(Zip Code)

Registrant's telephone number, including area code: (972) 562-9473

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$.01 per share	The NASDAQ Global Select Market
Securities registered pursuant to Section 12(g) of the Act: None	

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Exchange Act from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405) of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the Common Stock held by non-affiliates of the registrant computed by reference to the price at which the Common Stock was last sold as of the last business day of the registrant's most recently completed second fiscal quarter was \$357,667,930 (Note: The aggregate market value of Common Stock held by the Company's directors, executive officers, immediate family members of such directors and executive officers and 10% or greater stockholders was excluded from the computation of the foregoing amount. The characterization of such persons as "affiliates" should not be construed as an admission that any such person is an affiliate of the Registrant for any other purpose).

Number of shares of Common Stock outstanding as of February 24, 2012: 23,426,302

DOCUMENTS INCORPORATED BY REFERENCE

PART I

Item 1. Business.

General

Encore Wire Corporation is a Delaware corporation, incorporated in 1989, with its principal executive office and manufacturing plants located at 1329 Millwood Road, McKinney, Texas 75069. The Company's telephone number is (972) 562-9473. As used in this annual report, unless otherwise required by the context, the terms Company, Encore and Encore Wire refer to Encore Wire Corporation and its consolidated entities.

Encore is a low-cost manufacturer of electrical building wire and cable. The Company is a significant supplier of building wire for interior electrical wiring in commercial and industrial buildings, homes, apartments, and manufactured housing.

The principal customers for Encore's wire are wholesale electrical distributors, who sell building wire and a variety of other products to electrical contractors. The Company sells its products primarily through independent manufacturers' representatives located throughout the United States and, to a lesser extent, through its own direct in-house marketing efforts.

Encore's strategy is to further expand its share of the markets for building wire primarily by emphasizing a high level of customer service and low-cost production and the addition of new products that complement its current product line. The Company maintains product inventory levels sufficient to meet anticipated customer demand and believes that the speed and completeness with which it fills customer orders are key competitive advantages critical to marketing its products. Encore's low-cost production capability features an efficient plant design incorporating highly automated manufacturing equipment, an integrated production process and an incentivized work force.

Strategy

Encore's strategy for expanding its share of the building wire markets emphasizes customer service and product innovations coupled with low-cost production.

Customer Service. Responsiveness to customers is a primary focus of Encore, with an emphasis on building and maintaining strong customer relationships. Encore seeks to establish customer loyalty by achieving a high order fill rate and rapidly handling customer orders, shipments, inquiries and returns. The Company maintains product inventories sufficient to meet anticipated customer demand and believes that the speed and completeness with which it fills orders are key competitive advantages critical to marketing its products.

Product Innovation. Encore has been a leader in bringing new ideas to a commodity product. Encore pioneered the widespread use of color feeder sizes of commercial wire and colors in the residential non-metallic wires. The colors have improved on the job safety and reduced installation times for contractors. Encore Wire's new patent pending SmartColor ID system is a color-coded MC and AC cable identification system.

Low-Cost Production. Encore's low-cost production capability features an efficient plant design and an incentivized work force.

Efficient Plant Design. Encore's highly automated wire manufacturing equipment is integrated in an efficient design that reduces material handling, labor and in-process inventory.

Incentivized Work Force. Encore's hourly manufacturing employees are eligible to receive incentive pay tied to productivity and quality standards. The Company believes that this compensation program enables the plant's manufacturing lines to attain high output and motivates manufacturing employees to continually maintain product quality. The Company also believes that its stock option plan enhances the motivation of its salaried manufacturing supervisors. The Company has coupled these incentives with a comprehensive safety program that emphasizes employee participation. The Company provides a 401(k) retirement savings plan to all employees with at least one year of service.

Products

Encore offers an electric building wire product line that consists primarily of NM-B cable, UF-B cable, THHN/THWN-2 and other types of wire products, including metal clad and armored cable. All of these products are manufactured with copper or aluminum as the conductor. The Company also purchases small quantities of other types of wire to re-sell to customers that buy products that the Company manufactures. The

Edgar Filing: ENCORE WIRE CORP - Form 10-K

principal bases for differentiation among stock-keeping units (SKUs) are product type, conductor type, diameter, insulation, color and packaging.

Table of Contents

NM-B Cable. Non-metallic sheathed cable is used primarily as interior wiring in homes, apartments and manufactured housing. NM-B cable is composed of either two or three insulated copper wire conductors, with an un-insulated ground wire, all sheathed in a polyvinyl chloride (PVC) jacket.

UF-B Cable. Underground feeder cable is used to conduct power underground to outside lighting and other applications remote from buildings. UF-B cable is composed of two or three PVC insulated copper wire conductors, with an un-insulated ground wire, all jacketed in PVC.

THHN/THWN-2 Cable. THHN/THWN-2 cable is used primarily as feeder, circuit and branch wiring in commercial and industrial buildings. It is composed of a copper or aluminum single conductor, either stranded or solid, and insulated with PVC, which is further coated with nylon. Users typically pull THHN/THWN-2 cable through protective pipe or conduit.

XHHW-2 Cable. XHHW-2 wire is intended for general purpose applications utilized in conduit or other recognized raceways for service, feeders, and branch-circuit wiring. It is composed of a copper or aluminum single conductor, either stranded or solid, and with a single layer of cross-linked polyethylene (XLPE) insulation.

USE-2 Cable. USE-2 or RHH or RHW-2 wire is intended for general purpose applications utilized in conduit or installed in underground applications or in recognized raceways for service, feeders, and branch-circuit wiring. It is composed of a copper or aluminum single conductor, either stranded or solid, and with a single layer of cross-linked polyethylene (XLPE) insulation suitable for wet locations.

Metal Clad and Armored Cable. Metal clad and armored cable is used primarily as feeder, circuit and branch wiring, primarily in commercial and industrial buildings. It is composed of multiple conductors, either stranded or solid, and insulated with PVC, which are further coated with nylon and then fully encased in a flexible aluminum or steel armored protective sheath that eliminates the need to pull the wire through pipe or conduit.

Photovoltaic Cable. Photovoltaic style cables are designed to meet the different needs of the emerging Solar Industry by providing connections between PV panels, collector boxes and inverters; and where also allowed by the National Electric Code (NEC).

Bare Copper. Bare copper conductors are used in overhead electrical transmission and distribution systems for grounding electrical systems, and where high-conductivity and flexibility are required for equipment and circuit grounding.

Manufacturing

The efficiency of Encore's highly automated manufacturing facility is a key element of its low-cost production capability. Encore's residential wire manufacturing lines have been integrated so that the handling of product is substantially reduced throughout the production process.

The manufacturing process for the Company's various products involves multiple steps, including: casting, drawing, stranding, compounding, insulating, jacketing and armoring.

Casting. Rod is produced by melting sheets of copper cathode and copper scrap, casting the molten copper into a bar and rolling the hot copper bar into a 5/16 inch copper rod to be drawn into copper wire.

Drawing. Drawing is the process of reducing 5/16 inch copper rod through converging dies until the specified wire diameter is attained. The wire is then heated with electrical current to soften or anneal the wire to make it easier to handle.

Stranding. Stranding is the process of twisting together from seven to sixty-one individual wire strands to form a single cable. The purpose of stranding is to improve the flexibility of wire while maintaining its electrical current carrying capacity.

PVC Compounding. PVC compounding is the process of mixing the various raw materials that are required to produce the PVC necessary to meet U/L specifications for the insulation and jacket requirements for the wire that is manufactured.

Insulating. Insulating is the process of extruding PVC over the solid or stranded wire.

Table of Contents

Jacketing. Jacketing is the process of extruding PVC over two or more insulated conductor wires, with or without an un-insulated ground wire, to form a finished product. The Company's jacketing lines are integrated with packaging lines that cut the wire and coil it onto reels or package it in boxes or shrink-wrap. Jacketing also comprises extruding a nylon covering over some PVC insulated products, such as THHN/THWN-2.

Metal Cladding and Armoring. Metal cladding and armoring is the process of covering two or more insulated conductor wires, with or without an un-insulated ground wire, with a spiral interlocking cover of aluminum or steel to form a finished product.

Encore manufactures and tests all of its products in accordance with the standards of Underwriters Laboratories, Inc. (U/L), a nationally recognized testing and standards agency. Encore's machine operators and quality control inspectors conduct routine product tests. The Company tests finished products for electrical continuity to ensure compliance with its own quality standards and those of U/L. Encore's manufacturing lines are equipped with laser micrometers to measure wire diameter and insulation thickness while the lines are in operation. During each shift, operators perform and record routine physical measurements of products, all of which are separately verified and approved by quality control inspectors. Although suppliers pretest PVC and nylon compounds, the Company tests products for aging, cracking and brittleness of insulation and jacketing. Additionally, UL representatives routinely visit and test products from each area of manufacturing.

Customers

Encore sells its wire principally to wholesale electrical distributors throughout the United States and, to a lesser extent, to retail home improvement centers. Most distributors supply products to electrical contractors. Encore's customer base is numerous and diversified. Encore has no customer, the loss of which would have a material adverse effect on Encore.

Encore believes that the speed and completeness with which it fills customers' orders is crucial to its ability to expand the market share for its products. The Company also believes that, in order to reduce costs, many customers do not maintain substantial inventories. Because of this trend, the Company seeks to maintain sufficient inventories to satisfy customers' prompt delivery requirements.

Marketing and Distribution

Encore markets its products throughout the United States primarily through independent manufacturers' representatives and, to a lesser extent, through its own direct marketing efforts.

Encore maintains the majority of its finished product inventory at its plant in McKinney, Texas. In order to provide flexibility in handling customer requests for immediate delivery of the Company's products, additional product inventories are maintained at warehouses owned and operated by independent manufacturers' representatives located throughout the United States. As of December 31, 2011, additional product inventories are maintained at the warehouses of independent manufacturers' representatives located in Chattanooga, Tennessee; Norcross, Georgia; Cincinnati, Ohio; Canton, Michigan; Edison, New Jersey; Louisville, Kentucky; Greensboro, North Carolina; Pittsburgh, Pennsylvania; Santa Fe Springs, California; Hayward, California; and Ft. Lauderdale, Florida. Some of these manufacturers' representatives, as well as the Company's other manufacturers' representatives, maintain offices without warehouses in numerous locations throughout the United States.

Finished goods are typically delivered to warehouses and customers by trucks operated by common carriers. The decision regarding the carrier to be used is based primarily on availability and cost.

The Company invoices its customers directly for products purchased and, if an order has been obtained through a manufacturer's representative, pays the representative a commission based on pre-established rates. The Company determines customer credit limits. The Company recorded nominal bad debt charges in 2011, 2010, and 2009. The manufacturers' representatives have no discretion to determine prices charged for the Company's products, and all sales are subject to approval by the Company. Encore sells all of its products with a one-year replacement warranty. Warranty expenses have historically been nominal.

Employees

Encore believes that its hourly employees are highly motivated and that their motivation contributes significantly to the plant's efficient operation. The Company attributes the motivation of these employees largely to the fact that a significant portion of their compensation comes from incentive pay that is tied to productivity and quality standards. The Company believes that its incentive program focuses its employees on maintaining product quality.

Table of Contents

As of December 31, 2011, Encore had 886 employees, 748 of whom were paid hourly wages and were primarily engaged in the operation and maintenance of the Company's manufacturing and warehouse facility. The rest of the Company's employees were executive, supervisory, administrative, sales and clerical personnel. The Company considers its relations with its employees to be good. The Company has no collective bargaining agreements with any of its employees.

