GENERAL DESCRIPTION OF THE TRUST AND THE FUNDS

The Trust was organized as a Delaware statutory trust on December 15, 2005 and is authorized to issue multiple series or portfolios. The Trust is an open-end management investment company, registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The offering of the Trust's shares is registered under the Securities Act of 1933, as amended (the "Securities Act").

WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser") serves as the investment adviser to each Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as the investment sub-adviser to the Emerging Markets Local Debt Fund and Asia Local Debt Fund (each a "Fixed Income Fund" and together, the "Fixed Income Funds"). The Dreyfus Corporation ("Dreyfus") serves the investment sub-adviser to each of the Brazilian Real Fund, Chinese Yuan Fund, Commodity Currency Fund, Emerging Currency Fund, Euro Fund, Indian Rupee Fund, Japanese Yen Fund, New Zealand Dollar Fund and South African Rand Fund (each a "Currency Income Fund" and together, the "Currency Income Funds"). Mellon Capital and Dreyfus may each be referred to throughout this SAI as a "Sub-Adviser" and together, as the "Sub-Advisers". ALPS Distributors, Inc. ("Distributor") is the distributor of the shares of each Fund.

The Fund is an actively managed exchange-traded fund ("ETF"). Each Fund issues and redeems shares at net asset value per share ("NAV") only in large blocks of shares ("Creation Units"). Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. These transactions are usually in exchange for a basket of securities and an amount of cash. As a practical matter, only institutions or large investors purchase or redeem Creation Units. Except when aggregated in Creation Units, shares of each Fund are not redeemable securities.

Shares of each Fund are listed on a national securities exchange, such as the NYSE Arca (the "Listing Exchange"), and trade throughout the day on the Listing Exchange and other secondary markets at market prices that may differ from NAV. As in the case of other publicly traded securities, brokers' commissions on transactions will be based on negotiated commission rates at customary levels.

The Trust reserves the right to adjust the prices of shares in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the applicable Fund.

WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Dreyfus is a registered mark of The Dreyfus Corporation and has been licensed for use by the Trust.

INVESTMENT STRATEGIES AND RISKS

The investment objectives and general investment policies of each Fund are described in each Fund's Prospectus. Additional information concerning the Funds is set forth below. Portfolio turnover rates for each Fund are disclosed in each Fund's Prospectus. There has been no significant variation in the portfolio turnover rates of any Fund over the two fiscal years ended August 31, 2009 and August 31, 2010. With respect to each Fund's investments, unless otherwise noted, if a percentage limitation on investment is adhered to at the time of investment or contract, a subsequent increase or decrease as a result of market movement or redemption will not result in a violation of such investment limitation.

PRINCIPAL INVESTMENT STRATEGIES

Fixed Income Funds

Emerging Markets Local Debt Fund

The Emerging Markets Local Debt Fund seeks to provide a high level of total return through investment in Local Debt denominated in the currencies of emerging market countries. Under normal circumstances, the Fund will invest at least 80% of its assets in Local Debt. For these purposes, Local Debt includes fixed income securities, such as bonds, notes or other debt obligations, of emerging market issuers that are denominated in a currency other than the U.S. dollar, as well as certain derivatives and other instruments described herein. The Fund may invest in inflation-linked swaps. An inflation-linked swap is an agreement between two other parties to exchange payments at a future date based on the difference between a fixed payment and a payment linked to the inflation rate at a future date. The Fund may invest in debt securities linked to inflation rates outside the U.S., including securities or instruments linked to rates in emerging market countries.

The Fund is designed to provide exposure to Local Debt of issuers from a broad range of emerging market regions and countries. The Fund intends to invest in fixed income securities issued by emerging market governments, government agencies, and corporations. The Fund also may invest in fixed income securities denominated in an emerging market currency and issued by supranational organizations, such as the European Investment Bank, International Bank for Reconstruction and Development, International Finance Corporation, or other regional development banks.

The Fund intends to provide exposure across several geographic regions and countries. In general, emerging market countries are characterized by developing commercial and financial infrastructure with significant potential for economic growth and increased capital market participation by foreign investors. The Adviser and Sub-Adviser look at a variety of commonly used factors when determining whether a country is an emerging market. In general, the Adviser and Sub-Adviser consider a country to be an emerging market if:

- (1) it is either (a) classified by the World Bank in the lower middle or upper middle income designation for one of the past 3 years (*i.e.*, per capita gross national product of less than U.S. \$9,385), or (b) classified by the World Bank as high income in each of the last three years, but with a currency that has been primarily traded on a non-delivered basis by offshore investors (*e.g.*, Korea and Taiwan);
- (2) the country's debt market is considered relatively accessible by foreign investors in terms of capital flow and settlement considerations; and
- (3) the country has issued the equivalent of \$5 billion in local currency sovereign debt.

The criteria used to evaluate whether a country is an emerging market will change from time to time based on economic and other events.

The Fund intends to invest in Local Debt from the following regions: Asia, Latin America, Eastern Europe, Africa and the Middle East. Within these regions, the Fund is likely to invest in countries such as: Brazil, Chile, Colombia, Hungary, Indonesia, Malaysia, Mexico, Peru, Philippines, Poland, Russia, South Africa, South Korea, Thailand and Turkey. This list may change based on market developments. As a general matter, and subject to the investment guideline to provide exposure across geographic regions and countries, the Fund generally will invest a higher percentage of its assets in countries with larger and more liquid debt markets. The Fund's exposure to any single country generally will be limited to 20% of the Fund's net assets. The percentage of Fund assets invested in a specific region, country or issuer will change from time to time.

The universe of emerging markets local currency debt currently includes securities that are rated investment grade as well as non-investment grade. The Fund intends to provide a broad-based exposure to emerging market debt and therefore will invest in both investment-grade and non-investment-grade securities. Securities rated investment grade generally are considered to be of higher credit quality and subject to lower default risk. Although securities rated below investment grade may offer the potential for higher yields, they generally are subject to higher potential risk of loss. The Fund generally does not expect to have more than 35% of its net assets invested in securities rated below investment grade. However, this may change from time to time based on market conditions and the condition of specific issuers and securities.

The Fund attempts to limit interest rate risk by maintaining an aggregate portfolio duration of between two and seven years under normal market conditions. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. An aggregate portfolio duration between two and seven years would generally be considered to be intermediate. The Fund's actual portfolio duration may be longer or shorter depending upon market conditions. The Fund may also invest in short-term U.S. money market securities and forward currency contracts and swaps designed to provide exposure to securities denominated in the currencies in which the Fund invests.

For purposes of the Fund's 80% investment policy described above, Local Debt includes investments in derivatives such as forward contracts, currency swaps, interest rate swaps and total return swaps and credit linked notes. The Fund's use of forward contracts and currency, interest rate and total return swaps will be underpinned by investments in short-term, high-quality U.S. money market securities and is designed to provide exposure similar to investments in local currency debt. A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets. A currency swap is an agreement between two parties to exchange one currency for another at a future rate. An interest rate swap involves the exchange of a floating interest rate payment for a fixed interest payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. The Fund generally will not invest more than 5% of its assets in credit linked notes. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity. Local Debt includes fixed income securities that are denominated in a non-U.S. currency and settled in U.S. dollars. Local Debt also includes fixed income securities denominated in an emerging market currency and issued by supranational organizations, international agencies and non-U.S. governments and agencies and regional development banks. Assets not invested in Local Debt generally will be invested in investment-grade U.S. government securities and money market instruments. The Fund generally will not invest more than 30% of the value of its assets in or through derivative transactions. The Fund generally will not invest more than 20% of its assets in debt instruments denominated in U.S. dollars and issued by emerging market governments, government agencies, corporations, supranational issuers and regional development banks (or derivatives based on such instruments). Under normal market conditions, the Fund generally will not invest more than 20% of its assets in corporate bonds (or derivatives based on such bonds). The Fund's investment in corporate bonds generally will be limited to bonds with \$200 million or more par value outstanding and a significant volume traded (as determined by the Fund). The Fund may invest up to 5% of its assets in corporate bonds with less than \$200 million par amount outstanding only if such bonds are sufficiently liquid (as determined by the Fund).

Asia Local Debt Fund

The Asia Local Debt Fund seeks a high level of total return consisting of both income and capital appreciation. The Fund seeks to achieve its investment objective through investment in Local Debt denominated in the currencies of a broad range of Asian countries. Under normal circumstances, the Fund will invest at least 80% of its net assets in Local Debt. For these purposes, Local Debt includes fixed income securities, such as bonds, notes or other debt obligations, denominated in local currencies of countries in Asia, as well as certain derivatives and other instruments described herein.

The Fund intends to focus its investments on bonds and other debt instruments issued by governments, government agencies and instrumentalities, and government sponsored enterprises. The Fund also may invest in Local Debt issued by supranational organizations such as the European Investment Bank, Asian Development Bank, International Bank for Reconstruction and Development or International Finance Corporation, and development agencies supported by other national governments. The Fund may invest in corporate bonds economically tied to Asian countries. The Fund also may invest in inflation-linked fixed income securities denominated in Asian currencies.

The Fund intends to provide exposure to the developing/emerging market economies in Asia. Specifically, the Fund intends to invest in Local Debt primarily from South Korea, Indonesia, Malaysia, Singapore, Hong Kong, China, India, Thailand, Philippines, and Taiwan. The Fund is permitted to invest in developed market economies, such as Australia and

New Zealand. This list may change based on market developments. As a general matter, and subject to the investment guideline to provide exposure across geographic regions and countries, the Fund generally will invest a higher percentage of its assets in countries with larger and more liquid debt markets. The Fund's exposure to any single country generally will be limited to 20% of the Fund's assets. The percentage of Fund assets invested in a specific region, country or issuer will change from time to time.

The universe of Local Debt currently includes securities that are rated investment grade as well as non-investment grade. The Fund intends to provide a broad-based exposure to Local Debt and therefore will invest in both investment-grade and non-investment-grade securities. Securities rated investment grade generally are considered to be of higher credit quality and subject to lower default risk. Although securities rated below investment grade may offer the potential for higher yields, they generally are subject to a higher potential risk of loss.

The Fund attempts to limit interest rate risk by maintaining an aggregate portfolio duration of between two and eight years under normal market conditions. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. An aggregate portfolio duration of between two and eight years generally would be considered intermediate. The Fund's actual portfolio duration may be longer or shorter depending on market conditions. The Fund may also invest in short-term money market securities denominated in the currencies of countries in which the Fund invests. For purposes of the 80% investment policy described above, Local Debt includes investments in derivatives tied economically to Asia such as forward currency contracts, interest rate swaps, inflation-linked swaps, total return swaps and credit linked notes. The Fund's use of forward contracts and swaps will be underpinned by investments in short-term, high-quality U.S. money market securities and is designed to provide exposure similar to investments in local currency debt. A forward contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or rate, but also may be a single asset, a pool of assets or an index of assets. A currency swap is an agreement between two parties to exchange one currency for another at agreed upon intervals and/or rates. An interest rate swap typically involves the exchange of one interest rate payment for another, such as a floating interest rate payment for a fixed payment. An inflation-linked swap is an agreement between two parties to exchange payments at a future date based on the difference between a fixed payment and a payment linked to the inflation rate at a future date. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. Swap transactions may be settled in U.S. dollars or Asian currencies. A repurchase agreement is when a fund purchases securities or other obligations from a bank or securities dealer and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand. Repurchase agreements are designed to result in a fixed rate of return for the Fund insulated from market fluctuations during the holding period. A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. The Fund may invest in interest rate and other futures contracts listed for trading on exchanges in Asia. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity. The Fund may invest up to 20% of its assets in debt instruments denominated in U.S. dollars issued by Asian governments and government sponsored enterprises.

The decision to secure exposure through direct investment in bonds or indirectly through derivative transactions will be a function of, among other things, market accessibility, credit exposure, tax ramifications and regulatory requirements applicable to U.S. investment companies. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days prior notice of any change to this policy for the Fund. In addition, under normal circumstances, the Fund will invest at least 70% of its assets in Fixed Income Securities. Fixed Income Securities include debt instruments, such as bonds, notes and other obligations, denominated in Asian currencies or U.S. dollars; Fixed Income Securities do not include derivatives.

The Fund generally will not invest more than 30% of the value of its assets in or through derivative transactions. The Fund generally will not invest more than 20% of its assets in debt instruments denominated in U.S. dollars and issued by emerging market governments, government agencies, corporations, supranational issuers and regional development banks (or derivatives based on such instruments). Under normal market conditions, the Fund generally will not invest more than 20% of its assets in corporate bonds (or derivatives based on such bonds). The Fund will invest only in corporate bonds that the Adviser or Sub-Adviser deems to be sufficiently liquid. The Fund's investment in corporate bonds generally will be limited to bonds with \$200 million or more par value outstanding and a significant volume traded (as determined by the Fund). The Fund may invest up to 5% of its assets in corporate bonds with less than \$200 million par amount outstanding only if such bonds are sufficiently liquid (as determined by the Fund).

Currency Income Funds

Each of the *Euro Fund* and *Japanese Yen Fund* (i) seeks to earn current income reflective of money market rates available to foreign investors in the specified country or region, and (ii) seeks to maintain liquidity and preserve capital measured in the currency of the specified country or region. Each of these Funds intends to invest primarily in very short-term, investment-grade money market securities denominated in the non-U.S. currency specified in its name. Eligible investments include short-term securities issued by non-U.S. governments, agencies or instrumentalities, bank debt obligations and time deposits, bankers' acceptances, commercial paper, short-term corporate debt obligations and mortgage-backed and asset-backed securities.

Each of the *Brazilian Real Fund*, *Chinese Yuan Fund*, *Indian Rupee Fund*, *New Zealand Dollar Fund*, and *South African Rand Fund* seeks (i) to achieve total returns reflective of money market rates available to foreign investors in the specified countries or regions, and (ii) to provide exposure to changes in the value of a designated non-U.S. currency (or currencies) relative to the U.S. dollar. Because the market for money market securities in these countries generally is less liquid and accessible to foreign investors than corresponding markets in more developed economies, each of these Funds intends to achieve exposure to the non-U.S. market designated by its name by investing primarily in short-term U.S. money market securities and forward currency contracts and currency swaps. The combination of U.S. money market securities with forward currency contracts and currency swaps is designed to provide exposure equivalent to money market securities denominated in a non-U.S. currency. A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A currency swap is an agreement between two parties to exchange one currency for another at a future rate.

The *Commodity Currency Fund* seeks exposure to the money market rates and currencies of selected commodity-producing countries. The term commodity currency generally is used to describe the currency of a country whose economic success is commonly identified with the production and export of commodities (such as precious metals, oil, agricultural products or other raw materials) and whose value is closely linked to the value of such commodities. As the demand for, or price of, such commodities increases, money tends to flow into the country. This generally lifts the country's economic prospects and supports the value of its currency. For example, Canada is commonly recognized as a leading producer and exporter of oil and natural gas. Increases in the price of oil and gas historically have had a positive influence on the value of the Canadian dollar relative to other currencies. Similarly, a significant portion of the economies of Australia and South Africa are tied to mining and production of industrial and precious metals, such as iron ore and gold. Increases in the prices of such metals historically have provided support to the value of the Australian dollar and South African rand relative to other currencies. Conversely, declines in the demand for, or value of, such commodities historically have contributed to declines in the relative value of these countries' currencies. The Fund is designed to provide exposure to both the currencies and money market rates available to foreign investors in selected commodity-producing countries. The Fund intends to invest in commodity-producing countries such as Australia, Brazil, Canada, Chile, Colombia, Indonesia, Malaysia, New Zealand, Norway, Peru, Russia, and South Africa. This list may change based on market developments. In addition to seeking broad exposure across countries and currencies, the Fund intends to seek exposure across currencies correlated to each of the key commodity groups: industrial metals, precious metals, energy, agriculture and livestock. The Fund generally will invest only in currencies that float relative to other currencies. The value of a floating currency is largely determined by supply and demand and prevailing market rates. In contrast, the value of a fixed currency generally is set by a government or central bank at an official exchange rate. The Fund generally

does not intend to invest in the currencies of notable commodity producers, such as China, Saudi Arabia and the United Arab Emirates, since they are fixed or otherwise closely linked to the U.S. dollar. The Fund will only invest in currencies that it deems to be sufficiently liquid and accessible.

Because the market for money market securities in some of the countries above may be less liquid and accessible to foreign investors than corresponding markets in more developed economies, the Fund intends to achieve exposure to selected commodity-producing countries available to U.S. investors by investing primarily in short-term U.S. money market securities and forward currency contracts and currency swaps. The combination of money market securities with forward currency contracts and currency swaps is designed to create a position economically similar to a money market instrument denominated in a non-U.S. currency. A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A currency swap is an agreement between two parties to exchange one currency for another at a future rate.

The ***Emerging Currency Fund*** seeks to invest in short-term securities and instruments designed to provide exposure to the currencies and money market rates of selected emerging market countries. The Fund seeks to provide exposure to currencies and money market rates from emerging and developing economies in three regions of the world: (i) Asia, (ii) Latin America and (iii) Europe, the Middle East and Africa. The Fund intends to invest in markets such as: Brazil, Chile, China, the Czech Republic, Hungary, India, Indonesia, Israel, Malaysia, Mexico, Philippines, Poland, Russia, Slovakia, South Africa, South Korea, Taiwan, Thailand, and Turkey. This list may change based on market developments. The Fund attempts to achieve exposure to the most liquid currencies within each of the three broad regions, while at the same time maintaining geographic and economic diversity across these regions. The specific set of currencies is selected on the annual assessment date each year (typically in July) and generally remains the same throughout the year. The selected currencies are equally weighted in terms of U.S. dollar value at the annual assessment date. The Fund is rebalanced quarterly in order to maintain this equal weighting. In order to maintain geographic diversity, the Fund's exposure to each of the three broad geographic regions is limited to 45% of its total asset value on the annual assessment date and at each quarterly rebalancing. More frequent rebalancings may occur in response to significant market events. A significant event might include, for example, market conditions that significantly disrupt liquidity or result in the reclassification of a currency (from emerging to developed, for example). Currencies that generally would be considered liquid may be ineligible for investment or dropped from the Fund as a result of government action or other market events if WisdomTree Asset Management believes doing so would be in the best interest of the Fund.

Because the market for money market securities in the selected emerging markets generally is less liquid and accessible to foreign investors than corresponding markets in more developed countries, the Fund intends to achieve exposure to these markets by investing primarily in short-term U.S. money market securities and forward currency contracts and swaps of the constituent currencies. The combination of U.S. money market securities with forward currency contracts and currency swaps is designed to create a position economically similar to a money market security denominated in each of the selected currencies. In aggregate, the Fund's investments should create exposure that is economically similar to a basket of money market securities denominated in each of the selected currencies. A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A currency swap is an agreement between two parties to exchange one currency for another at a future rate.

Weighted Average Portfolio Maturity. In order to reduce interest rate risk, each Currency Income Fund (with the exception of the Euro Fund and the Japanese Yen Fund) generally expects to maintain an average weighted portfolio maturity of 90 days or less (60 days or less for the Euro Fund and Japanese Yen Fund) with respect to the money market securities in their respective portfolios. This may change from time to time. The average weighted portfolio maturity of a Fund is the average of all the current maturities of the individual securities in the Fund's portfolio adjusted by the dollar amount of such securities held by the Fund. Average portfolio maturity is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with longer average portfolio maturities generally are subject to greater interest rate risk. Each Currency Income Fund may engage in forward currency contracts and swap transactions. The use of such contracts and transactions may extend the weighted average maturity of such Fund's entire portfolio beyond 90 days. In particular, the Chinese Yuan Fund currently intends to invest in forward currency contracts and swaps, generally with a weighted average term of up to six months. Such transactions increase a Fund's exposure to interest rate risk.

All Funds

As a matter of general policy, each Fund will invest under normal circumstances at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in investments whose combined performances are tied economically to the particular country, geographic region or basket of currencies suggested by the Fund's name. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with 60 days' prior notice of any change to this policy for the Fund. A Fund's investment in derivatives will be included in its net assets when determining whether a Fund satisfies the 80% test described above.

