Description of Floating Rate Notes

The interest rate on the Floating Rate Notes will be calculated by The Bank of New York Mellon, as calculation agent, and will be equal to LIBOR plus 0.300%. The calculation agent will set the initial interest rate on June 3, 2013 and reset the interest rate on each interest payment date, each of which we refer to as an interest reset date. The second London business day preceding an interest reset date will be the interest determination date for that interest reset date. The interest rate in effect on each day that is not an interest reset date will be the interest rate determined as of the interest determination date pertaining to the immediately preceding interest reset date. The interest rate in effect on any day that is an interest reset date will be the interest rate determined as of the interest determination date pertaining to that interest reset date.

LIBOR will be determined by the calculation agent in accordance with the following provisions:

- (a) With respect to any interest determination date, *LIBOR* will be the rate for deposits in United States dollars having a maturity of three months commencing on the first day of the applicable interest period that appears on Reuters Page *LIBOR01* as of 11:00 a.m., London time, on that interest determination date. If, on an interest determination date, such rate does not appear on Reuters Page *LIBOR01* as of 11:00 a.m., London time, or if Reuters Page *LIBOR01* is not available on such date, the calculation agent will obtain such rate from Bloomberg L.P.'s page *BBAM*. If no rate appears on Reuters Page *LIBOR01* or Bloomberg L.P. page *BBAM* as of approximately 11:00 a.m., London time, on such interest determination date, *LIBOR* for that interest determination date will be determined in accordance with the provisions described in (b) below.
- (b) With respect to an interest determination date on which no rate appears on Reuters Page *LIBOR01* or Bloomberg L.P. page *BBAM*, as specified in (a) above, the calculation agent will request the principal London offices of each of four major reference banks in the London interbank market, as selected by the calculation agent (after consultation with the Company), to provide the calculation agent with its offered quotation for deposits in United States dollars for the period of three months, commencing on the first day of the applicable interest period, to prime banks in the London interbank market at approximately 11:00 a.m., London time, on that interest determination date and in a principal amount that is representative for a single transaction in United States dollars in that market at that time. If at least two quotations are provided, then *LIBOR* on that interest determination date will be the arithmetic mean of those quotations. If fewer than two quotations are provided, then *LIBOR* on the interest determination date will be the arithmetic mean of the rates quoted at approximately 11:00 a.m., in The City of New York, on the interest determination date by three major banks in The City of New York selected by the calculation agent (after consultation with the Company) for loans in United States dollars to leading European banks, having a three-month maturity and in a principal amount that is representative for a single transaction in United States dollars in that market at that time. If, however, the banks selected by the calculation agent are not providing quotations in the manner described by the previous sentence, *LIBOR* determined as of that interest determination date will be *LIBOR* in effect on that interest determination date.

Reuters Page LIBOR01 means the display designated on page *LIBOR01* by Reuters Group plc (or such other page as may replace the *LIBOR01* page on that service (or any successor service) or such other service as may be nominated by the British Bankers' Association for the purpose of displaying London interbank offered rates for U.S. dollar deposits).

All percentages resulting from any calculation of the interest rate on the Floating Rate Notes will be rounded to the nearest one hundred-thousandth of a percentage point with five one millionths of a percentage point rounded upwards (e.g., 9.876545 % (or .09876545) would be rounded to 9.87655% (or .0987655)), and all dollar amounts used in or resulting from such calculation on the Floating Rate Notes will be rounded to the nearest cent (with one-half cent being rounded upward). Each calculation of the interest rate on the Floating Rate Notes by the calculation agent will (in the absence of manifest error) be final and binding on the noteholders and the Company.

So long as any of the Floating Rate Notes remains outstanding, there will at all times be a calculation agent. Initially, The Bank of New York Mellon will act as calculation agent. If that bank is unable or unwilling to continue to act as the calculation agent or if it fails to calculate properly the interest rate on the Floating Rate Notes for any interest period, the Company will appoint another leading commercial or investment bank engaged in the London interbank market to act as calculation agent in its place. The calculation agent may not resign its duties without a successor having been appointed. The Company will make each interest payment to the holders of record of Floating Rate Notes at the close of business on March 1, June 1, September 1 and December 1 immediately preceding the relevant interest payment date. The trustee, through its corporate trust office in the Borough of Manhattan, City of New York (in such capacity, the paying agent) will act as the Company's paying agent with respect to the Floating Rate Notes. Payments of principal, interest and premium, if any, will be made by the Company through the paying agent to DTC.

The interest rate on the Floating Rate Notes will in no event be higher than the maximum rate permitted by New York law as the same may be modified by United States laws of general application.

In addition to the terms described above, the following subsections from the section of the preliminary prospectus supplement entitled Description of Notes relate to the description of the Floating Rate Notes: the introductory paragraphs, Ranking , No Listing , Covenants , Issues and Book-Entry System , and the section of the base prospectus entitled Description of Debt Securities . The Floating Rate Notes are not redeemable prior to maturity and are not entitled to the benefit of a sinking fund.

In addition to the risk factors set forth in the preliminary prospectus supplement, the following risk factor relates to the Floating Rate Notes:

Uncertainty relating to the LIBOR calculation process may adversely affect the value of the Floating Rate Notes.

Regulators and law enforcement agencies in the United Kingdom and elsewhere are conducting civil and criminal investigations into whether the banks that provide rates to the British Bankers Association, or the BBA, in connection with the calculation of LIBOR may have been under-reporting or otherwise manipulating or attempting to manipulate LIBOR.

Actions by the BBA, regulators or law enforcement agencies may result in changes to the manner in which LIBOR is determined. At this time, it is not possible to predict the effect of any such changes and any other reforms to LIBOR that may be enacted in the United Kingdom or elsewhere. Uncertainty as to the nature of such potential changes may adversely affect the trading market for LIBOR-based securities, including the Floating Rate Notes.
