**NEWS RELEASE**

**Enbridge Responds to New Brunswick Legislation**

**CALGARY, Alberta, December 9, 2011** Enbridge Inc. (TSX, NYSE: ENB) responded today to legislation tabled in the New Brunswick assembly which would affect its gas distribution franchise in the province.

Enbridge understands the objectives of the Government of New Brunswick and we remain prepared to explore cooperative approaches to restructuring the province's gas distribution franchise, said Guy Jarvis, President of Gas Distribution for Enbridge Inc. We believe that the franchise agreement can be restructured to enhance the benefits of natural gas to New Brunswick while preserving the attractiveness of the province as a place for further investment. We will employ all efforts to work with the Government toward that objective.

Enbridge has invested approximately \$480 million in the development of the provincial gas distribution system and has reinvested every dollar it has earned in the province, plus much more. Enbridge currently earns approximately \$20 million per year in its New Brunswick business. The legislation includes provisions which could have the effect of substantially reducing those earnings, although the specific effects remain dependent on further discussions between Enbridge and the Government of New Brunswick, and the details of the regulations which will follow.

Although establishing a gas distribution system in New Brunswick is an expensive proposition, natural gas does offer significant savings compared with more costly sources of energy available within the province, such as fuel oil and electric power. Enbridge believes that these savings can be enhanced and extended to additional customers through a cooperative restructuring of the terms of the franchise.

**NEWS RELEASE**

**Enbridge Completes Acquisition of Majority Interest in Cabin Gas Plant Development**

CALGARY, ALBERTA December 16, 2011 Enbridge Inc. (TSX:ENB) (NYSE:ENB) announced today the closing of its acquisition of a 71.0% interest in Phases 1 and 2 of the Cabin Gas Plant Development which together will be capable of processing 800 million cubic feet per day (Mmcf/d) of natural gas. Upon completion of Phases 1 and 2, Enbridge's total investment is expected to be approximately \$1.1 billion.

The Cabin Gas Plant Development is a natural gas processing facility located approximately 60 kilometers northeast of Fort Nelson, B.C. in the Horn River Basin. Phase 1 of the development will have 400 Mmcf/d of natural gas processing capacity. The plant is currently under construction and is expected to be in-service in the third quarter 2012. Phase 2 will add an additional 400 Mmcf/d of capacity and has been sanctioned by producers and received regulatory approval. The Phase 2 plant is expected to be ready for service in the third quarter 2014. Capacity for both Phases 1 and 2 has been fully taken up by Horn River producers.

**NEWS RELEASE**

**Enbridge Completes Acquisition of 50% Interest in Seaway Pipeline System**

CALGARY, ALBERTA December 20, 2011 Enbridge Inc. (TSX:ENB) (NYSE:ENB) announced today the closing of its acquisition of a 50% interest in the Seaway Crude Pipeline System for US\$1.15 billion. Enbridge is the joint owner of the pipeline with Enterprise Products Partners L.P. (NYSE: EPD) ( Enterprise ). Enterprise will continue to operate the pipeline system and storage facilities.

The 670-mile (1,078-kilometer) Seaway Crude Pipeline System (SCPS) includes the 500-mile (805-kilometer), 30-inch diameter Freeport, Texas to Cushing, Oklahoma long-haul system, as well as the Texas City Terminal and Distribution System which serves refineries in the Houston and Texas City areas. SCPS also includes 6.8 million barrels of crude oil tankage on the Texas Gulf Coast and four import docks at two locations.

**NEWS RELEASE**

**Enbridge proceeding with Gulf Coast Access Project**

**CALGARY, Alberta** December 20, 2011 Enbridge Inc. (TSX, NYSE: ENB) announced today that it has secured sufficient capacity commitments from shippers to proceed with its Gulf Coast Access project offering crude oil transportation from its terminal at Flanagan, Illinois, to the U.S. Gulf Coast. Enbridge also announced that, in response to shipper requests, it will hold a second open season early in the new year to provide an opportunity for shippers to subscribe for additional capacity.

The Gulf Coast Access project will involve construction of an additional line from Flanagan south to Cushing, Oklahoma following Enbridge's existing Spearhead Pipeline right-of-way. This line is expected to be in service by mid 2014 at an estimated capital cost of approximately \$1.9 billion depending on the final scope of the project. From Cushing, crude oil will move to Houston and Port Arthur, Texas on the Seaway Pipeline system owned by a joint venture between Enbridge and Enterprise Products Partners L.P.