Raw Materials

The principal raw materials used by Encore in manufacturing its products are copper cathode, copper scrap, PVC thermoplastic compounds, XLPE compounds, aluminum, steel, paper and nylon, all of which are readily available from a number of suppliers. Copper is the principal raw material used by the Company in manufacturing its products, constituting nearly 91.1% of the dollar value of all raw materials used by the Company during 2011. Copper requirements are purchased primarily from miners and commodity brokers at prices determined each month primarily based on the average daily COMEX closing prices for copper for that month, plus a negotiated premium. The Company also purchases raw materials necessary to manufacture various PVC thermoplastic compounds. These raw materials include PVC resin, clay and plasticizer.

The Company produces copper rod from purchased copper cathodes and copper scrap in its own rod fabrication facility. The Company reprocesses copper scrap generated by its operations and copper scrap purchased from others. In 2011, the Company's copper rod fabrication facility manufactured the majority of the Company's copper rod requirements.

The Company also compounds its own wire jacket and insulation compounds. The process involves the mixture of PVC raw material components to produce the PVC used to insulate the Company's wire and cable products. The raw materials include PVC resin, clay and plasticizer. During the last year, the Company's plastic compounding facility produced virtually all of the Company's PVC requirements.

The Company purchased an immaterial amount of aluminum rod for aluminum wire production in 2011.

Competition

The electrical wire and cable industry is highly competitive. The Company competes with several companies who manufacture and sell wire and cable products beyond the building wire segment in which the Company competes. The Company's primary competitors include Southwire Company, Cerro Wire LLC, United Copper Industries and AFC Cable Systems, Inc.

The principal elements of competition in the electrical wire and cable industry are, in the opinion of the Company, order fill rate, quality, pricing, and, in some instances, breadth of product line. The Company believes that it is competitive with respect to all of these factors.

Competition in the electrical wire and cable industry, although intense, has been primarily from U.S. manufacturers, including foreign owned facilities located in the United States. The Company has encountered little significant competition from imports of building wire. The Company believes this is primarily because direct labor costs generally account for a relatively small percentage of the cost of goods sold for these products and freight costs are relatively high to bring wire in from overseas.

Research and Development Activities

The Company classifies research and development activities as a component of production overhead. Research and development costs were approximately \$1.0 million, \$0.2 million and \$0.1 million for the years ended December 31, 2011, 2010 and 2009, respectively. The Company had no research and development costs attributable to customer sponsored research activities.

Intellectual Property Matters

The Company owns the following federally registered trademarks with the U.S. Patent and Trademark Office: U.S. Registration Number 2,687,746 for the ENCORE WIRE mark; U.S. Registration Number 2,528,340 for the NONLEDEX mark; U.S. Registration Number 1,900,498 for the Miscellaneous Design mark; U.S. Registration Number 2,263,692 for the HANDY MAN'S CHOICE mark; U.S. Registration Number 3,652,394 for the MCMP MULTIPURPOSE (Stylized) mark; and U.S. Registration Number 3,616,771 for the SUPER SLICK mark; U.S. Registration Number 3,804,531 for the EMERGMC mark; U.S. Registration Number 3,854,489 for the SMARTCOLOR ID mark; U.S. Registration Number 3,859,358 for the SUPER SLICK mark; U.S. Registration Number 3,884,124 for the SUPERSLICK ELITE mark; U.S. Registration Number 4,045,891 for ENCORE

Table of Contents

PERFORMANCE; U.S. Registration Number 3,990,876 for HCF-SG SMARTGROUND; U.S. Registration Number 3,986,653 for MC-SG SMARTGROUND; U.S. Registration Number 3,977,881 for MC-SG; and U.S. Registration Number 4,096,368 for Miscellaneous Design mark. The current terms of trademark protection for these marks will expire on various dates between 2013 and 2022, but each term can be renewed indefinitely as long as the respective mark continues to be used in commerce.

The Company also owns the following pending applications: Application Number 77/907,735 for the SMARTSLICK TECHNOLOGY mark, which was filed on January 8, 2010 and for which a Notice of Allowance was issued on August 3, 2010; Application Number 77/907,931 for the SUPERSLICK TECHNOLOGY mark, which was filed on January 8, 2010 and for which a Notice of Allowance was issued on August 3, 2010; Application Number 85/195,515 for the SMARTCOUNT mark, which was filed on December 10, 2010 and for which a Notice of Allowance was issued on May 24, 2011; Application Number 85/381,963 for the ENCORE WIRE CORPORATION & Design mark, which was filed on July 27, 2011; Application Number 85/286,272 for the SMARTMARK mark, which was filed on April 5, 2011 and for which a Notice of Allowance was issued on January 3, 2012; Application Number 85/286,262 for the SMARTSUN mark, which was filed on April 5, 2011 and for which a Notice of Allowance was issued on October 11, 2011; Application Number 85/291,961 for the PV SMARTSUN & Design mark; which was filed on April 11, 2011; Application Number 85/292,000 for the SMARTMARK & Design mark, which was filed on April 11, 2011 and for which a Notice of Allowance was issued on January 3, 2012; Application Number 85/352,608 for the ENCORE SMARTTRACK mark, which was filed June 22, 2011; Application Number 85/352,618 for the SMARTTRACK mark, which was filed on June 22, 2011; Application Number 85/380,111 for the MC SMARTGROUND mark, which was filed on July 25, 2011; Application Number 85/380,116 for the MC-HCF SMARTGROUND mark, which was filed on July 25, 2011; Application Number 85/380,136 for the SMART TRACK & Design mark, which was filed on July 25, 2011; Application Number 85/443,195 for the PAPERFREE NM-B & Design mark, which was filed on October 10, 2011; Application Number 85/443,198 for the PAPERFREE NM-B & Design mark, which was filed on October 10, 2011; Application Number 85/520,602 for the ETL & Design mark, which was filed on January 19, 2012; and Application Number 85/520,608 for the ETL ENCORE TECHLAB & Design mark, which was filed January 19, 2012. These trademarks provide source identification for the goods manufactured and sold by the Company and allow the Company to achieve brand recognition within the industry.

From time to time, the Company files patent applications with the United States Patent and Trademark Office. The Company owns U.S. Patent Number 7,954,530 for METHOD AND APPARATUS FOR APPLYING LABELS TO CABLE OR CONDUIT, which issued on June 6, 2011.

Internet Address/SEC Filings

The Company's Internet address is <http://www.encorewire.com>. Under the Investors Info section of our website, the Company provides a link to our electronic Securities and Exchange Commission (SEC) filings, including our annual report on Form 10-K, our quarterly reports on Form 10-Q, our current reports on Form 8-K, director and officer beneficial ownership reports filed pursuant to Section 16 of the Securities Exchange Act of 1934, as amended, and any amendments to these reports. All such reports are available free of charge and are available as soon as reasonably practicable after the Company files such material with, or furnishes it to, the SEC.

The public may read and copy any materials the Company files with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC at <http://www.sec.gov>.

Item 1A. Risk Factors.

The following are risk factors that could affect the Company's business, financial results and results of operations. These risk factors should be considered in connection with evaluating the forward-looking statements contained in this Annual Report on Form 10-K because these factors could cause the actual results and conditions to differ materially from those projected in forward-looking statements. Before purchasing the Company's stock, an investor should know that making such an investment involves some risks, including the risks described below. If any of the risks mentioned below or other unknown risks actually occur, the Company's business, financial condition or results of operations could be negatively affected. In that case, the trading price of its stock could fluctuate significantly.

Product Pricing and Volatility of Copper Market

Price competition for copper electrical wire and cable is intense, and the Company sells its product in accordance with prevailing market prices. Wire prices can, and frequently do change on a daily basis. This competitive pricing market for wire does not always mirror changes in copper prices, making margins highly volatile. Copper, a commodity

Table of Contents

product, is the principal raw material used in the Company's manufacturing operations. Copper accounted for approximately 86.1%, 81.1% and 73.5% of its costs of goods sold during 2011, 2010 and 2009, respectively, and the Company expects that copper will continue to account for a significant portion of these costs in the future. The price of copper fluctuates, depending on general economic conditions and in relation to supply and demand and other factors, and causes monthly variations in the cost of copper purchased by the Company. The Company cannot predict copper prices in the future or the effect of fluctuations in the costs of copper on the Company's future operating results. Consequently, fluctuations in copper prices caused by market forces can significantly affect the Company's financial results. With the volatility of both raw material prices and wire prices in the Company's end market, hedging raw materials can be risky. Historically, the Company has not engaged in hedging strategies for raw material purchases.

Operating Results May Fluctuate

Encore's quarterly results of operations may fluctuate as a result of a number of factors, including fluctuation in the demand for and shipments of the Company's products. Therefore, quarter-to-quarter comparisons of results of operations have been and will be impacted by the volume of such orders and shipments. In addition, its operating results could be adversely affected by the following factors, among others, such as variations in the mix of product sales, price changes in response to competitive factors, increases in raw material costs and other significant costs, the loss of key manufacturer's representatives who sell the Company's product line, increases in utility costs (particularly electricity and natural gas) and various types of insurance coverage and interruptions in plant operations resulting from the interruption of raw material supplies and other factors.

Reliance on Senior Management

Encore's future operating results depend, in part, upon the continued service of its senior management, Mr. Daniel L. Jones, the President and Chief Executive Officer, and Mr. Frank J. Bilban, the Company's Vice President and Chief Financial Officer (neither of whom are bound by an employment agreement). The Company's future success will depend upon its continuing ability to attract and retain highly qualified managerial and technical personnel. Competition for such personnel is intense, and there can be no assurance that the Company will retain its key managerial and technical employees or that it will be successful in attracting, assimilating or retaining other highly qualified personnel in the future.

Industry Conditions and Cyclicalities

The residential, commercial and industrial construction industry, which is the end user of the Company's products, is cyclical and is affected by a number of factors including the general condition of the economy, market demand and changes in interest rates, among other factors. Industry sales of electrical wire and cable products tend to parallel general construction activity, which includes remodeling. Housing construction activity in the United States declined significantly in 2006 and continued its downward trend through 2010, adversely affecting the Company's business by reducing our customers' demand for our products. Commercial and Industrial construction activity began declining at the beginning of 2008 and continued to decrease through 2010, further reducing demand for our products. The Company's unit sales volume, as measured in pounds of copper wire sold, declined 15.6% in 2009 versus 2008 and declined another 3.8% in 2010 versus 2009. In 2011, the Company's unit sales volume increased 6.2% compared to 2010. The Company believes that the volume of product sold declined primarily as a result of the slowdown in construction throughout the United States. The Company also believes that the reduced percentage decline in the Company's unit sales volume in 2010 and the increase in 2011 was caused, in part, by the exit of a former competitor from the industry in the first quarter of 2010. However, the ongoing recession in the United States and the overhang of excess housing and commercial and industrial buildings may have a negative impact on the construction industry for some time to come.

Deterioration in the financial condition of the Company's customers due to current industry and economic conditions may result in reduced sales, an inability to collect receivables and payment delays or losses due to a customer's bankruptcy or insolvency. Although the Company's bad debt experience has been relatively low even in recent years, the Company's inability to collect receivables may increase the amounts the Company must expense against its bad debt reserve, decreasing the Company's profitability. The downturn in the residential, commercial or industrial construction industries and general economic conditions as a whole may continue to have a material adverse effect on the Company.

