**FORWARD-LOOKING STATEMENTS**

*When used in this Quarterly Report on Form 10-Q, the words may , will , should , expect , believe , anticipate , continue , estimate , project , intend and similar expressions are intended to identify forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act ) regarding events, conditions and financial trends that may affect Milestone s future plans of operations, business strategy, results of operations and financial condition. Milestone wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established in the Private Securities Litigation Reform Act of 1995. Prospective investors are cautioned that any forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties and the actual results may differ materially from those included within the forward-looking statements as a result of various factors. Such forward-looking statements should, therefore, be considered in light of various important factors, including those set forth herein and others set forth from time to time in Milestone s reports and registration statements filed with the Securities and Exchange Commission (the Commission ). Milestone disclaims any intent or obligation to update such forward-looking statements.*

**MILESTONE SCIENTIFIC INC.**

**NOTES TO CONDENSED FINANCIAL STATEMENTS**

**(UNAUDITED)**

**September 30, 2012**

**ORGANIZATION, BUSINESS AND BASIS OF PRESENTATION**

Milestone Scientific Inc. ( Milestone or the Company ) was incorporated in the State of Delaware in August 1989.

The unaudited financial statements of Milestone have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.

These unaudited financial statements should be read in conjunction with the financial statements and notes thereto for the year ended December 31, 2011 included in Milestone s Annual Report on Form 10-K.

In the opinion of Milestone, the accompanying unaudited financial statements contain all adjustments (consisting of normal recurring entries) necessary to fairly present Milestone s financial position as of September 30, 2012 and the results of its operations for the three and nine months ended September 30, 2012 and 2011.

The results reported for the three and nine months ended September 30, 2012 are not necessarily indicative of the results of operations which may be expected for a full year.

Milestone generated a positive cash flows from operating activities for the nine months ended September 30, 2012 of \$52,792 and a negative cash flow from operating activities for the nine months ending September 30, 2011 of \$301,735, respectively. At September 30, 2012, Milestone had cash and cash equivalents of \$273,526 and a negative working capital of \$690,508. Milestone borrowed \$450,000 in 2008 from a shareholder, with a due date of January 2009. This borrowing was refinanced at December 31, 2008 and June 3, 2011 and refinanced again in May 2012 the due date was extended to January 3, 2014. Milestone is actively pursuing the generation of positive cash flows from operating activities through an increase in revenue based upon management s assessment of present contracts and current negotiations and reductions in operating expenses. As of September 30, 2012, Milestone does not expect to have sufficient cash reserves to meet all of its anticipated obligations for the next twelve months. Milestone may require the need for a higher level of marketing and sales efforts that at present it cannot fund. If Milestone is unable to generate positive cash flows from its operating activities it will need to raise additional capital. There is no assurance that Milestone will be able to achieve positive operating cash flows or that traditional capital can be raised on terms and conditions satisfactory to Milestone, if at all. If positive cash flow cannot be achieved or if additional capital is required and it cannot be raised, then Milestone would be forced to curtail its development activities, reduce marketing expenses for existing dental products or adopt other cost saving measures, any of which might negatively affect Milestone s operating results.

Milestone s recurring losses raise substantial doubt about its ability to continue as a going concern. The accompanying financial statements do not include any adjustments that might result from the outcome of this uncertainty.

**NOTE 1 SUMMARY OF ACCOUNTING POLICIES**

**Recent Accounting Pronouncements**

In 2012 we adopted the amended provisions of the *Fair Value Measurement* topic of the FASB Codification. This amendment provides a consistent definition of fair value and ensures that the fair value measurement and disclosure requirements are similar between GAAP and International Financial Reporting Standards ( IFRS ). This topic changes

**Table of Contents**

certain fair value measurement principles and enhances the disclosure requirements, particularly for Level 3 fair value measurements. The changes in principles and enhanced disclosures, where material, are included in Note 2 to the Consolidated Financial Statements.

In July 2012, the Financial Accounting Standards Board ( FASB ) issued an amendment to Topic 350-Intangibles- Goodwill and Other. This amendment is intended to simplify how entities test indefinite lived assets for impairment. The amendment permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step quantitative impairment test described in Topic 350. No further testing is required if the qualitative factors indicate that it is not more likely than not that the indefinite-lived intangible asset is impaired. This amendment is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. The Company does not expect this amendment to have any significant impact on the current year.

**NOTE 2 BASIC AND DILUTED NET INCOME (LOSS) PER COMMON SHARE**

Milestone presents basic and fully diluted earnings (loss) per common share applicable to common stockholders, and, if applicable, diluted earnings (loss) per common share applicable to common stockholders pursuant to the provisions of FASB ASC Topic 260. Basic earnings (loss) per common share is calculated by dividing net income or loss applicable to common stockholders by the weighted average number of common shares outstanding and to be issued during each period. The calculation of diluted earnings per common share is similar to that of basic earnings per common share, except that the denominator is increased to include the number of additional common shares that would have been outstanding if all potentially dilutive common shares, such as those issuable upon the exercise of stock options and warrants were issued during the period.

Since Milestone had a net loss for the nine months ended September 30, 2012 and a net loss in 2011, the assumed effects of the exercise of outstanding stock options and warrants, and the conversion of convertible debt were not included in the calculation as their effect would have been anti-dilutive. Such outstanding options and warrants totaled 1,445,614 and 1,330,503 at September 30, 2012 and 2011, respectively. For the three months ended September 30, 2012, 125,014 options were considered dilutive.

