Terreno Realty Corporation

Condensed Notes to Consolidated Financial Statements

(Unaudited)

Note 1. Organization

Terreno Realty Corporation (Terreno), and together with its subsidiaries, the Company) acquires, owns and operates industrial real estate located in six major coastal U.S. markets: Los Angeles; Northern New Jersey/New York City; San Francisco Bay Area; Seattle; Miami; and Washington, D.C./Baltimore. As of September 30, 2012, the Company owned 63 buildings aggregating approximately 4.8 million square feet.

The Company commenced operations upon completion of an initial public offering (IPO) and a concurrent private placement of common stock purchased by the Company s executive management on February 16, 2010. The net proceeds of the IPO and the concurrent private placement were approximately \$169.8 million. Prior to the completion of its IPO, the Company had no assets other than cash. The Company is an internally managed Maryland corporation and elected to be taxed as a real estate investment trust (REIT) under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended (the Code) commencing with its taxable year ended December 31, 2010.

Note 2. Significant Accounting Policies

Basis of Presentation. The accompanying unaudited interim consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and disclosures required by GAAP for annual financial statements. In management s opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The interim consolidated financial statements include all of the Company and its subsidiaries and all intercompany balances and transactions have been eliminated in consolidation. The financial statements should be read in conjunction with the financial statements contained in the Company s 2011 Annual Report on Form 10-K and the notes thereto, which was filed with the Securities and Exchange Commission on February 22, 2012.

Use of Estimates. The preparation of the interim consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Investments in Real Estate. Investments in real estate, including tenant improvements, leasehold improvements and leasing costs, are stated at cost, less accumulated depreciation, unless circumstances indicate that the cost cannot be recovered, in which case, an adjustment to the carrying value of the property is made to reduce it to its estimated fair value. The Company also reviews the impact of above and below market leases, in-place leases and lease origination costs for acquisitions and records an intangible asset or liability accordingly.

Impairment. Carrying values for financial reporting purposes are reviewed for impairment on a property-by-property basis whenever events or changes in circumstances indicate that the carrying value of a property may not be fully recoverable. Examples of such events or changes in circumstances may include classifying an asset to be held for sale, changing the intended hold period or when an asset remains vacant significantly longer than expected. The intended use of an asset either held for sale or held for use can significantly impact how impairment is measured. If an asset is intended to be held for the long-term, the recoverability is based on the undiscounted future cash flows. If the asset carrying value is not supported on an undiscounted future cash flow basis, then the asset carrying value is measured against the lower of cost or the present value of expected cash flows over the expected hold period. An impairment charge to earnings is recognized for the excess of the asset s carrying value over the lower of cost or the present values of expected cash flows over the expected hold period. If an asset is intended to be sold, impairment is determined using the estimated fair value less costs to sell. The

Table of Contents

estimation of expected future net cash flows is inherently uncertain and relies on assumptions, among other things, regarding current and future economic and market conditions and the availability of capital. The Company determines the estimated fair values based on its assumptions regarding rental rates, lease-up and holding periods, as well as sales prices. When available, current market information is used to determine capitalization and rental growth rates. If available, current comparative sales values may also be used to establish fair value. When market information is not readily available, the inputs are based on the Company’s understanding of market conditions and the experience of the Company’s management team. Actual results could differ significantly from the Company’s estimates. The discount rates used in the fair value estimates represent a rate commensurate with the indicated holding period with a premium layered on for risk. There were no impairment charges recorded for the three and nine months ended September 30, 2012 and 2011.

Property Acquisitions. Upon acquisition of a property, which are accounted for as business combinations, the Company estimates the fair value of acquired tangible assets (consisting generally of land, buildings and improvements) and intangible assets and liabilities (consisting generally of the above and below market leases and the origination value of all in-place leases). The Company determines fair values using replacement cost, estimated cash flow projections and other valuation techniques and applying appropriate discount and capitalization rates based on available market information. Mortgage loans assumed in connection with acquisitions are recorded at their fair value using current market interest rates for similar debt at the date of acquisition. Acquisition-related costs associated with business combinations are expensed as incurred.

The fair value of the tangible assets is determined by valuing the property as if it were vacant. Land values are derived from current comparative sales values, when available, or management’s estimates of the fair value based on market conditions and the experience of the Company’s management team. Building and improvement values are calculated as replacement cost less depreciation, or management’s estimates of the fair value of these assets using discounted cash flows analyses or similar methods. The fair value of the above and below market leases is based on the present value of the difference between the contractual amounts to be received pursuant to the acquired leases (using a discount rate that reflects the risks associated with the acquired leases) and the Company’s estimate of the market lease rates measured over a period equal to the remaining term of the leases when there is not a bargain renewal option. The capitalized values of above market leases and below market leases are amortized to rental revenue over the remaining term of the respective leases. The total net impact to rental revenues due to the amortization of above and below market leases was a net decrease of approximately \$103,000 and \$138,000, respectively, for the three months ended September 30, 2012 and 2011, and \$272,000 and \$391,000, respectively, for the nine months ended September 30, 2012 and 2011. The origination value of in-place leases is based on costs to execute similar leases including commissions and other related costs. The origination value of in-place leases also includes real estate taxes, insurance and an estimate of lost rental revenue at market rates during the estimated time required to lease up the property from vacant to the occupancy level at the date of acquisition. As of September 30, 2012, the Company had attributed approximately \$3.1 million, \$2.2 million, and \$19.8 million to above market leases, below market leases and in-place leases, respectively. As of December 31, 2011, the Company had attributed approximately \$2.3 million, \$1.2 million, and \$12.5 million to above market leases, below market leases and in-place leases, respectively. These amounts are included in intangible assets and liabilities in the accompanying consolidated balance sheets. As of September 30, 2012, the Company had recorded net accumulated amortization of approximately \$7.7 million and \$0.5 million, respectively, related to these intangible assets and liabilities. As of December 31, 2011, the Company had recorded net accumulated amortization of approximately \$4.5 million and \$0.3 million, respectively, related to these intangible assets and liabilities. As of September 30, 2012, the remaining weighted average lease term related to these intangible assets and liabilities is 4.8 years.

Depreciation and Useful Lives of Real Estate and Intangible Assets. Depreciation and amortization are computed on a straight-line basis over the estimated useful lives of the related assets or liabilities. The following table reflects the standard depreciable lives typically used to compute depreciation and amortization. However, such depreciable lives may be different based on the estimated useful life of such assets or liabilities.

Description	Standard Depreciable Life
Land	Not depreciated
Building	40 years
Building Improvements	5-40 years
Tenant Improvements	Shorter of lease term or useful life
Leasing Costs	Lease term
In-place leases	Lease term
Above/Below Market Leases	Lease term

Table of Contents

Cash and Cash Equivalents. Cash and cash equivalents is comprised of cash held in a major banking institution and other highly liquid short-term investments with original maturities of three months or less. Cash equivalents are generally invested in U.S. government securities, government agency securities or money market accounts.