All U.S. money market securities acquired by the Funds will be rated in the upper two short-term ratings by at least two NRSROs or, if unrated, deemed to be of equivalent quality. A First Tier security is (i) a rated security that has received a short-term rating from the NRSROs in the highest short-term rating category for debt obligations (within which there may be sub-categories or gradations indicating relative standing); (ii) an unrated security that is of comparable quality to a security, as determined by the Fund's board of directors; (iii) a security issued by a registered investment company that is a money market fund; or (iv) a security issued by the U.S. government or any of its agencies or instrumentalities. A Second Tier security is a rated security that has received a short-term rating other than a first tier rating from an NRSRO for debt obligations (within which there may be sub-categories or gradations indicating relative standing) or is an unrated security that is of comparable quality. Each Fund intends to limit its overall exposure to Second Tier money market securities to 5% of total assets. Any security originally issued as a long-term obligation will be rated A or higher (or the equivalent) at the time of purchase by at least two NRSROs or, if unrated, deemed to be of equivalent quality.

Each Fund intends to qualify each year as a regulated investment company (a "RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), so that it will not be subject to federal income tax on income and gains that are timely distributed to Fund shareholders. Each Fund will invest its assets, and otherwise conduct its operations, in a manner that is intended to satisfy the qualifying income, diversification and distribution requirements necessary to establish and maintain RIC qualification under Subchapter M.

In addition to satisfying the above-referenced RIC diversification requirements, no portfolio security held by a Fund (other than U.S. government securities and non-U.S. government securities) will represent more than 30% of the weight of a Fund and the five highest weighted portfolio securities of a Fund (other than U.S. government securities and/or non-U.S. government securities) will not in the aggregate account for more than 65% of the weight of a Fund. For these purposes, a Fund may treat repurchase agreements collateralized by U.S. government securities or non-U.S. government securities as U.S. or non-U.S. government securities, as applicable.

Each Fund is considered non-diversified, as such term is used in the 1940 Act.

GENERAL RISKS

An investment in a Fund should be made with an understanding that the value of a Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular security or issuer and changes in general economic or political conditions. Fund shares may trade above or below their net asset value.

An investor in a Fund could lose money over short or even long periods of time. Although each Currency Income Fund invests in short-term U.S. and/or non-U.S. money market securities, the Currency Income Funds do not seek to maintain a constant NAV and are not traditional money market funds. Each Fixed Income Fund also invests in intermediate and long-term U.S. and/or non-U.S. money market securities. The price of the securities held by the Funds, and thus the value of a Fund's portfolio, is expected to fluctuate in accordance with general economic conditions, interest rates, political events and other factors. An investment in a Fund should also be made with an understanding of the risks inherent in an investment in money market and fixed income securities. The value of money market and fixed income securities, and the value of an investment in a Fund, may change in response to changes in interest rates and other factors. Generally, if U.S. interest rates rise, then the value of a U.S. money market and fixed income security is expected to decrease. Similarly, if non-U.S. interest rates rise, the value of a money market and fixed income security denominated in that non-U.S. currency would also be expected to decrease. In general, securities with longer maturities, such as those held by the Fixed Income Funds, are more vulnerable to interest rate changes.

Investor perceptions may also impact the value of Fund investments and the value of an investment in Fund shares. These investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic or banking crises. Issuer-specific conditions may also affect the value of a Fund investment. The financial condition of an issuer of a fixed income or money market security may cause it to default or become unable to pay interest or principal due on the security. A Fund cannot collect interest and principal payments on a security if the issuer defaults. Accordingly, the value of an investment in a Fund may change in response to issuer defaults and changes in the credit ratings of the Fund's portfolio securities.

Events in the financial sector have resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Both domestic and foreign fixed income and equity markets have been experiencing extreme volatility and turmoil. Issuers that have exposure to the real estate, mortgage and credit markets have been particularly affected and well-known financial institutions have experienced significant liquidity and other problems. Some of these institutions have declared bankruptcy or defaulted on their debt. It is uncertain whether or for how long these conditions will continue. These events and possible continuing market turbulence may have an adverse effect on Fund performance.

Although the Funds attempt to invest in liquid securities and instruments, there can be no guarantees that a liquid market for such securities and instruments will be maintained. The price at which securities may be sold and the value of a Fund's shares will be adversely affected if trading markets for a Fund's portfolio holdings are limited.

Authorized Participants should refer to the section herein entitled "Creation and Redemption of Creation Unit Aggregations" for additional information that may impact them.

BORROWING. Although the Funds do not intend to borrow money, each Fund may do so to the extent permitted by the 1940 Act. Under the 1940 Act, a fund may borrow up to 33% of its net assets. The Funds will borrow only for short-term or emergency purposes.

Borrowing will tend to exaggerate the effect on net asset value of any increase or decrease in the market value of a Fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by earnings on the securities purchased. A Fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

CAPITAL CONTROL RISK. Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to government intervention and the imposition of capital controls. Countries use these controls to restrict volatile movements of capital entering (inflows) and exiting (outflows) their country to respond to certain economic conditions. Such controls are mainly applied to short-term capital transactions to counter speculative flows that threaten to undermine the stability of the exchange rate and deplete foreign exchange reserves. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets. Levies may be placed on profits repatriated by foreign entities (such as the Funds). Capital controls may impact the ability of a Fund to create and redeem Creation Units, adversely affect the trading market for shares of the Fund, and cause a Fund to trade at prices materially different from its NAV. A Fund may change its creation or redemption procedures without notice in response to the imposition of capital controls. There can be no assurance a country in which a Fund invests will not impose a form of capital control to the possible detriment of a Fund and its shareholders.

CURRENCY EXCHANGE RATE RISK. Investments denominated in non-U.S. currencies and investments in securities that provide exposure to such currencies, currency exchange rates or interest rates are subject to non-U.S. currency risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of a Fund's investment and the value of your Fund shares. Because each Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar.

The value of the U.S. dollar against other currencies is influenced by a variety of factors. These factors include national debt levels and trade deficits, changes in balances of payments and trade, domestic and foreign interest and inflation rates, global or regional political, economic or financial events, monetary policies of governments, actual or potential government intervention, and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates.

Currencies of developing market countries may be subject to significantly greater risks than currencies of developed countries. Many developing market countries have experienced steady declines or even sudden devaluations of their currencies relative to the U.S. dollar. Some non-U.S. market currencies may not be traded internationally, may be subject to strict limitations on foreign investment and may be subject to frequent and unannounced government intervention. Government intervention and currency controls can decrease the value and significantly increase the volatility of an investment in non-U.S. currency. Although the currencies of some developing market countries may be convertible into U.S. dollars, the achievable rates may differ from those experienced by domestic investors because of foreign investment restrictions, withholding taxes, lack of liquidity or other reasons.

FOREIGN SECURITIES RISK. Each Fund invests a significant portion of its assets in non-U.S. securities and instruments, or in instruments that provide exposure to such securities and instruments. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks (including restrictions on the transfers of securities). With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Since foreign exchanges may be open on days when a Fund does not price its shares, the value of the securities in a Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's shares. Conversely, Fund shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in a Fund more volatile and potentially less liquid than other types of investments. In addition, a Fund may change its creation or

redemption procedures without notice in connection with restrictions on the transfer of securities. For more information on creation and redemption procedures, see [Creation and Redemption of Creation Unit Aggregations](#) herein.

HIGH YIELD RISK. Each Fixed Income Fund may invest a limited portion of its assets in securities rated lower than Baa by Moody's, or equivalently rated by S&P or Fitch. Such securities are sometimes referred to as high yield securities or junk bonds. Investing in these securities involves special risks in addition to the risks associated with investments in higher-rated fixed income securities. While offering a greater potential for capital appreciation and higher yields, high yield securities typically entail higher price volatility and may be less liquid than securities with higher ratings. High yield securities may be regarded as predominately speculative with respect to the issuer's continuing ability to meet principal and interest payments. Issuers of securities in default may fail to resume principal or interest payments, in which case the Funds may lose their entire investment.

LACK OF DIVERSIFICATION. Although each Fund intends to invest in a variety of securities and instruments, the Funds are considered non-diversified as such term is used in the 1940 Act. Each Fund is considered to be non-diversified and is not limited by the 1940 Act with regard to the percentage of its assets that may be invested in the securities of a single issuer. As a result, each of the Funds may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were classified as a diversified fund. Therefore, each Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a small number of issuers than a fund that invests more widely, which may have a greater impact on the Fund's volatility and performance.

However, each Fund will maintain the level of diversification necessary to qualify as a RIC under Subchapter M of the Code. The Subchapter M diversification tests generally require that (i) a Fund invest no more than 25% of its total assets in securities (other than securities of the U.S. government or other RICs) of any one issuer or two or more issuers that are controlled by a Fund and that are engaged in the same, similar or related trades or businesses, and (ii) at least 50% of a Fund's total assets consist of cash and cash items, U.S. government securities, securities of other RICs and other securities, with investments in such other securities limited in respect of any one issuer to an amount not greater than 5% of the value of the Fund's total assets and 10% of the outstanding voting securities of such issuer. These tax requirements are generally applied at the end of each quarter of a Fund's taxable year.

TAX RISK. To qualify for the favorable U.S. federal income tax treatment accorded to RICs, a Fund must, among other things, derive in each taxable year at least 90% of its gross income from certain prescribed sources. The U.S. Treasury Department has authority to issue regulations that would exclude foreign currency gains from qualifying income if such gains are not directly related to a Fund's business of investing in stock or securities. Accordingly, regulations may be issued in the future that could treat some or all of a Fund's foreign currency gains as non-qualifying income, which might jeopardize the Fund's status as a RIC for all years to which the regulations are applicable. If for any taxable year a Fund does not qualify as a RIC, all of its taxable income (including its net capital gain) for that year would be subject to tax at regular corporate rates without any deduction for distributions to shareholders, and such distributions would be taxable to shareholders as dividend income to the extent of the Fund's current and accumulated earnings and profits.

A discussion of some of the other risks associated with an investment in a Fund is contained in each Fund's Prospectus.

SPECIFIC INVESTMENT STRATEGIES

A description of certain investment strategies and types of investments used by some or all of the Funds is set forth below.

U.S. GOVERNMENT SECURITIES. Each Fund may purchase short-term obligations issued or guaranteed by the U.S. Treasury or the agencies or instrumentalities of the U.S. government. Each Fixed Income Fund may also purchase intermediate and long-term obligations issued or guaranteed by the U.S. Treasury or the agencies or instrumentalities of the U.S. government. U.S. government securities are obligations of, or guaranteed by, the U.S. government, its agencies or government-sponsored enterprises. U.S. government securities are subject to market and interest rate risk, and may be subject to varying degrees of credit risk. U.S. government securities include inflation-indexed fixed income securities, such as U.S. Treasury Inflation Protected Securities (TIPS). U.S. government securities include zero coupon securities, which tend to be subject to greater market risk than interest-paying securities of similar maturities.

NON-U.S. GOVERNMENT SECURITIES. Each Fund may invest in short-term securities issued or guaranteed by non-U.S. governments, agencies and instrumentalities. The Emerging Markets Local Debt Fund may also purchase intermediate and long-term obligations issued or guaranteed by non-U.S. governments, agencies and instrumentalities. Non-U.S. government securities include direct obligations, as well as obligations guaranteed by a foreign government. These guarantees do not guarantee the market value of the obligations, which can increase or decrease in value. Non-U.S. government securities may be denominated in U.S. dollars or in the currency of the issuing country.

SUPRANATIONAL SECURITIES. Each Fund, in particular the Emerging Markets Local Debt Fund, may invest in securities issued by supranational entities. A supranational entity is formed by two or more central governments to promote economic development for the member countries. Supranational entities finance their activities by issuing bond debt and are usually considered part of the sub-sovereign debt market. Some well-known examples of supranational entities are the World Bank, International Monetary Fund, European Investment Bank, Asian Development Bank, Inter-American Development Bank and other regional multilateral development banks. These securities are subject to varying degrees of credit risk and interest rate risk.

BANK DEPOSITS AND OBLIGATIONS. Each Fund may invest in deposits and other obligations of U.S. and non-U.S. banks and financial institutions. Deposits and obligations of banks and financial institutions include certificates of deposit, time deposits, and bankers' acceptances. Certificates of deposit and time deposits represent an institution's obligation to repay funds deposited with it that earn a specified interest rate. Certificates of deposit are negotiable certificates, while time deposits are non-negotiable deposits. A banker's acceptance is a time draft drawn on and accepted by a bank that becomes a primary and unconditional liability of the bank upon acceptance. Investments in obligations of non-U.S. banks and financial institutions may involve risks that are different from investments in obligations of U.S. banks. These risks include future unfavorable political and economic developments, seizure or nationalization of foreign deposits, currency controls, interest limitations or other governmental restrictions that might affect the payment of principal or interest on the securities held in the Fund.

COMMERCIAL PAPER. Commercial paper is an unsecured short-term promissory note with a fixed maturity of no more than 270 days issued by corporations, generally to finance short-term business needs. The commercial paper purchased by the Currency Income Funds generally will be rated in the upper two short-term ratings by at least two NRSROs or, if unrated, deemed to be of equivalent quality by the Adviser or the Sub-Adviser.

If a security satisfies the rating requirement upon initial purchase and is subsequently downgraded, a Fund is not required to dispose of the security. In the event of such an occurrence, the Adviser or the Sub-Adviser will determine what action, including potential sale, is in the best interest of the Fund.

Commercial paper issues in which each Fund may invest include securities issued by corporations without registration under the Securities Act in reliance on the exemption from such registration afforded by Section 3(a)(3) thereof, and commercial paper issued in reliance on the so-called "private placement" exemption from registration, which is afforded by Section 4(2) of the Securities Act ("Section 4(2) paper"). Section 4(2) paper is restricted as to disposition under the federal securities laws in that any resale must similarly be made in an exempt transaction. Section 4(2) paper is normally resold to other institutional investors through or with the assistance of investment dealers who make a market in Section 4(2) paper, thus providing liquidity.

CORPORATE DEBT OBLIGATIONS. The Currency Income Funds may invest in corporate debt obligations with less than 397 calendar days remaining to maturity. The Fixed Income Funds may invest in both short- and long-term corporate debt obligations. Corporate debt obligations are interest bearing securities in which the corporate issuer has a contractual obligation to pay interest at a stated rate on specific dates and to repay principal periodically or on a specified maturity date. The Currency Income Funds will be limited to obligations rated at the time of purchase in the top three long-term rating categories by at least one NRSRO. The Fixed Income Funds may invest in both rated and unrated debt, subject to the credit quality restrictions set forth in the description of the Funds' Principal Investment Strategies herein. If a security satisfies the rating requirement upon initial purchase and is subsequently downgraded, a Fund is not required to dispose of the security. In the event of such an occurrence, WisdomTree Asset Management or the Sub-Adviser will determine what action, including potential sale, is in the best interest of the Fund.

FLOATING AND ADJUSTABLE RATE NOTES. Each Fund may purchase floating rate and adjustable rate obligations, such as demand notes, bonds, and commercial paper. These securities may bear interest at a rate that resets based on standard money market indices or are remarketed at current market rates. They may permit the holder to demand payment of principal at any time or at specified intervals not exceeding 397 days. The issuer of such obligations may also have the right to prepay, in its discretion, the principal amount of the obligations plus any accrued interest. The reset date of securities held by each Fund may not be longer than 397 days (and therefore would be considered to be within each Fund's general maturity restriction of 397 days). Given that most floating rate securities reset their interest rates prior to their final maturity date, each Fund uses the period to the next reset date to calculate the securities contribution to the average portfolio maturity of the Fund.

MORTGAGE-BACKED AND ASSET-BACKED SECURITIES. Each Currency Income Fund may invest in mortgage-backed and asset-backed securities. Mortgage-backed securities are secured (or backed) by pools of commercial or residential mortgages. Asset-backed securities are secured (or backed) by other types of assets, such as automobile loans, installment sale contracts, credit card receivables or other similar assets. Mortgage-backed and asset-backed securities are issued by entities such as Ginnie Mae, Fannie Mae, the Federal Home Loan Mortgage Corporation, commercial banks, trusts, special purpose entities, finance companies, finance subsidiaries of industrial companies, savings and loan associations, mortgage banks and investment banks.

Investing in mortgage-backed and asset-backed securities is subject to credit risk and interest rate risk. They are also subject to the risk of prepayment, which can change the nature and extent of the Fund's interest rate risk. The market for mortgage-backed securities may not be liquid under all interest rate scenarios, which may prevent the Fund from selling such securities held in its portfolio at times or prices that it desires.

DERIVATIVES. Each Fund may use derivative instruments as part of its investment strategies. The Brazilian Real Fund, Chinese Yuan Fund, Commodity Currency Fund, Emerging Currency Fund, Indian Rupee Fund, New Zealand Dollar Fund, South African Rand Fund, and Fixed Income Funds will likely have a greater portion of their assets invested through derivative instruments than the other Funds. The Euro Fund and Japanese Yen Fund do not intend to use derivatives to a significant extent, though they reserve the right to do so.

Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to bonds, interest rates, currencies, commodities, and related indexes. Examples of derivative instruments include forward currency contracts, non-deliverable forward currency contracts, currency, interest rate and total return swaps, currency options, futures contracts, options on futures contracts, swap agreements and credit linked notes. A Fund's use of derivative instruments (other than credit linked notes) will be underpinned by investments in short-term, high-quality U.S. money market securities.

With respect to certain kinds of derivative transactions entered into by the Funds that involve obligations to make future payments to third parties, including, but not limited to, futures, forward contracts, swap contracts, the purchase of securities on a when-issued or delayed delivery basis, or reverse repurchase agreements, under applicable federal securities laws, rules, and interpretations thereof, the Fund must set aside (referred to sometimes as asset segregation) liquid assets, or engage in other measures to cover open positions with respect to such transactions. For example, with respect to forward foreign currency exchange contracts and futures contracts that are not contractually required to cash-settle, the Fund must cover its open positions by setting aside liquid assets equal to the contracts' full notional value, except that deliverable foreign currency exchange contracts for currencies that are liquid will be treated as the equivalent of cash settled contracts. As such, the Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligation (*i.e.*, the Fund's daily net liability if any) rather than the full notional amount under such deliverable forward foreign currency exchange contracts. With respect to forward foreign currency exchange contracts and futures contracts that are contractually required to cash-settle, the Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligation rather than the notional value. The Fund reserves the right to modify its asset segregation policies in the future.

Credit Linked Notes. Each Fund may invest in credit linked notes. A credit linked note is a type of structured note whose value is linked to an underlying reference asset. Credit linked notes typically provide periodic payments of

interest as well as payment of principal upon maturity. The value of the periodic payments and the principal amount payable upon maturity are tied (positively or negatively) to a reference asset, such as an index, government bond, interest rate or currency exchange rate. The ongoing payments and principal upon maturity typically will increase or decrease depending on increases or decreases in the value of the reference asset. A credit linked note typically is issued by a special purpose trust or similar entity and is a direct obligation of the issuing entity. The entity, in turn, invests in bonds or derivative contracts in order to provide the exposure set forth in the credit linked note. The periodic interest payments and principal obligations payable under the terms of the note typically are conditioned upon the entity's receipt of payments on its underlying investment. If the underlying investment defaults, the periodic payments and principal received by the Fund will be reduced or eliminated. The buyer of a credit linked note assumes the risk of default by the issuer and the underlying reference asset or entity. Generally, investors in credit linked notes assume the risk of default by the issuer and the reference entity in return for a potentially higher yield on their investment or access to an investment that they could otherwise not obtain. In the event the issuer defaults or there is a credit event that relates to the reference asset, the recovery rate is generally less than the Fund's initial investment and the Fund may lose money.

Foreign Currency Transactions. Each Fund may engage in foreign currency transactions. Each Fund may invest directly in foreign currencies in the form of bank and financial institution deposits, certificates of deposit, and bankers' acceptances denominated in a specified non-U.S. currency. Each Fund may enter into foreign currency exchange transactions. Each Fund will conduct its foreign currency exchange transactions either on a spot (*i.e.*, cash) basis at the spot rate prevailing in the foreign currency exchange market, or by entering into forward currency contracts to purchase or sell foreign currencies or forward currency swaps to exchange cash flows based on the notional difference among two or more currencies.