Environmental Liabilities

The Company is subject to federal, state and local environmental protection laws and regulations governing the Company's operations and the use, handling, disposal and remediation of hazardous substances currently or formerly used by the Company. A risk of environmental liability is inherent in the Company's current manufacturing activities in

Table of Contents

the event of a release or discharge of a hazardous substance generated by the Company. Under certain environmental laws, the Company could be held jointly and severally responsible for the remediation of any hazardous substance contamination at the Company's facilities and at third party waste disposal sites and could also be held liable for any consequences arising out of human exposure to such substances or other environmental damage. There can be no assurance that the costs of complying with environmental, health and safety laws and requirements in the Company's current operations or the liabilities arising from past releases of, or exposure to, hazardous substances, will not result in future expenditures by the Company that could materially and adversely affect the Company's financial results, cash flow or financial condition.

Competition

The electrical wire and cable industry is highly competitive. The Company competes with several manufacturers of wire and cable products that have substantially greater resources than the Company. Some of these competitors are owned and operated by large, diversified companies. The principal elements of competition in the wire and cable industry are, in the opinion of the Company, pricing, product availability and quality and, in some instances, breadth of product line. The Company believes that it is competitive with respect to all of these factors. Our largest competitor purchased another significant competitor in the first quarter of 2010, which we believe has had a positive impact on pricing levels and margins. While the number of firms producing wire and cable has declined in the past, there can be no assurance that new competitors will not emerge or that existing producers will not employ or improve upon the Company's manufacturing and marketing strategy.

Patent and Intellectual Property Disputes

Disagreements about patents and intellectual property rights occur in the wire and cable industry. The unfavorable resolution of a patent or intellectual property dispute could preclude the Company from manufacturing and selling certain products or could require the Company to pay a royalty on the sale of certain products. Patent and intellectual property disputes could also result in substantial legal fees and other costs.

Common Stock Price May Fluctuate

Future announcements concerning Encore or its competitors or customers, quarterly variations in operating results, announcements of technological innovations, the introduction of new products or changes in product pricing policies by the Company or its competitors, developments regarding proprietary rights, changes in earnings estimates by analysts or reports regarding the Company or its industry in the financial press or investment advisory publications, among other factors, could cause the market price of the Common Stock to fluctuate substantially. These fluctuations, as well as general economic, political and market conditions, such as recessions, world events, military conflicts or market or market-sector declines, may materially and adversely affect the market price of the Common Stock.

Beneficial Ownership of the Company's Common Stock by a Small Number of Stockholders

A small number of significant stockholders beneficially own greater than 50% of the outstanding common stock of the Company. These stockholders, acting together, could be able to control the election of directors and all matters requiring majority approval by the Company's stockholders. The interests of this group of stockholders may not always coincide with the Company's interests or the interests of other stockholders.

In the future, these stockholders could sell large amounts of common stock over relatively short periods of time. In February 2010, the Company entered into a Registration Rights Agreement with Capital Southwest Corporation and Capital Southwest Venture Corporation (together, the Capital Southwest), pursuant to which the Company agreed to register the offer and sale of an aggregate of 4,086,750 shares of the Company's common stock held by Capital Southwest on a registration statement on Form S-3 (the Registration). The Company cannot predict if, when or in what amounts Capital Southwest will sell any of the shares covered by the Registration. However, the Registration enables Capital Southwest to sell all of such shares in the public market without any volume limitation, subject to certain trading restrictions. Sales of substantial amounts of the Company's common stock in the public market by existing stockholders or the perception that these sales could occur, may adversely affect the market price of our common stock by creating a public perception of difficulties or problems with the Company's business.

Future Sales of Common Stock Could Affect the Price of the Common Stock

No prediction can be made as to the effect, if any, that future sales of shares or the availability of shares for sale will have on the market price of the Common Stock prevailing from time to time. Sales of substantial amounts of Common Stock, or the perception that such sales might occur, could adversely affect prevailing market prices of the Common Stock.

Item 2. Properties.

Encore maintains its corporate office and manufacturing plants in McKinney, Texas, approximately 35 miles north of Dallas. The Company's facilities are located on a combined site of approximately 181 acres and consist of buildings containing approximately 1,397,000 square feet of floor space. The Company is building a new aluminum building wire plant on its McKinney, Texas campus as detailed in a December 2011 press release. The plant and equipment are owned by the Company and are not mortgaged to secure any of the Company's existing indebtedness. Encore believes that its plant and equipment are suited to its present needs, comply with applicable federal, state and local laws and regulations, are properly maintained and adequately insured.

Item 3. Legal Proceedings.

A description of the Company's legal proceedings is contained in Note 9 to the Company's consolidated financial statements included in Item 8 to this report and incorporated herein by reference.

Item 4. Mine Safety Disclosures

Not applicable.

EXECUTIVE OFFICERS OF THE COMPANY

Information regarding Encore's executive officers including their respective ages as of March 2, 2012, is set forth below:

Name	Age	Position with Company
Daniel L. Jones	48	President, Chief Executive Officer, and Member of the Board of Directors
Frank J. Bilban	55	Vice President Finance, Treasurer, Secretary, and Chief Financial Officer

Mr. Jones has held the office of President and Chief Executive Officer of the Company since February 2006. He performed the duties of the Chief Executive Officer in an interim capacity from May 2005 to February 2006. From May 1998 until February 2006, Mr. Jones was President and Chief Operating Officer of the Company. He previously held the positions of Chief Operating Officer from October 1997 until May 1998, Executive Vice President from May 1997 to October 1997, Vice President-Sales and Marketing from 1992 to May 1997, after serving as Director of Sales since joining the Company in November 1989. He has also served as a member of the Board of Directors since May 1994.

Mr. Bilban has served as Vice President-Finance, Treasurer, Secretary and Chief Financial Officer of Encore since June 2000. From 1998 until joining the Company in June 2000, Mr. Bilban was Executive Vice President and Chief Financial Officer of Alpha Holdings, Inc., a plastics manufacturing conglomerate. From 1996 until 1998, Mr. Bilban was Vice President and Chief Financial Officer of Wedge Dia-Log Inc., an oil field services company.

All executive officers are elected annually by the Board of Directors to serve until the next annual meeting of the Board or until their respective successors are chosen and qualified.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.**

The Company's Common Stock is traded and quoted on the NASDAQ Stock Market's Global Select Market under the symbol WIRE. The following table sets forth the high and low intraday sales prices per share for the Common Stock as reported by NASDAQ for the periods indicated.

2011	High	Low
First Quarter	\$ 25.86	\$ 21.19
Second Quarter	28.50	22.33
Third Quarter	26.53	19.69
Fourth Quarter	28.07	20.05
2010		
First Quarter	\$ 21.99	\$ 18.10
Second Quarter	23.44	18.14
Third Quarter	22.40	17.77
Fourth Quarter	26.07	20.04

As of February 27, 2012, there were 52 record holders of the Company's Common Stock.

The Company paid its first cash dividend in January 2007 and has continued paying quarterly dividends of two cents per share through 2011. Aside from periodic dividends, management intends to retain the majority of future earnings for the operation and expansion of the Company's business.

Issuer Purchases of Equity Securities

On November 10, 2006, the Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 1,000,000 shares of its common stock through December 31, 2007 on the open market or through privately negotiated transactions at prices determined by the President of the Company. The Company's Board of Directors has subsequently authorized annual extensions of this stock repurchase program through March 31, 2013 and has authorized the repurchase of up to 2,610,000 shares of its common stock. The Company repurchased 10,124 shares of its stock in 2011 and 1,327 shares of its stock in 2010. All shares purchased under the program were purchased on the open market by the Company's broker pursuant to a Rule 10b5-1 plan announced on November 28, 2007.

Equity Compensation Plan Information

The following table provides information about the Company's equity compensation plans as of December 31, 2011.

PLAN CATEGORY	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Introduction

The following management's discussion and analysis is intended to provide a better understanding of key factors, drivers and risks regarding the Company and the building wire industry.

Executive Overview

Encore Wire sells a commodity product in a highly competitive market. Management strongly believes that the historical strength of the Company's growth and earnings is attributable to the following main factors:

Industry leading order-fill rates and responsive customer service.

Product innovations and product line expansions based on listening to and understanding customer needs.

Low cost manufacturing operations, resulting from a state of the art manufacturing complex.

Low distribution and freight costs due to the one campus business model.

A focused management team leading an incentivized work force.

Low general and administrative overhead costs.

A team of experienced independent manufacturers' representatives with strong customer relationships across the United States. These factors, and others, have allowed Encore Wire to grow from a startup in 1989 to what management believes is one of the largest copper electric building wire companies in the United States of America. Encore has built a loyal following of customers throughout the United States. These customers have developed a brand preference for Encore Wire in a commodity product line, due to the reasons noted above, among

Edgar Filing: ENCORE WIRE CORP - Form 10-K

others. The Company prides itself on striving to grow sales by expanding its product offerings where profit margins are acceptable. Senior management monitors gross margins daily, frequently extending down to the individual order level. Management strongly believes that this hands-on focused approach to the building wire business has produced success thus far and will lead to continued success.

The construction and remodeling industries drive demand for building wire. Housing construction activity in the United States declined significantly in 2006 and continued its downward trend through 2010, improving slightly in 2011. Nationally, commercial construction had been relatively strong through 2007, but slowed significantly in 2008, and continued downward through 2010. The data that is available indicates that 2011 construction activity was flat to 10% down from 2010. According to various industry and national economic forecasts the future is unclear for the next few years. The credit crisis and the resulting tightening of credit could continue to negatively impact the availability of capital to fund construction projects for some time to come. Data on remodeling is not as readily available; however, remodeling activity historically trends up when new construction slows down.

General

Price competition for electrical wire and cable is intense, and the Company sells its products in accordance with prevailing market prices. Copper, a commodity product, is the principal raw material used by the Company in manufacturing its products. Copper accounted for approximately 86.1%, 81.1% and 73.5% of the Company's cost of

Table of Contents

goods sold during fiscal 2011, 2010 and 2009, respectively. The price of copper fluctuates, depending on general economic conditions and in relation to supply and demand and other factors, which causes monthly variations in the cost of copper purchased by the Company. The Company cannot predict copper prices in the future or the effect of fluctuations in the cost of copper on the Company's future operating results. Wire prices can, and frequently do change on a daily basis. This competitive pricing market for wire does not always mirror changes in copper prices, making margins highly volatile. With the Company's slow expansion into aluminum conductors in some of its building wire products, aluminum will slowly grow its percentage share of the raw materials cost for the Company. Historically, the cost of aluminum is much less than copper and also less volatile. With the volatility of both raw material prices and wire prices in the Company's end market, hedging raw materials can be risky. Historically, the Company has not engaged in hedging strategies for raw material purchases.

Results of Operations

The following table presents certain items of income and expense as a percentage of net sales for the periods indicated.