**NOTE 3 ACCOUNTS RECEIVABLE CURRENT AND LONG TERM**

Milestone sells a significant amount of its product on credit terms to its major distributors. Milestone estimates losses from the inability of its customers to make payments on amounts billed. A majority of credit sales are due within sixty days from invoicing. In 2010, Milestone shipped a significant order to a major international distributor. At the time of the shipment, regulatory approval to sell the product in the respective country was in process. Obtaining such regulatory approval was not a condition of the purchase order and sale to the distributor. The regulatory approval for the sale of the STA instruments was received in the third quarter of 2012, but the regulatory approval for the handpiece components has been delayed and as such the customer has not paid the full amount of the invoiced shipment. Milestone is receiving periodic payments from the international distributor. Based on the periodic payment plan agreed to by the international distributor, Milestone has recorded a long term net accounts receivable of \$164,742 as of September 30, 2012. The current portion of this net accounts receivable is \$98,985. Milestone reserved \$375,707 of the total accounts receivable from this distributor as of September 30, 2012.

**NOTE 4 INVESTMENT IN MEDICAL JOINT VENTURE**

In March 2011, Milestone entered into an agreement with a People's Republic of China ( PRC ) entity (Beijing 3H), to establish a Medical Joint Venture entity in the PRC to develop intra-articular and epidural drug delivery instruments utilizing Milestone's patented *CompuFlo* technology. Beijing 3H Scientific Technology Co., Ltd, agreed to contribute up to \$1.5 million to this Medical Joint Venture entity, based on progress reports from Milestone and subject to refund if the instruments are not developed because of technological problems within 30 months of the inception date. Milestone evaluates the technological feasibility of the products to be developed using the *CompuFlo* technology periodically and at every reporting date to establish if circumstances indicate that the technology continues to be feasible. Based on the available evidence Milestone concluded that the contingency associated with the return of capital to Beijing 3H would

**Table of Contents**

be remote as of September 30, 2012 and accordingly no amounts have been accrued in the accompanying financial statements relating to this contingency. Milestone, with the consent of Beijing 3H, organized a domestic research and development corporation to which Beijing 3H completed a capital contribution of \$1,500,000. The Medical Joint Venture entity is owned fifty percent by the Beijing 3H and fifty percent by Milestone. Milestone contributed an exclusive worldwide royalty-free license to use CompuFlo technology to the Medical Joint Venture which has been valued at approximately \$245,000 and has accounted for its investment in the Medical Joint Venture using the equity method of accounting.

The Medical Joint Venture reimbursed Milestone approximately \$105,000 for previously incurred research and development expenses, which has been included as a credit to research and development expenses in the accompanying statement of operations in March 2011. The Medical Joint Venture's expenses for the nine months ending September 30, 2012 were approximately \$631,000 of which Milestone's share of approximately \$124,000 has been included in the accompanying statement of operations as the proportionate share of losses from the Medical Joint Venture. As of September 30, 2012, Milestone has reduced its investment to Medical Joint Venture to zero. The additional amount of the loss on Medical Joint Venture, approximately \$191,000 has not been charged to the statement of operations as of September 30, 2012. This additional loss, plus future losses from the Medical Joint Venture, will not be charged to the statement of operations as Milestone has not guaranteed and has no obligation to fund future losses of the Medical Joint Venture in excess of this equity contribution. Further, Milestone was authorized by the Medical Joint Venture to manage and oversee the development of the two products for the Medical Joint Venture. In connection with this, Milestone also entered into an agreement with a significant vendor to develop the two instruments included in the Medical Joint Venture.

**NOTE 5 STOCK OPTION PLANS**

A summary of option activity for employees under the plans and changes during the nine months ended September 30, 2012, is presented below:

	Number of Options	Weighted Averaged Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Options Value
Outstanding, January 1, 2012	1,139,282	\$ 0.89	3.62	\$ 1,000
Granted	133,333	0.75	4.28	
Exercised				
Forfeited or expired	67,000	1.58		
Outstanding, September 30, 2012	1,205,615	0.84	3.20	55,311
Exercisable, September 30, 2012	657,669	0.82	2.40	25,533

Milestone recognizes compensation expense on a straight line basis over the requisite service period. During the nine months ended September 30, 2012, Milestone recognized \$86,158 of total compensation cost. As of September 30, 2012, there was \$129,989 of total unrecognized compensation cost related to non-vested options which Milestone expects to recognize over a weighted average period of 2.75 years. A six percent rate of forfeiture is assumed in the calculation of the compensation cost for the period.

Expected volatilities are based on historical volatility of Milestone's common stock over a period commensurate with anticipated term. Milestone uses historical data to estimate option exercise and employee termination within the valuation model.

**Table of Contents**

A summary of option activity for non-employees under the plans and changes during the nine months ended September 30, 2012, is presented below:

	Number of Options	Weighted Averaged Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Options Value
Outstanding, January 1, 2012	414,999	1.87	1.43	\$ 12,000
Granted				
Exercised				
Forfeited or expired	175,000	2.29		
Outstanding, September 30, 2012	239,999	1.56	1.57	32,200
Exercisable, September 30, 2012	224,443	1.67	1.51	32,200

During the nine months ended September 30, 2012, Milestone recognized \$2,023 of expenses related to non-employee options that vested during the year. The total unrecognized compensation cost related to non-vested options was \$206 as of September 30, 2012. A six percent rate of forfeiture is assumed in the calculation of the compensation cost for the period.