Each Fund may buy or sell government bonds, commercial paper, corporate debt obligations, notes and other fixed income securities denominated in currencies other than the U.S. dollar. Any security or instrument denominated in a currency other than the U.S. dollar is subject to foreign currency risk.

Forward Currency Contracts. Each Fund may enter into forward currency contracts. A forward currency contract is a privately negotiated contract to purchase or sell a specific currency at a future date (usually less than one year) at a price set at the time of the contract. These contracts generally are traded directly between currency traders (usually large commercial banks) and their customers. Each Fund may enter into forward currency contracts in order to lock in the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. The settlement of the contracts may occur with the physical delivery of a specified amount of currency equivalent to the market value of the contract. This is sometimes referred to as a deliverable forward contract. A non-deliverable forward contract is a forward contract where there is no physical settlement of two currencies at maturity. Non-deliverable forward contracts will usually be done on a net basis, each Fund receiving or paying only the net amount of the two payments. The net amount of the excess, if any, of each Fund's obligations over its entitlements with respect to each non-deliverable forward contract is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Trust's custodian bank. The risk of loss with respect to non-deliverable forward contracts generally is limited to the net amount of payments that a Fund is contractually obligated to make or receive. Each Fund may invest in a combination of forward currency contracts and U.S. dollar-denominated money market securities in an attempt to obtain an investment result that is similar to a direct investment in a foreign currency denominated instrument. This investment technique, if successful, creates a synthetic position in the particular foreign currency instrument the Fund is trying to duplicate. Forward contracts are subject to the risk that the counterparty will default on its obligations.

Currency, Interest Rate and Total Return Swaps. Each Fund may enter into swap agreements, including interest rate swaps, currency swaps and total return swaps. A typical interest rate swap involves the exchange of a floating interest rate payment for a fixed interest rate payment. A typical foreign currency swap involves the exchange of cash flows based on the notional difference among two or more currencies (e.g., the U.S. dollar and the non-U.S. currencies). A typical total return swap involves the payment of the total return on a reference asset in return for payments equal to a rate of interest on another reference asset. The total return includes appreciation or depreciation on the reference asset, plus any interest or dividend payments. Swap agreements may be used to achieve exposure to,

for example, currencies, interest rates, and money market securities without actually purchasing such currencies or securities. Each Fund will use swap agreements to invest in a market without owning or taking physical custody of the underlying securities in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. Swap agreements will tend to shift a Fund's investment exposure from one type of investment to another or from one payment stream to another. Depending on their structure, swap agreements may increase or decrease a Fund's exposure to long-term or short-term interest rates (in the United States or abroad), foreign currencies, corporate borrowing rates, or other factors, and may increase or decrease the overall volatility of the Fund's investments and its share price.

Currency Options. Each Fund may buy or sell put and call options on foreign currencies either on exchanges or in the over-the-counter market. A put option on a foreign currency gives the purchaser of the option the right to sell a foreign currency at the exercise price until the option expires. A call option on a foreign currency gives the purchaser of the option the right to purchase the currency at the exercise price until the option expires.

Futures Contracts and Options on Futures Contracts. Each Fund may use futures contracts and related options: (i) to attempt to gain exposure to foreign currencies, and (ii) to attempt to gain exposure to a particular market, instrument or index.

A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. An option on a futures contract gives the purchaser the right, in exchange for payment of a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. A put option gives the purchaser of the option the right to sell, and the writer of the option the obligation to buy, the underlying security or instrument at any time during the option period. A call option on a security gives the purchaser of the option the right to buy, and the writer of the option the obligation to sell, the underlying security or instrument at any time during the option period.

Swap Agreements. Each Fund may engage in swap transactions. Swap agreements can be individually negotiated and structured to include exposure to a variety of different types of investments or market factors. Depending on their structure, swap agreements may increase or decrease the Fund's exposure to long-term or short-term interest rates (in the United States or abroad), foreign currencies, commodities, commodity indexes, or inflation rates. Depending on how they are used, swap agreements may increase or decrease the overall volatility of a Fund's investments and the volatility of a Fund's share price. The most significant factor in the performance of swap agreements is the change in the factors that determine the amounts of payments due to and from the Fund. If a swap agreement calls for payments by the Fund, the Fund must be prepared to make such payments when due. If a swap counterparty's creditworthiness declines, the risk that such counterparty may not perform may increase, potentially resulting in a loss to the Fund. The Fund may be able to reduce or eliminate its exposure under a swap agreement either by assignment or other disposition, or by entering into an offsetting swap agreement with the same party or a similarly creditworthy party. There is no guarantee these strategies will be successful.

REPURCHASE AGREEMENTS. Each Fund may enter into repurchase agreements with counterparties that are deemed to present acceptable credit risks. A repurchase agreement is a transaction in which a Fund purchases securities or other obligations from a bank or securities dealer (or its affiliate) and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand and at a price reflecting a market rate of interest unrelated to the coupon rate or maturity of the purchased obligations. This is designed to result in a fixed rate of return for the Fund insulated from market fluctuations during the holding period. Because they are collateralized by securities, including mortgage-backed securities, repurchase agreements are subject to market and credit risk. As discussed herein, a Fund may not invest more than 10% of its net assets in illiquid securities. A repurchase agreement maturing in more than seven days may be considered an illiquid security. A Fund maintains custody of the underlying obligations prior to their repurchase, either through its regular custodian or through a special triparty custodian or sub-custodian that maintains separate accounts for both the Fund and its counterparty. Thus, the obligation of the counterparty to pay the repurchase price on the date agreed to or upon demand is, in effect, secured by such obligations.

Repurchase agreements carry certain risks not associated with direct investments in securities, including a possible decline in the market value of the underlying obligations. If their value becomes less than the repurchase price, plus any agreed

upon additional amount, the counterparty must provide additional collateral so that at all times the collateral is at least equal to the repurchase price plus any agreed upon additional amount. The difference between the total amount to be received upon repurchase of the obligations and the price that was paid by a Fund upon acquisition is accrued as interest and included in its net investment income. Repurchase agreements involving obligations other than U.S. government securities (such as commercial paper and corporate bonds) may be subject to special risks and may not have the benefit of certain protections in the event of the counterparty's insolvency. If the seller or guarantor becomes insolvent, the Fund may suffer delays, costs and possible losses in connection with the disposition of collateral.

REVERSE REPURCHASE AGREEMENTS. Each Fund may enter into reverse repurchase agreements, which involve the sale of securities held by a Fund subject to its agreement to repurchase the securities at an agreed upon date or upon demand and at a price reflecting a market rate of interest. Reverse repurchase agreements are subject to each Fund's limitation on borrowings and may be entered into only with banks or securities dealers or their affiliates. While a reverse repurchase agreement is outstanding, a Fund will maintain the segregation, either on its records or with the Trust's custodian, of cash or other liquid securities, marked to market daily, in an amount at least equal to its obligations under the reverse repurchase agreement. Reverse repurchase agreements involve the risk that the buyer of the securities sold by a Fund might be unable to deliver them when that Fund seeks to repurchase. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the buyer or trustee or receiver may receive an extension of time to determine whether to enforce a Fund's obligation to repurchase the securities, and the Fund's use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

INVESTMENT COMPANY SECURITIES. Each Fund may invest in the securities of other investment companies (including money market funds and Underlying ETFs). The 1940 Act generally prohibits a fund from acquiring more than 3% of the outstanding voting shares of an investment company and limits such investments to no more than 5% of the fund's total assets in any single investment company and no more than 10% in any combination of two or more investment companies. Each Fund may purchase or otherwise invest in shares of affiliated ETFs. Each Fund may invest in affiliated money market funds and Underlying ETFs.

ILLIQUID SECURITIES. Although the Funds do not intend to do so, as a matter of policy, each Fund may invest up to an aggregate amount of 10% of its net assets in illiquid securities. Illiquid securities include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets. The inability of a Fund to dispose of illiquid or not readily marketable investments readily or at a reasonable price could impair a Fund's ability to raise cash for redemptions or other purposes. The liquidity of securities purchased by a Fund which are eligible for resale pursuant to Rule 144A will be monitored by each Fund on an ongoing basis. In the event that such a security is deemed to be no longer liquid, a Fund's holdings will be reviewed to determine what action, if any, is required to ensure that the retention of such security does not result in a Fund having more than 10% of its assets invested in illiquid or not readily marketable securities.

FINANCIAL SECTOR INVESTMENTS. The Funds may engage in transactions with or invest in companies that are considered to be in the financial sector, including commercial banks, brokerage firms, diversified financial services, a variety of firms in all segments of the insurance industry (such as multi-line, property and casualty, and life insurance) and real estate related companies. There can be no guarantee that these strategies may be successful. A Fund may lose money as a result of defaults or downgrades within the financial sector.

Events in the financial sector have resulted in increased concerns about credit risk and exposure. Well-known financial institutions have experienced significant liquidity and other problems and have defaulted on their debt obligations. Issuers that have exposure to real estate, mortgage and credit markets have been particularly affected. It is uncertain whether or how long these conditions will continue. These events and possible continuing market turbulence may have an adverse effect on Fund performance.

Rule 12d3-1 under the 1940 Act limits the extent to which a fund may invest in the securities of any one company that derives more than 15% of its revenues from brokerage, underwriting or investment management activities. A fund may purchase securities of an issuer that derived more than 15% of its gross revenues in its most recent fiscal year from securities-related activities, subject to the following conditions: (1) the purchase cannot cause more than 5% of the fund's

total assets to be invested in securities of that issuer; (2) for any equity security, the purchase cannot result in the fund owning more than 5% of the issuer's outstanding securities in that class; and (3) for a debt security, the purchase cannot result in the fund owning more than 10% of the outstanding principal amount of the issuer's debt securities.

In applying the gross revenue test, an issuer's own securities-related activities must be combined with its ratable share of securities-related revenues from enterprises in which it owns a 20% or greater voting or equity interest. All of the above percentage limitations, as well as the issuer's gross revenue test, are applicable at the time of purchase. With respect to warrants, rights, and convertible securities, a determination of compliance with the above limitations shall be made as though such warrant, right, or conversion privilege had been exercised. The Funds will not be required to divest their holdings of a particular issuer when circumstances subsequent to the purchase cause one of the above conditions to not be met. The purchase of a general partnership interest in a securities-related business is prohibited.

NON-U.S. SECURITIES. The Funds invest a significant portion of their assets in non-U.S. securities. Investments in non-U.S. securities involve certain risks that may not be present in investments in U.S. securities. For example, non-U.S. securities may be subject to currency risks or to foreign government taxes. There may be less information publicly available about a non-U.S. issuer than about a U.S. issuer, and a foreign issuer may or may not be subject to uniform accounting, auditing and financial reporting standards and practices comparable to those in the U.S. Other risks of investing in such securities include political or economic instability in the country involved, the difficulty of predicting international trade patterns and the possibility of imposition of exchange controls. The prices of such securities may be more volatile than those of domestic securities. With respect to certain foreign countries, there is a possibility of expropriation of assets or nationalization, imposition of withholding taxes on dividend or interest payments, difficulty in obtaining and enforcing judgments against foreign entities or diplomatic developments which could affect investment in these countries. Losses and other expenses may be incurred in converting between various currencies in connection with purchases and sales of foreign securities.

Set forth below for certain markets in which the Funds may invest are brief descriptions of some of the conditions and risks in each such market.

Investments in Asia. The Asia Local Debt Fund may invest in fixed income securities issued by the government and/or corporations economically tied to Asia. Many countries in the region have historically faced political uncertainty, corruption, military intervention, and social unrest. Examples include military threats in Korea and Taiwan, the ethnic, sectarian, and separatist violence found in Indonesia, and the nuclear arms threats between India and Pakistan. To the extent that such events continue in the future, they can be expected to have an unpredictable effect on economic and securities market conditions in the region.

The economies of many Asian countries are heavily dependent on international trade and are accordingly affected by protective trade barriers and the economic conditions of their trading partners, principally, the U.S., Japan, China, and the European Union. The recent global economic crisis has impacted Asia, significantly lowering its exports and foreign investments, which are driving forces of its economic growth. Current economic conditions are also significantly affecting consumer confidence and local stock markets.

In addition to general risks affecting Asian countries, certain Asian countries, including China, Hong Kong, and Taiwan, are subject to additional risks that are based on each country's history, economy and geography. Certain risks associated with investments in these countries are discussed below.

Investments in Australia. The Asia Local Debt Fund and Commodity Currency Fund may invest in short-term money market securities denominated in Australian dollars and/or investments designed to provide exposure to Australian dollars and money market rates. The economy of Australia is heavily dependent on the demand for natural resources and agricultural products. Conditions that weaken demand for such products worldwide could have a negative impact on the Australian economy as a whole. These and other factors could have a negative impact on a Fund's performance.

Investments in Brazil. The Brazilian Real Fund seeks to achieve its investment objective by investing in short-term money market securities denominated in Brazilian real and/or investments designed to provide exposure to Brazilian currency and money market rates. The Emerging Currency Fund and the Commodity Currency Fund may also pursue this investment objective to a lesser extent as part of their overall investment strategies. The Emerging Markets Local Debt Fund may invest in fixed income securities issued by the Brazilian government and/or corporations domiciled in Brazil. Investing in Brazil involves certain considerations not typically associated with investing in securities of U.S. companies or the U.S. government, including: (i) investment and repatriation controls, which could affect a Fund's ability to operate, and to qualify for the favorable tax treatment afforded to regulated investment companies for U.S. federal income tax purposes, (ii) fluctuations in the rate of exchange between the Brazilian real and the U.S. dollar, (iii) the generally greater price volatility and lesser liquidity that characterize Brazilian securities markets, as compared with U.S. markets, (iv) the effect that a trade deficit could have on economic stability and the Brazilian government's economic policy, (v) high rates of inflation, (vi) governmental involvement in and influence on the private sector, (vii) Brazilian accounting, auditing and financial standards and requirements, which differ from those in the United States, and (viii) political and other considerations, including changes in applicable Brazilian tax laws. These and other factors could have a negative impact on a Fund's performance.

Investments in Canada. The Commodity Currency Fund may invest in short-term money market securities denominated in Canadian dollars and/or investments designed to provide exposure to Canadian dollars and money market rates. The U.S. is Canada's largest trading partner and foreign investor. As a result, changes to the U.S. economy may significantly affect the Canadian economy. The economy of Canada is also heavily dependent on the demand for natural resources and agricultural products. Canada is the largest producer of zinc and uranium, and is a global source of many other natural resources, such as gold, nickel, aluminum, and lead. Conditions that weaken demand for such products worldwide could have a negative impact on the Canadian economy as a whole. These and other factors could have a negative impact on a Fund's performance.

Investments in Chile. The Emerging Currency Fund and the Commodity Currency Fund may invest in short-term money market securities denominated in Chilean pesos and/or investments designed to provide exposure to Chilean pesos and money market rates. The Emerging Markets Local Debt Fund may invest in fixed income securities issued by the Chilean government and/or corporations domiciled in Chile. Investing in Chile involves certain considerations not typically associated with investing in securities of U.S. companies or the U.S. government. The Chilean economy is subject to risks of social unrest, high unemployment, governmental control and heavy regulation of the labor industry. Historically, Chile has experienced periods of political instability and certain sectors and regions of Chile have experienced high unemployment. Any recurrence of these events may cause downturns in the Chilean market and adversely impact investments in the Fund. Heavy regulation of labor and product markets is pervasive in Chile and may stifle Chilean economic growth or contribute to prolonged periods of recession. Chile is located in a part of the world that has historically been prone to natural disasters such as earthquakes and volcanoes and is economically sensitive to environmental events. Any such event could result in a significant adverse impact on the Chilean economy. The Chilean economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. In addition, commodities (such as oil, gas and minerals) represent a significant percentage of the region's exports, and many economies in this region, including Chile's, are particularly sensitive to fluctuations in commodity prices. These and other factors could have a negative impact on a Fund's performance.

Investments in China and Hong Kong. The Chinese Yuan Fund seeks to achieve its investment objective by investing in short-term money market securities denominated in Chinese yuan and/or investments designed to provide exposure to Chinese currency and money market rates. The Emerging Currency Fund may utilize a similar strategy in regards to the Chinese yuan with the broader investment strategy of the Fund. The Asia Local Debt Fund may invest in fixed income securities issued by governments and/or corporations economically tied to China and Hong Kong. In addition to the aforementioned risks of investing in non-U.S. securities, investing in securities listed

and traded in China involves special considerations not typically associated with investing in countries with more democratic governments or more established economies, securities or currency markets. Such risks may include: (i) the risk of nationalization or expropriation of assets or confiscatory taxation; (ii) greater social, economic and political uncertainty (including the risk of war); (iii) dependency on exports and the corresponding importance of international trade; (iv) increasing competition from Asia's other low-cost emerging economies; (v) currency exchange rate fluctuations and the lack of available currency hedging instruments; (vi) higher rates of inflation; (vii) controls on foreign investment and limitations on repatriation of invested capital and on the Fund's ability to exchange local currencies for U.S. dollars; (viii) greater governmental involvement in and control over the economy; (ix) the risk that the Chinese government may decide not to continue to support the economic reform programs implemented since 1978 and could return to the prior, completely centrally planned, economy; (x) the fact that Chinese companies, particularly those located in China, may be smaller, less seasoned and newly organized; (xi) the differences in, or lack of, auditing and financial reporting standards which may result in unavailability of material information about issuers, particularly in China; (xii) the fact that statistical information regarding the economy of China may be inaccurate or not comparable to statistical information regarding the U.S. or other economies; (xiii) the less extensive, and still developing, regulation of the securities markets, business entities and commercial transactions; (xiv) the fact that the settlement period of securities transactions in foreign markets may be longer; (xv) the willingness and ability of the Chinese government to support the Chinese and Hong Kong economies and markets is uncertain; (xvi) the risk that it may be more difficult, or impossible, to obtain and/or enforce a judgment than in other countries; (xvii) the rapidity and erratic nature of growth, particularly in China, resulting in inefficiencies and dislocations; (xviii) the risk that, because of the degree of interconnectivity between the economies and financial markets of China and Hong Kong, any sizable reduction in the demand for goods from China, or an economic downturn in China, could negatively affect the economy and financial market of Hong Kong as well; and (xix) the risk that certain companies in the Fund's Index may have dealings with countries subject to sanctions or embargoes imposed by the U.S. Government or identified as state sponsors of terrorism.

Investments in Hong Kong are also subject to certain political risks. Following the establishment of the People's Republic of China by the Communist Party in 1949, the Chinese government renounced various debt obligations incurred by China's predecessor governments, which obligations remain in default, and expropriated assets without compensation. There can be no assurance that the Chinese government will not take similar action in the future. An investment in the Fund involves risk of a total loss. China has committed by treaty to preserve Hong Kong's autonomy and its economic, political and social freedoms for 50 years from the July 1, 1997 transfer of sovereignty from Great Britain to China. However, if China would exert its authority so as to alter the economic, political or legal structures or the existing social policy of Hong Kong, investor and business confidence in Hong Kong could be negatively affected, which in turn could negatively affect markets and business performance. These and other factors could have a negative impact on the Fund's performance.

Investments in Colombia. The Commodity Currency Fund and the Emerging Currency Fund may invest in short-term money market, and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the Colombian government and/or corporations domiciled in Colombia. The Colombian economy is subject to risks of social unrest, high unemployment, governmental control and heavy regulation of the labor industry. Historically, Colombia has experienced periods of political instability and certain sectors and regions of Colombia have experienced high unemployment. Any recurrence of these events may cause downturns in the Colombian market and adversely impact investments in the Fund. Heavy regulation of labor and product markets is pervasive in Colombia and may stifle Colombian economic growth or contribute to prolonged periods of recession. Colombia is located in a part of the world that has historically been prone to natural disasters such as earthquakes and volcanoes and is economically sensitive to environmental events. Any such event could result in a significant adverse impact on the Colombian economy. The Colombian economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. In addition, commodities (such as oil, gas and minerals) represent a significant percentage of the region's exports and many economies in this region, including Colombia's, are

particularly sensitive to fluctuations in commodity prices. These and other factors could have a negative impact on a Fund's performance.