	Year Ended December 31,		
	2011	2010	2009
Net sales	100.0%	100.0%	100.0%
Cost of goods sold:			
Copper	75.8	73.8	67.8
Other raw materials	7.3	6.6	8.8
Depreciation	1.0	1.3	1.9
Labor and overhead	5.9	6.2	8.2
LIFO adjustment	(2.0)	3.0	5.6
Lower cost or market adjustment	0.0	0.0	0.0
	88.0	90.9	92.3
Gross profit	12.0	9.1	7.7
Selling, general and administrative expenses	5.5	6.3	6.7
Operating income	6.5	2.8	1.0
Interest and other (income) expense	0.0	0.3	0.2
Income before income taxes	6.5	2.5	0.8
Provision for income taxes	2.3	0.8	0.2
Net income	4.2%	1.7%	0.6%

The following discussion and analysis relates to factors that have affected the operating results of the Company for the years ended December 31, 2011, 2010 and 2009. Reference should also be made to the Consolidated Financial Statements and the related notes included under Item 8. Financial Statements and Supplementary Data of this Annual Report.

Net sales were \$1.180 billion in 2011, compared to 910.2 million in 2010 and \$649.6 million in 2009. The 29.7% increase in net sales in 2011 versus 2010 was primarily the result of a 22.2% increase in the average price of product sold and a 6.2% increase in the volume of copper pounds of product sold. The average price of copper purchased in 2011 increased 18.7% versus the 2010 average price. In comparing 2011 to 2010, the average sales price of wire that contained a pound of copper increased more than the average price of copper purchased during the period. Therefore, margins expanded as the spread between the price of wire sold and the cost of raw copper purchased increased by 33.8%, due primarily to improved industry pricing discipline. Fluctuations in sales prices are primarily a result of changing copper raw material prices and product price competition. Margins were stronger in all four quarters of 2011 versus 2010, peaking in the second half of the year.

The 40.1% increase in net sales in 2010 versus 2009 was primarily the result of a 45.8% increase in the average selling price of product sold and a 3.8% decrease in the volume of copper pounds of product sold. The average price of copper purchased in 2010 increased 50.3% versus the 2009 average price. Unit volume declined in concert with declining industry sales due to the continued low level of construction activity in the

Edgar Filing: ENCORE WIRE CORP - Form 10-K

United States as discussed throughout this report. The increased average selling price for wire rose more in dollars per pound than the cost of copper purchased. This increased the spread between the sales price of wire and the price of raw copper, and increased margins. Margins were at their lowest during the first quarter when, as noted in prior filings and above, a competitor was sold and liquidated their remaining inventory at levels that depressed industry margins. Margins bounced back in the second quarter and then stabilized in the second half of the year at levels that allowed the Company to be profitable due in part to its low cost structure.

Table of Contents

Cost of goods sold was \$1.040 billion in 2011 compared to \$827.8 million in 2010 and \$599.5 million in 2009. The copper costs included in cost of goods sold were \$895.2 million in 2011 compared to \$671.6 million in 2010 and \$440.5 million in 2009. Copper costs as a percentage of net sales increased to 75.8% in 2011 from 73.8% in 2010 and 67.8% in 2009. The increase as a percentage of net sales was due to copper costs increasing more than other costs. As noted above, copper costs are the largest component of costs and therefore the most significant driver of sales prices of wire. Accordingly, the increase in copper prices and the corresponding increase in net sales dollars in 2011 caused most of the other costs to shrink in terms of their percentage of net sales dollars. The cost of other raw materials, however, rose from 6.6% of net sales in 2010 to 7.3% in 2011. On a cents per pound basis, the cost of other raw materials increased by 35.7% in 2011 versus 2010, consistent with the cost of copper and other commodities and in small part due to the fact the Company began producing aluminum wire in 2011. Although the quantity of aluminum building wire sold in 2011 was insignificant compared to copper volumes, the Company did slowly increase its sales of aluminum wire during the year. The Company produced aluminum wire in its current plants in 2011. In December of 2011, the Company announced that it is building a new 202,000 square-foot manufacturing plant on its McKinney, Texas campus, in which the Company will expand its aluminum wire and cable production. While much cheaper than copper, aluminum is higher in cost than the majority of the rest of the products in the other materials category, which in turn contributed marginally to the rise in the other materials category percentage.

The increase in copper prices in 2010 compared to 2009 also caused other costs to shrink in terms of their percentage of sales dollars. The cost of other raw materials increased by 10.4% in 2010 versus 2009, consistent with the cost of copper and other commodities, albeit at a lower rate of increase. Material cost percentages in 2009 were increased by a 5.6% LIFO debit (expense). In 2010, material costs were increased by a 3.0% LIFO debit (expense), while in 2011 they were decreased by 2.0% LIFO credit (income). Adding LIFO to the copper and other materials, the total materials cost including LIFO in 2011 was 81.2% of net sales versus 83.4% in 2010 and 82.2% in 2009.

Depreciation, labor and overhead costs as a percentage of net sales were 6.9% in 2011 compared to 7.5% in 2010 and 10.1% in 2009. The percentage decrease of depreciation, labor and overhead costs in 2011 and 2010 was due primarily to the precipitous increase in copper driven sales dollars exceeding the percentage increase in depreciation, labor and overhead costs. This disparity is due to the fact that depreciation, labor and overhead costs have fixed or semi-fixed components and do not vary directly with unit volumes.

Inventories consist of the following at December 31 (in thousands):

	2011	2010	2009
Raw materials	\$ 18,482	\$ 27,092	\$ 14,497
Work-in-process	22,955	19,889	12,239
Finished goods	84,819	81,940	75,239
	126,256	128,921	101,975
Adjust to LIFO cost	(62,765)	(86,817)	(59,412)
Lower of cost or market adjustment			
	\$ 63,491	\$ 42,104	\$ 42,563

In 2011, copper traded in a relatively consistent range, at or near historical highs for most of the first three quarters and then made a fairly steep decline in the fourth quarter. This was offset slightly by a small increase in the amount of inventory on hand. These factors resulted in the 2011 year-end inventory value of all inventories using the LIFO method being \$62.8 million less than the FIFO value, and the 2011 year end LIFO reserve balance being \$24.0 million lower than at the end of 2010. This resulted in a LIFO adjustment decreasing cost of sales by \$24.0 million. In the fourth quarter of 2011, as part of the Company's aforementioned expansion into aluminum wire products and in anticipation of the start of production at the Company's new aluminum wire plant in 2012, the Company began a new aluminum wire inventory pool which is accounted for separately from the Company's copper wire inventory pool. The Company established this new aluminum wire pool in accordance with U.S. GAAP, which requires that new inventory items not previously present in significant quantities and having qualities significantly different from those items previously inventoried, as is the case with the physical, chemical, and cost differences between copper and aluminum metals, be accounted for separately. Based on the current copper and other raw material prices, there is no LCM adjustment necessary. Future reductions in the price of copper and other raw materials could require the Company to record an LCM adjustment against the related inventory balance, which would result in a negative impact on net income.

In 2010, copper traded in a relatively consistent range for most of the first three quarters and then made a fairly steep rise in the fourth quarter, approaching historical highs by year end. The unit volume of inventory on-hand also

Table of Contents

decreased slightly in 2010. These factors resulted in the 2010 year-end inventory value of all inventories using the LIFO method being \$86.8 million less than the FIFO value, and the 2010 year end LIFO reserve balance being \$27.4 million higher than at the end of 2009. This resulted in a corresponding increase of \$27.4 million in cost of goods sold for the year. Due to the management of inventory levels commensurate with declining unit sales volumes during 2010, the Company liquidated a portion of the inventory layer established in 2005. As a result, under the LIFO method, these inventory layers were liquidated at historical costs that were less than current costs, which favorably impacted cost of goods sold by \$1.6 million for the full year and net income for the full year by \$1.1 million.

In 2009, copper began at the 2008 year end lows and rose gradually throughout the year, mirroring the rebound in global commodity prices. The unit volume of inventory on-hand also decreased in 2009. These factors resulted in the 2009 year-end inventory value of all inventories using the LIFO method being \$59.4 million less than the FIFO value, and the 2009 year end LIFO reserve balance being \$36.3 million higher than at the end of 2008. This resulted in a corresponding increase of \$36.3 million in cost of goods sold for the year. Due to the management of inventory levels commensurate with declining unit sales volumes during 2009, the Company liquidated a portion of the inventory layer established in 2005. As a result, under the LIFO method, these inventory layers were liquidated at historical costs that were less than current costs, which favorably impacted cost of goods sold by \$13.1 million for the full year and net income for the full year by \$9.9 million.

Gross profit was \$140.9 million, or 11.9% of net sales in 2011 compared to \$82.4 million, or 9.1% of net sales in 2010 and \$50.1 million or 7.7% of net sales in 2009. The changes in gross profit were due to the factors discussed above.

Selling expenses, which include freight and sales commissions, were \$47.8 million in 2011, \$38.7 million in 2010 and \$31.7 million in 2009. As a percentage of net sales, selling expenses decreased slightly to 4.1% in 2011, versus 4.2% in 2010 and 4.9% in 2009. In 2011, selling expenses held essentially steady as a percentage of net sales. The 2010 decrease is due to freight costs dropping as a percentage of the increased sales dollars. General and administrative expenses, as a percentage of net sales, were 1.4% in 2011, 2.0% in 2010 and 1.8% in 2009. The percentage decrease in 2011 is due primarily to the reduction in legal expenses versus 2010, while the increase in 2010 is primarily due to corresponding changes in administrative, legal and state tax expenses. In 2011, 2010 and 2009 accounts receivable write-offs were not material, with a net write-off in 2011 of \$480,000. The Company increased the bad debt reserve by \$0, \$300,000 and \$300,000 in 2011, 2010 and 2009, respectively, to provide for potential bad debt expenses.

Interest expense decreased to \$0.3 million in 2011 from \$0.5 million in 2010 and \$3.2 million in 2009. As discussed in detail in previous filings, the Company paid off its long-term debt in January of 2010. The Company capitalized interest expense relating to the construction of assets in the amounts of approximately \$0 in 2011, \$29,000 in 2010 and \$354,000 in 2009.

The Company's effective tax rate was 34.2% in 2011, 31.8% in 2010 and 24.3% in 2009, commensurate with the Company's tax liabilities. The American Jobs Creation Act of 2004 provides a deduction from income for qualified domestic production activities that was phased in from 2005 through 2010. Accordingly, the impact of any deduction is being reported in the period for which the deduction will be claimed on the Company's tax return. The domestic production activity deduction reduced the 2011 effective tax rate approximately 2.0%.

As a result of the foregoing factors, the Company's net income was \$50.1 million in 2011, \$15.3 million in 2010 and \$3.6 million in 2009.

Off-Balance Sheet Arrangements

The Company does not currently have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Table of Contents

Liquidity and Capital Resources

The following table summarizes the Company's cash flow activities (in thousands):

	Year Ended December 31,		
	2011	2010	2009
Net cash provided by operating activities	\$ 26,169	\$ 2,444	\$ 28,605
Net cash used in investing activities	(16,946)	(21,629)	(18,783)
Net cash used in financing activities	(177)	(104,332)	(719)
Net increase (decrease) in cash and cash equivalents	\$ 9,046	\$ (123,517)	\$ 9,103

The Company maintains a substantial inventory of finished products to satisfy customers' prompt delivery requirements. As is customary in the industry, the Company provides payment terms to most of its customers that exceed terms that it receives from its suppliers. Therefore, the Company's liquidity needs have generally consisted of working capital necessary to finance receivables and inventory. Capital expenditures have historically been necessary to expand and update the production capacity of the Company's manufacturing operations. The Company has historically satisfied its liquidity and capital expenditure needs with cash generated from operations, borrowings under its various debt arrangements and sales of its common stock.

At December 31, 2011 and December 31, 2010, the Company had no debt outstanding.