In accordance with the provisions of FASB ASC 505-50-15, all other issuances of common stock, stock options or other equity instruments to non-employees as consideration for goods or services received by Milestone are accounted for based on the fair value of the equity instruments issued (unless the fair value of the consideration received can be more reliably measured). The fair value of any options or similar equity instruments issued is estimated based on the Black-Scholes option-pricing model, and the assumption that all of the options or other equity instruments will ultimately vest. Such fair value is measured as of an appropriate date pursuant to the guidance, (generally, the earlier of the date the other party becomes committed to provide goods or services or the date of performance by the other party is complete) and capitalized or expensed as if Milestone had paid cash for the goods or services.

**NOTE 6 CONCENTRATION OF CREDIT RISK**

Milestone's financial instruments that are exposed to concentrations of credit risk consist primarily of cash and trade accounts receivable, and advances to contract manufacturer. Milestone places its cash and cash equivalents with large financial institutions. At times, such investments may be in excess of the Federal Deposit Insurance Corporation insurance limit. Milestone has not experienced any losses in such accounts and believes it is not exposed to any significant credit risks. Financial instruments which potentially subject Milestone to credit risk consist principally of trade accounts receivable, as Milestone does not require collateral or other security to support customer receivables, and advances to contract manufacturer. Milestone entered into a purchase agreement with a vendor to supply Milestone with 5,000 instruments of *CompuDent*, (653 remaining on the purchase order as of September 30, 2012) and 12,000 *STA Instruments* (8,569 remaining on the purchase order as of September 30, 2012). As part of these agreements, Milestone has advanced approximately \$3,091,000 and \$3,407,000 to the vendor for purchase of materials at September 30, 2012 and December 31, 2011, respectively. The advance will be credited to Milestone as the goods are delivered. Milestone does not believe that significant credit risk exists with respect to this advance to the contract manufacturer.

Milestone closely monitors the extension of credit to its customers while maintaining allowances, if necessary, for potential credit losses. On a periodic basis, Milestone evaluates its accounts receivable and establishes an allowance for doubtful accounts, based on a history of past write-offs and collections and current credit conditions. Management has provided a reserve that it believes is sufficient to record accounts receivable at net realizable value as of September 30, 2012 and December 31, 2011.

**NOTE 7 ADVANCES TO CONTRACT MANUFACTURER**

The net advances to contract manufacturer represent funding of future *STA*, *CompuDent* and *Wand Plus* inventory purchases. The balance of the net advances as of September 30, 2012 and December 31, 2011 is approximately

**Table of Contents**

\$3,091,000 and \$3,407,000, respectively. The portion of this advance expected to be utilized in the next twelve months is classified as current asset, with the remainder classified as non-current asset. Milestone has an outstanding accounts payable of approximately \$913,000 and \$1,752,000 at September 30, 2012 and December 31, 2011, respectively to the contract manufacturer specifically related to the advances. Milestone is making monthly payments to the contract manufacturer.

Additionally, Milestone has an agreement with the manufacturer of the *CompuDent* and *STA* instruments to accrue interest on their outstanding accounts payable balance. For the three months ending September 30, 2012 and 2011, the interest expense for this indebtedness was \$13,805 and \$15,245, respectively. For the nine months ending September 30, 2012 and 2011, the interest expense for this indebtedness was \$75,945 and \$30,091, respectively.

**NOTE 8 LINE OF CREDIT AND NOTE PAYABLE**

Milestone had secured a \$1.3 million line of credit from a stockholder which was converted into shares of Milestone's common stock in December 2009. Milestone borrowed an additional \$450,000 from the same shareholder in 2008. The loan was originally a short term loan with a maturity date of January 19, 2009. In December 2008, and again on May 30, 2012, this loan was refinanced with the shareholder and the due date has been extended to January 3, 2014. The loan accrues 12% per annum, interest compounds quarterly, and interest and principal is due at the maturity. Further, the lender was granted warrants exercisable for three and one half years at the price of \$0.32 per share for 45,000 shares of common stock. The warrants were valued using the Black-Scholes model and are reflected as a discount against the debt. These warrants expired in 2012.

Interest expense, relating to the line of credit, for the nine months ended September 30, 2012 and 2011 was \$64,329 and \$59,622, respectively. Accrued interest payable, (included in accrued expenses payable), related to these lines of credit were \$333,876 and \$269,547 at September 30, 2012 and December 31, 2011, respectively. The charge for amortization of Debt Discount related to the outstanding line of credit is \$3,065 and \$3,764 for the nine months ended September 30, 2012 and September 30, 2011, respectively.

**NOTE 9 STOCK ISSUANCES**

During the nine months ended September 30, 2012, Milestone issued 107,143 shares of common stock in an offshore offering, at \$1.40 per share and raised gross proceeds of \$150,000. Milestone issued 8,824 shares of common stock valued at \$4,500 to one party in connection with the consulting services provided on the sale of common stock. Additionally, 82,615 shares of common stock valued at \$31,250 were issued for payment of employee compensation in the nine months ended September 30, 2012. In June 2012, the Company issued 155,172 shares (51,724 shares at \$.29 per share to each of the non-employee directors), to the members of the Company's Board of Directors as partial compensation, (full year is \$30,000 per director), for serving on the Board for the 2012-2013 period. The cost of the compensation, for six months, is \$45,000. The expense is being amortized over a six month period. 72,000 shares of common stock valued at \$20,880 were issued to legal counsel for payment for services provided. Additionally, 275,666 shares valued at \$106,837 were issued for payment of consulting services.