Restricted Cash. Restricted cash includes cash held in escrow in connection with property acquisitions and reserves for certain capital improvements, leasing, interest and real estate tax and insurance payments as required by certain mortgage loan obligations.

Revenue Recognition. The Company records rental revenue from operating leases on a straight-line basis over the term of the leases and maintains an allowance for estimated losses that may result from the inability of its tenants to make required payments. If tenants fail to make contractual lease payments that are greater than the Company's allowance for doubtful accounts, security deposits and letters of credit, then the Company may have to recognize additional doubtful account charges in future periods. The Company monitors the liquidity and creditworthiness of its tenants on an on-going basis by reviewing their financial condition periodically as appropriate. Each period the Company reviews its outstanding accounts receivable, including straight-line rents, for doubtful accounts and provides allowances as needed. The Company also records lease termination fees when a tenant has executed a definitive termination agreement with the Company and the payment of the termination fee is not subject to any conditions that must be met or waived before the fee is due to the Company. If a tenant remains in the leased space following the execution of a definitive termination agreement, the applicable termination will be deferred and recognized over the term of such tenant's occupancy.

Tenant expense reimbursement income includes payments and amounts due from tenants pursuant to their leases for real estate taxes, insurance and other recoverable property operating expenses and is recognized as revenues during the same period the related expenses are incurred.

Deferred Financing Costs. Costs incurred in connection with financings are capitalized and amortized to interest expense using the effective interest method over the term of the related loan. As of September 30, 2012 and December 31, 2011, deferred financing cost accumulated amortization was approximately \$1.1 million and \$0.5 million, respectively.

Mortgage Premiums. Mortgage premiums represent the excess of the fair value of debt assumed over the principal value of debt assumed in connection with property acquisitions. The mortgage premiums are being amortized to interest expense over the term of the related debt instrument using the effective interest method. As of September 30, 2012 and December 31, 2011, the net unamortized mortgage premiums were approximately \$0.8 million and \$0.6 million, respectively, and were included as a component of mortgage loans payable on the accompanying consolidated balance sheets.

Income Taxes. The Company elected to be taxed as a REIT under the Code and operates as such beginning with its taxable year ended December 31, 2010. To qualify as a REIT, the Company must meet certain organizational and operational requirements, including a requirement to distribute at least 90% of its annual REIT taxable income to its stockholders (which is computed without regard to the dividends paid deduction or net capital gain and which does not necessarily equal net income as calculated in accordance with GAAP). As a REIT, the Company generally will not be subject to federal income tax to the extent it distributes qualifying dividends to its stockholders. If it fails to qualify as a REIT in any taxable year, it will be subject to federal income tax on its taxable income at regular corporate income tax rates and generally will not be permitted to qualify for treatment as a REIT for federal income tax purposes for the four taxable years following the year during which qualification is lost unless the IRS grants it relief under certain statutory provisions. Such an event could materially adversely affect the Company's net income and net cash available for distribution to stockholders. However, the Company believes it is organized and operates in such a manner as to qualify for treatment as a REIT.

ASC 740-10, *Income Taxes*, provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. ASC 740-10 requires the evaluation of tax positions taken in the course of preparing the Company's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authority. Tax benefits of positions not deemed to meet the more-likely-than-not threshold are recorded as a tax expense in the current year. As of September 30, 2012, the Company did not have any unrecognized tax benefits and does not believe that there will be any material changes in unrecognized tax positions over the next 12 months. The Company's tax returns are subject to examination by federal, state and local tax jurisdictions beginning with the 2010 calendar year.

Stock-Based Compensation and Other Long-Term Incentive Compensation. The Company follows the provisions of ASC 718, *Compensation-Stock Compensation*, to account for its stock-based compensation plan, which requires that the

Table of Contents

compensation cost relating to stock-based payment transactions be recognized in the financial statements and that the cost be measured on the fair value of the equity or liability instruments issued. The Company has adopted the 2010 Equity Plan, which provides for the grant of restricted stock awards, performance share awards, unrestricted shares or any combination of the foregoing. Stock-based compensation is recognized as a general and administrative expense in the accompanying consolidated statements of operations and measured at the fair value of the award on the date of grant. The Company estimates the forfeiture rate based on historical experience as well as expected behavior. The amount of the expense may be subject to adjustment in future periods depending on the specific characteristics of the stock-based award.

In addition, the Company has awarded long-term incentive target awards (the LTIP awards) to its executives that may be payable in shares of the Company's common stock after the conclusion of each pre-established performance measurement period. The amount that may be earned under the LTIP awards is variable depending on the relative total shareholder return of the Company's common stock as compared to the total shareholder return of the MSCI U.S. REIT Index and the FTSE NAREIT Equity Industrial Index over the pre-established performance measurement period. The Company estimates the fair value of the LTIP awards using a Monte Carlo simulation model on the date of grant and at each reporting period. The LTIP awards are recognized as compensation expense over the requisite performance period based on the fair value of the LTIP awards at the balance sheet date.

Fair Value of Financial Instruments. ASC 820, *Fair Value Measurements and Disclosures*, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also provides guidance for using fair value to measure financial assets and liabilities. ASC 820 requires disclosure of the level within the fair value hierarchy in which the fair value measurements fall, including measurements using quoted prices in active markets for identical assets or liabilities (Level 1), quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active (Level 2), and significant valuation assumptions that are not readily observable in the market (Level 3).

As of September 30, 2012 and December 31, 2011, the fair values of cash and cash equivalents and accounts payable approximated their carrying values because of the short-term nature of these investments or liabilities based on Level 1 inputs. As of September 30, 2012 and December 31, 2011, based on borrowing rates available to the Company, which are Level 2 inputs, the estimated fair values of the mortgage and term loans payable were approximately \$108.7 million and \$59.2 million, respectively.

New Accounting Standards. Effective January 1, 2012, the Company adopted Accounting Standards Update No. 2011-05, *Presentation of Comprehensive Income*, which eliminates the option to report other comprehensive income and its components in the statement of changes in stockholders' equity. The adoption of this standard did not have any impact on the Company's financial statements.

Segment Disclosure. ASC 280, *Segment Reporting*, establishes standards for reporting financial and descriptive information about an enterprise's reportable segment. The Company has determined that it has one reportable segment, with activities related to investing in real estate. The Company's investments in real estate are geographically diversified and the chief operating decision makers evaluate operating performance on an individual asset level. As each of the Company's assets has similar economic characteristics, the assets have been aggregated into one reportable segment.

Note 3. Concentration of Credit Risk.

Financial instruments that potentially subject the Company to a significant concentration of credit risk consist primarily of cash and cash equivalents. The Company may maintain deposits in federally insured financial institutions in excess of federally insured limits. However, the Company's management believes the Company is not exposed to significant credit risk due to the financial position of the depository institutions in which those deposits are held.