Investments in Czech Republic. The Emerging Currency Fund may invest in short-term money market securities denominated in the Czech crown and/or investments designed to provide exposure to the Czech crown and money market rates. Investing in Czech Republic involves certain considerations not typically associated with investing in securities of U.S. companies or the U.S. government. The Czech Republic may experience effects of declining exports, especially to EU countries, inflation and increasing taxes. A significant portion of the workforce in Eastern Europe is unionized and certain regions and sectors of these countries have experienced very high unemployment rates and periods of labor and social unrest. Despite significant recent reform and privatization, Eastern European governments continue to control a large share of economic activity in the region. Government spending in these countries remains high compared to that of other European countries.

Investments in Emerging Markets. The Brazilian Real Fund, the Chinese Yuan Fund, the Emerging Currency Fund, the Indian Rupee Fund and the South African Rand Fund each invests substantially all of its assets in short-term money market securities denominated in the currency of a market or markets considered to be emerging or developing or in securities that provide exposure to such market(s). The Emerging Markets Local Debt Fund also invests substantially all of its assets in short-term money market and fixed income securities denominated in the currency of emerging or developing markets or in securities that provide exposure to such market(s). The Asia Local Debt Fund invests substantially all of its assets in a market considered to be emerging or developing or in securities that provide exposure to such market(s). The Commodity Currency Fund may also pursue this investment objective to a lesser extent as part of its overall investment strategies. These Funds are sometimes referred to herein as Emerging Markets Funds. Investing in developing markets may be subject to additional risks not associated with more developed economies. Such risks may include: (i) the risk that government and quasi-government entities may not honor their obligations, (ii) greater market volatility, (iii) lower trading volume and liquidity, (iv) greater social, political and economic uncertainty, (v) governmental controls on foreign investments and limitations on repatriation of invested capital, (vi) the risk that governments and companies may be held to lower disclosure, corporate governance, auditing and financial reporting standards than companies in more developed markets, and (vii) the risk that there may be less protection of property rights than in other countries. Some emerging markets have experienced and may continue to experience high inflation rates, currency devaluations and economic recessions. Each of these factors may cause a Fund to decline in value. Unanticipated political or social developments may result in sudden and significant investment losses, and may affect the ability of governments and government agencies in these markets to meet their debt obligations. These and other factors could have a negative impact on a Fund's performance and increase the volatility of an investment in a Fund.

Investments in Hungary. The Emerging Currency Fund may invest in short-term money market securities, and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the Hungarian government and/or corporations domiciled in Hungary. Hungary is subject to a considerable degree of economic, political and social instability, which could adversely affect investments in the Fund. Hungary has experienced currency devaluations, substantial rates of inflation, defaults on debt, widespread corruption or economic recessions, causing a negative effect on the economies and securities markets of the country. A significant portion of the workforce in Eastern Europe is unionized and certain regions and sectors of these countries have experienced very high unemployment rates and periods of labor and social unrest. Despite significant recent reform and privatization, Eastern European governments continue to control a large share of economic activity in the region. Government spending in these countries remains high compared to that of other European countries. Investment in Hungary is uncomplicated, although it is subject to government licensing in security-sensitive areas. Such business licensing is a problem, as regulations are not applied consistently. These and other factors could have a negative impact on a Fund's performance.

Investments in India. The Indian Rupee Fund seeks to achieve its investment objective by investing in short-term money market securities denominated in Indian rupee and/or investments designed to provide exposure to Indian

currency and money market rates. The Asia Local Debt Fund may invest in fixed income securities issued by governments and/or corporations economically tied to India. Investments in India involve special considerations not typically associated with investing in countries with more established economies or currency markets. The Emerging Currency Fund may also pursue this investment objective to a lesser extent as part of its overall investment strategy. Political and economic conditions and changes in regulatory, tax, or economic policy in India could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund's performance. Economic and political structures in India may lack the stability of those of more developed nations. Unanticipated political or social developments in India and surrounding regions may affect the value of the Fund's investments and the value of Fund shares. The Indian government has exercised and continues to exercise significant influence over many aspects of the economy, and the number of public sector enterprises in India is substantial. Although the government has recently begun to institute economic reform policies, there can be no assurance that it will continue to pursue such policies, or, if it does, that such policies will succeed. While the government of India is moving to a more liberal approach, it still places restrictions on the capability and capacity of foreign investors to access and trade rupee directly. Foreign investors in India still face burdensome taxes on investments in income producing securities as well as potentially high levels of inflation. The laws relating to limited liability of corporate shareholders, fiduciary duties of officers and directors, and the bankruptcy of state enterprises are generally less well developed than or different from laws in the U.S. These and other factors may decrease the value and liquidity of the Fund's investments, and therefore the value and liquidity of an investment in the Fund.

Investments in Indonesia. The Commodity Currency Fund and the Emerging Currency Fund may invest in short-term money market securities denominated in Indonesian rupiah and/or investments designed to provide exposure to Indonesian rupiah and money market rates. The Emerging Markets Local Debt Fund may invest in money market and fixed income securities issued by the Indonesian government and/or corporations domiciled in Indonesia. The Asia Local Debt Fund may invest in fixed income securities issued by Indonesian governments and/or corporations economically tied to Indonesia. Southeast Asia is heavily dependent on exports and is thus particularly vulnerable to any weakening in global demand for these products. As the current global economic crisis intensifies, the economies of Southeast Asian countries could be severely impacted once the effects of this crisis fully unfold. Indonesia has restored financial stability and pursued sober fiscal policies since the 1997-1998 Asian financial crisis, but many economic development problems remain, including high unemployment, a fragile banking sector, endemic corruption, inadequate infrastructure, a poor investment climate, and unequal resource distribution among regions. These problems may limit the country's ability to contain the increasingly severe and negative impact of the current global economic crisis on its economy. Economic growth of Indonesia has slowed as a result of the current global economic crisis and could be more severely impacted once the full effects of the crisis fully unfold. Keys to future growth remain internal reform, peaceful resolution of internal conflicts, building up the confidence of international and domestic investors, and strong global economic growth. These and other factors could have a negative impact on a Fund's performance.

Investments in Israel. The Emerging Currency Fund may invest in short-term money market securities issued by the Israeli government and/or corporations domiciled in Israel. The Israeli economy is dependent on trade with certain key trading partners. Reduction in spending by these economies on Israeli products and services or negative changes in any of these economies may cause an adverse impact on the Israeli economy.

Israel has begun a process of privatization of certain entities and industries. Historically, investors in some newly privatized entities have suffered losses due to the inability of the newly privatized company to adjust quickly to a competitive environment or to changing regulatory and legal standards. There is no assurance that such losses will not recur. The United States is Israel's single largest trade and investment partner. A decrease in U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or a recession in the U.S. may have an adverse impact on the Israeli economy.

Israel has historically experienced acts of terrorism or strained international relations related to border disputes, historical animosities or other defense concerns. These situations may cause uncertainty in the Israeli market and

adversely affect the performance of the Israeli economy. Unanticipated or sudden political or social developments may result in sudden and significant investment. The Israeli economy has suffered from debt burdens, high inflation rates, currency devaluations and economic recessions, any of which may have a negative effect on the Israeli economy and securities market. These and other factors could have a negative impact on a Fund's performance.

Investments in Japan. The Japanese Yen Fund seeks to achieve its investment objective by investing in short-term money market securities denominated in Japanese yen and/or investments designed to provide exposure to Japanese currency and money market rates. The Japanese economy is characterized by government intervention and protectionism, an unstable financial services sector, and relatively high unemployment. Economic growth is heavily dependent on international trade, government support and consistent government policy. Slowdowns in the economies of key trading partners such as the United States, China and countries in Southeast Asia could have a negative impact on the Japanese economy as a whole. These and other factors could have a negative impact on a Fund's performance.

Investments in Malaysia. The Commodity Currency Fund and the Emerging Currency Fund may invest in short-term money market securities, and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the Malaysian government and/or corporations domiciled in Malaysia. The Asia Local Debt Fund may invest in fixed income securities issued by the Malaysian government and/or corporations economically tied to Malaysia. The Malaysian economy is dependent on the economies of Southeast Asia and the United States as key trading partners. Reduction in spending by these countries on Malaysian products and services or negative changes in any of these economies may cause an adverse impact in the Malaysian economy. Certain Asian economies experience over-extension of credit, currency devaluations and restrictions, rising unemployment, high inflation, decreased exports and economic recessions. Economic events in any one country can have a significant effect on the entire Asian region as well as on major trading partners outside Asia and any adverse event in the Asian markets may have a significant adverse effect on the Malaysian economy. The United States is a significant trading and investment partner of Malaysia. A decrease in U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or a recession in the U.S. may have an adverse impact on the Malaysian economy. These and other factors could have a negative impact on a Fund's performance.

Investments in Mexico. The Emerging Currency Fund may invest in short-term money market securities denominated in Mexican pesos and/or investments designed to provide exposure to Mexican pesos and money market rates. The Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities issued by the Mexican government and/or corporations domiciled in Mexico. Investing in Mexico involves certain considerations not typically associated with investing in securities of U.S. companies or the U.S. government. The Mexican economy may be significantly affected by the economies of other Central and South American countries. High interest, inflation, and unemployment rates characterize the economies in some Central and South American countries. Currency devaluations in any Central and South American country can have a significant effect on the entire region. Because commodities such as oil and gas, minerals, and metals represent a significant percentage of the region's exports, the economies of Central and South American countries are particularly sensitive to fluctuations in commodity prices. As a result, the economies in many Central and South American countries can experience significant volatility. The United States is Mexico's largest trade and investment partner and the Mexican economy is significantly affected by developments in the U.S. economy. Since the implementation of the North American Free Trade Agreement (NAFTA) in 1994 among Canada, the U.S. and Mexico, total two-way merchandise trade between the United States and Mexico has increased. To further this relationship, the three NAFTA countries entered into The Security and Prosperity Partnership of North America in March 2005, which may further affect Mexico's dependency on the U.S. economy. Any downturn in U.S. or Canadian economic activity is likely to have an adverse impact on the Mexican economy. Mexico has begun a process of privatization of certain entities and industries. Historically, investors in some newly privatized entities have suffered losses due to the inability of the newly privatized companies to adjust quickly to a competitive environment or to changing regulatory and legal standards. There is no assurance that such losses will not recur. Mexico has historically experienced acts of violence, terrorism, significant criminal activity and strained

international relations related to border disputes, historical animosities, the drug trade and other defense concerns. These situations may cause uncertainty in the Mexican market and adversely affect the performance of the Mexican economy.

Certain political and currency instability risks have contributed to a high level of price volatility in the Mexican equity and currency markets and could adversely affect investments in the Funds. Mexico has been destabilized by local insurrections and social upheavals in certain regions, particularly the State of Chiapas. Recurrence of these conditions may adversely impact the Mexican economy. Some of the government's challenges include the upgrade of infrastructure, the modernization of the tax system and labor laws, and the reduction of income inequality. In addition, Mexico has had one political party dominating government until the elections of 2000. Recently, Mexican elections have been contentious and have been very closely decided. Changes in political parties or other Mexican political events may affect the economy and cause instability. Mexico has, in recent history, experienced substantial economic instability resulting from, among other things, periods of very high inflation and significant devaluations of the Mexican currency, the peso. These and other factors could have a negative impact on a Fund's performance.

Investments in New Zealand. The New Zealand Dollar Fund seeks to achieve its investment objective by investing in short-term money market securities denominated in New Zealand dollars and/or investments designed to provide exposure to New Zealand currency and money market rates. The Asia Local Debt Fund and Commodity Currency Fund may also acquire such investments to a lesser extent as part of its overall investment strategies. Investing in New Zealand involves certain considerations not typically associated with investing in securities of U.S. companies or the U.S. government. New Zealand is generally considered to be a developed market, and investments in New Zealand generally do not have risks associated with them that are present with investments in developing or emerging markets. The health of the economy is strongly tied to commodity exports and has historically been vulnerable to global slowdowns. New Zealand is a country heavily dependent on free trade, particularly in agricultural products. This makes New Zealand particularly vulnerable to international commodity prices and global economic slowdowns. Its principal export industries are agriculture, horticulture, fishing and forestry. These and other factors could have a negative impact on a Fund's performance.

Investments in Norway. The Commodity Currency Fund may invest in very short-term money market securities denominated in Norwegian kroner and/or investments designed to provide exposure to Norwegian kroner and money market rates. The Norwegian economy is an example of a mixed economy, a prosperous capitalist welfare state featuring a combination of free market activity and large state ownership in certain key sectors. The state has large ownership positions in key industrial sectors, such as the strategic petroleum sector (Statoil), hydroelectric energy production (Statkraft), aluminum production (Norsk Hydro), the largest Norwegian bank (DnB NOR), and telecommunications provider (Telenor). Through these big companies, the government controls approximately 30% of the stock values at the Oslo Stock Exchange. The Norwegian economy is dependent on the economies of Europe as key trading partners. The Economic and Monetary Union (EMU) of the European Union (EU) requires compliance with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental regulations on trade, changes in the exchange rate of the euro and recessions in EU economies may have a significant adverse effect on the economies of EU members and their trading partners. The Norwegian economy is dependent on the export of natural resources and natural resource products, and any negative changes in these sectors could have an adverse impact on the Norwegian economy. Norway has an extensive social welfare system and a highly unionized workforce. These conditions may result in increased production costs and higher governmental spending and may stifle Norwegian economic growth or cause prolonged periods of recession. These and other factors could have a negative impact on a Fund's performance.

Investments in Peru. The Commodity Currency Fund and the Emerging Currency Fund may invest in short-term money market securities, and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the Peruvian government and/or corporations domiciled in Peru. The Peruvian economy is subject to risks of social unrest, high unemployment, governmental control and heavy regulation of the

labor industry. Historically, Peru has experienced periods of political instability and certain sectors and regions of Peru have experienced high unemployment. Any recurrence of these events may cause downturns in the Peruvian market and adversely impact investments in the Fund. Heavy regulation of labor and product markets is pervasive in Peru and may stifle Peruvian economic growth or contribute to prolonged periods of recession. The Peruvian economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. In addition, commodities (such as oil, gas and minerals) represent a significant percentage of the region's exports, and many economies in this region, including Peru's, are particularly sensitive to fluctuations in commodity prices. Peru's main exports are copper, gold, zinc, textiles, and fish meal; its major trade partners are the United States, China, Brazil, and Chile. These and other factors could have a negative impact on a Fund's performance.

Investments in the Philippines. The Emerging Currency Fund may invest in short-term money market securities, and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the Philippine government and/or corporations domiciled in the Philippines. The Asia Local Debt Fund may invest in fixed income securities issued by the Philippine government and/or corporations economically tied to the Philippines. The Philippines' economy is heavily dependent on exports and subject to high interest rates, economic volatility, inflation, currency devaluations, high unemployment rates and high level of debt and public spending. As an emerging country, the Philippines' economy is susceptible to economic, political and social instability; unanticipated economic, political or social developments could impact economic growth. The Philippines is subject to natural disaster risk. These and other factors could have a negative impact on a Fund's performance.

Investments In Poland. The Emerging Currency Fund may invest in short-term money market securities and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the Polish government and/or corporations domiciled in Poland. Poland is considered to have one of the healthiest economies of the post-communist countries and is currently one of the fastest growing countries within the EU. Since the fall of the communist government, Poland has steadfastly pursued a policy of liberalizing the economy and today stands out as a successful example of the transition from a centrally planned economy to a primarily capitalistic market economy. Poland is the only member of the European Union to have avoided a decline in GDP during the late 2000s recession. In 2009 Poland had the greatest GDP growth in the EU. As of November 2009 the Polish economy had not entered the global recession of the late 2000s nor had it even contracted. Investment in securities of Polish issuers involves risks not typically associated with investments in securities of issuers in developed countries. Such heightened risks include, among others, a relatively short history of democracy, expropriation and/or nationalization of assets, confiscatory taxation, less publicly available financial and other information, and potential difficulties in enforcing contractual obligations. In addition, Poland faces many economic development problems, including high unemployment, inadequate infrastructure, endemic corruption, poverty, and intensifying global competition from neighboring countries.

The securities market of Poland is considered an emerging market characterized by a small number of listed companies and a relatively illiquid secondary trading market, particularly for corporate bonds. These factors, coupled with restrictions on foreign investment and other factors, limit the supply of securities available for investment by the Fund. This will affect the rate at which the Fund is able to invest in Poland, the purchase and sale prices for such securities and the timing of purchases and sales. The government in Poland may also restrict or control to varying degrees the ability of foreign investors to invest in securities of issuers located or operating in Poland. Moreover, governmental approval or special licenses prior to investments by foreign investors may be required and may limit the amount of investments by foreign investors in a particular industry and/or issuer.

The government of Poland may also withdraw or decline to renew a license that enables the Fund to invest in Poland. Any one of these factors could cause a decline in the value of the Fund.

The Polish government may exercise substantial influence over many aspects of the private sector and may own or control many companies. Future government actions could have a significant effect on the economic conditions in Poland, which could have a negative impact on private sector companies. There is also the possibility of diplomatic developments that could adversely affect investments in Poland. The market for Polish securities is directly influenced by the flow of international capital, and economic and market conditions of certain countries, especially emerging market countries in Eastern Europe. Adverse economic conditions or developments in other emerging market countries have at times significantly affected the availability of credit in the Polish economy and resulted in considerable outflows of funds and declines in the amount of foreign currency invested in Poland. These and other factors could have a negative impact on a Fund's performance.

Investments in Russia. The Commodity Currency Fund and the Emerging Currency Fund may invest in short-term money market securities denominated in Russian rubles and/or investments designed to provide exposure to Russian rubles and money market rates. The Emerging Markets Local Debt Fund may invest in money market and fixed income securities issued by the Russian government and/or corporations domiciled in Russia. Investments in Russia involve special considerations not typically associated with investing in countries with more established economies or currency markets. On an ongoing basis, Russia's government has been faced with the daunting task of stabilizing its domestic economy, while transforming it into a modern and efficient structure able to compete in international markets and respond to the needs of its citizens. However, to date, many of the country's economic reform initiatives have floundered as the proceeds of IMF and other economic assistance have been squandered or stolen. Instability, geopolitical tensions, poor accounting standards, inept management, pervasive corruption, insider trading and crime, and inadequate regulatory protection for the rights of investors all pose a significant risk, particularly to foreign investors. Compared to most national stock markets, the Russian securities market suffers from a variety of problems not encountered in more developed markets, which, among other things, may make obtaining accurate prices on portfolio securities more difficult than in more developed markets. Because of the recent formation of the Russian securities market as well as the underdeveloped state of the banking and telecommunications systems, settlement, clearing and registration of securities transactions are subject to significant risks. The Russian economy is heavily dependent upon the export of a range of commodities including most industrial metals, forestry products, oil, and gas. Accordingly, it is strongly affected by international commodity prices and is particularly vulnerable to any weakening in global demand for these products. As the current global economic crisis causes the commodity prices, especially the price of oil, to tumble, many sectors in the Russian economy have fallen into turmoil, threatening to push the whole economy into significant slowdown and even recession. Foreign investors also face a high degree of currency risk when investing in Russian securities and a lack of available currency hedging instruments. There is the risk the government may impose capital controls on foreign portfolio investments in the event of extreme financial or political crisis. Such capital controls would prevent the sale of a portfolio of foreign assets and the repatriation of investment income and capital. Such risks have led to heightened scrutiny of Russian liquidity conditions, which in turn creates a heightened risk of the repatriation of ruble assets by nervous foreign investors. The current economic turmoil in Russia and the effects of the current global economic crisis on the Russian economy can cause flight from the Russian ruble into United States dollars and other currencies and can force the Russian central bank to spend reserves to maintain the value of the ruble. If the Russian central bank falters in its defense of the ruble, there could be additional pressure on Russia's banks and its currency. These and other factors could have a negative impact on a Fund's performance.