**NOTE 10 RELATED PARTY TRANSACTIONS**

A greater than five percent shareholder of Milestone is also a shareholder of a major supplier of handpieces to Milestone. In addition, he is an investor in the PRC entity, Beijing 3H, which entered into a Medical Joint Venture agreement with Milestone.

Milestone purchased inventories of \$1,439,640 and \$1,212,902 from the supplier for the nine months ended September 30, 2012 and 2011, respectively. Milestone owed \$1,015,104 and \$944,541 to this supplier as of September 30, 2012 and 2011, respectively.

**Table of Contents****NOTE 11 SIGNIFICANT CUSTOMERS**

Milestone had two customers (distributors) that had approximately 40% and 43% of its net product sales for nine months ended September 30, 2012 and 2011, respectively. Milestone had accounts receivable, current and long term, for three customers that amounted to \$532,112 and \$917,575 representing 55% and 64% of gross accounts receivable as of September 30, 2012 and December 31, 2011, respectively.

**NOTE 12 COMMITMENTS AND OTHER***Contract Manufacturing Arrangement*

Milestone has informal arrangements for the manufacture of its products. *STA*, single tooth anesthesia, *CompuDent* and *CompuMed* instruments are manufactured for Milestone by Tricor Systems, Inc. pursuant to specific purchase orders. The *STA* and *The Wand* Handpiece with Needle are supplied to Milestone by a contractor in the United States, which arranges for its manufacture in China.

The termination of the manufacturing relationship with any of the above manufacturers could have a material adverse effect on Milestone's ability to produce and sell its products. Although alternate sources of supply exist and new manufacturing relationships could be established, Milestone would need to recover its existing tools or have new tools produced. Establishment of new manufacturing relationships could involve significant expense and delay. Any curtailment or interruption of the supply, whether or not as a result of termination of such a relationship, would adversely affect Milestone.

The technology underlying the *SafetyWand* and *CompuFlo*, and an improvement to the controls for *CompuDent* were developed by the Director of Clinical Affairs and assigned to us. Milestone purchased this technology pursuant to an agreement dated January 1, 2005. The Director will receive additional payments of 2.5% of the total sales of products using certain of these technologies, and 5% of the total sales of products using certain other of the technologies. In addition, the Director is granted, pursuant to the agreement, an option to purchase, at fair market value on the date of the grant, 8,333 shares of the common stock upon the issuance of each additional patent relating to these technologies. If products produced by third parties use any of these technologies (under license from us) then the Director will receive the corresponding percentage of the consideration received by Milestone for such sale or license. Milestone expensed the Director's royalty fees of \$221,987 and \$235,621 for the nine months ended September 30, 2012 and 2011, respectively. Additionally, Milestone expensed consulting fees to the Director of \$117,000 for the nine months ended September 30, 2012 and 2011.

In January 2010, Milestone issued a purchase order to Tricor Instruments for the purchase of 12,000 *STA Instruments* to be delivered over the next three years. The purchase order is for \$5,261,640. Milestone will be required to make periodic payments over the next eighteen months to purchase the parts necessary to complete this production. As of September 30, 2012, Milestone's production and sales of instruments to this commitment has been delayed. Consequently, advances to contractor have been classified as current and long term at September 30, 2012.

**Table of Contents**

*Other Events*

Milestone entered into a finder's agreements with selected individuals for the purpose of identifying and closing medical device Medical Joint Venture. As of September 30, 2012, none of the potential agreements has been consummated and therefore no expenses have been incurred.

*Subsequent Events*

Subsequent to September 30, 2012, Milestone announced the formation of a strategic alliance, whereby a third party distributor will serve as the exclusive distributor of Milestone's *Single Tooth Anesthesia System*<sup>®</sup> (STA System) and all related disposable items in the United States and Canada, beginning November 15, 2012. Additionally, Milestone and the third party distributor also announced a joint marketing initiative to drive sales in these territories.

In early October 2012, the State Food and Drug Administration (SFDA) of the People's Republic of China approved Milestone's *Single Tooth Anesthesia System*<sup>®</sup> (STA System). Unfortunately, the SFDA bifurcated approval of the STA Systems from the *Wand*<sup>®</sup> handpieces. SFDA approval of the *Wand*<sup>®</sup> handpieces is expected in the coming months.

## **Table of Contents**

### **ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

The following discussions of our financial condition and results of operations should be read in conjunction with the financial statements and the notes to those statements included elsewhere in this Form 10-Q. Certain statements in this discussion and elsewhere in this report constitute forward-looking statements, within the meaning of section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements.

#### **OVERVIEW**

In 2012, Milestone remains focused on advancing efforts to achieve our two primary objectives; those being:

Optimizing our tactical approach to product sales and marketing in order to materially increase penetration of the global dental and medical markets with our proprietary, patented Computer-Controlled Local Anesthesia Delivery (C-CLAD) solution, the *STA Single Tooth Anesthesia Instrument (STA Instrument)*; and

Identifying and pursuing strategic collaborations with third parties to jointly develop new products utilizing our patented *CompuFlo* pressure force technology for novel new medical applications.

*STA Instrument Awards - Industry Recognition*

In July 2010, the *STA Instrument* was recognized as one of *Dentistry Today's* Top 100 Products for the third consecutive year. This honor is significant because it is unprecedented in Milestone's history and serves to support our objective of establishing our instrument as the new global standard of care for painless dental injections.

