutions that are significantly undercapitalized or undercapitalized and either fail to submit an acceptable capital restoration plan or fail to implement an approved capital restoration plan may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become adequately capitalized, requirements to reduce total assets and cessation of receipt of deposits from correspondent banks. Critically undercapitalized depository institutions are subject to appointment of a receiver or conservator.

At December 31, 2007, Regions Bank had the requisite capital levels to qualify as well capitalized.

FDIC Insurance Assessments. Regions Bank pays deposit insurance premiums to the FDIC based on an assessment rate established by the FDIC. In 2006, the FDIC enacted various rules to implement the provisions of the Federal Deposit Insurance Reform Act of 2005 (the FDI Reform Act). Pursuant to the FDI Reform Act, in 2006 the FDIC merged the Bank Insurance Fund with the Savings Association Insurance Fund to create a newly named Deposit Insurance Fund (the DIF) that covers both banks and savings associations. Effective January 1, 2007, the FDIC revised the risk-based premium system under which the FDIC classifies institutions based on the factors described below and generally assesses higher rates on those institutions that tend to pose greater risks to the DIF. Effective May 8, 2007, the FDIC implemented guidelines that will be used to determine how adjustments of up to 0.50% will be made to the quarterly assessment rates of insured institutions that are categorized as large Risk Category I institutions.

For most banks and savings associations, including Regions Bank, FDIC rates will depend upon a combination of CAMELS component ratings and financial ratios. CAMELS ratings reflect the applicable bank regulatory agency's evaluation of the financial institution's capital, asset quality, management, earnings, liquidity and sensitivity to risk. For large banks and savings associations that have long-term debt issuer ratings, assessment rates will depend upon such ratings and CAMELS component ratings. For institutions such as Regions Bank, which are in the lowest risk category, assessment rates will vary initially from five (5) to seven (7) basis points per \$100 of insured deposits. The FDIA, as amended by the FDI Reform Act, requires the FDIC to set a ratio of deposit insurance reserves to estimated insured deposits, the designated reserve ratio (the DRR), for a particular year within a range of 1.15% to 1.50%. For 2008, the FDIC has set the DRR at 1.25%, which is unchanged from 2007 levels. Under the FDI Reform Act and the FDIC's revised premium assessment program, every FDIC-insured institution will pay some level of deposit insurance assessments regardless of the level of the DRR. We cannot predict whether, as a result of an adverse change in economic conditions or other reasons, the FDIC will be required in the future to increase deposit insurance assessments above current levels. The FDIC has also finalized rules providing for a one-time credit assessment to each eligible insured depository institution based on the assessment base of the institution on December 31, 1996. The credit may be applied against the institution's 2007 assessment, and for the three years thereafter the institution may apply the credit against up to 90% of its assessment. Regions Bank qualified for a credit of approximately \$110 million, of which \$34 million was applied in 2007, leaving a remaining balance at year end of \$76 million to be applied over the next two years, based on the current assessment rate.

In addition, the Deposit Insurance Funds Act of 1996 authorized the Financing Corporation (FICO) to impose assessments on DIF applicable deposits in order to service the interest on FICO's bond obligations from deposit insurance fund assessments. The amount assessed on individual institutions by FICO will be in addition to the amount, if any, paid for deposit insurance according to the FDIC's risk-related assessment rate schedules. FICO assessment rates may be adjusted quarterly to reflect a change in assessment base. The FICO annual assessment rate for the fourth quarter of 2007 was 1.14 cents per \$100 deposits and will remain the same for the first quarter of 2008. Regions Bank had a FICO assessment of \$10.7 million in FDIC deposit premiums in 2007.

Under the FDIA, insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

Safety and Soundness Standards. The FDIA requires the federal bank regulatory agencies to prescribe standards, by regulations or guidelines, relating to internal controls, information systems and internal audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, asset quality, earnings, stock valuation and compensation, fees and benefits, and such other operational and managerial standards as the agencies deem appropriate. Guidelines adopted by the federal bank regulatory agencies establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth and compensation, fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risk and exposures specified in the guidelines. The guidelines prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director or principal stockholder. In addition, the agencies adopted regulations that authorize, but do not require, an agency to order an institution that has been given notice by an agency that it is not satisfying any of such safety and soundness standards to submit a compliance plan. If, after being so notified, an institution fails to submit an acceptable compliance plan or fails in any material respect to implement an acceptable compliance plan, the agency must issue an order directing action to correct the deficiency and may issue an order directing other actions of the types to which an undercapitalized institution is subject under the prompt corrective action provisions of FDIA. See Regulatory Remedies under the FDIA above. If an institution fails to comply with such an order, the agency may seek to enforce such order in judicial proceedings and to impose civil money penalties.