As of September 30, 2012, the Company owned six properties located in Northern New Jersey/New York City, which accounted for approximately 31.7% of its annualized base rent, which is based on contractual base rent from leases in effect as of September 30, 2012, excluding any partial or full rent abatements.

Other real estate companies compete with the Company in its real estate markets. This results in competition for tenants to occupy space. The existence of competing properties could have a material impact on the Company's ability to lease space and on the level of rent that can be achieved. The Company had ten tenants that accounted for approximately 50.5% of the rental revenues for the nine months ended September 30, 2012.

Table of Contents**Note 4. Investments in Real Estate.**

During the three months ended September 30, 2012, the Company acquired nine industrial buildings containing 577,261 square feet. The total aggregate initial investment was approximately \$75.6 million, of which \$35.8 million was recorded to land, \$34.6 million to buildings and improvements, \$5.2 million to intangible assets and \$1.2 million to intangible liabilities.

The Company recorded revenues and net income for the three months ended September 30, 2012 of approximately \$1.2 million and \$0.6 million, respectively, related to the above acquisitions.

During the nine months ended September 30, 2012, the Company acquired 16 industrial buildings containing 1,353,159 square feet. The total aggregate initial investment was approximately \$150.4 million, of which \$73.0 million was recorded to land, \$68.9 million to buildings and improvements, \$8.5 million to intangible assets and \$1.4 million to intangible liabilities.

The Company recorded revenues and net income for the nine months ended September 30, 2012 of approximately \$3.1 million and \$1.3 million, respectively, related to the above acquisitions.

During the three months ended September 30, 2011, the Company acquired two industrial buildings containing 112,808 square feet. The total aggregate initial investment was approximately \$16.9 million, of which \$8.8 million was recorded to land, \$6.8 million to buildings and improvements and \$1.3 million to intangible assets.

During the nine months ended September 30, 2011, the Company acquired eight industrial buildings containing 647,886 square feet. The total aggregate initial investment was approximately \$78.6 million, of which \$39.6 million was recorded to land, \$34.9 million to buildings and improvements and \$4.1 million to intangible assets.

The above assets and liabilities were recorded at fair value, which uses Level 3 inputs. The properties were acquired from unrelated third parties using existing cash on hand, net of assumed mortgage loans payable and borrowings on the Company's credit facility and were accounted for as business combinations.

Pro Forma Financial Information:

The following supplementary pro forma financial information presents the results of operations of the Company for the three and nine months ended September 30, 2012 and 2011 as if all of the Company's acquisitions during the three and nine months ended 2012 occurred on January 1, 2011. The following pro forma results for the three and nine months ended September 30, 2012 and 2011 have been presented for comparative purposes only and are not necessarily indicative of the results of operations that would have actually occurred had all transactions taken place on January 1, 2011, or of future results of operations (dollars in thousands, except per share data).

Note 5. Properties Held for Sale/Discontinued Operations.

The Company considers a property to be held for sale when it meets the criteria established under ASC 360, *Property, Plant, and Equipment*. Properties held for sale are reported at the lower of the carrying amount or fair value less estimated costs to sell and are not depreciated while they are held for sale. As of September 30, 2012, the Company has entered into an agreement with a third-party purchaser to sell one property located in the Los Angeles market for a sales price of approximately \$17.2 million (net book value of approximately \$11.8 million). The sale of the property is subject to the purchaser's completion of satisfactory due diligence and various closing conditions.

Edgar Filing: Terreno Realty Corp - Form 10-Q

The Company separately reports as discontinued operations the historical operating results attributable to properties sold or held for sale and the applicable gain or loss on the disposition of the properties. Although this application may affect the presentation of the Company's results of operations for the periods that it has already reported, there will be no effect on its previously reported consolidated financial position, net income (loss) or cash flows.

Note 6. Debt.

The Company has a \$100.0 million revolving credit facility. On June 15, 2012, the Company entered into a Third Amendment to its Amended and Restated Senior Revolving Credit Agreement (the Facility) with KeyBank National Association, as administrative agent and as a lender, and PNC Bank, National Association, and Union Bank, N.A., as lenders, to increase the Facility from \$80.0 million to \$100.0 million by exercising the accordion feature under the Facility. The amount available under the Facility may be increased up to \$150.0 million, subject to the approval of the administrative agent and the identification of lenders willing to make available additional amounts. The maturity date of the Facility is January 19, 2015, with one 12-month extension option exercisable by the Company, subject to, among other things, there being an absence of an event of default under the Facility and to the payment of an extension fee. The Facility provides that outstanding borrowings are limited to the lesser of \$100.0 million and 60.0% of the value of the borrowing base properties. The Facility is secured by a pledge of the equity interests in the subsidiaries that hold each of the borrowing base properties. Interest on the Facility is generally to be paid based upon, at the Company's option, either (i) LIBOR plus the applicable LIBOR margin or (ii) the applicable base rate which is the greater of the administrative agent's prime rate plus 1.00%, 0.50% above the federal funds effective rate, or thirty-day LIBOR plus the applicable LIBOR margin for LIBOR rate loans under the Facility. The applicable LIBOR margin will range from 2.50% to 3.50%, depending on the ratio of the Company's outstanding consolidated indebtedness to the value of the Company's consolidated gross asset value. As of September 30, 2012, the applicable LIBOR margin was 2.50%. The Facility requires quarterly payments of an annual unused facility fee in an amount equal to 0.25% or 0.35% depending on the unused portion of the Facility. The unused facility fee was \$52,000 and \$84,000, respectively, for the three months ended September 30, 2012 and 2011 and \$175,000 and \$285,000, respectively, for the nine months ended September 30, 2012 and 2011. The Company guarantees the obligations of the borrower (a wholly-owned subsidiary) under the Facility. The Facility includes a series of financial and other covenants that the Company must comply with in order to borrow under the Facility. As of September 30, 2012, there were \$51.4 million of borrowings outstanding under the Facility and 13 properties were in the borrowing base. As of December 31, 2011, there were \$41.0 million of borrowings outstanding under the Facility. The Company was in compliance with the financial covenants under the Facility at September 30, 2012 and December 31, 2011.

In August 2012, the Company repaid its \$10.1 million senior secured term loan that was scheduled to mature on February 22, 2013 (the Term Loan) with proceeds from the Facility. As of December 31, 2011, the outstanding balance of the Term Loan was approximately \$20.1 million.

During the three months ended September 30, 2012, the Company assumed two mortgage loans totaling approximately \$9.8 million that bear interest at a weighted average fixed rate of 5.85%. Each of the mortgage loans payable is secured by separate property and requires monthly interest and principal payments until maturity and is generally non-recourse. The mortgage loans mature in 2014.