The Company is party to a Financing Agreement with two banks, Bank of America, N.A., as Agent, and Wells Fargo Bank, National Association (as amended, the "Financing Agreement"). The Financing Agreement extends through August 6, 2013, and provides for maximum borrowings of the lesser of \$150,000,000 or the amount of eligible accounts receivable plus the amount of eligible finished goods and raw materials, less any reserves established by the banks. The calculated maximum borrowing amount available at December 31, 2011, as computed under the Financing Agreement, was \$149,660,000. Borrowings under the line of credit bear interest, at the Company's option, at either (1) LIBOR plus a margin that varies from 1.0% to 1.75% depending upon the ratio of debt outstanding to adjusted earnings or (2) the base rate (which is the higher of the federal funds rate plus 0.5% or the prime rate) plus 0% to 0.25% (depending upon the ratio of debt outstanding to adjusted earnings). A commitment fee ranging from 0.20% to 0.375% (depending upon the ratio of debt outstanding to adjusted earnings) is payable on the unused line of credit. At December 31, 2011, there were no borrowings outstanding under the Financing Agreement. Obligations under the Financing Agreement are the only contractual borrowing obligations or commercial borrowing commitments of the Company.

Obligations under the Financing Agreement are unsecured and contain customary covenants and events of default. The Company was in compliance with the covenants as of December 31, 2011.

The Company paid interest totaling \$321,742, \$522,000 and \$3.2 million in 2011, 2010 and 2009, respectively. The Company capitalized \$0, \$29,000 and \$354,000 of interest in 2011, 2010 and 2009, respectively.

On November 10, 2006, the Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 1,000,000 shares of its common stock through December 31, 2007 on the open market or through privately negotiated transactions at prices determined by the President of the Company. The Company's Board of Directors has subsequently authorized annual extensions of this stock repurchase program through March 31, 2013 and has authorized the repurchase of up to 2,610,000 shares of its common stock. The Company repurchased 10,124 shares of its stock in 2011 and 1,327 shares of its stock in 2010. All shares purchased under the program were purchased on the open market by the Company's broker pursuant to a Rule 10b5-1 plan announced on November 28, 2007.

Cash provided by operations was \$26.2 million in 2011 compared to cash provided by operations of \$2.4 million in 2010 and cash provided by operations of \$28.6 million in 2009. The increase in cash provided by operations of \$23.7 million in 2011 versus 2010 was due to several factors. The Company had net income of \$50.1 million in 2011 versus net income of \$15.3 million in 2010. Accounts receivable increased in 2011 and 2010, resulting in a use of cash of \$8.5 million and \$57.5 million, respectively. Accounts receivable increased in concert with the increased dollar sales in both years versus the prior years. Inventory increased in 2011, resulting in a \$21.4 million use of cash, while inventory decreased in 2010, which provided a \$0.5 million source of cash. This swing in inventory resulted in an overall decrease in cash provided of \$21.8 million in 2011 versus 2010. Accounts payable and accrued liabilities resulted in a \$43.1 million decrease in cash provided in 2011 versus 2010 due primarily to the decrease in accounts payable, stemming from the timing of inventory receipts at quarter end. Changes in current and deferred taxes provided \$9.2 million in cash in 2011 versus a \$21,000 use of cash in 2010. These changes in cash flow were the primary drivers

of the \$23.7 million increase in cash flow from operations in 2011 versus 2010.

Table of Contents

The decrease in cash provided by operations of \$26.2 million in 2010 versus 2009 was due to several factors. In 2010, cash used for increased accounts receivable increased by \$50.2 million more than in 2009, while inventory decreases provided \$22.5 million less cash in 2010 than in 2009. This net \$72.7 million negative swing in the use of cash was largely offset by several positive swings in sources of cash, including: \$22.7 million from increased accounts payable and accrued liabilities, \$11.7 million from increased net income and \$5.5 million from increased taxes payable. Accounts receivable increased due to the increased sales dollars in 2010. Inventory dollars were virtually flat in 2010 versus a \$23.0 million decrease in 2009.

Cash used in investing activities decreased to \$16.9 million in 2011 from \$21.6 million in 2010, versus \$18.8 million in 2009. In 2011, capital expenditures were used for various machinery and equipment, and completing the construction and equipping of the new research & development building. In 2010, the funds were used for machinery and equipment, constructing a new research & development building and land purchases. In 2009 capital expenditures were made on various machinery and equipment purchases.

The cash used in financing activities of \$0.2 million in 2011 consisted primarily of \$1.9 million in dividend payments offset by \$1.8 million proceeds from issuance of Company stock related to employees exercising stock options. The cash used in financing activities of \$104.3 million in 2010 was primarily the result of the Company's early retirement of long-term notes payable. The cash used in financing activities of \$0.7 million in 2009 consisted of \$1.8 million in dividend payments offset by \$0.7 million proceeds from issuance of Company stock related to employees exercising stock options and \$0.4 million arising from excess tax benefits of the options exercised.

During 2012, the Company expects its capital expenditures will consist primarily of the new building and manufacturing equipment for its new aluminum building wire plant as discussed above. The Company also expects its future working capital requirements may fluctuate as a result of changes in unit sales volumes and the price of copper and other raw materials. The Company believes that its cash balance, cash flow from operations and the financing available from its revolving credit facility will satisfy working capital and capital expenditure requirements for the next twelve months.

Contractual Obligations

As shown below, the Company had the following contractual obligations as of December 31, 2011.

Contractual Obligations	Payments Due By Period (\$ in Thousands)				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Long-Term Debt Obligations	\$	\$	\$	\$	\$
Capital Lease Obligations					
Operating Lease Obligations					
Purchase Obligations	69,140	69,140			
Total	\$ 69,140	\$ 69,140	\$	\$	\$

Note: Amounts listed as purchase obligations consist of open purchase orders for major raw material purchases and \$25.9 million of capital equipment and construction purchase orders open as of December 31, 2011.

Critical Accounting Policies and Estimates

Management's discussion and analysis of its financial condition and results of operations are based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. See Note 1 to the Consolidated Financial Statements. Management believes the following critical accounting policies affect its more significant estimates and assumptions used in the preparation of its consolidated financial statements.

Edgar Filing: ENCORE WIRE CORP - Form 10-K

Inventories are stated at the lower of cost, using the last-in, first out (LIFO) method, or market. The Company maintains two inventory pools for LIFO purposes. As permitted by U.S. generally accepted accounting principles, the Company maintains its inventory costs and cost of goods sold on a first-in, first-out (FIFO) basis and makes a monthly adjustment to adjust total inventory and cost of goods sold from FIFO to LIFO. The Company applies the lower of

Table of Contents

cost or market (LCM) test by comparing the LIFO cost of its raw materials, work-in-process and finished goods inventories to estimated market values, which are based primarily upon the most recent quoted market price of copper, aluminum and finished wire prices as of the end of each reporting period. The Company performs a lower of cost or market calculation quarterly. As of December 31, 2011, no LCM adjustment was required. However, decreases in copper and other material prices could necessitate establishing an LCM reserve in future periods. Additionally, future reductions in the quantity of inventory on hand could cause copper or other raw materials that are carried in inventory at costs different from the cost of copper and other raw materials in the period in which the reduction occurs to be included in costs of goods sold for that period at the different price.

Revenue from the sale of the Company's products is recognized when goods are shipped to the customer, title and risk of loss are transferred, pricing is fixed or determinable and collection is reasonably assured. A provision for payment discounts and customer rebates is estimated based upon historical experience and other relevant factors and is recorded within the same period that the revenue is recognized.

The Company has provided an allowance for losses on customer receivables based upon estimates of those customers' inability to make required payments. Such allowance is established and adjusted based upon the makeup of the current receivable portfolio, past bad debt experience and current market conditions. If the financial condition of our customers was to deteriorate and impair their ability to make payments to the Company, additional allowances for losses might be required in future periods.

Information Regarding Forward-Looking Statements

This report contains various forward-looking statements and information that are based on management's belief as well as assumptions made by and information currently available to management. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct. Such statements are subject to certain risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those expected.

Among the key factors that may have a direct bearing on the Company's operating results and stock price are:

Fluctuations in the global and national economy.

Fluctuations in the level of activity in the construction and remodeling industries.

Demand for the Company's products.

The impact of price competition on the Company's margins.

Fluctuations in the price of copper and other key raw materials.

The loss of key manufacturers' representatives who sell the Company's product line.

Fluctuations in utility costs, especially electricity and natural gas.

Fluctuations in insurance costs of various types.

Edgar Filing: ENCORE WIRE CORP - Form 10-K

Weather related disasters at the Company's and/or key vendor's operating facilities.

Stock price fluctuations due to stock market expectations.

Unforeseen future legal issues and/or government regulatory changes.

Patent and intellectual property disputes.

Fluctuations in the Company's financial position or national banking issues that impede the Company's ability to obtain reasonable financing.

This list highlights some of the major factors that could affect the Company's operations or stock price, but cannot enumerate all the potential issues that management faces on a daily basis, many of which are totally out of management's control. For further discussion of the factors described herein and their potential effects on the Company, see Item 1. Business, Item 1A. Risk Factors, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

The Company does not engage in metal futures trading or hedging activities and does not enter into derivative financial instrument transactions for trading or other speculative purposes. However, the Company is generally exposed to commodity price and interest rate risks.

The Company purchases copper cathode primarily from miners and commodity brokers at prices determined each month based on the average daily COMEX closing prices for copper for that month, plus a negotiated premium. As a result, fluctuations in copper prices caused by market forces can significantly affect the Company's financial results.

Table of Contents

Interest rate risk is attributable to the Company's long-term debt. As of December 31, 2011, the Company was a party to the Financing Agreement. Amounts outstanding under the Financing Agreement, as amended, are payable on August 6, 2013, with interest payments due quarterly. At December 31, 2011, the balance outstanding under the Financing Agreement was zero.

There is inherent rollover risk for borrowings under the Financing Agreement as such borrowings mature and are renewed at current market rates. The extent of this risk is not quantifiable or predictable because of the variability of future interest rates and the Company's future financing requirements. Assuming that the Company had \$100 million of outstanding debt, an average 1% interest rate increase in 2012 would increase the Company's interest expense by \$1,000,000.

For further information, see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 1A. Risk Factors.

Item 8. Financial Statements and Supplementary Data.

The consolidated financial statements of the Company and the notes thereto appear on the following pages.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

Encore Wire Corporation

We have audited the accompanying consolidated balance sheets of Encore Wire Corporation (the Company) as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Encore Wire Corporation at December 31, 2011 and 2010, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Encore Wire Corporation's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 2, 2012 expressed an unqualified opinion thereon.

Table of Contents

Encore Wire Corporation

Notes to Consolidated Financial Statements

December 31, 2011

1. Significant Accounting Policies

Business

The Company conducts its business in one segment – the manufacture of electric building wire, principally NM-B cable, for use primarily as interior wiring in homes, apartments, and manufactured housing, and THHN/THWN-2 cable and metal clad and armored cable for use primarily as wiring in commercial and industrial buildings. The Company sells its products primarily through 31 manufacturers’ representatives located throughout the United States and, to a lesser extent, through its own direct marketing efforts. The principal customers for Encore’s building wire are wholesale electrical distributors.