Depositor Preference. The Omnibus Budget Reconciliation Act of 1993 provides that deposits and certain claims for administrative expenses and employee compensation against an insured depository institution would be afforded a priority over other general unsecured claims against such an institution in the liquidation or other resolution of such an institution by any receiver.

Regulation of Morgan Keegan. As a registered investment adviser and broker-dealer, Morgan Keegan is subject to regulation and examination by the Securities and Exchange Commission (SEC), the Financial Industry Regulatory Authority (FINRA), the New York Stock Exchange (NYSE) and other self-regulatory organizations (SROs), which may affect its manner of operation and profitability. Such regulations cover a broad range of subject matter. Rules and regulations for registered broker-dealers cover such issues as: capital requirements; sales and trading practices; use of client funds and securities; the conduct of directors, officers and employees; record-keeping and recording; supervisory procedures to prevent improper trading on material non-public information; qualification and licensing of sales personnel; and limitations on the extension of credit in securities transactions. Rules and regulations for registered investment advisers include limitations on the ability of investment advisers to charge performance-based or non-refundable fees to clients, record-keeping and reporting requirements, disclosure requirements, limitations on principal transactions between an adviser or its affiliates and advisory clients, and anti-fraud standards.

Morgan Keegan is subject to the net capital requirements set forth in Rule 15c3-1 of the Securities Exchange Act of 1934. The net capital requirements measure the general financial condition and liquidity of a broker-dealer by specifying a minimum level of net capital that a broker-dealer must maintain, and by requiring that a significant portion of its assets be kept liquid. If Morgan Keegan failed to maintain its minimum required net capital, it would be required to cease executing customer transactions until it came back into compliance. This could also result in Morgan Keegan losing its FINRA membership, its registration with the SEC or require a complete liquidation.

The SEC's risk assessment rules also apply to Morgan Keegan as a registered broker-dealer. These rules require broker-dealers to maintain and preserve records and certain information, describe risk management policies and procedures, and report on the financial condition of affiliates whose financial and securities activities are reasonably likely to have a material impact on the financial and operational condition of the broker-dealer. Certain material associated persons of Morgan Keegan, as defined in the risk assessment rules, may also be subject to SEC regulation.

In addition to federal registration, state securities commissions require the registration of certain broker-dealers and investment advisers. Morgan Keegan is registered as a broker-dealer with every state, the District of Columbia, and Puerto Rico. Morgan Keegan is registered as an investment adviser in the following states: Alabama, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin and the District of Columbia.

Violations of federal, state and SRO rules or regulations may result in the revocation of broker-dealer or investment adviser licenses, imposition of censures or fines, the issuance of cease and desist orders, and the suspension or expulsion of officers and employees from the securities business firm. In addition, Morgan Keegan's business may be materially affected by new rules and regulations issued by the SEC or SROs as well as any changes in the enforcement of existing laws and rules that affect its securities business.

Regulation of Insurers and Insurance Brokers. Regions' operations in the areas of insurance brokerage and reinsurance of credit life insurance are subject to regulation and supervision by various state insurance regulatory authorities. Although the scope of regulation and form of supervision may vary from state to state, insurance laws generally grant broad discretion to regulatory authorities in adopting regulations and supervising

regulated activities. This supervision generally includes the licensing of insurance brokers and agents and the regulation of the handling of customer funds held in a fiduciary capacity. Certain of Regions' insurance company subsidiaries are subject to extensive regulatory supervision and to insurance laws and regulations requiring, among other things, maintenance of capital, record keeping, reporting and examinations.

Financial Privacy. The federal banking regulators have adopted rules that limit the ability of banks and other financial institutions to disclose non-public information about consumers to non-affiliated third parties. These limitations require disclosure of privacy policies to consumers and, in some circumstances, allow consumers to prevent disclosure of certain personal information to a non-affiliated third party. These regulations affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors.