*STA Instrument Growth*

Since its market introduction in early 2007, the *STA Instrument* and a prior computerized controlled local anesthesia delivery product, have been used to deliver over 48 million of safe, effective and comfortable injections. The instrument has also been favorably evaluated in numerous peer-reviewed, published clinical studies and associated articles. Moreover, there appears to be a growing consensus among users that the *STA Instrument* is proving to be a valuable and beneficial instrument that is positively impacting the practice of dentistry worldwide. The utility and value of the *STA Instrument* is perhaps best summarized by Dr. Joe Blaes, who wrote in the December 2008 edition of *Dental Economics*, "I tried the *STA Instrument* and my patients absolutely love it. This is a no brainer - go get one ASAP!"

*Global Distribution Network*

#### **North America Market**

The *STA Instrument* and related hand pieces are marketed to the dental industry in the United States and Canada by many of the nation's leading dental supply companies, including Henry Schein, Inc., Patterson Dental Supply, Atlanta Dental, Benco Dental, Burkhart Dental, Darby Dental Supply, Dental Health Products, Goetze Dental, Iowa Dental, Nashville Dental and Newark Dental. In Canada, our independent distributors include Henry Schein Canada, Patterson Dental Canada, Hanasmed, Mediclub and Specialty Dental.

In the third quarter of 2010, Milestone added a Domestic Sales Director to refocus our attention on the USA and Canadian markets. The mission of the Domestic Sales Director is to grow our business through marketing our *STA Instrument* to Dental Group Practices, as well as individual dental practitioners. Through direct marketing to the Dental Group Practices and utilizing a group of independent hygienists, the instrument and handpiece sales should increase substantially in the future. Milestone signed on its first Group Dental Practice in January 2011, Towncare Dental.

---

**Table of Contents**

**International Market**

On the global front, we also have granted exclusive marketing and distribution rights for the *STA Instrument* to select dental suppliers in various international regions in Asia, Africa, South America and Europe. They include Istrodent in South Africa and Unident in the Scandinavian countries of Denmark, Sweden, Norway and Iceland.

In April 2009, we signed an Exclusive Distribution and Marketing Agreement with China National Medicines Corporation, d/b/a Sinopharm, which is China's largest domestic manufacturer, distributor and marketer of pharmaceuticals and importer of medical devices and the country's largest domestic distributor of dental anesthetic carpules to the Chinese dental industry. Prior to the end of 2009, China National Medicines issued Milestone a blanket purchase order for 12,000 *STA* instruments to be delivered over 36 months, thereby marking Milestone's initial penetration into China's emerging dental market.

As of September 30, 2012, China National Medicine has not received the appropriate registration approval from the regulatory body in China, therefore, shipment of *STA* instruments and handpieces have been suspended pending the approval to sell and distribute these products in China. In early October 2012, the State Food and Drug Administration (SFDA) of the People's Republic of China approved Milestone's *Single Tooth Anesthesia System*® (*STA System*). Unfortunately, the SFDA bifurcated approval of the *STA Systems* from the *Wand*® handpieces. SFDA approval of the *Wand*® handpieces is expected in the coming months.

According to a report published by the U.S. Department of Commerce, titled *China's Emerging Markets: Opportunities in the Dental and Dental Lab Industry*, China's dental market lags behind other healthcare services and has largely been neglected in the past. In fact, CS Market Research reports that of China's 1.3 billion plus population, 50% of the adults and 70% of the children are estimated to have decayed tooth problems, and over 90% have periodontal disease. However, with increasing affluence of the Chinese population, as well as increasing attention towards personal care, demand for dental services has been growing. Market research firm Freedonia agrees, noting that demand for dental products in China is expected to climb to 21.5 billion RMB (US\$3.15 billion) by 2012, due primarily to escalating personal income levels and government programs promoting awareness of the benefits of good oral care.

Shortly before the end of the second quarter 2009, we announced that we were refining our international marketing strategy to gain greater access to and penetration of the international dental markets for the *STA Instrument*, *CompuDent* and related disposable hand pieces. The new sales strategy provides for increasing hands-on oversight and support of our existing international distribution network, while also attracting new distributors throughout Europe, Asia and South America. To assist in this endeavor, Milestone added in the spring of 2010 an International Sales Director to focus on growth of our products outside the USA and Canada. The new addition to Milestone's staff has proven to be a positive improvement to our sales and marketing effort outside the USA and Canada.

In July 2011, we entered into a definitive medical joint venture agreement (the *Medical Joint Venture*), with Beijing 3H (Heart-Help-Health) Scientific Technology Co., Ltd. (Beijing 3H) for the development, commercialization, manufacture and marketing of epidural and intra-articular injection medical instruments. Milestone and Beijing 3H has a 50% interest in the *Medical Joint Venture*. The shareholders of Beijing 3H are a number of individuals, including a large shareholder in Milestone who is also the principal of a supplier to Milestone.

The *Medical Joint Venture* provides for Milestone's contribution of an exclusive worldwide royalty-free license to use its patents. Beijing 3H contributed \$1.5 million to the *Medical Joint Venture* to design and develop two commercial instrument and related disposables using Milestone's *CompuFit*® technology and disposables. Milestone will have distribution responsibility in the U.S. and Canada while Beijing 3H will distribute products exclusively in the People's Republic of China (PRC), Macao, Hong Kong and other regions of Asia. As of September 30, 2012, Beijing 3H contributed \$1,500,000 to the *Medical Joint Venture* and the development project has been initiated.