Copper, a commodity product, is the principal raw material used in the Company’s manufacturing operations. Copper accounted for 86.1%, 81.1% and 73.5% of its cost of goods sold during 2011, 2010, and 2009, respectively. The price of copper fluctuates, depending on general economic conditions and in relation to supply and demand and other factors, and has caused monthly variations in the cost of copper purchased by the Company. The Company cannot predict copper prices in the future or the effect of fluctuations in the cost of copper on the Company’s future operating results. As the Company continues to expand its product offerings with aluminum wire, the cost of aluminum will impact the raw materials discussion contained in this paragraph and throughout this report. Through 2011, aluminum rod purchased to draw into aluminum wire was less than 1% of cost of sales.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary. Significant intercompany accounts and transactions have been eliminated upon consolidation.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Revenue Recognition

Revenue from the sale of the Company’s products is recognized when goods are shipped to the customer, title and risk of loss are transferred, pricing is fixed or determinable and collection is reasonably assured. A provision for payment discounts and customer rebates is estimated based upon historical experience and other relevant factors and is recorded within the same period that the revenue is recognized.

Freight Expenses

The Company classifies shipping and handling costs as a component of selling, general and administrative expenses. Shipping and handling costs were approximately \$18.4 million, \$15.1 million and \$14.5 million for the years ended December 31, 2011, 2010 and 2009, respectively.

Fair Value of Financial Instruments

Certain items are required to be measured at fair value on a recurring basis. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A three-level hierarchy is followed for disclosure to show the extent and level of judgment used to estimate fair value measurements:

Edgar Filing: ENCORE WIRE CORP - Form 10-K

Level 1 Inputs used to measure fair value are unadjusted quoted prices that are available in active markets for the identical assets or liabilities as of the reporting date.

Table of Contents

Level 2 Inputs used to measure fair value, other than quoted prices included in Level 1, are either directly or indirectly observable as of the reporting date through correlation with market data, including quoted prices for similar assets and liabilities in active markets and quoted prices in markets that are not active. Level 2 also includes assets and liabilities that are valued using models or other pricing methodologies that do not require significant judgment since the input assumptions used in the models, such as interest rates and volatility factors, are corroborated by readily observable data from actively quoted markets for substantially the full term of the financial instrument.

Level 3 Inputs used to measure fair value are unobservable inputs that are supported by little or no market activity and reflect the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions.

At December 31, 2011 and 2010, the Company had no financial instruments that were required to be measured at fair value on a recurring basis.

At December 31, 2011 and 2010, the Company's fair value of cash equivalents of \$112.3 million and \$103.3 million respectively, approximated carrying value due to the short maturity of these financial instruments.

Concentrations of Credit Risk and Accounts Receivable

Accounts receivable represent amounts due from customers (primarily wholesale electrical distributors, manufactured housing suppliers and retail home improvement centers) related to the sale of the Company's products. Such receivables are uncollateralized and are generally due from a diverse group of customers located throughout the United States. The Company establishes an allowance for losses based upon the makeup of the current portfolio, past bad debt experience and current market conditions.

Allowance for Losses Progression (In Thousands of Dollars)	2011	2010	2009
Beginning balance January 1	\$ 2,582	\$ 2,278	\$ 2,000
(Write offs) of bad debts, net of collections of previous write offs	(480)	4	(22)
Bad debt provision	0	300	300
Ending balance at December 31	\$ 2,102	\$ 2,582	\$ 2,278

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents. At December 31, 2011 and 2010, the Company's cash equivalents consisted of investments in money market accounts with the Company's banks.

Inventories

Inventories are stated at the lower of cost, using the last-in, first-out (LIFO) method, or market. The Company evaluates the market value of its raw materials, work-in-process and finished goods inventory primarily based upon current raw material and finished goods prices at the end of each period.

Property, Plant, and Equipment

Depreciation of property, plant and equipment for financial reporting is provided on the straight-line method over the estimated useful lives of the respective assets as follows: buildings and improvements, 15 to 39 years; machinery and equipment, 3 to 15 years; and furniture and fixtures, 3 to 15 years. Accelerated cost recovery methods are used for tax purposes. Repairs and maintenance costs are expensed as incurred.

Stock-Based Compensation

The Company follows the fair value based method in accounting for equity-based compensation. Under the fair value based method, compensation cost is measured at the grant date based on the fair value of the award and is recognized on a straight-line basis over the related service period. Excess tax benefits on stock-based compensation are recognized as an increase to additional paid-in capital and as a part of cash flows from financing activities.

Table of Contents

Earnings Per Share

Earnings per common and common equivalent share are computed using the weighted average number of shares of common stock and common stock equivalents outstanding during each period. The dilutive effects of stock options, which are common stock equivalents, are calculated using the treasury stock method.

Income Taxes

Income taxes are provided for based on the liability method, resulting in deferred income tax assets and liabilities arising due to temporary differences. Temporary differences are differences between the tax basis of assets and liabilities and their reported amounts in the financial statements that will result in taxable or deductible amounts in future years.

Comprehensive Income

Comprehensive income is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. There were no differences between comprehensive income and reported income in the periods presented. Accounting Standards Update (ASU) 2011-5, Comprehensive Income, is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2011, with early adoption permitted and retrospective application required. Under ASU 2011-5, for companies that report items of other comprehensive income, there is a requirement to present comprehensive income along with net income in either a single continuous statement or two separate but consecutive statements. The Company has early adopted the provisions of ASU 2011-5 in fiscal 2011. However, as there were no differences between comprehensive income and reported income, the adoption did not have an effect on the Company's financial statements as of December 31, 2011 and 2010, or for the three fiscal years ended December 31, 2011.

2. Inventories

Inventories consist of the following as of December 31:

In Thousands of Dollars	2011	2010
Raw materials	\$ 18,482	\$ 27,092
Work-in-process	22,955	19,889
Finished goods	84,819	81,940
	126,256	128,921
Adjust to LIFO cost	(62,765)	(86,817)
Lower of cost or market adjustment		
	\$ 63,491	\$ 42,104

During 2011 the Company did not liquidate any LIFO inventory layers established in prior years. During 2010, the Company liquidated portions of the inventory layer established in 2005. As a result, under the LIFO method, these inventory layers were liquidated at historical costs that were less than current costs, which favorably impacted net income for the year ended December 31, 2010 by \$1.1 million.

In the fourth quarter of 2011, as part of the Company's aforementioned expansion into aluminum wire products and in anticipation of the start of production at the Company's new aluminum wire plant in 2012, the Company began a new aluminum wire inventory pool which is accounted for separately from the Company's copper wire inventory pool. The Company established this new aluminum wire pool in accordance with U.S. GAAP, which requires that new inventory items not previously present in significant quantities and having qualities significantly different from those items previously inventoried, as is the case with the physical, chemical, and cost differences between copper and aluminum metals, be accounted for separately.

Table of Contents**3. Accrued Liabilities**

Accrued liabilities consist of the following as of December 31:

In Thousands of Dollars	2011	2010
Sales volume discounts payable	\$ 16,220	\$ 14,997
Property taxes payable	2,809	2,648
Commissions payable	2,053	2,290
Accrued salaries	3,548	2,591
Other accrued liabilities	682	665
	\$ 25,312	\$ 23,191

4. Debt

At December 31, 2011 and December 31, 2010, the Company had no debt outstanding.

The Company is party to a Financing Agreement with two banks, Bank of America, N.A., as Agent, and Wells Fargo Bank, National Association (as amended, the "Financing Agreement"). The Financing Agreement extends through August 6, 2013, and provides for maximum borrowings of the lesser of \$150,000,000 or the amount of eligible accounts receivable plus the amount of eligible finished goods and raw materials, less any reserves established by the banks. The calculated maximum borrowing amount available at December 31, 2011, as computed under the Financing Agreement, was \$149,660,000. Borrowings under the line of credit bear interest, at the Company's option, at either (1) LIBOR plus a margin that varies from 1.0% to 1.75% depending upon the ratio of debt outstanding to adjusted earnings or (2) the base rate (which is the higher of the federal funds rate plus 0.5% or the prime rate) plus 0% to 0.25% (depending upon the ratio of debt outstanding to adjusted earnings). A commitment fee ranging from 0.20% to 0.375% (depending upon the ratio of debt outstanding to adjusted earnings) is payable on the unused line of credit. At December 31, 2011, there were no borrowings outstanding under the Financing Agreement. Obligations under the Financing Agreement are the only contractual borrowing obligations or commercial borrowing commitments of the Company.

Obligations under the Financing Agreement are unsecured and contain customary covenants and events of default. The Company was in compliance with the covenants as of December 31, 2011.

The Company paid interest totaling \$321,742, \$522,000 and \$3.2 million in 2011, 2010 and 2009, respectively. The Company capitalized \$0, \$29,000 and \$354,000 of interest in 2011, 2010 and 2009, respectively.

5. Income Taxes

The provisions for income tax expense are summarized as follows for the years ended December 31:

In Thousands of Dollars	2011	2010	2009
Current:			
Federal	\$ 15,098	\$ 11,268	\$ 6,819
State	985	663	585
Deferred	9,981	(4,802)	(6,240)
	\$ 26,064	\$ 7,129	\$ 1,164

The differences between the provision for income taxes and income taxes computed using the federal income tax rate are as follows for the years ended December 31:

Edgar Filing: ENCORE WIRE CORP - Form 10-K

In Thousands of Dollars	2011	2010	2009
Amount computed using the statutory rate	\$ 26,668	\$ 7,847	\$ 1,680
State income taxes, net of federal tax benefit	990	263	162
Qualified domestic production activity deduction	(1,511)	(1,198)	(439)
Other items	(83)	217	(239)
	\$ 26,064	\$ 7,129	\$ 1,164

Table of Contents

In October 2004, the American Jobs Creation Act of 2004 (the Act) was passed, which provides a deduction for income from qualified domestic production activities which generally will be phased in from 2005 through 2010. This deduction lowered the Company's effective tax rate by \$1,511,000, \$1,198,000 and \$439,000 or approximately 2.0%, 5.3% and 9.1% for 2011, 2010 and 2009, respectively.

The tax effect of each type of temporary difference giving rise to the net deferred tax liability at December 31, 2011 and 2010 is as follows:

In Thousands of Dollars	Deferred Tax Asset (Liability)			
	2011		2010	
	Current	Non-current	Current	Non-current
Depreciation	\$	\$ (15,833)	\$	\$ (11,746)
Inventory	(2,748)		2,878	
Allowance for doubtful accounts	762		937	
Uniform capitalization rules	259		206	
Other	319		464	
	\$ (1,408)	\$ (15,833)	\$ 4,485	\$ (11,746)

The Company made income tax payments of \$16.9 million in 2011, \$7.8 million in 2010 and \$8.1 million in 2009.

The Company's federal income tax returns for the years subsequent to December 31, 2007 remain subject to examination. The Company's income tax returns in major state income tax jurisdictions remain subject to examination for various periods subsequent to December 31, 2006. The Company has no reserves for uncertain tax positions as of December 31, 2011. Interest and penalties resulting from audits by tax authorities have been immaterial and are included in the provision for income taxes in the consolidated statements of income.

6. Stock Options

The Company previously granted options under the Encore Wire Corporation 1999 Stock Option Plan (the 1999 Stock Option Plan) which expired on June 28, 2009. In 2010, the Board of Directors adopted a new stock option plan called the Encore Wire 2010 Stock Option Plan (the 2010 Stock Option Plan) which was approved by the Company's stockholders at the 2010 Annual Meeting of Stockholders. Like the 1999 Stock Option Plan, the 2010 Stock Option Plan permits the grant of stock options to its directors, officers and employees. The Company granted stock option awards in 2009 and 2010 with exercise prices equal to the fair market value of its stock on the date of grant of the options. These options vest ratably over a period of five years from the time the options were granted. No options were granted in 2011. The maximum term of any option granted under the 1999 or 2010 Stock Option Plan is ten years. As of December 31, 2011, 484,000 options were available to be granted in the future under the 2010 Stock Option Plan.