On January 30, 2012 the Company entered into a \$20.1 million non-recourse mortgage loan at a fixed annual interest rate of 3.79% that matures on February 5, 2019. The mortgage loan is secured by five of the Company's properties. A portion of the loan proceeds was used to pay down the Term Loan. The remaining loan proceeds were used to invest in industrial properties and for general business purposes.

On June 26, 2012 the Company entered into a \$39.8 million non-recourse mortgage loan at a fixed annual interest rate of 3.65% that matures on March 5, 2020. The mortgage loan is secured by three of the Company's properties. A portion of the loan proceeds was used to pay down the Facility. The remaining loan proceeds were used to invest in industrial properties and for general business purposes.

The mortgage loans payable are collateralized by certain of the properties and require monthly interest and principal payments until maturity and are generally non-recourse. The mortgage loans mature between 2014 and 2021. As of September 30, 2012, the Company had eight mortgage

Edgar Filing: Terreno Realty Corp - Form 10-Q

loans payable totaling approximately \$106.9 million, which bear interest at a weighted average fixed annual rate of 4.5%. As of December 31, 2011 the Company had four mortgage loans payable totaling approximately \$38.3 million, which bore interest at a weighted average fixed annual interest rate of 5.4%. As of September 30, 2012 and December 31, 2011, the total net investment book value of the properties securing the debt was \$211.4 million and \$84.2 million, respectively.

Note 7. Stockholders' Equity.

The Company's authorized capital stock consists of 400,000,000 shares of common stock, \$0.01 par value per share, and 100,000,000 shares of preferred stock, \$0.01 par value per share. On January 13, 2012, the Company completed a public follow-on offering of 4,000,000 shares of its common stock at a price per share of \$14.25 including 93,000 shares that were sold in the offering to the Company's executive and senior officers and members of the board of directors. No underwriting discount or commission was paid on the shares sold to such officers and directors. On February 13, 2012, the Company sold an additional 61,853 shares of its common stock at a price per share of \$14.25 upon the exercise by the underwriters of their option to purchase additional shares. The net proceeds of the primary follow-on offering were approximately \$54.7 million after deducting the full underwriting discount and offering costs of approximately \$3.1 million. The Company used approximately \$41.0 million of the net proceeds to repay outstanding borrowings under the Facility on January 13, 2012 and the remaining net proceeds were used to invest in industrial properties and for general business purposes. As of September 30, 2012, 13,434,889 shares of common stock were issued and outstanding, including 149,995 non-vested restricted stock awards.

In connection with the annual meeting of stockholders on May 4, 2012, the Company granted a total of 21,416 shares of unrestricted common stock to its independent directors under the Company's 2010 Equity Incentive Plan with a grant date fair value per share of \$14.01. The grant date fair value of the unrestricted common stock was determined using the closing price of the Company's common stock on the date of the grant. The Company recognized approximately \$0.3 million in compensation costs for the nine months ended September 30, 2012 related to this issuance.

On July 19, 2012, the Company completed a public offering of 1,840,000 shares of its 7.75% Series A Cumulative Redeemable Preferred Stock (the Series A Preferred Stock), including 240,000 shares sold upon the exercise by the underwriters of their option to purchase additional shares, at a price per share of \$25.00. The net proceeds of the offering were approximately \$44.3 million after deducting the underwriting discount of approximately \$1.4 million and other offering expenses of approximately \$0.3 million. The Company used the net proceeds to reduce outstanding borrowings under the Facility. Dividends on the Series A Preferred Stock are payable when, as and if authorized by the Company's board of directors quarterly in arrears on or about the last day of March, June, September and December of each year. The Series A Preferred Stock ranks, with respect to dividend rights and rights upon the Company's liquidation, dissolution or winding up, senior to the Company's common stock.

Generally, the Company may not redeem the Series A Preferred Stock prior to July 19, 2017, except in limited circumstances relating to the Company's ability to qualify as a REIT, and pursuant to a special optional redemption related to a specified change of control (as defined in the articles supplementary for the Series A Preferred Stock). On or after July 19, 2017, the Company may, at its option, redeem the Series A Preferred Stock, in whole or in part, at any time or from time to time, for cash at a redemption price of \$25.00 per share, plus any accrued and unpaid dividends (whether or not authorized or declared) up to but excluding the redemption date.

As of September 30, 2012, there were 455,000 shares of common stock authorized for issuance as restricted stock grants, unrestricted stock awards or LTIP awards under the Company's 2010 Equity Incentive Plan, of which 186,810 were remaining. The grant date fair value per share

Edgar Filing: Terreno Realty Corp - Form 10-Q

of restricted stock awards issued during the period from February 16, 2010 (commencement of operations) to September 30, 2012 ranged from \$14.20 to \$20.00. The grant date fair value of the restricted stock was determined using the initial public offering price of \$20.00 for grants issued on February 16, 2010 (commencement of operations) and for all grants issued after the commencement of operations, the Company uses the closing price of the Company's common stock on the date of grant. The fair value of the restricted stock that was granted during the nine months ended September 30, 2012 was \$0.7 million and the vesting period for the restricted stock is five years. As of September 30, 2012, the Company had approximately \$2.2 million of total unrecognized compensation costs related to restricted stock issuances, which is expected to be recognized over a remaining weighted average period of approximately 3.1 years. The Company recognized compensation costs of approximately \$0.2 million for both the three months ended September 30, 2012 and 2011 and approximately \$0.6 million and \$0.4 million, respectively, for the nine months ended September 30, 2012 and 2011 related to the restricted stock issuances. The following is a summary of the total restricted shares granted to the Company's executive officers and employees with the related weighted average grant date fair value share prices for the nine months ended September 30, 2012.

Table of Contents**Restricted Stock Activity:**

	Shares	Weighted Average Grant Date Fair Value
Non-vested shares outstanding at beginning of period	133,526	\$ 19.54

Total Non-vested Shares	149,995

Long-Term Incentive Plan:

As of September 30, 2012, there are three open performance measurement periods for the LTIP awards: February 16, 2010 to December 31, 2012, January 1, 2011 to December 31, 2013, and January 1, 2012 to December 31, 2014. The LTIP awards related to the performance measurement period from February 16, 2010 to December 31, 2011 resulted in no compensation expense as the compensation committee determined that the Company's total shareholder return did not exceed the applicable metrics during the performance measurement period. The Company recorded compensation costs of approximately \$121,000 and \$22,000, respectively, for the three months ended September 30, 2012 and 2011 and approximately \$162,000 and \$189,000, respectively, for the nine months ended September 30, 2012 and 2011.

Dividends:

The following table sets forth the cash dividends paid or payable per share during the nine months ended September 30, 2012:

Note 8. Net Income (Loss) Per Share.