**Table of Contents***Segmented Sales Performance*

The following table shows a breakdown of Milestone's product sales (net), domestically and internationally, by product category, and the percentage of product sales (net) by each product category:

Milestone earned gross profits of 71% and 65% for the nine months ended September 30, 2012 and 2011, respectively. However, our revenues and related gross profits have not been sufficient to support our overhead, new product introduction and research and development expenses. Although Milestone anticipates expending funds for research and development in 2012, these amounts will vary based on the operating results for each quarter. Milestone has incurred operating losses since its inception. Milestone achieved profitability and positive cash flow in the third quarter, and is actively pursuing the generation of sustainable positive cash flows from operating activities through increases in revenue, to be derived from a change in the business model in U.S. and Canada. This change in business model incorporates a team of local dental hygienists training and educating the respective dentist in their territories. The business model replaces Milestone's sales force and third party manufacturer's representatives business model.

**Summary of Significant Accounting Policies, Judgments and Estimates**

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to accounts receivable, inventories, stock-based compensation, and contingencies. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates under different assumptions or conditions.

*Accounts Receivable*

The realization of Accounts Receivable current and long-term will have a significant impact on us. Consequently, Milestone estimates allowance for doubtful accounts resulting from the inability of its customers to make payments for amounts billed. The collectability of outstanding amounts is continually assessed.

*Inventories*

Inventory costing, obsolescence and physical control are significantly important to the on-going operation of the business. Inventories principally consist of finished goods and component parts stated at the lower of cost (first-in, first-out method) or market. Inventory quantities on hand are reviewed on a quarterly basis and a provision for excess and obsolete inventory is recorded if required based on past and expected future sales.

**Table of Contents***Investment in Medical Joint Venture*

We entered into a Medical Joint Venture with Beijing 3H for the development and commercialization of two medical products. We own fifty percent of the Medical Joint Venture and have recorded its investment on the equity basis of accounting. Milestone proportionate share of expenses incurred by the Medical Joint Venture will be charged to the Statement of Operations on a periodic basis.

*Impairment of Long-Lived Assets*

Our long lived assets consisting principally patents and trademarks are the base features of the business. We review long-lived assets for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recoverable. The carrying value of the asset is evaluated in relation to the operating performance and future undiscounted cash flows of the underlying assets.

*Revenue Recognition*

Revenue from product sales is recognized net of discounts and allowances to domestic distributor on the date of shipment for essentially all shipments, since the shipment terms are FOB warehouse. We will recognize revenue on date of arrival of the goods at the customer's location where shipments are FOB destination. Shipments to international distributors are FOB the warehouse and revenue is therefore recognized on shipment. In both cases the price to the buyer is fixed and the collectability is reasonably assured. Further, we have no obligation on these sales for any post installation, set-up or maintenance, these being the responsibility of the buyer. Customer acceptance is considered made at delivery. Milestone's only obligation after sale is the normal commercial warranty against manufacturing defects if the alleged defective unit is returned within the warranty periods, which have historically been immaterial.

**Results of Operations**

The consolidated results of operations for the three and nine months ended September 30, 2012 compared to the same three and nine months period in 2011 reflect our focus and development on the *Wand/STA Instruments*, as well as continuing efforts on identifying collaborative partners for new product development utilizing our *CompuFlo* technology.

The following table sets forth, for the periods presented, the statement of operations data as a percentage of revenues. The trends suggested by this table may not be indicative of future operating results.

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2012		2011		2012		2011

**Table of Contents*****Three months ended September 30, 2012 compared to three months ended September 30, 2011***

Total product sales for the three months ended September 30, 2012 and 2011 were \$2,129,241 and \$1,745,876, respectively. The total increase in product sales of \$383,365, or 22%, in 2012 from 2011 is principally the result of increased domestic revenues. Domestic *STA* instruments sales increased by \$22,223 in 2012 from 2011. Additionally, in the domestic market, total handpiece sales increased by \$407,382, or 53% in 2012 over 2011. This increase was primarily due to advance purchases by distributors in consideration of a price increase. On the international front, instruments sales decreased in the third quarter of 2012 from 2011 by \$104,107, or 32%, principally due to slower market penetration for the *CompuDent/Wand Plus Instruments* in existing international countries. Significant new market countries for the *STA Instruments* have not come on board in the quarter ending September 30, 2012. Internationally, handpiece sales decreased by \$18,348, or 3.2% due to a decrease in *Wand* handpieces sales of \$138,250 in 2012 over 2011. *STA* handpiece sales increased by \$119,902, or 94% for the third quarter 2012 over 2011. This trend supports the increased value of the *STA Instruments* being sold internationally versus the sale of the legacy *CompuDent/Wand Plus Instruments*.

Cost of products sold for the three months ended September 30, 2012 and 2011 were \$625,710 and \$597,528, respectively, an increase of \$28,182, or 4.7%. However, for the three months ended September 30, 2012, we incurred \$47,966 of the airfreight due to delays in manufacturing handpieces offset by a recovery of expenses directly attributable to a recall on needles from a supplier.

For the three months ended September 30, 2012, Milestone generated a gross profit of \$1,503,531, or 71%, as compared to a gross profit of \$1,148,348, or 66%, for the three months ended September 30, 2011. The total increase in gross profit dollars of \$355,183 is primarily due to an increase in domestic revenue sales and reduced airfreight charges for handpiece deliveries, offset by a recovery of expenses, due to a recall of needles from a domestic supplier. We do not expect this expense to be as significant in the next quarter.