The binding open season period on the Flanagan South segment of the project will begin at 8 a.m. CDT, Wednesday, January 4, 2012, and continue until 12:00 p.m. (noon) CDT Friday, February 10, 2012.

A concurrent binding open season will be held on the joint venture Seaway Pipeline system to provide an opportunity for additional capacity subscriptions originating at Cushing.

For those shippers seeking timely capacity for growing supplies produced in Western Canada and the Bakken to the Texas Gulf Coast, the Gulf Coast Access project offers near-term solutions through the cost-effective and efficient use of existing facilities and rights-of-way, said Stephen J. Wuori, President, Liquids Pipelines, Enbridge Inc. Through a second open season on the Flanagan South Pipeline, we will be able to offer capacity to new shippers, as well as providing the opportunity for those shippers who have already subscribed to capacity from Flanagan to the Gulf Coast to add to their existing commitments.

Additional information about the open season will be available online at [www.flanagansouth.enbridgeus.com](http://www.flanagansouth.enbridgeus.com) beginning Jan. 4, 2012. For commercial inquiries, please contact:

**ENTERPRISE AND ENBRIDGE TO CONDUCT OPEN SEASONS FOR  
SEAWAY PIPELINE EXPANSION AND NEW CRUDE OIL PIPELINE  
TO PORT ARTHUR/BEAUMONT REFINING MARKET**

\* \* \*

**ENBRIDGE TO CONDUCT SECOND OPEN SEASON FOR FLANAGAN, ILLINOIS-TO-GULF COAST CRUDE OIL  
TRANSPORTATION OPTION**

**HOUSTON and CALGARY, Alberta (December 20, 2011)** Enterprise Products Partners L.P. ( Enterprise ) (NYSE: EPD) and Enbridge Inc. ( Enbridge ) (NYSE/TSX: ENB) today announced plans to hold concurrent open seasons from January 4, 2012 through February 10, 2012 to solicit capacity commitments from shippers for an expansion of the Seaway pipeline and an extension of the pipeline into the Port Arthur/Beaumont refining market. Enterprise and Enbridge recently announced plans to reverse the flow direction of the 500-mile, 30-inch diameter Seaway crude oil pipeline, enabling it to transport crude oil from the oversupplied hub in Cushing, Oklahoma to the U.S. Gulf Coast.

The initial 150,000 barrels per day ( BPD ) of capacity on the reversed system could be available by the second quarter 2012. Following pump station additions and modifications, which are expected to be completed by the first quarter 2013, capacity would increase to 400,000 BPD assuming a mix of light and heavy grades of crude oil.

Shippers who participated in the Wrangler open season have indicated strong support for the Seaway reversal and expansion. Given the advantages associated with Seaway, Wrangler has been terminated. Depending on the results of the open season, the Seaway pipeline would be looped or twinned to create additional capacity. This new loop would be built at the size and capacity required to meet shipper needs and in a location that generally follows the route of the existing Seaway pipeline.

Michael A. Creel, President and Chief Executive Officer of Enterprise's general partner said, Leveraging the benefits of the existing Seaway pipeline system, which is expected to be fully contracted, provides shippers with accelerated access to the Gulf Coast refining market,

while an expansion offers incremental capacity in excess of 400,000 barrels per day and could be available in early 2014.

The new 85-mile pipeline that will be built from Enterprise's ECHO crude oil terminal southeast of Houston to Port Arthur, Texas will give shippers access to the region's heavy oil refining capabilities. Service is scheduled to begin in early 2014.

In a separate announcement, Enbridge today announced that it is proceeding with its Gulf Coast Access project, which will transport crude oil from Flanagan, Illinois, south to Cushing via an additional line it will construct, and then to Houston and Port Arthur on the Seaway Pipeline system joint venture. Enbridge will also hold a concurrent second open season to provide the opportunity for shippers to subscribe for additional capacity from Flanagan all the way to the Texas Gulf Coast.

Expansion of the Seaway System, complemented by the addition of capacity on Enbridge's systems from the Chicago area to Cushing, gives both U.S. and Canadian producers new and timely options to reach the Gulf Coast, said Patrick D. Daniel, President and Chief Executive Officer, Enbridge Inc.

Enbridge's \$1.15 billion acquisition of an interest in Seaway from ConocoPhillips closed December 20, 2011. Enterprise and Enbridge each own a 50 percent ownership interest in the pipeline system with Enterprise continuing to serve as operator.

Additional information about the open seasons will be available online at [www.seawaypipeline.com](http://www.seawaypipeline.com) beginning January 4, 2012. For commercial inquiries, please