Investments in Singapore. The Asia Local Debt Fund may invest in fixed income securities issued by the government and/or corporations economically tied to Singapore. The economy of Singapore is heavily dependent on international trade and export. Conditions that weaken demand for such products worldwide or in the Asian region could have a negative and significant impact on the Singaporean economy as a whole. In addition, the economy of Singapore may be particularly vulnerable to external market changes because of its smaller size. These and other factors could have a negative impact on the Fund's performance.

Investments in Slovakia. The Emerging Currency Fund may invest in short-term money market securities and instruments designed to provide exposure to the currency and money market rates of Slovakia. Slovakia has

recently experienced long-term unemployment, inflation and declining exports. A significant portion of the workforce in Eastern Europe is unionized and certain regions and sectors of these countries have experienced very high unemployment rates and periods of labor and social unrest. Despite significant recent reform and privatization, Eastern European governments continue to control a large share of economic activity in the region. Government spending in these countries remains high compared to that of other European countries.

Investments in South Africa. The South African Rand Fund seeks to achieve its investment objective by investing in short-term money market securities denominated in South African rand and/or investments designed to provide exposure to South African currency and money market rates. The South African rand (ZAR) is the most actively traded emerging market currency in the world. It has joined an elite club of 15 currencies, the continuous linked settlement (CLS), where forex transactions are settled immediately, lowering the risks of transacting across time zones. The rand was the best-performing currency against the United States dollar (USD) between 2002 and 2005, according to the Bloomberg Currency Scorecard. The Emerging Currency Fund and the Commodity Currency Fund may also pursue this investment objective to a lesser extent as part of their overall investment strategies. The Emerging Markets Local Debt Fund may invest in fixed income securities issued by the South African government and/or corporations domiciled in South Africa. Investing in South Africa involves special considerations not typically associated with investing in countries with more established economies or currency markets. Although South Africa is a developing country with a solid economic infrastructure (in some regards rivaling other developed countries), certain issues, such as unemployment, access to health care, limited economic opportunity, and other financial constraints, continue to present obstacles to full economic development. Disparities of wealth, the pace and success of democratization and capital market development and religious and racial disaffection have also led to social and political unrest. South Africa's currency has recently fluctuated significantly and may be vulnerable to significant devaluation. There can be no assurance that initiatives by the government to address these issues will achieve the desired results. These and other factors could have a negative impact on the Fund's performance and increase the volatility of an investment in the Fund.

Investments in South Korea. The Emerging Currency Fund may invest in short-term money market securities, and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the South Korean government and/or corporations domiciled in South Korea. The economy of South Korea is heavily dependent on exports and the demand for certain finished goods. South Korea's main industries include electronics, automobile production, chemicals, shipbuilding, steel, textiles, clothing, footwear, and food processing. Conditions that weaken demand for such products worldwide or in other Asian countries could have a negative impact on the South Korean economy as a whole. Relations with North Korea could also have a significant impact on the economy of South Korea. These and other factors could have a negative impact on a Fund's performance.

Investments in Taiwan. The Emerging Market Currency Fund may invest in short-term securities and instruments designed to provide exposure to the currency and money market rates of Taiwan. The Asia Local Debt Fund, may invest in fixed income securities issued by the government and/or corporations economically tied to Taiwan. Certain Asian economies have experienced over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports and economic recessions. Economic events in any one country can have a significant economic effect on the entire Asian region as well as on major trading partners outside Asia, and any adverse event in the Asian markets may have a significant adverse effect on the economy in Taiwan.

Investments in Thailand. The Emerging Currency Fund may invest in short-term money market securities, and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the Thai government and/or corporations domiciled in Thailand. The Asia Local Debt Fund may invest in fixed income securities issued by the Thai government and/or corporations economically tied to Thailand. The Thai economy is dependent on commodity prices and trade with the economies of Asia, Europe and the United States. Reduction in spending by these economies on Thai products and services or negative changes in any of these economies may cause an adverse impact on the Thai economy. Certain Asian economies have experienced over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports

and economic recessions. Economic events in any one country can have a significant economic effect on the entire Asian region as well as on major trading partners outside Asia and any adverse event in the Asian markets may have a significant adverse effect on the Thai economy. The United States is Thailand's largest export market and third largest supplier, after Japan and China. Decreasing U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or a recession in the United States may have an adverse impact on the Thai economy.

Thailand has historically experienced acts of terrorism and strained international relations related to border disputes, historical animosities and other defense concerns. These situations may cause uncertainty in the Thai market and adversely affect the Thai economy. Economic and political instability have contributed to high price volatility in the Thai equity and currency markets, which could affect investments in the Fund.

The Thai economy has experienced periods of substantial inflation, currency devaluations and economic recessions, any of which may have a negative effect on the Thai economy and securities markets. Thailand has at times been destabilized by frequent government turnover and significant political changes, including military coups. Recurrence of these conditions, unanticipated or sudden changes in the political structure or other Thai political events may result in sudden and significant investment losses. These and other factors could have a negative impact on a Fund's performance.

Investments in Turkey. The Emerging Currency Fund may invest in short-term money market securities, and the Emerging Markets Local Debt Fund may invest in short-term money market and fixed income securities, issued by the Turkish government and/or corporations domiciled in Turkey. The Turkish economy is dependent on trade with certain key trading partners. Reduction in spending by these economies on Turkish products and services or negative changes in any of these economies may cause an adverse impact on the Turkish economy.

Turkey has begun a process of privatization of certain entities and industries. Historically, investors in some newly privatized entities have suffered losses due to the inability of the newly privatized company to adjust quickly to a competitive environment or to changing regulatory and legal standards, or in some cases due to re-nationalization of such privatized entities. There is no assurance that such losses will not recur. The United States is a significant trading partner of and investor in Turkey. A decrease in U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or a recession in the U.S. may have an adverse impact on the Turkish economy.

Turkey has historically experienced acts of terrorism and strained international relations related to border disputes, historical animosities and other defense concerns. These situations may cause uncertainty in the Turkish market and adversely affect the performance of the Turkish economy.

Historically, Turkey's national politics have been unpredictable and subject to influence by the military, and its government may be subject to sudden change. Disparities of wealth, the pace and success of democratization and capital market development and religious and racial disaffection have also led to social and political unrest. Unanticipated or sudden political or social developments may result in sudden and significant investment losses. Turkey has experienced periods of substantial inflation, currency devaluations and severe economic recessions, any of which may have a negative effect on the Turkish economy and securities market. Turkey has experienced a high level of debt and public spending, which may stifle Turkish economic growth, contribute to prolonged periods of recession or lower Turkey's sovereign debt rating. These and other factors could have a negative impact on a Fund's performance.

SHORT SALES. Each Fund may make short sales as part of its overall portfolio management strategies or to offset a potential decline in value of a security. A short sale involves the sale of a security that is borrowed from a broker or other institution to complete the sale. Short sales expose the Funds to the risk that they will be required to acquire, convert or exchange securities to replace the borrowed securities (also known as covering the short position) at a time when the securities sold short have appreciated in value, thus resulting in a loss to the Funds. If a Fund makes a short sale, it must segregate or earmark assets determined to be liquid by the Advisor and Sub-Advisers in accordance with procedures established by the Board of Trustees or otherwise cover its position in a permissible manner.

FUTURE DEVELOPMENTS. The Board may, in the future, authorize each Fund to invest in securities contracts and investments other than those listed in this SAI and in the Funds' Prospectus, provided they are consistent with each Fund's investment objective and do not violate any fundamental investment restrictions or policies.

PROXY VOTING POLICY

The Trust has adopted as its proxy voting policies for each Fund the proxy voting guidelines of each Fund's respective Sub-Adviser (referred to together in this section as Mellon Capital). The Trust has delegated to Mellon Capital the authority and responsibility for voting proxies on the portfolio securities held by each Fund. The remainder of this section discusses each Fund's proxy voting guidelines and the respective roles of Mellon Capital in implementing such guidelines.

Mellon Capital, through its participation in The Bank of New York Mellon (BNY Mellon) Corporation's Proxy Policy Committee (PPC), has adopted a Proxy Voting Policy, related procedures, and voting guidelines which are applied to those client accounts over which it has been delegated the authority to vote proxies. In voting proxies, Mellon Capital seeks to act solely in the best financial and economic interest of each client. Mellon Capital will carefully review proposals that would limit shareholder control or could affect the value of a client's investment. It will generally oppose proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. It will generally support proposals designed to provide management with short-term insulation from outside influences so as to enable management to negotiate effectively and otherwise achieve long-term goals. On questions of social responsibility where economic performance does not appear to be an issue, Mellon Capital will attempt to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the proposal including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. The PPC will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take action on issues. Mellon Capital recognizes its duty to vote proxies in the best interests of its clients. Mellon Capital seeks to avoid material conflicts of interest through its participation in the PPC, which applies detailed, pre-determined proxy voting guidelines (the Voting Guidelines) in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third party vendor, and without consideration of any client relationship factors. Further, Mellon Capital and its affiliates engage a third party to vote all proxies for BNY Mellon securities and affiliated mutual fund securities.

Proxy voting proposals are reviewed, categorized, analyzed and voted in accordance with the Voting Guidelines. These guidelines are reviewed periodically and updated as necessary to reflect new issues and any changes in our policies on specific issues. Items that can be categorized under the Voting Guidelines will be voted in accordance with any applicable guidelines or referred to the PPC, if the applicable guidelines so require. Proposals that cannot be categorized under the Voting Guidelines will be referred to the PPC for discussion and vote. Additionally, the PPC may review any proposal where it has identified a particular company, industry or issue for special scrutiny. With regard to voting proxies of foreign companies, Mellon Capital may weigh the cost of voting and potential inability to sell the securities (which may occur during the voting process) against the benefit of voting the proxies to determine whether or not to vote.

In evaluating proposals regarding incentive plans and restricted stock plans, the PPC typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the PPC evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The PPC generally votes against proposals that permit the repricing or replacement of stock options without shareholder approval.

A complete copy of the Proxy Voting Policy may be obtained by calling 1-866-909-9473; or writing to: WisdomTree Trust, c/o ALPS Distributors, Inc., 1290 Broadway, Suite 1100, Denver, Colorado 80203.

The Trust is required to disclose annually each Fund's complete proxy voting record on Form N-PX covering the period from July 1 of one year through June 30 of the next year and to file Form N-PX with the Securities and Exchange Commission (the SEC) no later than August 31 of each year. The current Form N-PX for the Funds is available at no

charge upon request by calling 1-866-909-9473 or through the Trust's website at www.wisdomtree.com. The Funds' Form N-PX is also available on the SEC's website at www.sec.gov.

PORTFOLIO HOLDINGS DISCLOSURE POLICY

The Trust has adopted a Portfolio Holdings Policy (the "Policy") designed to govern the disclosure of Fund portfolio holdings and the use of material non-public information about Fund holdings. The Policy applies to all officers, employees, and agents of the Funds, including the Adviser and each Sub-Adviser (together, the "Advisers"). The Policy is designed to ensure that the disclosure of information about each Fund's portfolio holdings is consistent with applicable legal requirements and otherwise in the best interest of each Fund.

The Funds are considered to be actively managed ETFs. As such, each Fund is required by the SEC to disclose on the Funds' website at the start of each Business Day (defined below) the identities and quantities of the securities and other assets held by each Fund that will form the basis of the Fund's calculation of its NAV on that Business Day. The portfolio holdings so disclosed will be based on information as of the close of business on the prior Business Day and/or trades that have been completed prior to the opening of business on that Business Day and that are expected to settle on that Business Day.

A Business Day with respect to each Fund is any day on which the Listing Exchange is open for business. As of the date of this SAI, the NYSE Arca observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day (observed), Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

As ETFs, information about each Fund's portfolio holdings is made available on each Business Day in accordance with the provisions of any Order of the SEC applicable to the Funds, regulations of the Funds' Listing Exchange and other applicable SEC regulations, orders and no-action relief. Such information typically reflects all or a portion of a Fund's anticipated portfolio holdings as of the next Business Day. This information is used in connection with the Creation and Redemption process and is disseminated on a daily basis through the facilities of the Listing Exchange, the National Securities Clearing Corporation ("NSCC") and/or third-party service providers.

Daily access to each Fund's portfolio holdings with no lag time is permitted to personnel of the Advisers, the Funds' Distributor and the Funds administrator, custodian and accountant and other agents or service providers of the Trust who have need of such information in connection with the ordinary course of their respective duties to the Funds. The Funds' Chief Compliance Officer may authorize disclosure of portfolio holdings.

Each Fund may disclose its complete portfolio holdings or a portion of its portfolio holdings online at www.wisdomtree.com. Online disclosure of such holdings is publicly available at no charge.

Each Fund will disclose its complete portfolio holdings schedule in public filings with the SEC on a quarterly basis, based on the Fund's fiscal year, within 60 days of the end of the quarter, and will provide that information to shareholders, as required by federal securities laws and regulations thereunder.

No person is authorized to disclose a Fund's portfolio holdings or other investment positions except in accordance with the Policy. The Trust's Board reviews the implementation of the Policy on a periodic basis.

INVESTMENT LIMITATIONS

The following fundamental investment policies and limitations supplement those set forth in each Fund's Prospectus. Unless otherwise noted, whenever a fundamental investment policy or limitation states a maximum percentage of a Fund's assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of the Fund's acquisition of such security or other asset. Accordingly, other than with respect to a Fund's limitations on borrowings, any subsequent change

in values, net assets, or other circumstances will not be considered when determining whether the investment complies with the Fund's investment policies and limitations.

Each Fund's fundamental investment policies cannot be changed without the approval of the holders of a majority of that Fund's outstanding voting securities as defined under the 1940 Act. Each Fund, however, may change the non-fundamental investment policies described below and its investment objective without a shareholder vote provided that it obtains Board approval and notifies its shareholders with at least 60 days prior written notice of any such change.

Fundamental Policies. The following investment policies and limitations are fundamental and may NOT be changed without shareholder approval.

Each Fund, as a fundamental investment policy, may not:

Senior Securities

Issue senior securities, except as permitted under the 1940 Act.

Borrowing

Borrow money, except as permitted under the 1940 Act.

Underwriting

Act as an underwriter of another issuer's securities, except to the extent that each Fund may be considered an underwriter within the meaning of the Securities Act in the disposition of portfolio securities.

Concentration

All Funds except Commodity Currency Fund, Emerging Markets Local Debt Fund and Asia Local Debt Fund:

Purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government or any of its agencies or instrumentalities) if, as a result, more than 25% of the Fund's total assets would be invested in the securities of companies whose principal business activities are in the same industry.

Commodity Currency Fund, Emerging Markets Local Debt Fund and Asia Local Debt Fund only:

Purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government, or any non-U.S. government, or their respective agencies or instrumentalities) if, as a result, more than 25% of the Fund's total assets would be invested in the securities of companies whose principal business activities are in the same industry.

Real Estate

Purchase or sell real estate unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from investing in securities or other instruments backed by real estate, real estate investment trusts or securities of companies engaged in the real estate business).

Commodities

Purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments (but this shall not prevent each Fund from purchasing or selling options and futures contracts or from investing in securities or other instruments backed by physical commodities).

Loans

Lend any security or make any other loan except as permitted under the 1940 Act. This means that no more than 33 1/3% of its total assets would be lent to other parties. This limitation does not apply to purchases of debt securities or to

repurchase agreements, or to acquisitions of loans, loan participations or other forms of debt instruments, permissible under each Fund's investment policies.

Non-Fundamental Policies. The following investment policy is not fundamental and may be changed without shareholder approval.

Each Fund has adopted a non-fundamental investment policy to invest, under normal circumstances, at least 80% of the value of its net assets, plus the amount of any borrowings for investment purposes, in investments that are tied economically to the particular country or geographic region suggested by the Fund's name, including certain derivatives described herein.

Under normal circumstances, the Fund will invest at least 80% of its net assets in Local Debt. For these purposes, Local Debt includes fixed income securities, such as bonds, notes or other debt obligations, denominated in local currencies of countries in Asia, as well as certain derivatives and other instruments described herein.

If, subsequent to an investment, the 80% requirement is no longer met, a Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy.

CONTINUOUS OFFERING

The method by which Creation Unit Aggregations of shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Unit Aggregations of shares are issued and sold by the Funds on an ongoing basis, at any point a distribution, as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Unit Aggregations after placing an order with the Funds' Distributor, breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not underwriters but are effecting transactions in shares, whether or not participating in the distribution of shares, generally are required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus delivery obligation with respect to shares of the Funds are reminded that, pursuant to Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with the sale on the Listing Exchange is satisfied by the fact that the prospectus is available at the Listing Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

MANAGEMENT OF THE TRUST

Board Responsibilities. The Board of Trustees is responsible for overseeing the management and affairs of the Funds and the Trust. The Board has considered and approved contracts, as described herein, under which certain companies provide essential management and administrative services to the Trust. Like most ETFs, the day-to-day business of the Trust, including the day-to-day management of risk, is performed by third-party service providers, such as the Adviser, Sub-Advisers, Distributor and Administrator. The Board is responsible for overseeing the Trust's service providers and, thus, has oversight responsibility with respect to the risk management performed by those service providers. Risk management

seeks to identify and eliminate or mitigate the potential effects of risks, *i.e.*, events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust or Funds. Under the overall supervision of the Board and the Audit Committee (discussed in more detail below), the service providers to the Funds employ a variety of processes, procedures and controls to identify risks relevant to the operations of the Trust and the Funds to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust's business (*e.g.*, the Sub-Advisers are responsible for the day-to-day management of the Funds' portfolio investments) and, consequently, for managing the risks associated with that activity.

The Board's role in risk management oversight begins before the inception of a Fund, at which time the Fund's Adviser presents the Board with information concerning the investment objectives, strategies and risks of the Fund. Additionally, the Fund's Adviser and Sub-Adviser provide the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board oversees the risk management of the Fund's operations, in part, by requesting periodic reports from and otherwise communicating with various personnel of the Fund and its service providers, including the Trust's Chief Compliance Officer and the Fund's independent accountants. The Board and, with respect to identified risks that relate to its scope of expertise, the Audit Committee, oversee efforts by management and service providers to manage risks to which the Fund may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Funds by the Adviser and Sub-Advisers and receives information about those services at its regular meetings. In addition, on at least an annual basis, in connection with its consideration of whether to renew any Advisory Agreements and Sub-Advisory Agreements with the Adviser and Sub-Advisers, respectively, the Board meets with the Adviser and Sub-Adviser to review such services. Among other things, the Board regularly considers the Adviser's and Sub-Advisers' adherence to each Fund's investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about each Fund's performance and investments.

The Trust's Chief Compliance Officer meets regularly with the Board to review and discuss compliance and other issues. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Adviser and Sub-Advisers. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and material compliance matters since the date of the last report.

The Board receives reports from the Trust's service providers regarding operational risks, portfolio valuation and other matters. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of the Trust's financial statements, focusing on major areas of risk encountered by the Trust and noting any significant deficiencies or material weaknesses in the Trust's internal controls.

The Board recognizes that not all risks that may affect the Funds can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve each Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, despite the periodic reports the Board receives and the Board's discussions with the service providers to the Funds, it may not be made aware of all of the relevant information of a particular risk. Most of the Trust's investment management and business affairs are carried out by or through the Funds' Adviser, Sub-Advisers and other service providers each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the Trust's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Members of the Board and Officers of the Trust. Set forth below are the names, birth years, positions with the Trust, terms of office, and principal occupations and other directorships for a minimum of the last five years of the persons currently serving as members of the Board and as Executive Officers of the Trust. Also included below is the term of

Edgar Filing: WisdomTree Trust - Form 497

office for each of the Executive Officers of the Trust. The members of the Board serve as Trustees for the life of the Trust or until retirement or removal, or if their office is terminated pursuant to the Trust's Declaration of Trust.