Selling, general and administrative expenses for the three months ended September 30, 2012 and 2011 were \$1,391,521 and \$1,695,908, respectively. This reduction in expenses of \$304,386, or 17.9%, is described in the following sections of this report. Milestone continues to focus on controlling expenses in all categories. The third quarter of 2012 noted several decreases to continue on our planned business model change to the training and education hygienist program. First, trade show and related expenses (travel, fees and staffing) decreased by approximately \$52,000 as Milestone targeted this venue as a more costly method to present our *Wand/STA Instrument*. Milestone has decided to focus our attention to the national shows that are more focused on larger attendance by the individual as well as dental practice groups. Sales expenses also decreased during the third quarter of 2012 principally in travel costs as Milestone's two sales directors focused on opening new targeted markets and expanding our distributor sales. Salaries decreased by approximately \$31,000 in this quarter over the comparable quarter in the prior year. Legal fees increased by approximately \$7,000 in the aggregate for routine litigation and patent annuities. Other expenses for the quarter decreased by approximately \$158,000, as compared to the same period in 2011. The decrease was primarily due to an approximately \$14,000 reduction on the reserve for bad debts, as Milestone reversed a portion of the bad debt reserve based on payments made by a Chinese distributor in the third quarter of 2012. The international commission decreased by approximately \$43,000. Stock Based Compensation decreased by approximately \$47,000. International travel cost decreased by approximately \$14,000. This decrease in international travel is due to selective traveling internationally for the quarter.

Research and development expenses for the three months ended September 30, 2012 and 2011 was \$60,363 and a negative \$7,403, respectively, an increase of \$67,766.

The income from operations for three months ended September 30, 2012 were \$51,647 and loss from operations for the three months ended September 30, 2011 were \$540,157, respectively. The \$591,804, decrease is explained above.

**Table of Contents**

Interest expense was \$36,497 for the quarter. \$22,053 relating to the converted \$1.3 million Line of Credit into common stock in December 2009 and the \$450,000 long term note payable was charged for the three months ended September 30, 2012, compared to \$19,696, for the same period in 2011, (see Note 8 to the financials). Additionally, Milestone accrued interest expense of \$13,805 and \$15,245 for the overdue accounts payable balance to the instrument manufacturer at September 30, 2012 and 2011, respectively.

The third quarter of 2012 does not include a Loss on Earnings of Medical Joint Venture. The expenses incurred to date exceeded the investment made by the Company, (\$245,000) by \$191,000. As such, additional costs are deferred until a future date.

For the reasons explained above, net income for the three months ended September 30, 2012 was \$15,151 as compared to a net loss of \$637,338 for the three months ended September 30, 2011. The \$652,489, or 102%, increase in net income is primarily a result of an increase in gross margin dollars of \$355,183 offset by a decrease in selling, general and administrative expenses of \$304,387, an increase in research and development expense of \$67,766 and a decrease in interest expense by \$657 and a decrease in non-cash Loss on Earnings from Medical Joint Venture of \$60,027.

*Nine months ended September 30, 2012 compared to the nine months ended September 30, 2011*

Total revenues for the nine months ended September 30, 2012 and 2011 were \$6,377,574 and \$6,653,983, respectively. Total revenues decreased by \$258,409, or 3.9%. International revenue decreased \$9,140, as compared to the 2011 period. Domestic product revenue decreased \$270,663 in 2012, or 7.7%, the decrease is due to the decrease in *STA Single Tooth Anesthesia System*<sup>®</sup> instruments sales by \$581,847. This decrease was primarily due to a longer sales cycle to close a group dental practice in the domestic market and reduced advertising expenditures during the period. The disposable handpiece sales increased by \$232,680, or 9.7%. International sales of disposable handpieces increased by \$335,667 or 19%.

Cost of products sold for the nine months ended September 30, 2012 and 2011 were \$2,142,661 and \$2,345,191, respectively, a decrease of \$205,530, or 8.6%. However for the nine months ended September 30, 2012, the Company absorbed \$56,734 of the airfreight due to delays in manufacturing handpieces, offset by the recovery of expenses. This cost was directly attributable to a recall on needles from a supplier.

Gross profit for the nine months ended September 30, 2012 and 2011 was \$4,234,914 or 66%, and \$4,290,792, or 65%, respectively. Gross profit dollars in the nine months of 2012 decreased by \$55,878, 1.3% due to a decrease in sales volume and gross profit margin in 2012 over 2011 and the additional airfreight charges, offset by the recovery of expenses as previously noted.

Selling, general and administrative expenses for the nine months ended September 30, 2012 and 2011 were \$4,330,847 and \$5,121,831, respectively. The decrease of \$790,984 or 15.4% is attributable to a decrease in marketing expenses of \$140,052; a decrease in sales expenses of \$90,464, a decrease in salary expenses of \$354,812, principally due to a change in the bonus program for our Chief Executive Officer, and a decrease in general and administrative (G&A) expenses of \$205,696. The marketing expenses decrease is principally due to a reduction in advertising and media placement costs of \$74,598 and tradeshow attendance by \$63,092. Sales expenses decrease by \$90,464, due to an overall decrease in business travel domestic and international. Also included in the category are the costs related to our independent third party hygienists. Other general and administrative expenses decreased by \$227,140, due to the increased international commission of \$26,791, decrease in royalty expense of \$13,635, based on reduced international sales and domestic sales. Additionally, recovery of bad debt expense, \$56,293, based on partial collection of previously recorded bad debt reserve for an international accounts receivable, a decrease in travel expenses by \$25,815, a decrease in consulting fees of \$48,292 and business finder s fee of \$49,845.