Pursuant to ASC 260-10-45, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*, unvested share-based payment awards that contain non-forfeitable rights to dividends are participating securities and are included in the computation of earnings per share pursuant to the two-class method. The two-class method of computing earnings per share allocates earnings per share for common stock and any participating securities according to dividends declared (whether paid or unpaid) and participation rights in

Edgar Filing: Terreno Realty Corp - Form 10-Q

undistributed earnings. Under the two-class method, earnings per common share are computed by dividing the sum of distributed earnings to common stockholders and undistributed earnings allocated to common stockholders by the weighted average number of common shares outstanding for the period. The Company's non-vested shares of restricted stock are considered participating securities since these share-based awards contain non-forfeitable rights to dividends irrespective of whether the awards ultimately vest or expire. The Company had no dilutive restricted stock awards outstanding for the three and nine months ended September 30, 2012 and 2011.

Contractual Commitments. As of November 7, 2012, the Company had one outstanding contract with a third-party seller to acquire one industrial property consisting of 110,049 square feet. There is no assurance that the Company will acquire the property under contract because the proposed acquisition is subject to the completion of satisfactory due diligence, various closing conditions and the consent of the mortgage lender. The following table summarizes certain information with respect to the property the Company has under contract:

Market	Number of Buildings	Square Feet	Purchase Price (in thousands)	Assumed Debt (in thousands)
Los Angeles			\$	\$
Miami				
Northern New Jersey/New York City				
San Francisco Bay Area				
Seattle	1	110,049	8,000	5,100
Washington, D.C./Baltimore				
Total	1	110,049	\$ 8,000	\$ 5,100

As of September 30, 2012, the Company has entered into an agreement with a third-party purchaser to sell one property located in the Los Angeles market for a sales price of approximately \$17.2 million. There is no assurance that the Company will complete the sale of the property under contract because the proposed sale is subject to the purchaser's completion of satisfactory due diligence and various closing conditions.

Note 10. Subsequent Events

On October 15, 2012, the Company acquired one industrial building containing 84,961 square feet located in Laurel, MD for a total purchase price of approximately \$7.0 million. The property was acquired from an unrelated third party using existing cash on hand and borrowings under the Facility.

On November 6, 2012, the Company's board of directors declared a cash dividend in the amount of \$0.12 per share of its common stock payable on January 14, 2013 to the stockholders of record as of the close of business on December 31, 2012.

On November 6, 2012, the Company's board of directors declared a dividend in the amount of \$0.484375 per share of its Series A Preferred Stock payable on December 31, 2012 to the preferred stockholders of record as of the close of business on December 10, 2012.

Overview

Terreno Realty Corporation (Terreno , and together with its subsidiaries, we , us , our , our Company , or the Company) acquires, owns and operates industrial real estate located in six major coastal U.S. markets: Los Angeles; Northern New Jersey/New York City; San Francisco Bay Area; Seattle; Miami; and Washington, D.C./Baltimore. We invest in several types of industrial real estate, including warehouse/distribution, flex (including light industrial and research and development, or R&D) and trans-shipment. We target functional buildings in infill locations that may be shared by multiple tenants and that cater to customer demand within the various submarkets in which we operate. Infill locations are geographic locations surrounded by high concentrations of already developed land and existing buildings. As of September 30, 2012, we owned a total of 63 buildings aggregating approximately 4.8 million square feet, which we purchased for an aggregate purchase price of approximately \$402.0 million, including the assumption of mortgage loans payable of approximately \$49.3 million, which includes mortgage premiums of approximately \$1.1 million. As of September 30, 2012, our properties were approximately 92.6% leased to 97 tenants, the largest of which accounted for approximately 8.1% of our total annualized based rent. We are an internally managed Maryland corporation and elected to be taxed as a REIT under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended, or the Code, commencing with our taxable year ending December 31, 2010.

The following table summarizes by market our investments in real estate, including properties held for sale, as of September 30, 2012:

Table of Contents**Recent Developments****Acquisition Activity**

During the three months ended September 30, 2012, we acquired nine industrial buildings containing 577,261 square feet for a total purchase price of approximately \$74.4 million. The properties were acquired from unrelated third parties using existing cash on hand, net of assumed mortgage loans payable of approximately \$9.8 million and borrowings under our credit facility. The following table sets forth the wholly-owned industrial properties we acquired during the three months ended September 30, 2012:

Preferred Stock Offering

On July 19, 2012, we completed a public offering of 1,840,000 shares of our 7.75% Series A Cumulative Redeemable Preferred Stock (the Series A Preferred Stock), including 240,000 shares sold upon the exercise by the underwriters of their option to purchase additional shares, at a price per share of \$25.00. The net proceeds of the offering were approximately \$44.3 million after deducting the underwriting discount and other offering expenses of approximately \$1.7 million. We used the net proceeds to reduce outstanding borrowings under our credit facility. Dividends on the Series A Preferred Stock are payable when, as and if authorized by our board of directors quarterly in arrears on or about the last day of March, June, September and December of each year. The Series A Preferred Stock ranks, with respect to dividend rights and rights upon our liquidation, dissolution or winding-up, senior to our common stock.

Generally, we may not redeem the Series A Preferred Stock prior to July 19, 2017, except in limited circumstances relating to our ability to qualify as a REIT, and pursuant to a special optional redemption related to a specified change of control (as defined in the articles supplementary for the Series A Preferred Stock). On and after July 19, 2017, we may, at our option, redeem the Series A Preferred Stock, in whole or in part, at any time or from time to time, for cash at a redemption price of \$25.00 per share, plus any accrued and unpaid dividends (whether or not authorized or declared) up to but excluding the redemption date.

Distribution Activity

On November 6, 2012, our board of directors declared a cash dividend in the amount of \$0.12 per share of our common stock payable on January 14, 2013 to the stockholders of record as of the close of business on December 31, 2012.

On November 6, 2012, our board of directors declared a dividend in the amount of \$0.484375 per share of our Series A Preferred Stock payable on December 31, 2012 to the preferred stockholders of record as of the close of business on December 10, 2012.

Contractual Commitments

As of November 7, 2012, we had one outstanding contract with a third-party seller to acquire one industrial property and one outstanding contract with a third-party purchaser to sell one property as described under the heading "Contractual Obligations" in this Quarterly Report on Form 10-Q. There is no assurance that we will acquire or sell the properties under contract because the proposed acquisition and disposition are subject to the completion of satisfactory due diligence, various closing conditions and, with respect to the acquisition, the consent of the mortgage lender.

Financial Condition and Results of Operations

We derive substantially all of our revenues from rents received from tenants under existing leases on each of our properties. These revenues include fixed base rents and recoveries of certain property operating expenses that we have incurred and that we pass through to the individual tenants.

Table of Contents

Our primary cash expenses consist of our property operating expenses, which include: real estate taxes, repairs and maintenance, management expenses, insurance, utilities, general and administrative expenses, which include compensation costs, office expenses, professional fees and other administrative expenses, acquisition costs, which include third-party costs paid to brokers and consultants, and interest expense, primarily on mortgage loans and our credit facility.