The Chairman of the Board of Trustees, Victor Ugolyn, is not an interested person of the Funds as that term is defined in the 1940 Act. The Board of Trustees is comprised of a super-majority (75%) of trustees who are not interested persons of the Funds (*i.e.*, independent trustees). There is an Audit Committee and a Governance and Nominating Committee of the Board, each of which is chaired by an independent trustee and comprised solely of independent trustees. The Committee chair for each is responsible for running the Committee meeting, formulating agendas for those meetings, and coordinating with management to serve as a liaison between the independent trustees and management on matters within the scope of the responsibilities of the Committee as set forth in its Board-approved charter. The Funds have determined that this leadership structure is appropriate given the specific characteristics and circumstances of the Funds. The Funds made this determination in consideration of, among other things, the fact that the independent trustees of the Funds constitute a super-majority of the Board, the assets under management of the Funds, the number of Funds overseen by the Board, the total number of trustees on the Board, and the fact that an independent trustee serves as Chair of the Board.

Name, Address and Date of Birth	Position(s) Held with the Trust, Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee/ Officer+	Other Directorships Held by Trustee During the Past 5 Years

* Chair of the Audit Committee.

** Chair of the Governance and Nominating Committee.

**** Elected by and serves at the pleasure of the Board.

+ As of December 31, 2009.

Audit Committee. Each Independent Trustee is a member of the Trust s Audit Committee (the Audit Committee). The principal responsibilities of the Audit Committee are the appointment, compensation and oversight of the Trust s independent auditors, including the resolution of disagreements regarding financial reporting between Trust management

and such independent auditors. The Audit Committee's responsibilities include, without limitation, to (i) oversee the accounting and financial reporting processes of the Trust and its internal control over financial reporting and, as the Committee deems appropriate, to inquire into the internal control over financial reporting of certain third-party service providers; (ii) oversee the quality and integrity of the Funds' financial statements and the independent audits thereof; (iii) oversee, or, as appropriate, assist Board oversight of, the Trust's compliance with legal and regulatory requirements that relate to the Trust's accounting and financial reporting, internal control over financial reporting and independent audits; (iv) approve prior to appointment the engagement of the Trust's independent auditors and, in connection therewith, to review and evaluate the qualifications, independence and performance of the Trust's independent auditors; and (v) act as a liaison between the Trust's independent auditors and the full Board. The Board of the Trust has adopted a written charter for the Audit Committee. The Independent Trustees' independent legal counsel assists the Audit Committee in connection with these duties. During the fiscal year ended August 31, 2010, the Audit Committee held six meetings.

Governance and Nominating Committee. Each Independent Trustee is also a member of the Trust's Governance and Nominating Committee. The principal responsibilities of the Governance and Nominating Committee are to (i) oversee Fund governance matters and (ii) identify individuals qualified to serve as Independent Trustees of the Trust and to recommend its nominees for consideration by the full Board. While the Governance and Nominating Committee is solely responsible for the selection and nomination of the Trust's Independent Trustees, the Nominating Committee may consider nominations for the office of Trustee made by Trust stockholders as it deems appropriate. The Governance and Nominating Committee considers nominees recommended by shareholders if such nominees are submitted in accordance with Rule 14a-8 of the Securities Exchange Act of 1934 (the "1934 Act"), in conjunction with a shareholder meeting to consider the election of Trustees. Trust stockholders who wish to recommend a nominee should send nominations to the Secretary of the Trust that include biographical information and set forth the qualifications of the proposed nominee. During the fiscal year ended August 31, 2010, the Nominating Committee held one meeting.

Individual Trustee Qualifications

The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Trust and the Funds provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding material factors bearing on the management and administration of the Funds, and to exercise their business judgment in a manner that serves the best interests of the Funds' shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Steinberg should serve as trustee of the Funds because of the experience he has gained as president and chief executive officer of WisdomTree Investments and Director of WisdomTree Investments, Inc., his knowledge of and experience in the financial services industry, and the experience he has gained serving as trustee of the Funds since 2005.

The Trust has concluded that Mr. Barton should serve as trustee of the Funds because of the experience he gained working as both a practicing attorney and in a business capacity for several public companies, and the experience he has gained serving as trustee of the Funds since 2006.

The Trust has concluded that Ms. Massaro should serve as trustee of the Funds because of the experience she has gained as a law professor, dean and advisor at various universities, and the experience she has gained serving as trustee of the Funds since 2006.

The Trust has concluded that Mr. Ugolyn should serve as trustee of the Funds because of the experience he gained as chief executive officer of a firm specializing in financial services, his experience in and knowledge of the financial services industry, his service as chairman for another mutual fund family, and the experience he has gained serving as trustee of the Funds since 2006.

Fund Shares Owned by Board Members. The following table shows the dollar amount range of each Trustee's beneficial ownership of shares of the Funds and each other series of the Trust as of the end of the most recently

Edgar Filing: WisdomTree Trust - Form 497

completed calendar year. Unless listed in the chart below, none of the Board members owned shares of the Funds as of the most recently completed calendar year. The Asia Local Debt Fund is new and, therefore, none of the Board members owned shares of the Fund as of the date of this SAI. Dollar amount ranges disclosed are established by the SEC. Beneficial ownership is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. The Trustees and officers of the Trust own less than 1% of the outstanding shares of the Trust.

Investment Adviser. The Adviser, WisdomTree Asset Management, Inc., serves as investment adviser to each Fund pursuant to an Investment Advisory Agreement between the Trust and the Adviser. WisdomTree Asset Management is a Delaware corporation registered as an investment adviser under the Investment Advisers Act of 1940, as amended (the Advisers Act), and has offices located at 380 Madison Avenue 2nd Floor, New York, NY 10017.

Under the Investment Advisory Agreement, WisdomTree Asset Management has overall responsibility for the general management and administration of the Trust. WisdomTree Asset Management provides an investment program for each Fund. WisdomTree Asset Management also arranges for sub-advisory, transfer agency, custody, fund administration and all other non-distribution-related services necessary for the Funds to operate.

Each Fund pays WisdomTree Asset Management the Management Fee indicated below.

Fund	Management Fee
Asia Local Debt Fund	0.55%
Brazilian Real Fund	0.45%
Chinese Yuan Fund	0.45%
Commodity Currency Fund	0.55%

Edgar Filing: WisdomTree Trust - Form 497

Emerging Currency Fund	0.55%
Emerging Markets Local Debt Fund	0.55%
Euro Fund	0.35%
Indian Rupee Fund	0.45%
Japanese Yen Fund	0.35%
New Zealand Dollar Fund	0.45%
South African Rand Fund	0.45%

With respect to each Fund, WisdomTree Asset Management agrees to pay all expenses of the Trust, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of the Trustees of the Trust who are not officers, directors/trustees, partners or employees of the Adviser or its affiliates (the Independent Trustees); (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's chief compliance officer; (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to the Adviser hereunder. Each Sub-Adviser has agreed to pay the fees owed to BNY Mellon for providing custody, administration and transfer agency services. Pursuant to a separate contractual arrangement with respect to each Fund through August 31, 2011, WisdomTree Asset Management arranges for the provision of chief compliance officer (CCO) services and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees, in exchange for a fee paid by each Fund of up to 0.0044% of that Fund's average daily net assets. WisdomTree Asset Management provides CCO services to the Trust.

For the following period(s), the Adviser received the following fees.

Fund	Commencement of Operations	Advisory Fee Paid for the Period Ended August 31, 2008	Advisory Fee Paid for the Period Ended August 31, 2009	Advisory Fee Paid for the Period Ended August 31, 2010

South African Rand Fund	6/25/08	\$ 2,209	\$ 12,639	\$ 44,157

* Not in operation for the period indicated.

** The Fund has not yet commenced operations.

The Investment Advisory Agreement with respect to each Fund continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board of Trustees of the Trust or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, provided that in either event such continuance is also approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval. If the

shareholders of any Fund fail to approve the Investment Advisory Agreement, WisdomTree Asset Management may continue to serve in the manner and to the extent permitted by the 1940 Act and rules and regulations thereunder. The Investment Advisory Agreement with respect to any Fund is terminable without any penalty, by vote of the Board of Trustees of the Trust or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of that Fund, or by WisdomTree Asset Management, in each case on not less than 30 days nor more than 60 days prior written notice to the other party; provided, that a shorter notice period shall be permitted for a Fund in the event its shares are no longer listed on a national securities exchange. The Investment Advisory Agreement will terminate automatically and immediately in the event of its assignment (as defined in the 1940 Act).

Sub-Advisers. Mellon Capital Management Corporation (Mellon Capital) serves as the Sub-Adviser for each of the Fixed Income Funds. Mellon Capital is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors with its principal office located at 50 Fremont Street, San Francisco, CA 94105. As of December 31, 2010, Mellon Capital had assets under management totaling approximately \$208 billion, including overlay strategies and assets managed as dual employees of BNY Mellon and The Dreyfus Corporation. Mellon Capital is a wholly-owned indirect subsidiary of BNY Mellon, a publicly traded financial holding company.

The Dreyfus Corporation (Dreyfus) serves as the Sub-Adviser for each of the Currency Income Funds. Dreyfus is located at 200 Park Avenue, New York, New York 10166. As of November 30, 2010, Dreyfus has assets under management totaling approximately \$411 billion. Dreyfus is a wholly-owned indirect subsidiary of BNY Mellon, a publicly traded financial holding company.

With respect to each Fund, WisdomTree Asset Management pays the Sub-Adviser to such Fund a fee equal to one-half of the fee paid to WisdomTree Asset Management for providing sub-advisory services to such Fund as described below.

For the following period(s), Mellon Capital received the following fees:

Fund	Commencement of Operations	Sub-Advisory Fee Paid for the Period Ended August 31, 2008	Sub-Advisory Fee Paid for the Period Ended August 31, 2009	Sub-Advisory Fee Paid for the Period Ended August 31, 2010
Asia Local Debt Fund	**	*	*	*
Emerging Markets Local Debt Fund	8/9/10	*	*	\$ 27,071

* Not in operation for the period indicated.

** The Fund has not yet commenced operations.

Edgar Filing: WisdomTree Trust - Form 497

For the following periods, Dreyfus received the following fees:

Fund	Commencement of Operations	Sub-Advisory Fee Paid for the Period Ended August 31, 2008	Sub-Advisory Fee Paid for the Period Ended August 31, 2009	Sub-Advisory Fee Paid for the Period Ended August 31, 2010
Brazilian Real Fund	5/14/08	\$ 62,656	\$ 174,006	\$ 339,339

South African Rand Fund	6/25/08	\$ 1,105	\$ 6,336	\$ 22,079

* Not in operation for the period indicated.

Each Sub-Adviser believes that it may perform sub-advisory and related services for the Trust without violating applicable banking laws or regulations. However, the legal requirements and interpretations about the permissible activities of banks and their affiliates may change in the future. These changes could prevent Mellon Capital or Dreyfus from continuing to perform services for the Trust. If this happens, the Board would consider selecting other qualified firms.

The Investment Sub-Advisory Agreement with respect to each Fund continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board of Trustees of the Trust or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the applicable Fund, provided that in either event such continuance is also approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval. If the shareholders of a Fund fail to approve that Fund's Investment Sub-Advisory Agreement, WisdomTree Asset Management may continue to serve in the manner and to the extent permitted by the 1940 Act and rules and regulations thereunder. Each Fund's Investment Sub-Advisory Agreement is terminable without any penalty, by vote of the Board of Trustees of the Trust or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, or by WisdomTree Asset Management, in each case on not less than 30 days nor more than 60 days prior written notice to the other party; provided, that a shorter notice period shall be permitted for the Funds in the event its shares are no longer listed on a national securities exchange. Each Investment Sub-Advisory Agreement will terminate automatically and immediately in the event of its assignment (as defined in the 1940 Act).

Portfolio Managers. Mellon Capital and Dreyfus each utilize a team of investment professionals acting together to manage the assets of the Funds. Each team meets regularly to review portfolio holdings and to discuss purchase and sale activity. Each team adjusts holdings in each Fund's portfolio as it deems appropriate in the pursuit of each Fund's investment objectives. The individual members of each team who are primarily responsible for the day-to-day management of each Fund's portfolio are listed below.

David C. Kwan has been a Managing Director of Mellon Capital since 2000. He has also been the Head of Fixed Income Management Group since 1994. He received his M.B.A. from the University of California at Berkeley in 1990. Mr. Kwan has 21 years of investment experience.

Lisa Mears O'Connor, CFA, has been a Managing Director of Mellon Capital since 2010. She manages Mellon Capital's active fixed income team. She received her M.B.A. from the University of California at Berkeley in 2002. Ms. Mears O'Connor attained the Chartered Financial Analyst (CFA) designation in 1998. Ms. Mears O'Connor has over 18 years of investment experience.

Zandra Zelaya has been a Director, Fixed Income at Mellon Capital since November 2009. From November 2007 to November 2009 she was a Vice President, Fixed Income at Mellon Capital. Ms. Zelaya joined Mellon Capital in 1997 as a fixed income associate. Throughout the years she has held various positions in the Fixed Income Management Group including Senior Portfolio Manager from 2002 to 2006 and Assistant Vice President from 2006 to November 2007. Ms. Zelaya has attained the Chartered Financial Analyst (CFA) designation. She graduated with a B.S. from California State University, Hayward. Ms. Zelaya has 15 years of investment experience.

Mr. Kwan and Ms. O Connor manage the Fixed Income Funds. Mr. Kwan and Ms. Zelaya manage the Currency Income Funds in their capacity as dual employees of Dreyfus. Mr. Kwan and Ms. Zelaya have been employees of Dreyfus since 2005. Each Portfolio Manager has managed each Fund since inception.

Each portfolio manager is responsible for various functions related to portfolio management, including, but not limited to, investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of his or her portfolio management team with more limited responsibilities. Each portfolio manager is authorized to make investment decisions for all portfolios managed by the team. Each portfolio manager has appropriate limitations on his or her authority for risk management and compliance purposes. No member of the portfolio team manages assets outside of the team. Each portfolio manager has managed each Fund since its inception.

As of August 31, 2010, the team managed eight other registered investment companies with approximately \$3.1 billion in assets; 26 pooled investment vehicles with approximately \$14.1 billion in assets; and 25 other accounts with approximately \$4.9 billion in assets.

Portfolio Manager Fund Ownership. As of the date hereof, none of the portfolio managers owned shares of the Funds.

Portfolio Manager Compensation. Each portfolio manager receives compensation under a compensation plan directed by Mellon Capital. The primary objectives of the Mellon Capital compensation plan are to:

Motivate and reward continued growth and profitability

Attract and retain high-performing individuals critical to the on going success of Mellon Capital

Motivate and reward superior business/investment performance

Create an ownership mentality for all plan participants

The investment professionals' cash compensation is comprised primarily of a market-based base salary and (variable) incentives (cash and deferred). An investment professional's base salary is determined by the employee's experience and performance in the role, taking into account the ongoing compensation benchmark analyses. A portfolio manager's base salary is generally a fixed amount that may change as a result of an annual review, upon assumption of new duties, or when a market adjustment of the position occurs. Funding for the Mellon Capital Annual and Long Term Incentive Plan is through a pre-determined fixed percentage of overall Mellon Capital profitability. Therefore, all bonus awards are based initially on Mellon Capital's financial performance. Annual incentive opportunities are pre-established for each individual, expressed as a percentage of base salary (target awards). These targets are derived based on a review of competitive market data for each position annually. Annual awards are determined by applying multiples to this target award. Awards are 100% discretionary. Factors considered in awards include individual performance, team performance, investment performance of the associated portfolio(s) including both short- and long-term returns and qualitative behavioral factors. Other factors considered in determining the award are the asset size and revenue growth/retention of the products managed. Awards are paid partially in cash with the balance deferred through the Long Term Incentive Plan.

These positions that participate in the Long Term Incentive Plan have a high level of accountability and a large impact on the success of the business due to the position's scope and overall responsibility. This plan provides for an annual award, payable in cash after a three-year cliff vesting period as well as a grant of BNY Mellon Restricted Stock for senior level roles.

Mellon Capital's portfolio managers responsible for managing mutual funds are paid by Mellon Capital and not by the mutual funds. The same methodology described above is used to determine portfolio manager compensation with respect

to the management of mutual funds and other accounts. Mutual fund portfolio managers are also eligible for the standard retirement benefits and health and welfare benefits available to all Mellon Capital employees. Certain portfolio managers may be eligible for additional retirement benefits under several supplemental retirement plans that Mellon Capital provides to restore dollar-for-dollar the benefits of management employees that had been cut back solely as a result of certain limits due to the tax laws. These plans are structured to provide the same retirement benefits as the standard retirement benefits. In addition, mutual fund portfolio managers whose compensation exceeds certain limits may elect to defer a portion of their salary and/or bonus under BNY Mellon Deferred Compensation Plan for Employees.

Description of Material Conflicts of Interest. Because the portfolio managers manage multiple portfolios for multiple clients, the potential for conflicts of interest exists. Each portfolio manager generally manages portfolios having substantially the same investment style as the Funds. However, the portfolios managed by a portfolio manager may not have portfolio compositions identical to those of the Funds managed by the portfolio manager due, for example, to specific investment limitations or guidelines present in some portfolios or accounts but not others. The portfolio managers may purchase securities for one portfolio and not another portfolio, and the performance of securities purchased for one portfolio may vary from the performance of securities purchased for other portfolios. A portfolio manager may place transactions on behalf of other accounts that are directly or indirectly contrary to investment decisions made on behalf of a Fund, or make investment decisions that are similar to those made for a Fund, both of which have the potential to adversely impact a Fund depending on market conditions. For example, a portfolio manager may purchase a security in one portfolio while appropriately selling that same security in another portfolio. In addition, some of these portfolios have fee structures that are or have the potential to be higher than the advisory fees paid by a Fund, which can cause potential conflicts in the allocation of investment opportunities between a Fund and the other accounts. However, the compensation structure for portfolio managers does not generally provide incentive to favor one account over another because that part of a manager's bonus based on performance is not based on the performance of one account to the exclusion of others. There are many other factors considered in determining the portfolio manager's bonus and there is no formula that is applied to weight the factors listed. In addition, current trading practices do not allow Mellon Capital or Dreyfus to intentionally favor one portfolio over another as trades are executed or as trade orders are received. Portfolio rebalancing dates also generally vary between fund families. Program trades created from the portfolio rebalance are executed at market close.

Codes of Ethics. The Trust, WisdomTree Asset Management, each Sub-Adviser and the Funds' distributor have each adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act. The Codes of Ethics permit personnel subject to such Codes of Ethics to invest in securities for their personal investment accounts, subject to certain limitations, including securities that may be purchased or held by the Funds. The Codes of Ethics are on public file with, and are available from, the SEC.

Administrator, Custodian, Transfer Agent and Securities Lending Agent. BNY Mellon serves as administrator, custodian and transfer agent for each Fund. BNY Mellon's principal address is One Wall Street, New York, New York 10286. Under the Fund Administration and Accounting Agreement with the Trust, BNY Mellon provides necessary administrative, legal, tax, accounting services and financial reporting for the maintenance and operations of the Trust and the Funds. In addition, BNY Mellon makes available the office space, equipment, personnel and facilities required to provide such services. Under the custody agreement with the Trust, BNY Mellon maintains in separate accounts cash, securities and other assets of the Trust and the Funds, keeps all necessary accounts and records, and provides other services. BNY Mellon is required, upon the order of the Trust, to deliver securities held by BNY Mellon and to make payments for securities purchased by the Trust for the Funds. Also, under a Delegation Agreement, BNY Mellon is authorized to appoint certain foreign custodians or foreign custody managers for Fund investments outside the United States. Pursuant to a Transfer Agency and Service Agreement with the Trust, BNY Mellon acts as transfer agent for the Funds' authorized and issued shares of beneficial interest, and as dividend disbursing agent of the Trust. As compensation for the foregoing services, BNY Mellon receives certain out-of-pocket costs, transaction fees and asset-based fees which are accrued daily and paid monthly by the Trust from the Trust's custody account with BNY Mellon. BNY Mellon serves as the Funds' securities lending agent. As compensation for providing such services, BNY Mellon receives a portion of the income earned by the Funds on collateral investments in connection with the lending program.

The Sub-Advisers pay the Administrator for providing services to the Funds. The Funds are not responsible for, and have not paid, such fees.