Office of Foreign Assets Control Regulation. The United States has imposed economic sanctions that affect transactions with designated foreign countries, nationals and others. These are typically known as the OFAC rules based on their administration by the U.S. Treasury Department Office of Foreign Assets Control (OFAC). The OFAC-administered sanctions targeting countries take many different forms. Generally, however, they contain one or more of the following elements: (i) restrictions on trade with or investment in a sanctioned country, including prohibitions against direct or indirect imports from and exports to a sanctioned country and prohibitions on U.S. persons engaging in financial transactions relating to making investments in, or providing investment-related advice or assistance to, a sanctioned country; and (ii) a blocking of assets in which the government or specially designated nationals of the sanctioned country have an interest, by prohibiting transfers of property subject to U.S. jurisdiction (including property in the possession or control of U.S. persons). Blocked assets (e.g., property and bank deposits) cannot be paid out, withdrawn, set off or transferred in any manner without a license from OFAC. Failure to comply with these sanctions could have serious legal and reputational consequences.

Other. The United States Congress and state lawmaking bodies continue to consider a number of wide-ranging proposals for altering the structure, regulation and competitive relationships of the nation's financial institutions. It cannot be predicted whether or in what form further legislation may be adopted or the extent to which Regions' business may be affected thereby.

Competition

All aspects of Regions' business are highly competitive. Regions' subsidiaries compete with other financial institutions located in the states in which they operate and other adjoining states, as well as large banks in major financial centers and other financial intermediaries, such as savings and loan associations, credit unions, consumer finance companies, brokerage firms, insurance companies, investment companies, mutual funds, mortgage companies and financial service operations of major commercial and retail corporations.

Customers for banking services and other financial services offered by Regions' subsidiaries are generally influenced by convenience, quality of service, personal contacts, price of services and availability of products. Although Regions' position varies in different markets, Regions believes that its affiliates effectively compete with other financial services companies in their relevant market areas.

Employees

As of December 31, 2007, Regions and its subsidiaries had 33,161 employees.

Available Information

Regions maintains a website at www.regions.com. Regions makes available on its website free of charge its annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, and amendments to those reports which are filed with or furnished to the SEC pursuant to Section 13(a) of the Securities Exchange Act of 1934. These documents are made available on Regions' website as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. Also available on the website are Regions' (i) Corporate Governance Principles, (ii) Code of Business Conduct and Ethics, (iii) Code of Ethics for Senior Financial Officers and (iv) the charters of its Nominating and Corporate Governance Committee, Audit Committee, Compensation Committee and Risk Committee. You may also request a copy of any of these documents, at no cost, by writing or telephoning Regions at the following address:

Item 1A. Risk Factors

Making or continuing an investment in securities issued by Regions, including our common stock, involves certain risks that you should carefully consider. The risks and uncertainties described below are not the only risks that may have a material adverse effect on Regions. Additional risks and uncertainties also could adversely affect our business and our results. If any of the following risks actually occur, our business, financial condition or results of operations could be negatively affected, the market price for your securities could decline, and you could lose all or a part of your investment. Further, to the extent that any of the information contained in this Annual Report on Form 10-K constitutes forward-looking statements, the risk factors set forth below also are cautionary statements identifying important factors that could cause Regions' actual results to differ materially from those expressed in any forward-looking statements made by or on behalf of Regions.

Our success will be dependent on our ability to profitably manage our growth.

We expect to continue to expand our franchise through continued branch expansion. Our ability to manage our growth successfully will depend on our ability to maintain cost controls and asset quality while attracting additional loans and deposits on favorable terms. Although we have been able to achieve significant growth, our expansion strategy could have an adverse impact on our profitability in the short term due to the operating and other non-interest expenses associated with growth and branching. The opening of new branches requires an investment of funds that will not generate profits for a period of time, if at all.

We may need to raise additional capital in the future and such capital may not be available when needed or at all.

We may need to raise additional capital in the future to support growth or for other capital needs. Our ability to raise additional capital, if needed, will depend on, among other things, conditions in the capital markets at that time, which are outside of our control, and our financial performance. We cannot assure you that such capital will be available to us on acceptable terms or at all. If we are unable to raise additional capital on acceptable terms when needed, our ability to further expand our operations through internal growth could be limited.

Rapid and significant changes in market interest rates may adversely affect our performance.

Most of our assets and liabilities are monetary in nature and subject us to significant risks from changes in interest rates. Our profitability depends to a large extent on our net interest income, and changes in interest rates can impact our net interest income as well as the valuation of our assets and liabilities.