Research and development expenses for the nine months ended September 30, 2012 and 2011 were \$139,176 and \$92,540, respectively. The increase of \$46,636, or 50.4%.

## **Table of Contents**

The loss from operations for nine months ended September 30, 2012 and 2011 were \$235,110 and \$923,579, respectively. The \$688,469, or 74.5%, decrease is explained above.

Interest expense of \$64,329 relating to the converted \$1.3 million line of credit into common stock in December 2009 and the \$450,000 long term note payable, was charged for the nine months ended September 30, 2012, compared to \$57,463 for the same period in 2011, (see Note 8 to the financials). Additionally, Milestone accrued interest expense of \$75,945 and \$30,091 for the overdue accounts payable balance to the instrument manufacturer at September 30, 2012 and 2011, respectively.

For the reasons explained above, net loss for the nine months ended September 30, 2012 and 2011 was \$504,571 and \$1,077,049, respectively. The \$572,478, or 53.2%, decrease in net loss is primarily a result of a decrease in gross margin dollars of \$55,878 offset by a decrease in selling, general and administrative expenses of \$790,984, an increase in research and development expense of \$46,636, an increase in interest expense by \$52,538 and the increase in non-cash Loss on the Medical Joint Venture of \$64,152.

Working capital as of September 30, 2012 is a negative \$690,508, as explained in the following liquidity and capital resources section.

## **Liquidity and Capital Resources**

As of September 30, 2012, Milestone had cash and cash equivalents of \$273,526 and a negative working capital of \$690,508. Milestone had net losses of \$504,571 and \$1,077,049 for the nine months ended September 30, 2012 and 2011, respectively. The negative working capital of \$690,508 in 2012 was the result of continued delay in obtaining regulatory approval to sell our instruments and handpieces in China. Based on the initial purchase order from our distributor in China in 2009, Milestone ramped up purchasing of parts in anticipation of significant sales in 2010 and future years. As a result of the delay in shipping, the advances to contract manufacturer has decreased, (current and long term), at September 30, 2012 as compared to December 31, 2011. Accounts payable due these suppliers has decreased to \$912,947 as of September 30, 2012 as compared to \$1,751,758 as of December 31, 2011. And finally, the accounts receivable from the China distributor has been classified between current and long term net of a reserve of doubtful accounts of \$375,707.

As a result, there was a decrease in negative working capital at September 30, 2012, of \$620,427, consisting of a net current asset decrease of \$468,238. The significant current asset changes are: cash increased by \$177,202, current accounts receivable decreased by \$360,124, and inventory decreased by \$119,839. Current liabilities decreased by \$1,088,665, primarily due to decrease in accounts payable to suppliers of instruments and handpieces by \$1,030,987.

Milestone has also incurred a decrease in noncurrent advances to contract manufacturer of \$303,497. Milestone continues to take positive steps to maintain adequate inventory levels and advances to contract manufacturers to maintain available inventory to meet our domestic and international sales requirements. Cash flows from operating activities for the nine months ended September 30, 2012 was a positive \$52,792 and for the nine months ended September 30, 2011 was a negative \$301,734.

For the nine months ended September 30, 2012, our net cash provided by operating activities was \$52,792. This was attributable primarily to a net loss of \$504,571 adjusted for noncash items of \$341,782, principally common stock and options issued for compensation, consulting and vendor services, and changes in operating assets and liabilities of \$215,581.

For the nine months ended September 30, 2012, \$150,000 was provided by financing activities. 107,143 shares of common stock were issued in an offshore offering of common stock at \$1.40 per share resulting in gross proceeds of \$150,000.

Additionally, Milestone received an extension on the maturity date for the \$450,000 long term note until January 3, 2014.

**Table of Contents**

Milestone has incurred operating losses and negative cash flows from operating activities since its inception, except for 2009. Milestone did not achieve positive cash flow in 2011. Milestone is actively pursuing the generation of positive cash flows from operating activities through increases in revenues based upon management's assessment of present contracts and current negotiations and reductions in operating expenses. As of September 30, 2012, Milestone believes that it does not have sufficient cash reserves to meet all of its anticipated obligations for the next twelve months. However, if Milestone requires a need for a higher level of marketing and sales effort, or if Milestone is unable to continue generating positive cash flows from its operating activities it will need to raise additional capital. There is no assurance that Milestone will be able to continue to achieve positive operating cash flows or that additional capital can be raised on the terms and conditions satisfactory to Milestone if at all. If additional capital is required and it cannot be raised, then Milestone would be forced to curtail its development activities, reduce marketing expenses for existing dental products or adopt other cost savings measures, any of which might negatively affect Milestone's operating results.

Milestone's recurring losses and negative operating cash flows raise substantial doubt about its ability to continue as a going concern. The accompanying financial statements do not include any adjustment that might result from the outcome of this uncertainty.

**Table of Contents**

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

As a smaller reporting company we are not required to provide the information required by this Item.

**Item 4. Controls and Procedures**

Milestone's management, including the Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the design and operation of Milestone's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report. Based upon that evaluation, Milestone's Chief Executive Officer and Chief Financial Officer have concluded that the disclosure controls and procedures as of September 30, 2012 are effective to ensure that information required to be disclosed in the reports Milestone files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to Milestone's management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding disclosure.

There were no changes in Milestone's internal control over financial reporting identified in connection with the evaluation that occurred during Milestone's last fiscal quarter ended September 30, 2012 that have materially affected, or that are reasonably likely to materially affect, Milestone's internal controls over financial reporting.