Distributor. ALPS Distributors, Inc. serves as Distributor for the Trust. The principal address of the Distributor is 1290 Broadway, Suite 1100, Denver, Colorado 80203. The Distributor has entered into a Distribution Agreement with the Trust pursuant to which it distributes shares of each Fund. The Distribution Agreement will continue for two years from its effective date and is renewable annually. Shares are continuously offered for sale by the Funds through the Distributor only in Creation Unit Aggregations, as described in the applicable Prospectus and below in the Creation and Redemption of Creation Units Aggregations section. Shares in less than Creation Unit Aggregations are not distributed by the Distributor. The Distributor will deliver the applicable Prospectus and, upon request, this SAI to persons purchasing Creation Unit Aggregations and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the 1934 Act and a member of the Financial Industry Regulatory Authority (FINRA). The Distributor is not affiliated with WisdomTree Investments, WisdomTree Asset Management, or any stock exchange.

The Distribution Agreement for the Funds provides that it may be terminated at any time, without the payment of any penalty, on at least 60 days prior written notice to the other party (i) by vote of a majority of the Independent Trustees or (ii) by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the relevant Fund. The Distribution Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The Distributor may also enter into agreements with securities dealers (Soliciting Dealers) who will solicit purchases of Creation Unit Aggregations of shares. Such Soliciting Dealers may also be Authorized Participants (as defined below) or DTC Participants (as defined below).

Intermediary Compensation. WisdomTree Asset Management or its affiliates, out of their own resources and not out of Fund assets (*i.e.*, without additional cost to the Funds or their shareholders), may pay certain broker-dealers, banks and other financial intermediaries (Intermediaries) for certain activities related to the Funds, including marketing and education support and the sale of Fund shares. These arrangements are sometimes referred to as revenue sharing arrangements. Revenue sharing arrangements are not financed by the Funds, and thus, do not result in increased Fund expenses. They are not reflected in the fees and expenses listed in the fees and expenses sections of the Funds prospectuses, and they do not change the price paid by investors for the purchase of a Fund s shares or the amount received by a shareholder as proceeds from the redemption of Fund shares.

Such compensation may be paid to Intermediaries that provide services to the Funds, including marketing and education support (such as through conferences, webinars and printed communications). Such compensation may also be paid to Intermediaries for inclusion of the Funds on a sales list, including a preferred or select sales list, in other sales programs. WisdomTree Asset Management periodically assesses the advisability of continuing to make these payments.

Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to your adviser, broker or other investment professional, if any, may also be significant to such adviser, broker or investment professional. Because an Intermediary may make decisions about which investment options it will make available or recommend, or what services to provide in connection with various products, based on payments it receives or is eligible to receive, such payments create conflicts of interest between the Intermediary and its clients. For example, these financial incentives may cause the Intermediary to recommend a Fund over other investments. The same conflict of interest exists with respect to your financial adviser, broker or investment professionals if he or she receives similar payments from his or her Intermediary firm.

WisdomTree Asset Management has entered into an arrangement with Advisors Asset Management, Inc. (AAM) for the marketing and education support and promotion of Fund shares in the independent broker-dealer channel in exchange for cash compensation based on the success of AAM s efforts. Specifically, AAM provides marketing and education support and promotes the Funds to broker-dealers and investment advisers who in turn purchase fund shares on behalf of their clients or recommend the purchase of Fund shares to their clients. Upon termination of the agreement the WisdomTree

Asset Management will make additional payments to AAM based upon a number of criteria, including the overall success of AAM's efforts.

Intermediary information is only current as of the date of this SAI. Please contact your adviser, broker or other investment professional for more information regarding any payments his or her Intermediary firm may receive. Any payments made by WisdomTree Asset Management or its affiliates to an Intermediary may create the incentive for an Intermediary to encourage customers to buy shares of WisdomTree Funds.

If you have any additional questions, please call 1-866-909-9473.

BROKERAGE TRANSACTIONS

Each Sub-Adviser assumes general supervision over placing orders on behalf of each Fund for the purchase and sale of portfolio securities. In selecting the brokers or dealers for any transaction in portfolio securities, the Sub-Adviser's policy is to make such selection based on factors deemed relevant, including, but not limited to, the breadth of the market in the security, the price of the security, the reasonableness of the commission or mark-up or mark-down, if any, execution capability, settlement capability, back office efficiency and the financial condition of the broker or dealer, both for the specific transaction and on a continuing basis. The overall reasonableness of brokerage commissions paid is evaluated by each Sub-Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Brokers may also be selected because of their ability to handle special or difficult executions, such as if they may be involved in large block trades, less liquid securities, broad distributions, or other circumstances. Each Sub-Adviser does not consider the provision or value of research, products or services a broker or dealer may provide, if any, as a factor in the selection of a broker or dealer or the determination of the reasonableness of commissions paid in connection with portfolio transactions. The Trust has adopted policies and procedures that prohibit the consideration of sales of a Fund's shares as a factor in the selection of a broker or a dealer to execute its portfolio transactions. The Funds did not pay brokerage commissions for the fiscal years ended August 31, 2008, 2009, and/or 2010.

ADDITIONAL INFORMATION CONCERNING THE TRUST

Shares. The Trust was established as a Delaware statutory trust on December 15, 2005, and consists of multiple series or funds. Each Fund issues shares of beneficial interest, with \$0.001 par value. The Board may designate additional funds. The Trust is registered with the SEC as an open-end management investment company.

Each share issued by a Fund has a pro rata interest in the assets of that Fund. Shares have no preemptive, exchange, subscription or conversion rights and are freely transferable. Each share is entitled to participate equally in dividends and distributions declared by the Board of Trustees with respect to the relevant Fund, and in the net distributable assets of such Fund on liquidation.

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shares of all Funds vote together as a single class except that, if the matter being voted on affects only a particular Fund, and, if a matter affects a particular Fund differently from other Funds, that Fund will vote separately on such matter.

Under Delaware law, the Trust is not required to hold an annual meeting of shareholders unless required to do so under the 1940 Act. The policy of the Trust is not to hold an annual meeting of shareholders unless required to do so under the 1940 Act. All shares (regardless of the Fund) have noncumulative voting rights for the Board. Under Delaware law, Trustees of the Trust may be removed by vote of the shareholders.

Following the creation of the initial Creation Unit Aggregation(s) of shares of a Fund and immediately prior to the commencement of trading in such Fund's shares, a holder of shares may be a control person of the Fund, as defined in the 1940 Act. A Fund cannot predict the length of time for which one or more shareholders may remain a control person of the Fund.

Shareholders may make inquiries by writing to the Trust, c/o ALPS Distributors, Inc. at 1290 Broadway, Suite 1100, Denver, Colorado 80203.

Absent an applicable exemption or other relief from the SEC or its staff, beneficial owners of more than 5% of the shares of a Fund may be subject to the reporting provisions of Section 13 of the 1934 Act and the SEC's rules promulgated thereunder. In addition, absent an applicable exemption or other relief from the SEC staff, officers and Trustees of a Fund and beneficial owners of 10% of the shares of a Fund (Insiders) may be subject to the insider reporting, short-swing profit and short sale provisions of Section 16 of the 1934 Act and the SEC's rules promulgated thereunder. Beneficial owners and Insiders should consult with their own legal counsel concerning their obligations under Sections 13 and 16 of the 1934 Act.

Termination of the Trust or a Fund. The Trust or a Fund may be terminated by a majority vote of the Board of Trustees or the affirmative vote of a super majority of the holders of the Trust or such Fund entitled to vote on termination. Although the shares are not automatically redeemable upon the occurrence of any specific event, the Trust's organizational documents provide that the Board will have the unrestricted power to alter the number of shares in a Creation Unit Aggregation. In the event of a termination of the Trust or a Fund, the Board, in its sole discretion, could determine to permit the shares to be redeemable in aggregations smaller than Creation Unit Aggregations or to be individually redeemable. In such circumstance, the Trust may make redemptions in kind, for cash, or for a combination of cash or securities.

Role of DTC. The Depository Trust Company (DTC) acts as Securities Depository for the Shares of the Trust. Shares of each Fund are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC.

DTC, a limited-purpose trust company, was created to hold securities of its participants (DTC Participants) and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by NYSE Arca and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (Indirect Participants).

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as Beneficial Owners) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares. No Beneficial Owner shall have the right to receive a certificate representing such shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depository Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of each Fund held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, and number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares of the Trust. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of each Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a street name, and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants. DTC may decide to discontinue providing its service with respect to shares of the Trust at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for DTC to perform its functions at a comparable cost.

CREATION AND REDEMPTION OF CREATION UNIT AGGREGATIONS

Creation. The Trust issues and sells shares of each Fund only in Creation Unit Aggregations on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt, on any Business Day, of an order in proper form.

Fund Deposit. The consideration for purchase of Creation Unit Aggregations of a Fund may consist of (i) the in-kind deposit of a designated portfolio of money market instruments or fixed income securities closely approximating the holdings of the Fund, and (ii) U.S. cash and/or non-U.S. currency (the Deposit Securities) and an amount of cash denominated in U.S. dollars (the Cash Component) computed as described below. Together, the Deposit Securities and the Cash Component constitute the Fund Deposit, which represents the minimum initial and subsequent investment amount for a Creation Unit Aggregation of any Fund.

Each Fund may permit or require the submission of a basket of money market instruments, fixed income securities, non-U.S. currency or cash denominated in U.S. dollars that differs from the composition of the published basket. Each Fund may permit or require the consideration for Creation Unit Aggregations to consist solely of cash or non-U.S. currency. Each Fund may permit or require the substitution of an amount of cash denominated in U.S. dollars or non-U.S. currency (*i.e.*, a cash in lieu amount) to be added to the Cash Component to replace any Deposit Security. For example, the Trust reserves the right to permit or require a cash in lieu amount where the delivery of the Deposit Security by the Authorized Participant (as described below) would be prohibited or restricted under applicable U.S. or non-U.S. laws, or in certain other situations at the sole discretion of the Trust.

The Cash Component is sometimes also referred to as the Balancing Amount. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit Aggregation and the value of the Deposit Securities. If the Cash Component is a positive number (*i.e.*, the NAV per Creation Unit Aggregation exceeds the value of the Deposit Securities), the creator will deliver the Cash Component. If the Cash Component is a negative number (*i.e.*, the NAV per Creation Unit Aggregation is less than the value of the Deposit Securities), the creator will receive the Cash Component. Computation of the Cash Component excludes any stamp duty tax or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, which shall be the sole responsibility of the Authorized Participant.

Each Fund, through the NSCC or otherwise, makes available on each Business Day, prior to the opening of business on the applicable Listing Exchange (currently 9:30 a.m. New York time), the current Fund Deposit for each Fund. Such Deposit Securities are applicable, subject to any adjustments, in order to effect creations of Creation Unit Aggregations of a given Fund until such time as the next-announced composition of the Deposit Securities is made available.

Procedures for Creation of Creation Unit Aggregations. To be eligible to place orders with the Distributor and to create a Creation Unit Aggregation of a Fund, an entity must be a DTC Participant and must have executed an agreement with the Distributor with respect to creations and redemptions of Creation Unit Aggregations (Participant Agreement). A DTC Participant that has executed a Participant Agreement is referred to as an Authorized Participant. Investors should contact the Distributor for the names of Authorized Participants that have signed a Participant Agreement. All shares of a Fund, however created, will be entered on the records of DTC in the name of Cede & Co. for the account of a DTC Participant.

All orders to create shares must be placed for one or more Creation Unit Aggregations. Orders must be transmitted by an Authorized Participant pursuant to procedures set forth in the Participant Agreement, which procedures may change from time to time without notice at the discretion of the Trust. The date on which an order to create Creation Unit Aggregations (or an order to redeem Creation Unit Aggregations, as discussed below) is placed is referred to as the Transmittal Date. Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement, as described below. Economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Distributor or an Authorized Participant.

On days when a Listing Exchange or U.S. or non-U.S. bond markets close earlier than normal, the Funds may require purchase orders to be placed earlier in the day. All questions as to the number of Deposit Securities to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding.

If BNY Mellon does not receive both the required Deposit Securities and the Cash Component by the specified time on the Settlement Date, the Trust may cancel or revoke acceptance of such order. Upon written notice to the Distributor, such canceled or revoked order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the then current NAV of the Fund. The delivery of Creation Unit Aggregations so created generally will occur no later than the Settlement Date.

Creation Unit Aggregations may be created in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since, in addition to available Deposit Securities, U.S. cash (or an equivalent amount of non-U.S. currency) must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) at least 102%, which the Trust may change from time to time, of the market value of the undelivered Deposit Securities (the Additional Cash Deposit) with the Fund pending delivery of any missing Deposit Securities. The Authorized Participant must deposit with BNY Mellon the appropriate amount of federal funds by 2:00 p.m. Eastern time (or such other time as specified by the Trust) on the Settlement Date. If BNY Mellon does not receive the Additional Cash Deposit in the appropriate amount by such time, then the order may be deemed to be rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. An additional amount of U.S. cash (or an equivalent amount of non-U.S. currency) shall be required to be deposited with BNY Mellon, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to 102%, which the Trust may change from time to time, of the daily marked-to-market value of the missing Deposit Securities. To the extent that missing Deposit Securities are not received by the specified time on the Settlement Date, or in the event a marked-to-market payment is not made within one Business Day following notification by the Distributor that such a payment is required, the Trust may use the cash on deposit to purchase the missing Deposit Securities. The Authorized Participant will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the transmittal date plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by BNY Mellon or purchased by the Trust and deposited into the Trust. In addition, a transaction fee, as listed below, will be charged in all cases.

Placement of Creation Orders. BNY Mellon shall cause the sub-custodian of the Funds to maintain an account into which the Authorized Participant shall deliver, on behalf of itself or the party on whose behalf it is acting, the Fund Deposit, with

any appropriate adjustments as advised by the Trust. Deposit Securities must be delivered to an account maintained at the applicable local sub-custodian(s). Authorized Participants must have appropriate local custodial or sub-custodial accounts in the applicable non-U.S. market in which a Fund operates for delivery and receipt of non-U.S. securities and non-U.S. currency. When a non-U.S. market is closed due to local market holidays, the settlement process for Fund Securities in that market will not commence until the end of the local holiday period.

Acceptance of Orders for Creation Unit Aggregations. The Trust reserves the absolute right to reject or revoke acceptance of a creation order transmitted to it by the Distributor in respect of any Fund. For example, the Trust may reject or revoke acceptance of an order, if (i) the order is not in proper form; (ii) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of any Fund; (iii) the Deposit Securities delivered are not as disseminated through the facilities of the NSCC for that date by the Fund as described above; (iv) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (v) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (vi) acceptance of the Fund Deposit would otherwise, in the discretion of the Trust or WisdomTree Asset Management, have an adverse effect on the Trust or the rights of beneficial owners; or (vii) in the event that circumstances outside the control of the Trust, BNY Mellon, the Distributor or WisdomTree Asset Management make it for all practical purposes impossible to process creation orders. Examples of such circumstances include natural disaster, war, or revolution; public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, WisdomTree Asset Management, the Distributor, DTC, NSCC, BNY Mellon or sub-custodian or any other participant in the creation process, and similar extraordinary events. The Distributor shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit Aggregation of its rejection of the order of such person. The Trust, BNY Mellon, a sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall any of them incur any liability for the failure to give any such notification.

Creation/Redemption Transaction Fee. Each Fund imposes a Transaction Fee on investors purchasing or redeeming Creation Units. The Transaction Fee will be limited to amounts that have been determined by WisdomTree Asset Management to be appropriate. The purpose of the Transaction Fee is to protect the existing shareholders of the Funds from the dilutive costs associated with the purchase and redemption of Creation Units. Where a Fund permits cash creations (or redemptions) or cash in lieu of depositing one or more Deposit Securities, the purchaser (or redeemer) may be assessed a higher Transaction Fee to offset the transaction cost to the Fund of buying (or selling) those particular Deposit Securities. Transaction Fees will differ for each Fund, depending on the transaction expenses related to each Fund's portfolio securities. Every purchaser of a Creation Unit will receive a Prospectus that contains disclosure about the Transaction Fee, including the maximum amount of the Transaction Fee charged by the Fund.

The following table sets forth the standard and maximum creation transaction fee for each of the Funds.

Fund	Approximate Value of One Creation Unit	Standard Creation/Redemption Transaction Fee	Maximum Creation/Redemption Transaction Fee
Asia Local Debt Fund	\$ 5,000,000	\$ 700	\$ 6,500
Brazilian Real Fund	\$ 5,000,000	\$ 300	\$ 1,200
Chinese Yuan Fund	\$ 5,000,000	\$ 300	\$ 1,200
Commodity Currency Fund	\$ 2,500,000	\$ 500	\$ 2,000
Emerging Currency Fund	\$ 2,000,000	\$ 300	\$ 1,200
Emerging Markets Local Debt Fund	\$ 5,000,000	\$ 700	\$ 6,500
Euro Fund	\$ 5,000,000	\$ 800	\$ 3,200
Indian Rupee Fund	\$ 2,500,000	\$ 300	\$ 1,200
Japanese Yen Fund	\$ 5,000,000	\$ 500	\$ 1,500

Fund	Approximate Value of One Creation Unit	Standard Creation/Redemption Transaction Fee	Maximum Creation/Redemption Transaction Fee
New Zealand Dollar Fund	\$ 2,500,000	\$ 300	\$ 1,200
South African Rand Fund	\$ 2,500,000	\$ 300	\$ 1,200

Placement of Redemption Orders. The process to redeem Creation Unit Aggregations works much like the process to purchase Creation Unit Aggregations, but in reverse. Orders to redeem Creation Unit Aggregations of the Funds must be delivered through an Authorized Participant. Investors other than Authorized Participants are responsible for making arrangements for a redemption request to be made through an Authorized Participant. Orders must be accompanied or followed by the requisite number of shares of the Fund specified in such order, which delivery must be made to BNY Mellon no later than 10:00 a.m. New York time on the next Business Day following the Transmittal Date. All other procedures set forth in the Participant Agreement must be properly followed. Such procedures may change from time to time without notice at the discretion of the Trust. Authorized Participants must have appropriate custodial or sub-custodial accounts in the applicable non-U.S. market in which a Fund operates for delivery and receipt of non-U.S. securities and non-U.S. currency. Due to the schedule of holidays in certain countries, the delivery of redemption proceeds for certain Funds may take longer than three Business Days after the day on which the redemption request is received in proper form. In such cases, the local market settlement procedures will not commence until the end of the local holiday periods.

To the extent contemplated by an Authorized Participant's agreement, in the event the Authorized Participant has submitted a redemption request in proper form but is unable to transfer all or part of the Creation Unit Aggregation to be redeemed to the Funds' transfer agent, the transfer agent will nonetheless accept the redemption request in reliance on the undertaking by the Authorized Participant to deliver the missing shares as soon as possible. Such undertaking shall be secured by the Authorized Participant's delivery and maintenance of collateral consisting of cash having a value (marked to market daily) at least equal to 105%, which WisdomTree Asset Management may change from time to time, of the value of the missing shares. The current procedures for collateralization of missing shares require, among other things, that any cash collateral shall be in the form of U.S. dollars (or at the discretion of the Trust non-U.S. currency in an equivalent amount) in immediately available funds and shall be held by BNY Mellon and marked to market daily. The fees of BNY Mellon and any sub-custodians in respect of the delivery, maintenance and redelivery of the cash collateral shall be payable by the Authorized Participant. The Trust, on behalf of the affected Fund, is permitted to purchase the missing shares or acquire the Deposit Securities and the Cash Component underlying such shares at any time and will subject the Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such shares, Deposit Securities or Cash Component and the value of the collateral. If the requisite number of shares of the relevant Fund are not delivered on the Transmittal Date as described above, a Fund may reject or revoke acceptance of the redemption request.

Each Fund may pay out the proceeds of redemptions of Creation Unit Aggregations solely in cash or non-U.S. currency or through any combination of cash, non-U.S. currency, money market securities or fixed income securities. In addition, an investor may request a redemption in cash or non-U.S. currency that the Fund may, in its sole discretion, permit. In either case, the investor will receive a payment equal to the NAV of its shares based on the NAV of shares of the relevant Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). A Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and each Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Unit Aggregations for cash (or non-U.S. currency in the case of the Currency Income Funds) to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws.