Our current one-year interest rate sensitivity position is moderately asset sensitive, meaning that a gradual increase in interest rates over a twelve-month horizon does not have a pronounced impact on net interest income over a twelve-month forecast horizon. However, like most financial institutions, our results of operations are affected by changes in interest rates and our ability to manage interest rate risks. Changes in market interest rates, or changes in the relationships between short-term and long-term market interest rates, or changes in the relationships between different interest rate indices, can affect the interest rates charged on interest-earning assets differently than the interest rates paid on interest-bearing liabilities. This difference could result in an increase in interest expense relative to interest income, or a decrease in our interest rate spread. For a more detailed discussion of these risks and our management strategies for these risks, see Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operation and Item 7A Quantitative and Qualitative Disclosures about Market Risk of this Form 10-K.

Our net interest margin depends on many factors that are partly or completely out of our control, including competition, federal economic monetary and fiscal policies, and general economic conditions. Despite our strategies to manage interest rate risks, changes in interest rates can still have a material adverse impact on our profitability.

The performance of our investment portfolio is subject to fluctuations due to changes in interest rates and market conditions.

Changes in interest rates can negatively affect the performance of most of our investments. Interest rate volatility can reduce unrealized gains or create unrealized losses in our portfolios. Interest rates are highly sensitive to many factors, including governmental monetary policies, domestic and international economic and political conditions, and other factors beyond our control. Fluctuations in interest rates affect our returns on, and the market value of, our investment securities.

The fair market value of the securities in our portfolio and the investment income from these securities also fluctuate depending on general economic and market conditions. In addition, actual net investment income and/or cash flows from investments that carry prepayment risk, such as mortgage-backed and other asset-backed securities, may differ from those anticipated at the time of investment as a result of interest rate fluctuations.

Changes in the policies of monetary authorities and other government action could adversely affect our profitability.

The results of operations of Regions are affected by credit policies of monetary authorities, particularly the Federal Reserve. The instruments of monetary policy employed by the Federal Reserve include open-market operations in U.S. government securities, changes in the discount rate or the federal funds rate on bank borrowings, and changes in reserve requirements against bank deposits. In view of changing conditions in the national economy and in the money markets, particularly in light of the continuing threat of terrorist attacks and the current military operations in the Middle East, we cannot predict possible future changes in interest rates, deposit levels, and loan demand on our business and earnings. Furthermore, the actions of the United States government and other governments in responding to such terrorist attacks or the military operations in the Middle East may result in currency fluctuations, exchange controls, market disruption and other adverse effects.

If we experience greater credit losses than anticipated, our earnings may be adversely affected.

As a lender, we are exposed to the risk that our customers will be unable to repay their loans according to their terms and that any collateral securing the payment of their loans may not be sufficient to assure repayment. Credit losses are inherent in the business of making loans and could have a material adverse effect on our operating results. Our credit risk with respect to our real estate and construction loan portfolio will relate principally to the creditworthiness of corporations and the value of the real estate serving as security for the repayment of loans. Our credit risk with respect to our commercial and consumer loan portfolio will relate principally to the general creditworthiness of businesses and individuals within our local markets.

We make various assumptions and judgments about the collectibility of our loan portfolio and provide an allowance for estimated credit losses based on a number of factors. We believe that our allowance for credit losses is adequate. However, if our assumptions or judgments are wrong, our allowance for credit losses may not be sufficient to cover our actual credit losses. We may have to increase our allowance in the future in response to the request of one of our primary banking regulators, to adjust for changing conditions and assumptions, or as a result of any deterioration in the quality of our loan portfolio. The actual amount of future provisions for credit losses cannot be determined at this time and may vary from the amounts of past provisions.

Further disruptions in the residential real estate market could adversely affect our performance.

As of December 31, 2007, residential homebuilder loans represented approximately 8% of our total loan portfolio. This portfolio came under stress in the fourth quarter of 2007 and, due to its weakening credit quality, we increased our loan loss provision and our total allowance for credit losses. In addition, we have implemented several measures to support the management of the residential homebuilder loan portfolio, including reassignment of experienced, key relationship managers to focus on work-out strategies for distressed borrowers.

While we expect that these actions will help mitigate the overall effects of the credit down cycle, the weakness in the homebuilder portfolio is expected to continue well into 2008. Accordingly, it is anticipated that our non-performing asset and charge-off levels will continue to increase in 2008.