Our consolidated results of operations often are not comparable from period to period due to the impact of property acquisitions at various times during the course of such periods. The results of operations of any acquired property are included in our financial statements as of the date of its acquisition.

The analysis of our results below includes the changes attributable to same store properties. The same store pool includes all properties that were owned and in operations as of September 30, 2012 and since January 1, 2011 and excludes properties that were either disposed of or held for sale to a third party. As of September 30, 2012, the same store pool consisted of 11 properties aggregating approximately 2.2 million square feet. As of September 30, 2012, the non-same store properties, which we acquired or disposed of during the course of 2011 and 2012, consisted of 22 properties aggregating approximately 2.6 million square feet.

Our future financial condition and results of operations, including rental revenues, straight-line rents and amortization of lease intangibles, may be impacted by the acquisitions of additional properties, and expenses may vary materially from historical results.

Revenues. Total revenues increased approximately \$4.7 million for the three months ended September 30, 2012 compared to the same period from the prior year. Approximately \$0.9 million of this increase is from same store revenues mainly due to increased occupancy, as same store consolidated occupancy at quarter end increased to 92.8% in the third quarter of 2012 as compared to 68.4% from the same period in 2011. The remaining increase in total revenues is due to property acquisitions during 2011 and 2012. For the quarter ended September 30, 2012, approximately \$0.7 million was recorded in straight-line rental revenues related to contractual rent abatements given to certain tenants.

Property operating expenses. Total property operating expenses increased approximately \$0.8 million during the three months ended September 30, 2012 compared to the same period from the prior year. The increase in total property operating expenses was due to an increase of approximately \$1.0 million attributable to property acquisitions during 2011 and 2012, which was partially offset by a decrease in same store property operating expenses of approximately \$0.2 million.

Depreciation and amortization. Depreciation and amortization increased approximately \$1.2 million during the three months ended September 30, 2012 compared to the same period from the prior year due to property acquisitions during 2011 and 2012.

General and administrative expenses. General and administrative expenses increased approximately \$0.6 million for the three months ended September 30, 2012 compared to the same period from the prior year due primarily to an increase in compensation expense related to the LTIP awards.

Acquisition costs. Acquisition costs increased by approximately \$0.6 million for the three months ended September 30, 2012 from the prior year period due to a higher number of property acquisitions during the three months ended September 30, 2012 as compared to the same period in the prior year.

Interest expense, including amortization. Interest expense increased approximately \$0.8 million for the three months ended September 30, 2012 compared to the same period from the prior year due primarily to the assumption and origination of mortgage loans payable during 2011 and 2012, as well as borrowings under our credit facility.

Revenues. Total revenues increased approximately \$11.8 million for the nine months ended September 30, 2012 compared to the same period from the prior year. Approximately \$2.1 million of this increase is from same store revenues mainly due to increased occupancy, as same store consolidated occupancy at quarter end increased to 92.8% in the third quarter of 2012 as compared to 68.4% from the same period in 2011. The remaining increase in total revenues is due to property acquisitions during 2011 and 2012. For the nine months ended September 30, 2012, approximately \$2.2 million was recorded in straight-line rental revenues related to contractual rent abatements given to certain tenants.

Property operating expenses. Total property operating expenses increased approximately \$1.9 million during the nine months ended September 30, 2012 compared to the same period from the prior year. The increase in total property operating expenses was due to an increase of approximately \$2.3 million attributable to property acquisitions during 2011 and 2012, which was partially offset by a decrease in same store property operating expenses of approximately \$0.4 million. The decrease in same store property operating expenses was primarily due to a decrease in snow removal and security expenses from the prior year period.

Depreciation and amortization. Depreciation and amortization increased approximately \$2.9 million during the nine months ended September 30, 2012 compared to the same period from the prior year due to property acquisitions during 2011 and 2012.

General and administrative expenses. General and administrative expenses increased approximately \$0.8 million for the nine months ended September 30, 2012 compared to the same period from the prior year due primarily to an increase in compensation expense related to restricted stock amortization.

Acquisition costs. Acquisition costs increased by approximately \$0.1 million for the nine months ended September 30, 2012 from the prior year period due to a higher number of property acquisitions during the nine months ended September 30, 2012 as compared to the same period in the prior year.

Interest expense, including amortization. Interest expense increased approximately \$2.1 million for the nine months ended September 30, 2012 compared to the same period from the prior year due primarily to the assumption and origination of mortgage loans payable during 2011 and 2012, as well as borrowings under our credit facility and term loan payable.

Liquidity and Capital Resources

The primary objective of our financing strategy is to maintain financial flexibility with a conservative capital structure using retained cash flows, long-term debt and the issuance of common and perpetual preferred stock to finance our growth. Over the long-term, we intend to:

limit the sum of the outstanding principal amount of our consolidated indebtedness and the liquidation preference of any outstanding perpetual preferred stock to less than 40% of our total enterprise value;

maintain a fixed charge coverage ratio in excess of 2.0x;

limit the principal amount of our outstanding floating rate debt to less than 20% of our total consolidated indebtedness; and

have staggered debt maturities that are aligned to our expected average lease term (5-7 years), positioning us to re-price parts of our capital structure as our rental rates change with market conditions.

We intend to preserve a flexible capital structure with a long-term goal to obtain an investment grade rating and be in a position to issue unsecured debt and additional perpetual preferred stock. Prior to attaining an investment grade rating, we intend to primarily utilize non-recourse debt secured by individual properties or pools of properties with a targeted maximum loan-to-value of 65% at the time of financing, or recourse bank term loans, credit facilities and perpetual preferred stock. We may also assume debt in connection with property acquisitions which may have a higher loan-to-value.

Table of Contents

We expect to meet our short-term liquidity requirements generally through net cash provided by operations, existing cash balances and, if necessary, short-term borrowings under our credit facility. We believe that our net cash provided by operations will be adequate to fund operating requirements, pay interest on any borrowings and fund distributions in accordance with the REIT requirements of the federal income tax laws. In the near-term, we intend to fund future investments in properties with term loans, mortgages, borrowings under our credit facility and perpetual preferred and common stock. We expect to meet our long-term liquidity requirements, including with respect to other investments in industrial properties, property acquisitions and scheduled debt maturities, through borrowings under our credit facility, periodic issuances of common stock, perpetual preferred stock, and long-term secured and unsecured debt, and with proceeds from the disposition of properties. The success of our acquisition strategy may depend, in part, on our ability to obtain and borrow under our credit facility and to access additional capital through issuances of equity and debt securities.

On January 13, 2012, we completed a public follow-on offering of 4,000,000 shares of our common stock at a price per share of \$14.25. On February 13, 2012, we sold an additional 61,853 shares of our common stock at a price per share of \$14.25 upon the exercise by the underwriters of their option to purchase additional shares. The net proceeds of the offering, after deducting the underwriting discount and estimated offering costs, were approximately \$54.7 million. We used approximately \$41.0 million of the net proceeds to repay outstanding borrowings under our credit facility on January 13, 2012 and the remaining net proceeds were used to invest in industrial properties and for general business purposes.