The ability of the Trust to effect in-kind creations and redemptions is subject, among other things, to the condition that, within the time period from the date of the order to the date of delivery of the securities, there are no days that are holidays in the applicable foreign market. For every occurrence of one or more intervening holidays in the applicable foreign market that are not holidays observed in the U.S. equity market, the redemption settlement cycle may be extended by the number of such intervening holidays. In addition to holidays, other unforeseeable closings in a foreign market due to emergencies may also prevent the Trust from delivering securities within the normal settlement period. The Funds will not suspend or postpone redemption beyond seven days, except as permitted under Section 22(e) of the 1940 Act. Section 22(e) provides that the right of redemption may be suspended or the date of payment postponed with respect to any Fund (1) for any period during which the New York Stock Exchange (NYSE) is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the NYSE is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the Fund's portfolio securities or determination of its NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

TAXES

The following discussion of certain U.S. federal income tax consequences of investing in the Funds is based on the Code, U.S. Treasury regulations, and other applicable authority, all as in effect as of the date of the filing of this SAI. These authorities are subject to change by legislative or administrative action, possibly with retroactive effect. The following discussion is only a summary of some of the important U.S. federal income tax considerations generally applicable to investments in the Funds. There may be other tax considerations applicable to particular shareholders. Shareholders should consult their own tax advisors regarding their particular situation and the possible application of foreign, state, and local tax laws.

Qualification as a Regulated Investment Company. Each Fund intends to elect to be treated and qualify each year as a RIC under Subchapter M of the Code. In order to qualify for the special tax treatment accorded RICs and their shareholders, each Fund must, among other things:

- (a) derive at least 90% of its gross income each year from (i) dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and (ii) net income derived from interests in qualified publicly traded partnerships (as defined below);
- (b) diversify its holdings so that, at the end of each quarter of its taxable year, (i) at least 50% of the market value of the Fund's total assets consists of cash and cash items, U.S. government securities, securities of other RICs and other securities, with investments in such other securities limited with respect to any one issuer to an amount not greater than 5% of the value of the Fund's total assets and not greater than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund's total assets is invested in (1) the securities (other than those of the U.S. government or other RICs) of any one issuer or two or more issuers that are controlled by the Fund and that are engaged in the same, similar or related trades or businesses or (2) the securities of one or more qualified publicly traded partnerships; and
- (c) distribute with respect to each taxable year at least 90% of its investment company taxable income (as that term is defined in the Code without regard to the deduction for dividends paid generally taxable ordinary income and the excess, if any, of net short-term capital gains over net long-term capital losses) and net tax-exempt interest income.

In general, for purposes of the 90% of gross income requirement described in (a) above, income derived from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by a Fund. However, 100% of the net income derived from an interest in a qualified publicly traded partnership (generally, a partnership (1) interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, (2) that derives at least 90% of its income from the passive income sources specified in Code Section 7704(d), and (3) that derives less than 90% of its income from the qualifying income described in (a)(i) of the prior paragraph) will be treated as

qualifying income. In addition, although in general the passive loss rules of the Code do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a qualified publicly traded partnership.

The U.S. Treasury Department has authority to issue regulations that would exclude foreign currency gains from the 90% test described in (a) above if such gains are not directly related to a fund's business of investing in stock or securities. Accordingly, regulations may be issued in the future that could treat some or all of a Fund's non-U.S. currency gains as non-qualifying income, thereby potentially jeopardizing a Currency Income Fund's status as a RIC for all years to which the regulations are applicable.

Taxation of the Funds. If a Fund qualifies as a RIC, that Fund will not be subject to federal income tax on income and gains that are distributed in a timely manner to its shareholders in the form of dividends.

If a Fund fails to qualify for any taxable year as a RIC, all of its taxable income (including its net capital gains) will be subject to tax at corporate income tax rates without any deduction for distributions to shareholders, and all distributions from earnings and profits, including any distributions of net long-term capital gains and net tax-exempt income, would be taxable to shareholders as dividend income. In addition, a Fund could be required to recognize unrealized gains, pay substantial taxes and interest and make substantial distributions before requalifying as a regulated investment company that is accorded special tax treatment.

Each Fund intends to distribute at least annually substantially all of its investment company taxable income and net capital gains. Investment company taxable income that is retained by a Fund will be subject to tax at regular corporate rates. If a Fund retains any net capital gain, that gain will be subject to tax at corporate rates, but the Fund may designate the retained amount as undistributed capital gains in a notice to its shareholders who (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their shares of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the tax paid by the Fund on such undistributed amount against their federal income tax liabilities, if any, and to claim refunds on a properly filed U.S. tax return to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence.

Each Fund will be subject to a 4% excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year at least 98% of its ordinary income for the calendar year plus 98% of its capital gain net income for the 12 months ending on October 31 of such year plus any undistributed amount from the prior year. For these purposes, a Fund will be treated as having distributed any amount on which it has been subject to corporate income tax in the taxable year ending within the calendar year. A dividend paid to shareholders in January of a year generally is deemed to have been paid by the Fund on December 31 of the preceding year if the dividend was declared and payable to shareholders of record on a date in October, November, or December of that preceding year. Each Fund intends to declare and pay dividends and distributions in the amounts and at the times necessary to avoid the application of the 4% excise tax, although there can be no assurance that it will be able to do so.

Fund Distributions. Distributions by each Fund of investment income are generally taxable as ordinary income. Taxes on distributions of capital gains are determined by how long a Fund owned the investments that generated those gains, rather than how long a shareholder has owned his or her shares. Distributions of net capital gains from the sale of investments that the Fund owned for more than one year and that are properly designated by the Fund as capital gain dividends (Capital Gain Dividends) will be taxable as long-term capital gains. Distributions from capital gains are generally made after applying any available capital loss carryovers. Long-term capital gain rates applicable to individuals have been temporarily reduced in general, to 15% with lower rates applying to taxpayers in the 10% and 15% rate brackets for taxable years beginning before January 1, 2013. Distributions of gains from the sale of investments that the Fund owned for one year or less will be taxable as ordinary income.

If a Fund makes distributions to a shareholder in excess of the Fund's current and accumulated earnings and profits in any taxable year, the excess distribution will be treated as a return of capital to the extent of that shareholder's tax basis in its

shares, and thereafter as capital gain. A return of capital is not taxable, but reduces a shareholder's tax basis in its shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of its shares.

Distributions are taxable regardless of whether shareholders receive them in cash or reinvest the distributions in additional shares.

Sale or Exchange of Shares. A sale or exchange of shares in the Funds may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of shares will be treated as long-term capital gain or loss if the shares have been held for more than 12 months. Otherwise, the gain or loss on the taxable disposition of shares will be treated as short-term capital gain or loss. However, any loss realized upon a taxable disposition of shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received (or deemed received) by the shareholder with respect to the shares. All or a portion of any loss realized upon a taxable disposition of shares will be disallowed if other substantially identical shares of the Fund are purchased within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

Backup Withholding. The Funds (or financial intermediaries, such as brokers, through which a shareholder holds Fund shares) generally are required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Federal Tax Treatment of Certain Fund Investments. Transactions of the Funds in options, futures contracts, hedging transactions, forward contracts, swap agreements, straddles and foreign currencies may be subject to various special and complex tax rules, including market-to-market, constructive sale, straddle, wash sale and short sale rules. These rules could affect whether gains and losses recognized by a Fund are treated as ordinary income or capital gain, accelerate the recognition of income to a Fund and/or defer a Fund's ability to recognize losses. These rules may in turn affect the amount, timing or character of the income distributed to shareholders by the Fund.

Each Fund is required, for federal income tax purposes, to mark to market and recognize as income for each taxable year its net unrealized gains and losses as of the end of such year on certain regulated futures contracts, foreign currency contracts and options that qualify as Section 1256 Contracts in addition to the gains and losses actually realized with respect to such contracts during the year. Except as described below under *Certain Foreign Currency Tax Issues*, gain or loss from Section 1256 Contracts that are required to be marked to market annually will generally be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders.

Some debt obligations that are acquired by a Fund may be treated as having original issue discount (OID). Generally, a Fund will be required to include OID in taxable income over the term of the debt security, even though payment of the OID is not received until a later time, usually when the debt security matures. If a Fund holds such debt instruments, it may be required to pay out as distributions each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary. A Fund may realize gains or losses from such liquidations. In the event a Fund realizes net gains from such transactions, its shareholders may receive larger distributions than they would have in the absence of such transactions.

Some of the Funds may invest in inflation-linked debt securities. Any increase in the principal amount of an inflation-linked debt security will be OID, which is taxable as ordinary income and is required to be distributed, even though the Fund will not receive the principal, including any increase thereto, until maturity. A Fund investing in such securities may be required to liquidate other investments, including at times when it is not advantageous to do so, in order to satisfy its distribution requirements and to eliminate any possible taxation at the Fund level.

Certain Foreign Currency Tax Issues. Each of the Euro Fund and the Japanese Yen Fund intends to adopt and use as its functional currency for U.S. federal income tax purposes its designated currency rather than the U.S. dollar. Accordingly, if these Currency Income Funds meet certain requirements relating to conducting business in their respective foreign

currencies, they generally are not expected to recognize gains or losses on their foreign currency denominated debt securities due to fluctuations in the value of those currencies relative to the U.S. dollar.

For the other Currency Funds, which will have the U.S. dollar as their functional currency, gain or loss on foreign currency denominated debt securities and on certain other financial instruments, such as forward currency contracts and currency swaps, that is attributable to fluctuations in exchange rates occurring between the date of acquisition and the date of settlement or disposition of such securities or instruments generally will be treated under Section 988 of the Code as ordinary income or loss. A Fund may elect out of the application of Section 988 of the Code with respect to the tax treatment of each of its foreign currency forward contracts to the extent that (i) such contract is a capital asset in the hands of the Fund and is not part of a straddle transaction and (ii) the Fund makes an election by the close of the day the contract is entered into to treat the gain or loss attributable to such contract as capital gain or loss.

The Currency Income Funds' forward contracts may qualify as Section 1256 Contracts if the underlying currencies are currencies for which there are futures contracts that are traded on and subject to the rules of a qualified board or exchange. However, a forward currency contract that is a Section 1256 Contract would, absent an election out of Section 988 of the Code as described in the preceding paragraph, be subject to Section 988. Accordingly, although such a forward currency contract would be marked to market annually like other Section 1256 Contracts, the resulting gain or loss would be ordinary. If a Fund were to elect out of Section 988 with respect to forward currency contracts that qualify as Section 1256 Contracts, the tax treatment generally applicable to Section 1256 Contracts would apply to those forward currency contracts: that is, the contracts would be marked to market annually and gains and losses with respect to the contracts would be treated as long-term capital gains or losses to the extent of 60% thereof and short-term capital gains or losses to the extent of 40% thereof. If a Fund were to elect out of Section 988 with respect to any of its forward currency contracts that do not qualify as Section 1256 Contracts, such contracts will not be marked to market annually and the Fund will recognize short-term or long-term capital gain or loss depending on the Fund's holding period therein. A Currency Income Fund may elect out of Section 988 with respect to some, all or none of its forward currency contracts.

Finally, regulated futures contracts and nonequity options that qualify as Section 1256 Contracts and are entered into by a Fund with respect to foreign currencies or foreign currency denominated debt instruments will be subject to the tax treatment generally applicable to Section 1256 Contracts unless the Fund elects to have Section 988 apply to determine the character of gains and losses from all such regulated futures contracts and nonequity options held or later acquired by the Fund.

Funds Holding Foreign Investments. Income received by the Funds from sources within foreign countries (including, for example, interest on securities of non-U.S. issuers) may be subject to withholding and other taxes imposed by such countries. Tax treaties between such countries and the U.S. may reduce or eliminate such taxes. If as of the end of a Fund's taxable year more than 50% of the Fund's assets consist of foreign securities, that Fund may elect to permit shareholders to claim a credit or deduction on their income tax returns for their pro rata portions of qualified taxes paid by that Fund during that taxable year to foreign countries in respect of foreign securities that the Fund has held for at least the minimum period specified in the Code. In such a case, shareholders will include in gross income from foreign sources their pro rata shares of such taxes. A shareholder's ability to claim a foreign tax credit or deduction in respect of foreign taxes paid by a Fund may be subject to certain limitations imposed by the Code, which may result in the shareholder not getting a full credit or deduction for the amount of such taxes. Shareholders who do not itemize on their federal income tax returns may claim a credit, but not a deduction, for such foreign taxes.

Tax-Exempt Shareholders. Under current law, income of a RIC that would be treated as unrelated business taxable income (UBTI) if earned directly by a tax-exempt entity generally will not be attributed as UBTI to a tax-exempt entity that is a shareholder in the RIC. Notwithstanding this blocking effect, a tax-exempt shareholder could realize UBTI by virtue of its investment in a Fund if shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of Code Section 514(b).

Non-U.S. Shareholders. In general, dividends other than Capital Gain Dividends paid by a Fund to a shareholder that is not a U.S. person within the meaning of the Code (a foreign person) are subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate) even if they are funded by income or gains (such as portfolio interest,

short-term capital gains, or foreign-source dividend and interest income) that, if paid to a foreign person directly, would not be subject to withholding.

Effective for taxable years beginning before January 1, 2012, and assuming certain certification requirements were complied with, a RIC generally was not required to withhold any amounts (i) with respect to distributions attributable to U.S. source interest income that would be treated as portfolio interest and accordingly would not be subject to U.S. federal income tax if earned directly by an individual foreign person, and (ii) with respect to distributions of net short-term capital gains in excess of net long-term capital losses, in each case to the extent such distributions were properly designated by the RIC. Depending on the circumstances, the Funds may make such designations with respect to all, some or none of their potentially eligible dividends or treat such dividends, in whole or in part, as ineligible for this exemption from withholding. Moreover, in the case of shares held through an intermediary, the intermediary may withhold even if a Fund makes a designation with respect to a payment.

A beneficial holder of shares who is a non-U.S. person is not, in general, subject to U.S. federal income tax on gains (and is not allowed a U.S. income tax deduction for losses) realized on a sale of shares of a Fund or on Capital Gain Dividends unless (i) such gain or dividend is effectively connected with the conduct of a trade or business carried on by such holder within the United States or (ii) in the case of an individual holder, the holder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale or the receipt of the Capital Gain Dividend and certain other conditions are met.

In order for a non-U.S. person to qualify for an exemption from backup withholding, the foreign investor must comply with special certification and filing requirements. Foreign investors in the Funds should consult their tax advisors in this regard. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the Internal Revenue Service.

A beneficial holder of shares who is a non-U.S. person may be subject to the U.S. federal estate tax in addition to the federal income tax consequences referred to above. If a shareholder is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment maintained by the shareholder in the United States.

Creation and Redemption of Creation Unit Aggregations. An Authorized Participant having the U.S. dollar as its functional currency for U.S. federal tax purposes that exchanges money market securities or non-U.S. currency for Creation Unit Aggregations generally will recognize a gain or loss equal to the difference between the market value of the Creation Unit Aggregations at the time of the exchange and the sum of the exchanger's aggregate basis in the money market securities or non-U.S. currency surrendered plus the amount of cash paid for such Creation Unit Aggregations. A person who redeems Creation Unit Aggregations for money market securities or non-U.S. currency will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Unit Aggregations and the sum of the aggregate U.S. dollar market value of the securities or non-U.S. currency plus the amount of any cash received for such Creation Unit Aggregations. The Internal Revenue Service, however, may assert that a loss that is realized by an Authorized Participant upon an exchange of securities or non-U.S. currency for Creation Unit Aggregations cannot be currently deducted under the rules governing wash sales. Gain or loss recognized by an Authorized Participant upon an issuance of Creation Unit Aggregations in exchange for non-U.S. currency will generally be treated as ordinary income or loss. Gain or loss recognized by an Authorized Participant upon an issuance of Creation Unit Aggregations in exchange for money market securities, or upon a redemption of Creation Unit Aggregations, may be capital or ordinary gain or loss depending on the circumstances. Any capital gain or loss realized upon the issuance of Creation Unit Aggregations in exchange for money market securities will generally be treated as long-term capital gain or loss if the money market securities have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Unit Aggregations will generally be treated as long-term capital gain or loss if the Fund shares comprising the Creation Unit Aggregations have been held for more than one year. Otherwise, such gains or losses are treated as short-term capital gains or losses.

A person subject to U.S. federal income tax who receives non-U.S. currency upon a redemption of Creation Unit Aggregations and does not immediately convert the non-U.S. currency into U.S. dollars may, upon a later conversion of

the non-U.S. currency into U.S. dollars, or upon the use of the non-U.S. currency pay expenses or acquire assets, recognize as ordinary gains or losses any gains or losses resulting from fluctuations in the value of the non-U.S. currency relative to the U.S. dollar since the date of the redemption.

Persons exchanging securities or non-U.S. currency for Creation Unit Aggregations should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction. If you purchase or redeem Creation Unit Aggregations, you will be sent a confirmation statement showing how many shares you purchased or redeemed and at what price.

Section 351. The Trust on behalf of each Fund has the right to reject an order for a purchase of shares of the Trust if the purchaser (or group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of a given Fund and if, pursuant to Section 351 of the Code, that Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the Internal Revenue Service a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

General Considerations. The federal income tax discussion set forth above is for general information only. Prospective investors should consult their tax advisors regarding the specific federal income tax consequences of purchasing, holding and disposing of shares of the Funds, as well as the effect of state, local and foreign tax law and any proposed tax law changes.

DETERMINATION OF NAV

The NAV of each Fund's shares is calculated each day the NYSE is open for trading as of the close of regular trading, generally 4:00 p.m. New York time. NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding. The prices at which creations and redemptions occur are based on the next calculation of NAV after an order is received in proper form as described in the Participant Agreement.

In calculating a Fund's NAV, Fund investments generally are valued using market valuations. Short-term debt securities with remaining maturities of 60 days or less generally are valued on the basis of amortized cost, which approximates fair value. U.S. fixed income assets may be valued as of the announced closing time for such securities on any day that the Securities Industry and Financial Markets Association announces an early closing time. The values of any assets or liabilities denominated in a currency other than the U.S. dollar are converted into U.S. dollars using an exchange rate deemed appropriate by the Fund.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund's affected investments will be valued in accordance with the Fund's pricing policy and procedures. For these purposes, a price based on amortized cost is considered a market valuation. Securities that may be valued using fair value pricing may include, but are not limited to, instruments for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund's next NAV calculation time that may materially affect the value of a Fund's investment (e.g., government action, or natural disaster). When fair-value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fund shares are purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV. No secondary sales will be made to brokers or dealers at a concession by the Distributor or by a Fund. Purchases and sales of shares in the secondary market, which will not involve a Fund, will be subject to the customary brokerage commissions and charges. Transactions in Fund shares will be priced at NAV only if you purchase or redeem shares directly from a Fund in Creation Units.

DIVIDENDS AND DISTRIBUTIONS

Each Fixed Income Fund intends to pay out dividends, if any, to investors monthly but in any event no less frequently than annually. Each of the Euro Fund and the Japanese Yen Fund intend to pay out dividends, if any, at least quarterly. Each of the Brazilian Real Fund, Chinese Yuan Fund, Commodity Currency Fund, Emerging Currency Fund, Indian Rupee Fund, New Zealand Dollar Fund, and South African Rand Fund intend to pay out dividends, if any, at least annually.

Each Fund distributes its net realized capital gains, if any, to investors annually. The Funds may occasionally be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income.

FINANCIAL STATEMENTS

The audited financial statements (except for the Asia Local Debt Fund), including the financial highlights appearing in the Trust's Annual Report to Shareholders for the fiscal year ended August 31, 2010 and filed electronically with the SEC, are incorporated by reference and made part of this SAI. You may request a copy of the Trust's Annual Report at no charge by calling 1-866-909-9473 or through the Trust's website at www.wisdomtree.com.

MISCELLANEOUS INFORMATION

Counsel. Morgan, Lewis & Bockius LLP, 1111 Pennsylvania Avenue, NW, Washington, DC 20004 is counsel to the Trust.

Independent Registered Public Accounting Firm. Ernst & Young LLP, 5 Times Square, New York, New York 10036 is the independent registered public accounting firm to the Trust.