During 2011, 2010 and 2009, the Company recorded \$416,056, \$466,776 and \$451,303, respectively, of stock based compensation included in selling, general and administrative expenses. The income tax benefit realized in excess of book deductions associated with stock based compensation totaled \$100,857, \$55,162 and \$363,455 for the years ended December 31, 2011, 2010 and 2009, respectively.

The following presents a summary of stock option activity for the year ended December 31, 2011 (aggregate intrinsic value in thousands):

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2011	439,576	\$ 15.11		
Granted	0	0.00		
Exercised	(219,951)	8.13		
Forfeited/Cancelled	(3,125)	13.89		

Edgar Filing: ENCORE WIRE CORP - Form 10-K

Outstanding at December 31, 2011	216,500	\$ 22.22	5.95	\$ 792
Vested and exercisable at December 31, 2011	142,520	\$ 24.51	5.56	\$ 195

Table of Contents

The fair value of stock options granted during the years ended December 31, 2011, 2010, and 2009, was estimated on the date of grant using a Black-Scholes options pricing model and the following weighted average assumptions:

	Year Ended December 31,		
	2011	2010	2009
Risk-free interest rate	n/a	1.76%	2.70%
Expected dividend yield	n/a	0.42%	0.38%
Expected volatility	n/a	48.3%	52.9%
Expected lives	n/a	5.0 years	5.0 years

We base expected volatilities on historical volatilities of our common stock. The expected life represents the weighted average period of time that options granted are expected to be outstanding giving consideration to vesting periods and management's consideration of historical exercise patterns. The risk free rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding to the expected life of the option.

ASC 718 requires the estimation of forfeitures when recognizing compensation expense and adjustment of the estimated forfeiture rate over the requisite service period should actual forfeitures differ from such estimates. Changes in estimated forfeitures are recognized through a cumulative catch-up adjustment, which is recognized in the period of change and impacts the amount of un-recognized compensation expense to be recorded in future periods.

During the years ended December 31, 2011, 2010, and 2009, the weighted average grant date fair value of options granted was n/a, \$8.10 and \$9.83, respectively, and the total intrinsic value of options exercised was \$3.1 million, \$701,000 and \$2.6 million, respectively. As of December 31, 2011, total unrecognized compensation cost related to non-vested stock options of \$421,953 was expected to be recognized over a weighted average period of 1.90 years.

7. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share for the year ended December 31:

In Thousands	2011	2010	2009
Numerator:			
Net income	\$ 50,131	\$ 15,290	\$ 3,636
Denominator:			
Denominator for basic earnings per share weighted average shares	23,300	23,184	23,011
Effect of dilutive securities:			
Employee stock options	110	158	287
Denominator for diluted earnings per share weighted average shares	23,410	23,342	23,298

Stock options to purchase common stock at exercise prices in excess of the average actual stock price for the period that were anti-dilutive and that were excluded from the determination of diluted earnings per share are as follows:

	2011	2010	2009
Weighted average anti-dilutive stock options	79,500	182,593	168,954

Edgar Filing: ENCORE WIRE CORP - Form 10-K

Weighted average exercise price	\$ 31.28	\$ 24.51	\$ 25.37
---------------------------------	----------	----------	----------

8. Stockholders' Equity

On November 10, 2006, the Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 1,000,000 shares of its common stock through December 31, 2007 on the open market or through privately negotiated transactions at prices determined by the President of the Company. The Company's Board of Directors has subsequently authorized annual extensions of this stock repurchase program through March 31, 2013 and has authorized the repurchase of up to 2,610,000 shares of its common stock. The Company repurchased

Table of Contents

10,124 shares of its stock in 2011 and 1,327 shares of its stock in 2010. All shares purchased under the program were purchased on the open market by the Company's broker pursuant to a Rule 10b5-1 plan announced on November 28, 2007.

9. Contingencies

On July 7, 2009, Southwire Company, a Delaware corporation ("Southwire"), filed a complaint for patent infringement against the Company and Cerro Wire, Inc. ("Cerro") in the United States District Court for the Eastern District of Texas. In the complaint, Southwire alleged that the Company infringed one or more claims of United States Patent No. 7,557,301 (the "301 patent"), entitled "Method of Manufacturing Electrical Cable Having Reduced Required Force for Installation," by making and selling electrical cables, including the Company's Super Slick cables. The case has been transferred to the Northern District of Georgia and the parties have agreed to stay it pending reexamination of the "301 patent" by the United States Patent and Trademark Office (the "USPTO"). On June 23, 2011, the USPTO issued an office action in the reexamination finally rejecting all the claims of the "301 patent." Southwire responded to these final rejections on August 8, 2011 by submitting substantially amended claims. The examiner determined that the amended claims captured patentable subject matter and on September 21, 2011 issued a notice that a reexamination certificate would issue evidencing the patentability of the amended claims. The reexamination certificate for the "301 patent" issued on December 21, 2011. The parties are scheduled to meet for settlement conference negotiations on March 21, 2012.

On August 24, 2009, Southwire filed a second complaint for patent and trademark infringement against the Company in the United States District Court for the Eastern District of Texas. In the second complaint, Southwire alleged that the Company infringed one or more of the claims of United States Patent No. 6,486,395 entitled "Interlocked Metal Clad Cable" (the "395 Patent") by making and selling electrical cables, including the Company's MCMP Multipurpose cables. Southwire also alleged that the Company infringed Southwire's United States Trademark Registration No. 3,292,777 for the mark, "MCAP." The second complaint also alleged a variety of related federal and state statutory and common law claims including unfair competition. The Company filed counterclaims against Southwire alleging claims of statutory and common law unfair competition, tortious interference with existing and prospective business relations, misappropriation and claims for declaratory relief. The parties dismissed without prejudice all claims and counterclaims of the case. An agreed dismissal order was entered April 14, 2011.

On July 2, 2010, the Company filed a complaint against Southwire in the Northern District of Georgia. The complaint alleged that Southwire was using a deceptively misdescriptive trademark on its SimPull products, and that Southwire had made false statements about the Company's Slick Wire products. Southwire's United States Patent No. 7,749,024 (the "024 patent") issued on July 6, 2010. The morning the patent issued, the Company amended its complaint to seek a declaratory judgment that the Company's Slick Wire products do not infringe the "024 patent." Later that same day, Southwire filed a separate complaint against the Company and Cerro Wire in the Eastern District of Texas alleging infringement of the "024 patent." The Company's complaint against Southwire was stayed by agreement on April 11, 2011. The case will remain stayed until the USPTO issues a certificate of reexamination of the "024 patent." The complaint filed by Southwire in the Eastern District of Texas has been voluntarily dismissed and Southwire will have the option to pursue its claims against the Company in the Northern District of Georgia, once the reexamination is completed. On October 8, 2010, the Company filed a request with the USPTO for an inter partes reexamination of the "024 patent." On November 9, 2010, the USPTO ordered the reexamination of the "024 patent." In ordering reexamination of Southwire's "024 patent," the USPTO determined that the Company's submission of prior art raised a substantial new question of patentability of the claims of the "024 patent." On December 3, 2010, the USPTO issued a non-final office action rejecting all of the claims of the "024 Patent." Southwire filed a response to the non-final office action on February 3, 2011, which included legal arguments and supporting technical declarations. The Company filed its comments to the Southwire response on March 3, 2011, including points and authorities, legal arguments, and supporting technical declarations. The reexamination continues and the parties are awaiting the Examiner's action on the parties' latest filings.

Southwire's complaints sought unspecified damages and injunctive relief. At this time, all pending litigation between Encore and Southwire has been dismissed or stayed pending the outcome of the reexaminations of the "024 and "301 Patents.

The potentially applicable factual and legal issues related to the above claims asserted against the Company have not been resolved. The Company is currently unable to determine if liability is probable, and the Company cannot reasonably estimate the amount of any potential loss associated with these matters. Accordingly, the Company has not recorded a liability for these pending lawsuits. The Company disputes all of Southwire's claims and alleged damages and intends to vigorously defend the lawsuits and vigorously pursue its own claims against Southwire if and when the litigation resumes. From time to time, the Company is also a party to litigation and claims arising out of its ordinary course of business.

Table of Contents

10. Encore Wire Corporation 401(k) Profit Sharing Plan

The Company sponsors a tax qualified 401(k) profit sharing plan known as the Encore Wire Corporation 401(k) Profit Sharing Plan (the 401(k) Plan) that is intended to provide participating employees an opportunity to save money for retirement. Employees are eligible to participate in the 401(k) Plan and to receive matching contributions after completing one year of service (as defined in the 401(k) Plan).

Eligible employees may elect to contribute between 1% and 50% (15% prior to November 15, 2010) of eligible compensation to the 401(k) Plan on a pre-tax basis, up to IRS limits. These employee contributions are called elective deferral contributions. The Company matches a portion of the elective deferral contributions made to the 401(k) Plan by eligible employees. Effective January 1, 2010, the 401(k) Plan was amended to provide for a safe-harbor matching contribution equal to 100% of the first 3% of an employee s eligible compensation contributed to the 401(k) Plan and 50% of the next 2% of eligible compensation contributed by such employee to the 401(k) Plan for the year. Employer safe harbor matching contributions are 100% vested.

Prior to January 1, 2010, the 401(k) Plan provided for a discretionary matching contribution. For 2009, the Company matched 50% of the first 6% of eligible compensation that an employee contributed to the 401(k) Plan. In 2009, matching contributions were allocated to participants (i) who had completed 1,000 hours of service during the year and were employed on December 31 or (ii) whose death, retirement (e.g., termination of employment after age 65) or termination of employment on account of disability occurred during the year. Employer matching contributions made to the 401(k) Plan prior to 2010 vest at a rate of 20% per year of service and become fully vested after an employee has completed five years of vesting service (as defined in the 401(k) Plan).

The Company s matching contributions were \$639,432, \$497,785 and \$329,474 in years 2011, 2010 and 2009, respectively.

At the discretion of its Board of Directors, the Company may, but is not required to, make profit-sharing contributions to the 401(k) Plan on behalf of its employees. The Company made no profit-sharing contributions for 2011, 2010 or 2009.

11. Related Party Transactions

The Company purchases certain finished goods inventory components from a company that is partially owned by a family member of an individual serving on its Board of Directors. The Company purchases these products from this company, which totaled approximately \$6.9 million, \$5.3 million and \$4.8 million in 2011, 2010 and 2009, respectively, at prices that we believe are no less favorable than prices available from non-affiliated parties. Additionally, for a minor portion of its freight requirements, the Company uses a freight carrier that is owned by a family member of one of the Company s executive officers. During fiscal years 2011, 2010 and 2009, amounts paid to the affiliated freight carrier were not significant. The Company obtains quotes and purchases these items from other vendors at prices that confirm that the Company is obtaining prices that are no less favorable than prices available from non-affiliated parties. Each of these transactions was approved by the Audit Committee pursuant to Encore Wire Corporation s Related Party Transactions Policy.