On July 19, 2012, we completed a public offering of 1,840,000 shares of our 7.75% Series A Cumulative Redeemable Preferred Stock (the Series A Preferred Stock), including 240,000 shares sold upon the exercise by the underwriters of their option to purchase additional shares, at a price per share of \$25.00. The net proceeds of the offering were approximately \$44.3 million after deducting the underwriting discount and other offering expenses of approximately \$1.7 million. We used the net proceeds to reduce outstanding borrowings under our credit facility. Dividends on the Series A Preferred Stock are payable when, as and if authorized by our board of directors quarterly in arrears on or about the last day of March, June, September and December of each year. The Series A Preferred Stock ranks, with respect to dividend rights and rights upon our liquidation, dissolution or winding-up, senior to our common stock

Generally, we may not redeem the Series A Preferred Stock prior to July 19, 2017, except in limited circumstances relating to our ability to qualify as a REIT, and pursuant to a special optional redemption related to a specified change of control (as defined in the articles supplementary for the Series A Preferred Stock). On and after July 19, 2017, we may, at our option, redeem the Series A Preferred Stock, in whole or in part, at any time or from time to time, for cash at a redemption price of \$25.00 per share, plus any accrued and unpaid dividends (whether or not authorized or declared) up to but excluding the redemption date.

As of September 30, 2012, we held for sale one property with an aggregate net book value approximately \$11.8 million. The sale of the property is subject to various closing conditions. We separately report as discontinued operations the historical operating results attributable to properties sold or held for sale and the applicable gain or loss on the disposition of the properties. Income from discontinued operations totaled approximately \$0.3 million for both the three months ended September 30, 2012 and 2011 and approximately \$0.9 million and \$0.8 million, respectively, for the nine months ended September 30, 2012 and 2011.

We have a \$100.0 million revolving credit facility (the Facility). On June 15, 2012, we entered into a Third Amendment to our Amended and Restated Senior Revolving Credit Agreement with KeyBank National Association, as administrative agent and as a lender, and PNC Bank, National Association, and Union Bank, N.A., as lenders, to increase the Facility from \$80.0 million to \$100.0 million by exercising the accordion feature under the Facility. The amount available under our Facility may be increased up to \$150.0 million, subject to the approval of the administrative agent and the identification of lenders willing to make available additional amounts. The maturity date of our Facility is January 19, 2015, with one 12-month extension option exercisable by us, subject to, among other things, there being an absence of an event of default under the Facility and to our payment of an extension fee. Interest on our Facility is generally to be paid based upon, at our option, either (i) LIBOR plus the applicable LIBOR margin or (ii) the applicable base rate which is the greater of the administrative agent's prime rate plus 1.00%, 0.50% above the federal funds effective rate, or thirty-day LIBOR plus the applicable LIBOR margin for LIBOR rate loans under the Facility. The applicable LIBOR margin will range from 2.50% to 3.50%, depending on the ratio of our outstanding consolidated indebtedness to the value of our consolidated gross asset value. As of September 30, 2012, the applicable LIBOR margin was 2.50%. The Facility provides that outstanding borrowings are limited to the lesser of \$100.0 million and 60.0% of the value of the borrowing base properties. Our Facility requires payment of an annual unused facility fee in an amount equal to 0.25% or 0.35% depending on the unused portion of our Facility. The unused facility fee was \$52,000 and \$84,000, respectively, for the three months ended September 30, 2012 and 2011 and \$175,000 and \$285,000, respectively, for the nine months ended September 30, 2012 and 2011. Our Facility includes a series of financial and other covenants requiring, among other things, the maintenance of maximum leverage ratios and minimum fixed coverage ratios that we must comply with in order to borrow under the Facility. We guarantee the

Table of Contents

obligations of the borrower (a wholly-owned subsidiary) under our Facility. As of September 30, 2012, there were approximately \$51.4 million of borrowings outstanding and 13 properties were in the borrowing base under our Facility. As of December 31, 2011, there were approximately \$41.0 million of borrowings outstanding under our Facility. We were in compliance with our financial covenants under the Facility at September 30, 2012 and December 31, 2011.

In August 2012, we repaid our \$10.1 million senior secured term loan that was scheduled to mature on February 22, 2013 (the Term Loan) with proceeds from our Facility. As of December 31, 2011, the outstanding balance of the Term Loan was approximately \$20.1 million.

As of September 30, 2012 and December 31, 2011, we had outstanding mortgage loans payable of approximately \$106.9 million and \$38.3 million, respectively, and held cash and cash equivalents totaling approximately \$4.6 million and \$3.2 million, respectively.

Sources and Uses of Cash

Our principal sources of cash are cash from operations, borrowings under mortgage loans payable, draws on our Facility and common and preferred stock issuances. Our principal uses of cash are asset acquisitions, debt service, capital expenditures, operating costs and corporate overhead costs.

Cash From Operating Activities. Net cash provided by operating activities totaled approximately \$7.1 million for the nine months ended September 30, 2012 compared to approximately \$0.5 million for the nine months ended September 30, 2011. This increase in cash provided by operating activities is attributable to increased leasing activities and higher cash flows from property acquisitions during 2011 and 2012.

Cash From Investing Activities. Net cash used in investing activities was \$148.0 million and \$62.5 million, respectively, for the nine months ended September 30, 2012 and 2011, which consists primarily of cash paid for property acquisitions of \$138.9 million and \$57.0 million, respectively, and additions to buildings and improvements of approximately \$8.8 million and \$3.8 million, respectively.

Cash From Financing Activities. Net cash provided by financing activities was \$142.3 million for the nine months ended September 30, 2012, which consists primarily of \$99.0 million in net common and preferred stock issuance proceeds and borrowings on mortgage loans and the Facility of approximately \$193.6 million, less payments on the Facility and Term Loan of approximately \$143.3 million. Net cash provided by financing activities was \$11.4 million for the nine months ended September 30, 2011, which consists primarily of approximately \$27.1 million of borrowings on the Facility and Term Loan, less \$7.0 million in deferred underwriting fee payments, \$6.0 million of payments on the Facility and \$1.9 million in dividend payments.