Further, the effects of recent mortgage market challenges, combined with the ongoing decrease in residential real estate market prices and demand, could result in further price reductions in home values, adversely affecting the value of collateral securing the residential real estate and construction loans that we hold, as well as loan originations and gains on sale of real estate and construction loans.

Our profitability and liquidity may be affected by changes in economic conditions in the areas where our operations or loans are concentrated.

Regions' success depends to a certain extent on the general economic conditions of the geographic markets served by Regions Bank in the states of Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. The local economic conditions in these areas have a significant impact on Regions Bank's commercial, real estate and construction loans, the ability of borrowers to repay these loans and the value of the collateral securing these loans. Adverse changes in the economic conditions of these geographical areas in general or any one or more of these local markets could negatively impact the financial results of Regions' banking operations and have a negative effect on its profitability.

Our ability to achieve the benefits expected from the merger with AmSouth Bancorporation.

Regions' ability to achieve the benefits of the merger with AmSouth depend on a variety of factors, including:

Regions' ability to achieve the anticipated cost savings and revenue enhancements with respect to the acquired operations, or lower than expected revenues from continuing operations;

The assimilation of the combined companies' corporate cultures;

the continued growth of the markets that the acquired entities serve, consistent with recent historical experience;

difficulties related to the integration of the businesses.

Hurricanes and other weather-related events could cause a disruption in our operations or other consequences that could have an adverse impact on the results of operations.

A significant portion of our operations are located in the areas bordering the Gulf of Mexico and Atlantic Ocean, regions that are susceptible to hurricanes. Such weather events can cause disruption to our operations and could have a material adverse effect on our overall results of operations. We maintain hurricane insurance including coverage for lost profits and extra expense; however, there is no insurance against the loss of market that a catastrophic hurricane could produce. Further, a hurricane in any of our market areas could adversely impact the ability of borrowers to timely repay their loans and may adversely impact the value of any collateral held by us. Some of the states in which we operate are experiencing an extreme drought. The effects of the drought are difficult to predict, but could have an adverse effect on many areas of the economy.

We need to stay current on technological changes in order to compete and meet customer demands.

The financial services market, including banking services, is undergoing rapid changes with frequent introductions of new technology-driven products and services. In addition to better serving customers, the effective use of technology increases efficiency and may enable financial institutions to reduce costs. Our future success may depend, in part, on our ability to use technology to provide products and services that provide convenience to customers and to create additional efficiencies in our operations.

Industry competition may have an adverse effect on our success.

Our profitability depends on our ability to compete successfully. We operate in a highly competitive environment. Certain of our competitors are larger and have more resources than we do. In our market areas, we face competition from other commercial banks, savings and loan associations, credit unions, internet banks, finance companies, mutual funds, insurance companies, brokerage and investment banking firms, and other financial intermediaries that offer similar services. Some of our non-bank competitors are not subject to the same extensive regulations that govern Regions or Regions Bank and may have greater flexibility in competing for business.

We are subject to extensive governmental regulation, which could have an adverse impact on our operations.

The banking industry is extensively regulated and supervised under both federal and state law. We are subject to the regulation and supervision of the Federal Reserve, the FDIC, and the Superintendent of Banking of the State of Alabama. These regulations are intended primarily to protect depositors, the public and the FDIC insurance fund, and not our shareholders. These regulations govern matters ranging from the regulation of certain debt obligations, changes in the control of bank holding companies and state-chartered banks, and the maintenance of adequate capital to the general business operations and financial condition of Regions Bank, including permissible types, amounts and terms of loans and investments, to the amount of reserves against deposits, restrictions on dividends, establishment of branch offices, and the maximum interest rate that may be charged by law. Additionally, certain subsidiaries of Regions and Regions Bank, such as Morgan Keegan, are subject to regulation, supervision and examination by other regulatory authorities, such as the SEC, FINRA and state securities and insurance regulators. We are subject to changes in federal and state law, as well as regulations and governmental policies, income tax laws and accounting principles. Regulations affecting banks and other financial institutions are undergoing continuous change, and the ultimate effect of such changes cannot be predicted. Regulations and laws may be modified at any time, and new legislation may be enacted that will affect us, Regions Bank and our subsidiaries. We cannot assure you that such modifications or new laws will not adversely affect us. Our regulatory position is discussed in greater detail under Item 1 Business Supervision and Regulation of this Form 10-K.

Future issuances of additional securities could result in dilution of your ownership.