In February 2012, the Company entered into a Registration Rights Agreement with Capital Southwest Corporation and Capital Southwest Venture Corporation (together, the Stockholders), pursuant to which the Company agreed to register the offer and sale of 4,086,750 shares of common stock of the Company held by the Stockholders on a registration statement on Form S-3. In exchange for registration of the offer and sale of such shares, the Stockholders agreed to reimburse the Company for all costs, fees and expenses incurred by the Company in connection with such registration, unless the registration statement does not become effective solely due to the actions or omissions of the Company and without fault of the Stockholders. The Company s registration of such shares does not necessarily mean that the Stockholders will offer or sell such shares. The Company cannot predict if, when or in what amounts the Stockholders may sell any of the shares covered by the registration statement. The disinterested members of the board of directors of the Company approved the Company entering into the Registration Rights Agreement.

Table of Contents**12. Quarterly Financial Information (Unaudited)**

The following is a summary of the unaudited quarterly financial information for the two years ended December 31, 2011 and 2010 (in thousands, except per share amounts):

2011	March 31	Three Months Ended		
		June 30	September 30	December 31
Net sales	\$ 303,351	\$ 309,469	\$ 319,356	\$ 248,297
Gross profit	33,755	30,632	37,839	38,627
Net income (loss)	10,654	9,461	13,721	16,295
Net income (loss) per common share basic	0.46	0.41	0.59	0.70
Net income (loss) per common share diluted	0.46	0.40	0.59	0.69

2010	March 31	Three Months Ended		
		June 30	September 30	December 31
Net sales	\$ 175,229	\$ 236,094	\$ 242,751	\$ 256,148
Gross profit	10,601	26,915	22,768	22,125
Net income (loss)	(2,466)	8,135	5,092	4,529
Net income (loss) per common share basic	(0.11)	0.35	0.22	0.20
Net income (loss) per common share diluted	(0.11)	0.35	0.22	0.19

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

Not applicable.

Item 9A. Controls and Procedures.

Disclosure Controls and Procedures

The Company maintains controls and procedures designed to ensure that information required to be disclosed by it in the reports it files with or submits to the Securities and Exchange Commission (the "SEC") is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and to ensure that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company's management, including the Chief Executive and Chief Financial Officers, as appropriate to allow timely decisions regarding required disclosure. Based on an evaluation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report conducted by the Company's management, with the participation of the Chief Executive and Chief Financial Officers, the Chief Executive and Chief Financial Officers concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports it files with or submits to the SEC is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and to ensure that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company's management, including the Chief Executive and Chief Financial Officers, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended) for the Company.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2011. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*. Based on our assessment, we concluded that, as of December 31, 2011, the Company's internal control over financial reporting is effective based on those criteria.

Ernst & Young LLP, the independent registered public accounting firm that audited the Company's consolidated financial statements, has also audited the Company's internal control over financial reporting as of December 31, 2011. Ernst & Young LLP's attestation report on the Company's internal control over financial reporting appears directly below.

There have been no changes in the Company's internal control over financial reporting or in other factors that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting during the Company's last fiscal quarter.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

Encore Wire Corporation

We have audited Encore Wire Corporation's (the Company) internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Encore Wire Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Encore Wire Corporation as of December 31, 2011 and 2010 and the related consolidated statements of income, stockholders equity and cash flows for each of the three years in the period ended December 31, 2011 and our report dated March 2, 2012 expressed an unqualified opinion thereon.

Item 9B. Other Information.

On and effective as of February 27, 2012, the Board of Directors of the Company decreased the number of directors constituting the Board from seven to six directors and adopted the Third Amended and Restated Bylaws of the Company (the "Amended and Restated Bylaws"). The amendments adopted by the Board of Directors as part of the Amended and Restated Bylaws include the following:

Article II, Section 1 was amended to provide that the meetings of the stockholders for the election of directors shall be held in McKinney, Texas instead of Dallas, Texas, unless otherwise designated by the Board of Directors of the Company.

Article II, Section 2 was amended to provide that annual meetings of stockholders will be on the first Tuesday in May instead of April, unless otherwise designated by the Board of Directors of the Company.

Article II, Section 7 was amended and restated to add an advance notice provision requiring a stockholder to meet the following requirements, in addition to requirements under applicable securities laws and Delaware law, to properly bring business before an annual or special meeting of the stockholders, including the nomination of directors:

Such stockholder must provide advance notice to the Company of such business not less than 90 and no more than 120 days prior to the anniversary of the preceding year's annual meeting of stockholders, and not less than 60 days prior to a special meeting; provided that if the public announcement of the date of a special meeting is not given at least 70 days prior to the date of such special meeting, then advance notice of such business shall be timely if received by the Company within 10 days following the date of the public announcement of the date of the special meeting.

As part of the advance notice, such stockholder must provide certain information to the Company, including (a) a description of the business to be brought before the meeting, (b) biographical and share ownership information of the stockholder proponent, (c) a description of any material interests of the stockholder proponent in the proposed business and (d) a statement that the stockholder proponent intends to appear in person or by proxy at the annual or special meeting to bring such business before such meeting.

If the business relates to stockholder nominations of directors, as part of the advance notice such stockholder must provide certain information to the Company, including (a) certain biographical information concerning the stockholder proponent, (b) a statement that the stockholder proponent intends to appear in person or by proxy at the annual or special meeting to nominate each person specified in the notice, (c) a description of all arrangements or understandings among the stockholder proponent and another person or entity with respect to the nomination, including the nominee, (d) information regarding each proposed nominee required to be included in the solicitations of proxies for the election of directors or otherwise required by United States federal securities laws and regulations and (e) the consent of the nominee to serve as a director of the Company if elected.

Article III, Section 2 was amended to add the following provision to the end of such Section: No decrease in the number of authorized directors constituting the full Board of Directors shall shorten the term of any incumbent director.

Article III, Section 4 was deleted in its entirety.

Edgar Filing: ENCORE WIRE CORP - Form 10-K

Article VII, Section 1 was amended to clarify that the Company's obligations to indemnify and provide advancement of expenses apply to its directors and officers, and the Company may permissively indemnify and provide advancement of expenses to its employees and agents, in each case, subject to the provisions of Article VII, Section 1.

A copy of the Amended and Restated Bylaws is filed as Exhibit 3.2 to this Annual Report on Form 10-K and is incorporated herein by reference. The description of the Amended and Restated Bylaws in this Item 9B is only a summary and is qualified in its entirety by the terms of the Amended and Restated Bylaws.

On February 29, 2012, the Company entered into a registration rights agreement (the "Registration Rights Agreement") with Capital Southwest Corporation and Capital Southwest Venture Corporation (together "Capital Southwest"), pursuant to which we agreed to register the offer and sale of 4,086,750 shares of common stock held by Capital Southwest on a registration statement on Form S-3. In exchange for registration of the offer and sale of such shares, Capital Southwest agreed to reimburse the Company for all costs, fees and expenses incurred by the Company in connection with such registration, unless the registration statement does not become effective solely due to the actions or omissions of the Company and without fault of Capital Southwest. The disinterested members of the Board of Directors of the Company approved us entering into the Registration Rights Agreement.

Under the terms and conditions of the Registration Rights Agreement, the Company is under no obligation to engage an underwriter to offer or sell the shares of common stock registered under the registration statement or make any public disclosure prior to the date when such information would otherwise be required to be filed with the SEC under the Securities Exchange Act of 1934, as amended.

Table of Contents

The Registration Rights Agreement provides that notwithstanding the registration of the shares held by Capital Southwest, for so long as an employee of Capital Southwest Corporation serves as a member of the Board of Directors of the Company, Capital Southwest will not effect any disposition of the shares registered by the registration statement while Capital Southwest is in possession of material, non-public information concerning the Company or during the period beginning on the last business day of each of the Company's fiscal quarters and ending at 9:00 a.m. Dallas time on the third full business day following the public release of the Company's earnings results for such quarter. In furtherance of these restrictions, the Registration Rights Agreement provides that Capital Southwest must pre-clear any disposition of the shares registered by the registration statement with the Company's Chief Financial Officer at least two business days prior to the proposed disposition for the purpose of ensuring that Capital Southwest is not otherwise in possession of material, non-public information concerning the Company. The Registration Rights Agreement also permits the Company to suspend the use, from time to time, of the prospectus that is part of the registration statement (and therefore suspend sales under the registration statement) in the event of certain corporate events affecting the Company.

A copy of the Registration Rights Agreement is filed as Exhibit 4.2 to this Annual Report on Form 10-K and is incorporated herein by reference. The description of the Registration Rights Agreement in this Item 9B is only a summary and is qualified in its entirety by the terms of the Registration Rights Agreement.

PART III

Item 10. Directors, Executive Officers, and Corporate Governance.

The sections entitled "Election of Directors", "Corporate Governance and Other Board Matters" and "Section 16(a) Beneficial Ownership Reporting Compliance" appearing in the Company's proxy statement for the annual meeting of stockholders to be held on May 1, 2012 setting forth certain information with respect to the directors of the Company, Section 16(a) reporting obligations of directors and officers, the Company's audit committee, the Company's audit committee financial expert and the procedures by which security holders may recommend nominees to the Board of Directors are incorporated herein by reference. Certain information with respect to persons who are or may be deemed to be executive officers of the Company is set forth under the caption "Executive Officers of the Company" in Part I of this report.

In connection with Company's long-standing commitment to conduct its business in compliance with applicable laws and regulations and in accordance with its ethical principles, the Board of Directors has adopted a Code of Business Conduct and Ethics applicable to all employees, officers, directors, and advisors of the Company. The Code of Business Conduct and Ethics of the Company is available under the "Investor Info" section of the Company's website at <http://www.encorewire.com>, and is incorporated herein by reference.

Item 11. Executive Compensation.

The section entitled "Executive Compensation" appearing in the Company's proxy statement for the annual meeting of stockholders to be held on May 1, 2012, sets forth certain information with respect to the compensation of management of the Company and compensation committee interlocks and insider participation and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The section entitled "Security Ownership of Certain Beneficial Owners, Directors and Executive Officers" appearing in the Company's proxy statement for the annual meeting of stockholders to be held on May 1, 2012 sets forth certain information with respect to the ownership of the Company's common stock, and is incorporated herein by reference. Certain information with respect to the Company's equity compensation plans that is required to be set forth in this Item 12 is set forth under the caption "Equity Compensation Plan Information" contained in "Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities" of this Form 10-K and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The sections entitled "Executive Compensation", "Certain Relationships and Related Transactions" and "Corporate Governance and Other Board Matters" "Board Independence" appearing in the Company's proxy statement for the annual meeting of stockholders to be held on May 1, 2012 set forth certain information with respect to certain relationships and related transactions, and director independence, and are incorporated herein by reference.

Table of Contents

Item 14. Principal Accounting Fees and Services.

The Section entitled "Proposal Three - Ratification of Appointment of Independent Registered Public Accounting Firm" appearing in the Company's proxy statement for the annual meeting of stockholders to be held on May 1, 2012, sets forth certain information with respect to certain fees paid to accountants, and is incorporated herein by reference.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

The following documents are filed as a part of this report:

- (1) Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K; and
- (2) Financial statement schedules have been omitted because they are not applicable or the information required therein is included in the financial statements or notes thereto in Item 8 of this Annual Report on Form 10-K.
- (3) The exhibits required by Item 601 of Regulation S-K, as set forth in the Index to Exhibits accompanying this Annual Report on Form 10-K.