Critical Accounting Policies

A summary of our critical accounting policies is set forth in our Annual Report on Form 10-K for the year ended December 31, 2011.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Contractual Obligations

As of November 7, 2012, we had one outstanding contract with a third-party seller to acquire one industrial property. There is no assurance that we will acquire the property under contract because the proposed acquisition is subject to the completion of satisfactory due diligence, various closing conditions and the consent of the mortgage lender. The following table summarizes certain information with respect to the property we have under contract:

Market	Number of Buildings	Square Feet	Purchase Price (in thousands)	Assumed Debt (in thousands)
Los Angeles			\$	\$
Miami				
Northern New Jersey/New York City				
San Francisco Bay Area				
Seattle	1	110,049	8,000	5,100
Washington, D.C./Baltimore				
Total	1	110,049	\$ 8,000	\$ 5,100

As of September 30, 2012, we have entered into an agreement with a third-party purchaser to sell one property in our Los Angeles market for a sales price of approximately \$17.2 million. There is no assurance that we will complete the sale of the property under contract because the proposed sale is subject to the purchaser's completion of satisfactory due diligence and various closing conditions.

Non-GAAP Financial Measures

We use the following non-GAAP financial measures that we believe are useful to investors as a key supplemental measure of our operating performance: funds from operations, or FFO, EBITDA, Adjusted EBITDA, net operating income, or NOI, same store NOI and cash-basis same store NOI. FFO, EBITDA, Adjusted EBITDA, NOI, same store NOI and cash-basis same store NOI should not be considered in isolation or as a substitute for measures of performance in accordance with GAAP. Further, our computation of FFO, EBITDA, Adjusted EBITDA, NOI, same store NOI and cash-basis same store NOI may not be comparable to FFO, EBITDA, Adjusted EBITDA, NOI, same store NOI and cash-basis same store NOI reported by other companies.

We compute FFO in accordance with standards established by the National Association of Real Estate Investment Trusts (NAREIT), which defines FFO as net income (loss) (determined in accordance with GAAP), excluding gains (losses) from sales of property and impairment write-downs of depreciable real estate, plus depreciation and amortization on real estate assets and after adjustments for unconsolidated partnerships and joint ventures (which are calculated to reflect FFO on the same basis). We believe that presenting FFO provides useful information to investors regarding our operating performance because it is a measure of our operations without regard to specified non-cash items, such as real estate depreciation and amortization and gain or loss on sale of assets.

We believe that FFO is a meaningful supplemental measure of our operating performance because historical cost accounting for real estate assets in accordance with GAAP implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values have historically risen or fallen with market conditions, many industry investors and analysts have considered the presentation of operating results for real estate companies that use historical cost accounting alone to be insufficient. As a result, we believe that the use of FFO, together with the required GAAP presentations, provide a more complete understanding of our operating performance.

The following table reflects the calculation of FFO reconciled from net and comprehensive loss available to common stockholders for the three and nine months ended September 30, 2012 and 2011 (dollars in thousands except per share data):

	<i>For the Three Months Ended September 30,</i>				<i>For the Nine Months Ended September 30,</i>

¹ To be consistent with the company's policies of determining whether instruments granted in share-based payment transactions are participating securities and accounting for earnings per share, the FFO per common share is adjusted for FFO distributed through declared dividends (if any) and allocated to all participating securities (weighted average common shares outstanding and unvested restricted shares outstanding) under the two-class method. Under this method, allocations were made to 149,995 and 134,958 of weighted average unvested restricted shares outstanding for the three months ended September 30, 2012 and 2011, respectively and to 146,414 and 0 of weighted average unvested restricted shares outstanding for the nine months ended September 30, 2012 and 2011, respectively.

Table of Contents

² Includes expensed acquisition costs of approximately \$0.8 million and \$0.1 million, respectively, for the three months ended September 30, 2012 and 2011 and approximately \$1.8 million and \$1.7 million, respectively, for the nine months ended September 30, 2012 and 2011.

We compute EBITDA as earnings before interest, taxes and depreciation and amortization. We compute Adjusted EBITDA as earnings before interest, taxes, depreciation and amortization, acquisition costs and stock-based compensation. We believe that presenting EBITDA and Adjusted EBITDA provides useful information to investors regarding our operating performance because they are measures of our operations on an unleveraged basis before the effects of tax, non-cash depreciation and amortization expense (and acquisition costs and stock-based compensation with regard to Adjusted EBITDA). By excluding interest expense, EBITDA and Adjusted EBITDA allow investors to measure our operating performance independent of our capital structure and indebtedness and, therefore, allow for more meaningful comparison of our operating performance between quarters as well as annual periods and for the comparison of our operating performance to that of other companies, both in the real estate industry and in other industries. As we are currently in a growth phase, acquisition costs are excluded from Adjusted EBITDA to allow for the comparison of our operating performance to that of stabilized companies.

The following table reflects the calculation of EBITDA and Adjusted EBITDA reconciled from net income (loss) for the three and nine months ended September 30, 2012 and 2011 (dollars in thousands):

	<i>For the Three Months Ended September 30,</i>				<i>For the Nine Months Ended September 30,</i>

We compute NOI as rental revenues, including tenant expense reimbursements, less property operating expenses. We compute same store NOI as rental revenues, including tenant expense reimbursements, less property operating expenses on a same store basis. NOI excludes depreciation, amortization, general and administrative expenses, acquisition costs and interest expense. We compute cash-basis same store NOI as same store NOI excluding straight-line rents and amortization of lease intangibles. The same store pool includes all properties that were owned as of September 30, 2012 and since January 1, 2011 and excludes properties that were either disposed of or held for sale to a third party. As of September 30, 2012, the same store pool consisted of 11 properties aggregating approximately 2.2 million square feet. We believe that presenting NOI, same store NOI and cash-basis same store NOI provides useful information to investors regarding our operating performance of our properties because NOI excludes certain items that are not considered to be controllable in connection with the management of the property, such as depreciation, amortization, general and administrative expenses, acquisition costs and interest expense. By presenting same store NOI and cash-basis same store NOI the operating results on a same store basis are directly comparable from period to period.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

Market risk includes risks that arise from changes in interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market sensitive instruments. In pursuing our business strategies, the primary market risk which we are exposed to is interest rate risk. We are exposed to interest rate changes primarily as a result of debt used to maintain liquidity, fund capital expenditures and expand our investment portfolio and operations. We seek to limit the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. As described below, some of our outstanding debt bears interest at variable rates, and we expect that some of our future outstanding debt will have variable interest rates. We may use interest rate caps to manage our interest rate risks relating to our variable rate debt. We expect to replace variable rate debt on a regular basis with fixed rate, long-term debt to finance our assets and operations.

As of September 30, 2012, we had \$51.4 million of borrowings outstanding under our Facility. Amounts borrowed under our Facility bear interest at a variable rate based on LIBOR plus an applicable LIBOR margin, which interest rate was 2.72% as of September 30, 2012. If the LIBOR rate fluctuates by 0.25%, interest expense would increase or decrease, depending on rate movement, future earnings and cash flows by approximately \$128,573 annually on the total of the outstanding balances on our Facility as of September 30, 2012.

**Item 4. Controls and Procedures
Evaluation of Disclosure Controls and Procedures**

Our management has evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act), and has concluded that as of the end of the period covered by this report, our disclosure controls and procedures were effective to give reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and is accumulated and
